Wretch of Kyuss ..... 181
Xivorts ..... 208
Yetis ..... 210
Yuan-ti ..... 212

# Monsters A to Z

**You can** never have enough monsters in a Dungeons & Dragons® campaign. With more than 300 new creatures contained within its pages, *Monster Manual*® 3 features a fiendish array of clever tricksters, hulking brutes, and diabolical villains to vex player characters. From the treacherous jackalwere to the insane derro, a number of classic Dungeons & Dragons monsters join 4th Edition with the arrival of this book.

If you've read the first two books of this series, you'll probably notice a number of differences in this book's approach to describing monsters. For instance, the "flavor" text that accompanies a creature's statistics block relies more on story material rather than game mechanics to get its message across. We made this change because many monsters have vivid stories tied to the game's setting. As we move forward and explore monsters, both new and old, we want to do more to showcase the background, history, and unique characteristics that make a monster interesting. Our goal is to ensure that new monsters earn a place in your campaign not only through fun and innovative mechanics but also because of a compelling story that ignites the imagination.

Another big change is the layout of a monster's statistics block, which we've redesigned to make it easier for you to play the creature (and all of its allies) at the table. See the next four pages for a full discussion of how to read and use the statistics blocks.

At the end of this book is a comprehensive, up-to-date glossary of game terms that appear in *Monster Manual 3* as well as in other rule books.

RALPH HORSLEY

# THE STATISTICS BLOCK

Monster statistics are presented in a format designed to be easy to use and reference. A typical statistics block is formatted as follows.

| **Monster Name** | **Level and Role** |
|---|---|
| Size, origin, and type (keywords), race | XP value |
| **HP** maximum; **Bloodied** value | **Initiative** modifier |
| **AC**, **Fortitude**, **Reflex**, **Will** | **Perception** modifier |
| **Speed** | Special senses |
| **Immune** type/effect; **Resist** type; **Vulnerable** type | |
| **Saving Throws** modifier; **Action Points** number | |
| TRAITS | |
| ☼ **Aura Name** (keywords) ✦ **Aura** size | |
| Effect. | |
| **Trait Name** (keywords) | |
| Effect. | |
| STANDARD / MOVE / MINOR / FREE ACTIONS | |
| [Icon] **Power Name** (keywords) ✦ **Usage** | |
| *Requirement:* | |
| *Attack:* Type range (target); bonus vs. defense | |
| *Hit/Miss/Effect/Sustain Action/Secondary Attack/Aftereffect/Failed Saving Throws/Special:* | |
| TRIGGERED ACTIONS | |
| [Icon] **Power Name** (keywords) ✦ **Usage** | |
| *Requirement:* | |
| *Trigger:* | |
| *Attack (Action):* Type range (target); bonus vs. defense | |
| *Hit/Miss/Effect (Action)/Sustain Action/Secondary Attack/Aftereffect/Failed Saving Throws/Special:* | |
| **Skills** skill modifiers | |
| **Str** score (modifier) **Dex** score (modifier) | **Wis** score (modifier) |
| **Con** score (modifier) **Int** score (modifier) | **Cha** score (modifier) |
| **Alignment** **Languages** | |
| **Equipment** | |

## Level and Role

A monster's level and role are tools for you to use when building an encounter. Chapter 4 of the *Dungeon Master's Guide* explains how to use these tools.

**Level:** A monster's level summarizes how tough it is in an encounter. Level determines most of the monster's statistics as well as the experience point (XP) award the PCs earn for defeating it (*Dungeon Master's Guide*, pages 56-57).

**Role:** A monster's role describes its preferred combat tactics, much as a character class's role suggests tactics for characters of that class. Monster roles are artillery, brute, controller, lurker, skirmisher, and soldier (*Dungeon Master's Guide*, pages 54-55).

A monster might have a second role: elite, solo, or minion. Elite monsters and solo monsters are tougher than standard monsters, and minions are weaker. For the purpose of encounter building, an elite monster counts as two standard monsters of its level, a solo monster counts as five, and four to six minions count as one—four at heroic tier, five at paragon tier, and six at epic tier.

In addition, a monster might have the leader subrole, indicating that it grants some sort of boon to its allies, such as a beneficial aura.

## Size

A creature's size determines its space as well as its reach. A creature might have a greater reach depending on the characteristics of its body.

| Monster Size | Space | Typical Reach |
|---|---|---|
| Tiny | 1/2 × 1/2 | 0 |
| Small | 1 × 1 | 1 |
| Medium | 1 × 1 | 1 |
| Large | 2 × 2 | 1 or 2 |
| Huge | 3 × 3 | 2 or 3 |
| Gargantuan | 4 × 4 or larger | 3 or 4 |

**Space:** This is the area (measured in squares) that a creature occupies on the battle grid.

**Reach:** In statistics blocks released before *Monster Manual 3*, when a creature's reach was other than 1, it was noted at the beginning of a melee attack power. In the new format, the range entry contains this information. If you need to determine a creature's reach, such as for a grab attack or an attempt to pick up an object, refer to the table above.

Even if a creature's reach or melee range is greater than 1, the creature can't make opportunity attacks against targets that aren't adjacent to it.

A creature that has a melee attack with a range of 0 (such as the quasit) cannot normally make melee attacks against targets outside its own space.

## Origin

A monster's origin—aberrant, elemental, fey, immortal, natural, or shadow—describes its place in the DUNGEONS & DRAGONS cosmology. See the glossary for information about each origin.

## Type

A creature's type—animate, beast, humanoid, or magical beast—summarizes some basic facts about its appearance and behavior. See the glossary for information about each type.

### Keywords/Race

Some monsters have keywords that further define them. These keywords represent groups of monsters, such as demon, devil, dragon, and undead. This part of the entry might also include a monster's race if its race is not included in the monster's name.

### XP Value

The experience point award for defeating this creature is given beneath its level and role.

## HP/Initiative

The monster's maximum hit points, bloodied value, and modifier to initiative checks are on the top line of its statistics.

## Defenses/Perception

All four defense scores are on the next line, along with the monster's Perception modifier (often used at the start of an encounter).

## Speed

A monster's speed represents the number of squares it can move when taking a move action to walk. If a monster has alternative movement modes, such as fly, climb, or swim, that fact is noted in its speed entry. Special modes of movement are defined in the glossary.

## Senses

Some monsters have special senses, such as darkvision or tremorsense. Any such senses are noted below a monster's Perception modifier, and these terms are defined in the glossary.

## Immune

If a monster is immune to a damage type (such as cold or fire), it doesn't take that type of damage. If a monster is immune to a condition or another effect (such as the dazed condition or forced movement), it is unaffected by that condition or effect. If a monster is immune to charm, fear, illusion, poison, or sleep, it is unaffected by the nondamaging effects of a power that has that keyword.

Immunity to one part of a power does not make a monster immune to other parts of the power. For example, a thunder power deals no thunder damage to a creature that is immune to thunder, but the power could still push the creature.

## Resist

A creature that has resistance takes less damage from a specific damage type. For example, a creature that has resist 10 fire takes 10 less damage when an attack deals fire damage to it or when it takes ongoing fire damage.

**Against Combined Damage Types:** A creature's resistance is ineffective against combined damage types unless the creature has resistance to each of the damage types, and then only the weakest of the creature's resistances applies. For example, a power that deals 15 lightning and thunder damage hits a a creature that has resist 10 lightning and resist 5 thunder. The creature takes 10 damage, because the resistance to the combined damage types is limited by the lesser of the two resistances.

**Not Cumulative:** Resistances to the same damage type are not cumulative. Only the highest resistance applies. For example, if a creature has resist 5 cold and then gains resist 10 cold, the creature has resist 10 cold, not resist 15 cold.

See also "Damage Type," page xx.

## Vulnerable

A creature that is vulnerable to a particular damage type takes a specific amount of extra damage when it takes damage of that type, the creature is subject to a specific effect, or both. For example, a creature that has vulnerable 10 radiant takes 10 extra radiant damage when an attack deals radiant damage to it or when it takes ongoing radiant damage.

**Against Combined Damage Types:** A creature's vulnerability to a specific damage type applies even when that damage type is combined with another. For example, if a creature has vulnerable 5 fire, the creature takes 5 extra damage when it takes ongoing fire and radiant damage.

**Not Cumulative:** Vulnerabilities to the same damage type are not cumulative. Only the highest vulnerability applies. For example, if a creature has vulnerable 5 psychic and then gains vulnerable 10 psychic, the creature has vulnerable 10 psychic, not vulnerable 15 psychic.

See also "Damage Type," page xx.

## Saving Throws

Some monsters have bonuses to saving throws. A monster adds its bonuses to its saving throw result to see if an effect ends.

## Action Points

Elite and solo monsters typically have action points they can spend to take extra actions, just as player characters do. Unlike characters, a monster can spend more than 1 action point in an encounter, but only 1 per round.

## Traits

| Traits |
| --- |
| ☼ **Aura Name** (keywords) ✦ **Aura** size |
| Effect. |
| **Trait Name** (keywords) |
| Effect. |

The Traits section includes characteristics of the creature that are not powers. Many traits are always in effect, such as regeneration or the ability to deal extra damage on certain attacks. Others can be turned on or off, such as an aura or a benefit for a creature's mount or rider.

### Aura
An aura is a continuous effect that emanates from a creature. It's denoted by a special icon (☼), and the aura's size is noted to the right of its name. A creature's aura affects each square within line of effect and within the specified distance from that creature. A creature's aura does not affect the creature itself, unless otherwise noted, and is unaffected by terrain or environmental phenomena.

A creature can deactivate or reactivate its aura as a minor action. If a creature dies, its aura ends immediately.

If auras overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping auras is subjected to the worst penalty; the penalties are not cumulative. For instance, if a creature is affected by three overlapping auras that each impose a –2 penalty to attack rolls, the creature takes a –2 penalty, not a –6 penalty.

## Action Type

Standard / Move / Minor / Free Actions
**[Icon] Power Name** (keywords) ✦ **Usage**
*Requirement:*
*Attack:* Type range (target); bonus vs. defense
*Hit/Miss/Effect/Sustain Action/Secondary Attack/Aftereffect/Failed Saving Throws/Special:*

A monster's standard, move, minor, and non-triggered free actions are organized by action type.

### Powers
A monster's powers are presented under their respective action type in order of frequency of usage, from at-will to recharge to encounter powers.

#### Icon/Type
The name line of an attack power includes an icon (if applicable) that represents the power's type: melee (⸸), ranged (➶), close (✧), or area (✵).

A basic attack has a circle around its icon, denoting a melee basic attack ⓘ or ranged basic attack ➴.

#### Usage
A monster power is usable at will, once per encounter (or rarely once per day), or it recharges in certain circumstances.

**Recharge** ⚁ ⚄ ⚅: The power has a random chance of recharging during each round of combat. At the start of each of the monster's turns, roll a d6. If the roll is one of the die results shown in the power description, the monster regains the use of that power. The power also recharges after a short rest.

**Recharge if/when . . . :** The power recharges in a specific circumstance, such as when the monster is first bloodied during an encounter. The power also recharges after a short rest.

#### Requirement
Some powers have a precondition that must be met for a monster to use the power.

#### Attack
A monster power that has an attack roll is an attack power. Sometimes an attack entry includes special information about a component of that entry.

#### Type and Range
A power's type and range are given first on the power's Attack entry. The types are melee, ranged, area, and close. Each type has rules for range and targeting, detailed on pages 270–273 of the *Player's Handbook*.

#### Targets
In parentheses after the attack type and range is information that describes which or how many creatures a power targets.

#### Attack Bonus/Defense
Usually, the last element in a power's attack entry is the monster's attack bonus and the defense the power targets.

#### Hit
This entry describes what happens to each target that a monster hits with a power's attack.

#### Miss
This entry describes what happens to each target that a monster misses with a power's attack.

"Half damage" in this entry refers to rolled damage. Roll the damage specified in the "Hit" entry and deal half of that damage to each target the monster misses. "Half damage" does not apply to ongoing damage or any other damaging effects in the "Hit" entry.

#### Effect
Anything that appears in an "Effect" entry occurs when the monster uses the power, whether or not it hits with it.

#### Secondary Attack
Some powers allow a monster to make secondary attack. A "Hit," a "Miss," or an "Effect" entry tells you if a monster makes a secondary attack. Unless otherwise noted, the attack type and the range of a secondary attack are the same as the power's, and the secondary attack doesn't require a separate action. As with normal attack powers, the target of a secondary attack is identified after the attack's type and range.

#### Sustain
If a power has a "Sustain" entry, the monster can keep part of that power active by taking a specific type of

action before the end of each of its turns. A monster can't take the sustaining action until the turn after it uses the power. The entry's name specifies the action type that must be taken—most often minor, move, or standard. See "Durations," page 278 in the *Player's Handbook*, for more about sustaining powers.

### Aftereffect

An aftereffect automatically occurs after another effect ends. In a power description, an "Aftereffect" entry follows the effect it applies to.

A target is sometimes subjected to an aftereffect after a save. If that save occurs when the target is rolling multiple saving throws, the aftereffect takes effect after the target has rolled all of them.

### Failed Saving Throw

Sometimes an effect changes as a target fails saving throws against it. The new effect, specified in a "First Failed Saving Throw" or a "Second Failed Saving Throw" entry, takes effect after the target fails a saving throw against the previous effect at the end of the target's turn. A few effects also specify something that happens on "Each Failed Saving Throw." This is a new effect that is repeated whenever a target fails a saving throw against the effect during the end of its turn.

An effect doesn't change if the creature fails a saving throw against it at a time other than the end of its turn.

### Special

Any unusual information about the use of a power appears in this entry. For example, some powers can be used as basic attacks, which is noted in a "Special" entry.

## Triggered Actions

**Triggered Actions**

**[Icon] Power Name** (keywords) ✦ **Usage**

*Requirement:*

*Trigger:*

*Attack (Action):* Type range (target); bonus vs. defense

*Hit/Miss/Effect (Action)/Sustain Action/Secondary Attack/Aftereffect/Failed Saving Throws/Special:*

This section contains powers that have triggers. These powers have a few entries that other powers don't.

### Trigger

A trigger defines when a monster is able to use a power. A monster must still be able to take the power's required action and meet any requirements.

### (Action)

A triggered power's action type is given in parentheses at the start of its Attack entry or its Effect entry. The type might be an immediate reaction, an immediate interrupt, an opportunity action, or a free action. Some powers require no action to use; they simply occur in response to a trigger.

## Skills

The skills section of a monster's statistics block includes only trained skills or skills for which the monster has an unusual modifier. A monster's Perception modifier isn't repeated here, even if Perception is trained.

## Ability Scores

A monster's six ability scores are included toward the bottom of its statistics block. Following each score in parentheses is the adjusted ability score modifier, including one-half the monster's level, which is useful whenever the monster needs to make an untrained skill check or an ability check.

## Alignment

A monster's most typical alignment is noted in its statistics block. Chapter 2 of the *Player's Handbook* contains information on the various alignments.

## Languages

This entry gives the languages that a monster can speak and understand. An individual monster might know additional languages, such as Common or the languages of its companions. See the *Dungeon Master's Guide*, page 171, for more information about the languages of the Dungeons & Dragons world.

## Equipment

A monster's "Equipment" entry notes important items a monster is carrying. A monster might carry equipment that is not noted in the "Equipment" section. Equipment that is unimportant to a monster is left for the Dungeon Master to decide.

If a character gains a monster's equipment, he or she can use it as normal gear. A character does not gain the powers that a monster uses through a piece of equipment.

A piece of equipment that player characters use does not necessarily have the same properties for monsters. For example, a greataxe has the high crit property, but a monster using the item does not benefit from the property unless noted in its statistics.

## Healing Surges

Monsters have healing surges. However, few monsters have powers that let them spend healing surges. The number of healing surges a monster has is based on its level: 1–10, one healing surge; 11–20, two healing surges; 21 or higher, three healing surges.

Because they rarely come into play, healing surges are not included in a monster's statistics block.

# Ape

The rustling of trees and a glimpse of dark shapes descending from the canopy are the prelude to many explorers' deaths. Adventurers who return from deep jungles tell of the great beasts protecting lost tribes, ruined temples, or vast stores of treasure. Apes fight viciously to defend their homes, for they have lived in jungles since the dawn of creation. Some humanoids revere them as manifestations of primal spirits; others enslave them to use as laborers and war beasts.

## Lore

**Nature DC 17:** Although apes fight viciously to defend their territory and families, they are not savage beasts. Apes kill because trespassers have entered ape territory or attacked creatures or sites that the apes protect. Adventurers who wish to avoid conflict with apes should keep alert when traveling through jungles, watching for signs of the beasts' passage.

## Encounters

Jungle tribes have long known about apes and made use of them. Tribes of goblins kidnap young apes, training the beasts to defend the goblins and their homes. Some humanoids use apes as slave laborers. In addition, spellcasters occasionally manage to capture apes, which they train for use as shock troops and bodyguards.

## Great Ape

The jungle's hot, humid air pulls at the lungs, while dense underbrush and thick mists conceal great apes stalking their quarry. They surround unwary travelers and block all escape routes. Trapped creatures have little choice but to battle them. With meaty fists, the apes dent armor and shatter bones as they attack.

| **Great Ape** | | **Level 4 Skirmisher** |
|---|---|---|
| Medium natural beast | | XP 175 |
| **HP** 55; **Bloodied** 27 | | **Initiative** +6 |
| **AC** 18, **Fortitude** 18, **Reflex** 16, **Will** 16 | | **Perception** +4 |
| **Speed** 7, climb 6 | | Low-light vision |
| **Traits** | | |
| **Swift Climber** | | |

### Great Apes in Combat

Using the landscape to their advantage, great apes surround foes, descending on their prey from the treetops. They bellow furiously as they charge around the battlefield, using their fists to pummel intruders.

JIM NELSON

# Silverback Ape

At the head of each ape family is an ancient silverback. With a notched brow and a crooked jaw, a silverback's face is a mask of rage. Ropes of muscle and scar tissue bunch beneath its silvery pelt, and its canines are the size of daggers. Standing broad and slapping its chest with leathery palms, a silverback roars and crashes forward through the jungle, followed by a group of apes. Silverbacks sometimes become legend among jungle tribes, which give them names that are whispered in warning to any travelers who wander in ape territory.

| **Silverback Ape** | **Level 5 Brute (Leader)** |
|---|---|
| Medium natural beast | XP 200 |
| **HP** 75; **Bloodied** 37 | **Initiative** +3 |

## Silverback Apes in Combat

Silverbacks lead groups of apes into battle. A silverback charges headlong into its foes and attempts to throw its prey off a high ledge or into another hazard. If a group of apes is losing a battle, silverbacks bark cries that encourage the other apes to escape.

# Ape Temple Guardian

A temple long forgotten to the outside world is crusted with the roots of massive trees. The bones of dozens of interlopers lie broken around the temple's base. From high in the jungle canopy, pairs of golden eyes gaze down at the building's entrance. They were once humanoids. Now, twisted by foul magic, these savage beasts covetously guard the objects of their idolatry.

| **Ape Temple Guardian** | **Level 6 Soldier** |

## Ape Temple Guardians in Combat

Temple guardians are the fiercest apes of the jungle. Killers and carnivores, they team up to distract and flank foes. When outnumbered, temple guardians focus on one enemy, attempting to bring down the most threatening foe first. If a temple guardian is separated from its allies, it attempts to regroup with its comrades.

When an enemy approaches a location or an object that temple guardians covet, the apes focus entirely on that intruder's destruction. After they kill the interloper, the guardians hack at its corpse, taking trophies they later braid into their fur.

# APOCALYPSE SPELL

Over the ages, a few spells of epic magnitude have reverberated throughout history. Spells that provide enough power to slay gods, bind primordials, annihilate empires, and create astral dominions leave behind some of their essence. In time, that essence can form a living spell, which stalks the universe and destroys everything in its path. Some of these spells become adaptive, learning from millennia of experience and gaining the intelligence to conspire with like-minded creatures.

## Lore

**Arcana DC 32:** Apocalypse spells are spontaneous creations; each spell has simple motivations associated with the source of its creation.

Apocalypse spells can be controlled through rituals, powerful artifacts, and cunning persuasion. Carefully controlled apocalypse spells have wrought the destruction of empires. Scholars speculate that one of the creatures was present at the fall of Bael Turath. According to ancient scrolls, the creature's controller lost hold of the monster, and the spell rampaged across the remnants of both Bael Turath and Arkhosia.

Other creatures seek to harness the power of apocalypse spells to turn the tide of battle or seize neighboring lands. The forsaken, a group of powerful humanoids that loathe the gods, comb the universe in search of apocalypse spells. It is whispered that they possess a relic from the dawn of creation that allows them to maintain control of numerous apocalypse spells at once.

## Encounters

By their nature, apocalypse spells are destructive, but some individuals can control or focus an apocalypse spell's harmful impulses. Angels, devils, and demons can sometimes influence or direct the spells. Both forsaken and tulgar frequently ally with apocalypse spells in attempts to seize astral dominions and other territories within the planes. On rare occasions, a mortal is powerful enough to command an apocalypse spell, perhaps intending to use its might to bring down empires and challenge gods.

## Prison of Mual-Tar

When the primordial Mual-Tar was taken captive and bound with Moradin's mighty chains, a spell was cast to seal the prison. Mual-Tar strained against the chains, and shards of metal and magic broke away to land in the Astral Sea, where they gained life. Now, remnants of that spell—creatures made of metal, stone, and magic—rage through the cosmos, seeking to imprison or destroy.

| **Prison of Mual-Tar** | **Level 26 Soldier** |
|---|---|
| Large immortal animate (construct) | XP 9,000 |
| **HP** 242; **Bloodied** 121 | **Initiative** +22 |
| **AC** 41, **Fortitude** 39, **Reflex** 38, **Will** 36 | **Perception** +17 |
| **Speed** 6 | |
| **Resist** 15 force | |
| **Traits** | |
| ☼ **Cloying Chains ✦ Aura** 5 | |
| Any enemy that starts its turn within the aura is marked by the prison of Mual-Tar until the start of the enemy's next turn. | |
| **Agent of Divine Will** | |
| The prison of Mual-Tar ignores insubstantial, concealment, and cover (but not total concealment or superior cover). | |
| **Standard Actions** | |
| ⨁ **Fettering Lash ✦ At-Will** | |
| *Attack:* Melee 4 (one creature); +31 vs. AC | |
| *Hit:* 3d8 + 21 damage. If the target makes an attack that doesn't include the prison of Mual-Tar before the end of the target's next turn, the prison of Mual-Tar pulls the target 10 squares to the nearest square as a free action. | |
| ⨁ **Double Attack ✦ At-Will** | |
| *Effect:* The prison of Mual-Tar uses *fettering lash* twice, making each attack against a different target. | |
| **Triggered Actions** | |
| **Reactive Coils ✦ At-Will** | |
| *Trigger:* An enemy pushes, pulls, or slides the prison of Mual-Tar. | |
| *Effect (Immediate Reaction):* The prison of Mual-Tar pulls the triggering enemy 10 squares to a square adjacent to the prison of Mual-Tar. The triggering enemy is immobilized until the end of its next turn. | |
| **Unfettered Apocalypse ✦ Encounter** | |
| *Trigger:* An enemy scores a critical hit against the prison of Mual-Tar or the prison of Mual-Tar is first bloodied. | |
| *Effect (No Action):* The prison of Mual-Tar creates a duplicate of itself, which appears in the nearest unoccupied squares. The duplicate has the same hit points as the prison of Mual-Tar, is considered to have expended the same powers as the prison of Mual-Tar, and acts during the prison of Mual-Tar's next turn. Any effects on the prison of Mual-Tar do not transfer to the duplicate. At the end of the prison of Mual-Tar's next turn, the duplicate disappears. | |
| **Str** 29 (+22) | **Dex** 24 (+20) | **Wis** 18 (+17) |
| **Con** 26 (+21) | **Int** 11 (+13) | **Cha** 15 (+15) |
| **Alignment** unaligned | **Languages** Supernal | |

### Prisons of Mual-Tar in Combat

As it rampages across the planes, a prison of Mual-Tar utilizes few tactics in combat. The monster lashes out at enemies with the fury of a thunderstorm. If controlled by an external influence, it fights for its master's purpose, destroying anyone who interferes.

Whether from an echo of its original divine purpose or by its own sentience, a prison of Mual-Tar avoids attacking divine characters, preferring to focus on enemies that have the elemental origin and foes that wield elemental powers. Characters who have divine powers might, with an appropriate skill challenge or Diplomacy check, even be able to turn the prison against elemental creatures.

# Herald of Colorless Fire

Legends tell of a colossal war that ended with the annihilation of an empire. After a long struggle, one faction used a mighty ritual infused with divine power to rain colorless fire on its enemy's lands. It turned an entire civilization into a sea of ash and dust. The downpour eventually ended, but the power remained in the motes of ash and dust, and soon heralds of colorless fire began emerging to wander the planes.

| **Herald of Colorless Fire** | **Level 27 Skirmisher** |
|---|---|
| Medium natural animate (construct, fire) | XP 11,000 |
| **HP** 244; **Bloodied** 122 | **Initiative** +25 |
| **AC** 41, **Fortitude** 37, **Reflex** 40, **Will** 37 | **Perception** +19 |
| **Speed** 8, fly 6 | |
| **Resist** 15 fire | |
| **Traits** | |
| **Frozen in Place** | |
| Whenever the herald of colorless fire takes cold damage, it cannot use *flickering flame* until the end of its next turn. | |
| **Standard Actions** | |
| ⨁ **Caress of Flame** (fire, force) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +32 vs. AC | |
| *Hit:* 3d10 + 19 fire and force damage. | |
| ✣ **Storm of Colorless Fire** (fire, force) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Effect:* The herald makes the following attack twice, shifting half its speed between the attacks. The herald cannot target the same creature with both attacks. | |
| *Attack:* Close burst 1 (creatures in burst); +30 vs. Reflex | |
| *Hit:* 4d10 + 16 fire and force damage, and ongoing 15 fire damage (save ends). | |
| **Minor Actions** | |
| **Flickering Flame** ✦ **At-Will** | |
| *Effect:* The herald shifts 4 squares. | |
| **Triggered Actions** | |
| **Unfettered Apocalypse** ✦ **Encounter** | |
| *Trigger:* An enemy scores a critical hit against the herald or the herald is first bloodied. | |
| *Effect (No Action):* The herald creates a duplicate of itself, which appears in the nearest unoccupied square. The duplicate has the same hit points as the herald, is considered to have expended the same powers as the herald, and acts during the herald's turn. Any effects on the herald do not transfer to the duplicate. At the end of the herald's next turn, the duplicate disappears. | |
| **Str** 17 (+16) **Dex** 30 (+23) **Wis** 23 (+19) | |
| **Con** 20 (+18) **Int** 15 (+15) **Cha** 14 (+15) | |
| **Alignment** unaligned **Languages** Primordial | |

## Heralds of Colorless Fire in Combat

A herald of colorless fire wanders the wastelands of the planes in search of creatures and settlements to obliterate. The malice and wrath that powered the original spell roils in its mind, driving the monster to toy with prey. It prefers to lure impetuous attackers into ambushes. A herald darts forward to attack and then slips away, luring foes into a gully or a canyon where its allies wait.

FRANZ VOHWINKEL

***Prison of Mual-Tar and herald of colorless fire***

A herald normally kills of its own volition. On rare occasions, some mighty spellcaster has compelled one into service. Once bound, a herald of colorless fire becomes a faithful servant.

# Shard of Uralinda

Within the Court of Stars, the archfey use subtle manipulation to get their way, only rarely resorting to violence. However, Rodielle of the Winter Fey was not a typical archfey. After being spurned by a member of the Summer Court whom he had attempted to woo, Rodielle crafted a terrible spell to express his rancor. He created a rain of jagged ice above the eladrin city of Uralinda, a place his love often visited and fondly spoke of. The spell ripped the city apart, killing thousands, but that was not the worst part of Rodielle's magic. The archfey was reckless in creating the spell, and as a result, the shards gained a life of their own. They became animated by the souls of the slain eladrin and spread across the universe, killing and destroying.

**Shard of Uralinda** **Level 28 Minion Soldier**
Medium fey animate (cold, construct) XP 3,250
**HP** 1; a missed attack never damages a minion. **Initiative** +22
**AC** 44, **Fortitude** 40, **Reflex** 40, **Will** 40 **Perception** +18
**Speed** 6
**Resist** 15 cold

**Standard Actions**

**Seething Cold** (cold, psychic) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +33 vs. Fortitude
*Hit:* 18 cold and psychic damage, and the target is immobilized until the end of the shard's next turn.

**Triggered Actions**

**Unfettered Apocalypse** ✦ **Encounter**
*Trigger:* An enemy scores a critical hit against the shard or drops the shard to 0 hit points.
*Effect (No Action):* The shard creates a duplicate of itself, which appears in the nearest unoccupied square. Any effects on the shard do not transfer to the duplicate. The duplicate cannot use this power. At the end of the shard's next turn, the duplicate disappears.

| | | |
|---|---|---|
| **Str** 16 (+17) | **Dex** 22 (+20) | **Wis** 18 (+18) |
| **Con** 27 (+22) | **Int** 13 (+15) | **Cha** 30 (+24) |

**Alignment** unaligned **Languages** Elven

## Shards of Uralinda in Combat

The souls within the shards of Uralinda have a death wish, and they exert just enough control over their icy prisons to throw themselves at foes. Although the spirits of the slain eladrin control the shards, their power is fairly weak. These fragments often submit to the control of strong-willed masters.

# Godslayer Inferno

In the Dawn War, the primordials slew many deities. Wielding torrential elemental spells, they blasted the gods, tearing away their divine essence. One such spell created churning white and violet flames that prevented a deity from discorporating and suppressed its immortal nature.

When the spell's flames licked across the gods, they absorbed some of their divine essence, which sparked life within the fires. They have since split many times, and they continue to burn across the universe, seeking to purge the gods and their agents in an elemental blaze.

**Godslayer Inferno** **Level 28 Artillery**
Medium elemental animate (construct, fire) XP 13,000
**HP** 194; **Bloodied** 97 **Initiative** +24
**AC** 42, **Fortitude** 40, **Reflex** 42, **Will** 39 **Perception** +21
**Speed** 6
**Resist** 15 fire

**Traits**

**Elemental Inferno** ✦ **Aura** 2
Enemies within the aura do not benefit from fire resistance and cannot save against effects that include ongoing fire damage.

**Standard Actions**

**Fiery Claw** (fire) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +31 vs. AC
*Hit:* Ongoing 20 fire damage (save ends).

**Fire Bolt** (fire) ✦ **At-Will**
*Attack:* Ranged 10 (one or two creatures); +31 vs. Reflex
*Hit:* Ongoing 25 fire damage (save ends).

**Cloying Flames** (fire) ✦ **At-Will**
*Effect:* Each enemy within 10 squares taking ongoing fire damage immediately takes fire damage equal to its ongoing fire damage.

**Godsbane Inferno** (fire) ✦ **Recharge** when first bloodied
*Attack:* Area burst 2 within 10 (enemies in burst); +31 vs. Reflex
*Hit:* 2d10 + 5 fire damage, and ongoing 15 fire damage (save ends).
*Aftereffect:* Ongoing 10 fire damage (save ends).

**Triggered Actions**

**Unfettered Apocalypse** ✦ **Encounter**
*Trigger:* An enemy scores a critical hit against the inferno or the inferno is first bloodied.
*Effect (No Action):* The inferno creates a duplicate of itself, which appears in the nearest unoccupied square. The duplicate has the same hit points as the inferno, is considered to have expended the same powers as the inferno, and acts during the inferno's turn. Any effects on the inferno do not transfer to the duplicate. At the end of the inferno's next turn, the duplicate disappears.

| | | |
|---|---|---|

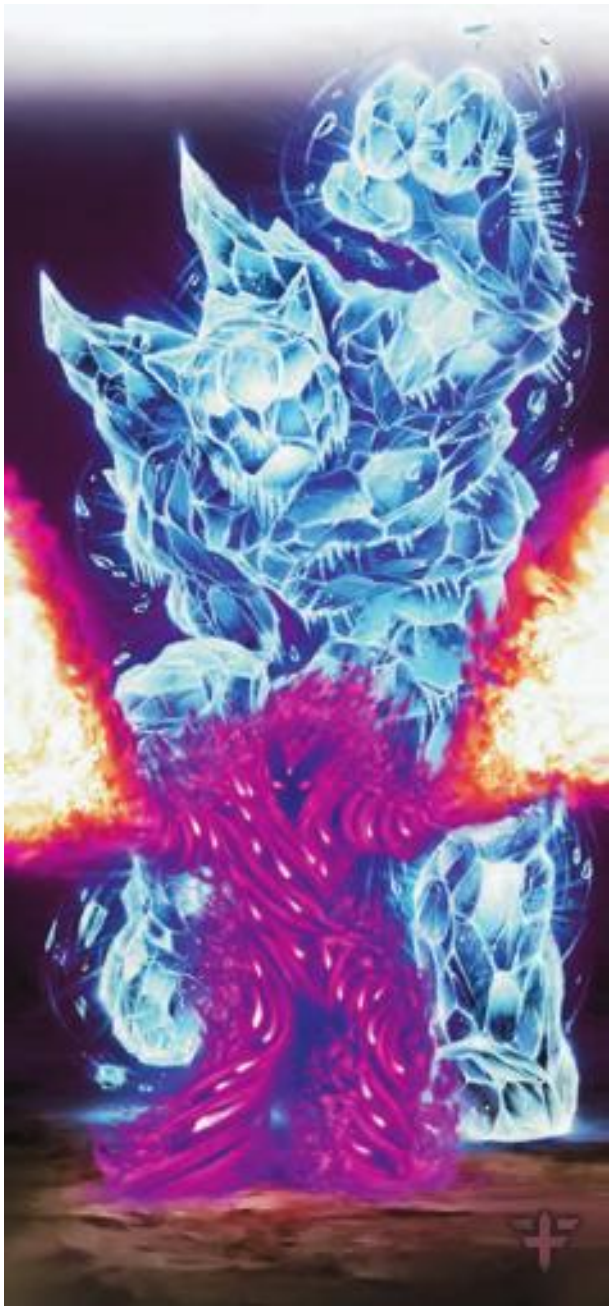
| **Con** 26 (+22) | **Int** 13 (+15) | **Cha** 21 (+19) |

**Alignment** unaligned **Languages** Primordial



*Godslayer inferno and light of Amoth*

## Godslayer Infernos in Combat

A godslayer inferno seeks to fulfill its millennia-old mission to destroy all aspects of divinity. In combat, it focuses on agents of the gods. It hangs back and unleashes a barrage of elemental flames, going out of its way to attack icons and objects of divinity. Godslayer infernos sometimes come together to assault divine bastions, such as the Astral Sea locations Hestavar and Celestia. A deity that suffers from the ongoing fire damage of a godslayer inferno might be unable to discorporate, making these creatures valuable weapons for enemies of the gods.

FRANZ VOHWINKEL

## Light of Amoth

When the demon princes Orcus, Demogorgon, and Rimmon stormed the astral dominion of Kalandurren to slay the god Amoth, they did not know that the assault would spawn monsters. In the moment before Amoth died, he cast a self-sacrificing apocalyptic spell, hoping to destroy the three demon lords. Orcus and Demogorgon narrowly escaped, using Rimmon as a shield against the chill radiance that shattered the essences of both god and demon. In the days following the battle, specks of bitterly cold light began to rise from Kalandurren's landscape. The light formed semisentient creatures that fused the wrath of the slain god with the fury of the dead demon lord. The creatures dispersed across the cosmos, fueled by an insatiable desire to destroy immortals and elementals alike.

| **Light of Amoth** | **Level 30 Brute** |
|---|---|
| Large immortal animate (construct) | XP 19,000 |
| **HP** 341; **Bloodied** 170 | **Initiative** +22 |

| **Speed** 6 | |
| **Traits** | |
| **Wave of Retribution** | |
| Whenever the light of Amoth takes damage, any enemy within 2 squares of that creature takes 5 damage. | |
| **Standard Actions** | |
| **Fist of Wrath ✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +35 vs. AC | |
| *Hit:* 4d10 + 20 damage. | |
| **Fury of the Dead ✦ Recharge** ⚅ | |
| *Effect:* The light of Amoth uses *fist of wrath* against each enemy within 2 squares of it. | |
| **Minor Actions** | |
| **Legacy of Kalandurren** (cold) **✦ Encounter** | |
| *Attack:* Close burst 2 (enemies in burst); +32 vs. Fortitude | |
| *Hit:* 4d10 + 20 cold damage, and the target is immobilized (save ends). | |
| **Triggered Actions** | |
| **Unfettered Apocalypse ✦ Encounter** | |
| *Trigger:* An enemy scores a critical hit against the light of Amoth or the light of Amoth is first bloodied. | |
| *Effect (No Action):* The light of Amoth creates a duplicate of itself, which appears in the nearest unoccupied squares. The duplicate has the same hit points as the light of Amoth, is considered to have expended the same powers as the light of Amoth, and acts during the light of Amoth's turn. Any effects on the light of Amoth do not transfer to the duplicate. At the end of the light of Amoth's next turn, the duplicate disappears. | |
| **Str** 28 (+24) | **Dex** 25 (+22) **Wis** 27 (+23) |
| **Con** 31 (+25) | **Int** 9 (+14) **Cha** 24 (+22) |
| **Alignment** unaligned | **Languages** Supernal |

## Lights of Amoth in Combat

A light of Amoth is fierce and vindictive, attacking the foes that harm it most. A light of Amoth focuses its attacks on elementals, although a successful skill challenge or Diplomacy check might allow opponents to reason with the creature. Demons and angels use these brutes as shock troops in their battles against each other.

# ARCANIAN

To gain their arcane powers, warlocks traffic with otherworldly entities, and sorcerers draw on the power of ancient bloodlines. Wizards, in contrast, must endure years of apprenticeship and toil, because their arcane knowledge is the reward of diligence. Yet not every inexperienced wizard is willing to wait.

Experiments that require arcane energy beyond a spellcaster's ability typically end with an impotent sputter. At rare times, a spell surges with wild energy and obliterates its caster, leaving a messy warning to other wizards.

Once in a great while, though, something truly horrid comes to pass. In a vain attempt to master power beyond his or her control, a wizard absorbs too much raw energy, which warps the caster's personality and memory and kills his or her body. A spark of life remains, though, and the spell, or at least its essence, animates the caster's corpse and gives it new purpose as an arcanian.

## Lore

**Arcana DC 22:** When raw arcane energy kills a wizard, the power sometimes animates the corpse and gives birth to an arcanian. Empowered with a will and a vessel, an arcanian is driven along a path etched by the dying impulses of the wizard. Red arcanians entertain impassioned fiery desires, blue arcanians try to preserve life in frozen perfection, and green arcanians despise physical beauty. Other arcanians might also exist, the warped products of failed spells using lightning, thunder, or necrotic energy. When tales spread of entire villages destroyed overnight by arcane energy, there are always whispers about the dark obsessions of arcanians.

## Encounters

Arcanians ally with any creatures willing to share their cause. They have been sighted fighting alongside undead and demons, as well as with marauding orcs and gnolls. In the end, though, an arcanian always turns its powers on its living allies. Undead are the only creatures exempt from an arcanian's terrible agenda.

## Green Arcanian

Acid glistens on a green arcanian's body, casting a leprous sheen across its skin. Acid seeps from tortured pores, covering its partially melted face and limbs. Its hands tremble as it clutches a crystal orb. With each step, a green arcanian leaves behind the seared prints of its acid-coated feet.

**Green Arcanian** **Level 8 Artillery**
Medium natural humanoid (undead) XP 350

**HP** 67; **Bloodied** 33 **Initiative** +4
**AC** 20, **Fortitude** 17, **Reflex** 20, **Will** 21 **Perception** +7
**Speed** 6

**Standard Actions**

**Acid Touch** (acid) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +9 vs. Reflex
*Hit:* 2d6 + 9 acid damage.

**Acid Bolt** (acid, implement) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +11 vs. Reflex
*Hit:* 2d10 + 3 acid damage, and each enemy adjacent to the target takes 3 acid damage.

**Stream of Acid** (acid, implement) ✦ **Recharge** ⚄ ⚅
*Attack:* Ranged 10 (one creature); +11 vs. Reflex
*Hit:* 2d6 + 10 acid damage, and the target takes a –2 penalty to AC and ongoing 5 acid damage (save ends both).

**Triggered Actions**

**Orb of Denial** (implement) ✦ **Encounter**
*Trigger:* An enemy makes a successful saving throw.
*Attack (Immediate Interrupt):* Ranged 10 (one creature); +13 vs. Will
*Hit:* The target fails the saving throw.

**Arcane Surge** ✦ **Encounter**
*Trigger:* The arcanian hits an enemy with an implement attack.
*Effect (Free Action):* The attack deals maximum damage to the enemy.

**Str** 10 (+4) **Dex** 11 (+4) **Wis** 17 (+7)
**Con** 13 (+5) **Int** 19 (+8) **Cha** 10 (+4)
**Alignment** chaotic evil **Languages** Common
**Equipment** orb

### Green Arcanians in Combat

A green arcanian is a bitter creature. It loathes living beings for their relatively flawless bodies. It collects finely crafted objects and beautiful creatures; then it destroys them. In its eyes, beauty masks the twisted horror that lurks within all living things. A green arcanian believes that a dose of acid exposes the truth in every creature.

A green arcanian despises charismatic foes. It shoots acid from a distance, targeting the prettiest and most spirited creatures. When a creature ventures close, a green arcanian wraps its dripping limbs around a victim and licks its foe with what remains of its tongue.

## Blue Arcanian

A blue arcanian shivers constantly and violently. Its teeth chatter as it clutches a staff to its chest. Its blue skin is covered with ice, and frost forms along its brow and on the hem of its robe. When a blue arcanian walks, it leaves a trail of frost behind it.

MATIAS TAPIA

| **Blue Arcanian** | **Level 10 Controller** |
|---|---|
| Medium natural humanoid (undead) | XP 500 |
| **HP** 105; **Bloodied** 52 | **Initiative** +5 |

## Blue Arcanians in Combat

A blue arcanian detests the warmth in the world, including the heat that emanates from warm-blooded beings. It believes that a frozen creature remains forever perfect, never aging and never changing while in the protective grip of frigid cold. A blue arcanian turns its power on injured foes in a misguided attempt to preserve them.

# Red Arcanian

A red arcanian is a walking conflagration, its skin alight with flames. The charred husk of a robed humanoid is visible amid the flames. Although a red arcanian's corpse burns, it is never reduced to ash. The wrath that festers in a red arcanian's soul fuels the undying fires.

| **Red Arcanian** | **Level 19 Artillery** |
|---|---|
| Medium natural humanoid (undead) | XP 2,400 |
| **HP** 131; **Bloodied** 65 | **Initiative** +13 |
| **AC** 31, **Fortitude** 27, **Reflex** 30, **Will** 28 | **Perception** +10 |
| **Speed** 6 | |
| **Standard Actions** | |
| ⊕ **Fiery Touch** (fire) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +20 vs. Reflex | |
| *Hit:* 3d10 + 11 fire damage. | |
| ✲ **Scorching Burst** (fire, implement) ✦ **At-Will** | |
| *Attack:* Area burst 1 within 10 (creatures in burst); +22 vs. Reflex | |
| *Hit:* 3d6 + 8 fire damage. | |
| ⇢ **Burning Hands** (fire, implement) ✦ **Encounter** | |
| *Attack:* Close blast 5 (enemies in blast); +22 vs. Reflex | |
| *Hit:* 4d8 + 9 fire damage, and the arcanian pushes the target 3 squares. | |
| **Minor Actions** | |
| **Wand of Accuracy** ✦ **Encounter** | |
| *Effect:* The arcanian gains a +4 bonus to its next attack roll before the end of the arcanian's next turn. | |
| **Triggered Actions** | |
| **Arcane Surge** ✦ **Encounter** | |
| *Trigger:* The arcanian hits an enemy with an implement attack. | |
| *Effect (Free Action):* The attack deals maximum damage to the enemy. | |
| **Skills** Arcana +20 | |
| **Str** 10 (+9) **Dex** 18 (+13) **Wis** 13 (+10) | |
| **Con** 11 (+9) **Int** 23 (+15) **Cha** 10 (+9) | |
| **Alignment** chaotic evil **Languages** Common | |
| **Equipment** wand | |

## Red Arcanians in Combat

A red arcanian wants to see the world burn. Shades of orange silhouette a blazing city's ruins, turning them into a merry playground for a red arcanian. The scent of charred meat wafts along streets as a red arcanian sears fleeing inhabitants with its cleansing fire. A red arcanian sings under its breath as it sends souls to the Shadowfell.

# BANDERHOBB

As the day recedes, shadows lengthen over the world like grasping claws. That's when the banderhobbs come. Beneath the stars, in the dead of moonless nights, they march in ones and twos from the land of death and darkness. A banderhobb's snaking tongue ensnares its victim, drawing it into the creature's distended maw before it is swallowed into the banderhobb's cavernous stomach. Then the creature departs to where its master waits for it to regurgitate its still-living cargo. For what purpose? A banderhobb never tells.

## Lore

**Arcana DC 25:** Parents tell children that if they misbehave, banderhobbs will come to take them away. According to stories, the torsos of banderhobbs are carved with ritual markings that allow them to pass between worlds at places where the veil is thin and shadows are thick. Their home is the Shadowfell, where their ancient master dwells in a dark tower.

People speculate that the banderhobbs' captives work as slaves in the Shadowfell until they eventually transform into banderhobbs. Fragments of lore tell of vast feeding pits where banderhobbs feast. In the dark reaches of this place, no god watches.

## Encounters

Even the other fell creatures of the Shadowfell shun banderhobbs. When banderhobbs do ally with other creatures, they are most often seen in the company of shadow wolves and howlers.

## Banderhobb Warder

Lurking in shadow, such as the dark of the cellar and the black abyss beneath the bed, are the banderhobb warders. No place in the world is safe from warders, for it is in the brightest light that the darkest shadows are cast. No matter how far a person flees, a warder finds its prey.

| **Banderhobb Warder** | **Level 16 Soldier** |
|---|---|
| Large shadow magical beast | XP 1,400 |
| **HP** 160; **Bloodied** 80 | **Initiative** +16 |
| **AC** 32, **Fortitude** 30, **Reflex** 28, **Will** 26 | **Perception** +15 |
| **Speed** 6, swim 6 | Darkvision |
| **Standard Actions** | |
| **Longfinger Claw ✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +21 vs. AC | |
| *Hit:* 3d8 + 11 damage, and the target is marked until the end of the warder's next turn. | |
| **Lightning Tongue** (lightning) **✦ At-Will** | |
| *Attack:* Ranged 5 (one creature); +19 vs. Reflex | |
| *Hit:* 2d8 + 7 lightning damage, and the target falls prone. | |
| **Longfinger Clutch ✦ At-Will** | |
| *Attack:* Melee 2 (one or two creatures); +21 vs. AC | |
| *Hit:* 2d8 + 7 damage, and the target is marked until the end of the warder's next turn. | |
| **Triggered Actions** | |
| **Swallow ✦ At-Will** | |
| *Trigger:* A Large or smaller enemy marked by the warder makes an attack that does not include the warder as a target. | |
| *Effect (Immediate Reaction):* The warder shifts 3 squares to a space adjacent to the triggering enemy and makes the following attack. | |
| *Attack:* Melee 1 (triggering enemy); +19 vs. Fortitude | |
| *Hit:* The target is removed from play. Until the effect ends, the target takes ongoing 10 damage. The target can take actions as normal and can make melee and close attacks against the warder. The effect ends when the warder drops to 0 hit points or when the warder ends the effect as a free action. When the effect ends, the target appears in an unoccupied space of its choice adjacent to the warder. | |
| **No Escape** (teleportation) **✦ Encounter** | |
| *Trigger:* An enemy marked by the warder ends its move. | |
| *Effect (Immediate Reaction):* The warder teleports 10 squares to a space adjacent to the triggering enemy. | |
| **Skills** Athletics +21 | |
| **Str** 26 (+16) **Dex** 23 (+14) **Wis** 24 (+15) | |
| **Con** 24 (+15) **Int** 22 (+14) **Cha** 11 (+8) | |
| **Alignment** evil **Languages** understands Goblin | |

### Banderhobb Warders in Combat

The mortals run. Panicked and exhausted, sweating and breathless, they rush to the safety of a secret refuge. They throw open their hideaway, but the banderhobb warders are already there, waiting to swallow its prey.

HOWARD LYON

# Banderhobb Filch

Like a lizard, a shadowy thing scuttles down chimneys, through windows in walls and holes in thatch to the bedsides of sleepers.

Something is dragged across the floor.

A shadow is hunched, hefting an awkward sack stretched from its shoulder to the earth.

Something is dragged through the woods.

The creature moves over stones, through brambles. The sack whimpers, and the thing draws it tight, draws it silent.

Someone is dragged away.

| **Banderhobb Filch** | **Level 17 Skirmisher (Leader)** |
|---|---|
| Small shadow magical beast | XP 1,600 |
| **HP** 164; **Bloodied** 82 | **Initiative** +18 |
| **AC** 31, **Fortitude** 28, **Reflex** 32, **Will** 27 | **Perception** +14 |
| **Speed** 6, climb 3, swim 6 | Darkvision |
| **Standard Actions** | |
| **Quick Claw ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +22 vs. AC | |
| *Hit:* 3d6 + 15 damage, and the filch shifts 1 square. | |
| **Stinking Gob ✦ At-Will** | |
| *Attack:* Ranged 5 (one creature); +22 vs. AC | |
| *Hit:* 2d12 + 4 damage. | |
| *Effect:* The filch shifts 1 square. | |
| **Hook Strike ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +20 vs. Reflex | |
| *Hit:* 3d6 + 4 damage, and the filch grabs the target. | |
| **Shadow Blink** (teleportation) **✦ Recharge** ⚄ ⁞⁞ | |
| *Attack:* Melee 1 (one creature); +22 vs. AC | |
| *Hit:* 4d8 + 20 damage. | |
| *Effect:* The filch teleports 5 squares before or after the attack. | |
| **Distracting Frenzy ✦ Encounter** | |
| *Attack:* Close burst 1 (enemies in burst); +22 vs. AC | |
| *Hit:* 2d8 + 5 damage. | |
| *Effect:* An ally within 5 squares of the filch immediately takes a standard action as a free action. | |
| **Move Actions** | |
| **Drag Away ✦ At-Will** | |
| *Requirement:* The filch must have a creature grabbed. | |
| *Effect:* The filch moves its speed, pulling the grabbed creature with it. The filch and the creature grabbed by it do not provoke opportunity attacks from each other for this movement. | |
| **Skills** Athletics +20, Stealth +21 | |
| **Str** 24 (+15) **Dex** 27 (+16) **Wis** 23 (+14) | |
| **Con** 20 (+13) **Int** 21 (+13) **Cha** 10 (+8) | |
| **Alignment** evil **Languages** understands Goblin | |

## Banderhobb Filches in Combat

A watchman's lantern catches it in the light: a froglike creature with thin, angular ears, dragging a heavy sack.

"Who goes there?"

It panics and jumps at the guard, clawing and swiping at the guard's face in a frenzy of bony claws.

The creature crams the bleeding guard into the sack: another slave for the master. Then the thief hauls its cargo away.

# Banderhobb Abductor

They find the places where shadows are thick. On flat feet, banderhobb abductors silently slip into the world to steal and feed. They lurk in the seams between this world and the shadow realm, looking into this world, waiting for the right opportunity.

| **Banderhobb Abductor** | **Level 18 Brute** |
|---|---|
| Large shadow magical beast | XP 2,000 |
| **HP** 211; **Bloodied** 105 | **Initiative** +17 |
| **AC** 30, **Fortitude** 29, **Reflex** 32, **Will** 30 | **Perception** +16 |
| **Speed** 6, swim 6 | Darkvision |
| **Standard Actions** | |
| **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +23 vs. AC | |
| *Hit:* 3d12 + 13 damage. | |
| **Grasping Tongue ✦ At-Will** | |
| *Attack:* Ranged 5 (one creature); +21 vs. Reflex | |
| *Hit:* 2d12 + 3 damage, and the abductor pulls the target 4 squares to a space adjacent to the abductor and grabs the creature. | |
| **Gobble ✦ At-Will** | |
| *Requirement:* The abductor must be bloodied. | |
| *Attack:* Melee 1 (one creature); +23 vs. AC | |
| *Hit:* 4d12 + 7 damage, and the abductor grabs the target. If the target is bloodied, the abductor recharges *swallow* and uses it against the target. | |
| **Swallow ✦ Recharge** ⚄ ⁞⁞ | |
| *Attack:* Melee 1 (one bloodied creature grabbed by the abductor); +21 vs. Fortitude | |
| *Hit:* The target is removed from play. Until the effect ends, the target takes ongoing 10 damage. The target can take actions as normal and can make melee and close attacks against the abductor. The effect ends when the abductor drops to 0 hit points or when the abductor ends the effect as a free action. When the effect ends, the target appears in an unoccupied space of its choice adjacent to the abductor. | |
| **Triggered Actions** | |
| **Cross into Shadow** (teleportation) **✦ Encounter** | |
| *Trigger:* The abductor is first bloodied. | |
| *Effect (No Action):* The abductor is removed from play until the start of its next turn. The abductor then appears in an unoccupied space within 10 squares of its last location. | |
| **Skills** Athletics +20, Stealth +22 | |
| **Str** 22 (+15) **Dex** 27 (+17) **Wis** 25 (+16) | |
| **Con** 21 (+14) **Int** 22 (+15) **Cha** 12 (+10) | |
| **Alignment** evil **Languages** understands Goblin | |

## Banderhobb Abductors in Combat

In a soundless second, a long, muscular tongue encircles a body and yanks it forward. The monster's head snaps backward, and its jaws unhinge. Then the victim's body disappears down the creature's gullet. A second later, the creature vanishes.

# BEHEMOTH

Behemoths were among the first creatures to roam the world. The earth trembles under their heavy steps, and sunshine dims as their leathery winged shapes pass across the sky.

At the head of an advancing army, a massive beast towers on legs the size of ancient tree trunks. Opening a mouth lined with hundreds of daggerlike teeth, the behemoth releases a terrible roar as it thunders ahead. Its handlers' whips and spears harry the brute along. Its huge feet leave bloody tracks through trails of broken bodies.

## Lore

**Nature DC 18:** Behemoths are massive, stupid, and ill-tempered—traits that trainers covet in war beasts. Leaders across the world are willing to pay a handsome price for a behemoth young enough to train. The risk in capturing a behemoth is high; just surviving the trek into the jungles and mountains where these beasts live can be difficult. Behemoths fight most fiercely when they're protecting their nests or hatchlings.

A bridle on a behemoth rarely means the creature is tame. Given a moment's freedom, a behemoth assaults warriors on both sides of a conflict. Afterward, it thunders off into the wild.

## Encounters

Troglodytes and hobgoblins use behemoths as war machines and beasts of burden. The ranks of behemoth hunters have swelled as prices for the beasts have climbed. Tribes across the world clamor for their own behemoths, and these once rare creatures now appear in conflicts far from their nesting grounds.

## Bone Crown Behemoth

Even a well-trained bone crown resists its bridle. Its handlers frequently go missing; the only signs of their fate are the chunks of flesh stuck in the small horns that ring a bone crown's thick skull. For warriors who have the skill and bravery, bone crowns are swift and powerful mounts.

| **Bone Crown Behemoth** | **Level 6 Soldier** |
|---|---|
| Large natural beast (mount, reptile) | XP 250 |
| **HP** 71; **Bloodied** 35 | **Initiative** +7 |
| **AC** 22, **Fortitude** 19, **Reflex** 17, **Will** 17 | **Perception** +4 |
| **Speed** 7 | |
| **Standard Actions** | |
| ⊕ **Head Butt** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +11 vs. AC | |
| *Hit:* 2d8 + 5 damage, and the target is marked until the end of the bone crown's next turn. When charging, the bone crown also pushes the target 1 square. | |
| *Special:* Whenever the bone crown hits a creature with an opportunity attack, that creature falls prone. | |
| **Triggered Actions** | |
| ↯ **Threatening Bash** ✦ **At-Will** | |
| *Trigger:* An enemy marked by the bone crown shifts. | |
| *Effect (Immediate Interrupt):* The bone crown uses *head butt* against the triggering enemy. | |
| **Insult to Injury** (mount) ✦ **At-Will** | |
| *Trigger:* The bone crown has a friendly rider of 6th level or higher mounted on it, and the rider hits with a charge attack. | |
| *Effect (Free Action):* The bone crown pushes the target of the charge 1 square. | |
| **Str** 19 (+7) **Dex** 14 (+5) **Wis** 12 (+4) | |
| **Con** 15 (+5) **Int** 2 (-1) **Cha** 6 (+1) | |
| **Alignment** unaligned **Languages** – | |

VINCENT DUTRAIT

### Bone Crown Behemoths in Combat

The sounds of cracking limbs and shrieks of agony accompany a bone crown behemoth's movement. A bone crown gallops into combat, entrails covering it as though they were party ribbons, and uses *head butt* against any creature it sees. Plenty of armies have broken under a bone crown assault. If a mounted bone crown's rider is killed, the bone crown often goes wild, charging recklessly around the battlefield.

## Skinwing Behemoth

Skinwing behemoths nest in craggy mountains and high cliffs. Thieves steal skinwing eggs or hatchlings to sell to armies and mercenaries seeking an aerial advantage. Skinwings are vicious, however, and careless nest robbers have lost more than their livelihood when a hatchling's parents have returned to find the thieves.

| **Skinwing Behemoth** | **Level 7 Skirmisher** |
|---|---|
| Large natural beast (mount, reptile) | XP 300 |
| **HP** 79; **Bloodied** 39 | **Initiative** +9 |
| **AC** 21, **Fortitude** 19, **Reflex** 21, **Will** 19 | **Perception** +3 |
| **Speed** 2 (clumsy), fly 8 (hover) | |
| **Traits** | |
| **Strafe** (mount) | |
| When the behemoth uses *flyby attack* while it has a friendly rider of 7th level or higher mounted on it, its rider can make a melee basic attack in place of the skinwing's *bite*. | |
| **Drag Off** | |
| When the behemoth moves, it pulls with it any creature grabbed by it. In addition, the creature remains grabbed, and the behemoth does not provoke an opportunity attack from the grabbed creature. | |
| **Standard Actions** | |
| ⊕ **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +12 vs. AC | |
| *Hit:* 2d6 + 8 damage. | |
| ⸸ **Flyby Attack** ✦ **At-Will** | |
| *Effect:* The skinwing flies its speed and uses *bite* at any point during the movement. The skinwing does not provoke an opportunity attack from the target when moving away from it. | |
| ⸸ **Grasping Talons** ✦ **Recharge** ⚄ ⚅ | |
| *Requirement:* The skinwing must be flying. | |
| *Effect:* The skinwing uses *flyby attack*, and if the attack hits, the skinwing grabs the target of the attack. | |
| **Str** 14 (+5) **Dex** 19 (+7) **Wis** 11 (+3) | |
| **Con** 15 (+5) **Int** 2 (-1) **Cha** 6 (+1) | |
| **Alignment** unaligned **Languages** – | |

### Skinwing Behemoths in Combat

A skinwing behemoth circles on the fringes of a battle, swooping down on the flanks of an enemy force. A skinwing's bite shreds leather and flesh. A skinwing uses its claws to seize an enemy and lift it into the sky before dropping the creature in front of the feet of its behemoth allies. Although a skinwing glides with great agility, it is awkward and slow while earthbound. If a skinwing crashes or is forced to land, it does everything in its power to return to the sky, even if doing so means abandoning its rider.

## Spirehorn Behemoth

Barbarian chieftains and hobgoblin warmasters yearn to master their own spirehorn behemoths. Dozens of trackers and warriors are lost in vain pursuit of adult spirehorns, which are rumored to be the fiercest behemoths when properly trained. Crafty leaders send thieves among the spirehorns' enormous nests to steal eggs, so that they can rear the behemoths from the shell.

| **Spirehorn Behemoth** | **Level 9 Elite Brute** |
|---|---|
| Huge natural beast (mount, reptile) | XP 800 |
| **HP** 234; **Bloodied** 117 | **Initiative** +6 |
| **AC** 21, **Fortitude** 23, **Reflex** 19, **Will** 21 | **Perception** +7 |
| **Speed** 6 | |
| **Saving Throws** +2; **Action Points** 1 | |
| **Traits** | |
| **Beastmaster** (mount) | |
| While the behemoth has a friendly rider of 9th level or higher mounted on it, the rider gains a +1 bonus to AC and Reflex. | |
| **Standard Actions** | |
| ⊕ **Gore** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +14 vs. AC | |
| *Hit:* 3d10 + 5 damage. | |
| ⸸ **Double Attack** ✦ **At-Will** | |
| *Effect:* The spirehorn uses *gore* twice. | |
| ⸸ **Trample** ✦ **Encounter** | |
| *Effect:* The spirehorn shifts twice its speed and can enter enemies' spaces during the move. Each time the spirehorn enters an enemy's space for the first time during the move, it can use *gore* against that enemy. | |
| **Str** 20 (+9) **Dex** 14 (+6) **Wis** 16 (+7) | |
| **Con** 17 (+7) **Int** 4 (+1) **Cha** 9 (+3) | |
| **Alignment** unaligned **Languages** – | |

### Spirehorn Behemoths in Combat

The nature of a spirehorn behemoth's rider determines the beast's battle tactics. Some spirehorns are treated like trophies, nothing more than glorified thrones for their masters. Others serve as mobile fortresses, hanging near the rear of a conflict while carrying someone of great importance. When spirehorns are used in the midst of battle, handlers equip each of the beasts to carry a dozen warriors.

# BEHOLDER

At the head of roiling chaotic storms, beholders arrive in the world. Some aberrant creatures stumble upon the world by accident, and others arrive as destroyers. Beholders come as conquerors, seeking to swallow up everything with their greed and ambition.

## Lore

**Dungeoneering DC 25:** Beholders do not belong in the world or in any of the planes. They are beings of the Far Realm, a place so antithetical to rational thought and existence that most who glimpse it go mad.

Beholders come a host of varieties. The only thing one can be certain of when dealing with beholders is that all possess some malignant intent and the desire to rule. They are treacherous creatures that cannot be trusted.

## Encounters

Beholders are rarely willing to serve other creatures or even be in the company of their own kind. When beholders work together, the world is in peril. Beholders believe they deserve to rule, so any creatures willing to risk being thralls to them can find a place at their side—albeit not a safe one.

## Beholder Spawn

The means by which beholders procreate is best left a mystery to those who wish to retain their sanity and the contents of their stomachs. Beholder spawn rarely survive the cruelty of their parents; those that do are sometimes found in the company of one. Their youth does nothing to diminish their malevolence, however.

| **Beholder Spawn** | **Level 15 Minion Artillery** |
|---|---|
| Medium aberrant magical beast | XP 300 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +13 |
| **AC** 27, **Fortitude** 26, **Reflex** 28, **Will** 27 | **Perception** +15 |
| **Speed** 0, fly 6 (hover) | Darkvision |
| **Traits** | |
| **All-Around Vision** | |
| Enemies can't gain combat advantage by flanking the beholder spawn. | |
| **Standard Actions** | |
| **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 9 damage. | |
| **Eye Rays** (varies) **✦ At-Will** | |
| *Attack:* Ranged 10 (one or two creatures); +18 vs. Reflex | |
| *Hit:* 11 acid, cold, fire, force, lightning, necrotic, poison, psychic, radiant, or thunder damage. This attack deals damage of the same type as the eye rays of the spawn's parent. | |
| **Triggered Actions** | |
| **Desperate Flight ✦ At-Will** | |
| *Trigger:* The spawn is hit or missed by a close or an area attack. | |
| *Effect (Immediate Interrupt):* The spawn shifts 2 squares. | |
| **Str** 18 (+11) **Dex** 22 (+13) **Wis** 17 (+10) | |
| **Con** 17 (+10) **Int** 20 (+12) **Cha** 20 (+12) | |
| **Alignment** evil **Languages** Deep Speech | |

## Beholder Spawn in Combat

A young beholder floats in the shadows of its parent's lair, trying to avoid notice. Every beholder spawn fights for its own preservation.

## Eye of Shadow

Eyes of shadow are beholders that have been warped by too much time spent in the tangled paths leading to the Shadowfell.

| **Eye of Shadow** | **Level 12 Elite Lurker** |
|---|---|
| Large aberrant magical beast | XP 1,400 |
| **HP** 194; **Bloodied** 97 | **Initiative** +16 |
| **AC** 26, **Fortitude** 24, **Reflex** 25, **Will** 24 | **Perception** +15 |
| **Speed** 0, fly 6 (hover) | Darkvision |
| **Saving Throws** +2; **Action Points** 1 | |
| **Traits** | |
| **All-Around Vision** | |
| Enemies can't gain combat advantage by flanking the eye of shadow. | |
| **Combat Advantage** | |
| The eye of shadow deals 2d6 extra damage to any creature granting combat advantage to it. | |
| **Shadow Surge** (healing) | |
| The eye of shadow regains 20 hit points at the end of its turn if it has remained invisible since the start of its turn. | |
| **Standard Actions** | |
| **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +15 vs. AC | |
| *Hit:* 2d8 + 11 damage. | |
| **Eye Rays ✦ At-Will** | |
| *Effect:* The beholder uses one or two of the following eye rays without provoking an opportunity attack. Each eye ray must target a different enemy. | |
| **1. Blinding Ray** (radiant) | |
| *Attack:* Ranged 10 (one creature); +15 vs. Reflex | |
| *Hit:* 1d8 + 6 radiant damage, and the target is blinded until the end of its next turn. | |
| **2. Thundering Ray** (thunder) | |
| *Attack:* Ranged 10 (one creature); +15 vs. Fortitude | |
| *Hit:* 3d6 + 10 thunder damage, and the target is deafened until the end of its next turn. | |
| **3. Shadowbond Ray** (necrotic) | |
| *Attack:* Ranged 10 (one creature); +15 vs. Will | |
| *Hit:* 3d6 + 5 necrotic damage, and the target is immobilized (save ends). Until the effect ends, the beholder and shadow creatures have concealment while within 5 squares of the target. | |
| **Move Actions** | |
| **Vanish into Shadow** (illusion, teleportation) **✦ Recharge** ⚅ ⚄ ⚃ | |
| *Effect:* The beholder teleports 20 squares and becomes invisible until it attacks or until the end of its next turn. | |
| **Minor Actions** | |
| **Central Eye** (fear) **✦ At-Will** (1/round) | |
| *Attack:* Ranged 5 (one creature); +15 vs. Will | |
| *Hit:* The target grants combat advantage until the end of the beholder's next turn. | |
| **Skills** Stealth +17 | |
| **Str** 18 (+10) **Dex** 22 (+12) **Wis** 19 (+10) | |
| **Con** 19 (+10) **Int** 19 (+10) **Cha** 16 (+9) | |
| **Alignment** evil **Languages** Deep Speech | |

JIM NELSON

## Eyes of Shadow in Combat

With a body made of little more than darkness and hate, an eye of shadow delights in its victims' terror. It lurks in the darkness, waiting as its foes' panic increases; then it strikes swiftly and viciously.

# Ghost Beholder

Death need not be an end to avarice and ambition. As living creatures, beholders must eventually fall from the air to rot on the hated earth. Yet some have the willpower and anger to float again, returning as ghost beholders.

## Ghost Beholders in Combat

A ghost beholder has died once already and is now cautious. It hides in the ground or behind ceilings and walls, using a single eye stalk to spy. Then it emerges, shooting eye rays at its surprised foes.

**Ghost Beholder** **Level 18 Elite Controller**
Large aberrant magical beast (undead) XP 4,000

**HP** 254; **Bloodied** 127 **Initiative** +16
**AC** 30, **Fortitude** 29, **Reflex** 30, **Will** 30 **Perception** +17
**Speed** 0, fly 6 (hover), phasing Darkvision
**Immune** disease, poison; **Resist** insubstantial; **Vulnerable** 10 radiant
**Saving Throws** +2; **Action Points** 1

**Traits**

**All-Around Vision**
Enemies can't gain combat advantage by flanking the ghost beholder.

**Standard Actions**

⨁ **Bite** (necrotic) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +21 vs. Reflex
*Hit:* 3d8 + 13 necrotic damage.

↝ **Eye Ray** ✦ **At-Will**
*Effect:* The beholder uses one of the following eye rays without provoking an opportunity attack.

**1. Chill of the Grave** (cold, necrotic)
*Attack:* Ranged 10 (one creature); +21 vs. Fortitude
*Hit:* 4d8 + 8 cold and necrotic damage, and the target is slowed (save ends).
*First Failed Saving Throw:* The target is immobilized instead of slowed (save ends).

**2. Ghostly Possession** (psychic)
*Attack:* Ranged 10 (one creature); +21 vs. Will
*Hit:* Ongoing 15 psychic damage (save ends).
*First Failed Saving Throw:* In addition to the ongoing damage, the target is dazed (save ends both).
*Second Failed Saving Throw:* The target is dominated instead of dazed and continues to take the ongoing damage (save ends both). The beholder is removed from play until the effect ends. When the effect ends, the beholder reappears in an unoccupied space within 10 squares of the target. The beholder can end the effect as a free action.

**3. Killing Thought** (psychic)
*Attack:* Ranged 10 (one creature); +21 vs. Will
*Hit:* 1d8 + 9 psychic damage, and the target makes a melee basic attack against itself as a free action. If the target is not wielding a melee weapon, it drops a held item and draws a melee weapon as a free action and then makes the attack.

**Minor Actions**

↝ **Central Eye** (fear) ✦ **At-Will** (1/round)
*Attack:* Ranged 10 (one creature); +21 vs. Will
*Hit:* The beholder slides the target 5 squares, and the target gains vulnerable 5 necrotic and vulnerable 5 psychic until the start of the beholder's next turn.

**Triggered Actions**

↝ **Eyes of the Beholder** ✦ **At-Will**
*Trigger:* An enemy starts its turn within 5 squares of the beholder.
*Effect (Free Action):* The beholder uses *eye ray* against the triggering enemy. Determine which ray it uses by rolling a d4, rerolling the die on a result of 4.

# CAMBION

Mortal females and males who make deals with devils are often exploited and made to serve as progenitors to cambions. Although their mortal parents might find these creatures to be abhorrences, infernal parents dote on the conceived cambions. These immortal offspring spend their lives in homage to Asmodeus, repaying evil with evil, taking advantage of weakness, and seeking power.

## Lore

**Arcana DC 21:** The Nine Hells has a society of sorts. The powerful rule. The foolish are fodder. Cultists and lesser devils serve their masters, even when it comes to procreation. A cambion is born from a union between a mortal and a devil. Such creatures mature quickly and are used as pawns to further the goals of powerful devils.

Fierna and her father, Belial, are often accompanied by cambions in their service. Other cambions dedicate themselves to Levistus to act as guardians or torturers. Most cambions, hoiwever, are dedicated to Asmodeus and pursue their own goals as they reap sorrow and destruction.

## Encounters

Cambions consort with a multitude of creatures. A cambion can be found in the company of any maleficent creatures in the world or the Nine Hells, including gangs of humanoids and lesser devils. Pompous cambions surround themselves with guards and advisors. Often an oni or a rakshasa advisor is the true power behind a cambion leader.

## Cambion Wrathborn

A cambion wrathborn plots to attain power in the world. It dons the appearance of its mortal heritage and orchestrates uprisings in great cities to glorify itself or its diabolic overlord.

| **Cambion Wrathborn** | **Level 9 Skirmisher** |
|---|---|
| Medium immortal humanoid (devil) | XP 400 |
| **HP** 100; **Bloodied** 50 | **Initiative** +11 |
| **AC** 23, **Fortitude** 21, **Reflex** 24, **Will** 18 | **Perception** +6 |
| **Speed** 6, fly 8 (clumsy) | Darkvision |
| **Resist** 10 fire | |
| **Traits** | |
| ☼ **Burning Anger** (fire) ✦ **Aura** 1 | |
| While the wrathborn is bloodied, any enemy that ends its turn within the aura takes 5 fire damage. | |
| **Standard Actions** | |
| ⊕ **Pain Blade** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +14 vs. AC | |
| *Hit:* 2d8 + 8 damage, and the target grants combat advantage until the end of the wrathborn's next turn. | |
| ⸸ **Path of Pain** (weapon) ✦ **At-Will** | |
| *Effect:* The wrathborn shifts 4 squares and uses *pain blade* at any point during the shift. | |
| ⊛ **Fire Bolt** (fire, implement) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +12 vs. Reflex | |
| *Hit:* 2d6 + 5 fire damage. | |
| ✧ **Burst Skyward** (fire, implement) ✦ **Encounter** | |
| *Requirement:* The wrathborn must be bloodied. | |
| *Attack:* Close burst 2 (enemies in burst); +12 vs. Reflex | |
| *Hit:* 2d10 + 5 fire damage, and the wrathborn flies 8 squares without provoking opportunity attacks. | |
| **Minor Actions** | |
| **Wicked Guise** (illusion) ✦ **At-Will** | |
| *Requirement:* The wrathborn must not be bloodied. | |
| *Effect:* The wrathborn assumes the appearance of a specific Medium humanoid. | |
| **Skills** Acrobatics +14, Bluff +14, Intimidate +14 | |
| **Str** 17 (+7) **Dex** 21 (+9) **Wis** 14 (+6) | |
| **Con** 20 (+9) **Int** 15 (+6) **Cha** 20 (+9) | |
| **Alignment** evil **Languages** Supernal | |
| **Equipment** leather armor, short sword, wand | |

### Cambion Wrathborns in Combat

A cambion wrathborn dances away from foes as it attacks. Barely contained rage drives the half-breed devil in battle. A wrathborn sees the smallest slight as a grave insult. It attacks without fear of retribution. A wrathborn usually takes the appearance of an individual from its mortal parent's race, but it bursts into its diabolic form when seriously injured or when enemies surround it. In an injured state,

JASON A. ENGLE

the wrathborn becomes enshrouded in flames and grows even more vindictive.

## Chained Cambion

Wrapped in chains and masked with a gruesome iron visage, a chained cambion radiates pain, rage, and frustration. A chained cambion's body is completely bound and unmoving. Its bindings hold it aloft; the chain contraption walks spiderlike along the ground. The chains act as a conduit to a cambion's tortured psyche, and the metal's touch shoots the minds of its victims into the frozen dark of Stygia, where they suffer briefly before returning.

| **Chained Cambion** | **Level 10 Controller** |
|---|---|
| Medium immortal humanoid (devil) | XP 500 |
| **HP** 110; **Bloodied** 55 | **Initiative** +8 |
| **AC** 24, **Fortitude** 22, **Reflex** 20, **Will** 24 | **Perception** +9 |
| **Speed** 6 | Darkvision |
| **Resist** 10 fire | |
| **Traits** | |
| ☼ **Binding Field** ✦ **Aura** 3 | |
| Squares within the aura are difficult terrain for enemies. | |
| **Child of Chains** | |
| While immobilized or restrained, the chained cambion gains a +2 bonus to attack rolls and gains a +2 bonus to attempts to escape a grab and to saving throws against effects that immobilize or restrain. | |
| **Standard Actions** | |
| ⓘ **Chain Lash** ✦ **At-Will** | |
| *Attack:* Melee 3 (one creature); +15 vs. AC | |
| *Hit:* 3d6 + 8 damage, and a dazed target is immobilized (save ends). | |
| ⸸ **Vile Fetters** (psychic) ✦ **At-Will** | |
| *Attack:* Melee 5 (one creature); +13 vs. Will | |
| *Hit:* 2d6 + 6 psychic damage, and if the target ends its next turn closer to the chained cambion, it is dazed (save ends). | |
| ✧ **Unfettered Scream** (psychic) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close blast 3 (creatures in blast); +13 vs. Fortitude | |
| *Hit:* 2d6 + 6 psychic damage, and the chained cambion pushes the target 2 squares. The target is also dazed (save ends). | |
| **Minor Actions** | |
| **Mind Shackles** (psychic) ✦ **Recharge** when first bloodied | |
| *Effect:* Two enemies adjacent to each other in a close burst 5 are psychically shackled (save ends; each enemy makes a separate saving throw against this effect). While psychically shackled, an enemy takes 10 psychic damage at the start and the end of its turn if it isn't adjacent to the other creature that was affected by this power. | |
| *Aftereffect:* The effect persists, and the damage decreases to 5 (save ends). | |
| **Str** 17 (+8) **Dex** 16 (+8) **Wis** 19 (+9) | |
| **Con** 22 (+11) **Int** 18 (+9) **Cha** 18 (+9) | |
| **Alignment** evil **Languages** Supernal | |

### Chained Cambions in Combat

A chained cambion's reigning emotion is hate. It hates its life, its captors, and its enemies who roam free. A chained cambion screams its despair within the minds of nearby foes. When a chained cambion is bloodied, it howls even louder as its iron mask falls off.

## Cambion Infernal Scion

When the blood of a mortal ruler mingles with that of a devil, a terrible conqueror can be born. A cambion infernal scion is driven by greed and ambition. It covets Asmodeus's position in the Nine Hells and plots to supplant him.

| **Cambion Infernal Scion** | **Level 12 Elite Soldier** |
|---|---|
| Medium immortal humanoid (devil) | XP 1,400 |
| **HP** 250; **Bloodied** 125 | **Initiative** +14 |
| **AC** 28, **Fortitude** 24, **Reflex** 21, **Will** 25 | **Perception** +10 |
| **Speed** 6, fly 8 (clumsy) | Darkvision |
| **Resist** 10 fire | |
| **Saving Throws** +2; **Action Points** 1 | |
| **Standard Actions** | |
| ⓘ **Burning Longsword** (fire, weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. AC | |
| *Hit:* 2d8 + 11 fire damage. | |
| *Effect:* The target is marked until the end of the scion's next turn. | |
| ⸸ **Fiend Razor** ✦ **At-Will** | |
| *Requirement:* The scion must be bloodied. | |
| *Effect:* The scion uses *burning longsword* twice. | |
| **Minor Actions** | |
| ⚚ **Dread Command** (charm) ✦ **At-Will** (1/round) | |
| *Requirement:* The scion must not be bloodied. | |
| *Attack:* Ranged 5 (one enemy marked by the scion); +15 vs. Will | |
| *Hit:* The target is dominated until the end of the scion's next turn. | |
| **Oath of the Nine** ✦ **At-Will** (1/round) | |
| *Effect:* One creature within 3 squares of the scion is marked and gains vulnerable 10 fire until the end of the scion's next turn. | |
| **Triggered Actions** | |
| ⸸ **Majestic Stride** ✦ **At-Will** | |
| *Trigger:* An enemy marked by the scion and within 5 squares of it makes an attack that does not include the scion as a target. | |
| *Effect (Immediate Reaction):* The scion teleports to a square adjacent to the triggering enemy and uses *burning longsword* against it. | |
| **Skills** Diplomacy +17, History +15, Intimidate +17 | |
| **Str** 19 (+10) **Dex** 22 (+12) **Wis** 18 (+10) | |
| **Con** 21 (+11) **Int** 19 (+10) **Cha** 23 (+12) | |
| **Alignment** evil **Languages** Supernal | |
| **Equipment** chainmail, longsword | |

### Cambion Infernal Scions in Combat

An infernal scion's sword slashes in fiery arcs. It begins combat imperiously, cutting down foes and commanding enemies to impale themselves on their own blades lest they suffer torture and humiliation. The devil strides across the battlefield, secure in its authority over its allies and confident that it is incapable of losing.

When bloodied, an infernal scion sheds its veneer of dominance in exchange for rage, dealing blows at twice its previous speed.

# CATOBLEPAS

With its head low to the ground, a catoblepas roams the land, leaving death in its wake. The catoblepas is a rare creature made of shadows and death; its gaze can wither those it has injured. Each creature plods between worlds, surfacing unexpectedly. So strong is the catoblepas's association with death that the beasts sometimes accompany the Raven Queen and her entourage.

## Lore

**Religion DC 23:** Steadfast souls who hunt a catoblepas might resist its call, but when faced with its deadly gaze or toxic breath, most choose cowardice over bravery.

A ritualistic hunt of a catoblepas can earn the hunters the Raven Queen's blessing. Knights hunt the creatures for honor and glory, and a knight who returns with a catoblepas's head earns great esteem among his or her fellowship. A knight who displays the catoblepas badge on a coat of arms commands deep respect on the battlefield.

When the creatures of the Feywild embark on the Wild Hunt, it is often a catoblepas they seek. The catoblepas's ability to shift between worlds makes it one of the most challenging quarries.

A catoblepas cannot truly be destroyed, nor can its ill tidings be disavowed. A catoblepas, if slain, forms again in the Shadowfell and continues its plodding journey through the planes.

Adventurers can track a catoblepas by following the trail of death in its wake. If they work to mend the sorrowful places where the beast has passed, they might look upon the eyes of a catoblepas without fear of death. For these champions, the Raven Queen might release a soul to life again or grant someone the ability to foresee his or her own death and thereby avoid it.

## Encounters

Every catoblepas is a herald of the Raven Queen, but the creatures are not her only messengers. In the days before a catoblepas appears, specters of legendary kings walk their palace halls, ghosts of women who died in childbirth whisper warnings to their children, and in places where the worst tragedies shall strike, wraiths of ancient tyrants rise again, hoping to see the dark hopes of their former lives realized.

WAYNE ENGLAND

# Catoblepas Harbinger

A catoblepas harbinger appears suddenly in a throne room, a town square, a banquet hall—anywhere hubris thickens the air. Its approach foretells impending death, famine, plague, or war and sends prophets and seers into panicked frenzies.

A harbinger treads where the seeds of tragedy have been sown. It feeds on despair, pride, and anguish, growing larger on its journeys. This diet of vitriolic emotions causes a harbinger to exhale noxious fumes; creatures suffocate in its presence.

| **Catoblepas Harbinger** | **Level 10 Elite Controller** |
|---|---|
| Large shadow beast | XP 1,000 |
| **HP** 220; **Bloodied** 110 | **Initiative** +7 |
| **AC** 24, **Fortitude** 22, **Reflex** 20, **Will** 22 | **Perception** +15 |
| **Speed** 6 | Blindsight 5 |
| **Resist** 5 necrotic | |
| **Saving Throws** +2; **Action Points** 1 | |
| **Traits** | |
| ☼ **Raven Queen's Presence** ✦ **Aura** 5 | |
| Any creature within the aura that fails a death saving throw takes damage equal to half its bloodied value. | |
| **Standard Actions** | |
| ⊕ **Gore** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +15 vs. AC | |
| *Hit:* 2d8 + 9 damage. | |
| ⇾ **Poison Breath** (poison) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close blast 5 (creatures in blast); +13 vs. Fortitude | |
| *Hit:* 2d6 + 6 poison damage, and ongoing 5 poison damage (save ends). | |
| **Triggered Actions** | |
| ⇾ **Final Glance** (charm, necrotic) ✦ **At-Will** | |
| *Trigger:* An enemy within 5 squares of the harbinger willingly moves away from it. | |
| *Attack (Opportunity Action):* Close burst 10 (triggering enemy in burst); +13 vs. Will | |
| *Hit:* 5 necrotic damage, and the target is immobilized and gains vulnerable 5 to all damage (save ends both). | |
| *Aftereffect:* 10 necrotic damage. | |
| **Str** 18 (+9) **Dex** 15 (+7) **Wis** 21 (+10) | |
| **Con** 22 (+11) **Int** 3 (+1) **Cha** 11 (+5) | |
| **Alignment** unaligned **Languages** – | |

## Catoblepas Harbingers in Combat

A catoblepas harbinger emanates death. The beast attempts to end the lives of everything it encounters. With a look, it cuts down those who run. With its horns, it gouges those who face it. A harbinger feels no fear in battle. It knows that to die again will be just another turn of the wheel, so it focuses on dealing final blows to weak or frightened foes.

# Catoblepas Tragedian

At the world's end, a river of souls flows into the Shadowfell through a jungle poisoned by the corruption of tainted souls. Along the river's bank, a catoblepas tragedian grazes beneath the full moon, growing enormous before it passes through the veil to the Raven Queen's realm. A tragedian's bowed, hidden face is formed in the shape of a humanoid tragedian's mask, an agonized accumulation of the strife it has witnessed.

| **Catoblepas Tragedian** | **Level 18 Elite Controller** |
|---|---|
| Huge shadow beast | XP 4,000 |
| **HP** 360; **Bloodied** 180 | **Initiative** +15 |
| **AC** 32, **Fortitude** 30, **Reflex** 28, **Will** 30 | **Perception** +15 |
| **Speed** 6 | Blindsight 5 |
| **Resist** 10 necrotic | |
| **Saving Throws** +2; **Action Points** 1 | |
| **Traits** | |
| ☼ **Raven Queen's Presence** ✦ **Aura** 5 | |
| Any creature within the aura that fails a death saving throw takes damage equal to half its bloodied value. | |
| **Standard Actions** | |
| ⊕ **Gore** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +23 vs. AC | |
| *Hit:* 3d8 + 13 damage. | |
| ⇾ **Poison Breath** (poison) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close blast 5 (creatures in blast); +21 vs. Fortitude | |
| *Hit:* 2d6 + 9 poison damage, and ongoing 10 poison damage (save ends). | |
| ⇾ **Withering Gaze** ✦ **Recharge** when no enemy is affected by this power | |
| *Attack:* Close burst 10 (one bloodied creature in burst); +21 vs. Will | |
| *Hit:* 1d8 + 9 necrotic damage, and the target is weakened (save ends). | |
| *First Failed Saving Throw:* The target is weakened and blinded (save ends both). | |
| *Second Failed Saving Throw:* The target's hit points drop to -1. | |
| **Minor Actions** | |
| ⇾ **Inevitable Call** (charm) ✦ **At-Will** | |
| *Effect:* Choose one enemy within 20 squares. The tragedian pulls that enemy 3 squares. | |
| **Triggered Actions** | |
| ⇾ **Final Glance** (charm, necrotic) ✦ **At-Will** | |
| *Trigger:* An enemy within 5 squares of the tragedian willingly moves away from it. | |
| *Attack (Opportunity Action):* Close burst 10 (triggering enemy in burst); +21 vs. Will | |
| *Hit:* 10 necrotic damage, and the target is immobilized and gains vulnerable 5 to all damage (save ends both). | |
| *Aftereffect:* 20 necrotic damage. | |
| **Str** 24 (+16) **Dex** 22 (+15) **Wis** 23 (+15) | |
| **Con** 28 (+18) **Int** 3 (+5) **Cha** 25 (+16) | |
| **Alignment** unaligned **Languages** – | |

## Catoblepas Tragedians in Combat

A catoblepas tragedian's deep humming works like a siren's song, calling living creatures to their dooms. A tragedian's victims walk forward and rest their heads against its shaggy flank. The victims who inhale a tragedian's deadly breath or look upon its visage wither into husks.

# CAVE FISHER

Perched in a shadowy niche high up in a limestone cavern, a cave fisher waits and watches. More than one explorer has been stricken when he or she gazed up to see an insectlike creature staring back, pincers ready. A long, noselike appendage juts from a cave fisher's body. From this protuberance, a fisher can release a strangling line or shoot lengths of filament to capture prey for its young.

## Lore

**Nature DC 15:** Cave fishers live by instinct. They spread across a swath of caverns and form loose collectives. After a male and a female mate, they move off to an uninhabited ledge. A cave fisher nest is high from the ground and usually looks out over frequently traveled paths.

Cave fisher spawn hatch after several weeks in the egg. During that time, the angler does not leave the nest unless provoked. The spiker goes out in search of food to bring back to the nest. Cave fishers are mindless creatures without mercy, so when a cave fisher spawn is weak, its nestmates eat it.

## Encounters

Although cave fishers are dangerous predators, a number of Underdark creatures have turned them into useful pets and guardians. A cave fisher is driven by instinct and hunger. A passing group of orcs that tosses fresh meat to a fisher can appease it while the band passes unmolested.

Humanoid tribes use this baiting method to lure cave fishers into key locations and make them natural guardians. The fishers create a defensive perimeter that foils wandering monsters and careless adventurers.

## Cave Fisher Spawn

Once a cave angler finds a secure ledge from which to hunt, it lays its eggs. A cave fisher spiker hunts to provide for a cave fisher angler until the eggs hatch.

| **Cave Fisher Spawn** | **Level 2 Minion Brute** |
|---|---|
| Small natural beast | XP 31 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +2 |
| **AC** 15, **Fortitude** 13, **Reflex** 14, **Will** 12 | **Perception** +0 |
| **Speed** 5, climb 4 (spider climb) | Darkvision |
| **Standard Actions** | |
| ⊕ **Pincers ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +5 vs. AC | |
| *Hit:* 6 damage, or 9 against an immobilized, restrained, or helpless target. | |
| **Str** 11 (+1) **Dex** 13 (+2) **Wis** 8 (+0) | |
| **Con** 11 (+1) **Int** 2 (-3) **Cha** 5 (-2) | |
| **Alignment** unaligned **Languages** – | |

Once the spawns are loose, the angler helps gather food. An adventurer dragged to a cave fisher's ledge faces a cadre of ravenous young.

### Cave Fisher Spawn in Combat

A cave fisher spawn lurks near its nest, waiting for a grown fisher to provide a corpse for it and its nestmates to eat. Territorial and aggressive, a spawn rushes forward to attack enemies that threaten the nest. Although not born strong enough to snatch prey with its filament, a spawn is adroit at using its pincers.

## Cave Fisher Angler

In silence, a cave fisher angler releases its long, sticky filament toward the cave floor, dangling the end a hairsbreadth above a creature's head. Then, with a quick snap, an angler's filament wraps around a victim's neck, pulling tight. The angler drags its writhing prey upward to the maws of its hungry spawn.

| **Cave Fisher Angler** | **Level 3 Lurker** |
|---|---|
| Medium natural beast | XP 150 |
| **HP** 37; **Bloodied** 18 | **Initiative** +7 |
| **AC** 18, **Fortitude** 16, **Reflex** 15, **Will** 14 | **Perception** +7 |
| **Speed** 6, climb 5 (spider climb) | Darkvision |
| **Traits** | |
| **Sniper** | |
| Whenever the angler is hidden and misses with a ranged attack, it remains hidden. | |
| **Standard Actions** | |
| ⊕ **Pincers ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +8 vs. AC | |
| *Hit:* 1d10 + 6 damage. | |
| **Filament Strangle ✦ At-Will** | |
| *Attack:* Ranged 5 (one creature); +7 vs. Reflex | |
| *Hit:* 1d6 + 4 damage, and the angler pulls the target 3 squares. The target is restrained (save ends). The effect also ends if the target teleports or if the target or another creature hits the filament in the target's square. The filament uses the angler's defenses. An attack against the filament deals no damage or effects to the angler. Only one creature can be restrained by this attack at a time. The angler can pull the target vertically, and the target can end the pull suspended in air. | |
| *Sustain Standard:* The target takes 1d6 + 4 damage, and the angler pulls the target 3 squares. | |
| **Skills** Stealth +8 | |
| **Str** 16 (+4) **Dex** 15 (+3) **Wis** 12 (+2) | |
| **Con** 13 (+2) **Int** 2 (-3) **Cha** 5 (-2) | |
| **Alignment** unaligned **Languages** – | |

### Cave Fisher Anglers in Combat

A cave fisher angler prefers to attack from above, dragging its prey into the air. It leaves a creature dangling as it squeezes the life from it. When its prey is dead, a cave angler draws it close to offer to its young. Then the creature goes back to searching–it must eat too. If a cave angler believes its young are at risk, it screeches to draw its mate back to the nest.

# Cave Fisher Spiker

While a cave fisher angler lays eggs and readies a nest, the male spiker sets out in search of food. Unlike the angler, this hunter hurls wriggling lengths of filament at its prey. The filament contracts and bores into the spiker's target. Once a spiker has slain its victim, the insect drags its catch back to its mate's nest.

| **Cave Fisher Spiker** | **Level 3 Artillery** |
|---|---|
| Medium natural beast | XP 150 |
| **HP** 37; **Bloodied** 18 | **Initiative** +4 |
| **AC** 15, **Fortitude** 14, **Reflex** 15, **Will** 13 | **Perception** +2 |
| **Speed** 6, climb 5 (spider climb) | Darkvision |
| **Traits** | |
| **Camouflage** | |
| The spiker gains a +2 bonus to all defenses against ranged and area attacks. | |
| **Sniper** | |
| Whenever the spiker is hidden and misses with a ranged attack, it remains hidden. | |
| **Standard Actions** | |
| **Pincers ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +8 vs. AC | |
| *Hit:* 1d10 + 3 damage. | |
| **Filament Spike ✦ At-Will** | |
| *Attack:* Ranged 10 (one creature); +8 vs. Reflex | |
| *Hit:* 1d10 + 4 damage. | |
| **Filament Wrap ✦ Recharge** ⚄ ⁞⁞ | |
| *Attack:* Ranged 10 (one creature); +8 vs. Reflex | |
| *Hit:* The target is immobilized and takes ongoing 5 damage (save ends both). | |
| **Skills** Stealth +9 | |
| **Str** 15 (+3) **Dex** 17 (+4) **Wis** 12 (+2) | |
| **Con** 13 (+2) **Int** 2 (-3) **Cha** 5 (-2) | |
| **Alignment** unaligned **Languages** – | |

## Cave Fisher Spikers in Combat

A spiker's noselike appendage is muscular, and the insect is adept at aiming wads of wriggling filament at its targets. The filament stretches out and encircles its prey, drawing it tight in a crushing grip. A spiker fires shards of filament at an ensnared enemy to further wound it. The insect focuses on an immobilized creature, hoping to drain its life so it can drag the creature's corpse back to its nest.

# Cave Fisher Line Spiker

Hobgoblins are renowned for their desire to capture, breed, and modify all kinds of monsters. Hobgoblin leaders instruct lackeys to steal cave fisher eggs. A group might breed some cave fishers and train them for use as artillery units that break apart enemy formations.

| **Cave Fisher Line Spiker** | **Level 4 Minion Artillery** |
|---|---|
| Medium natural beast | XP 44 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +5 |
| **AC** 16, **Fortitude** 14, **Reflex** 16, **Will** 15 | **Perception** +9 |
| **Speed** 6, climb 5 (spider climb) | Darkvision |
| **Standard Actions** | |
| **Pincers ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +9 vs. AC | |
| *Hit:* 4 damage. | |
| **Slowing Spike ✦ At-Will** | |
| *Attack:* Ranged 10 (one creature); +7 vs. Reflex | |
| *Hit:* 4 damage, and the target is slowed until the end of the spiker's next turn. | |
| **Toppling Spike ✦ Encounter** | |
| *Attack:* Ranged 10 (one creature); +7 vs. Reflex | |
| *Hit:* 6 damage, and the target falls prone. | |

## Cave Fisher Line Spikers in Combat

Cave fisher handlers position groups of line spikers in trees and along ridges near a battlefield. The creatures rain their spiky filaments down on enemy ranks, tripping up combatants one by one. A line spiker avoids the thick of a battle, but when forced into combat, it uses *pincers*. As soon as an escape route opens, the spiker flees to safety.

WOODROW HINTON III

# CHITINE

The first chitines emerged from vats of ooze and flesh. Sewn together by the magic of drow warlocks, the chitines are a failed attempt to create the perfect slave race. The first chitines rampaged through the drow city in which they were created, fighting their would-be masters. Afterward, they struck out to create their own domain in the uppermost reaches of the Underdark.

As a strange hybrid of spider and humanoid, chitines praise Lolth for imbuing them with a heart of violence and rebellion. They believe they are far closer to Lolth's perfect race than drow are. This philosophical schism sparks deep hatred between the two races. Though both races revere the Queen of Spiders, their members ruthlessly slaughter each other. As befits a goddess as treacherous and bloodthirsty as Lolth, her most dedicated followers aim their deepest hatred at their fellow worshipers.

## Lore

**History DC 17:** Drow warlocks created chitines to be slaves. Chitines are humanoids crafted from a mixture of arcane spells, prayers to Lolth, and the souls, flesh, and ichor of elves, spiders, and demons.

In a fit of passion, perhaps anger at the drow for playing at godhood, Lolth conspired to free the chitines and teach the drow a lesson. Choldriths, the chitine priestess caste, emerged from the chitine creation pools, and the priestesses proceeded to rouse rebellion among the chitines. Overwhelmed by the number of chitines, the drow withdrew as chitines spread out across the Underdark.

Chitines believe that they are Lolth's favorites. They are quick to point out that despite Lolth's drow appearance, she also adopts the guise of a spider. According to chitine dogma, the spider form, not her humanoid form, is Lolth's true aspect.

## Encounters

The chitine race is young, and its members are gullible. Because of their ignorance of the world above, they see unusual humanoids and objects from the surface as the stuff of speculation and mystery. The shifter illusionist Mylara Stormroarer managed to convince a chitine colony that she was an aspect of Lolth. She set them against a nearby drow outpost, using them to slay her enemy Ulquara.

Chitines form alliances with Underdark races in exchange for weapons, arcane lore, magic items, and other tools, most of which they use against the drow. Duergar hire chitines as mercenaries and scouts. Occasionally chitines and duergar join forces against drow outposts.

In the depths of the Feydark, chitines are common. They traffic with spriggans and other fey that oppose the drow.

### CHITINE LAIRS

Chitines spin thick, tough webbing that ranges in color from dull white to stone gray. Webs are used to fortify lairs or create structures. When chitines occupy dungeon chambers, chasms, or other narrow places, they spin webbing that is sticky like a spider's web. When chitines build structures in large caverns, the webbing is hard but lacks stickiness.

The dwarves of Greysmere were shocked to discover that within days of a chitine war band breaking into their lower mines, the invaders had constructed a small keep that cut off access to the richest vein of gold. The dwarves had to transport wood deep into the caves and build battering rams, ballistae, and trebuchets to dislodge the invading spiderfolk.

Chitine structures are built with enemies in mind.

**Suspended Fortresses:** Chitines climb to the ceiling of a large cave and suspend saclike structures from it. Each sac is anchored to the ceiling at a single point, and within it are two or three floors of chambers. Skilled web crafters can produce doors and hinges from webbing.

The uppermost floor of a suspended fortress is a living chamber. It has doorways that offer easy access to the cave ceiling. The middle floor is living space. It has barracks, dining chambers, and storage areas. The bottom floor sports murder holes that allow chitines to rain projectiles down on attackers. Openings are also cut along the walls to provide firing positions against flying enemies and climbing foes.

**Walkways:** When a chitine settlement has multiple suspended fortresses, the chitines construct bridges between the structures. Vital sections of the colony have only one or two walkways leading to them so that the bridges can be quickly collapsed in the event of an attack. A gang of four or more chitines working at one end of a bridge can collapse it in 5 rounds of work.

# Chitine Grunt

Assaulting a chitine lair is like poking a stick into a hornet's nest. Every chitine, from newborn to laborer, surges forward to annihilate intruders. "Drowned in chitines" is a drow saying that refers to an ignominious death at the hands of one's inferiors.

| **Chitine Grunt** | **Level 5 Minion Brute** |
|---|---|
| Medium natural humanoid (spider) | XP 50 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +4 |
| **AC** 17, **Fortitude** 17, **Reflex** 17, **Will** 16 | **Perception** +3 |
| **Speed** 6, climb 6 (spider climb) | Darkvision |
| **Standard Actions** | |
| **Daggers** (weapon) ✦ **At-Will** | |
| *Effect:* The grunt makes the following attack twice. | |
| *Attack:* Melee 1 (one creature); +10 vs. AC | |
| *Hit:* 4 damage. | |
| **Flying Daggers** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +10 vs. AC | |
| *Hit:* 5 damage. | |
| **Move Actions** | |
| **Web Line** ✦ **Encounter** | |
| *Requirement:* The grunt must be climbing. | |
| *Effect:* The grunt flies 5 squares. | |
| **Triggered Actions** | |
| **Dying Shriek** | |
| *Trigger:* The grunt drops to 0 hit points. | |
| *Effect (Immediate Interrupt):* Each enemy adjacent to the grunt takes a -2 penalty to all defenses until the end of its next turn. | |
| **Str** 15 (+4) **Dex** 14 (+4) **Wis** 12 (+3) | |
| **Con** 10 (+2) **Int** 8 (+1) **Cha** 9 (+1) | |
| **Alignment** chaotic evil **Languages** Common, Elven | |
| **Equipment** 4 daggers | |

## Chitine Grunts in Combat

Grunts surge forward in waves to overwhelm foes, scuttling across the floor and dropping from walls and crevices. When a grunt dies, it emits an acrid, foul stench that staggers nearby foes and drives chitines into a fury.

# Chitine Warrior

Slashing, stabbing, and parrying with four daggers at once, a chitine warrior is a blur of blades. Warriors defend a chitine lair, forming the main body of the clutch's combatants.

| **Chitine Warrior** | **Level 5 Brute** |
|---|---|
| Medium natural humanoid (spider) | XP 200 |
| **HP** 72; **Bloodied** 36 | **Initiative** +5 |
| **AC** 17, **Fortitude** 17, **Reflex** 18, **Will** 16 | **Perception** +3 |
| **Speed** 6, climb 6 (spider climb) | Darkvision |
| **Standard Actions** | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +10 vs. AC | |
| *Hit:* 1d4 + 6 damage. | |
| **Flying Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +10 vs. AC | |
| *Hit:* 1d4 + 6 damage. | |
| **Four Blade Strike** (weapon) ✦ **At-Will** | |
| *Effect:* The warrior makes the following attack four times. | |
| *Attack:* Melee 1 (one creature); +10 vs. AC | |
| *Hit:* 1d4 + 3 damage. | |
| **Move Actions** | |
| **Web Line** ✦ **Encounter** | |
| *Requirement:* The warrior must be climbing. | |
| *Effect:* The warrior flies 5 squares. | |
| **Skills** Acrobatics +10 | |
| **Str** 15 (+4) **Dex** 16 (+5) **Wis** 13 (+3) | |
| **Con** 12 (+3) **Int** 8 (+1) **Cha** 10 (+2) | |
| **Alignment** chaotic evil **Languages** Common, Elven | |
| **Equipment** 8 daggers | |

## Chitine Warriors in Combat

A chitine warrior rarely remains on the ground. To a warrior, the walls and ceiling are as accessible as the floor. It scurries along the ceiling before lowering itself using coils of spider silk rope. In areas that are narrow or have low ceilings, a warrior remains on the walls as it fights. At times, two warriors gang up on the strongest invader, shredding that foe with a combination of eight whirling blades.

BRIAN DESPAIN

# Chitine Scout

The first group of dwarf prospectors that ventured into chitine territory fled as waves of crossbow bolts rained down on them. The dwarves later discovered that their estimates were wrong: A few dozen chitines guarded the passage, not several hundred.

| **Chitine Scout** | **Level 5 Artillery** |
|---|---|
| Medium natural humanoid (spider) | XP 200 |
| **HP** 48; **Bloodied** 24 | **Initiative** +6 |
| **AC** 17, **Fortitude** 17, **Reflex** 17, **Will** 16 | **Perception** +3 |
| **Speed** 6, climb 6 (spider climb) | Darkvision |
| **Standard Actions** | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +10 vs. AC | |
| *Hit:* 1d4 + 3 damage. | |
| **Hand Crossbow** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 10/20 (one creature); +12 vs. AC | |
| *Hit:* 1d6 + 4 damage. | |
| **Furious Volley** (weapon) ✦ **At-Will** | |
| *Effect:* The scout uses *dagger* twice or *hand crossbow* twice. | |
| **Poisoned Bolt** (poison, weapon) ✦ **Encounter** | |
| *Attack:* Ranged 10/20 (one creature); +10 vs. Fortitude | |
| *Hit:* 1d6 + 4 damage, and ongoing 10 poison damage (save ends). | |
| **Move Actions** | |
| **Web Line** ✦ **Encounter** | |
| *Requirement:* The scout must be climbing. | |
| *Effect:* The scout flies 5 squares. | |
| **Skills** Acrobatics +11 | |
| **Str** 13 (+3) **Dex** 18 (+6) **Wis** 13 (+3) | |
| **Con** 12 (+3) **Int** 8 (+1) **Cha** 10 (+2) | |
| **Alignment** chaotic evil **Languages** Common, Elven | |
| **Equipment** 2 daggers, 2 hand crossbows, 40 bolts | |

## Chitine Scouts in Combat

A scout keeps to walls, ceilings, and murder holes, peppering foes with crossbow bolts while warriors and marauders engage enemies in melee. It uses webbing to access areas that enemies cannot reach on foot, such as high stalactites or the far side of a fissure. A scout reserves *poisoned bolt* for any ranged attackers.

# Chitine Marauder

Any chitine offspring born beyond the first eight in a clutch are cast out of the lair to become marauders. If they are still alive after one year, they are allowed return to the family. Most choose instead to remain with the other castoffs of their kind.

| **Chitine Marauder** | **Level 6 Skirmisher** |
|---|---|
| Medium natural humanoid (spider) | XP 250 |
| **HP** 72; **Bloodied** 36 | **Initiative** +9 |
| **AC** 20, **Fortitude** 18, **Reflex** 19, **Will** 17 | **Perception** +10 |
| **Speed** 6, climb 6 (spider climb) | Darkvision |
| **Traits** | |
| **Combat Advantage** | |
| The marauder deals 1d6 extra damage against any creature granting combat advantage to it. | |
| **Standard Actions** | |
| **Short Sword** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +11 vs. AC | |
| *Hit:* 1d6 + 4 damage. | |
| **Quick Jabs** ✦ **At-Will** | |
| *Effect:* The marauder uses *short sword* twice. It can shift 2 squares after each attack. | |
| **Move Actions** | |
| **Web Line** ✦ **Encounter** | |
| *Requirement:* The marauder must be climbing. | |
| *Effect:* The marauder flies 5 squares. | |
| **Skills** Acrobatics +12, Stealth +12 | |
| **Str** 12 (+4) **Dex** 18 (+7) **Wis** 15 (+5) | |
| **Con** 16 (+6) **Int** 11 (+3) **Cha** 10 (+3) | |
| **Alignment** chaotic evil **Languages** Common, Elven | |
| **Equipment** 2 short swords | |

## Chitine Marauders in Combat

These savage chitines dwell in burrows along the ceilings of dungeons and Underdark passages. The tunnels are concealed with camouflaged trapdoors of thick webbing (Perception DC 20). When enemies pass beneath, marauders fan out, emerging from the trapdoors to leap among their prey and surround their victims.

The eyes of a marauder glow a baleful red. Veterans of Underdark travel know that by the time you spot its glowing eyes, it is too late to escape.

# Chitine Web Crafter

Chitine web crafters are smiths and builders. They erect structures of webbing that hang from cavern ceilings. Their kind is a dominant power in chitine society, surpassed only by the choldrith priestesses. Even warriors avoid angering web crafters. Chitines that cross the crafters' guild might find that their living chambers soon come crashing to the ground.

**Chitine Web Crafter** **Level 6 Controller**
Medium natural humanoid (spider) XP 250

**HP** 72; **Bloodied** 36 **Initiative** +7
**AC** 19, **Fortitude** 17, **Reflex** 18, **Will** 16 **Perception** +10
**Speed** 6, climb 6 (spider climb) Darkvision

**Standard Actions**

**Spear** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 2d8 + 5 damage, and the target is slowed until the end of the web crafter's next turn.

**Poisoned Web Orb** (poison) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +11 vs. AC
*Hit:* 2d10 + 3 poison damage, and the target is slowed until the end of the web crafter's next turn.

**Web Ball** ✦ **Recharge** ⚅ ⚄ ⚃
*Attack:* Ranged 5 (one creature); +9 vs. Reflex
*Hit:* 2d10 + 5 damage, and the target is restrained (save ends).

**Wall of Webs** ✦ **Encounter**
*Effect:* The web crafter creates an area wall 6 within 10 squares that lasts until the end of the encounter or until the wall is destroyed. The wall can be up to 3 squares high. The wall is blocking terrain, and it can be attacked. Any creature adjacent to the wall that hits it with a melee attack is immobilized (save ends). The wall has the web crafter's defenses, and each square of the wall has 10 hit points. The wall has vulnerable 5 fire.

**Move Actions**

**Web Line** ✦ **Encounter**
*Requirement:* The web crafter must be climbing.
*Effect:* The web crafter flies 5 squares.

**Skills** Acrobatics +12, Stealth +12
**Str** 15 (+5) **Dex** 18 (+7) **Wis** 15 (+5)
**Con** 16 (+6) **Int** 13 (+4) **Cha** 10 (+3)
**Alignment** chaotic evil **Languages** Common, Elven
**Equipment** spear

## Chitine Web Crafters in Combat

In battle, a web crafter builds walls to trap invaders and force them to fight chitine warriors. It shoots poisonous orbs of webbing at escaping foes. Web crafters sometimes aim their powers at battlefield terrain, working together to collapse a building or bring down a stalactite.

Web crafters are forced into battle at the insistence of choldriths; the priestesses use this conscription to keep a check on the web crafters' influence. Saving or sparing a web crafter's life can earn the guild's favor.

# Choldrith

Chitines regard choldriths as aspects of Lolth's will. So great is their devotion to these priestesses that, in one case, when faced with an invading force of troglodytes, the chitines collapsed their entire nest atop the brutes. The troglodytes and most of the chitine colony died, but the choldrith priestesses survived, and that was what mattered to the chitines.

Choldriths are always female, and they resemble driders, except their skin is pale.

**Choldrith** **Level 8 Controller (Leader)**
Large natural humanoid (spider) XP 350

**HP** 90; **Bloodied** 45 **Initiative** +6
**AC** 22, **Fortitude** 19, **Reflex** 21, **Will** 17 **Perception** +14
**Speed** 6, climb 6 (spider climb) Darkvision

**Standard Actions**

**Claws** (poison) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +13 vs. AC
*Hit:* 2d8 + 7 poison damage, and the target is immobilized until the end of the choldrith's next turn.

**Web** ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +11 vs. Reflex
*Hit:* 1d10 + 7 damage, and the target is restrained until the end of the choldrith's next turn.

**Shadow Spider Curse** (poison) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +11 vs. Will
*Hit:* 2d10 + 5 poison damage, and the target grants combat advantage to spiders (save ends).

**Choking Vapors** (poison, zone) ✦ **Encounter**
*Attack:* Area burst 1 within 10 (creatures in burst); +11 vs. Fortitude
*Hit:* 2d6 + 4 poison damage, and ongoing 5 poison damage (save ends).
*Effect:* The burst creates a zone that lasts until the end of the encounter. Any enemy that enters the zone or ends its turn there takes 5 poison damage.

**Triggered Actions**

**Spider Queen's Enforcer** ✦ **At-Will**
*Trigger:* An ally within 5 squares of the choldrith misses with an attack roll.
*Effect (Immediate Interrupt):* The triggering ally takes 5 damage and rerolls the attack roll.

**For the Spider Queen** ✦ **Recharge** when first bloodied
*Trigger:* A melee or a ranged attack hits the choldrith.
*Effect (Immediate Interrupt):* The triggering attack instead hits one of the choldrith's adjacent allies.

**Skills** Diplomacy +12, Intimidate +12, Religion +12
**Str** 15 (+6) **Dex** 15 (+6) **Wis** 20 (+9)
**Con** 18 (+8) **Int** 16 (+7) **Cha** 17 (+7)
**Alignment** chaotic evil **Languages** Common, Elven
**Equipment** holy symbol of Lolth

## Choldriths in Combat

A choldrith surrounds itself with grunts and other chitines, relying on the press of bodies to shield it from harm. The choldrith and the chitines believe that it is Lolth's will that chitines die to preserve choldriths. A choldrith creates choking poison among invaders and brandishes curses and webs to distract and entangle them. If the battle appears lost, choldriths flee to set up a new colony elsewhere.

# CLOAKER

A POPULAR TALE at the Black Dragon Inn recounts the death of Sticky Fingers Malone, a notorious rogue and thief. A veteran spelunker and tomb robber, Sticky Fingers had a reputation for letting his companions do battle while he skulked about scooping up valuables. Of course, eventually Sticky Fingers paid for his selfish behavior.

While delving in the Lost Caverns of Tsojcanth, old Fingers spotted a rich leather cloak hanging from a peg. While his allies fought off fire bats, Sticky Fingers plucked the cloak from the hook and threw it over his shoulders. To his shock, the cloak came alive and enveloped him, killing Sticky Fingers before any allies could help.

## Lore

**Dungeoneering DC 18:** A cloaker prefers isolation to the company of other cloakers. A creature might set aside its distaste of other cloakers long enough to form alliances if its survival depends on doing so. Most cloakers take advantage of other creatures, regardless of whether those creatures are even aware of the relationship. A cloaker might follow behind a band of other monsters, slinking through the shadows while its adopted pack searches for prey. The beast then descends from its shadowy haunts to wrap around isolated targets, using the battle's chaos to mask its presence until it is too late for its victim's allies to interfere.

On rare occasions, cloakers gather in conclaves. Dozens converge on a site and bind together into a massive sphere. Sages believe these conclaves are convened to exchange information about suitable hunting grounds, new dangers, and any regional developments that could affect the beasts. Not long after their clumping, the cloakers break apart to venture back into isolation.

## Encounters

Cloakers are loners, but they recognize the benefit of working in concert with other creatures. Few of them are interested in long-term arrangements, though.

Older cloakers sometimes take over small bands of humanoids through bullying and threats. Primitive tribes might worship the monster, but most see a cloaker as a powerful tyrant that they must appease. Derros and quaggoths commonly serve older cloakers, and goblins and drow sometimes number among their thralls.

## Cloaker Ambusher

Writhing shadows and plaintive moans are a cloaker ambusher's hallmarks. To the untrained spelunker, however, these signs are nothing more than the tricks of the light and the queer noises that are common in dark places.

| **Cloaker Ambusher** | **Level 12 Lurker** |
|---|---|
| Large aberrant magical beast | XP 700 |
| **HP** 95; **Bloodied** 47 | **Initiative** +13 |
| **AC** 24, **Fortitude** 24, **Reflex** 23, **Will** 20 | **Perception** +13 |
| **Speed** 2 (clumsy), fly 8 (hover) | Darkvision |
| **TRAITS** | |
| ☼ **Unnerving Moan** (fear) ✦ **Aura** 2 | |
| Nondeafened enemies within the aura take a -2 penalty to attack rolls. | |
| **STANDARD ACTIONS** | |
| ⊕ **Tail Slap** ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +17 vs. AC | |
| *Hit:* 2d8 + 11 damage. | |
| ⸸ **Envelop** ✦ **At-Will** | |
| *Requirement:* The ambusher must not have a creature grabbed. | |
| *Attack:* Melee 1 (one creature); +15 vs. Reflex | |
| *Hit:* The ambusher slides the target 1 square to a square within the ambusher's space, and the target is grabbed. While the target is grabbed by the ambusher, it is blinded, dazed, restrained, and takes ongoing 10 damage. In addition, whenever an attack deals damage to the ambusher while it has the target grabbed, the attack deals half damage to the ambusher and half damage to the target. | |
| **MINOR ACTIONS** | |
| **Shadow Shift** (illusion) ✦ **At-Will** | |
| *Effect:* The ambusher gains concealment until the start of its next turn. If the ambusher is in an obscured square, it gains total concealment until the start of its next turn. | |
| **Skills** Stealth +14 | |
| **Str** 21 (+11) **Dex** 16 (+9) **Wis** 15 (+8) | |
| **Con** 17 (+9) **Int** 8 (+5) **Cha** 11 (+6) | |
| **Alignment** unaligned **Languages** Deep Speech | |

BEN WOOTTEN

## Cloaker Ambushers in Combat

A cloaker ambusher clings to the ceiling, flitting between stalactites beyond the light's reach. It watches its hunting ground through ravenous eyes, though its natural cowardice inhibits aggressive action. The monster lingers out of view, remaining silent until its prey is injured, alone, or beset by other Underdark perils. Then, the beast utters a moan and strikes, fluttering down from the ceiling, extending its bony tail to snap up a victim and draw it into a consuming embrace.

# Cloaker Lord

A cloaker rarely lives to reach old age. Those that do achieve longevity become adept at using their baleful moan as a weapon. The beast modifies the tone and the volume of its moan to psychologically hound its prey. Creatures that are unsuitable as food are enslaved by the cloaker lord, becoming a lure to draw in more delectable quarry.

| **Cloaker Lord** | **Level 18 Controller** |
|---|---|
| Large aberrant magical beast | XP 2,000 |
| **HP** 172; **Bloodied** 86 | **Initiative** +12 |
| **AC** 30, **Fortitude** 30, **Reflex** 29, **Will** 27 | **Perception** +16 |

BRIAN DESPAIN

## Cloaker Lords in Combat

A cloaker lord is not as cowardly as its lesser kin, but its eagerness to hunt and kill does not make it reckless. A cloaker lord keeps thralls, which engage enemies while their master descends on an isolated foe behind enemy lines. A cloaker lord envelops its prey. While feasting on the creature, the lord modulates its moan to dissuade others from drawing near.

# CRAUD

Armored with thick chitin and equipped with powerful claws, crauds threaten anyone who tampers with the delicate balance of the ocean. A craud stands as high as a halfling, and it flickers with brilliant colors as it scuttles across the sand on an array of needle-sharp legs. Seafarers call crauds the locusts of the sea, because when they attack, they clatter up from the water's edge to kill and devour anything in their path. Those who have survived craud attacks recount how the creatures swarm over the land with eerie coordination.

Crauds are thought by many to be a punishment meted out by Melora to those who squander her gifts. When an area becomes overfished or polluted, an attack by crauds is often imminent.

## Lore

**Nature DC 12:** Superstitious seafarers have a host of myths related to crauds. Some legends suggest that they are a product of divine retribution levied against those who fail to give the goddess Melora due respect. Other tales say that the crauds are the forerunners of an invading army from the ocean floor. More pragmatic observers suggest that crauds are as mindless as any other beast, and they attack surface-dwellers only when fishing vessels deprive them of sufficient food sources.

Whatever the case, crauds are opportunistic predators. They repeatedly raid the same seaside communities. On rare occasions, crauds lurk in the shallows near an abandoned settlement to prey on travelers who venture near the area.

## Encounters

Occasionally, a cruel and capricious pirate captain captures a craud king. Then, when the pirates are about to face an enemy, the captain torments the king and forces it to provide more of its kind for battle.

Humanoids, particularly those who worship Melora, have discovered a less malicious way to utilize crauds. Dedicated humanoids train young crauds to serve as underwater guardians that protect ships and coastal settlements.

## Craud Impaler

As the sleek, armored bodies of craud impalers rise out of the water, gleaming in the moonlight, those who chance to see them might think the sight beautiful and alien. Impalers rarely act alone, though. Once viewers glimpse the creatures' talons and the other crauds rising up behind them, they realize that the impalers are only the vanguard of a craud attack.

JIM NELSON

### Craud Impalers in Combat

As the first wave of creatures falls upon its enemies, impalers attempt to tie up defenders until more powerful crauds enter the fray. Impalers are not particularly brave, so once an impaler is bloodied, it targets outnumbered or injured opponents. Whenever a wounded impaler misses with an attack, it uses *scuttle* to retreat and give its allies the opportunity to provide assistance.

## Craud Crusher

Craud crushers typically arrive on the battlefield after the craud impalers. They engage the impalers' foes, allowing their allies to move into more strategic positions. Stouter than the first attackers, crushers have claws nearly as wide as a human's torso. Lashing out with these claws, these beasts can seize enemies or send them flying backward.

| **Craud Crusher** | **Level 4 Brute** |
|---|---|
| Medium natural beast (aquatic) | XP 175 |
| **HP** 70; **Bloodied** 35 | **Initiative** +5 |
| **AC** 16, **Fortitude** 17, **Reflex** 16, **Will** 15 | **Perception** +4 |
| **Speed** 5, swim 6 | Darkvision |

**Traits**

**Aquatic**
The crusher can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

**Red Tide**
Whenever the crusher reduces a target to 0 hit points or fewer, the crusher gains a +5 bonus to its next damage roll before the end of the encounter.

**Standard Actions**

**Claw ✦ At-Will**
*Attack:* Melee 1 (one creature); +9 vs. AC
*Hit:* 1d12 + 2 damage, and the crusher grabs the target. The crusher can grab only one creature at a time.
*Sustain Minor:* The crusher sustains the grab, and the grabbed creature takes 1d6 + 3 damage.

**Hammerclaw ✦ Encounter**
*Attack:* Melee 2 (one creature); +7 vs. Reflex
*Hit:* 2d12 + 10 damage, and the crusher pushes the target 1 square and knocks it prone.

| | | |
|---|---|---|
| **Str** 17 (+5) | **Dex** 16 (+5) | **Wis** 14 (+4) |
| **Con** 20 (+7) | **Int** 3 (-2) | **Cha** 9 (+1) |

**Alignment** unaligned **Languages** –

### Craud Crushers in Combat

A crusher favors sweeping up a foe in its massive claws and cracking bones as it crushes down on the prey. It targets the largest physical threat in a battle and gains a visceral satisfaction out of besting that creature.

Crushers move together in clusters, surrounding opponents in order to annihilate them more quickly. When alone, a crusher moves in behind a wave of impalers to finish off any wounded foes.

## Craud King

Once the impalers and the crushers have engaged foes, the craud king strides forth to survey the slaughter. As this beast rises from the surf, its strange appendages flash patterns of light that urge the impalers and the crushers to act at its behest.

| **Craud King** | **Level 5 Soldier (Leader)** |
|---|---|
| Medium natural beast (aquatic) | XP 200 |
| **HP** 67; **Bloodied** 33 | **Initiative** +7 |
| **AC** 21, **Fortitude** 16, **Reflex** 15, **Will** 17 | **Perception** +4 |
| **Speed** 5, swim 6 | Darkvision |

**Traits**

**Blood in the Water ✦ Aura** 3
Allies within the aura gain a +2 bonus to attack rolls against bloodied creatures.

**Aquatic**
The king can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

**Standard Actions**

**Claw ✦ At-Will**
*Attack:* Melee 1 (one creature); +10 vs. AC
*Hit:* 2d6 + 6 damage, and the king slides the target 1 square to another square adjacent to the king.

**Claw Flurry ✦ Recharge** ⚄ ⁞⁞
*Effect:* The king uses *claw* against two different creatures. If the king slides a target with this attack, one ally adjacent to the target after the slide can make a melee basic attack against the target as a free action.

**Minor Actions**

**Angler's Lure** (charm) **✦ At-Will** (1/round)
*Attack:* Close burst 5 (one creature in burst); +10 vs. Will
*Hit:* The king pulls the target 3 squares, and the target is marked until the end of the king's next turn.

**Triggered Actions**

**For the King ✦ Encounter**
*Trigger:* The king is first bloodied.
*Effect (No Action):* Each ally within 5 squares of the king shifts 4 squares as a free action and must end the shift closer to the king than it was when it began the shift. It then can make a melee basic attack as a free action.

| | | |
|---|---|---|
| **Str** 18 (+6) | **Dex** 16 (+5) | **Wis** 14 (+4) |
| **Con** 19 (+6) | **Int** 3 (-2) | **Cha** 6 (+0) |

**Alignment** unaligned **Languages** –

### Craud Kings in Combat

The champion of a craud force, a craud king stands near the center of a conflict, urging its cohorts on. A craud king retreats only when opposed by an overwhelming force. Otherwise, it presses forward and focuses its allies' attacks on finishing off injured foes.

# DARK ONE

To dark ones, the bright lands of the world are a verdant field littered with spoils. Venturing forth from the Shadowfell, dark ones come to steal the richest treasures, the greatest secrets, and the most talented artisans and crafters from the mortal realm.

## Lore

**History DC 17:** The origin of the dark ones is shrouded in mystery. Speculators believe the small shadow creatures are the descendants of a band of halflings that fled into the Shadowfell in ages past. Others say dark ones are a race native to the shadow realm.

Dark ones are infamous for their inability to craft beautiful or useful objects. Their workmanship is always shoddy. Their armor crumples, and their weapons break. Thus, these creatures have become the ultimate thieves. They steal everything, including skilled artisans, whom they force to produce everything from clothing to magic items.

Since they have no stable alliances with creatures of the world, which they call the Blinding Realm, the dark ones target outcasts, such as thieves' guilds, bandits, and other raiders. An adventuring band hired to recover a stolen object might find the thieves slain and the treasure they stole carried off to the dark ones' warrenlike lairs in the Shadowfell.

TOMÁS GIORELLO

## Encounters

When it comes to profit, dark ones are utter mercenaries. Cults of Graz'zt use them as spies and killers, while other dark ones join or even lead temples to Vecna. Members of the race are commonly found in the company of shadar-kai.

Dark ones have an inexplicable hatred of skulks, and the two races invariably come to blows. A town caught in the crossfire of such a shadow war can be reduced to an empty shell, as what began as a simple gang conflict quickly devolves to a war of attrition.

## Hex Knight

Dark one society exalts in cheating, underhanded dealings, and treachery and has little use for chivalry. Among dark ones, a hex knight is the closest thing to a noble warrior. When hex knights deal with others not of their kind, however, any notions of honor or nobility do not apply.

| **Hex Knight** | **Level 4 Soldier** |
|---|---|
| Small shadow humanoid, dark one | XP 175 |
| **HP** 54; **Bloodied** 27 | **Initiative** +7 |
| **AC** 20, **Fortitude** 15, **Reflex** 16, **Will** 15 | **Perception** +3 |
| **Speed** 6 | Darkvision |
| **Standard Actions** | |
| **Short Sword** (weapon) ✦ **At-Will** | |
| *Effect:* The hex knight makes the following attack twice. | |
| *Attack:* Melee 1 (one creature); +9 vs. AC | |
| *Hit:* 1d6 + 4 damage, and the target is slowed until the end of the hex knight's next turn. | |
| **Hand Crossbow** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 10/20 (one creature); +9 vs. AC | |
| *Hit:* 1d6 + 4 damage. | |
| **Vicious Flurry** (weapon) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Melee 1 (one or two creatures); +9 vs. AC | |
| *Hit:* 1d6 + 4 damage, and the target is slowed and takes ongoing 5 damage (save ends both). | |
| **Move Actions** | |
| **Dark Step** ✦ **At-Will** | |
| *Effect:* The hex knight moves 4 squares, gains a +4 bonus to AC against opportunity attacks provoked by this movement, and gains combat advantage against each creature that it ends its move adjacent to until the end of the hex knight's next turn. | |
| **Minor Actions** | |
| **Shadow Hex** ✦ **At-Will** | |
| *Effect:* One creature within 3 squares of the hex knight is marked until the end of the encounter or until the hex knight uses *shadow hex* again. While the creature is marked by the hex knight, whenever it makes an attack that does not include the hex knight as a target, it grants combat advantage until the end of its next turn. | |
| **Triggered Actions** | |
| **Killing Dark** | |
| *Trigger:* The hex knight drops to 0 hit points. | |
| *Effect (No Action):* Each enemy adjacent to the hex knight is blinded until the end of his or her next turn. | |
| **Skills** Athletics +9, Stealth +10 | |
| **Str** 15 (+4) **Dex** 16 (+5) **Wis** 12 (+3) | |
| **Con** 14 (+4) **Int** 11 (+2) **Cha** 11 (+2) | |
| **Alignment** unaligned **Languages** Common | |
| **Equipment** hide armor, 2 short swords, hand crossbow, 10 bolts | |

### Hex Knights in Combat

A hex knight snarls insults as it moves around the battlefield, dancing between enemies that are slowed or overwhelmed. It jeers at its foes, calling out the strongest enemy before dashing away.

## Shadow Bolter

Steeped in darkness and subterfuge, a shadow bolter attempts to merely injure a foe when something can be gained from not killing it. A shadow bolter's goal is usually to acquire a certain secret, bauble, weapon, or person. Once the object of its desire is attained, a bolter tends to turn on allies and enemies alike.

**Shadow Bolter** **Level 5 Artillery**
Small shadow humanoid, dark one XP 200

**HP** 50; **Bloodied** 25 **Initiative** +6
**AC** 17, **Fortitude** 16, **Reflex** 17, **Will** 16 **Perception** +9
**Speed** 6 Darkvision

**Traits**

**Combat Advantage** (necrotic)
Whenever the shadow bolter hits a creature granting combat advantage to it, the bolter deals 5 extra necrotic damage, and each of that creature's adjacent allies takes 5 necrotic damage.

**Deadly Precision**
The shadow bolter's ranged attacks have combat advantage against any enemy that the bolter's allies are flanking.

**Standard Actions**

**Dagger** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +10 vs. AC
*Hit:* 1d4 + 5 damage.

**Black Bolt** (weapon) ✦ **At-Will**
*Attack:* Ranged 15/30 (one creature); +10 vs. Fortitude
*Hit:* 1d8 + 5 damage, and the target takes 5 damage each time it provokes an opportunity attack (save ends).

**Move Actions**

**Dark Step** ✦ **At-Will**
*Effect:* The bolter moves 4 squares, gains a +4 bonus to AC against opportunity attacks provoked by this movement, and gains combat advantage against each creature that it ends its move adjacent to until the end of the bolter's next turn.

**Triggered Actions**

**Killing Dark**
*Trigger:* The bolter drops to 0 hit points.
*Effect (No Action):* Each enemy adjacent to the bolter is blinded until the end of his or her next turn.

**Skills** Stealth +11
**Str** 11 (+2) **Dex** 18 (+6) **Wis** 15 (+4)
**Con** 14 (+4) **Int** 11 (+2) **Cha** 11 (+2)
**Alignment** unaligned **Languages** Common
**Equipment** dagger, crossbow, 20 bolts, silk rope (50 ft.), grappling hook

### Shadow Bolters in Combat

A shadow bolter hunkers in a high, inaccessible place with the aid of ropes and grappling hooks. From there, it rains bolts on its enemies. Trained in its craft for years, a shadow bolter has patience and deadly precision.

## Shadow Speaker

A shadow speaker totes small, clay jugs filled with Shadowfell soil to serve as the focus for its dark powers. A shadow speaker acts like a chaperone for a group of dark ones that have invaded the world. When a raid is finished, the speaker gathers its people and their loot, then guides them back to the Shadowfell.

**Shadow Speaker** **Level 6 Controller**
Small shadow humanoid, dark one XP 250

**HP** 70; **Bloodied** 35 **Initiative** +7
**AC** 20, **Fortitude** 16, **Reflex** 18, **Will** 18 **Perception** +7
**Speed** 6 Darkvision

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 2d6 + 7 damage.

**Shadow Curse** (implement, necrotic) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +9 vs. Reflex
*Hit:* 2d6 + 7 necrotic damage, and the target grants combat advantage and takes 5 damage each time it provokes an opportunity attack (save ends both).

**Choking Shadow** (implement, necrotic) ✦ **Recharge** ⚄ ⚅
*Attack:* Ranged 5 (one creature); +9 vs. Will
*Hit:* 3d6 + 11 necrotic damage, and the target is immobilized until the end of the speaker's next turn.

**Move Actions**

**Dark Step** ✦ **At-Will**
*Effect:* The speaker moves 4 squares, gains a +4 bonus to AC against opportunity attacks provoked by this movement, and gains combat advantage against each creature that it ends its move adjacent to until the end of the shadow speaker's next turn.

**Triggered Actions**

**Killing Dark**
*Trigger:* The speaker drops to 0 hit points.
*Effect (No Action):* Each enemy adjacent to the speaker is blinded until the end of his or her next turn.

**Skills** Arcana +10, Religion +10
**Str** 11 (+3) **Dex** 18 (+7) **Wis** 18 (+7)
**Con** 14 (+5) **Int** 15 (+5) **Cha** 13 (+4)
**Alignment** unaligned **Languages** Common
**Equipment** short sword, wand, 3 jars of Shadowfell soil

### Shadow Speakers in Combat

A shadow speaker keeps to the edge of a battle, loosing spells to confuse enemies and allow other dark ones to bombard them. While avoiding hand-to-hand combat, the spellcaster focuses its attacks on enemies that appear to be gaining the upper hand over a dark one. During a fight, it searches for a position that provides cover and an escape route. A shadow speaker never intentionally attracts attention.

# DEMON, BABAU

Evil wears many masks, from seething carnage demons that hoot and caper through the Abyss to bloodthirsty fiends driven to slaughter. The Abyss is inexhaustible in its wickedness. Not all demons are so obvious or bold in their tactics, though. A few work evil in subtler ways, plucking foes from battlefields to later torture at the demon's leisure. Such fiends are rare, and the most notorious of them are babaus.

## Lore

**Arcana DC 23:** Even in the tempestuous Abyss, subtlety and discretion have their place. Babaus aren't the toughest demons, but their superior cunning and devious stratagems are assets that nearly every demon lord values. Babaus serve as assassins, saboteurs, and spies. They infiltrate enemy lands to eliminate targets or to gather information crucial to their masters' plans.

Babaus' unusual cunning is linked to their origin: When Graz'zt's invasion into the Abyss was stalled, the archdevil surrendered to the plane's corruption. Glasya, Asmodeus's daughter, descended to the Plain of Yawning Pits to punish Graz'zt and complete his mission. When Glasya and Graz'zt met, their armies clashed in yet another battle of the Blood War.

Glasya plunged her sword through the new demon prince, but it didn't kill him. Where Graz'zt's blood splattered on the ground, babaus arose, each filled with the subtlety of a devil and the bloodlust of a demon. Their sudden appearance helped rout Glasya and secured Graz'zt's place as one of the preeminent demon lords of the Abyss.

## Encounters

Babaus dwell throughout the Abyss, and the majority are loyal to Graz'zt. They attach to larger demonic forces, working alongside vrocks and mezzodemons. Their unique talents make them attractive servants, even if they aren't fully trusted.

| **Babau** | **Level 13 Skirmisher** |
|---|---|
| Medium elemental humanoid (demon) | XP 800 |
| **HP** 127; **Bloodied** 63 | **Initiative** +13 |
| **AC** 26, **Fortitude** 23, **Reflex** 25, **Will** 24 | **Perception** +10 |
| **Speed** 7 | Darkvision |
| **Resist** 5 acid | |
| **Traits** | |
| ☼ **Protective Slime** (acid) ✦ **Aura** 1 | |
| Any enemy within the aura that hits the babau with a melee attack takes 5 acid damage. | |
| **Standard Actions** | |
| ⊕ **Bite** (acid) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d6 + 3 damage. The target also takes ongoing 5 acid damage, or ongoing 10 acid damage while the babau is bloodied (save ends). | |
| ⊕ **Claws** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d6 + 3 damage, and the babau shifts 1 square. | |
| ⸸ **Babau's Advantage** ✦ **At-Will** | |
| *Effect:* The babau uses *bite* and *claws* against a creature granting combat advantage to it. | |
| **Minor Actions** | |
| **Murderous Abduction** (teleportation) ✦ **Recharge** when the babau reduces an enemy to 0 hit points or fewer | |
| *Effect:* The babau teleports one creature adjacent to it 7 squares and then teleports to a square adjacent to that creature. The creature grants combat advantage to the babau until the end of the babau's next turn. | |
| **Triggered Actions** | |
| **Variable Resistance** ✦ **2/Encounter** | |
| *Trigger:* The babau takes acid, cold, fire, lightning, or thunder damage. | |
| *Effect (Free Action):* The babau gains resist 20 to the triggering damage type until the end of the encounter or until it uses *variable resistance* again. | |
| **Skills** Athletics +14 | |
| **Str** 17 (+9) **Dex** 21 (+11) **Wis** 19 (+10) | |
| **Con** 15 (+8) **Int** 12 (+7) **Cha** 14 (+8) | |
| **Alignment** chaotic evil **Languages** Abyssal | |

### Babaus in Combat

A babau prowls through rubble and bones in war-torn landscapes. The fiend is cautious and tempers its brimming aggression with cunning and subterfuge. A babau strikes only when it's advantageous to do so. The demon moves quickly and without warning, snatching its prey and teleporting across the field.

BEN WOOTTEN

# DEMON, KLURICHIR

Conquest and strife define life in the Abyss. Legions tear hordes apart; demon lords scheme and betray one another. Yet despite the abuse and destruction, the Abyss's powerful figures hold each other in check. Each is unable to advance its aims without risking devastating reprisals.

Klurichirs break this paralysis, doing what demon lords cannot. They lead the unclaimed demon masses into battle and shake up the plane. Born in the deepest layers of the Abyss, klurichirs embody the evil shard festering in the heart of the plane. Klurichirs have no fear of retribution. They spend their armies in stunning numbers, throwing wave after wave of attackers into combat regardless of whether the battle can actually be won.

## Lore

**Arcana DC 33:** Sages say klurichirs are proto-demon lords, powerful fiends on the cusp of attaining true power in the Abyss. They are different from figures such as Yeenoghu and Baphomet, because they were never primordials.

The corrupting influence of the Abyss's shard birthed klurichirs from the plane's lowest layers. Scholars believe that the evil fragment produced klurichirs out of a desire to wrest the Abyss from the demon lords and supplant them with more consistent and agreeable servants.

## Encounters

A klurichir emerges from the Abyss's lowest layers and keeps company with powerful demons, including balors, nalfeshnees, and outcast demon lords. Klurichirs lead legions to invade layer after layer of the Abyss. Such violence attracts more followers, swelling the horde's numbers.

| **Klurichir** | **Level 28 Soldier** |
|---|---|
| Huge elemental humanoid (demon) | XP 13,000 |
| **HP** 258; **Bloodied** 129 | **Initiative** +19 |
| **AC** 42, **Fortitude** 42, **Reflex** 37, **Will** 40 | **Perception** +19 |
| **Speed** 8, fly 12 (clumsy) | Blindsight 5 |
| **Immune** fear | |
| **Traits** | |
| ☼ **Malign Influence** (fear) ✦ **Aura** 2 | |
| Enemies within the aura cannot regain hit points. | |
| **Standard Actions** | |
| ⊕ **Klurichir's Axe** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 3 (one creature); +33 vs. AC | |
| *Hit:* 3d8 + 13 damage, or 4d8 + 18 while the klurichur is bloodied, and the target is marked until the end of the klurichir's next turn. | |
| ⇙ **Savage Hew** (weapon) ✦ **Recharge** ⚄ ⚅ | |
| *Attack:* Close burst 3 (enemies in burst); +33 vs. AC | |
| *Hit:* 3d8 + 13 damage, or 4d8 + 18 while the klurichur is bloodied, and the target is marked until the end of the klurichir's next turn. | |
| **Triggered Actions** | |
| ⸸ **Pincers** ✦ **At-Will** | |
| *Requirement:* The klurichir must not have a creature grabbed. | |
| *Trigger:* An enemy marked by the klurichir moves. | |
| *Attack (Immediate Reaction):* Melee 2 (triggering enemy); +31 vs. Reflex | |
| *Hit:* 2d8 + 13 damage, and the target is grabbed. | |
| *Sustain Minor:* The klurichir sustains the grab, and the target takes 2d8 + 13 damage. | |
| **Variable Resistance** ✦ **3/Encounter** | |
| *Trigger:* The klurichir takes acid, cold, fire, lightning, or thunder damage. | |
| *Effect (Free Action):* The klurichir gains resist 30 to the triggering damage type until the end of the encounter or until it uses *variable resistance* again. | |
| ⇙ **Blasphemous Utterance** (necrotic) ✦ **Encounter** | |
| *Trigger:* The klurichir is first bloodied. | |

| **Alignment** chaotic evil **Languages** Abyssal | |
| **Equipment** greataxe | |

ARNIE SWEKEL

### Klurichirs in Combat

A klurichir releases its horde into battle; then it stomps toward the toughest enemy. If a foe attempts to flee, the demon's snapping pincers trap it in place.

A klurichir is aggressive, but it has a measure of control. The massive demon focuses its attacks on one or two enemies at a time. If a klurichir is bloodied, it becomes a destructive juggernaut, as reckless as the maddest demons.

# DEMON, MAW

Some demons are cunning; others are strong. A maw demon is neither. Its simple brain understands two concepts: hunger and food. Its body consists of little more than a bulbous belly, a massive mouth, and stumpy legs that carry it from meal to meal.

## Lore

**Arcana DC 19:** Maw demons are rather dim. They prefer to feast on food over engaging enemies in combat. Hunger, not anger or bloodlust, drives them into combat. It's said that a piece of meat might distract a maw demon long enough for opponents to retreat. However, these creatures prefer the flesh of a living creature.

## Encounters

Maw demons lack the capacity to form true alliances with other creatures. They usually serve other demons or mortal spellcasters.

| **Maw Demon** | **Level 2 Brute** |
|---|---|
| Medium elemental humanoid (demon) | XP 125 |
| **HP** 42; **Bloodied** 21 | **Initiative** +1 |
| **AC** 14, **Fortitude** 14, **Reflex** 13, **Will** 12 | **Perception** +2 |
| **Speed** 6 | Darkvision |
| **Traits** | |
| ☼ **Snapping Jaws ✦ Aura** 1 | |
| Enemies within the aura grant combat advantage. | |
| **Standard Actions** | |
| ⨁ **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +5 vs. AC | |
| *Hit:* 1d12 + 5 damage. | |
| **Move Actions** | |
| **Ravenous Advance ✦ At-Will** | |
| *Effect:* The demon shifts 5 squares to a square adjacent to the nearest bloodied enemy. | |
| **Triggered Actions** | |
| **Variable Resistance ✦ Encounter** | |
| *Trigger:* The demon takes acid, cold, fire, lightning, or thunder damage. | |
| *Effect (Free Action):* The demon gains resist 10 to the triggering damage type until the end of the encounter. | |
| **Str** 17 (+4) **Dex** 11 (+1) **Wis** 13 (+2) | |
| **Con** 12 (+2) **Int** 5 (-2) **Cha** 6 (-1) | |
| **Alignment** chaotic evil **Languages** understands Abyssal | |

### Maw Demons in Combat

A maw demon's tactics are as simple as its appearance suggests. It rushes to the nearest bleeding, moving creature, chomps at its flesh until it stops moving, and then rushes to the next nearest bleeding creature.

A greater maw demon might be larger and tougher than its smaller cousin, but it is no more clever.

THOMAS M. BAXA

| **Greater Maw Demon** | **Level 16 Brute** |
|---|---|
| Medium elemental humanoid (demon) | XP 1,400 |
| **HP** 187; **Bloodied** 93 | **Initiative** +8 |

# DEMON, MOLYDEUS

| **Molydeus** | **Level 29 Elite Soldier** |
|---|---|
| Large elemental humanoid (demon) | XP 30,000 |
| **HP** 544; **Bloodied** 272 | **Initiative** +22 |
| **AC** 45, **Fortitude** 44, **Reflex** 39, **Will** 43 | **Perception** +26 |
| **Speed** 8 | Blindsight 5 |
| **Immune** fear | |
| **Saving Throws** +2; **Action Points** 1 | |

**Traits**

**Demonic Weight ✦ Aura** 2
Any enemy that starts its turn within the aura is slowed and cannot teleport until the start of its next turn.

**All-Around Vision**
Enemies can't gain combat advantage by flanking the molydeus.

**Double Actions**
The molydeus rolls initiative twice and takes its turn on both results. It regains the use of its immediate action at the start of each turn.

**Dual Brain**
At the end of each of its turns, the molydeus automatically saves against dazing or stunning effects that a save can end, and against any charm effect that a save can end.

**Standard Actions**

**Battleaxe** (weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +34 vs. AC
*Hit:* 4d10 + 15 damage, and the target is marked until the end of its next turn.

**Wolf Bite ✦ At-Will**
*Attack:* Melee 2 (one creature); +34 vs. AC
*Hit:* 4d8 + 19 damage, and the molydeus slides the target 6 squares to a square adjacent to the molydeus.

**Snake Bite** (poison) ✦ **At-Will**
*Attack:* Melee 3 (one creature); +34 vs. AC
*Hit:* 1d6 + 10 damage, and the target grants combat advantage and takes ongoing 20 poison damage (save ends both).

**Dread Word** (fear) ✦ **Encounter**
*Attack:* Close burst 5 (enemies in burst); +32 vs. Will
*Hit:* The target is dazed (save ends).
*Miss:* The target is slowed and takes a -2 penalty to attack rolls (save ends both).

**Triggered Actions**

**Variable Resistance ✦ 3/Encounter**
*Trigger:* The molydeus takes acid, cold, fire, lightning, or thunder damage.
*Effect (Free Action):* The molydeus gains resist 30 to the triggering damage type until the end of the encounter or until it uses *variable resistance* again.

**Skills** Bluff +28, History +24, Insight +26, Intimidate +28

| | | |
|---|---|---|
| **Str** 30 (+24) | **Dex** 22 (+20) | **Wis** 24 (+21) |
| **Con** 32 (+25) | **Int** 21 (+19) | **Cha** 28 (+23) |

**Alignment** chaotic evil **Languages** Abyssal
**Equipment** battleaxe

Tharizdun created the Abyss when he lodged a shard of pure evil within the Elemental Chaos. He charged seven angels to safeguard his treasure, but the angels proved unable to resist the foulness and corruption of the shard. Proximity to the item twisted the guardians, changing them into the two-headed, demonic abomination known as the molydeus.

## Lore

**Arcana DC 33:** History tells little of the seven angels that protected the evil shard, except to say that they were unwilling guardians. Their natural obedience guaranteed they would protect his treasure, while their doubts about their master left them tortured and frustrated. When evil caressed their angelic forms, it seized on this division and wrenched their forms apart. The wolf was a manifestation of the angels' aggression and ferocity, and the snake represented the angels' uncertain loyalty. The axe a molydeus wields is a relic of the demon's former existence, for it contains the bright, unspoiled light of creation.

## Encounters

A molydeus is encountered alone or with a small retinue of lesser demons. A molydeus prefers to work with mariliths but might take up with balors and klurichirs. A demon lord sometimes uses a molydeus as an enforcer or a guardian, but such arrangements do not last long and usually end in violence.

### Molydeus Demons in Combat

The wolf and snake heads of a molydeus work in concert, taking turns snapping at nearby opponents. The wolf head jerks an enemy into position, and the serpent head injects the foe with a debilitating toxin.

ARNIE SWEKEL

Molydeus demons are bound to their battleaxes. If a molydeus is slain, its weapon dissolves into a putrid slime. If a molydeus lose its axe while in combat, the demon goes mad with rage until it regains its weapon or can forge a new one.

# DEMON, NALFESHNEE

Nalfeshnees hail from the Woeful Escarand, the Abyss's four hundredth layer. There, the greatest and eldest of them rule as the Lords of Woe. Having exhausted their kingdom of its resources, nalfeshnees turn hungry eyes toward other layers. They bargain with demon lords, offering guard services in exchange for slaves, materials, treasure, and the choicest victuals harvested from across the planes.

## Lore

**Arcana DC 28:** Nalfeshnees are the corpulent scions of Tantagaras, a demon lord killed during Tharizdun's uprising against the gods. Before Tantagaras died in single battle against Kord, the demon lord sired thousands of demons that embodied his hunger and his sloth.

The Waddling Legions, as they came to be known, were crestfallen over their father's demise. They brought his corpse back to the Woeful Escarand and showed honor to him by feasting upon the body. After devouring the rubbery flesh, the demons evolved from simple-minded servants into cunning and wicked fiends, each with a fragment of their maker's consciousness.

Tantagaras's memories soon turned the demons against each other, and a great war consumed the nalfeshnees. It ended when six powerful nalfeshnees arose as the Lords of Woe. They carved the layer into domains. Within each realm, lesser nalfeshnees created fiefs, swearing service to their lords in exchange for the freedom to rule as they saw fit. In the end, the Woeful Escarand became a tapestry of petty realms filled with treacherous, bickering "nobles."

Not all nalfeshnees were willing to submit to the Lords of Woe; a few left the Woeful Escarand and found new homes elsewhere in the Abyss. These demons became seneschals, courtiers, and advisors to the likes of Baphomet, Yeenoghu, and Graz'zt. A few established petty kingdoms on unclaimed layers, holding court over whatever demons they could lure into their service.

## Encounters

Nalfeshnees divide creatures into three groups:

The first, and their favorite, is "fit to eat." This group includes animals, most humanoids (particularly halflings), and lesser demons. A nalfeshnee won't bother negotiating with any creature it wants to eat. Sometimes a nalfeshnee takes humanoids prisoner, adding them to its pantry for later consumption. Nalfeshnees prefer the taste of terrified creatures.

The next group is "fit to use." This group contains creatures nalfeshnees can't stomach, including insects, spiders, gnomes, immortals, certain other demons, powerful humanoids, and elemental creatures.

The last group is "fit to serve." This distinction is reserved for creatures far more powerful than nalfeshnees. It includes demon lords, primordials, balors, and powerful elementals such as efreets. When a nalfeshnee is serving another creature, its gloating, malicious nature melts away, revealing a whining wretch that bows and wheedles at every opportunity.

## Nalfeshnee Swine Guard

Nalfeshnees became a force in the Abyss during the Great Settling, a time when the demons evolved after consuming their slain leader, Tantagaras. Most nalfeshnees become swine guards, which are renowned throughout the Abyss. Brutish and savage, a swine guard swears service to a particular lord and fights on its master's behalf. A swine guard might take up life as a palace guard or foot soldier, but most form into mercenarylike companies that are exchanged among demon lords throughout the Abyss. Praised for their resilience and obedience, swine guards are highly coveted.

| **Nalfeshnee Swine Guard** | **Level 20 Brute** |
|---|---|
| Huge elemental humanoid (demon) | XP 2,800 |
| **HP** 237; **Bloodied** 118 | **Initiative** +11 |

| **Alignment** chaotic evil **Languages** Abyssal | |
| **Equipment** plate armor, halberd | |

FRANZ VOHWINKEL

## Nalfeshnee Swine Guards in Combat

Although less powerful than other nalfeshnees, a swine guard is no less cruel. Waddling forward, it prods foes with its halberd, herding them toward allies. Any creature coming too close to the demon must contend with its dripping, poisonous saliva.

A swine guard lacks training in the arcane arts, but its latent talent manifests when the demon is seriously injured, bringing forth a burst of psychic energy that fragments an opponent's thoughts and memories.

# Nalfeshnee Tyrant

The greatest nalfeshnees are adept at ritual magic, and they possess great libraries filled with ancient, arcane tomes. A nalfeshnee tyrant might part with a ritual in exchange for a gift of greater worth than the scroll. A tyrant is a glutton, so if properly plied—say, with a brace of plump halflings—the fiend might be amenable to an alliance or some other favor.

| **Nalfeshnee Tyrant** | **Level 23 Controller** |
|---|---|
| Huge elemental humanoid (demon) | XP 5,100 |
| **HP** 215; **Bloodied** 107 | **Initiative** +12 |
| **AC** 37, **Fortitude** 35, **Reflex** 34, **Will** 36 | **Perception** +22 |
| **Speed** 6, fly 4 (clumsy) | Darkvision |
| **Standard Actions** | |
| **Claws ✦ At-Will** | |
| *Attack:* Melee 3 (one creature); +28 vs. AC | |
| *Hit:* 4d6 + 17 damage, and the tyrant slides the target 2 squares. | |
| **Black Lightning** (necrotic) **✦ At-Will** | |
| *Attack:* Ranged 10 (one creature); +26 vs. Reflex | |
| *Hit:* 2d6 + 9 necrotic damage, and until the end of the tyrant's next turn, the target is slowed and gains vulnerable 15 psychic. | |
| **Unholy Whispers** (psychic) **✦ Recharge** ⁙ ⁝⁝ | |
| *Attack:* Area burst 2 within 10 (enemies in burst); +26 vs. Will | |
| *Hit:* 3d6 + 14 psychic damage, and the target is dazed (save ends). | |
| *Miss:* Half damage. | |
| **Minor Actions** | |
| **Vile Glare ✦ Recharge** ⁝⁝ | |
| *Attack:* Ranged 5 (one creature); +26 vs. Will | |
| *Hit:* The only attacks the target can make are basic attacks (save ends). | |
| *Each Failed Saving Throw: Vile glare* recharges. | |
| **Triggered Actions** | |
| **Variable Resistance ✦ 3/Encounter** | |
| *Trigger:* The tyrant takes acid, cold, fire, lightning, or thunder damage. | |
| *Effect (Free Action):* The tyrant gains resist 20 to the triggering damage type until the end of the encounter or until it uses *variable resistance* again. | |
| **Skills** Arcana +23, Bluff +24, Insight +22, Intimidate +24 | |
| **Str** 25 (+18) **Dex** 13 (+12) **Wis** 23 (+17) | |
| **Con** 23 (+17) **Int** 23 (+17) **Cha** 27 (+19) | |
| **Alignment** chaotic evil **Languages** Abyssal, Common | |

## Nalfeshnee Tyrants in Combat

Bloated on rotted meat, a tyrant prefers not to lift its ponderous bulk to fight its foes directly. Instead, it commands its servants to attack while it reclines on a bed of flesh and slime, hurling crackling lightning. If an intruder dares to attack a tyrant, the demon savages the interloper's body and mind with dread power, relenting only when its foe's corpse falls to the ground.

# DEMON, QUASIT

Although the Abyss focuses on annihilating creation, certain demons drift into the natural world to wreak havoc in subtler ways. Quasits target those who dabble in the occult, luring them to evil through the powers that lurk in forbidden texts, dark rituals, and cursed items. These tiny demons crave the destruction and chaos that spellcasters can unleash.

## Lore

**Arcana DC 19:** Abyssal lords create quasits to bring evil and chaos to the world. Consummate spies, they sneak about searching for spellcasters who display weak will and little self-control. A quasit bargains with a mortal spellcaster and works to persuade the mortal into accepting it as a familiar. The quasit then goads the mortal into committing increasingly destructive and heinous acts until the mortal eventually destroys himself or herself. If a mortal dies while in possession of a quasit familiar, the quasit attempts to ferry the mortal's soul to the Abyss, so it can offer the soul as a gift to its patron demon lord.

| **Quasit** | **Level 7 Controller** |
|---|---|
| Tiny elemental humanoid (demon) | XP 300 |
| **HP** 75; **Bloodied** 37 | **Initiative** +8 |
| **AC** 23, **Fortitude** 16, **Reflex** 21, **Will** 19 | **Perception** +10 |
| **Speed** 8 | Darkvision |
| **Traits** | |
| ☼ **Tempter's Influence** ✦ **Aura** 2 | |
| Enemies within the aura take a -2 penalty to saving throws. | |
| **Standard Actions** | |
| ⊕ **Bite** (poison) ✦ **At-Will** | |
| *Attack:* Melee 0 (one creature); +12 vs. AC | |
| *Hit:* 2d6 + 5 damage, and the target grants combat advantage (save ends). | |
| **Minor Actions** | |
| ⇢ **Evil Temptation** ✦ **At-Will** (1/round) | |
| *Attack:* Close burst 3 (one creature in burst); +10 vs. Will | |
| *Hit:* The target is dazed (save ends). The effect also ends if the target makes an attack against one of its allies. | |
| **Invisibility** (illusion) ✦ **At-Will** (1/round) | |
| *Effect:* The quasit becomes invisible until it makes an attack roll. | |
| **Triggered Actions** | |
| **Variable Resistance** ✦ **Encounter** | |
| *Trigger:* The quasit takes acid, cold, fire, lightning, or thunder damage. | |
| *Effect (Free Action):* The quasit gains resist 10 to the triggering damage type until the end of the encounter. | |
| **Skills** Arcana +8, Bluff +11, Stealth +13 | |
| **Str** 8 (+2) **Dex** 21 (+8) **Wis** 14 (+5) | |
| **Con** 11 (+3) **Int** 10 (+3) **Cha** 16 (+6) | |
| **Alignment** chaotic evil **Languages** Abyssal, Common | |

THOMAS M. BAXA (2)

## Encounters

When among other demons, quasits remain invisible, skulking about while their larger kin shoulder the work. Carnage demons and neldrazus are common allies. However, quasits have greater success finding allies in the natural world. They sometimes act as advisors to evil humanoids, such as orcs, gnolls, and hobgoblins, but they prefer to work with destructive spellcasters, especially arcanians.

### Quasits in Combat

A quasit fights indirectly. The demon manipulates an enemy into serving its interests, tempting the foe with great power in exchange for a nebulous benefit. Once a mortal spellcaster accepts a quasit, that individual begins taking actions that are morally questionable. The quasit, meanwhile, remains invisible, coaxing the mortal on.

# DEMON, ULTRODEMON

Ultrodemons lead mezzodemon and nycademon armies through the Abyss. Infamous for their endless plotting, ultrodemons have little loyalty to their patrons and even less to each other. They wage brutal wars of intrigue and betrayal, growing in wealth and power as they move toward their own ends.

## Lore

**Arcana DC 29:** Ultrodemons are unusual because they, like mezzodemons, covet gold. Ultrodemons enjoy reckless destruction as much as the next demon, but they will pursue material possessions rather than engage in carnage. Ultrodemons are clever manipulators and plotters. They create intricate plans to achieve riches and assert their position within the Abyss.

## Encounters

Ultrodemons are every bit as greedy and rapacious as their mezzodemon warriors. They broker lopsided deals with other factions and sell their services in exchange for exorbitant sums, magic items, and dire favors. Ultrodemons are found among all kinds of demons and powerful humanoids, but they are rarely loyal to those creatures. An ultrodemon's arrangement is never binding. It turns against its employer when a deal ceases to be profitable.

**Ultrodemon Schemer** **Level 22 Controller (Leader)**
Medium elemental humanoid (demon) XP 4,150

**HP** 205; **Bloodied** 102 **Initiative** +15
**AC** 36, **Fortitude** 32, **Reflex** 34, **Will** 34 **Perception** +21
**Speed** 7, phasing Blindsight 5

**Standard Actions**

**Longsword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +27 vs. AC
*Hit:* 3d8 + 10 damage, and the target is dazed until the end of the schemer's next turn.

**Fiery Rays** (fire) ✦ **At-Will**
*Attack:* Ranged 10 (one or two creatures); +25 vs. Reflex
*Hit:* 3d6 + 7 fire damage.

**Demonic Authority** ✦ **Recharge** when first bloodied
*Effect:* Each ally adjacent to the schemer makes a melee basic attack with combat advantage as a free action.

**Minor Actions**

**Hypnotic Gaze** (charm) ✦ **Recharge** ⚅ ⚄ ⚃
*Attack:* Ranged 5 (one creature); +25 vs. Will
*Hit:* The target is immobilized (save ends).
*Effect:* The target cannot attack the schemer until the end of the target's next turn.

**Treacherous Gaze** (charm) ✦ **Recharge** ⚃
*Attack:* Ranged 5 (one creature); +25 vs. Will
*Hit:* The target is dominated until the end of the schemer's next turn.

**Triggered Actions**

**Variable Resistance** ✦ **Encounter**
*Trigger:* The schemer takes acid, cold, fire, lightning, or thunder damage.
*Effect (Free Action):* The schemer gains resist 20 to the triggering damage type until the end of the encounter.

**Self-Preservation** (illusion, teleportation) ✦ **Encounter**
*Trigger:* An enemy bloodies the schemer.
*Effect (Immediate Reaction):* The schemer teleports, swapping places with an ally it can see within 10 squares. The schemer becomes invisible until the end of its next turn, and the ally can make a melee basic attack as a free action against the enemy that bloodied the schemer if it is within the ally's reach.

**Skills** Arcana +22, Bluff +23, Intimidate +23, Stealth +20
**Str** 13 (+12) **Dex** 18 (+15) **Wis** 20 (+16)
**Con** 21 (+16) **Int** 23 (+17) **Cha** 25 (+18)
**Alignment** chaotic evil **Languages** Abyssal
**Equipment** longsword

### Ultrodemon Schemers in Combat

A schemer is a mastermind, working to twist events to its benefit. The demon orchestrates the battle while allies form a guard around the creature. A schemer lashes out at its enemies' minds while driving allies to attack quickly and brutally. When an enemy presses it, a schemer strikes out with *longsword* and then walks safely away while the attacker is reeling.

A schemer avoids battle unless it cannot escape or unless the battle is necessary to achieve its long-range goals. If a fight sours, a schemer abandons the scene, bringing only its favorite allies with it. The demon orders its expendable troops to delay enemies until it has safely retreated.

# DERRO

Derros are warped descendants of a mad, power-hungry civilization that nearly ripped apart the planes when the world was still young. Craving primordial power but unwilling to bend their knees to any master, the derros created portals to the Far Realm in hopes of harnessing its power. The madness and horror they unleashed caused the World Serpent to drag their lands beneath the surface to halt their machinations.

When a band of drow first encountered the survivors of the derros' civilization, only one of the dark elves escaped. When she returned to her people, her severed limbs and lunatic ravings convinced the drow that the derros must be destroyed.

Centuries spent languishing in their ruined cities have not dissuaded the derros from their deviant activities. They regularly raid neighboring civilizations and make forays to the surface world. Derro raiders snatch up slaves to spawn aberrant horrors. Their world is one of suffering and desire, of unchecked paranoia and brutal treachery. Even the decadent drow cannot tolerate the derros and have sworn eternal war against them.

## Lore

**Dungeoneering DC 23:** Derros linger in their civilization's ruins and crawl about the rubble like vermin on a bloated carcass. Derros exist only in small numbers, supplementing their population with slaves. Quaggoth, drow, humans, and goblins can be found toiling in fields or gracing feast tables. Derros exult in their power and kill their thralls in reaction to the slightest offense.

Derro savants are powerful mystics attuned to the Far Realm, and they rule derro settlements. They rarely guide or supervise, however, preferring to advance their understanding of aberrant power. Therefore, the strongest derros govern in the savants' stead and enforce their whims with cold steel and savage brutality. Derros work in bands to police and abuse their slaves and to raid nearby humanoid settlements, including communities of other derros.

## Encounters

Derros have no allies among Underdark civilizations; they are regarded as enemies by all other races that make their home in the dark. Humanoids that fight alongside derros serve under pain of death. Slaves taken by derros to serve as soldiers include surface folk and Underdark dwellers alike. However, such conscripts are sometimes unreliable and attack nearby derros if doing so might lead to an escape.

Derros do enter alliances with some non-humanoids and aberrants. They work with grells, mind flayers, and beholders, and they readily serve aboleths, which they see as the ultimate expression of the Far Realm's power.

BEN WOOTTEN

# Derro Warrior

Abandoned outposts, shattered merchant trains, and razed strongholds litter the Underdark. Derros subscribe to the notion of preemptive strikes, so patrols of warriors make frequent raids into neighboring lands to keep their enemies guessing. Derro warriors regard service in a patrol as an honor, and derro savants use these teams to remove troublesome rivals and unruly servants.

**Derro Warrior** **Level 13 Artillery**
Small natural humanoid XP 800

**HP** 101; **Bloodied** 50 **Initiative** +12
**AC** 27, **Fortitude** 24, **Reflex** 27, **Will** 24 **Perception** +9
**Speed** 5 Darkvision
**Saving Throws** +2 against fear effects

**Traits**

**Combat Advantage**
The warrior deals 2d6 extra damage against any creature granting combat advantage to it.

**Standard Actions**

**Dagger** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +18 vs. AC
*Hit:* 3d4 + 9 damage.

**Bolt Spray** (weapon) ✦ **Recharge** ⚄ ⁞⁞
*Requirement:* The warrior must be wielding a repeating hand crossbow.
*Attack:* Close blast 5 (creatures in blast); +20 vs. AC
*Hit:* 2d8 + 7 damage, and the warrior pushes the target 1 square.

**Minor Actions**

**Repeating Hand Crossbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 10/20 (one creature); +20 vs. AC
*Hit:* 1d8 + 5 damage.

**Free Actions**

**Strength of Madness** ✦ **Encounter**
*Requirement:* The warrior can use *strength of madness* only during its turn.
*Effect:* Roll a d6 and add the result as a power bonus to the warrior's attack rolls until the end of its next turn. In addition, the warrior grants combat advantage until the end of its next turn.

**Skills** Intimidate +13, Stealth +17
**Str** 11 (+6) **Dex** 22 (+12) **Wis** 6 (+4)
**Con** 17 (+9) **Int** 10 (+6) **Cha** 14 (+8)
**Alignment** chaotic evil **Languages** Common, Deep Speech
**Equipment** leather armor, dagger, repeating hand crossbow, 4 magazines of 10 bolts each

## Derro Warriors in Combat

Reckless and aggressive, a derro warrior sprays the battlefield with bolts, hitting allies and enemies alike. Its purpose is to kill, and if dropping a rival in the field gives it a step up the chain of command, that's even better.

# Derro Thug

Madness defines a derro's existence, and even the lowliest derro is caught up in strange delusions. A derro thug roams remote tunnels, cackling as it seeks creatures with whom it shares its fiendish fantasies.

**Derro Thug** **Level 14 Minion Brute**
Small natural humanoid XP 250

**HP** 1; a missed attack never damages a minion. **Initiative** +9
**AC** 26, **Fortitude** 25, **Reflex** 24, **Will** 25 **Perception** +5
**Speed** 5 Darkvision

**Standard Actions**

**Club** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +19 vs. AC
*Hit:* 14 damage.

**Triggered Actions**

**Mad Sacrifice** ✦ **Encounter**
*Trigger:* The thug misses with an attack.
*Effect (Free Action):* The attack instead hits, and the thug drops to 0 hit points.

**Str** 13 (+8) **Dex** 14 (+9) **Wis** 6 (+5)
**Con** 18 (+11) **Int** 8 (+6) **Cha** 16 (+10)
**Alignment** chaotic evil **Languages** Common, Deep Speech
**Equipment** leather armor, light shield, club

## Derro Thugs in Combat

A derro thug shrieks and howls in battle, lunging at foes like a starving, rabid dog. A thug obeys only its leaders, though its obedience is limited by the thug's sanity at any given moment.

# Derro Fanatic

Derro savants value fanaticism. The deadliest warriors are brought into the savants' inner sanctums and forced to peer into the Far Realm. Derros that don't have their minds blasted away become the fanatical warriors that form the derro army.

**Derro Fanatic** **Level 14 Skirmisher**
Small natural humanoid XP 1,000

**HP** 140; **Bloodied** 70 **Initiative** +13
**AC** 27, **Fortitude** 26, **Reflex** 25, **Will** 25 **Perception** +5
**Speed** 6 Darkvision

**Traits**

**Unleashed Madness**
While the fanatic is bloodied, it takes a -2 penalty to attack rolls and deals 2d6 extra damage.

**Standard Actions**

**Battleaxe** (weapon) ✦ **At-Will**
*Effect:* The fanatic ends any mark on it, shifts 2 squares, and makes the following attack.
*Attack:* Melee 1 (one creature); +19 vs. AC
*Hit:* 2d10 + 11 damage.

**Free Actions**

**Strength of Madness** ✦ **Encounter**
*Requirement:* The fanatic can use *strength of madness* only during its turn.
*Effect:* Roll a d6 and add the result as a power bonus to the fanatic's attack rolls until the end of its next turn. In addition, the fanatic grants combat advantage until the end of its next turn.

**Triggered Actions**

**Insane Bloodlust** ✦ **At-Will**
*Trigger:* The fanatic bloodies an enemy.
*Effect (Free Action):* The fanatic uses *battleaxe* against the enemy.

**Skills** Intimidate +15
**Str** 12 (+8) **Dex** 19 (+11) **Wis** 6 (+5)
**Con** 20 (+12) **Int** 10 (+7) **Cha** 16 (+10)
**Alignment** chaotic evil **Languages** Common, Deep Speech
**Equipment** leather armor, battleaxe

## Derro Fanatics in Combat

Screaming and frothing, a fanatic leaps into battle, savaging its enemies with *battleaxe*. A derro fanatic fights without fear, heedless of its injuries. Even when at death's door, it never walks away from a slaughter.

# Derro Harvester

Toil is beneath derros, especially when humanoids can be forced to work in their stead. Slaves are vital to derro society. Derro harvesters gather chattel to work the fungus fields and to serve as subjects for experiments. Harvesters slink into the tunnels beyond their cities' ruins to waylay travelers and ambush merchant trains.

**Derro Harvester** **Level 15 Lurker**
Small natural humanoid XP 1,200

**HP** 116; **Bloodied** 58 **Initiative** +17
**AC** 30, **Fortitude** 27, **Reflex** 28, **Will** 26 **Perception** +10
**Speed** 6 Darkvision

**Traits**

**Combat Advantage**
The harvester deals 2d6 extra damage against any creature granting combat advantage to it.

**Standard Actions**

⊕ **War Pick** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +20 vs. AC
*Hit:* 3d8 + 10 damage.

⸸ **Harvest** (weapon) ✦ **At-Will**
*Requirement:* The harvester must have started its turn hidden from the target.
*Attack:* Melee 1 (one creature); +18 vs. Fortitude
*Hit:* The target falls unconscious (save ends).

**Flee to the Shadows** ✦ **At-Will**
*Effect:* The harvester moves its speed. If it has concealment at the end of its move, it can attempt a Stealth check to become hidden.

**Life in Chains** ✦ **Encounter**
*Requirement:* The harvester must be holding shackles.
*Effect:* The harvester shackles one Medium or smaller helpless creature that is adjacent to it until the creature succeeds at using the escape action against the harvester. While shackled, the creature is restrained. In addition, it falls prone whenever it is hit by a melee attack.

**Free Actions**

**Strength of Madness** ✦ **Encounter**
*Requirement:* The harvester can use *strength of madness* only during its turn.
*Effect:* Roll a d6 and add the result as a power bonus to the harvester's attack rolls until the end of its next turn. In addition, the harvester grants combat advantage until the end of its next turn.

**Skills** Stealth +18
**Str** 10 (+7) **Dex** 22 (+13) **Wis** 6 (+5)
**Con** 20 (+12) **Int** 11 (+7) **Cha** 17 (+10)
**Alignment** chaotic evil **Languages** Common, Deep Speech
**Equipment** leather armor, war pick, 1 set of shackles

## Derro Harvesters in Combat

While its cohorts slaughter enemy guards, a harvester enlists suitable thralls, knocking them unconscious and binding them in shackles. If a shackled creature escapes its bindings, the harvester and its slaves focus on beating that enemy into submission.

# Derro Ironguard

Paranoia prompts derros to use elite ironguard warriors to protect their crumbling homes. A derro ironguard's extensive training with the hooked spear allows it to dispatch enemies and take down the rare slave that tries to flee. An ironguard undergoes special indoctrination to harden its mind and resist errant thoughts, making it more disciplined than other derros.

**Derro Ironguard** **Level 15 Soldier**
Small natural humanoid XP 1,200

**HP** 150; **Bloodied** 75 **Initiative** +9
**AC** 31, **Fortitude** 27, **Reflex** 24, **Will** 27 **Perception** +5
**Speed** 5 Darkvision

**Standard Actions**

⊕ **Spear** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +20 vs. AC
*Hit:* 3d8 + 10 damage, or 3d8 + 15 against prone targets.

⸸ **Hooking Jab** (weapon) ✦ **At-Will**
*Requirement:* The ironguard must not have a creature grabbed.
*Attack:* Melee 1 (one creature); +20 vs. AC
*Hit:* 2d8 + 5 damage, or 2d8 + 10 against prone targets, and the target is grabbed.

**Minor Actions**

⸸ **Unbalancing Thrust** (weapon) ✦ **At-Will** (1/round)
*Requirement:* The ironguard must be wielding a spear.
*Attack:* Melee 1 (one creature grabbed by the ironguard); +20 vs. Fortitude
*Hit:* The target falls prone.

**Free Actions**

**Strength of Madness** ✦ **Encounter**
*Requirement:* The ironguard can use *strength of madness* only during its turn.
*Effect:* Roll a d6 and add the result as a power bonus to the ironguard's attack rolls until the end of its next turn. In addition, the ironguard grants combat advantage until the end of its next turn.

**Skills** Intimidate +17, Thievery +12
**Str** 17 (+10) **Dex** 10 (+7) **Wis** 6 (+5)
**Con** 22 (+13) **Int** 15 (+9) **Cha** 20 (+12)
**Alignment** chaotic evil **Languages** Common, Deep Speech
**Equipment** scale armor, spear

## Derro Ironguards in Combat

Although an ironguard is every bit as unbalanced as other derros, it channels its unstable mind toward cowing enemies. An ironguard mocks its foes, issuing insults with every strike. After knocking a foe to the ground, an iron guard laughs and repeatedly drives a spear into the victim's flesh until the creature stops moving.

# Derro Savant

The derro empire fell long ago, but derro savants keep alive ancient traditions and lore, twisting history to discourage subversive plotting. Deep inside ruins, incomprehensible horrors guard the savants that gather to work dire magic. They struggle to gain power by reopening portals to the Far Realm.

| **Derro Savant** | **Level 16 Controller** |
|---|---|
| Small natural humanoid | XP 1,400 |
| **HP** 154; **Bloodied** 77 | **Initiative** +10 |
| **AC** 30, **Fortitude** 27, **Reflex** 28, **Will** 29 | **Perception** +6 |
| **Speed** 5, teleport 3 | Darkvision |
| **Standard Actions** | |
| **Scourge** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +21 vs. AC | |
| *Hit:* 3d8 + 11 damage, and the target takes a -2 penalty to attack rolls until the end of the savant's next turn. | |
| **Mind Scourge** (implement, psychic) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +19 vs. Will | |
| *Hit:* 3d6 + 8 psychic damage, and the target chooses either to take ongoing 10 psychic damage (save ends) or be dazed (save ends). | |
| **Window to Madness** (implement, psychic, zone) ✦ **Recharge** when this power's zone ends | |
| *Effect:* The savant creates a zone in an area burst 1 within 10 squares centered on an ally. The zone lasts until the end of the encounter. A nonderro that enters the zone or ends its turn there takes 10 psychic damage. The savant can end the zone as a minor action. | |
| **Minor Actions** | |
| **Dance of Madness** ✦ **At-Will** | |
| *Effect:* The savant slides each creature within the zone created by *window to madness* 2 squares. | |
| **Free Actions** | |
| **Strength of Madness** ✦ **Encounter** | |
| *Requirement:* The savant can use *strength of madness* only during its turn. | |
| *Effect:* Roll a d6 and add the result as a power bonus to the savant's attack rolls until the end of its next turn. In addition, the savant grants combat advantage until the end of its next turn. | |
| **Skills** Arcana +18 | |
| **Str** 9 (+7) **Dex** 14 (+10) **Wis** 6 (+6) | |
| **Con** 18 (+12) **Int** 21 (+13) **Cha** 23 (+14) | |
| **Alignment** chaotic evil **Languages** Common, Deep Speech, telepathy 10 | |
| **Equipment** scourge, orb | |

## Derro Savants in Combat

When enemies approach, a derro savant throws open a portal to the Far Realm. The horrors that leer from that gate blast the sanity from the savant's foes. The strange energy that flows from it causes bursts of lunacy in creatures, forcing their bodies into a dance they can't control. A savant uses its teleport speed to avoid enemies that try to close with it.

# Warped Slave

Derros use captives and unruly slaves as fodder for experiments. These victims, warped by the magic of the Far Realm, become abominable aberrant creatures. Their flesh expands, becoming rubbery and misshapen. Tentacles, extra eyes, bone spikes, and oozing boils cover their bodies. They lose much of their ability to speak or communicate, and their eyes grow dead and lifeless.

| **Warped Slave** | **Level 16 Brute** |
|---|---|
| Large aberrant humanoid | XP 1,400 |
| **HP** 193; **Bloodied** 96 | **Initiative** +11 |
| **AC** 28, **Fortitude** 29, **Reflex** 26, **Will** 29 | **Perception** +7 |
| **Speed** 6 (can't shift) | Darkvision |
| **Traits** | |
| **Disintegrating Mind** (psychic) ✦ **Aura** 1 | |
| Any enemy that ends its turn within the aura takes 5 psychic damage. Whenever a derro within the aura uses *strength of madness*, the warped slave can use *tentacle* as a free action. | |
| **Standard Actions** | |
| **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +21 vs. AC | |
| *Hit:* 3d12 + 6 damage. | |
| **Tentacle** ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +19 vs. Reflex | |
| *Hit:* 2d12 + 6 damage, and the warped slave grabs the target. The warped slave then pulls the target 1 square. | |
| **Flailing Tentacles** ✦ **At-Will** | |
| *Requirement:* The warped slave must be bloodied. | |
| *Attack:* Close burst 2 (enemies in burst); +21 vs. AC | |
| *Hit:* 2d12 + 6 damage, and the warped slave pulls the target 1 square. | |
| **Str** 18 (+12) **Dex** 16 (+11) **Wis** 8 (+7) | |
| **Con** 23 (+14) **Int** 4 (+5) **Cha** 23 (+14) | |
| **Alignment** chaotic evil **Languages** Common, Deep Speech | |

## Warped Slaves in Combat

After having their minds stripped down to the most savage instincts, slaves remember only to follow the orders of their derro masters. Derros don't always supply reasonable or intelligible commands, though, so their slaves often rampage about the battlefield, flailing around and causing havoc.

# DEVIL, CORRUPTION

Corruption devils, or paeliryons, are bloated, infernal masterminds of graft, sleaze, and vice. Most serve the archdevil Dispater, lord of the second hell. Corruption devils spend their time overseeing lesser devils on the urban outskirts of Dis and tormenting the damned. The fiends enforce Dispater's will among the fetid hives and warrens that writhe beneath the Iron Tower's long shadow.

## Lore

**Arcana DC 29:** A corruption devil's grotesque features mask a nimble and creative intellect. The Nine Hells is politically treacherous, but with a paeliryon pulling the strings, the scene turns into a dangerous maze of double-dealings, false turns, and broken promises.

A corruption devil is a bogeyman in the flesh. It hides in the shadows, manipulating cutthroats and bureaucrats. The effect of a corruption devil's web of intrigue is felt long before the fiend materializes on the scene.

## Encounters

A corruption devil is a shrewd judge of talent, and it sees each creature as a means to an end. It manipulates powerful creatures from a distance, while its closest allies are fawning sycophants and expendable muscle. Corruption devils have been known to ally with a diverse group of creatures. A corruption devil's underlings might include cambions, vizier devils, tieflings, mortals, and succubi, though few ever realize their master is a paeliryon.

## Corruption Devil

Although physically imposing, a corruption devil prefers manipulation to violence. It bargains rather than fighting when in peril, buying time to gain some advantage. Once it has an advantage, a corruption devil does not hesitate to exact revenge.

| **Corruption Devil** | **Level 22 Controller (Leader)** |
|---|---|
| Large immortal humanoid (devil) | XP 4,150 |
| **HP** 208; **Bloodied** 104 | **Initiative** +13 |
| **AC** 36, **Fortitude** 34, **Reflex** 34, **Will** 35 | **Perception** +19 |
| **Speed** 4, fly 6 (hover) | Darkvision |
| **Saving Throws** +5 against fear or charm effects | |
| **Traits** | |
| ☼ **Corruptive Presence** ✦ **Aura** 5 | |
| Enemies within the aura take a -2 penalty to saving throws. | |
| **Standard Actions** | |
| ⊕ **Corrupting Claws** (psychic) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +27 vs. AC | |
| *Hit:* Ongoing 10 psychic damage (save ends). | |
| ⊛ **Word of Corruption** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 20 (one creature); +25 vs. Will | |
| *Hit:* Ongoing 5 psychic damage (save ends). | |
| **Minor Actions** | |
| **Sway the Corrupt** (charm) ✦ **At-Will** (1/round) | |
| *Effect:* One enemy within 10 squares of the devil that is taking ongoing psychic damage is dominated until the end of its next turn. | |
| **Doom the Corrupt** (psychic) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Effect:* One ally or dominated creature within 10 squares of the devil makes a melee basic attack against a creature of the devil's choice. If that attack hits, the target of the attack is also immobilized (save ends). | |
| **Desperate Measures** ✦ **Recharge** when first bloodied | |
| *Effect:* One of the devil's allies within 5 squares of it can make a basic attack as a free action and can score a critical hit on a roll of 19-20 with this attack. The ally grants combat advantage until the devil's next turn. While the devil is bloodied, this power affects each of the devil's allies within 5 squares. | |
| **Skills** Bluff +23, Diplomacy +23, Insight +24 | |
| **Str** 22 (+17) **Dex** 15 (+13) **Wis** 27 (+19) | |
| **Con** 24 (+18) **Int** 25 (+18) **Cha** 24 (+18) | |
| **Alignment** evil **Languages** Supernal | |

### Corruption Devils in Combat

A corruption devil is an arrogant tactician that fights from behind a wall of disposable underlings while it hurls epithets at its enemies. It casts powerful curses that rend a victim's mind and allow the devil to play marionette with the foe's body.

When a battle turns against a corruption devil, its onslaught of insults becomes more vicious. The devil whips its allies into a slathering pack of fiends. After the devil's allies are spent, it uses its bat wings to flee the battlefield, already plotting revenge.

WAYNE REYNOLDS

# Sire of Corruption

Sires of corruption are the most powerful corruption devils. They spread malign influence through the world by coercing humanoids into agreeing to foul contracts that transform them into corrupted. A sire of corruption's goal might be simple: Send a town spiraling into corruption and vile deeds. Instead, it could be working toward a much greater goal, perhaps the downfall of a lawful kingdom or organization. Sires of corruption resent those whose morals and reputations are immaculate, so they conspire to corrupt such people or else perpetrate their death.

**Sire of Corruption** **Level 29 Elite Controller (Leader)**
Medium immortal humanoid (devil) XP 15,000

**HP** 530; **Bloodied** 265 **Initiative** +21
**AC** 44, **Fortitude** 40, **Reflex** 42, **Will** 43 **Perception** +22
**Speed** 6
**Resist** 15 fire
**Saving Throws** +2; **Action Points** 1

**Traits**

☼ **Lasting Corruption ✦ Aura** 5
Enemies within the aura take a -2 penalty to saving throws against charm effects.

**Standard Actions**

⊕ **Corrupting Touch** (psychic) **✦ At-Will**
*Attack:* +32 vs. Will (one or two creatures)
*Hit:* 4d6 + 10 psychic damage, and the target takes a -2 penalty to defenses against charm effects until the end of the sire of corruption's next turn.

⸸ **Touch of Vice** (charm, psychic) **✦ Recharge** ⚅ ⚄ ⚃
*Attack:* Melee 1 (one or two creatures); +32 vs. Will
*Hit:* 4d6 + 10 psychic damage, and choose one of the following:
- ✦ Lust: The target is marked by one enemy within 5 squares of it (save ends).
- ✦ Excess: The target is dazed (save ends).
- ✦ Greed: The sire of corruption slides the target 5 squares to a square adjacent to one of the target's allies. The target must make an opportunity attack against any ally that takes an action that would provoke opportunity attacks from enemies (save ends).
- ✦ Fear: The sire of corruption pushes the target 5 squares. The target cannot willingly move nearer to the sire than the square where the target started its turn (save ends).
- ✦ Sloth: The target is immobilized (save ends).
- ✦ Vengeance: The target takes 2d10 + 10 damage whenever it uses an attack power (save ends).

**Call to Corruption ✦ Recharge** when first bloodied
*Effect:* Six corrupted followers appear in unoccupied squares within 5 squares of the sire of corruption. The corrupted followers act immediately after the sire of corruption in the initiative order.

**Minor Actions**

**Spread Depravity ✦ At-Will** (1/round)
*Effect:* One corrupted follower within 10 squares of the sire of corruption can make a basic attack as a free action.

**Triggered Actions**

⇜ **Lasting Vice** (charm, psychic)
*Trigger:* The sire of corruption drops to 0 hit points.
*Attack (immediate Interrupt):* Close burst 5 (enemies in burst); +32 vs. Will
*Hit:* 4d6 + 10 psychic damage, and the target is subject to one of *touch of vice*'s effects chosen by the sire of corruption.

| | | |
|---|---|---|
| **Str** 22 (+20) | **Dex** 25 (+21) | **Wis** 27 (+22) |
| **Con** 25 (+21) | **Int** 28 (+23) | **Cha** 30 (+24) |

**Alignment** evil **Languages** Supernal

## Sires of Corruption in Combat

A sire of corruption surrounds itself in battle using its ability to bring forth corrupted followers. The diabolic contracts it creates with corrupted humanoids allow the sire to call upon those creatures at any time for assistance. A sire of corruption fights on its own terms. It tends to work from the shadows, sending out corrupted followers and other allies to do its bidding. When a sire of corruption faces foes in combat, there's a good chance it is prepared with traps and allies. When it directs its powers against enemies, it varies its targets, trying to spread its awful touch among many foes.

# Corrupted Follower

The souls collectively known as corrupted followers usually serve powerful creatures, those who embody or command the vice they are related to. Usually this means they are in the service of corruption devils. When a humanoid lives a life with utter devotion to a vice, that person risks becoming a corrupted follower. Corruption devils watch from afar as individuals lose themselves in the throes of lust, excess, or hatred. A corruption devil carefully studies these individuals, assessing their weaknesses and figuring out how to pull their strings. Then, when a person is miserable and seemingly inconsolable, the devil offers that individual the object of his or her desire. Contracts are written up, carefully worded to fool the unwitting humanoid. Once the pact is signed, the script burns red, scrawling the infernal contract onto the humanoid's flesh and transforming him or her into a reflection of vice.

## Lore

**Arcana DC 28:** Corrupted appear within repressed societies, and their very presence causes the spread of iniquity. Where there is one corrupted, there are usually more. Each corrupted has its own story, but they usually have become so entirely transformed that they don't recall their former lives. A corrupted is the result of infernal contracts whispered during the lowest moments of a person's life. The contract gives the corrupted the object of its desire in exchange for its soul. It is possible to bring a corrupted back to its former state, but it requires the infernal contract to be nulled and for the corrupted to forsake its vices.

## Encounters

Corrupted followers exist among all humanoids, so they find allies among all creatures. Allying with a corrupted follower requires only that another

creature be willing to appeal to the follower's desires. Corrupted followers perpetuate vice among others, so they usually gather together. They are often put into service by powerful humanoid rulers, or by creatures hoping to upset the order of a civilization, such as devils, demons, forsaken, or fomorians. Corrupted followers are most commonly found among corruption devils, who are usually responsible for their creation. Corruption devils in the Nine Hells often have vast retinues of corrupted followers that obey their every whim.

## Corrupted Lecher

A new woman arrives in a city, attracting the attention of the city's male inhabitants. She is beautiful, wealthy, and charming. Soon, she becomes a source of obsession for several of the town's residents. They watch her with lascivious eyes, leering as she walks down the street. Some follow her, but they never get too close. They lie awake at night, thinking about her. They lose sleep, their eyes becoming dull and sunken. They stop working and taking care of themselves. Thus, when the corruption devil offers these onlookers the fulfillment of their desires, they eagerly accept without realizing the deception.

**Corrupted Lecher** **Level 24 Minion Lurker**
Medium natural humanoid XP 1,513

**HP** 1; a missed attack never damages a minion. **Initiative** +22
**AC** 38, **Fortitude** 36, **Reflex** 36, **Will** 37 **Perception** +16
**Speed** 6

**Traits**

**Focused Carnality**
The lecher cannot be targeted by an attack unless it is the nearest enemy to an attacker.

**Standard Actions**

**Touch of Lust** (charm) ✦ **At-Will**
*Attack:* Melee 1 or Ranged 10 (one creature); +27 vs. Will
*Hit:* 16 damage. Choose one of the lecher's allies within 5 squares of the target. Until the end of the target's next turn, the target is marked by that creature. In addition, if the target has any creatures marked, those marks end.

**Triggered Actions**

**Spread of Passion**
*Trigger:* An enemy reduces the lecher to 0 hit points.
*Effect (No Action):* The triggering enemy moves its speed as a free action to a square adjacent to its nearest enemy.

| | | |
|---|---|---|
| **Str** 17 (+15) | **Dex** 23 (+18) | **Wis** 18 (+16) |
| **Con** 25 (+19) | **Int** 14 (+14) | **Cha** 28 (+21) |

**Alignment** evil **Languages** Common

## Corrupted Glutton

It might begin with wealth, being able to afford to eat rich foods. Or the source of excess might be an obsession with a particular food or drink. Whatever the case, an individual doomed to become a corrupted glutton grows fat on gastronomical indulgence. As months pass, the person's gluttony leaves him or her unable to move or work. The person feels constantly starved. Then, when a corruption devil offers a morsel of some delicacy, the victim gladly accepts the devil's conditions without realizing his or her dire fate.

**Corrupted Glutton** **Level 25 Minion Soldier**
Medium natural humanoid XP 1,750

**HP** 1; a missed attack never damages a minion. **Initiative** +16
**AC** 41, **Fortitude** 38, **Reflex** 37, **Will** 36 **Perception** +13
**Speed** 6

**Standard Actions**

**Bite** ✦ **At-Will**
*Requirement:* The glutton must not have a creature grabbed.
*Attack:* Melee 1 (one creature); +30 vs. Will
*Hit:* 12 damage, and the target is grabbed.

**Chew** ✦ **At-Will**
*Effect:* One creature grabbed by the glutton takes 12 damage.

**Triggered Actions**

**Spread of Excess**
*Trigger:* An enemy reduces the glutton to 0 hit points.
*Effect (No Action):* If the triggering enemy does not regain hit points before the end of its next turn, it takes 16 damage.

| | | |
|---|---|---|
| **Str** 25 (+19) | **Dex** 14 (+14) | **Wis** 12 (+13) |
| **Con** 28 (+21) | **Int** 16 (+15) | **Cha** 20 (+17) |

**Alignment** evil **Languages** Common

WAYNE REYNOLDS

MICHAEL PHILLIPI

## Corrupted Monger

A person doomed to become a corrupted monger is focused on wealth to the exclusion of all else. The person hates the poor and resents the wealthy. His or her greed might begin by coveting a single, precious item. A man might have a single gold coin, given to him by a generous adventurer. After this taste of wealth, greed takes hold within him. He begins doing anything to gain more money, taking up crime and other evil acts. His eyes grow wide and unblinking as he stares at his wealth. Soon, his skin becomes sickly and pale from spending too much time in quiet seclusion with his treasures. Then, when a corruption devil offers an item that puts to shame all his other treasures, the poor soul quickly submits to any terms, not realizing the horrible transformation soon to take place.

| **Corrupted Monger** | **Level 26 Minion Artillery** |
|---|---|
| Medium natural humanoid | XP 2,250 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +20 |
| **AC** 40, **Fortitude** 37, **Reflex** 38, **Will** 39 | **Perception** +16 |
| **Speed** 6 | |
| **Standard Actions** | |
| ⨁ **Touch of Greed** (charm) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +28 vs. Will | |
| *Hit:* 12 damage, and the monger slides the target 5 squares to a square adjacent to one of the monger's allies. | |
| ⚚ **Filch Magic** ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +31 vs. Reflex | |
| *Hit:* 16 damage, and the target loses one of its daily magic item uses until the end of the encounter. | |
| **Triggered Actions** | |
| **Dying Theft** | |
| *Trigger:* An enemy's attack reduces the monger to 0 hit points. | |
| *Effect (No Action):* If the triggering attack was made with a magic item that has any encounter or daily powers, those powers are expended. | |
| **Str** 15 (+15) **Dex** 24 (+20) **Wis** 16 (+16) | |

## Corrupted Idler

A mother with a dozen children is tired of working, worn out from a life she can't escape. She feels like a victim, and she pities herself. Her life doesn't improve, it only seems to worsen, so eventually she gives up. She confines herself to her room, forcing her children onto the streets to panhandle to support themselves. She relies on them to feed her and dress her. Soon they barely even do that, though. Thus, when infernal powers whisper of an opportunity to live the life she deserves, she accepts without realizing the creature she'll become.

| **Corrupted Idler** | **Level 27 Minion Soldier** |
|---|---|
| Medium natural humanoid | XP 2,750 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +16 |

## Corrupted Lunatic

It begins with one act, a simple offense. A passerby accidentally trips another person, sending him tumbling into a puddle of filth. The person who fell is angry, and the person who tripped him doesn't apologize. They go their separate ways. Days pass, and the one who fell can't let go of his anger. He becomes consumed by fury toward the offender. He tries to find the other, to make him apologize, but he can't. With no outlet for his anger, it burns away at his soul. Then, when his rage threatens to drive the individual crazy, a figure appears, offering to reveal the location of the offender. Gladly accepting the opportunity for vengeance, the person becomes a corrupted lunatic.

| **Corrupted Lunatic** | **Level 28 Minion Brute** |
|---|---|
| Medium natural humanoid | XP 3,250 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +21 |

## Corrupted Craven

A soldier huddles nervously in a lone outpost, keeping an eye out for orc marauders. Days spent alone eat away at her resolve, and she begins to contemplate abandoning her post. Then, one day, she spots a horde of orcs rolling over one of the distant hills. She knows she must run to town to warn the residents, but she is paralyzed by fear. As the orcs grow closer, she is unable to move. Then, fortune seems to smile as another helmeted soldier appears, offering to help—she need only sign a contract that relieves her of duty.

| **Corrupted Craven** | **Level 29 Minion Controller** |

## Corrupted Followers in Combat

In combat, corrupted followers spread out, trying to sow discord among as many enemies as possible. They take full advantage of their charming effects to put multiple enemies under their influence. If different types of corrupted are in combat, they might gang up on a single opponent, afflicting him or her with various debilitating effects.

Corrupted followers are often subordinate to other creatures. They are obedient and subject to the whims of their masters. A mortal who originally made a deal with infernal powers has little freedom and only scattered memories of his or her former self.

STEVE PRESCOTT

# DEVIL, HELL KNIGHT

Almost every land has a legend about black riders that serve as harbingers of doom. Many of these stories refer to hell knights, members of hell's cavalry that are loosed on the world.

The first hell knights, or narzugons, were servants of the nameless god Asmodeus once served. Asmodeus tricked them into betraying He Who Was before slaying the god. Their betrayal damned them to serve Asmodeus for eternity, despite their hatred for the Nine Hells' lord.

Not every hell knight serves Asmodeus directly, however. Each archdevil, duke, and petty baron in the Nine Hells has hell knights at its disposal. Some hell knights are part of a company called the Order of the Nightmare, which is named after the steeds its members ride.

## Lore

**Arcana or History DC 23:** Narzugons are fueled by anger because they cannot gain forgiveness for betraying their master. Bound to eternally follow orders for a cause they know is wrong, these devils hate everything. They hate their new masters; they hate themselves; they hate their immortality; and they hate free mortals. Hell knights are a form of devil reserved for servants tricked into committing treason against their deity. Asmodeus was responsible for tricking the first humanoids who became hell knights, and since then, the ranks of the narzugons have only swelled.

CHRIS SEAMAN

## Encounters

Narzugons are clannish and associate infrequently with other forces of hell. They ally with other devils only when a master compels them to do so. A hell knight's mount is its most important ally. Traditionally, the mount of choice is a nightmare. Hell knights sometimes choose other mounts, though. The elite narzugon guard of Cania rides mammoths, and the ash riders of Avernus patrol skies atop wyverns.

| **Hell Knight** | **Level 15 Soldier** |
|---|---|
| Medium immortal humanoid (devil) | XP 1,200 |

| **Alignment** evil **Languages** Supernal | |
| **Equipment** plate armor, heavy shield, mace, lance | |

## Hell Knights in Combat

A hell knight is rarely found without its mount, which is usually a nightmare (*Monster Manual*, page 196). While mounted, a hell knight circles the battle like a vulture, looking for weaknesses within enemy ranks. Once a hell knight chooses its prey, the devil fixes its eyes upon that creature and charges. When on foot, a hell knight holes up with allies in choke points to limit the enemy's mobility.

# DEVIL, HELLWASP

Hellwasp devils are members of a huge colony that makes its home in the Garden of Delights in Malbolge. Ruthless and logical, with an alien intelligence and the unquestioning instincts of a colony insect, these devils live to serve the whims of their queen.

Hellwasp devils were once demons akin to mezzodemons. While in the Abyss, Glasya defeated their master and took them back to the Nine Hells. There, she transformed them into devils, making them shock troops and bodyguards.

## Lore

**Arcana DC 28:** Hellwasp devils were once demons in service to a wasplike demon lord. During the Blood War, Glasya defeated the demon lord, and its curious spawn flocked to her as their new queen.

Now, the hellwasp devil colony is an unwavering implement of Glasya's will. Unlike many of her other minions, hellwasps do not need to be seduced or manipulated. They see service to Glasya as an honor and a reward.

When encountered outside Malbolge, hellwasp devils are either on a mission for their queen or on loan to one of Glasya's allies.

## Encounters

Since they unquestioningly follow the orders of Glasya, hellwasp devils can be found with any creature that serves the daughter of Asmodeus. On rare occasions, Glasya loans out groups of hellwasp devils to her allies.

| **Hellwasp Colony Guard** | **Level 19 Minion Skirmisher** |
|---|---|
| Medium immortal magical beast (devil) | XP 600 |

| **Alignment** evil **Languages** Supernal | |

## Hellwasp Devils in Combat

Every member of a hive works toward Glasya's desires. Hellwasp devils operate as a unit to kill or grab foes. Colony guards swarm the battlefield, stabbing at enemies with their stingers. The larger hellwasp devils swoop in behind the guards, attempting to pierce foes and carry them off.

TOMÁS GIORELLO

# DEVIL, PASSION

Coercion, deception, and blackmail are weapons in a devil's arsenal, but seduction and passion can be as well. Seduction might be the domain of a succubus, but raw, hellfire-charged passion burns in the eyes of a passion devil, created in the image of Fierna, the queen of Phlegethos.

These powerful manipulators amplify others' passions into tidal waves of raging desire. Although passion devils can take the shape of other creatures, they lack the patience and subtlety of succubi. Their disguises burn away when their base and manipulative desires take control.

## Lore

**Arcana DC 25:** Passion devils are burning reflections of Fierna's vanity. Although formed in the image of its mistress, each devil manifests a physical flaw that is absent on the archdevil. The flaw can be as slight as a mole or as extreme as a hunchback.

Fierna sends these devils out to infiltrate her enemies' ranks. Eventually, though, a passion devil succumbs to its desire for violence and domination, revealing its true form. Fierna also uses passion devils to supplant her cult's leadership and keep an eye on its activities.

DAVE ALLSOP

## Encounters

Passion devils are found wherever their mistress bids them to go. They work with any ally they can manipulate. Fierna uses them as ambassadors to the courts of other archdevils or dukes of the Nine Hells. Groups of bearded devils often serve as bodyguards for these emissaries.

| **Passion Devil** | **Level 16 Controller** |
|---|---|
| Medium immortal humanoid (devil, shapechanger) | XP 1,400 |
| **HP** 156; **Bloodied** 78 | **Initiative** +14 |
| **AC** 30, **Fortitude** 27, **Reflex** 28, **Will** 29 | **Perception** +12 |
| **Speed** 6, fly 6 (hover) | Darkvision |
| **Resist** 20 fire | |
| **Traits** | |
| ☼ **Object of Desire** (charm) ✦ **Aura** 1 | |
| Enemies within the aura take a -2 penalty to saving throws against effects that daze. | |
| **Standard Actions** | |
| ⨺ **Claws** (fire) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +19 vs. Reflex | |
| *Hit:* 3d8 + 11 fire damage. | |
| ⨺ **Fiery Touch** (charm, fire) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature dazed by this devil's *beckoning whispers*); +19 vs. Reflex | |
| *Hit:* 1d8 + 11 fire damage, and the target is dominated until the end of the devil's next turn. | |
| ⇜ **Beckoning Whispers** (charm) ✦ **At-Will** | |
| *Attack:* Close blast 5 (enemies in blast); +19 vs. Will | |
| *Hit:* The devil pulls the target 5 squares, and the target is dazed (save ends). | |
| ⇜ **Passion's Flames** (fire) ✦ **Recharge** ⚄ ⚅ | |
| *Attack:* Close burst 3 (one creature in burst); +19 vs. Reflex | |
| *Hit:* The target takes ongoing 15 fire damage (save ends). If the target is dominated by the devil, the target also makes a melee basic attack as a free action against a creature of the devil's choice. | |
| **Minor Actions** | |
| **Change Shape** (polymorph) ✦ **At-Will** | |
| *Effect:* The devil alters its physical form to appear as a Medium humanoid until it attacks, until it uses *change shape* again, or until it drops to 0 hit points. The creature retains its statistics in its new form. Its clothing, armor, and other possessions do not change. To assume a specific individual's form, the devil must have seen that individual. Other creatures can make a DC 36 Insight check to discern that the form is a disguise. | |
| **Skills** Bluff +20, Diplomacy +20, Insight +17 | |
| **Str** 17 (+11) **Dex** 22 (+14) **Wis** 18 (+12) | |
| **Con** 20 (+13) **Int** 16 (+11) **Cha** 24 (+15) | |
| **Alignment** evil **Languages** Common, Supernal | |

## Passion Devils in Combat

A passion devil calls a victim with seductive words infused with eldritch power. Once its smitten foe is near, a passion devil attacks with *passion's flames*. Manipulative and impulsive, a passion demon regularly succumbs to its desire to watch an enemy rage out of control. Sometimes, passion devils are sent into battle as a diversion while their master launches more tactically precise attacks.

# DEVIL, RAGE

Rage devils were created to fight the Blood War, the intermittent conflict between the Abyss and the Nine Hells.

A rage devil's thick, stonelike skin is imbued with Supernal hieroglyphics expressing rage and hate. When these symbols flare, they erode an enemy's resistances. A rage devil is so named because it flies into a joyful rage when it smells enemy blood or feels an enemy's resolve weaken under the crush of its great maul.

Packs of rage devils roam the desolation of Avernus searching for enemies. Even though demons are their preferred victims, since the cooling of the Blood War, rage devils have been known to battle creatures not of the Abyss.

## Lore

**Arcana DC 21:** These glyph-covered, tusked brutes are the result of an experiment. Demon ichor was injected into the bodies of hell knights in the hope of creating devils capable of combating the brute force of demons. The experiment instead created uncontrollable creatures of carnage that rage against devils and demons alike. It was not until the ritualists bound their chaotic nature with Supernal hieroglyphs that they became true devils.

## Encounters

Rage devils wander the first layer of hell in packs, allying with any devil or agent of the hells as long as a battle is guaranteed. Rage devils admire hell knights and unquestionably follow them into battle, even though the hell knights treat them like mindless chattel. Legion devils are often paired with rage devils, who enjoy watching the legion devils be slaughtered in battle.

When found in the world, a rage devil is usually under the sway of an infernal warlock, a crazed despot, or a rampaging warlord. Diabolical cults might call a rage devil to take revenge on a hated foe. Controlling a rage devil, however, requires a strong and steady hand, and an out-of-control devil can cause as much damage to a weak cult as it does to the enemy it was called upon to destroy.

| **Rage Devil** | **Level 11 Brute** |
|---|---|
| Large immortal humanoid (devil) | XP 600 |
| **HP** 138; **Bloodied** 69 | **Initiative** +7 |
| **AC** 23, **Fortitude** 24, **Reflex** 21, **Will** 23 | **Perception** +9 |
| **Speed** 6 | Darkvision |
| **Resist** 20 fire | |
| **Traits** | |
| **Blood Rage** | |
| The rage devil deals 2d6 extra damage against bloodied enemies. | |
| **Standard Actions** | |
| **Disrupting Maul** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +16 vs. AC | |
| *Hit:* 2d12 + 5 damage, and the target loses all resistances until the end of its next turn. | |
| **Maul Storm** (weapon) ✦ **At-Will** | |
| *Attack:* Close burst 2 (enemies in burst); +16 vs. AC | |
| *Hit:* 1d12 + 5 damage, and the devil pushes the target 3 squares. If the target is bloodied after this attack, it falls prone. | |

## Rage Devils in Combat

A rage devil believes that the best offense is an unyielding rush of gnarled muscle and stone. It is unrelenting in combat, offering no quarter to foes. It delights in the spray of blood and relishes the feeling of crushing bone. Joyful, almost childlike in its love of violent play, the devil flies into a *blood rage* when the assault reaches a deadly endgame.

WAYNE ENGLAND

# DEVIL, SLIME

FRANZ VOHWINKEL

VAGUELY HUMANOID-SHAPED AMALGAMS of sludge and hate, slime devils act as spies and interrogators for archdevils. A slime devil can engulf a creature and pull thoughts from its mind, making these devils a valuable commodity among the denizens of the Nine Hells. They are the favored servants of Mammon, lord of the third hell, and many of the slithering devils inhabit Minauros's muck-covered caverns.

## LORE

**Arcana DC 25:** Slime devils are born of loathing, intrigue, and anger. They use their talents to rip thoughts from the minds of their enemies. Unlike most devils, slime devils are neither former angels nor immortal servants being punished for transgressions against their gods. They are the amalgamation of the corrupt souls of inquisitors who came to rest in the swamps of Minauros. Filled with arrogance and hate, these souls are pulled indelibly toward Minauros until coming to rest in the swamps. There, each soul's roiling mess of emotion seeps into the acidic black sludge, and from it, a slime devil emerges.

| **Slime Devil** | **Level 16 Lurker** |
|---|---|
| Medium immortal humanoid (devil, ooze) | XP 1,400 |
| **HP** 123; **Bloodied** 61 | **Initiative** +18 |
| **AC** 30, **Fortitude** 28, **Reflex** 29, **Will** 28 | **Perception** +13 |
| **Speed** 6, swim 6 | Darkvision |
| **Resist** 20 acid | |
| **TRAITS** | |
| **Mercurial Body** | |
| The slime devil ignores difficult terrain and does not provoke opportunity attacks by moving. | |
| **STANDARD ACTIONS** | |
| ⊕ **Caustic Slam** (acid) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +19 vs. Fortitude | |
| *Hit:* 3d8 + 11 acid damage. | |
| ⸸ **Diabolical Engulfment** (acid) ✦ **At-Will** | |
| *Attack:* Melee 1 (one Medium or smaller enemy); +19 vs. Reflex | |
| *Hit:* The devil grabs the target and shifts 1 square into the target's square. Until the grab ends, the target is dazed and takes ongoing 10 acid damage. While the devil has the target grabbed, attacks against the devil deal half damage to it and half damage to the grabbed creature. When the devil moves, it pulls the target with it. In addition, the target remains grabbed, and the devil does not provoke an opportunity attack from the target. | |
| ⸸ **Acidic Tendrils** (acid) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Melee 3 (one, two, or three creatures); +19 vs. Reflex | |
| *Hit:* 1d8 + 7 acid damage, and ongoing 10 acid damage (save ends). In addition, the devil pulls the target 2 squares. | |
| **MINOR ACTIONS** | |
| ⸸ **Scour the Mind** (psychic) ✦ **At-Will** (1/round) | |
| *Attack:* Melee 1 (one creature grabbed by the devil); +19 vs. Will | |
| *Hit:* The devil telepathically asks the target a question, and the target must answer the question truthfully or else take 3d8 + 11 psychic damage. | |
| **Skills** Bluff +12, Acrobatics +19, Stealth +19 | |
| **Str** 18 (+12) **Dex** 22 (+14) **Wis** 20 (+13) | |
| **Con** 21 (+13) **Int** 17 (+11) **Cha** 8 (+7) | |
| **Alignment** evil **Languages** Supernal, telepathy 5 | |

## ENCOUNTERS

Within Minauros, a slime devil typically travels with shock troops, legion devils, or similar soldiery. It conceals its psychic ability whenever possible. A slime devil prefers to work with withering devils (*Monster Manual 2*) because of their complementary abilities.

In the world, a slime devil is the favored tool of devil-worshiping regents who covet the creature's ability to pull out answers from enemies.

## SLIME DEVILS IN COMBAT

Favoring ambush over direct assault, a slime devil lurks near enemy leaders. It waits for its allies to distract foes and watches for an opening. At a ripe moment, the slime devil strikes, pulling a victim close. The creature engulfs its prey and scours its mind for valuable information.

# DEVIL, SWARM

Swarm devils are the agents and assassins of Baalzebul, the Lord of Flies. Starving groups of these devils, made of ravenous files swarming in humanoid-shaped masses, crowd tunnels and stagnate lakes in the seventh hell. Each colony awaits its master's call so it can feed on flesh and souls. Adventurers or solitary devils who have the misfortune of crossing into a swarm devil lair can fall victim to a colony's hunger.

## Lore

**Arcana DC 25:** A swarm devil forms when an angel caught lying to its master is torn asunder. The angel's soul coalesces in the Nine Hells and becomes trapped in a mass of flies that buzz around the form of Baalzebul. From there, a swarm devil moves to the stagnant pools in Maladomini, where it slowly starves but can never die. Over time, each swarm devil grows desperate and voracious as it awaits its master's orders. When it is sent on an errand of death, a swarm devil is a zealous agent of Baalzebul's will, because the mission offers the creature a rare opportunity to fly free and feed.

## Encounters

Swarm devils ally with any creature their master demands, commonly including pit fiends and war devils. Though they prefer living creatures of flesh and blood, swarm devils consider any creature not in service to Baalzebul as potential food.

Swarm devils are also sent to cults that worship Baalzebul. They guard powerful sites or exact revenge on enemies of the cult.

| **Alignment** evil | **Languages** Supernal, telepathy 10 | |

## Swarm Devils in Combat

A swarm devil is a buzzing throng of death that trails acid over its foes. It screams vile thoughts into the minds of enemies and slams its mass around the battlefield. A swarm devil is a canny combatant that works in concert with its allies. It watches for opportunities to aid its allies' attacks by distracting and inhibiting foes. The faster an enemy falls, the sooner the swarm can feed on the dead.

BEN WOOTTEN

# DEVIL, VIZIER

Rarely found in the Nine Hells, vizier devils are infernal emissaries to the world. They infiltrate governments, worm their ways into the halls of power, and become advisors to royalty, spreading their influence in places ranging from local tribes of orcs to elven enclaves and human baronies.

Virtually indistinguishable from tieflings, vizier devils serve as counsel to both the unwitting and the initiated. They guide their masters toward the will of the Nine Hells and usher the souls of those luminaries along a path of damnation.

## Lore

**Arcana or History DC 19:** A vizier devil's chief goal is to corrupt the souls of mortals and send them off to their final hellish destination. Braver, bolder, and more politically savvy than an imp, a vizier devil is a master at finding seemingly virtuous solutions that eventually twist to iniquity.

Historians assert that these amoral political masterminds orchestrated the fall of Bael Turath. Others believe that the humans who caused that empire to fall under the sway of the Nine Hells were rewarded by being transformed into vizier devils.

## Encounters

A vizier devil might ally with any creature. Its honeyed words are, at first, seen as a boon by the individual it professes to serve. The devil's true allegiance is to a power of the Nine Hells, often an evil mastermind, such as a corruption devil.

CHRIS SEAMAN

| **Vizier Devil** | **Level 7 Controller (Leader)** |

## Vizier Devils in Combat

A vizier devil avoids direct combat. It manipulates the battlefield to its allies' advantage, acting from a defensible position. The devil maintains its charade of being a simple spellcaster for as long as possible.

A vizier devil is a creature of contingencies. It always has a backup plan, an escape route, or a way to call up reinforcements. If the situation is dire, it goes on the offensive long enough to secure its own escape.

Accounts vary on how catastrophic dragons arose, but one point is certain: They seem to have appeared first during the Dawn War after the death of Io. The most common story recounts how a group of dragons, after seeing their deity so utterly destroyed by the power of the primordials, believed that the gods would lose the war. Rather than follow Tiamat or Bahamut, whom they regarded as weak and selfish, these dragons turned to the primordials for leadership. The primordials embraced the defectors with welcome arms, transforming them into manifestations of chaos and destruction.

During the war, these catastrophic dragons offered their services to their primordial benefactors, battling those who had once been their brethren. The metallics and the chromatics regarded the catastrophic dragons as abominations, and combined forces in an attempt to destroy them. Some catastrophic dragons survived, though, and when the primordials were defeated, they turned toward their own selfish purposes. Most retreated to the Elemental Chaos, where they crafted lairs from the churning forces; a few remained on other planes, occasionally emerging to wreak destruction on those planes' inhabitants.

Stories persist of the mightiest of the catastrophic dragons—beasts capable of leveling entire astral domains and whose power rivaled that of the greatest dragons. Ancient carvings found in ruins from the Dawn War show scaled beasts sinking continents beneath devouring waves and sundering astral domains with colossal shock waves. Whether these creatures are the product of an imaginative storyteller or actual combatants in the Dawn War, none can say. Even the gods refuse to answer such questions.

## Blizzard Dragon

After the death of Io, a number of disaffected dragons received guidance from Umboras, Lord of the Rimefire. This primordial attracted those dragons who had cold, cruel hearts, who enjoyed toying with their prey before destroying the unfortunate morsels. Umboras carried them away to the deepest reaches of the Elemental Chaos, where neither sun nor volcano could heat the air. The ice coated their bodies, entombing them in hoarfrost. Umboras took his time, working terrible magic to transform the creatures in his image. After a year and a day, the dragons emerged from their frosty tombs, transformed into blizzard dragons.

### Lore

**Arcana DC 25:** Near the end of the Dawn War, the Raven Queen claimed the winter domain from the slain goddess Khala. Umboras had been a reluctant ally of Khala in her attempt to seize the world for herself. When the Raven Queen claimed the winter domain, the Lord of the Rimefire was infuriated. He tolerated Khala's stewardship of the domain, since her machinations aligned with his goals. But the idea of a god who had once been a mortal gaining command over winter was more than he could bear.

Umboras approached some of the dragons discouraged by the death of Io. He saw them as a potential tool in destroying the Raven Queen. He created blizzard dragons to deliver his ice archons and frost titans to the goddess's doorstep. In a bold move, he personally led the assault against Letherna. His audacity proved his undoing. The Raven Queen pretended to flee before his forces, luring them to Pandemonium. There, in the labyrinthine corridors of the realm, she managed to separate Umboras from his host of dragons and titans. She cleverly trapped Umboras in one of that domain's empty vaults, where he still remains.

With their master shackled, the blizzard dragons spread across the cosmos. Some remained in Pandemonium, while other returned to the Elemental Chaos. A few have found their way into the coldest parts of the world, occasionally venturing forth to wreak havoc upon civilization.

JOHN STANKO

## Encounters

In the dark, cold places of the cosmos, blizzard dragons band together with other creatures of cold, including frost giants, frost titans, ice archons, and arctic beasts such as winter wolves, winterclaw owlbears, and rimefire griffons. Blizzard dragons mold their environment to their will, whether sculpting the snow and glaciers on a mountainside or filling an underground chamber with ice. The dragons also find allies among those with destructive and tyrannical ambitions. Should their goals align, a blizzard dragon might take up with a lich and its undead horde or with a winter fey host in the Feywild.

Blizzard dragons do not hesitate to work alongside other blizzard dragons or even other kinds of catastrophic dragons. These dragons sometimes band together under the leadership of a dragon or a humanoid to attempt to free primordials, to unleash more powerful dragons into the world, or to exact vengeance upon the gods, particularly the Raven Queen. Not surprisingly, blizzard dragons are scarcest in the Shadowfell.

## Blizzard Dragons in Combat

Blizzard dragons are fast but clumsy fliers, so in combat, they prefer to land rather than fight from the air. As soon as a blizzard dragon approaches, the air cools and the ground ices over.

Blizzard dragons take advantage of their surroundings. A blizzard dragon might try to trigger an avalanche or cause icicles to come cascading down upon foes. Blizzard dragons harbor an ancient animosity toward agents of the Raven Queen, so anyone bearing her symbol or invoking her name attracts these dragons' ire.

**Ancient Blizzard Dragon** **Level 22 Elite Controller**
Huge elemental magical beast (cold, dragon) XP 8,300

**HP** 422; **Bloodied** 211 **Initiative** +20
**AC** 36, **Fortitude** 34, **Reflex** 35, **Will** 33 **Perception** +18
**Speed** 10 (ice walk), fly 10 (clumsy) Darkvision

# Earthquake Dragon

When the ground tremors start, most mortals breathe whispered prayers to the gods or make offerings to the primal spirits to quiet the earth. When people begin disappearing on the fringes of a settlement, the remaining inhabitants begin to suspect a more sinister cause. The arrival of an earthquake dragon in a region is heralded by minor tremors. In subsequent days, the shaking grows increasingly violent. Soon buildings are crumbling and people are disappearing into chasms that spontaneously appear in roads and fields.

Earthquake dragons are menaces to civilization. They move from settlement to settlement, hunting mortals as much for sport as for food. An earthquake dragon might leave a town in ruins for no other reason than the fact that it can. Once it has ruined a city and chased away or eaten the inhabitants, an earthquake dragon might dwell in the ruins for months, digesting its food and basking in the destruction it has wrought. Then, when it tires of this sedentary activity, it moves on to the next region to repeat the process.

## Lore

**Arcana DC 25:** When Erek-Hus, the King of Terror, slew Io, many dragons felt the touch of fear as they never had before. In reaction, some searched for protection in the form of a patron who could defend them. These dragons found an ally in the primordial Balcoth, the Groaning King. This primordial of impenetrable stone welcomed them . . . and fulfilled his promise to guard them by swallowing them up in his great maw. Within the burning furnace of his stomach, the dragons became petrified. Some Balcoth vomited up to serve him, using the powers he granted them to swim through the earth and tear it asunder; others escaped years later, when Balcoth was decapitated in a battle against the gods.

## Encounters

Earthquake dragons are temperamental creatures that enjoy hunting on their own, so they rarely tolerate allies for long. However, an earthquake dragon might form a loose alliance with earth archons, elementals, stone giants and titans, earth giants and titans, and other relatively inedible creatures. A group of humanoids that manages to contact an earthquake dragon might persuade it to serve them if they offer it an opportunity for devastation. Galeb duhrs,

CHIPPY

genasi, and goliaths seek to ally with earthquake dragons, conspiring toward various ends—often the destruction of a neighboring city or tribe. Earthquake dragons grow restless quickly, though, and if a dragon thinks an ally has outlived its usefulness, the dragon quickly turns on that creature. Earthquake dragons do have a weakness for gems, though, so their continued cooperation can sometimes be bought with sufficient wealth.

| **Saving Throws** +2; **Action Points** 1 | |

**Traits**

**Quaking Earth ✦ Aura 1**
When any enemy within the aura makes an attack that does not include the dragon as a target, that enemy falls prone and takes 15 damage.

**Threatening Reach**
The dragon can make opportunity attacks using *claw* against enemies within 3 squares of it.

**Standard Actions**

**Bite ✦ At-Will**
*Attack:* Melee 2 (one creature); +29 vs. AC
*Hit:* 4d8 + 14 damage.

**Claw ✦ At-Will**
*Attack:* Melee 3 (one creature); +31 vs. AC
*Hit:* 4d6 + 10 damage.

**Double Attack ✦ At-Will**
*Effect:* The dragon uses *bite* and *claw* or uses *claw* twice.

**Earthen Maw ✦ Recharge** ⚄ ⁞⁞
*Attack:* Melee 2 (one creature); +29 vs. Reflex
*Hit:* 4d10 + 11 damage, and the target is restrained (save ends).
*First Failed Saving Throw:* The target is instead petrified (save ends).

**Minor Actions**

**Rising Tremors ✦ Recharge** at the start of any turn when *quaking earth* is aura 1
*Effect:* The *quaking earth* expands to aura 3. At the start of the dragon's next turn, the *quaking earth* expands to aura 5. At the start of its following turn, the dragon makes the following attack.
*Attack (No Action):* Close burst 5 (enemies in burst); +27 vs. Reflex
*Hit:* 4d8 + 14 damage, and the target falls prone and cannot stand up (save ends).
*Effect*: The *quaking earth* aura reverts to its original state and size (aura 1).

**Triggered Actions**

**Sudden Quake ✦ At-Will**
*Trigger:* The dragon is pulled, pushed, slid, or knocked prone.
*Effect (Free Action)*: Each enemy in the dragon's aura falls prone.

## Earthquake Dragons in Combat

When an earthquake dragon is looking for quarry, it suppresses its *quaking earth* aura. Using its tremorsense, it locates a singular creature to pursue. Then the dragon savors the hunt. An earthquake dragon prefers to burrow instead of fly. Once in combat, it emerges from the ground and unleashes the full extent of its powers. The dragon typically focuses on any enemies that look as though they're fleeing. An earthquake dragon might toy with such a creature, following it slowly enough to keep from overtaking it until the dragon tires of the chase. If it faces defeat, an earthquake dragon might retreat into the ground, where it can use its tremorsense to monitor the foes' departure.

# Volcanic Dragon

Volcanic dragons are foul-tempered, cruel, hateful, and ambitious. They are as destructive as earthquake dragons, but they veil their lust for devastation with the pursuit of a more lofty goal, such as rulership over a kingdom in the Elemental Chaos or revenge for a petty slight half a century in the past. In the end, these goals are all justifications. The volcanic dragons' true credo is: All things burn, and nothing burns more sweetly than flesh.

## Lore

**Arcana DC 25:** When Io fell, one group of dragons present became consumed with a burning wrath. His demise clearly proved to them that Io was weak. And, since they had been made in Io's image, the dragons considered themselves to be weak as well. This idea filled the dragons with fury, and they turned to the primordials for the raw power they wanted. Vezzuvu, the Burning Mountain, answered their demands. Vezzuvu told the dragons that if they bathed in the white-hot lava of his volcanic domain, they would be cleansed of their weak flesh and gain more powerful bodies. The dragons heeded Vezzuvu's words and submerged themselves in the lava. Many died during the process, but those that survived arose from the pools of lava with new bodies.

At first, the new volcanic dragons were satisfied, but many soon came to think that they had not been given as great a gift as they were promised, or as much as they deserved. They spent their wrath on both the gods and Vezzuvu for a time, allying with both and betraying both. Today, neither god nor primordial accepts a volcanic dragon as anything more than a mercenary and a weapon, a tool to be used with extreme caution.

## Encounters

The perceived betrayal associated with their creation has left a legacy of mistrust among volcanic dragons. Volcanic dragons prefer to ally with elemental creatures, those that share their hatred of the world and its denizens. Volcanic dragons frequently ally with demons, fire giants and fire titans, efreets, fire archons, and salamanders, though they are not opposed to allying with nonfire creatures. A volcanic dragon might take up with nonelemental creatures if they can offer it power in exchange for service. Volcanic dragons have a one-track mind, so anyone who can make a compelling offer—and survive long enough to present it—can usually persuade a volcanic dragon to join an alliance for a limited time. Tracking down a volcanic dragon might require venturing into the heart of a volcano or delving into the burning depths of the Elemental Chaos.

CHIPPY

**Volcanic Dragon Wyrmling** **Level 5 Brute**
Medium elemental magical beast (fire, dragon) XP 200

**HP** 77; **Bloodied** 38 **Initiative** +5
**AC** 17, **Fortitude** 18, **Reflex** 16, **Will** 17 **Perception** +6
**Speed** 6, fly 6 (clumsy) Darkvision

**Traits**

☼ **Noxious Fumes** (poison) ✦ **Aura** 1
Any enemy that ends its turn within the aura takes 3 poison damage.

**Standard Actions**

⨭ **Bite** (fire) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +9 vs. AC
*Hit:* 1d10 damage, and ongoing 5 fire damage (save ends).

⨭ **Claw** ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 1d8 damage, and the target loses all fire resistance until the end of the dragon's next turn.

⨭ **Wyrmling Fury** ✦ **At-Will**
*Requirement:* The dragon must be bloodied.
*Effect:* The wyrmling uses *bite* and *claw*.

**Triggered Actions**

**Sudden Flare** (fire) ✦ **At-Will**
*Trigger:* The dragon is hit by a fire attack.
*Effect (Free Action):* Each enemy in the dragon's aura takes 5 fire damage.

## Volcanic Dragons in Combat

Volcanic dragons are an utterly destructive force on the battlefield. Although they are fast fliers, they prefer to swoop in and fight on a solid surface where they can take advantage of their powers. A volcanic dragon prefers to focus its attention on any foes that are dragons or draconic humanoids. Otherwise, it simply sows as much chaos and destruction as possible. The dragon uses its powers to make the battlefield a hellish landscape, forcing enemies to maneuver around fissures and volcanoes. Volcanic dragons are reluctant to leave combat if doing so means showing weakness. A volcanic dragon talks to its enemies only when they can offer it the chance to cause much greater havoc and consume many more lives.

# DREAD WARRIOR

Unholy rituals that call forth undead hulks usually raise shambling, mindless creatures. Dread warriors, on the other hand, rise to unlife possessed of enough martial skill to serve as formidable guardians. Each dread warrior is created with an unbreakable connection to its master that makes it utterly loyal.

Every dread warrior is bonded to a master or an item defined by the Dungeon Master. Some of a dread warrior's powers and traits relate to its master.

## Lore

**Religion DC 17:** Although dread warriors are faithful, they are notorious for their inability to follow orders more complex than "Guard" or "Attack." They are incapable of scheming or turning against their master. They need neither sleep nor air. If a dread warrior's master is slain, the warrior might collapse into an inanimate heap, or it might go berserk, attacking whoever dealt the killing blow to its master. Some masters bond the creatures to magic items so that the warriors continue their watch even after a caster's death.

## Encounters

In some forgotten, dusty tombs, dread warriors might keep watch over the slumbering form of their lich master or a forgotten shrine to a dark god. Most dread warriors are found in the service of powerful spellcasters and priests. Legend holds that the priests of Bane were the first to craft these warriors, creating them from the corpses of potent enemies.

## Dread Protector

Stories tell of powerful necromancers creating a dozen dread protectors to scatter about their bedrooms and workstations. There's a comfort, and an unfortunate stench, in the presence of these vigilant, sleepless guardians.

| **Dread Protector** | **Level 3 Soldier** |
|---|---|
| Medium natural animate (undead) | XP 150 |
| **HP** 47; **Bloodied** 23 | **Initiative** +3 |
| **AC** 19, **Fortitude** 16, **Reflex** 13, **Will** 14 | **Perception** +1 |
| **Speed** 5 | Low-light vision |
| **Traits** | |
| ☼ **Shield of Undeath** ✦ **Aura** 1 | |
| While the dread protector's master is within the protector's aura, the master takes half damage from melee and ranged attacks. | |
| **Eyes of Undeath** | |
| The dread protector's master can see or hear anything the protector can see or hear. The master can also speak through the protector. | |
| **Standard Actions** | |
| ⊕ **Greataxe** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +8 vs. AC | |
| *Hit:* 1d12 + 4 damage, and the target is marked until the end of the protector's next turn. | |
| **Move Actions** | |
| **Protector's Call** (teleportation) ✦ **At-Will** | |
| *Effect:* The protector teleports its speed to a square adjacent to its master. | |
| **Str** 16 (+4) **Dex** 10 (+1) **Wis** 11 (+1) | |

| **Alignment** unaligned **Languages** understands Common | |
| **Equipment** scale armor, greataxe | |

### Dread Protectors in Combat

A dread protector's dull eyes reveal its near-mindless state. It cares nothing for its body or its undead allies. A protector lurches into attacks aimed at its master, causing the blows to slam into its dead flesh.

## Dread Marauder

Clad in moldering leathers and carrying a pair of short swords, a dread marauder serves as an undead scout and skirmisher. Its master can see through its eyes, allowing him or her to remain in the safety of a tower while the marauders hunt down intruders.

### Dread Marauders in Combat

Adventurers have mistaken a dread marauder's seemingly suicidal tendencies for a design flaw. In truth, a cunning necromancer uses dread marauders to gather intelligence on foes.

MATIAS TAPIA

| **Dread Marauder** | **Level 5 Skirmisher** |
|---|---|
| Medium natural animate (undead) | XP 200 |
| **HP** 63; **Bloodied** 31 | **Initiative** +7 |
| **AC** 19, **Fortitude** 17, **Reflex** 17, **Will** 16 | **Perception** +9 |
| **Speed** 6 | Low-light vision |

**Traits**

**Combat Advantage**
The dread marauder deals 1d6 extra damage against any creature granting combat advantage to it.

**In the Master's Defense**
The dread marauder has combat advantage against each target adjacent to its master.

**Eyes of Undeath**
The dread marauder's master can see or hear anything the marauder can see or hear. The master can also speak through the marauder.

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +10 vs. AC
*Hit:* 2d6 + 6 damage.

**Longbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 20/40 (one creature); +10 vs. AC
*Hit:* 1d10 + 4 damage.

**Skirmish Strike** ✦ **At-Will**
*Effect:* The marauder shifts 3 squares and uses *short sword* or *longbow*.

| | | |
|---|---|---|
| **Str** 16 (+5) | **Dex** 16 (+5) | **Wis** 14 (+4) |
| **Con** 15 (+4) | **Int** 4 (-1) | **Cha** 9 (+1) |

**Alignment** unaligned **Languages** understands Common
**Equipment** leather armor, short sword, longbow, 20 arrows

# Dread Archer

A necromancer creates dread archers to shoot anyone who attempts to approach the spellcaster or his or her fortification.

| **Dread Archer** | **Level 6 Artillery** |
|---|---|
| Medium natural animate (undead) | XP 250 |
| **HP** 57; **Bloodied** 28 | **Initiative** +6 |
| **AC** 18, **Fortitude** 18, **Reflex** 18, **Will** 17 | **Perception** +5 |
| **Speed** 6 | Low-light vision |

**Traits**

**Eyes of Undeath**
The dread archer's master can see or hear anything the archer can see or hear. The master can also speak through the archer.

**Channel of Undeath**
While the dread archer's master has line of sight to the archer, the master can make implement attacks as if it occupied the archer's square.

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 1d6 + 7 damage.

**Longbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 20/40 (one creature); +13 vs. AC
*Hit:* 1d10 + 3 damage.

**Arcing Volley** (weapon) ✦ **Encounter**
*Attack:* Area burst 1 within 10 (enemies in burst); +13 vs. AC
*Hit:* 1d10 + 3 damage.

**Triggered Actions**

**Sustained Attack** (weapon) ✦ **At-Will**
*Trigger:* An enemy is hit by the archer's master.
*Attack (Immediate Reaction):* Ranged 10 (triggering enemy); +13 vs. AC
*Hit:* 1d10 + 3 damage.

| | | |
|---|---|---|
| **Str** 16 (+6) | **Dex** 16 (+6) | **Wis** 14 (+5) |
| **Con** 15 (+5) | **Int** 4 (+0) | **Cha** 9 (+2) |

**Alignment** unaligned **Languages** understands Common
**Equipment** short sword, longbow, 40 arrows

## Dread Archers in Combat

A dread archer serves a simple purpose. It whittles away at an enemy's force with its arrows. The archer also has a second purpose. The bond between archer and master works as a conduit for powers, enabling a master to hurl spells through the archer.

# Dread Guardian

Safe behind a dread guardian's heavy shield, a necromancer or a priest of a dark god can hurl powers without fear of interference.

| **Dread Guardian** | **Level 7 Soldier** |
|---|---|
| Medium natural animate (undead) | XP 300 |
| **HP** 79; **Bloodied** 39 | **Initiative** +6 |
| **AC** 23, **Fortitude** 19, **Reflex** 17, **Will** 18 | **Perception** +5 |
| **Speed** 5 | Low-light vision |

**Traits**

**Shield of Undeath** ✦ **Aura** 1
While the dread guardian's master is within the guardian's aura, the master takes half damage from all attacks.

**Eyes of Undeath**
The dread guardian's master can see or hear anything the guardian can see or hear. The master can also speak through the guardian.

**Standard Actions**

**Longsword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +12 vs. AC
*Hit:* 2d8 + 6 damage.
*Effect:* The target is marked until the end of the guardian's next turn.

**Longbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 20/40 (one creature); +12 vs. AC
*Hit:* 1d10 + 6 damage.
*Effect:* The target is marked until the end of the guardian's next turn.

**Triggered Actions**

**Iron Rebuke** (weapon) ✦ **At-Will**
*Trigger:* An enemy marked by the guardian attacks the guardian's master.
*Attack (Opportunity Action):* Melee 1 (triggering enemy); +14 vs. AC
*Hit:* 2d8 + 6 damage.

| | | |
|---|---|---|
| **Str** 16 (+6) | **Dex** 12 (+4) | **Wis** 14 (+5) |
| **Con** 15 (+5) | **Int** 4 (+0) | **Cha** 9 (+2) |

**Alignment** unaligned **Languages** understands Common
**Equipment** scale armor, heavy shield, longsword, longbow, 20 arrows

## Dread Guardians in Combat

A guardian appears slack and vacant-eyed, even in the midst of battle. When its master is threatened, however, its appearance undergoes a startling transformation. It growls like a beast and moves with the agility and power of a leaping panther.

# DROW

Lurking in the darkest reaches of the Demonweb are the most devoted followers of Lolth, the drow. Abyssal drow collect into factions, each establishing its own domain within the Demonweb. Rather than vowing allegiance to a particular house in a city, these drow support powerful personalities, bold warriors, high priestesses, and the like. Each faction secures its holding with loyal drow, demons such as nycademons, ultrodemons, mariliths, and draegloths, and demonic spiders, yochlols, and other fiendish terrors.

## Lore

**Religion DC 23:** The drow are a cursed people, a deviant and evil race firmly in Lolth's grip. Exiled from the Feywild for rising up against their eladrin kin, the drow nurse ancient grudges. They wallow in lies and cruelty, plotting vengeance against their ancestral enemies. Few drow escape their treacherous communities, instead finding an early death on the end of a poisoned blade or strapped to an altar of Lolth. A fraction of drow attain lasting power through an invitation to join the Spider Queen in the Demonweb.

## Encounters

Unlike dark elves in the world, abyssal drow are more likely to form stable alliances. They are no less treacherous, but the stakes in the Abyss are higher. If a drow joins the ranks of an exarch such as Eclavdra, he or she must set aside petty disputes to help seize victories and attain greater rank within the Abyss.

The Spider Queen's exarchs work to spread the goddess's influence across the planes. While in the Abyss, Eclavdra keeps the company of favored drow and Ladies of Spiders. Outside the Abyss, these exarchs might insinuate themselves into the societies of other races, serving as envoys to giants in the Shadowfell, treating with devils in the Nine Hells, or acting as ambassadors to efreets in the City of Brass.

Drow abominations lurk in the gloom of the Abyss, hunting for intruders and serving only those mighty enough to bend the creatures' wills. Draegloths and driders are usually in the direct service of Lolth, working alongside mariliths, yochlols, and glabrezus.

## Drow Zealot

The lowliest of abyssal drow are the zealots, drow warriors warped by magic to manifest a spider curse. The ranks of zealots are filled by drow who failed to serve with the proper mix of deference, gratitude, and obedience.

| **Drow Zealot** | **Level 23 Brute** |
|---|---|

### Drow Zealots in Combat

Combat is a drow zealot's chance to prove his or her devotion to Lolth, so these warriors hurl themselves into the thick of battle. Zealots harbor a demonic spider infestation. These spiders scuttle out from the zealots' orifices and crawl onto their host's opponents, infecting them with poison. As the zealot's injuries mount, the spiders become agitated. When a zealot falls, the spiders erupt from the corpse, filling the area with toxic webbing.

# Draegloth Abomination

Abyssal dark elves have a connection with demons. Most drow are content to summon and bind demons, but a few deranged priestesses call fiends for foul rituals that mingle demonic blood with that of driders. The horrendous products of these unions are both drider and draegloth, and they are among the most feared creatures in the Abyss.

| **Draegloth Abomination** | **Level 24 Lurker** |
|---|---|
| Huge elemental magical beast (demon) | XP 6,050 |
| **HP** 175; **Bloodied** 87 | **Initiative** +23 |
| **AC** 38, **Fortitude** 37, **Reflex** 35, **Will** 33 | **Perception** +20 |
| **Speed** 8, climb 8 (spider climb) | Darkvision, tremorsense 10 |
| **Standard Actions** | |
| **Claw ✦ At-Will** | |
| *Attack:* Melee 3 (one creature); +29 vs. AC | |
| *Hit:* 2d10 + 10 damage, or 4d10 + 10 against dazed creatures. | |
| **Slashing Claws ✦ At-Will** | |
| *Effect:* The abomination uses *claw* against two different targets. | |
| **Tethering Web** (poison) **✦ At-Will** | |
| *Attack:* Ranged 5 (one creature, or two creatures while the abomination is bloodied); +27 vs. Reflex | |
| *Hit:* 1d10 + 10 poison damage, and the target is tethered (save ends). While the target is tethered, it is dazed, and the abomination can pull the target to a square adjacent to it during the abomination's turn as a free action. | |
| **Minor Actions** | |
| **Maddening Darkness** (psychic, zone) **✦ Encounter** | |
| *Attack:* Close burst 2 (creatures in burst); +27 vs. Will | |
| *Hit:* The target is slowed and dazed until the end of the abomination's next turn. | |
| *Effect:* The burst creates a zone that lasts until the end of the abomination's next turn. The zone blocks line of sight for all creatures except the abomination. Any creature other than the abomination is blinded while within the zone. | |
| **Triggered Actions** | |
| **Variable Resistance ✦ 3/Encounter** | |
| *Trigger:* The abomination takes acid, cold, fire, lightning, or thunder damage. | |
| *Effect (Free Action):* The abomination gains resist 20 to the triggering damage type until the end of the encounter or until it uses *variable resistance* again. | |
| **Dark Leap** (teleportation) **✦ Recharge** when first bloodied | |
| *Trigger:* An enemy damages the abomination. | |
| *Effect (Immediate Reaction): Maddening darkness* recharges, and the abomination uses it. The abomination then teleports 8 squares. | |
| **Skills** Religion +23, Stealth +24 | |
| **Str** 27 (+20) **Dex** 24 (+19) **Wis** 17 (+15) | |
| **Con** 25 (+19) **Int** 22 (+18) **Cha** 19 (+16) | |
| **Alignment** chaotic evil **Languages** Abyssal, Elven | |

## Draegloth Abominations in Combat

With its long, wicked claws, spiderlike legs, and gnashing teeth, the heritage of a draegloth abomination is apparent. An abomination combines drider cunning with demonic ferocity, making it a patient hunter and a brutal killer. A draegloth stalks its prey from the shadows until the opportune moment arrives to leap out and coat its victim in webbing. The monster then yanks its prisoner to within reach of its eviscerating claws.

BEN WOOTTEN

## Draegloth Abomination Lore

**Arcana DC 29:** The practice of making draegloths is not exclusive to drow. Driders also perform the profane creation rituals. A drider-born draegloth is an impressive creature, representing the height of Lolth's favor and the most perverse of creations. These fiends cannot be controlled, however, and they usually bring ruin to their creators. For that reason, most draegloth abominations are gifted to Lolth, so that the creatures threaten only those who dare venture into the Demonweb Pits.

# Drow Shadowblade

Cloaked in darkness, a shadowblade steals through the dark corridors of the Demonweb, fulfilling some sinister charge from the powers there. Few drow dare to follow the path to becoming a shadowblade, but those who have the audacity and the skill are rewarded with Lolth's personal blessing. Lolth encourages strife and treachery among her people, so when a drow assassin succeeds in killing the ruling high priestess of a drow city, she brings that individual to her court. The Spider Queen rewards her most cunning, treacherous, and deadly assassins with the power of the shadowblade.

| Drow Shadowblade | Level 24 Lurker |
|---|---|
| Medium fey humanoid | XP 6,050 |
| **HP** 171; **Bloodied** 85 | **Initiative** +24 |
| **AC** 39, **Fortitude** 34, **Reflex** 37, **Will** 36 | **Perception** +24 |
| **Speed** 7, phasing | Darkvision |

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +29 vs. AC
*Hit:* 2d6 + 15 damage.

**Shadow Strike** (necrotic, weapon, zone) ✦ **At-Will**
*Attack:* Melee 1 (one creature flanked by the shadowblade and its animated shadow); +29 vs. AC
*Hit:* 2d6 + 15 damage plus 10 necrotic damage, and the animated shadow ends and creates a zone in a close burst 2 centered on its square and including its square. The zone lasts until the end of the shadowblade's next turn. The zone blocks line of sight for all creatures except the shadowblade. Any creature other than the shadowblade is blinded while within the zone.

**Animated Shadow** ✦ **Recharge** when the shadowblade's *animated shadow* ends
*Effect:* The shadowblade creates an animated shadow in an unoccupied square within 10 squares of it. The shadow lasts until the end of the shadowblade's next turn. The shadow counts as an ally for the purpose of flanking with the shadowblade. When the shadowblade moves on its turn, it slides the shadow an equal number of squares.

**Minor Actions**

**Soulrot Venom** (necrotic, poison) ✦ **Recharge** when first bloodied
*Effect:* The next enemy the shadowblade hits before the end of the encounter is weakened (save ends).
*First Failed Saving Throw:* The enemy takes ongoing 15 necrotic and poison damage (save ends).
*Second Failed Saving Throw:* The enemy cannot benefit from immunities or resistances (save ends).

**Triggered Actions**

**Persistent Blade** ✦ **Recharge** ⚄ ⚄ ⚅
*Trigger:* The shadowblade misses an enemy with a melee attack.
*Effect (Free Action):* The shadowblade uses *short sword* against a different enemy.

**Skills** Acrobatics +25, Stealth +25, Thievery +25

| | | |
|---|---|---|
| **Str** 16 (+15) | **Dex** 27 (+20) | **Wis** 24 (+19) |
| **Con** 21 (+17) | **Int** 22 (+18) | **Cha** 19 (+16) |

**Alignment** chaotic evil **Languages** Abyssal, Common, Elven
**Equipment** leather armor, short sword

## Drow Shadowblades in Combat

A drow shadowblade stays out of view, watching and waiting for the perfect time to strike. While hidden, it might poison its blade and bring forth an animated shadow to aid in its next assassination attempt. When the time is right, the shadowblade darts into combat with its shadow and strikes down an isolated opponent with speed and precision. A shadowblade aims to eliminate either the weakest enemy, reducing the foe's numbers, or the strongest enemy, hoping that its allies can handle the others.

# Drow Archmage

The most powerful and perverse drow mages are welcomed into the Abyss, where they can serve Lolth directly. There, they warp their flesh and souls toward Lolth's depraved ends.

| Drow Archmage | Level 25 Artillery |
|---|---|
| Medium fey humanoid | XP 7,000 |
| **HP** 178; **Bloodied** 89 | **Initiative** +19 |
| **AC** 37, **Fortitude** 36, **Reflex** 37, **Will** 39 | **Perception** +14 |
| **Speed** 7 | Darkvision |

**Standard Actions**

**Dagger** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +30 vs. AC
*Hit:* 2d4 + 15 damage, and the target takes a -4 penalty to attack rolls until the end of the archmage's next turn.

**Abyssal Bolt** (acid, poison) ✦ **At-Will**
*Attack:* Ranged 20 (one creature); +30 vs. Reflex
*Hit:* 4d8 + 15 acid and poison damage.

**Cruel Banishing** (teleportation) ✦ **Encounter**
*Attack:* Melee 1 (one creature); +30 vs. Fortitude
*Hit:* The archmage teleports the target 7 squares, and the target is dazed (save ends).

**Demonic Grasp** (poison) ✦ **Encounter**
*Attack:* Ranged 10 (one creature); +30 vs. Fortitude
*Hit:* The target is immobilized and suspended 1 square up (save ends both). While this effect lasts, whenever the target or one of its allies deals damage to a demon, drow, or spider, the target takes 10 poison damage.

**Minor Actions**

**Unwholesome Sacrifice** (necrotic) ✦ **Recharge** ⚄ ⚅
*Effect:* The archmage deals 20 damage to an ally adjacent to it. In addition, the archmage recharges one encounter power or deals 10 extra damage on its next ranged attack before the end of its next turn.

**Darkfire** ✦ **Encounter**
*Attack:* Ranged 10 (one creature); +30 vs. Reflex
*Hit:* The target grants combat advantage and cannot benefit from invisibility or concealment until the end of the archmage's next turn.

**Skills** Arcana +23

| | | |
|---|---|---|
| **Str** 13 (+13) | **Dex** 25 (+19) | **Wis** 14 (+14) |
| **Con** 22 (+18) | **Int** 22 (+18) | **Cha** 28 (+21) |

**Alignment** chaotic evil **Languages** Abyssal, Common, Elven
**Equipment** dagger

## Drow Archmages in Combat

A drow archmage commands abyssal power through force of personality. Despite their power, drow archmages fear death and the torment that awaits their souls. Thus, an archmage will abandon his or her thralls if a battle goes poorly.

# Drow Exalted Consort

Male drow have few ways to distinguish themselves in the matriarchal culture of their people. Most are consigned to ignoble ends, used and then discarded by the priestesses. The few male drow who rise above their station as slaves or artisans might serve as warriors, or, if blessed, gain places as consorts.

Exalted consorts are among the greatest drow warriors, possessing a blend of combat prowess and beauty. Lolth gathers such warriors in the Demonweb, where she infuses them with divine power to make them worthy to serve her and her mightiest priestesses.

| Drow Exalted Consort | Level 25 Skirmisher |
|---|---|
| Medium fey humanoid | XP 7,000 |
| **HP** 224; **Bloodied** 112 | **Initiative** +23 |
| **AC** 39, **Fortitude** 35, **Reflex** 39, **Will** 37 | **Perception** +17 |
| **Speed** 6 | Darkvision |

**Standard Actions**

**Longsword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +30 vs. AC
*Hit:* 2d8 + 9 damage.

**Warding Blades** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +30 vs. AC
*Hit:* 4d8 + 9 damage, and the consort gains a +6 bonus to AC against opportunity attacks until the start of its next turn.

**Blurring Steel** ✦ **Recharge** when the consort moves at least 3 squares during its turn.
*Effect:* The consort uses *longsword* three times. Two of these attacks can target the same creature.

**Minor Actions**

**Darkfire Revelation** (fire) ✦ **Encounter**
*Attack:* Close burst 1 (enemies in burst); +28 vs. Reflex
*Hit:* 2d8 + 9 fire damage.
*Effect:* The target grants combat advantage and cannot benefit from invisibility or concealment (save ends both).

**Triggered Actions**

**Lolth's Favor** (teleportation) ✦ **Encounter**
*Trigger:* The consort becomes bloodied.
*Effect (Immediate Reaction):* The consort teleports 7 squares, and each enemy adjacent to the consort after the teleport grants combat advantage until the end of the encounter.

| | | |
|---|---|---|
| **Str** 21 (+17) | **Dex** 29 (+21) | **Wis** 20 (+17) |
| **Con** 16 (+15) | **Int** 14 (+14) | **Cha** 25 (+19) |

**Alignment** chaotic evil **Languages** Abyssal, Common, Elven
**Equipment** 2 longswords

## Drow Exalted Consorts in Combat

In battle, drow exalted consorts press the attack against enemies, maneuvering to interfere with foes who attempt to affront their mistresses. Exalted consorts chase down any opponents who bypass them, using *warding blades* to keep up their defenses. Consorts are selfless combatants, throwing themselves willingly upon enemy weapons to delay or hinder foes.

# Drow Lady of Spiders

The greatest of Lolth's priestesses hope to attain the title of Lady of Spiders. Only sixty-six of these fearsome priestesses exist. The only way for an ambitious priestess to attain the title is to slay one of those sixty-six in order to clear room for herself.

## Ladies of Spiders in Combat

A Lady of Spiders commands a force of demons, drow, or spiders. She shrieks orders to her servants to engage the enemy, while she provides support from the rear. From cocoons of shadow, she brings forth demonic spiders to thwart her foes. In battle, opponents constantly hear her sinister whispers compelling them to obey her commands or suffer excruciating mental pain.

| Drow Lady of Spiders | Level 27 Elite Controller (Leader) |
|---|---|
| Medium fey humanoid | XP 22,000 |
| **HP** 494; **Bloodied** 247 | **Initiative** +21 |
| **AC** 41, **Fortitude** 37, **Reflex** 40, **Will** 42 | **Perception** +20 |
| **Speed** 7 | Darkvision |
| **Saving Throws** +2; **Action Points** 1 | |

**Traits**

**Lolth's Blessings** (healing) ✦ **Aura** 2
Any bloodied demon, drow, or spider ally that starts its turn within the aura regains 10 hit points.

**Sensitive to Light**
Whenever the Lady of Spiders takes radiant damage, her *Lolth's blessings* aura doesn't function until the end of her next turn.

**Standard Actions**

**Scourge** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +32 vs. AC
*Hit:* 3d8 + 22 damage, and the Lady of Spiders slides the target 2 squares.

**Conjure Venom** (poison) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +30 vs. Fortitude
*Hit:* 2d10 + 15 poison damage.

**Cocooning Webs** (poison) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +30 vs. Reflex
*Hit:* The target is restrained and takes ongoing 25 poison damage (save ends both).
*Aftereffect:* The target is slowed (save ends).

**Irrefutable Command** (charm) ✦ **Recharge** ⚄ ⚅
*Attack:* Close burst 3 (one or two creatures in burst); +32 vs. Will
*Hit:* The target chooses either to take 50 psychic damage or to charge a creature that the Lady of Spiders designates.

**Bring Forth the Widows** (poison) ✦ **Recharge** when the created spider drops to 0 hit points
*Effect:* The Lady of Spiders creates a Medium demonic spider in an unoccupied square within 10 squares of her. The spider occupies 1 square and lasts until the end of the encounter or until it drops to 0 hit points. The spider has 100 hit points and uses the Lady of Spiders' defenses. The spider has speed 8 and climb 8 (spider climb), and it can move its speed when the Lady of Spiders takes a move action. The spider must remain on a solid surface.

**Minor Actions**

**Widow Attack** ✦ **At-Will** (1/round)
*Effect:* The demonic spider created by the Lady of Spiders makes the following attack.
*Attack:* Melee 1 (one creature adjacent to the spider); +32 vs. AC
*Hit:* 2d8 + 9 damage, and ongoing 10 poison damage (save ends).

**Triggered Actions**

**Widow Counterattack** ✦ **At-Will**
*Trigger:* An enemy would provoke an opportunity attack from the demonic spider created by the Lady of Spiders.
*Attack (Opportunity Action):* Melee 1 (the triggering enemy); +32 vs. AC
*Hit:* 2d8 + 9 damage, and ongoing 10 poison damage (save ends).

**Fearsome Wrath** (fear) ✦ **Recharge** when first bloodied
*Trigger:* An enemy hits the Lady of Spiders with a melee attack.
*Attack (Immediate Reaction):* Close blast 5 (enemies in blast, which must include the triggering enemy); +31 vs. Will
*Hit:* The Lady of Spiders pushes the target 5 squares, and the target is stunned until the end of its next turn.

**Skills** Bluff +27, Diplomacy +27, Intimidate +27

| | | |
|---|---|---|
| **Str** 14 (+15) | **Dex** 26 (+21) | **Wis** 25 (+20) |
| **Con** 23 (+19) | **Int** 25 (+20) | **Cha** 29 (+22) |

**Alignment** chaotic evil **Languages** Abyssal, Common, Elven
**Equipment** scourge

The Elemental Chaos constantly births creatures of air, earth, water, and fire. They run as wild as nymphs, drowning, burning, burying, and spinning. These elementals split and collide, creating and destroying in equal parts. Water beats against earth and douses fire; air sends earth up in a flurry; fire flares under air's light touch. This is the natural way of the elements and the creatures they comprise.

## Lore

**Arcana DC 21:** Air, earth, fire, and water elementals are the purest of their kind. Any spellcaster who wants to dabble in the summoning and binding of elemental entities first starts with these simple elemental creatures. Although the ritual required to summon them is easy, the one used to bind them in servitude is more complex. Sometimes, a young spellcaster's ambition leads him or her to call forth creatures that cannot be controlled. Unbound elementals invariably go on a destruction spree.

## Encounters

The four simplest elementals are found either under the control of someone who brought them forth with a ritual or in areas where the raw power of the Elemental Chaos intrudes into the world.

Cults of the Elder Elemental Eye frequently use elementals as guards or participants in sacrificial rituals. Aside from elemental cults, spellcasters who have a talent for summoning magic—from the lowliest kobold shaman to the most skilled drow sorcerer—use these creatures as disposable guards and marauders.

| **Lesser Air Elemental** | **Level 1 Lurker** |
|---|---|
| Small elemental magical beast (air) | XP 100 |

| **Alignment** unaligned **Languages** understands Primordial | |

eyes and ears can hope to spot it. An air elemental is a capricious creature that delights in sending earth-bound foes hurtling through the air. The mightiest air elementals sometimes congregate in fierce storms that scour areas clean of life.

### Air Elementals in Combat

An air elemental delights in battering its enemies in a howling cyclone. The creature lurks near the edges of melee, waiting until everyone has lost track of it before blasting into the fray.

The strongest air elemental approaches its prey like the barest wisp of a breeze; then it explodes with hurricane force to grasp its prey in rending winds. The victim is borne aloft, perhaps falling to its death if it manages to escape.

## Earth Elemental

Composed of rock and infused with a glimmer of sentience, earth elementals form the vanguard of cults associated with Ogrémoch (page 160) and other creatures of earth and stone. When yanked from its home, an earth elemental harbors the rumbling fury of an earthquake.

The smallest earth elementals are humanoid-shaped masses of rock and earth that fight alongside the cultists and the spellcasters who summon them. The largest earth elementals bow only to the will of powerful elementals or the most skilled spellcasters.

**Lesser Earth Elemental** — **Level 2 Soldier**
Small elemental magical beast (earth) — XP 125

**HP** 42; **Bloodied** 21 — **Initiative** +1
**AC** 17, **Fortitude** 15, **Reflex** 12, **Will** 13 — **Perception** +1
**Speed** 5, burrow 5 — Tremorsense 5

**Traits**

**Earth Glide**
The lesser earth elemental can pass through earth and rock as if it were phasing.

**Brittle Skin**
Whenever the lesser earth elemental takes thunder damage, it takes a -2 penalty to all defenses until the end of its next turn.

**Standard Actions**

**Slam ✦ At-Will**
*Attack:* Melee 1 (one creature); +7 vs. AC
*Hit:* 1d8 + 5 damage, and the target cannot shift until the end of the elemental's next turn.

**Triggered Actions**

**Overwhelming Stone ✦ Recharge** when first bloodied
*Trigger:* An enemy adjacent to the elemental hits an ally of the elemental with a melee attack.
*Effect (Immediate Reaction):* The triggering enemy falls prone.

**Str** 17 (+4) — **Dex** 6 (-1) — **Wis** 11 (+1)

**Greater Earth Elemental** — **Level 22 Soldier**
Large elemental magical beast (earth) — XP 4,150

**HP** 212; **Bloodied** 106 — **Initiative** +11
**AC** 37, **Fortitude** 35, **Reflex** 32, **Will** 33 — **Perception** +11
**Speed** 9, burrow 9 — Tremorsense 5
**Vulnerable** thunder (see *brittle skin*)

**Traits**

**Earth Glide**
The greater earth elemental can pass through earth and rock as if it were phasing.

**Brittle Skin**
Whenever the greater earth elemental takes thunder damage, it takes a -2 penalty to all defenses until the end of its next turn.

**Standard Actions**

**Slam ✦ At-Will**
*Attack:* Melee 2 (one creature); +27 vs. AC
*Hit:* 4d8 + 12 damage, and the target cannot shift until the end of the elemental's next turn.

**Flattening Stomp ✦ Recharge** when first bloodied
*Attack:* Melee 2 (one creature); +25 vs. Reflex
*Hit:* 5d8 + 20 damage.
*Effect:* The target and each enemy within 2 squares of it falls prone.

**Str** 27 (+19) — **Dex** 6 (+9) — **Wis** 11 (+11)
**Con** 28 (+20) — **Int** 5 (+8) — **Cha** 6 (+9)
**Alignment** unaligned — **Languages** understands Primordial

### Earth Elementals in Combat

A cultist or a spellcaster calls an earth elemental into battle, where it stands at the forefront of combat. The elemental is at one with the landscape and disconcerts foes when it moves through walls and rocks. The creature manipulates the earth to unbalance foes, and it uses its mass to pummel them. Although incredibly strong, an earth elemental is far from clever. The creature must have a target clearly defined, or it might rampage against any creature or structure on the battlefield.

# Fire Elemental

A fire elemental hungers for fresh fuel. It darts from enemy to enemy, igniting each in turn. Survivors who have faced these creatures claim that the elementals cackle gleefully with each new flame. The weakest of the fire elementals is barely the size of a campfire, but the energy that roils inside it can quickly burn a house to the ground.

| **Lesser Fire Elemental** | **Level 1 Skirmisher** |
|---|---|
| Small elemental magical beast (fire) | XP 100 |

## Fire Elementals in Combat

Driven only to ignite and burn, a fire elemental enters battle with little heed for its own existence. It seeks out the densest concentration of enemies and darts among them, setting each alight. With a wrathful temperament that befits its nature, a fire elemental hounds a foe that injures it unless held in close command.

JIM NELSON

| Greater Fire Elemental | Level 21 Skirmisher |

# Water Elemental

A swirling creature of living liquid, a water elemental derives sustenance from the dying gasps of creatures that drown in its grip. Spellcasters often place water elementals in innocent-seeming pools. Whether in an enclosed body of water or in the seas of the Elemental Chaos, water elementals overturn vessels out of spite.

| Lesser Water Elemental | Level 1 Controller |
|---|---|
| Small elemental magical beast (aquatic, water) | XP 100 |
| **HP** 29; **Bloodied** 14 | **Initiative** +2 |

## Water Elementals in Combat

A water elemental forces part of its essence into an enemy's lungs, slowly drowning it. A water elemental toys with its victims, using its power over water to briefly control foes.

# Forsaken

The Dawn War saw countless immortals slain. Gods were torn asunder by the chaotic power of the primordials. In death, their essence was dispersed across the Astral Sea, diffused to nothingness or absorbed by other immortals. However, a number of gods, their names now lost to time, were slain while inhabiting the world. Their divine energy could not pass to the Astral Sea. Instead, it sought out new vessels—creatures now known as the forsaken.

## Lore

**History DC 31:** During the war between the gods and the primordials, the dispersed power of dead gods eventually found a home in the earliest humanoid tribes. This divine might filled these primitive creatures, sharpening their intellect and strengthening their bodies. However, these boons carried a high cost. Although the dead gods had no lingering consciousness and no control over their unlikely descendants, these humanoids gained the memory of what it was to be immortal.

This echo of the gods' consciousness overwhelmed those it possessed, becoming a source of torment. Calling themselves the forsaken, these humanoids ritually removed their eyes and bound the sockets in bandages. They loathed to look upon the mortal realm, for it was a constant reminder of the immortality that they had been denied.

In time, distinct tribes of forsaken arose throughout the world. These groups spread out to scour the planes, haunted by the memory of what it is to be a god. The forsaken are obsessed with attaining immortality. Those creatures that possess the gift of everlasting life are their sworn enemies, whether angels, devils, devas, or gods.

The forsaken have established outposts in Shom, where they skirmish with adventurers and Vecna worshipers for knowledge and magic. Covert sects of forsaken have infiltrated numerous astral dominions, including Hestavar, Celestia, and even Cania, the eighth hell. In these places, the forsaken seek to slake their hunger for divine essence by consuming the power of ancient relics and immortal creatures.

Forsaken believe that if they absorb enough divine power and knowledge, they can finally sate the emptiness of their creation and achieve godhood. Although cells of forsaken are rare, whispered rumors tell of a vast conspiracy among them to slay a god and absorb its essence.

JASON A. ENGLE

## Encounters

Forsaken work with a wide range of allies, from elementals and primordial cults to humanoid tyrants. Some even work with aberrants. Forsaken rarely take up with a cause unless they have an ulterior motive. They might help conspire with a tyrant to bring about the downfall of a mortal kingdom, but their ultimate goal is to undermine a deity's power in the aftermath.

More often than not, forsaken are the leaders of nefarious plots backed up by brutish followers bent to their will. A cell of forsaken might hire tulgars as mercenaries, harness the power of an apocalypse spell, or recruit or bind powerful devils and demons to its cause.

## Forsaken Fearwrack

A small group of forsaken fearwracks patrols the outer shores of Celestia. Though their presence is abhorrent to the residents of this astral dominion, they are given a wide berth. Exalted and angels watch from a distance, monitoring the broken creatures for any signs of hostility. Although these immortals despise the forsaken, they know that their divine essence will be consumed if they are slain by one of the doomed creatures.

| **Forsaken Fearwrack** | **Level 26 Artillery (Leader)** |
|---|---|
| Medium natural humanoid (blind) | XP 9,000 |
| **HP** 150; **Bloodied** 75 | **Initiative** +20 |
| **AC** 38, **Fortitude** 37, **Reflex** 39, **Will** 39 | **Perception** +21 |
| **Speed** 6 | Blindsight 20, blind |
| **Immune** blinded, gaze | |

**Traits**

**Inspire Fear** (fear) ✦ **Aura** 1
Enemies within the aura take a -2 penalty to all defenses against fear attacks.

**Standard Actions**

**Fear Strike** (fear, implement, psychic) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +29 vs. Will
*Hit:* 2d6 + 7 psychic damage, and the target moves its speed away from the fearwrack. The fearwrack chooses the path the target takes, but each square it moves must take it farther away from the fearwrack.

**Terror Bolt** (fear, implement, psychic) ✦ **At-Will**
*Attack:* Ranged 10 (one or two creatures); +31 vs. Will
*Hit:* 2d6 + 7 psychic damage, and one of the fearwrack's allies adjacent to the target can make a melee basic attack against the target as a free action.

**Curse of Mortality** (fear, implement) ✦ **Recharge** ⚅ ⚄ ⚃
*Attack:* Ranged 20 (one creature); +31 vs. Fortitude
*Hit:* Ongoing 20 damage (save ends). The target takes a -2 penalty to the saving throw.
*Each Failed Saving Throw:* The ongoing damage increases by 5, to a maximum of ongoing 30 damage.

**Sign of Death** (implement) ✦ **Encounter**
*Attack:* Area burst 2 within 10 (enemies in burst); +29 vs. Fortitude
*Hit:* Until the end of the fearwrack's next turn, the next attack made against the target gains a +5 power bonus to the attack roll.

**Triggered Actions**

**Cleansing Wounds** ✦ **Encounter**
*Trigger:* The fearwrack is first bloodied.
*Effect (No Action):* Enemy effects on the fearwrack end.

**Fragment of Immortality** ✦ **Encounter**
*Trigger:* The fearwrack drops to 0 hit points.
*Effect (No Action):* The fearwrack is removed from play until the start of its next turn. The fearwrack then appears within 5 squares of its last location with 37 hit points and without any effects on it.

**Skills** Intimidate +27

| | | |
|---|---|---|
| **Str** 23 (+19) | **Dex** 25 (+20) | **Wis** 26 (+21) |
| **Con** 26 (+21) | **Int** 28 (+22) | **Cha** 29 (+22) |

**Alignment** evil **Languages** Common, Supernal
**Equipment** rod

## Forsaken Fearwracks in Combat

Fearwracks lair at the center of wide expanses, often inhabiting ruined towers from which they patrol on flying mounts. They are vocal in combat; in rasping voices, they invoke terrible oaths and declare the imminent doom of their adversaries. Many are half mad, screaming in delight when any creature falls dead, whether ally or enemy.

At your option, a forsaken fearwrack's attacks might have some ability to overcome immunity or resistance to fear. The forsaken are obsessed with the nature of fear and have studied it thoroughly. Fearwracks have developed powers able to strike terror into even angels and other divine agents. Only the most powerful heroes and divine beings can resist them.

# Forsaken Infiltrator

The forsaken had always seemed a distant threat and no more. Then, the clerics of Pelor found the first infiltrator within their ranks; later, a secret cult of Vecna was rumored to have turned up another. These creatures' gift for impersonation is said to be a power granted by the deity whose essence birthed them.

Forsaken infiltrators have been tasked with insinuating themselves into shrines, temples, and orders of faith. They seek positions of power to gain access to privileged materials and to undermine the authority of the faithful they deceive.

| **Forsaken Infiltrator** | **Level 27 Skirmisher** |
|---|---|
| Medium natural humanoid (blind) | XP 11,000 |
| **HP** 200; **Bloodied** 100 | **Initiative** +22 |
| **AC** 41, **Fortitude** 38, **Reflex** 39, **Will** 39 | **Perception** +21 |
| **Speed** 6 | Blindsight 20, blind |
| **Immune** blinded, gaze | |

**Traits**

**Combat Advantage**
Whenever the infiltrator hits a creature granting combat advantage to it, that creature is immobilized until the end of its next turn and the infiltrator can shift 2 squares.

**Punishing Response**
Whenever an enemy hits the infiltrator with an opportunity attack, that enemy takes damage equal to the damage dealt by that attack plus 5 extra damage.

**Standard Actions**

**Khopesh** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +32 vs. AC
*Hit:* 4d8 + 17 damage.

**Hand Crossbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 10/20 (one creature); +31 vs. AC
*Hit:* 4d6 + 12 damage.

**Careful Attack** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +32 vs. AC
*Hit:* 3d8 + 15 damage, and the infiltrator gains a +2 bonus to all defenses against the target until the end of the infiltrator's next turn.

**Triggered Actions**

**Fragment of Immortality** ✦ **Encounter**
*Trigger:* The infiltrator drops to 0 hit points.
*Effect (No Action):* The infiltrator is removed from play until the start of its next turn. The infiltrator then appears within 5 squares of its last location with 50 hit points and without any effects on it.

**Skills** Bluff +27, Diplomacy +27, Insight +26, Stealth +25

| | | |
|---|---|---|
| **Str** 24 (+20) | **Dex** 25 (+20) | **Wis** 26 (+21) |
| **Con** 27 (+21) | **Int** 28 (+22) | **Cha** 29 (+22) |

**Alignment** evil **Languages** Common, Supernal
**Equipment** leather armor, khopesh, hand crossbow, 10 bolts

## Forsaken Infiltrators in Combat

Forsaken infiltrators are seldom forced into combat. Their imitations and duplicity are so perfect that few are ever exposed. An infiltrator does not use illusion to disguise itself. Instead, through a unique ritual

of transformation, the creature painfully sculpts its flesh into the likeness of another. Infiltrators often work in pairs so that if one's true nature is revealed, the other can continue to operate. An infiltrator might give away one of its allies to curry favor or divert suspicion away from itself.

## Forsaken Loreseeker

In the great cities of the Astral Sea, vast libraries and impregnable vaults hold the ancient texts and powerful artifacts of the gods. Inaccessible to all but the most holy and devoted, these bastions of the deities are constantly besieged by a subtle and deadly foe. Forsaken loreseekers infiltrate and loot these ancient sites on the orders of their masters. Their secret schemes constantly test the cunning and defenses of their enemies as they search for holy relics and divine power. It is rumored that a creature that dies by a loreseeker's hand surrenders all its knowledge to the loreseeker.

| **Forsaken Loreseeker** | **Level 27 Minion Soldier** |
|---|---|
| Medium natural humanoid (blind) | XP 2,750 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +22 |
| **AC** 43, **Fortitude** 40, **Reflex** 38, **Will** 39 | **Perception** +22 |
| **Speed** 6 | Blindsight 20, blind |
| **Immune** blinded, gaze | |
| **Standard Actions** | |
| **Theft of Memory** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +32 vs. AC | |
| *Hit:* 14 damage. During the target's next turn, the target treats all enemies except the loreseeker as invisible unless the loreseeker is affected by *fragment of immortality.* | |
| **Hand Crossbow** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 10/20 (one creature); +32 vs. AC | |
| *Hit:* 12 damage, and the target is marked until the end of the target's next turn. | |
| **Triggered Actions** | |
| **Fragment of Immortality** ✦ **Encounter** | |
| *Trigger:* The loreseeker drops to 0 hit points. | |
| *Effect (No Action):* The loreseeker is removed from play until the start of its next turn. The loreseeker then appears within 5 squares of its last location with 1 hit point and without any effects on it. | |
| **Skills** Arcana +26, History +26, Religion +26 | |
| **Str** 26 (+21) **Dex** 24 (+20) **Wis** 28 (+22) | |
| **Con** 29 (+22) **Int** 27 (+21) **Cha** 23 (+19) | |
| **Alignment** evil **Languages** Common, Supernal | |
| **Equipment** chainmail, khopesh, hand crossbow, 10 bolts | |

### Forsaken Loreseekers in Combat

Although loreseekers spend much of their time searching libraries, ruins, and vaults, they are deadly combatants on the battlefield. Years spent absorbing knowledge from relics and tomes grants them the power to erase an enemy's perception of other threats.

## Forsaken Slaughterer

The memory of immortality is too much for some forsaken to bear. The unrealized power of the gods eats away at the sanity of these creatures until their minds snap. Rather than exiling their kin, however, the forsaken turn these warped individuals into weapons. A forsaken slaughterer is more sensitive to the presence of divine magic than other forsaken are, and such magic drives a slaughterer into a bloodthirsty frenzy. A forsaken slaughterer is charged with annihilating the relics and agents of the gods. When it is done, it feasts on the divine power of the creature or item it destroyed.

| **Forsaken Slaughterer** | **Level 28 Brute** |
|---|---|
| Medium natural humanoid (blind) | XP 13,000 |
| **HP** 253; **Bloodied** 126 | **Initiative** +22 |
| **AC** 40, **Fortitude** 41, **Reflex** 40, **Will** 39 | **Perception** +22 |
| **Speed** 6 | Blindsight 20, blind |
| **Immune** blinded, gaze | |
| **Traits** | |
| **Relentless Slaughter** ✦ **Aura** 1 | |
| Enemies within the aura gain only half the benefit of healing effects. | |
| **Proximal Resistance** | |
| While no enemy is adjacent to it, the slaughterer gains resist 10 against ranged and area attacks. | |
| **Standard Actions** | |
| **Khopesh** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +33 vs. AC | |
| *Hit:* 6d8 + 18 damage. | |
| **Unstoppable Cut** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +33 vs. AC | |
| *Hit:* 3d8 + 18 damage, and one enemy adjacent to the target takes the same amount of damage. | |
| **Triggered Actions** | |
| **Blood for Blood** (weapon) ✦ **Encounter** | |
| *Trigger:* The slaughterer is first bloodied. | |
| *Attack (Free Action):* Close burst 1 (enemies in burst); +33 vs. AC | |
| *Hit:* The target takes damage equal to its healing surge value. | |
| **Fragment of Immortality** ✦ **Encounter** | |
| *Trigger:* The slaughterer drops to 0 hit points. | |
| *Effect (No Action):* The slaughterer is removed from play until the start of its next turn. The slaughterer then appears within 5 squares of its last location with 63 hit points and without any effects on it. | |
| **Skills** Athletics +29, Intimidate +26 | |
| **Str** 30 (+24) **Dex** 26 (+22) **Wis** 27 (+22) | |
| **Con** 27 (+22) **Int** 29 (+23) **Cha** 24 (+21) | |
| **Alignment** evil **Languages** Common, Supernal | |
| **Equipment** scale armor, 2 khopeshes | |

### Forsaken Slaughterers in Combat

Given the opportunity, forsaken focus their enmity on divine agents. This quality is even stronger in forsaken slaughterers. A slaughterer goes out of its way to hunt down any enemy that uses the divine power source or has an immortal origin. Once that target is engaged, the slaughterer attacks and pursues it relentlessly. Although most forsaken fear death, a

slaughterer welcomes it, for its madness has driven it beyond reason. Despite the risks, battle against a forsaken slaughterer can be a boon, because the creature's babble can reveal important information about the activities and plots of its masters and allies.

## Forsaken Mastermind

In the heart of a city's criminal underworld, a forsaken cell is led by a mastermind, who carefully monitors the rumors and events of the surrounding territories. A mastermind coordinates a vast network of spies that extends well beyond city walls. Its purpose is a matter of much speculation, for its members are waiting for something: perhaps the imminent arrival of a divine emissary from Hestavar, or maybe an upcoming alignment of stars. No matter what a mastermind is waiting for, the creature's purpose is always sinister.

**Forsaken Mastermind** **Level 29 Controller (Leader)**
Medium natural humanoid (blind) XP 15,000

**HP** 213; **Bloodied** 106 **Initiative** +22
**AC** 43, **Fortitude** 40, **Reflex** 42, **Will** 41 **Perception** +22
**Speed** 6 Blindsight 20, blind
**Immune** blinded, gaze

**Traits**

**Inspire Resilience ✦ Aura** 5
Allies within the aura that use *fragment of immortality* also gain 40 temporary hit points.

**Standard Actions**

**Khopesh** (weapon) **✦ At-Will**
*Attack:* Melee 1 (one creature); +34 vs. AC
*Hit:* 4d8 + 19 damage, and the target is marked by one of the mastermind's allies within 5 squares of the mastermind until the end of the target's next turn.

**Hand Crossbow** (weapon) **✦ At-Will**
*Attack:* Ranged 10/20 (one creature); +34 vs. AC
*Hit:* 4d6 + 14 damage.

**Tainted Wave ✦ At-Will**
*Attack:* Close blast 3 (enemies in blast); +32 vs. Fortitude
*Hit:* 2d8 + 12 damage. The target loses any temporary hit points and cannot regain hit points until the end of the mastermind's next turn.

**Delayed Retribution ✦ Recharge** ⚄ ⁞⁞
*Attack:* Area burst 1 within 10 (enemies in burst); +32 vs. Reflex
*Hit:* 3d10 + 16 damage, and if the target attacks the mastermind during the target's next turn, the target is stunned until the end of its subsequent turn.
*Miss:* Half damage.

**Triggered Actions**

**Wrath of the Forsaken ✦ At-Will**
*Trigger:* An enemy uses a divine power within 10 squares of the mastermind.
*Effect (Immediate Reaction):* The mastermind ends any enemy effects on one ally within 10 squares of it, and that ally can make a recharge roll to regain one expended recharge power.

**Fragment of Immortality ✦ Encounter**
*Trigger:* The mastermind drops to 0 hit points.
*Effect (No Action):* The mastermind is removed from play until the start of its next turn. The mastermind then appears within 5 squares of its last location with 53 hit points and without any effects on it.

**Skills** Arcana +29, History +29, Insight +27, Religion +29
**Str** 24 (+21) **Dex** 27 (+22) **Wis** 26 (+22)
**Con** 27 (+22) **Int** 30 (+24) **Cha** 29 (+23)
**Alignment** evil **Languages** Common, Supernal
**Equipment** khopesh, hand crossbow, 10 bolts

### Forsaken Masterminds in Combat

A mastermind that does its job correctly should never see combat. Adventurers, however, have ways of upsetting even the most devious of the forsaken's plots. Masterminds lurk in the shadows, dispatching their underlings to do their dirty work. These followers include both other forsaken and unwitting members of other races. Only when a mastermind can no longer abide a foe's interference does it emerge to unleash its full fury. Even then, a mastermind is cold and calculating. It tries to ensure that it always has an escape route.

JASON A. ENGLE

# FOULSPAWN

Born of the Far Realm, foulspawn are the loathsome enemies of all that is natural. Their increasing attacks on the world have become a deadly threat as they raid defenseless settlements, lonely enclaves, and borderland keeps. Most who stand against foulspawn die quickly. However, these creatures sometimes keep victims alive, dragging them back to the Far Realm or to secret lairs in the Underdark.

## Lore

**Arcana DC 21:** Foulspawn cross over from the Far Realm, entering the mortal world in places of madness such as forgotten prisons, overcrowded slums, and ancient ruins. In such places, the barrier between the Far Realm and the natural world is dangerously thin.

*Foulspawn warpcaller and mockery*

Foulspawn are driven to destroy the creatures of the natural world. However, they sometimes take captives back to the Far Realm or the Underdark. Most creatures exposed to the Far Realm's influence succumb to death or madness; the unfortunate few that survive become foulspawn.

## Encounters

Few natural creatures work with foulspawn. The insane cultists of Tharizdun and Demogorgon are notable exceptions. Such cults provide foulspawn with rituals and other magic, sometimes helping to create the breaches by which these creatures enter the world. For their efforts, the allies often become the first victims of a foulspawn invasion.

Gibbering mouthers and other aberrants sometimes accompany foulspawn. Foulspawn that remain in the mortal realm almost always dwell in the Underdark. They frequently capture and train balhannoths and gricks as guardians and mounts.

## Foulspawn Wretch

Somewhere within a distant ruin, a rift to the Far Realm opens. Like cosmic vermin, foulspawn wretches pour out in an unrelenting swarm. Alone, several adventurers fight them, but the longer they do battle, the more of these foul creatures appear.

| **Foulspawn Wretch** | **Level 7 Minion Skirmisher** |
|---|---|
| Small aberrant humanoid | XP 75 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +10 |
| **AC** 21, **Fortitude** 19, **Reflex** 20, **Will** 19 | **Perception** +5 |
| **Speed** 6, teleport 2 | Low-light vision |
| **Traits** | |
| **Ceaseless Murmurs** | |
| Any enemy adjacent to two or more foulspawn wretches takes a -2 penalty to Will. | |
| **Standard Actions** | |
| ⊕ **Claw ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +12 vs. AC | |
| *Hit:* 7 damage, and a foulspawn wretch ally within 6 squares can teleport to a square adjacent to the target. | |
| **Triggered Actions** | |
| **Screaming Echo** (teleportation) | |
| *Trigger:* The wretch drops to 0 hit points. | |
| *Effect (Immediate Interrupt):* The wretch teleports a nonminion ally within 6 squares of itself to the square the wretch occupies. | |
| **Str** 14 (+5) **Dex** 20 (+8) **Wis** 14 (+5) | |
| **Con** 16 (+6) **Int** 16 (+6) **Cha** 17 (+6) | |
| **Alignment** evil **Languages** Deep Speech, telepathy 10 | |

### Foulspawn Wretches in Combat

Foulspawn wretches lurk just beyond the borders of reality, waiting for a chance to slip through. Once an opportunity presents itself, they pour into the world in large numbers, laying waste to everything. Individually, a wretch is cowardly and weak. In large numbers, these creatures are deadly and fearless.

DAVE ALLSOP

# Foulspawn Mockery

Those who fought against the foulspawn incursion described vicious spellcasters that forced enemies to fight in close quarters. With mocking laughter, these terrible creatures blasted tightly ranked foes with maddening spells. Those who survived the battle remain mentally scarred, living in constant fear of the lurking horrors of the Far Realm.

| **Foulspawn Mockery** | **Level 10 Controller** |
|---|---|
| Medium aberrant humanoid | XP 500 |
| **HP** 104; **Bloodied** 52 | **Initiative** +8 |
| **AC** 24, **Fortitude** 19, **Reflex** 22, **Will** 20 | **Perception** +9 |
| **Speed** 6, teleport 3 | Low-light vision |
| **Standard Actions** | |
| **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +15 vs. AC | |
| *Hit:* 3d6 + 6 damage. | |
| **Mind Harrier** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +13 vs. Will | |
| *Hit:* 2d6 + 6 psychic damage. At the end of the target's next turn, if it is not adjacent to any of its allies, it takes 10 psychic damage and ongoing 10 psychic damage (save ends). | |
| **Maddening Burst** (psychic) ✦ **Recharge** ⚄ ⚅ | |
| *Attack:* Area burst 1 within 10 (enemies in burst); +13 vs. Will | |
| *Hit:* 2d6 + 6 psychic damage, and the target is dazed (save ends). | |
| **Str** 18 (+9) **Dex** 17 (+8) **Wis** 18 (+9) | |
| **Con** 16 (+8) **Int** 15 (+7) **Cha** 21 (+10) | |
| **Alignment** evil **Languages** Deep Speech, telepathy 10 | |

## Foulspawn Mockeries in Combat

Mockeries are the most evil and sadistic of foulspawn. By forcing their enemies to stay in close quarters, they maximize the effect of *maddening burst*. These dazed foes then become ripe targets as the mockery's allies tear into them.

# Foulspawn Warpcaller

The discordant tones of a pipe are faint over the clamoring chaos of battle. Then, all at once, the defenders' lines are broken. The eerie music shatters the minds of warriors and mages alike. At the head of the attack, a foulspawn warpcaller approaches, driven by its hatred of the natural world.

| **Foulspawn Warpcaller** | **Level 12 Controller (Leader)** |
|---|---|
| Medium aberrant humanoid | XP 700 |
| **HP** 126; **Bloodied** 63 | **Initiative** +9 |
| **AC** 26, **Fortitude** 24, **Reflex** 22, **Will** 24 | **Perception** +9 |
| **Speed** 6, teleport 3 | Darkvision |
| **Traits** | |
| **Droning Pipe** ✦ **Aura** 3 | |
| Enemies within the aura gain vulnerable 5 psychic. | |
| **Standard Actions** | |
| **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. AC | |
| *Hit:* 3d8 + 5 damage. | |
| **Warped Sending** (psychic, teleportation) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +15 vs. Fortitude | |
| *Hit:* 2d8 + 5 psychic damage, and one of the warpcaller's aberrant allies within 5 squares of the target teleports to a square adjacent to the target. | |
| **Twisted Dismissal** (psychic, teleportation) ✦ **At-Will** | |
| *Attack:* Melee 1 (one enemy); +15 vs. Will | |
| *Hit:* 2d8 + 5 psychic damage, and the target is immobilized (save ends). The warpcaller then teleports the target 2 squares. | |
| **Warpmind Field** (psychic, zone) ✦ **Encounter** | |
| *Attack:* Area burst 2 within 5 (enemies in burst); +15 vs. Will | |
| *Hit:* 2d6 + 6 psychic damage. | |
| *Effect:* The burst creates a zone that lasts until the end of the warpcaller's next turn. Any enemy that enters the zone or ends its turn there takes 10 psychic damage. In addition, any enemy within the zone can attack only targets within 3 squares of it. As a move action, the warpcaller can move the zone up to 4 squares. | |
| *Sustain Minor:* The zone persists. | |
| **Skills** Arcana +15 | |
| **Str** 19 (+10) **Dex** 16 (+9) **Wis** 17 (+9) | |
| **Con** 22 (+12) **Int** 18 (+10) **Cha** 19 (+10) | |
| **Alignment** evil **Languages** Deep Speech, telepathy 10 | |
| **Equipment** musical pipe | |

## Foulspawn Warpcallers in Combat

A warpcaller uses its eerie music to create psychic conduits into the Far Realm. In the thick of combat, its droning pipe heightens the mental anguish caused by its attacks. The warpcaller moves its allies around, forcing foes caught up in the song to concentrate on the new threats.

# Frog

The sign at the swamp's edge cautioning travelers to beware of frogs was thought by many to be a joke. Those who disregard it soon learn of their error, as they fight for their lives against territorial amphibians the size of hounds. Survivors who escape the swamp find new respect for these creatures.

Found wherever the water meets the land, frogs run the gamut from harmless pests to genuine threats. The largest frogs are those that have escaped extinction because of their size, their ferocity, and their isolated habitats. Reminders of a bygone age, these beasts either dwell in the muddy waters of deep swamps or eke out an existence in freshwater pools within the Underdark. These creatures threaten anyone who travels through their territory without caution. They gladly consume any prey foolish enough to come to them.

## Lore

**Nature DC 10:** After a frog kills its prey, it swallows the body whole. Afterward, the frog returns to a safe location where it regurgitates any indigestible bits. In the case of animals, this material usually amounts to little more than bones and fur, but a sentient creature often has items such as gold and jewelry, which the frog cannot process. Thus, a frog's home can be a treasure trove of rings, necklaces, and coins. Adventurers willing to brave the swamps to find a frog den can reap a significant return for their efforts. Occasionally a family offers a reward to adventurers willing to recover an irreplaceable heirloom lost when a family member fell victim to a frog.

## Encounters

Bullywugs are the uncontested masters at capturing and training wild frogs. Swamp-dwelling kobolds and goblins have learned from bullywugs and now train frogs as well. However, only the bullywugs have learned to domesticate the various breeds of frogs. Bullywugs use them like dogs to hunt or guard. Other humanoids must tether the frogs or keep them in cages until the frenzied creatures are ready to be released among enemy ranks. A bullywug sometimes offers a trained war frog as a gift to a tribe with which it wants to establish a trade relationship.

## Thornskin Frog

The explorer backed against the trunk of a mossy tree. In front of him, a trio of slimy beasts hopped closer, lidless eyes watching him hungrily. Their mud-colored skin was covered with thick spines, making them resemble slick, bloated brambles.

The hand of his halfling guide protruded from the largest beast's broad mouth. The fingers twitched faintly. A moment later the hand was gone, disappearing as the frog swallowed the guide—and the explorer's only hope of finding his way out of the swamp.

| **Thornskin Frog** | **Level 1 Brute** |
|---|---|
| Medium natural beast (aquatic) | XP 100 |
| **HP** 35; **Bloodied** 17 | **Initiative** +4 |
| **AC** 13, **Fortitude** 12, **Reflex** 13, **Will** 11 | **Perception** +2 |
| **Speed** 4, swim 6 | Low-light vision |
| **Traits** | |
| **Aquatic** | |
| The thornskin can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures. | |
| **Standard Actions** | |
| **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +6 vs. AC | |
| *Hit:* 1d10 + 6 damage. | |
| **Pounce ✦ Recharge** ⚄ ⁞⁞ | |
| *Effect:* The thornskin shifts its speed and makes the following attack. | |
| *Attack:* Melee 1 (one creature); +4 vs. Reflex | |
| *Hit:* 2d6 + 6 damage, and the target falls prone. | |
| **Minor Actions** | |
| **Tongue Grab ✦ At-Will** | |
| *Attack:* Melee 3 (one creature); +4 vs. Reflex | |
| *Hit:* The thornskin pulls the target 2 squares. | |
| **Str** 16 (+3) **Dex** 18 (+4) **Wis** 14 (+2) | |
| **Con** 15 (+2) **Int** 3 (-4) **Cha** 9 (-1) | |
| **Alignment** unaligned **Languages** – | |

### Thornskin Frogs in Combat

Too stupid to be cautious, thornskin frogs leap into battle. Usually encountered in small groups, thornskins gang up on the nearest enemy, devouring it and then pouncing at the next foe. Unable to comprehend concepts such as fear or tactics, a single thornskin continues to fight against overwhelming odds. If a foe threatens the frog's eggs, the frog turns its attention to that enemy.

## Sporeback Frog

The sluggish sporeback frogs have developed a symbiotic relationship with a swamp fungus. The fungus grows on the backs of the frogs, gaining nourishment from their skin while providing natural camouflage and defense against any creatures that would prey on the frogs. When a sporeback dies, the fungus releases spores that cloud the mind and blur vision. This natural defense encourages predators to seek other quarry.

| **Sporeback Frog** | **Level 2 Controller** |
|---|---|
| Medium natural beast (aquatic) | XP 125 |
| **HP** 42; **Bloodied** 21 | **Initiative** +4 |
| **AC** 16, **Fortitude** 14, **Reflex** 13, **Will** 12 | **Perception** +3 |
| **Speed** 3, swim 5 | Low-light vision |
| **Traits** | |
| **Aquatic** | |
| The sporeback can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures. | |
| **Standard Actions** | |
| **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +7 vs. AC | |
| *Hit:* 1d8 + 6 damage, and the target is slowed until the end of the sporeback's next turn. | |
| **Barbed Tongue ✦ At-Will** | |
| *Attack:* Melee 3 (one creature); +5 vs. Reflex | |
| *Hit:* 2d6 + 2 damage, and the sporeback pulls the target 2 squares and knocks it prone. | |
| **Triggered Actions** | |
| **Spore Release** (poison) | |
| *Trigger:* The sporeback drops to 0 hit points. | |
| *Attack (No Action):* Close burst 2 (creatures in burst); +5 vs. Fortitude | |
| *Hit:* 1d6 + 7 poison damage, and the target takes a -2 penalty to attack rolls (save ends). | |
| **Str** 15 (+3) **Dex** 16 (+4) **Wis** 15 (+3) | |
| **Con** 18 (+5) **Int** 3 (-3) **Cha** 9 (+0) | |
| **Skills** Stealth +9 | |
| **Alignment** unaligned **Languages** – | |

## Sporeback Frogs in Combat

Quite possibly the laziest hunter imaginable, a sporeback frog is content to stay in one place and pull an enemy closer. Most creatures that would pose a threat to sporebacks learned long ago to avoid them, so these frogs seldom feel a pressing need to avoid conflict. When a sporeback does find itself in danger, it retreats to the nearest body of water, where it gains a slight mobility advantage. Otherwise, a sporeback lashes out with its tongue, pulling prey close enough to devour it.

# Murklord Frog

Watched from afar, murklord frogs are a breath-taking sight. Their sleek, glistening black bodies cut through the muddy water that gave them their name. Each murklord has a pair of luminescent stripes running down its back that flare when it is agitated or startled by a creature's approach.

| **Murklord Frog** | **Level 2 Skirmisher** |
|---|---|
| Medium natural beast (aquatic) | XP 125 |
| **HP** 39; **Bloodied** 19 | **Initiative** +7 |
| **AC** 16, **Fortitude** 13, **Reflex** 14, **Will** 13 | **Perception** +4 |
| **Speed** 6, swim 6 | Low-light vision |
| **Traits** | |
| **Aquatic** | |
| The murklord can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures. | |
| **Standard Actions** | |
| **Bite ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +7 vs. AC | |
| *Hit:* 1d6 + 5 damage, or 1d12 + 5 while the murklord is bloodied. | |
| **Leapfrog ✦ Recharge** ⚅ ⚄ ⚃ | |
| *Effect:* The murklord shifts 3 squares, makes the following attack, and shifts 3 squares again. | |
| *Attack:* Melee 1 (one creature); +5 vs. Reflex | |
| *Hit:* 2d6 + 4 damage, or 2d12 + 4 while the murklord is bloodied. | |
| **Minor Actions** | |
| **Tongue Lash ✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +5 vs. Reflex | |
| *Hit:* The murklord slides the target 1 square. | |
| **Skills** Acrobatics +10 | |
| **Str** 16 (+4) **Dex** 18 (+5) **Wis** 16 (+4) | |
| **Con** 15 (+3) **Int** 4 (-2) **Cha** 8 (+0) | |
| **Alignment** unaligned **Languages** – | |

## Murklord Frogs in Combat

The nearest thing to clever frogs, murklords attack from the edge of the water. Typically, a murklord strikes an enemy when it approaches the murklord's pool, and then the murklord quickly returns to the water to avoid counter-attacks. If a murklord is forced from its watery habitat, or if it's near death, it croaksfor assistance from other nearby frogs. A bloodied murklord leaves tactics behind and throws itself at enemies in an attempt to injure or kill as many as possible.

JIM NELSON

# GARGOYLE

None can say where or how the first gargoyles appeared. These deadly creatures are as old as the world, perhaps spawned when the primordials first shaped earth and rock.

## Lore

**Arcana DC 19:** Gargoyles are found throughout the natural world, but they are most common in the Elemental Chaos. The cruelest efreet lords train packs of gargoyles to hunt down captured humanoids for sport. The gargoyles' tendency to play with their victims provides endless entertainment for these sadistic elemental lords.

In the wilds of the Elemental Chaos, gargoyles are more often victims than predators. Relatively weak compared to many other creatures of that plane, they skulk in caves and attack only when they outnumber foes.

In the world, gargoyles are legendary for their aggressive and territorial behavior. For this reason, temples dedicated to the Elder Elemental Eye recruit, train, and breed gargoyles.

## Encounters

Gargoyles roam wild in the mortal world and the Elemental Chaos. They are commonly found in the service of other creatures in both realms. Unless they are directed, gargoyles lack the intelligence to formulate strong tactics. Instead, they lurk in wait for unwary humanoids traveling in small numbers.

The cults of the Elder Elemental Eye employ these creatures as watchers and guardians, as do evil wizards, psions, and sages who want to conduct their research without interference. In towns and cities, gargoyles serve criminal gangs as lookouts and scouts in return for fresh meat and trinkets.

## Ironstone Gargoyle

Identified by the rusty streaks that cover their bodies, ironstone gargoyles are patient raiders. Caravans and travelers in remote mountainous regions often become victims of these deadly gargoyles, as do adventurers who explore ruined towers and castles.

| **Ironstone Gargoyle** | **Level 7 Skirmisher** |
|---|---|
| Medium elemental humanoid (earth) | XP 300 |
| **HP** 80; **Bloodied** 40 | **Initiative** +9 |
| **AC** 21, **Fortitude** 19, **Reflex** 19, **Will** 17 | **Perception** +5 |
| **Speed** 6, fly 8 | Darkvision |
| **Immune** petrification | |
| **Traits** | |
| **Lurking Presence** | |
| The ironstone gargoyle gains a +10 bonus to Stealth checks against enemies' passive Perception. | |
| **Standard Actions** | |
| **Claw ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +12 vs. AC | |
| *Hit:* 2d6 + 4 damage. | |
| **Crashing Stride ✦ Recharge** ⚄ ⚅ | |
| *Effect:* The gargoyle shifts 4 squares and uses *claw* against two different targets at any point during the shift. When an attack hits, the gargoyle slides the target 1 square and knocks it prone. | |
| **Move Actions** | |
| **Leaping Glide ✦ At-Will** | |
| *Effect:* The gargoyle flies 4 squares without provoking opportunity attacks. | |
| **Skills** Athletics +12, Stealth +12 | |
| **Str** 19 (+7) **Dex** 18 (+7) **Wis** 14 (+5) | |
| **Con** 16 (+6) **Int** 7 (+1) **Cha** 11 (+3) | |
| **Alignment** evil **Languages** Primordial | |

### Ironstone Gargoyles in Combat

In the world, ironstone gargoyles lurk along mountain passes or infest stone towers. They are active at night, lurking motionless as they wait for victims to pass. The gargoyles attack as a pack, killing victims outright or driving them toward the edges of cliffs.

## Hornstone Gargoyle

The hornstone gargoyle is named for its deadly stone horns. The mere sight of a hornstone gargoyle can cause the strongest warriors to break ranks, each fearing to become the target of its deadly charge.

WOODROW HINTON III

| **Hornstone Gargoyle** | **Level 8 Brute** |
|---|---|
| Medium elemental humanoid (earth) | XP 350 |
| **HP** 107; **Bloodied** 53 | **Initiative** +7 |
| **AC** 20, **Fortitude** 22, **Reflex** 19, **Will** 19 | **Perception** +12 |
| **Speed** 6, fly 8 | Darkvision |
| **Immune** petrification | |
| **Traits** | |
| **Lurking Presence** | |
| The hornstone gargoyle gains a +10 bonus to Stealth checks against enemies' passive Perception. | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d10 + 5 damage, and the gargoyle can use *skewering drag* as a free action. | |
| ⸸ **Impaling Charge** ✦ **At-Will** | |
| *Effect:* The gargoyle charges and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 1 (one creature); +14 vs. AC | |
| *Hit:* 2d12 + 5 damage, and the target is grabbed and takes ongoing 5 damage until the grab ends. | |
| **Move Actions** | |
| **Skewering Drag** ✦ **At-Will** | |
| *Effect:* The gargoyle moves half its speed, pulling a creature grabbed by the gargoyle with it. The gargoyle and the creature grabbed by it do not provoke opportunity attacks from each other for this movement. | |
| **Skills** Stealth +12 | |
| **Str** 22 (+10) **Dex** 16 (+7) **Wis** 16 (+7) | |
| **Con** 17 (+7) **Int** 5 (+1) **Cha** 11 (+4) | |
| **Alignment** evil **Languages** Primordial | |

## Hornstone Gargoyles in Combat

These creatures swoop down in packs, impaling foes on their horns. They ignore counterattacks, preferring to return to the air to seek a new victim if a charge fails.

# Obsidian Gargoyle

Flocks of obsidian gargoyles sweep through the sky like storm clouds across the Elemental Chaos. In the world, followers of the Elder Elemental Eye keep these creatures as servants.

| **Obsidian Gargoyle** | **Level 8 Minion Soldier** |
|---|---|
| Medium elemental humanoid (earth) | XP 88 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +8 |
| **AC** 24, **Fortitude** 22, **Reflex** 20, **Will** 19 | **Perception** +7 |
| **Speed** 6, fly 8 | Darkvision |
| **Immune** petrification | |
| **Traits** | |
| **Cruel Claws** | |
| Whenever an enemy leaves a square adjacent to the obsidian gargoyle, that enemy takes 4 damage. | |
| **Lurking Presence** | |
| The obsidian gargoyle gains a +10 bonus to Stealth checks against enemies' passive Perception. | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 8 damage. | |
| **Skills** Athletics +14, Stealth +11 | |
| **Str** 20 (+9) **Dex** 15 (+6) **Wis** 16 (+7) | |
| **Con** 15 (+6) **Int** 5 (+1) **Cha** 11 (+4) | |
| **Alignment** evil **Languages** Primordial | |

## Obsidian Gargoyles in Combat

Every edge on an obsidian gargoyle's body is a deadly weapon, hindering and rending enemies that try to escape it in combat. Selective breeding by the cultists of the Elder Elemental Eye has imbued these creatures with suicidal bravery. They gladly form a living barrier against the cult's enemies.

# Runic Gargoyle

These creatures of white marble were first created to serve the cult of the Elder Elemental Eye. Some gargoyles broke from the cult's control and found service with other foul cultists and spellcasters. The creature's alabaster hide is covered with arcane runes that bond the gargoyle to its master.

| **Runic Gargoyle** | **Level 8 Soldier** |
|---|---|
| Medium elemental humanoid (earth) | XP 350 |
| **HP** 87; **Bloodied** 43 | **Initiative** +8 |
| **AC** 24, **Fortitude** 20, **Reflex** 19, **Will** 22 | **Perception** +12 |
| **Speed** 6, fly 8 | Darkvision |
| **Immune** petrification | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d8 + 7 damage. | |
| *Effect:* The target is marked until the end of the gargoyle's next turn. | |
| ⸸ **Avenging Claws** ✦ **Recharge** when the gargoyle's master is first bloodied. | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d8 + 7 damage, and the target is dazed until the end of the gargoyle's next turn. | |
| **Move Actions** | |
| **To the Master** (teleportation) ✦ **At-Will** | |
| *Effect:* The gargoyle teleports to a square within 2 squares of its master. | |
| **Triggered Actions** | |
| **Shielding Wings** ✦ **At-Will** | |
| *Requirement:* The gargoyle must be adjacent to its master. | |
| *Trigger:* The gargoyle's master takes damage. | |
| *Effect (Immediate Interrupt):* The gargoyle takes the damage instead of its master. | |
| **Skills** Athletics +14, Stealth +11 | |
| **Str** 20 (+9) **Dex** 15 (+6) **Wis** 16 (+7) | |
| **Con** 15 (+6) **Int** 10 (+4) **Cha** 11 (+4) | |
| **Alignment** evil **Languages** Common, Primordial | |

## Runic Gargoyles in Combat

Mages or priests that have a runic gargoyle at their command keep the creature out of sight at first. Though a runic gargoyle is sometimes sent on missions to retrieve relics or slay enemies, it is strongest when fighting alongside its master.

# Ghoul

A priest of Orcus performs ritual sacrifices to the Demon Prince of the Undead, calling forth ghouls from within a town's graveyard. A mighty warlock preparing for battle finds dozens of these creatures howling at the edges of her army's encampment, eager to join in the slaughter that is to come. Like flies drawn to rotting flesh, ghouls feel the stirring power of evil and flock to it in droves.

## Lore

**History DC 17:** As the progeny of cannibalism and other less than savory practices, ghouls are creatures of pure evil. Whenever dark powers arise beneath the earth, ghouls are inexorably drawn to their presence, digging miles of twisting tunnels between ancient dungeons, lost caverns, long-buried crypts, and forgotten temples. These ghoul warrens make tempting routes for adventurers exploring the Underdark. However, such passages are dangerous. The winding tunnels and tight quarters favor the ghouls, which usually prefer to engage their foes one at a time.

Evil spellcasters and priests from various fell religions form alliances with ghouls, paying them in live captives. These villains might seek access to lost relics or Underdark sites that the ghouls have uncovered. In the farthest reaches of a ghoul warren, crude earthen burrows often give way to chambers of finely sculpted marble or obsidian. Ghouls have uncovered lost temples of the Chained God, tombs dating back to the Dawn War, and even forgotten fanes to the demon princes.

## Encounters

Although these creatures traditionally serve Orcus, a ghoul's allegiance is controlled entirely by its hunger for living flesh. Ghouls fight alongside any allies that can supply them with a steady stream of fresh victims. However, living masters that ignore a ghoul's appetite pay a deadly price.

## Ghoul Flesh Seeker

The fight had already gone on too long when the flesh seekers' attack tipped the balance. The sage had warned of these creatures—mortal followers of Orcus that had undergone a horrific, cannibalistic initiation into the demon lord's cult. The battlefield soon became a profane altar as countless were slaughtered in Orcus's name.

| **Ghoul Flesh Seeker** | **Level 4 Lurker** |
|---|---|
| Medium natural humanoid (undead) | XP 175 |
| **HP** 45; **Bloodied** 22 | **Initiative** +10 |
| **AC** 18, **Fortitude** 14, **Reflex** 16, **Will** 15 | **Perception** +9 |
| **Speed** 8 | Darkvision |
| **Immune** disease, poison; **Resist** 10 necrotic; **Vulnerable** 5 radiant | |
| **Traits** | |
| **Shadow Skulk** | |
| The ghoul flesh seeker can make a Stealth check to become hidden when it has cover or concealment instead of needing superior cover or total concealment. | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +9 vs. AC | |
| *Hit:* 1d6 + 4 damage, and the target is immobilized (save ends). | |
| ⸸ **Prepare for Sacrifice** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature the flesh seeker was hidden from at the start of the flesh seeker's turn); +9 vs. AC | |
| *Hit:* 2d6 + 4 damage, and the flesh seeker knocks the target prone and grabs it. The target takes a –2 penalty to attempts to escape the grab and cannot stand up until the grab ends. | |
| ⸸ **Render unto Orcus** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one prone creature grabbed by the flesh seeker); +9 vs. AC | |

### Ghoul Flesh Seekers in Combat

Whether in full battle or stalking the streets concealed in heavy robes, a flesh seeker hangs back in the shadows. It targets lone foes at the edge of the fray, leaping out from hiding to pin its victims to the ground. Under the flesh seeker's inhuman grasp, an enemy is quickly hacked to death as a sacrifice in Orcus's name.

Woodrow Hinton III

# Adept of Orcus

In the dark shrine, they spoke in whispers of the fallen priest who had died with a prayer to Orcus on his lips. He might have remained dead, his soul to become a plaything of Orcus, except that he had killed and consumed a priest of Bahamut when he was alive. After his death, he underwent a horrid and unholy transformation. Now, as he rises again, the priest's gruesome form strikes terror even into the hearts of his former faithful.

**Adept of Orcus** **Level 6 Controller (Leader)**
Medium natural humanoid (undead), ghoul XP 250

**HP** 71; **Bloodied** 35 **Initiative** +7
**AC** 20, **Fortitude** 16, **Reflex** 19, **Will** 18 **Perception** +5
**Speed** 8 Darkvision
**Immune** disease, poison; **Resist** 10 necrotic; **Vulnerable** 5 radiant

**Traits**

**Uneasy Grave ✦ Aura** 5
Any nonminion ghoul ally within the aura that drops to 0 hit points becomes a zombie rotter (*Monster Manual*, page 274) at the start of its next turn.

**Standard Actions**

**Claw ✦ At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 2d6 + 4 damage, and the target is immobilized (save ends).

**Grave Grasp** (implement) **✦ At-Will**
*Attack:* Ranged 5 (one creature); +9 vs. Reflex
*Hit:* The target is restrained (save ends).

**Call to Feast** (implement) **✦ Recharge** ⚄ ⚅
*Attack:* Ranged 5 (one creature); +9 vs. Will
*Hit:* The target is immobilized (save ends). One of the adept's allies that is adjacent to the target can make a melee basic attack against the target as a free action.

**Grave Dust Cloud** (implement, necrotic, zone) **✦ Encounter**
*Attack:* Area burst 1 within 5 (living creatures in burst); +9 vs. Fortitude
*Hit:* 2d6 + 7 necrotic damage.
*Effect:* The burst creates a zone that lasts until the end of the encounter. Any living creature that enters the zone or ends its turn there takes 5 necrotic damage.

**Skills** Religion +9, Stealth +12
**Str** 14 (+5) **Dex** 19 (+7) **Wis** 14 (+5)
**Con** 15 (+5) **Int** 12 (+4) **Cha** 17 (+6)
**Alignment** chaotic evil **Languages** Abyssal, Common
**Equipment** rod, holy symbol of Orcus

## Adepts of Orcus in Combat

An adept chants the *Litanies of Flesh Devoured*—a series of oaths dedicated to Orcus—while it attempts to prepare the enemy's flesh for consumption. As the adept's raspy voice echoes across the battlefield, it paralyzes enemies to allow its undead allies to mob them.

# Ghast

The rogue thought herself clever when she opened the leaden doors to the lost tomb, saw a dozen slavering ghouls in the antechamber, and quickly sealed the sepulcher. Ten years later—long enough for the ghouls to starve to death, according to her research—she returned to the place. True, the ghouls had met their end. However, their transformation into ghasts wasn't something she hadn't accounted for.

**Ghast** **Level 6 Brute**
Medium natural humanoid (undead) XP 250

**HP** 85; **Bloodied** 42 **Initiative** +6
**AC** 18, **Fortitude** 18, **Reflex** 17, **Will** 16 **Perception** +5
**Speed** 6 Darkvision
**Immune** disease, poison; **Resist** 10 necrotic; **Vulnerable** 5 radiant

**Traits**

**Stench of Death ✦ Aura** 1
Any living creature that starts its turn within the aura is slowed until the end of the ghast's next turn.

**Standard Actions**

**Bite ✦ At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 1d12 + 6 damage, and the target is immobilized until the end of the ghast's next turn.

**Rabid Claws ✦ At-Will**
*Effect:* The ghast makes the following attack twice.
*Attack:* Melee 1 (one immobilized creature); +11 vs. AC
*Hit:* 1d12 + 4 damage.

**Devouring Bite ✦ Recharge** if the power misses
*Attack:* Melee 1 (one immobilized or unconscious creature); +11 vs. AC
*Hit:* 3d12 + 7 damage.

**Triggered Actions**

**Death Burst** (necrotic)
*Trigger:* The ghast drops to 0 hit points.
*Attack (No Action):* Close burst 2 (living creatures in burst); +9 vs. Fortitude
*Hit:* 1d12 + 5 necrotic damage, and ongoing 5 necrotic damage (save ends).

**Skills** Athletics +12, Stealth +11
**Str** 19 (+7) **Dex** 16 (+6) **Wis** 14 (+5)
**Con** 15 (+5) **Int** 7 (+1) **Cha** 13 (+4)
**Alignment** chaotic evil **Languages** Common

## Ghasts in Combat

When ghouls go too long without humanoid flesh, they rot away from the inside out. The insatiable hunger that accompanies this transformation grants ghasts a desperate strength and ferocity. A ghast's awful stench sickens and slows its enemies, allowing it to quickly overwhelm creatures attempting to flee. Ghasts hunt in packs, teaming up on defenders to turn even the most powerful warrior into a horrid feast.

Fire giant society values power and might above all else. Although most fire giants revere the discipline of muscle and steel, others of their kind instead follow paths of mysticism and magic.

## Lore

**History DC 25:** In a long-lost age, mighty strongholds built on the rims of volcanoes served as the centers of power of a fire giant empire. Allied with the efreets, the fire giants enslaved many humanoid races. The labor of dragonborn, humans, and orcs helped build vast fortresses and roads, and the magic of drow and tieflings aided in creating a portal network linking the great fire giant citadels.

Though their empire fell long ago, fire giants yearn to reclaim this lost heritage. Exploring their fallen fortresses, the giants hope to reignite the portal system and create a staging ground for an invasion of their former territories. However, since fire giants have little interest in or aptitude for the rituals involved in reactivating the magic, they seek slaves to do their bidding.

## Encounters

Fire giants think of themselves as the lords of flame. In truth, however, they hold only a middling amount of power. Though they are able to command azers, hell hounds, and magma beasts, fire giants are often subservient to more powerful creatures of flame such as red dragons, efreets, devils, and fire titans. Whether they lead or follow, fire giants believe first and foremost in their own superiority. As a result, they typically take on the role of brutal and bullying commanders, or of untrustworthy and vacillating subordinates.

## Fire Giant Lavamaster

They had faced fire giants in combat enough times, but this war band was led by lavamasters. Shapers of fire, lavamasters upheld ancient traditions dating from the Dawn War. Those traditions served them well on the battlefield that day, as the adventurers' assault was driven back time and again. Calling on the power of elemental fire, the lavamasters unleashed flames that scoured foes and empowered allies.

**Fire Giant Lavamaster** **Level 17 Controller (Leader)**
Large elemental humanoid (giant) XP 1,600

**HP** 164; **Bloodied** 82 **Initiative** +12
**AC** 31, **Fortitude** 31, **Reflex** 27, **Will** 28 **Perception** +13
**Speed** 8
**Resist** 15 fire

**Traits**

☼ **Hearthflames** (fire, healing) ✦ **Aura** 2
Any enemy that enters the aura or ends its turn there takes 10 fire damage. Any bloodied ally of the lavamaster that starts its turn within the aura regains 10 hit points.

**Standard Actions**

⨭ **Molten Sword** (fire, weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +22 vs. AC
*Hit:* 2d10 + 4 fire damage.

**Magma Lash** (fire) ✦ **Recharge** when no creature is grabbed by the lavamaster
*Attack:* Ranged 5 (one creature); +20 vs. Reflex
*Hit:* 2d8 + 10 fire damage, and the lavamaster pulls the target 4 squares. If the target ends the pull adjacent to the lavamaster, the lavamaster grabs it.

**Magma Burst** (fire, zone) ✦ **At-Will**
*Attack:* Area burst 1 within 10 (enemies in burst); +20 vs. Fortitude
*Hit:* 2d6 + 10 fire damage.
*Effect:* The burst creates a zone that lasts until the end of the lavamaster's next turn. The zone is difficult terrain. Any enemy that enters the zone or ends its turn there takes 10 fire damage.

**Triggered Actions**

**Fiery Vendetta** ✦ **At-Will**
*Trigger:* An enemy grabbed by the lavamaster attacks it.
*Effect (Immediate Reaction):* The lavamaster or one of its allies can make a melee basic attack against the triggering enemy as a free action.

| | | |
|---|---|---|
| **Str** 24 (+15) | **Dex** 19 (+12) | **Wis** 21 (+13) |
| **Con** 20 (+13) | **Int** 15 (+10) | **Cha** 16 (+11) |

**Alignment** evil **Languages** Giant
**Equipment** chainmail, greatsword

### Fire Giant Lavamasters in Combat

Drawing forth the power of the fiery heart of the world, lavamasters shape the battlefield to their allies' advantage. A lavamaster stays in the thick of the fray initially. However, once its allies begin to flag, it retreats and focuses on using *magma burst* to hinder enemies while its own forces are rejuvenated within its *hearthflames* aura.

HOWARD LYON

# Fire Giant Flamedancer

The stories seemed unbelievable, telling of fire giants fighting with uncanny elemental grace. These so-called flamedancers were said to have forged alliances with the efreets long-ago, learning a devastating fighting style that fused their martial prowess with elemental magic.

| **Fire Giant Flamedancer** | **Level 18 Skirmisher** |
|---|---|
| Large elemental humanoid (giant) | XP 2,000 |
| **HP** 174; **Bloodied** 87 | **Initiative** +17 |
| **AC** 32, **Fortitude** 31, **Reflex** 29, **Will** 27 | **Perception** +13 |
| **Speed** 8 | |
| **Resist** 15 fire | |
| **Traits** | |
| **Nimble Reaction** | |
| The flamedancer gains a +4 bonus to AC against opportunity attacks. | |
| **Standard Actions** | |
| ⨺ **Whirling Spear** (fire, weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +23 vs. AC | |
| *Hit:* 2d8 + 8 fire damage, and the flamedancer shifts 2 squares. | |
| ⨺ **Double Attack** ✦ **At-Will** | |
| *Effect:* The flamedancer uses *whirling spear* twice, making each attack against a different target. | |
| **Move Actions** | |
| **Flameburst Leap** (fire, teleportation) ✦ **Encounter** | |
| *Effect:* The flamedancer teleports 8 squares. Any enemy adjacent to the flamedancer at the start of the teleport takes ongoing 10 fire damage (save ends). | |
| **Skills** Athletics +21, Acrobatics +20 | |
| **Str** 25 (+16) **Dex** 22 (+15) **Wis** 18 (+13) | |
| **Con** 22 (+15) **Int** 12 (+10) **Cha** 15 (+11) | |
| **Alignment** evil **Languages** Giant | |
| **Equipment** hide armor, spear | |

## Fire Giant Flamedancers in Combat

Tactics learned from the efreets allow a fire giant flamedancer to stay in constant motion on the battlefield, gracefully maneuvering its massive form as it repeatedly wades into its enemies. Its *whirling spear* appears ineffectual compared to the heavier weapons of its kin, but a flamedancer wields it with deadly skill. It reserves its *flameburst leap* for a surprise escape or a suicidal final attack.

# Fire Giant Smokecaller

Survivors of fire giant assaults tell many tales of the giants' brutality. Few have ever seen the more subtle tactics of the smokecallers, and even fewer have lived to tell of these deadly warriors. A fire giant smokecaller eschews the furious fighting of its kin, using its ability to manipulate smoke to take enemies by surprise. A smokecaller creates ashen smoke that spreads across the battlefield. For the warriors that face smokecallers, death lurks inside this unearthly haze.

| **Fire Giant Smokecaller** | **Level 19 Lurker** |
|---|---|
| Large elemental humanoid (giant) | XP 2,400 |
| **HP** 140; **Bloodied** 70 | **Initiative** +18 |
| **AC** 33, **Fortitude** 32, **Reflex** 31, **Will** 30 | **Perception** +13 |
| **Speed** 10 | |
| **Resist** 15 fire | |
| **Standard Actions** | |
| ⨺ **Smoldering Whip** (fire, weapon) ✦ **At-Will** | |
| *Attack:* Melee 5 (one creature); +22 vs. Reflex | |
| *Hit:* 3d8 + 10 fire damage, and the smokecaller pulls the target 3 squares. | |
| ⇢ **Cindersmoke** (fire) ✦ **At-Will** | |
| *Requirement:* The smokecaller must be within a *smokecloud* zone. | |
| *Attack:* Close blast 5 (enemies in blast); +22 vs. Fortitude | |
| *Hit:* 3d8 + 8 fire damage. | |
| *Effect:* The *smokecloud* zone ends. | |
| **Smokecloud** (zone) ✦ **Recharge** when this power ends | |
| *Effect:* The smokecaller creates a zone in a close burst 3 that lasts until the end of the smokecaller's next turn. The zone blocks line of sight for all creatures except the smokecaller. | |
| **Skills** Acrobatics +19, Stealth +19 | |
| **Str** 23 (+15) **Dex** 20 (+14) **Wis** 19 (+13) | |
| **Con** 20 (+14) **Int** 15 (+11) **Cha** 15 (+11) | |
| **Alignment** evil **Languages** Giant | |
| **Equipment** chainmail, whip | |

## Fire Giant Smokecallers in Combat

Smokecallers employ the typical tactics of scouts, spies, and sneaks. An initial *smokecloud* allows a smokecaller to fall back while its bolder kin storm the battlefield. It then strikes from concealment, focusing on opponents it can blind with *cindersmoke* or pull close with *smoldering whip*.

# GIANT, FROST

A remote village is found deserted after a brutal winter; the spring's first lambs succumb to a late, bitter frost; autumn crops fall to frigid winds instead of to the scythe. Amid these portents, peasants glance toward the northern mountains and speak in whispers of the frost giants. Then they ready themselves for a battle they cannot hope to win.

## Lore

**Arcana DC 25:** Once powerful servants of the primordials, the frost giants were released into the world to wage war against the gods and their servants. They dwell in frozen peaks and snowy wastes, where they foster a hatred of the warmth of the mortal world. Emerging from their fortresses of ice and stone, frost giants raid settled lands or venture out to sea in ice-carved longships. Frost giants are also sometimes encountered sailing similar ships on the roiling seas of the Elemental Chaos.

Frost giant raids are devastating, and many humanoids fear that such attacks on civilized lands are a part of a greater plan. The frost giants are rumored to be constantly working toward some mandate passed down from their long-vanquished primordial masters.

## Encounters

Although frost giants ally with storm giants and ice archons (particularly in the Elemental Chaos), they typically keep their own counsel. Fiercely devoted to their primordial heritage, frost giants never interact with servants of the gods, and they avoid the creatures of the natural world except those they take as servants and slaves. Minotaurs, dragonborn, goliaths, and warforged are commonly found as slaves of frost giants. Most other races are too weak to survive long in the giants' frigid fortresses.

## Frost Giant Berserker

They came in a frenzy, moving so quickly that the garrison could scarcely count their numbers. They attacked not with a coordinated frontal assault but with hit-and-run tactics. They howled and hooted as they went, leaving none living in their wake.

| **Frost Giant Berserker** | **Level 16 Skirmisher** |
|---|---|
| Large elemental humanoid (cold, giant) | XP 1,400 |
| **HP** 157; **Bloodied** 78 | **Initiative** +17 |
| **AC** 30, **Fortitude** 26, **Reflex** 29, **Will** 28 | **Perception** +14 |
| **Speed** 8 (ice walk) | |
| **Resist** 15 cold | |
| **Traits** | |
| **Icebound Footing** | |
| When an effect pulls, pushes, or slides the berserker, it moves 2 squares less than the effect specifies. In addition, the berserker can make a saving throw to avoid falling prone. | |
| **Standard Actions** | |
| ⊕ **Freezing Greataxe** (cold, weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +21 vs. AC | |
| *Hit:* 1d12 + 10 damage plus 2d6 cold damage. | |
| ⸸ **Storm Charge** (cold, weapon) ✦ **At-Will** | |
| *Effect:* The berserker charges without provoking opportunity attacks and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 2 (one creature); +22 vs. AC | |
| *Hit:* 2d12 + 12 damage. | |
| ⸸ **Primordial Rage** ✦ **Encounter** | |
| *Effect:* The berserker shifts its speed and uses *freezing greataxe* three times during the shift, making each attack against a different target. | |
| **Move Actions** | |
| **Giant Stride** ✦ **Recharge** ⚁ ⚂ ⚀ | |
| *Effect:* The berserker shifts 6 squares and can move through enemies' spaces during the shift. | |
| **Skills** Athletics +20 | |
| **Str** 19 (+12) **Dex** 25 (+15) **Wis** 22 (+14) | |
| **Con** 21 (+13) **Int** 15 (+10) **Cha** 16 (+11) | |
| **Alignment** evil **Languages** Giant | |
| **Equipment** hide armor, greataxe | |

### Frost Giant Berserkers in Combat

Frost giants too young or undisciplined to join the ranks of their clan's warriors fall back on sheer brutality. A frost giant berserker throws itself into the fray, moving unhindered through foes. What it lacks

VINCENT DUTRAIT

in tactical sense, a berserker makes up for in sheer destructive force.

## Frost Giant Shield Bearer

The first wave of brutish frost giant warriors is bad enough, but when the shield bearers arrive hard on their heels, that spells doom for defenders. These powerful and loyal warriors are the protectors of a frost giant chieftain. They represent the killing stroke of a raiding party.

| **Frost Giant Shield Bearer** | **Level 18 Soldier** |
|---|---|
| Large elemental humanoid (cold, giant) | XP 2,000 |
| **HP** 174; **Bloodied** 87 | **Initiative** +17 |
| **AC** 34, **Fortitude** 32, **Reflex** 31, **Will** 28 | **Perception** +14 |
| **Speed** 8 (ice walk) | |
| **Resist** 15 cold | |
| **Traits** | |
| **Coordinated Attack** | |
| The shield bearer has combat advantage against an enemy while another frost giant shield bearer is adjacent to that enemy. | |
| **Icebound Footing** | |
| When an effect pulls, pushes, or slides the shield bearer, it moves 2 squares less than the effect specifies. In addition, the shield bearer can make a saving throw to avoid falling prone. | |
| **Standard Actions** | |
| **Icy Battleaxe** (cold, weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +23 vs. AC | |
| *Hit:* 3d10 + 10 cold damage, and the target is marked until the end of the shield bearer's next turn. | |
| **Protective Strike** ✦ **Encounter** | |
| *Effect:* The shield bearer uses *icy battleaxe*. On a hit, the attack deals 10 extra cold damage, and one ally within 10 squares of the shield bearer gains 25 temporary hit points. | |
| **Minor Actions** | |
| **Defensive Stand** ✦ **At-Will** (1/round) | |
| *Effect:* Choose one enemy within 10 squares of the shield bearer that is not marked by it. If that enemy moves adjacent to the shield bearer before the end of the shield bearer's next turn, the shield bearer can use *icy battleaxe* against the enemy as a free action. | |
| **Skills** Athletics +21, Intimidate +16 | |
| **Str** 24 (+16) **Dex** 22 (+15) **Wis** 20 (+14) | |
| **Con** 22 (+15) **Int** 15 (+11) **Cha** 14 (+11) | |
| **Alignment** evil **Languages** Giant | |
| **Equipment** hide armor, heavy shield, battleaxe | |

### Frost Giant Shield Bearers in Combat

Frost giant shield bearers let nothing stand in their way on the battlefield, and they fight to the death in the defense of their clan's territory or chieftain. A shield bearer stays close to its allies in melee, maximizing the effectiveness of *coordinated attack* and *protective strike*.

## Frost Giant Chieftain

A sudden blizzard seals a mountain pass, trapping travelers in a shroud of howling wind. Through the storm comes the sound of booming laughter. The voice of a frost giant chieftain announces that these peaks belong to its people, and that all others who journey there must surrender or die. Of course, those who surrender might be killed anyway as cowards.

| **Frost Giant Chieftain** | **Level 20 Controller** |
|---|---|
| Large elemental humanoid (cold, giant) | XP 2,800 |
| **HP** 190; **Bloodied** 95 | **Initiative** +15 |
| **AC** 34, **Fortitude** 33, **Reflex** 29, **Will** 30 | **Perception** +14 |
| **Speed** 8 (ice walk) | |
| **Resist** 15 cold | |
| **Traits** | |
| **Emanating Cold** ✦ **Aura** 2 | |
| Enemies within the aura grant combat advantage to cold creatures. | |
| **Icebound Footing** | |
| When an effect pulls, pushes, or slides the chieftain, it moves 2 squares less than the effect specifies. In addition, the chieftain can make a saving throw to avoid falling prone. | |
| **Standard Actions** | |
| **Icy Greataxe** (cold, weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +25 vs. AC | |
| *Hit:* 2d12 + 5 cold damage. | |
| **Eye of the Storm** (cold) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +23 vs. Reflex | |
| *Hit:* 2d8 + 9 cold damage, and the target takes ongoing 10 cold damage and is slowed (save ends both). | |
| **Minor Actions** | |
| **Pillar of Ice** ✦ **At-Will** (1/round) | |
| *Effect:* The chieftain creates a Medium or Large pillar of ice on a solid surface in an unoccupied square within 10 squares of it. The pillar occupies the space in which it's created, and it lasts until the end of the chieftain's next turn. Any enemy that starts its turn adjacent to the pillar is slowed until the start of its next turn. The pillar blocks line of sight, and while adjacent to the pillar, an enemy grants combat advantage. | |
| **Grip of Winter** (cold, zone) ✦ **Recharge** when first bloodied | |
| *Effect:* The chieftain creates a zone in an area burst 2 within 10 squares that lasts until the end of the encounter. The zone is difficult terrain, and any enemy that ends its turn within the zone takes 15 cold damage. | |
| **Skills** Athletics +22, Intimidate +21 | |
| **Str** 25 (+17) **Dex** 20 (+15) **Wis** 18 (+14) | |
| **Con** 22 (+16) **Int** 15 (+12) **Cha** 23 (+16) | |
| **Alignment** evil **Languages** Giant, Primordial | |
| **Equipment** hide armor, greataxe | |

### Frost Giant Chieftains in Combat

A frost giant chieftain uses its elemental powers to reshape the battlefield and hinder its foes. From behind the protection of shield bearers, the chieftain creates pillars of ice and zones of deadly frost.

# Giant, Hill

Caravan drivers plying ancient roads know the wisdom of employing strong bands of guards. On the immediate outskirts of civilization, bandits are a constant threat—but the deeper wilds hold far more deadly dangers. Countless draft horses have ended up on the roasting spit of a hill giant band—as have many merchants who didn't heed the reputation of these giants.

## Lore

**Nature DC 21:** Like all of giantkind, hill giants were created by the primordials as warriors in their battles against the gods. While fire giants and frost giants cling to shreds of their former purpose and a hatred of mortal humanoids, hill giants have long since accepted life in the natural world. Hill giant clans even engage in trade and long-term relations with brutish humanoid tribes.

Though most giants are brutish and coarse, hill giants are particularly unrefined and unpredictable. The race's minimal social skills inhibit the creation of hill giant societies. Most hill giant groups consist of a single family. On the rare occasions when hill giants band together under the leadership of a powerful chief, their lairs (known as steadings) resound with near-constant quarreling and infighting. In many cases, boisterous hill giants all but ignore the sound of attackers within their own homes.

## Encounters

Hill giants are not well regarded by the rest of giantkind, because they long ago turned their backs on their primordial origin and purpose. Though hill giants are sometimes employed as thugs and minions by storm giants or death giants, the relationship is always rocky. Hill giants avoid the inclement environments favored by frost giants and fire giants. However, those giants sometimes take hill giants as slaves.

Hill giants are found in the ranks of evil humanoid armies or raiding bands, where they serve as frontline troops. The smasher is the hill giant most likely to ally with humanoid tribes, accepting service with any evil humanoid that can promise a steady food supply. However, when marching under the banner of Bane, Gruumsh, or another god, the giants often turn against their allies, perhaps out of some ancient fragment of loyalty to their primordial creators.

## Hill Giant Smasher

The goblin bandits of the borderlands were scarcely a match for the human militia that guarded the settlement. However, when the goblin chief launched his most recent attack, he revealed a new weapon—a hill giant smasher. The giant cut through the defenders' ranks with brutal efficiency, and soon word had spread of the town's slaughtered inhabitants.

CHIPPY

| **Hill Giant Smasher** | **Level 11 Brute** |
|---|---|
| Large natural humanoid (giant) | XP 600 |
| **HP** 137; **Bloodied** 68 | **Initiative** +7 |

| **Str** 21 (+10) **Dex** 14 (+7) **Wis** 16 (+8) | |
| **Con** 17 (+8) **Int** 7 (+3) **Cha** 11 (+5) | |
| **Alignment** chaotic evil **Languages** Giant | |
| **Equipment** hide armor, greatclub | |

## Hill Giant Smashers in Combat

A paragon of rage and violence, the hill giant smasher is frequently recruited into the ranks of brutish humanoid forces. Though its allies might worry about tactics, the smasher is most effective when rampaging unpredictably through enemy ranks.

# Hill Giant Rockthrower

Frontier scouts move warily through the foothills. When they spy a single hill giant hiding beneath a low bluff, they charge the lone bandit, intent on ending its harassment of local caravans. Before they can reach the giant, a barrage of boulders rains down. Shouting in triumph, the rockthrowers rise from their hiding places, and the real assault begins.

| **Hill Giant Rockthrower** | **Level 12 Artillery** |
|---|---|
| Large natural humanoid (giant) | XP 700 |
| **HP** 97; **Bloodied** 48 | **Initiative** +10 |
| **AC** 24, **Fortitude** 25, **Reflex** 25, **Will** 22 | **Perception** +9 |
| **Speed** 8 | |
| **Standard Actions** | |
| **Greatclub** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +17 vs. AC | |
| *Hit:* 2d10 + 4 damage. | |
| **Knockdown Throw** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 10/20 (one creature); +17 vs. Reflex | |
| *Hit:* 2d8 + 7 damage, and the rockthrower pushes the target 2 squares or knocks it prone. | |
| **Shattering Rockburst** (weapon) ✦ **Recharge** ⚅ ⚅ | |
| *Attack:* Area burst 1 within 10 (creatures in burst); +17 vs. Fortitude | |
| *Hit:* 2d8 + 6 damage, and the target is dazed (save ends). | |
| **Skills** Athletics +17 | |
| **Str** 22 (+12) **Dex** 18 (+10) **Wis** 16 (+9) | |
| **Con** 19 (+10) **Int** 9 (+5) **Cha** 14 (+8) | |
| **Alignment** chaotic evil **Languages** Giant | |
| **Equipment** hide armor, greatclub, 10 rocks | |

## Hill Giant Rockthrowers in Combat

A hill giant rockthrower prefers high ground that offers clear sight of its enemies, usually behind a stretch of rough terrain or atop a cliff. When ambushing, a rockthrower leads with *shattering rockburst* to disrupt its foes' tactics. The giant then targets mobile foes with *knockdown throw*, thwarting the enemy's attempts to close for melee.

# Hill Giant Avalancher

When the hill giants were first spotted, the patrol welcomed the fight. This was their sixth sortie in as many days. Each time, these great brutes had been predictable, and the fast-moving knights had cut them down. The final fight was different, though. Those who survived the battle cursed the hill giant avalanchers, who fell on them in a barrage of rocks and crushing club attacks. The survivors warned their comrades about these new foes, who were as tough as any other hill giant and much more cunning.

| **Hill Giant Avalancher** | **Level 14 Skirmisher** |
|---|---|
| Large natural humanoid (giant) | XP 1,000 |
| **HP** 139; **Bloodied** 69 | **Initiative** +15 |
| **AC** 28, **Fortitude** 25, **Reflex** 27, **Will** 24 | **Perception** +10 |
| **Speed** 8 | |
| **Standard Actions** | |
| **Greatclub** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +19 vs. AC | |
| *Hit:* 2d10 + 11 damage. | |
| **Rolling Rock** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 8 (one creature); +17 vs. Reflex | |
| *Hit:* 2d10 + 4 damage, and the avalancher slides the target 4 squares and knocks it prone. | |
| **Crushing Charge** (weapon) ✦ **Recharge** ⚅ ⚅ ⚅ | |
| *Effect:* The avalancher charges and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 1 (one creature); +20 vs. AC | |
| *Hit:* 2d10 + 11 damage, and the target falls prone. | |
| **Move Actions** | |
| **Stomping Shift** ✦ **At-Will** | |
| *Effect:* The avalancher shifts 4 squares and can move through prone enemies' spaces. Each time the avalancher enters a prone enemy's space for the first time during the shift, that enemy takes 8 damage. | |
| **Skills** Athletics +17 | |
| **Str** 21 (+12) **Dex** 23 (+13) **Wis** 17 (+10) | |
| **Con** 19 (+11) **Int** 15 (+9) **Cha** 11 (+7) | |
| **Alignment** chaotic evil **Languages** Giant | |
| **Equipment** hide armor, greatclub | |

## Hill Giant Avalanchers in Combat

An avalancher avoids direct confrontation with powerful combatants. It prefers to take out enemies that are weak or on the ground. The giant uses *crushing charge* as its default attack, but it uses *rolling rock* to break up ranged attacks or target spellcasters at the edge of the fray. Avalanchers take advantage of their kin's predictable tactics, using *stomping shift* to plow through foes at every opportunity.

# Girallon

The dreaded girallon is a vicious predator whose hunting grounds are marked by the horrid remains of its victims. At home in dark forests and dread ruins, a girallon hunts not just for food but also for the sheer pleasure of slaughter. In territories where girallons are known to roam, humanoid patrols follow a simple rule: Advance with caution, and at the first sign of blood or viscera, run for your lives.

## Lore

**Nature DC 25:** Entering a girallon's territory is never an easy task, and many guides and trackers refuse to lead outsiders into such areas. The fearful silence of a girallon-inhabited area casts a pall over the forest, and in girallon hunting grounds, blood stains even the highest branches.

Girallons typically keep to the trees, watching for prey from on high. Though of low intelligence, girallons demonstrate extreme cunning. They create trails through undergrowth to herd victims into an ambush.

Some humanoid tribes worship girallons as flesh-bound demons whose wrath must be appeased. By leaving out fresh meat for these beasts, the tribesfolk are able to lair within girallon hunting grounds.

Though girallons are at home in the trees, their great bulk makes sleeping there difficult. The creatures seek out caves and ruins for their lairs. Numerous ancient maps pointing to some lost hoard have inadvertently led treasure seekers into a sleeping girallon, which, upon waking, finds an easy meal.

Infernal girallons were originally bred by servants of Mephistopheles. The endless battles of the Blood War caused these creatures to become dispersed across the planes.

## Encounters

Their savage nature means that girallons never willingly seek out allies. However, creatures such as hill giants, trolls, and fomorians hunt and capture these beasts for use as pets and guards. Such brutish creatures are the only ones capable of doling out the regular, near-fatal beatings needed to win a girallon's subservience.

Girallons raised from a young age can be more easily trained. Renegade spellcasters, temples dedicated to Gruumsh and Bane, and the cults of savage demons such as Baphomet and Yeenoghu acquire girallon young to train as guards and fighting beasts.

Roving packs of infernal girallons haunt the Elemental Chaos and the Nine Hells, where powerful elementals, immortals, and cultists sometimes manage to tame them as beasts of war.

## Girallon Marauder

Unlike other girallons, marauders know no boundaries. These young girallons leave their packs at an early age, for tarrying means ending up as meals for their parents. A girallon marauder roams freely until it grows to become a girallon alpha. Some travelers fear marauders more than other girallons, because they lack the predictable behavior of their kin.

| **Girallon Marauder** | **Level 12 Brute** |
|---|---|
| Large natural beast | XP 700 |
| **HP** 145; **Bloodied** 72 | **Initiative** +11 |
| **AC** 24, **Fortitude** 24, **Reflex** 23, **Will** 22 | **Perception** +10 |
| **Speed** 8, climb 6 | |

ERIC L. WILLIAMS

## Girallon Marauders in Combat

A girallon marauder wades into the midst of its enemies, allowing itself to be flanked or surrounded so that it can attack as many targets as possible. A marauder takes advantage of its superior climbing skill to move around the battlefield or surprise foes.

# Girallon Alpha

Among some of the savage humanoid tribes of the deepest forests that fear girallons, the fear transforms into a kind of dark worship. The powerful alpha is revered as a spiritual gatekeeper. When the oldest hunters of the tribe near the end of life, they might journey out into the jungle rather than suffer infirmity. Undergoing a solemn ritual of passage, they leave their people for one last hunt, stalking the deadly girallon alpha. When a hunter finds an alpha, the beast grants the hunter a worthy death.

| **Girallon Alpha** | **Level 17 Brute** |
|---|---|
| Large natural beast | XP 1,600 |
| **HP** 195; **Bloodied** 97 | **Initiative** +14 |
| **AC** 29, **Fortitude** 29, **Reflex** 28, **Will** 27 | **Perception** +17 |

| **Alignment** chaotic evil **Languages** – | |

## Girallon Alphas in Combat

The alpha is the most dangerous of natural girallons, tearing into its foes with a rabid intensity. In its forest home, an alpha travels through the trees, dropping to the ground in the midst of its enemies. This bloodthirsty hunter stays in the thick of combat to take on as many targets as possible, using *whirling claws* to drag foes close.

# Infernal Girallon

The Blood War between devils and demons is little more than legend in the mortal world, but sages warn that fiendish ruins hold dark reminders of that deadly conflict. The legendary infernal girallons were bred to serve as slave troops. Their considerable bloodlust became enhanced as they were warped and twisted by devilish power. Adventurers who scoff at such tales rarely return from the infernal ruins they hope to plunder.

| **Infernal Girallon** | **Level 22 Brute** |
|---|---|
| Large immortal beast (devil) | XP 4,150 |
| **HP** 249; **Bloodied** 124 | **Initiative** +18 |
| **AC** 34, **Fortitude** 34, **Reflex** 30, **Will** 32 | **Perception** +16 |
| **Speed** 8, climb 6 | Darkvision |
| **Traits** | |
| ☼ **Threatening Claws ✦ Aura** 1 | |
| Enemies within the aura grant combat advantage. | |
| ☼ **Burning Soul** (fire) **✦ Aura** 2 | |
| Any enemy that starts its turn within the aura takes 10 fire damage, or 20 fire damage if the girallon is bloodied. | |
| **Combat Climber** | |
| The infernal girallon does not provoke opportunity attacks by climbing. | |
| **Standard Actions** | |
| ⊕ **Claw ✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +26 vs. AC | |
| *Hit:* 3d12 + 10 damage. | |
| ⸸ **Claw Flurry ✦ At-Will** | |
| *Effect:* The alpha makes the following attack four times. | |

| **Alignment** chaotic evil **Languages** – | |

## Infernal Girallons in Combat

Fire flares around an infernal girallon, searing enemies that stand against these creatures. An infernal girallon throws itself against the most powerful opponents, allowing itself to be surrounded so that its *claw flurry* and *burning ichor* devastate the largest number of foes.

# GNOLL

Accounts from the hollow-eyed survivors of gnoll raids paint a similar picture of death and destruction. As gnoll packs grow in number and strike deeper into settled lands, fear spreads with the sound of their cackling laughter echoing through the night.

## Lore

**Nature DC 17:** Packs of gnolls war against each other constantly, usually when one group encroaches on another's hunting grounds. The victors of these battles sometimes take survivors from the losing pack as slaves, treating them with the same cruelty as they do the slaves of other races.

The chosen of Yeenoghu are the seers and mystics of a pack. They compete with the war fangs for the ear of their leaders. The chosen are often responsible for raids and other despicable acts performed in the name of their demon lord.

## Encounters

Gnolls have no natural allies aside from the hyenas they train as beasts of war. However, when cults to Yeenoghu arise among other cultures, gnolls can contain their violent tendencies long enough to form alliances. More commonly, gnolls appear as mercenaries and brigands after breaking with their war bands.

ARNIE SWEKEL

## Gnoll Skulker

Gnoll skulkers are the runts of gnoll bloodlines. They lurk at the edge of the fray, striking only when their more powerful kin force them forward. Even when they are driven by fear, their blades form a wall of blood and steel that is not easily broken.

| **Gnoll Skulker** | **Level 5 Lurker** |
|---|---|
| Medium natural humanoid | XP 200 |
| **HP** 51; **Bloodied** 25 | **Initiative** +10 |
| **AC** 19, **Fortitude** 17, **Reflex** 19, **Will** 15 | **Perception** +4 |
| **Speed** 7 | Low-light vision |
| **Traits** | |
| **Peerless Camouflage** | |
| The skulker can make a Stealth check to become hidden when it has cover or concealment instead of needing superior cover or total concealment. If the skulker is hidden from one or more creatures and moves to a square that does not provide it any cover or any concealment, it remains hidden from those creatures until the start of its next turn. | |
| **Something to Prove** | |
| The skulker deals 5 extra damage on ranged and melee attacks against a target that has none of the skulker's allies adjacent to it. | |
| **Standard Actions** | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +10 vs. AC | |
| *Hit:* 2d4 + 8 damage. | |
| **Shortbow** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 15/30 (one creature); +10 vs. AC | |
| *Hit:* 2d8 + 4 damage. | |
| **Triggered Actions** | |
| **Hit and Run** ✦ **At-Will** | |
| *Requirement:* The skulker must be hidden. | |
| *Trigger:* The skulker hits with *shortbow*. | |
| *Effect (Free Action):* The skulker shifts 2 squares. | |
| **Skills** Stealth +11 | |
| **Str** 18 (+6) **Dex** 19 (+6) **Wis** 15 (+4) | |
| **Con** 15 (+4) **Int** 15 (+4) **Cha** 14 (+4) | |
| **Alignment** chaotic evil **Languages** Abyssal, Common | |
| **Equipment** dagger, shortbow, 20 arrows | |

### Gnoll Skulkers in Combat

Skulkers start a fight by sniping from the edge of combat. A skulker is easily daunted by its allies, so it avoids attacking foes that are engaged in combat with other gnolls.

## Gnoll War Fang

The attackers had almost broken through the gnoll defenses when the war fang appeared. Clad in heavy armor scarred with demonic sigils, the sinister champion of Yeenoghu raised the pack's standard and howled a challenge that was echoed by the other surviving gnolls.

| **Gnoll War Fang** | **Level 6 Soldier (Leader)** |
|---|---|
| Medium natural humanoid | XP 250 |
| **HP** 72; **Bloodied** 36 | **Initiative** +7 |
| **AC** 22, **Fortitude** 17, **Reflex** 16, **Will** 20 | **Perception** +5 |
| **Speed** 7 | Low-light vision |

**Traits**

**☼ War Fang Defense ✦ Aura** 1
Allies within the aura gain a +2 bonus to AC.

**Pack Attack**
The war fang's melee attacks deal 5 extra damage against an enemy that has two or more gnoll allies adjacent to it.

**Standard Actions**

**⨺ Longsword** (weapon) **✦ At-Will**
*Attack:* Melee 1 (one creature); +13 vs. AC
*Hit:* 1d8 + 6 damage, or 1d8 + 10 while the war fang is bloodied.

**Minor Actions**

**Demonic Challenge** (fire) **✦ At-Will** (1/round)
*Effect:* The war fang marks one enemy within 3 squares until the end of the enconter or until the war fang uses this power again. Until the mark ends, whenever the marked enemy makes an attack that does not include the war fang as a target, the marked enemy takes 10 fire damage.

**Triggered Actions**

**No Mercy ✦ At-Will**
*Trigger:* An enemy misses the war fang with a melee attack.
*Effect (Immediate Reaction):* One ally adjacent to the triggering enemy can make a melee basic attack against it as a free action.

**Skills** Intimidate +12

| | | |
|---|---|---|
| **Str** 19 (+7) | **Dex** 14 (+5) | **Wis** 15 (+5) |
| **Con** 16 (+6) | **Int** 16 (+6) | **Cha** 18 (+7) |

**Alignment** chaotic evil **Languages** Abyssal, Common
**Equipment** plate armor, longsword

## Gnoll War Fangs in Combat

A war fang fights from behind the front ranks, goading its charges forward. When battle is met, a war fang targets the most powerful enemy defenders and strikers.

# Chosen of Yeenoghu

The advancing gnoll was a wretched figure, bent with age and cloaked in moldering humanoid skins. When it raised its staff and gave a bark, four howling shapes rose from the shadows around it. The pack of undead hyenas then spread out to devour foes.

| **Chosen of Yeenoghu** | **Level 7 Elite Controller** |
|---|---|
| Medium natural humanoid, gnoll | XP 600 |
| **HP** 156; **Bloodied** 78 | **Initiative** +5 |
| **AC** 21, **Fortitude** 19, **Reflex** 17, **Will** 19 | **Perception** +8 |
| **Speed** 7 | Low-light vision |
| **Saving Throws** +2; **Action Points** 1 | |

**Traits**

**Pack Attack**
The chosen of Yeenoghu's melee attacks deal 5 extra damage against an enemy that has two or more gnoll allies adjacent to it.

**Standard Actions**

**⨺ Staff** (weapon) **✦ At-Will**
*Attack:* Melee 1 (one creature); +12 vs. AC
*Hit:* 2d8 + 4 damage.

**⨳ Bolt of Ruination** (implement, necrotic, teleportation) **✦ At-Will**
*Attack:* Ranged 5 (one creature); +10 vs. Fortitude
*Hit:* 2d6 + 4 necrotic damage, and one hyena spirit within 10 squares of the chosen teleports to a square adjacent to the target.

**Minor Actions**

**Call Beyond the Grave ✦ Encounter**
*Effect:* Four hyena spirits appear in unoccupied squares within 10 squares of the chosen. The chosen takes 5 damage whenever one of its hyena spirits drops to 0 hit points. The spirits disappear at the end of the encounter.

**Hyena Spirit ✦ At-Will** (1/round)
*Effect:* One hyena spirit appears in an unoccupied square within 10 squares of the chosen. The chosen takes 5 damage when the hyena spirit drops to 0 hit points. The spirit disappears at the end of the encounter.

**Spirit Strike ✦ At-Will** (1/round)
*Effect:* One hyena spirit within 10 squares of the chosen can make a *bite* attack as a free action, with a +2 bonus to the attack roll.

**To the Front** (teleportation) **✦ At-Will** (1/round)
*Effect:* Each ally adjacent to the chosen can teleport 10 squares.

**Skills** Arcana +13, Religion +13

| | | |
|---|---|---|
| **Str** 16 (+6) | **Dex** 14 (+5) | **Wis** 20 (+8) |
| **Con** 14 (+5) | **Int** 20 (+8) | **Cha** 17 (+6) |

**Alignment** chaotic evil **Languages** Abyssal, Common
**Equipment** hide armor, staff

## Chosen of Yeenoghu in Combat

A chosen of Yeenoghu fights from the back, teleporting gnolls into the fray. A chosen calls up hyena spirits to form a protective cordon around it.

# Hyena Spirit

A hyena spirit is the undead vestige of a prized gnoll war beast. Bound to a tribe by dark magic, it continues to fight on after death.

| **Hyena Spirit** | **Level 7 Minion Soldier** |
|---|---|
| Medium shadow beast (undead) | XP 75 or 0 if created by the chosen of Yeenoghu |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +9 |
| **AC** 21, **Fortitude** 19, **Reflex** 19, **Will** 17 | **Perception** +5 |
| **Speed** 8 | Darkvision |

**Traits**

**☼ Spectral Jaws ✦ Aura** 1
Any enemy that starts its turn within the aura is slowed until the end of its next turn.

**Standard Actions**

**⨺ Bite ✦ At-Will**
*Attack:* Melee 1 (one creature); +12 vs. AC
*Hit:* 7 damage.

| | | |
|---|---|---|
| **Str** 19 (+7) | **Dex** 19 (+7) | **Wis** 14 (+5) |
| **Con** 14 (+5) | **Int** 2 (-1) | **Cha** 7 (+1) |

**Alignment** chaotic evil **Languages** –

## Hyena Spirits in Combat

Hyena spirits called into combat have their actions dictated by the creature controlling them. Unbound hyena spirits engage enemies that are already in combat with other gnolls.

# Gremlin

In cities and towns across settled lands, unexplained events make citizens edgy. Valuables disappear under the eyes of trustworthy guards. Messages appear sealed with the marks of lords and nobles, yet the contents are vehemently disavowed by those who seemingly wrote them. People whisper of dark conspiracies or curses, yet few suspect the true source of this villainy.

## Lore

**Arcana DC 19:** The fomorian king Thrumbolg created the first gremlins in the aftermath of his assault on Mag Tureah. On his orders, captured goblin slaves were transformed and corrupted by powerful rituals. The gremlins that resulted were the tools by which Thrumbolg sowed unease and dissent within the cities of the eladrin. Using them, he broke up powerful fey alliances that were joined against him.

However, Thrumbolg overestimated his ability to control the gremlins, and they wreaked havoc within the fomorian king's own court before being driven out. Now scattered across the Feydark, the Feywild, and the mortal realm, gremlins wreak havoc wherever they can.

## Encounters

Gremlins can be found living openly among goblins, orcs, lizardfolk, and other humanoids that can tolerate their chaotic presence. However, these creatures most often dwell unseen within the settlements of those they terrorize, taming vermin and animals to their service. Demons and gremlins are natural allies, sowing destruction wherever they are found.

## Gremlin Deceiver

Within the innermost circle of the royal court, documents and heirlooms are brazenly stolen and then traced to the quarters of visiting nobles. Threats and protestations of innocence quickly give rise to discord and violence. Meanwhile, a gremlin deceiver watches gleefully from the shadows.

### Gremlin Deceivers in Combat

Gremlin deceivers avoid combat if possible. However, when pressed, they rely on allies to protect them while they lock down enemies across the battlefield.

WAYNE ENGLAND

| **Gremlin Deceiver** | **Level 5 Controller** |

# Gremlin Skulker

A blacksmith is found dead after his shop burns to the ground around him. A tavern owner whispers of being watched and is found clawed to death as if by some foul beast. A rash of unsolved murders has the city on edge, and no one realizes the true killer.

| **Gremlin Skulker** | **Level 7 Lurker** |
|---|---|
| Small fey humanoid | XP 300 |
| **HP** 64; **Bloodied** 32 | **Initiative** +11 |
| **AC** 21, **Fortitude** 18, **Reflex** 21, **Will** 18 | **Perception** +6 |
| **Speed** 6 | Low-light vision |
| **Traits** | |
| ☼ **Sabotaging Presence** ✦ **Aura** 5 | |
| Enemies within the aura take a -5 penalty to skill checks. | |
| **Shadow Sneak** (illusion) | |
| While adjacent to any enemy, the skulker is invisible. | |
| **Opportunistic Advantage** | |
| The skulker deals 2d6 extra damage with opportunity attacks. | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +12 vs. AC | |
| *Hit:* 2d6 + 4 damage. If the target moves away from the skulker before the end of its next turn, the target falls prone at the end of its move. | |
| **Triggered Actions** | |
| **Gremlin Tactics** ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the skulker misses it with a melee attack. | |
| *Effect (Immediate Reaction):* The skulker swaps positions with the triggering enemy. | |
| **Shadow Skulk** ✦ **Encounter** | |
| *Trigger:* An enemy adjacent to the skulker moves. | |
| *Effect (Immediate Reaction):* The skulker shifts 6 squares, moving with the triggering enemy as it completes the move. The skulker remains adjacent to the enemy during the move and must end the shift adjacent to the enemy. | |
| **Skills** Stealth +12, Thievery +12 | |
| **Str** 13 (+4) **Dex** 19 (+7) **Wis** 17 (+6) | |
| **Con** 16 (+6) **Int** 16 (+6) **Cha** 14 (+5) | |
| **Alignment** chaotic evil **Languages** Common, Elven, Goblin | |

## Gremlin Skulkers in Combat

A gremlin skulker is a cowardly opportunist that waits for the optimal moment to attack. When that time comes, it conceals itself in the thick of combat.

# Gremlin Conniver

The assassins' guild leader had told his comrades that he wanted peace between his guild and the thieves' guild. However, the letter that was delivered to the leader of the thieves' guild said differently. Before the confusion could be sorted out, a bloody street battle ensued, leaving both leaders dead. The survivors could only guess at who—or what—was responsible.

## Gremlin Connivers in Combat

A conniver lingers in the shadows to work its magic undetected, directing a dominated target against his or her allies. Once its ruse is discovered, a conniver uses bursts of *beguiling fog* to inhibit its foes.

| **Gremlin Conniver** | **Level 17 Controller** |
|---|---|
| Small fey humanoid | XP 1,600 |
| **HP** 162; **Bloodied** 81 | **Initiative** +13 |
| **AC** 31, **Fortitude** 28, **Reflex** 31, **Will** 29 | **Perception** +18 |
| **Speed** 6 | Low-light vision |
| **Standard Actions** | |
| ⊕ **Claw** (teleportation) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +22 vs. AC | |
| *Hit:* 4d6 + 10 damage, and the conniver teleports the target 5 squares. | |
| ⚚ **Connive** (charm) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +20 vs. Will | |
| *Hit:* The target is dominated (save ends). The conniver can have only one creature dominated at a time. | |
| **Minor Actions** | |
| ✲ **Beguiling Fog** ✦ **Recharge** ⚅ | |
| *Attack:* Area burst 2 within 10 (enemies in burst); +20 vs. Will | |
| *Hit:* The target is dazed (save ends). | |
| *Miss:* The target is dazed until the end of its next turn. | |
| **Triggered Actions** | |
| **Gremlin Tactics** ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the conniver misses it with a melee attack. | |
| *Effect (Immediate Reaction):* The conniver swaps positions with the triggering enemy. | |
| **Skills** Bluff +16, Stealth +18, Thievery +18 | |
| **Str** 15 (+10) **Dex** 21 (+13) **Wis** 20 (+13) | |
| **Con** 18 (+12) **Int** 24 (+15) **Cha** 17 (+11) | |
| **Alignment** chaotic evil **Languages** Common, Elven, Goblin | |

# Gremlin Prankster

Though fully possessed of their kin's capacity for trickery, gremlin pranksters are far less subtle in their actions.

| **Gremlin Prankster** | **Level 17 Minion Controller** |
|---|---|
| Small fey humanoid | XP 400 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +14 |
| **AC** 31, **Fortitude** 27, **Reflex** 30, **Will** 29 | **Perception** +18 |
| **Speed** 6 | Low-light vision |
| **Traits** | |
| ☼ **Sabotaging Presence** ✦ **Aura** 5 | |
| Enemies within the aura take a -5 penalty to skill checks. | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +22 vs. AC | |
| *Hit:* 12 damage. | |
| **Minor Actions** | |
| ⚚ **Slip Up** ✦ **At-Will** (1/round) | |
| *Attack:* Ranged 5 (one creature); +20 vs. Will | |
| *Hit:* The prankster slides the target 3 squares and knocks it prone. | |
| **Skills** Stealth +19, Thievery +19 | |
| **Str** 16 (+11) **Dex** 22 (+14) **Wis** 21 (+13) | |
| **Con** 19 (+12) **Int** 20 (+13) **Cha** 16 (+11) | |
| **Alignment** chaotic evil **Languages** Common, Elven, Goblin | |

## Gremlin Pranksters in Combat

The most frail of their kind, gremlin pranksters throw themselves into battle with abandon, hoping to cause chaos before they retreat to the shadows.

# HAG

Though native to the Feywild, the vile race of hags can be found throughout the planes. Hags' mastery of dark fey magic and their propensity to gather secrets makes them coveted as spellcasters and oracles. However, these deadly creatures are as treacherous as they are powerful.

## Lore

**Arcana DC 27:** Hags are the keepers of secrets, all of which they jealously guard from other creatures. These secrets are gained through foul divinations, pacts with humanoids, and a network of portals that connects hags throughout the Feywild and the mortal world.

Adventurers who enter into a bargain with a hag must often undertake a minor quest against the hag's enemies, including an archfey, devils or demons, or the hags of competing covens.

A dream hag uses magic to send dreams to its victims, providing clues to a journey the recipient must make, such as landmarks that can guide a hero to desperately needed magic or lore. The dream hag, working in concert with the victim's enemies, sows traps and other hazards along the way. A hag has only partial control over the visions it sends. Even the most devious of hags cannot prevent scraps of useful information from appearing to their victims.

## Encounters

Hags seldom undertake more labor than they need to, and they surround themselves with guards and servants to do their bidding. Undead, evil fey, aberrant creatures, and brutish humanoids can be found in a hag's service. Characters who seek out a hag's counsel or divination typically face a gauntlet of such attackers first.

Mist hags ally with devils, serving as caretakers of the greatest treasures of the dukes and princes of the Nine Hells. However, mist hags are prone to turning against their masters and making off with particularly valuable items.

## Pact Hag

The pact hag's crude hut lies out of sight of the village, close enough to draw those seeking its secrets but

| **Pact Hag** | **Level 11 Controller (Leader)** |
|---|---|
| Medium fey humanoid | XP 600 |
| **HP** 115; **Bloodied** 57 | **Initiative** +7 |
| **AC** 25, **Fortitude** 23, **Reflex** 23, **Will** 24 | **Perception** +15 |
| **Speed** 6 | Low-light vision |
| **Traits** | |
| ☼ **Pact of Obedience** ✦ **Aura** 5 | |
| Any ally within the aura that misses with a melee attack can take 5 damage to gain a +2 power bonus to the attack roll. | |
| **Standard Actions** | |
| ⊕ **Compelling Staff** (charm, weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +16 vs. AC | |
| *Hit:* 1d6 + 5 damage, and the target makes a melee basic attack as a free action against a creature of the hag's choice. | |
| ☆ **Pact of Compelled Alliance** (charm) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +14 vs. Will | |
| *Hit:* The target is dominated until the end of the hag's next turn. | |
| ☆ **Pact of Choked Aggression** (charm, psychic) ✦ **Recharge** when no creature is affected by this power | |
| *Attack:* Ranged 10 (one creature); +14 vs. Will | |
| *Hit:* The target is affected by a pact of choked aggression until the end of the encounter or until the hag or one of its allies attacks the target. While affected by the pact, the target takes 10 psychic damage the first time it hits a creature during each of its turns. | |
| ☆ **Pact of Shared Agony** (psychic) ✦ **Recharge** if the power misses | |
| *Requirement:* The hag must be bloodied. | |
| *Attack:* Ranged 10 (one creature); +14 vs. Fortitude | |
| *Hit:* Until the end of the encounter, while the target is within 10 squares of the hag, the target takes 10 psychic damage whenever the hag takes damage. | |
| **Skills** Arcana +14, Bluff +13, Diplomacy +13, Insight +15 | |
| **Str** 12 (+6) **Dex** 14 (+7) **Wis** 21 (+10) | |
| **Con** 19 (+9) **Int** 19 (+9) **Cha** 16 (+8) | |
| **Alignment** unaligned **Languages** Common, Elven, Giant | |
| **Equipment** staff | |

CHRIS SEAMAN

distant enough to hold the curious at bay. Many come in search of the power, knowledge, and rituals the hag possesses. However, such things come at a price, which is named in the pacts the hag forges.

### Pact Hags in Combat

A pact hag prefers negotiation to violence, though usually such negotiation favors the hag. A pact hag relies on its monstrous servants to do the fighting. It often has a few beasts that it keeps as pets, or a group of ogres, trolls, and other brutish slaves that it has bent to its will.

## Dream Hag

Nightmares and strange visions plague an individual during sleep, seeming to provide disturbing hints of the future. In truth, these visions have been crafted by a dream hag to manipulate and destroy its prey.

| **Dream Hag** | **Level 19 Controller** |
|---|---|
| Medium fey humanoid | XP 2,400 |
| **HP** 179; **Bloodied** 89 | **Initiative** +11 |
| **AC** 33, **Fortitude** 29, **Reflex** 31, **Will** 32 | **Perception** +21 |
| **Speed** 6 | Low-light vision |

**Traits**

**Nightmare Weaver** (charm) ✦ **Aura** 3
Any unconscious enemy that starts its turn within the aura stands up and is dominated until the end of its next turn. The enemy remains unconscious but takes a single action during its turn, chosen by the dream hag.

**Standard Actions**

**Staff of Mindless Reverie** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +24 vs. AC
*Hit:* 2d6 + 10 damage, and the target is dazed until the end of the hag's next turn.

**Nightmare Visions** (charm, implement, psychic) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +22 vs. Will
*Hit:* 3d8 + 14 psychic damage, and the hag slides the target 5 squares.

**Dust of Dreams** (charm, sleep) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Close blast 5 (enemies in blast); +22 vs. Will
*Hit:* The target is dazed (save ends).
*First Failed Saving Throw:* The target falls unconscious (save ends).

**Sleep's Undeniable Grasp** (implement, sleep) ✦ **Encounter**
*Attack:* Close blast 5 (enemies in blast); +22 vs. Will
*Hit:* The target falls unconscious (save ends). This effect also ends if the target is attacked by the hag or one of its allies.

**Skills** Bluff +18, Diplomacy +18, Insight +21

| | | |
|---|---|---|
| **Str** 10 (+9) | **Dex** 14 (+11) | **Wis** 24 (+16) |
| **Con** 19 (+13) | **Int** 21 (+14) | **Cha** 19 (+13) |

**Alignment** unaligned **Languages** Common, Elven, Supernal
**Equipment** staff

### Dream Hags in Combat

A dream hag revels in sending its enemies into a deadly slumber. By influencing the unconscious thoughts of a creature, the hag controls its body like a puppeteer. It gathers and enslaves cruel creatures, including renegade drow and worshipers of Torog.

## Mist Hag

In the Feywild's deepest forests dwell the mist hags, near-legendary spellcasters that stole countless secrets and artifacts from the mortal realm in ages past. Adventurers and heroes now search for the remote lairs where mist hags have hidden this wealth. However, the hags still jealously guard their relics and secrets, so those who go in search of these caches often end up as trophies.

| **Mist Hag** | **Level 27 Controller (Leader)** |
|---|---|
| Medium fey humanoid | XP 11,000 |
| **HP** 247; **Bloodied** 123 | **Initiative** +17 |
| **AC** 41, **Fortitude** 37, **Reflex** 38, **Will** 39 | **Perception** +27 |
| **Speed** 8 | Low-light vision |

**Traits**

**Mist Shroud** ✦ **Aura** 1
Allies within the aura are insubstantial.

**Standard Actions**

**Mist Staff** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +32 vs. AC
*Hit:* 3d6 + 10 damage, and the mist hag pushes the target 5 squares. The hag can push the target through creatures or through solid objects as if the target were phasing. The hag does not need line of effect to any of the squares to which it pushes the target.

**Mist on the Wind** (implement, teleportation) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +30 vs. Fortitude
*Hit:* 1d10 + 7 damage, and the target is removed from play until the start of the hag's next turn. The target then appears in an unoccupied square of the hag's choice within 4 squares of its last location.

**Choking Mist** (implement) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Ranged 10 (one creature); +30 vs. Reflex
*Hit:* 3d10 + 15 damage, and ongoing 20 damage (save ends).
*Each Failed Saving Throw:* The hag slides the target 3 squares as a free action.

**Triggered Actions**

**Maze of Mist** ✦ **At-Will**
*Trigger:* An enemy enters a square within 2 squares of the hag.
*Effect (No Action):* Roll a d20. On a 10 or higher, the hag slides the enemy 1 square.

**Skills** Arcana +25, Bluff +24, History +25, Insight +27, Religion +25

| | | |
|---|---|---|
| **Str** 10 (+13) | **Dex** 18 (+17) | **Wis** 28 (+22) |
| **Con** 23 (+19) | **Int** 25 (+20) | **Cha** 23 (+19) |

**Alignment** unaligned **Languages** Common, Elven, Supernal

### Mist Hags in Combat

When faced with a direct threat, a mist hag relies on the haze of fey-touched mist that surrounds it to keep foes at bay. The hag sends servants against foes while striking from the edge of the fray. It prefers to enlist the aid of undead and creatures that are tough and brutish.

# HOWLER

In the dead of night, the awful baying begins. It rises across the fields and through the forests, eventually spilling out onto the cobblestone streets. As long as the folk of the village remain terrified, the howlers are content to drag only one or two screaming victims to their doom, for howlers feed not on flesh but on fear.

## Lore

**Arcana DC 23:** Howlers derive sustenance from the raw fear of the creatures they hunt. A painful, brutal death yields a delicious spike of fear, and younger howlers are quick to kill. The adult howlers, the doom mastiffs, are intelligent enough to recognize that a foe left to live in fear offers far more sustenance in the long term.

Howler packs target isolated settlements, from human frontier villages to dwarven enclaves in the Underdark. They attack while folk sleep, terrorizing a settlement's inhabitants but taking care to avoid killing too many of their foes. In this way, a pack of howlers harvests a steady diet of fear from its victims. However, any show of defiance brings down the howlers' dread wrath. They circle the homes and shops of those who stand against them, their cries shattering the darkness. When they finally attack, they leave none alive.

The greatest of howlers are the terror incarnates, but these living embodiments of fear are rare. A terror incarnate is seldom found leading its lesser kin. Instead, these creatures ally themselves with powerful masters, including death giants, liches, and other intelligent undead.

## Encounters

Although howlers typically run in their own death packs, they sometimes serve other creatures. Young dread hounds are captured by troglodytes, shadar-kai, and drow, who train them as beasts of war. Older doom mastiffs cannot be broken, but they are shrewd enough to accept service with drow or intelligent undead in return for a steady stream of victims. When kept as allies, howlers lair in prisons and torture chambers, where fear is rife. In battle, a doom mastiff accepts only a powerful ally as a rider.

Terror incarnates serve death giants and powerful undead lords as guards, watchers, and hunters. They sometimes wander the planes in packs, chasing down weaker creatures to slake their endless hunger for fear.

## Howler Dread Hound

Dread hounds are young howlers eager to feed on the fear and terror their baying sparks. They run in packs, descending on isolated villages and Underdark outposts like a dark wave.

| **Howler Dread Hound** | **Level 9 Minion Controller** |
|---|---|
| Medium elemental magical beast | XP 100 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +7 |
| **AC** 23, **Fortitude** 22, **Reflex** 22, **Will** 21 | **Perception** +6 |
| **Speed** 8 | Darkvision |
| **Traits** | |
| **Piercing Spines** | |
| Whenever a creature adjacent to the dread hound misses it with a melee attack, that creature takes 6 damage. | |
| **Standard Actions** | |
| ⊕ **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +14 vs. AC | |
| *Hit:* 6 damage, and the dread hound slides the target 1 square. | |
| ⇢ **Dread Howl** (fear, psychic) ✦ **Encounter** | |
| *Attack:* Close blast 5 (enemies in blast); +12 vs. Will | |
| *Hit:* 4 psychic damage, and the target grants combat advantage until the end of its next turn. | |
| **Str** 15 (+6) **Dex** 17 (+7) **Wis** 14 (+6) | |
| **Con** 16 (+7) **Int** 5 (+1) **Cha** 12 (+5) | |
| **Alignment** evil **Languages** understands Abyssal | |

JIM NELSON

### Howler Dread Hounds in Combat

Dread hounds are pups driven by their elders to prove themselves in battle. They spread out as they attack, hemming in their foes to maximize the effect of *dread howl*.

## Howler Doom Mastiff

As a howler becomes larger, its hunger for fear and terror grows with it. Doom mastiffs stalk underground tunnels and forgotten dungeons in small packs, seeking creatures they can terrify.

| **Howler Doom Mastiff** | **Level 13 Skirmisher** |
|---|---|
| Large elemental magical beast (mount) | XP 800 |
| **HP** 129; **Bloodied** 64 | **Initiative** +12 |
| **AC** 27, **Fortitude** 25, **Reflex** 25, **Will** 24 | **Perception** +9 |
| **Speed** 8 | Darkvision |
| **Traits** | |
| **Guarding Spines** (mount) | |
| The doom mastiff's rider gains a +2 bonus to AC. | |
| **Piercing Spines** | |
| Whenever a creature adjacent to the doom mastiff misses it or its rider with a melee attack, that creature takes 10 damage. | |
| **Standard Actions** | |
| **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d8 + 7 damage. | |
| **Loping Bite** ✦ **At-Will** | |
| *Effect:* The doom mastiff shifts half its speed and uses *bite*. | |
| **Terrifying Howl** (fear, psychic) ✦ **Recharge** ⚅ | |
| *Attack:* Close blast 5 (enemies in blast); +16 vs. Will | |
| *Hit:* The target takes ongoing 10 psychic damage and grants combat advantage (save ends both). The target cannot save against this effect while it is adjacent to any doom mastiff. | |
| **Str** 20 (+11) **Dex** 19 (+10) **Wis** 16 (+9) | |
| **Con** 17 (+9) **Int** 9 (+5) **Cha** 13 (+7) | |
| **Alignment** evil **Languages** understands Abyssal | |

### Howler Doom Mastiffs in Combat

A doom mastiff typically hunts alongside others of its kind. With *terrifying howl*, it can cripple even the strongest foes with fear. Once a foe is reeling from terror, the doom mastiff closes in to keep that fear alive.

## Howler Terror Incarnate

Legends tell of a great howler that devoured the terror of an entire army and was transformed into a living embodiment of fear. In time, this creature sired more of its kind, and many howler terror incarnates now wander the planes or serve powerful masters.

| **Howler Terror Incarnate** | **Level 22 Lurker** |
|---|---|
| Large shadow magical beast | XP 4,150 |
| **HP** 155; **Bloodied** 77 | **Initiative** +22 |
| **AC** 36, **Fortitude** 34, **Reflex** 34, **Will** 35 | **Perception** +16 |
| **Speed** 8, fly 6 | Darkvision |
| **Traits** | |
| **Terror Incarnate** (fear, psychic) ✦ **Aura** 3 | |
| Any enemy that starts and ends its turn within the aura takes 10 psychic damage. | |
| **Shadow Spines** (necrotic) | |
| Whenever a creature adjacent to the terror incarnate misses it or its rider with a melee attack, that creature takes 15 necrotic damage. | |
| **Standard Actions** | |
| **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +27 vs. AC | |
| *Hit:* 2d8 + 7 damage. | |
| **Shadow of Terror** (charm, psychic) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature that cannot see the terror incarnate and has not yet been dominated by it during this encounter); +25 vs. Will | |
| *Hit:* The target is dominated and its at-will attacks deal 1d8 extra psychic damage and target Will (save ends; the target takes a –4 penalty to the saving throw; the effect ends if the target takes radiant damage). Until the effect ends, the howler is removed from play. When the effect ends, the howler appears in the unoccupied space nearest to the target. | |
| *Aftereffect:* The target is dazed (save ends). | |
| **Death Howl** (fear, psychic) ✦ **Encounter** | |
| *Attack:* Close blast 5 (enemies in blast that cannot see the terror incarnate); +25 vs. Will | |
| *Hit:* 3d8 + 5 psychic damage, and the target is dazed (save ends). | |
| **Move Actions** | |
| **Shadow Lope** (illusion) ✦ **Recharge** ⚄ ⚅ ⚅ | |
| *Effect:* The terror incarnate becomes invisible and can move its speed. It remains invisible until the end of its next turn. | |
| **Skills** Stealth +23 | |
| **Str** 18 (+15) **Dex** 24 (+18) **Wis** 20 (+16) | |
| **Con** 17 (+14) **Int** 14 (+13) **Cha** 23 (+17) | |
| **Alignment** evil **Languages** Abyssal, Giant | |

### Howler Terror Incarnates in Combat

Terror incarnates fall on their enemies with *shadow lope*. The shock of an unexpected attack adds to the fear they cause. Terror incarnates are faithful servants, and one that has taken up with a dark master gladly gives up its life to protect that creature.

# Imix

A primordial far older than the world, Imix is raging fire, malice, and obliteration. His dire touch is felt by thralls to passion, slaves to wrath, and those who surrender to blind hate. He dwells within the Elemental Chaos, where his depravity and thirst for violence rival that of the worst demons.

Imix is known by many names—Fire Lord Imix, the Eternal Flame, Prince of Elemental Fire. He is one of several primordials that serve the Elder Elemental Eye. Unbeknownst to these primordials, though, the Elder Elemental Eye is a device through which Tharizdun, the Chained God, gains power and influences the world.

## Imix Lore

**Arcana DC 33:** In raging wildfires that spread across the wilderness and in brutal murders enacted in the heat of passion, one can find the Fire Lord's touch. Imix embodies fire's most destructive attributes, promoting rash action, wanton violence, and arson. The Fire Lord's followers hear their master's whispers in the crackle of flames, in the ragged exhalations of burned victims, and in the crunch of char beneath their feet.

As the self-styled Prince of Elemental Fire, Imix claims dominion over fire creatures in the Elemental Chaos. Elementals pay homage to him, though many resent his power, which remains strong despite his exile.

## Imix Encounters

Imix has an unusually strong following in the mortal world for a primordial. His followers are misanthropes, lunatics, and murderers, those who seek power in exchange for dread oaths. Many of his cultists work in isolation, but small temples of devotees are concealed in towns and cities across the world. The most dangerous temples are those that worship Imix's master, the Elder Elemental Eye. These cults work unwittingly to free the Chained God.

The Fire Lord rules from deep within an active volcano in the Elemental Chaos. Its fissures vent noxious plumes, and lava spills down the fractured slopes to mingle with molten lakes that extend for miles. Roiling black clouds spew cinders, while ash rains down on the desolate landscape.

Adventurers who crest the volcano's caldera can catch sight of Imix's palace. A black inverted pyramid hovers over the magma, its tip tracing a jagged spiral, the symbol of the Elder Elemental Eye, into the rock. Although Imix is not bound within the volcano, he lives like a prisoner: He fled at the end of the Dawn War and has remained safe within his volcanic stronghold.

## Imix in Combat

Liquid fire erupts in a massive column, washing the area with punishing heat. After a moment, a huge humanoid armed with a blazing blade steps from the flames. Imix mocks his enemies, his voice crackling with the sound of killing fire.

With every dread elemental power he unleashes, Imix derides his enemies. Yet in spite of his boasts,

WAYNE ENGLAND

**Imix** **Level 32 Solo Controller**
Huge elemental humanoid (fire, primordial) XP 135,000

**HP** 1,140; **Bloodied** 570 **Initiative** +27
**AC** 47, **Fortitude** 42, **Reflex** 45, **Will** 44 **Perception** +29
**Speed** 10, fly 8 (hover) Darkvision
**Immune** disease, fire
**Saving Throws** +5; **Action Points** 3

**Traits**

☼ **Withering Flames** ✦ **Aura** 5
Enemies within the aura do not benefit from fire resistance.

**Standard Actions**

⊕ **Blazing Blade** (fire, weapon) ✦ **At-Will**
*Attack:* Melee 3 (one creature); +37 vs. AC
*Hit:* 2d10 + 9 fire damage, and ongoing 20 fire damage (save ends).

⸸ **Blazing Arc** ✦ **At-Will**
*Effect:* Imix uses *blazing blade* against each enemy within reach.

✧ **Volcanic Circle** (fire, zone) ✦ **At-Will**
*Effect:* Imix reduces a fire grue within 10 squares of him to 0 hit points and makes the following attack centered on the grue.
*Attack:* Close burst 1 (creatures in burst); +35 vs. Reflex
*Hit:* 6d6 + 19 fire damage.
*Effect:* The burst creates a zone that lasts until the end of the encounter. Any enemy that enters the zone or ends its turn there takes 20 fire damage.

**Servants of Elemental Fire** (fire) ✦ **Recharge** when no fire grue is within 10 squares of Imix at the start of his turn
*Effect:* Imix creates four fire grues, or six while Imix is bloodied, each in an unoccupied square within 10 squares of him. The grues cannot take actions. Any creature that starts its turn adjacent to one or more grues takes 15 fire damage. The grues have defenses equal to Imix's and 1 hit point each. A missed attack never damages a grue. Each grue lasts until the end of the encounter or until Imix ends his turn more than 10 squares from it. As a minor action, Imix can move each grue up to 6 squares.

**Minor Actions**

✧ **Blinding Flare** (fire) ✦ **Recharge** when first bloodied
*Attack:* Close burst 10 (enemies adjacent to fire grues); +35 vs. Fortitude
*Hit:* 3d6 + 10 fire damage, and the target is blinded (save ends).
*Miss:* Half damage, and the target takes a -2 penalty to attack rolls until the end of Imix's next turn.

✧ **Hungry Flames** (fire) ✦ **Encounter**
*Attack:* Close burst 10 (enemies taking ongoing fire damage); +35 vs. Fortitude
*Hit:* The target is weakened (save ends). Each creature adjacent to at least one target takes 10 fire damage.

**Triggered Actions**

✧ **Demand Focus** ✦ **At-Will**
*Trigger:* An enemy willingly moves away from a fire grue without shifting.
*Attack (Opportunity Action):* Close burst 10 (triggering enemy in burst); +35 vs. Will
*Hit:* The target is dazed until the end of its next turn.

**Formed of Fire** (fire) ✦ **At-Will**
*Trigger:* An enemy misses Imix with a melee attack.
*Effect (Immediate Reaction):* The triggering enemy and each of its adjacent allies take 10 fire damage.

**Eternal Resilience** ✦ **At-Will**
*Trigger:* Imix is affected by an effect that a save can end.
*Effect (No Action):* Imix makes a saving throw against the effect.

**Skills** Arcana +31, Bluff +30, Intimidate +30, Religion +31
**Str** 23 (+22) **Dex** 33 (+27) **Wis** 26 (+24)
**Con** 21 (+21) **Int** 30 (+26) **Cha** 28 (+25)
**Alignment** chaotic evil **Languages** Primordial
**Equipment** greatsword

Imix is quick to bring up reinforcements. Gouts of flame burst around him and coalesce into fire grues, blazing forms that dance to Imix's whims, caressing foes with fire as they gloat and cackle.

Throughout battle, Imix occasionally throws up his hands, causing one of his grues to explode. He uses his grues to create bubbling pools of molten rock to scorch his foes while unleashing tongues of flame that immolate victims.

Imix isn't afraid to engage enemies in melee, wielding a blade formed from his elemental essence. Imix is cunning, but he is also arrogant and views mortals as no threat. Imix presses the attack even after a battle turns against him, fleeing only when his death becomes a real possibility.

## THE ELDER ELEMENTAL EYE

The Elder Elemental Eye is an artifice designed by Tharizdun to deceive primordials and mortals into offering power to him. Followers of the Elder Elemental Eye unwittingly aid in the effort to release the Chained God from his divine prison. A group of primordials including Imix and Ogrémoch heed the orders of the Elder Elemental Eye, not realizing the dark entity they serve is in fact the Chained God.

During the Dawn War, the gods hunted down the primordials and destroyed them one by one. Few primordials were willing to work together against the gods. However, a small number of primordials, including Imix and Ogrémoch, managed to briefly set aside their differences under the auspices of an entity called the Elder Elemental Eye. These primordials, which became known as the Elemental Princes, believed the Elder Elemental Eye was the first of the primordials. The entity whispered dark promises about destroying the gods, so the Elemental Princes sought to free it. Although the princes failed in their endeavor, their temporary alliance did spare them defeat at the hands of the gods. Imix and the others in the alliance managed to escape to the far reaches of the Elemental Chaos, where they remain in exile.

From his prison, Tharizdun has little influence on the planes and must depend on his servants to carry out his schemes. Thus, it falls to the Elemental Princes to spread the dark god's influence and expand his power. The Elemental Princes still believe that the Elder Elemental Eye is an ancient primordial. They continue to try to free the entity, but their old rivalries and grudges prevent them from fully working together.

The Elemental Princes' penchant for treachery is reflected by their representatives in the world. Their followers form different factions aligned with one of the four classic elements: air, earth, fire, or water. Just as their elemental masters do, each temple breeds paranoia and betrayal, and the various factions spend much of their time sabotaging one another.

# IMIX'S CULTISTS

When a few hovels burned to the ground, no one thought anything of it. When flames engulfed a library of Ioun, townsfolk began to suspect foul play. However, the town constable dismissed the catastrophe as a tragic accident—as a new member of the cult of the Fire Lord, he was in a perfect position to deflect suspicion away from the cultists.

Insane priests lead the Fire Lord's cults with support from elemental creatures. A cult of Imix oftren attracts the worst kind of people—criminals, bandits, and murderers—but many devotees are common folk who are drawn to the cult based on false promises or fears.

## Lore

**History DC 23:** Imix commands a sizable following of deviants and killers. Cults of the Fire Lord hide within unsuspecting communities, where they operate out of cellars and ruins. A cult undermines a settlement, sowing division and discord among the people and encouraging them to rebel. The presence of a cult of Imix is marked by burned-out buildings and the charred remains of anyone who threatened to reveal its existence.

Few large temples of Imix exist. Most cultists settle in crumbling fortresses and dungeons, which they vigilantly guard against both outsiders and other factions of the cult. Most large temples are dedicated to the Elder Elemental Eye rather than just to Imix, and they house two or three factions of the Elemental Princes. The greatest of these shrines, the Temple of Elemental Evil, includes representatives of all four. Imix is the most sinister of the Elemental Princes, however, and so his cult tends to be responsible when internal strife erupts in one of these temples.

## Encounters

Small fire cults recruit true believers from local communities, and conscripts can be of any race or background. Few groups have the resources or talents to summon an elemental creature. Those cults that try sometimes meet with disastrous results when a demon or other hostile elemental appears. Practiced ritualists bind carnage demons to serve as warriors, but these arrangements have a way of backfiring.

Humanoid cultists make up the membership of the larger temples as well. Most of these followers are treacherous, though, so cult leaders ally with other savage humanoids to bolster the cult's defenses. A leader might enlist such creatures as mercenaries or attempt to convert them to serve the cult's ends. Orcs and gnolls are common partners, and ogres, trolls, and oni are also found in groups of cultists.

The most powerful temples bring elementals into the natural world. Planar portals, planar rifts, and binding rituals allow cultists to bring forth elemental legions. These temples receive service from salamanders, azers, fire titans, and other fire creatures. Like the smaller cells, these cults also supplement their forces with demonic servants.

## Fire Lord Cultist

The foolish and insane fill the ranks of the Fire Lord's cults. Through grueling indoctrination, these cultists lose their identities, replacing personal desire with absolute devotion to Imix.

| **Fire Lord Cultist** | **Level 5 Minion Brute** |
|---|---|
| Medium natural humanoid, human | XP 50 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +3 |

### Fire Lord Cultists in Combat

Armed with torches and clubs, Fire Lord cultists look on their opponents with hollow eyes as they ignite them in flames. When working with fire temple elects, these cultists will even ignite their allies.

## Servant of the Fire Lord

As Imix seethes in the Elemental Chaos, the cinders of his influence fall in the world, igniting fires. These blazes are the servants of the Fire Lord. They establish temples across the world, recruiting followers and cleansing civilization with flames. A servant of the Fire Lord might masquerade as the follower of a god or adopt a position in which he or she can subvert a community's populace.

### Servants of the Fire Lord in Combat

A servant of the Fire Lord invokes Imix's name as it recklessly slashes at foes. A servant shrieks and gibbers when it misses and barks with animalistic laughter when its weapon connects. Flames seem to lick the servant's heels as it moves around combat, imbuing its attacks with fiery potency and bestowing the blessing of the Fire Lord on its allies.

| **Servant of the Fire Lord** | **Level 6 Skirmisher (Leader)** |
|---|---|
| Medium natural humanoid, half-elf | XP 250 |
| **HP** 73; **Bloodied** 36 | **Initiative** +8 |
| **AC** 20, **Fortitude** 18, **Reflex** 18, **Will** 17 | **Perception** +3 |
| **Speed** 6 | Low-light vision |

**Traits**

**Wildfire Stride** (fire)
Whenever the servant of the Fire Lord moves at least 3 squares from where it began its turn, its melee attacks deal 5 extra fire damage until the end of its next turn.

**Standard Actions**

**Scimitar** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +12 vs. AC
*Hit:* 1d8 + 6 damage.

**Immolating Slash** (fire, weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +10 vs. Reflex
*Hit:* 1d8 damage, and ongoing 5 fire damage (save ends).

**Minor Actions**

**Gift of Fire** (fire) ✦ **Recharge** ⚄ ⚅
*Effect:* The servant grants each ally within 5 squares the gift of fire until the end of the servant's next turn. These allies' melee attacks deal 5 extra fire damage.

**Skills** Diplomacy +10

| | | |
|---|---|---|
| **Str** 10 (+3) | **Dex** 17 (+6) | **Wis** 10 (+3) |
| **Con** 17 (+6) | **Int** 11 (+3) | **Cha** 15 (+5) |

**Alignment** chaotic evil **Languages** Common, Elven, Primordial

# Fire Temple Elect

Through intense mental manipulation, cult leaders burn away an individual's identity until all that remains is a fire temple elect–a raving zealot who sees a fiery death as the ultimate expression of faith.

| **Fire Temple Elect** | **Level 7 Minion Skirmisher** |
|---|---|
| Medium natural humanoid, human | XP 75 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +6 |
| **AC** 19, **Fortitude** 18, **Reflex** 17, **Will** 17 | **Perception** +2 |
| **Speed** 7 | |

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +12 vs. AC
*Hit:* 7 damage.

**Triggered Actions**

**Self-Immolation** (fire)
*Trigger:* The elect drops to 0 hit points. If fire damage reduces the elect to 0 hit points, it can move its speed before making the following attack.
*Attack (Immediate Interrupt):* Close burst 1 (creatures in burst); +10 vs. Reflex
*Hit:* 5 fire damage.

| | | |
|---|---|---|
| **Str** 15 (+5) | **Dex** 13 (+4) | **Wis** 8 (+2) |
| **Con** 10 (+3) | **Int** 9 (+2) | **Cha** 12 (+4) |

**Alignment** chaotic evil **Languages** Common
**Equipment** leather armor, short sword

## Fire Temple Elects in Combat

Death is welcome to a fire temple elect. Each sees sacrifice by fire as a sacred duty to his or her master. Elects douse themselves in oil so that when the time comes, they can serve their master by becoming shrieking pillars of fire.

# Fire Temple Champion

Charged with protecting key cultists and safeguarding temples, fire temple champions have little free will. Like lesser cultists, these champions live only to serve their master and the Elder Elemental Eye. For this service, they receive the blessing of Imix.

| **Fire Temple Champion** | **Level 8 Soldier** |
|---|---|
| Medium natural humanoid, dragonborn | XP 350 |
| **HP** 88; **Bloodied** 44 | **Initiative** +6 |
| **AC** 24, **Fortitude** 22, **Reflex** 17, **Will** 21 | **Perception** +5 |
| **Speed** 5 | |

**Traits**

**Wildfire Stride** (fire)
Whenever the fire temple champion moves at least 3 squares from where it began its turn, its melee attacks deal 5 extra fire damage until the end of its next turn.

**Standard Actions**

**Fullblade** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +13 vs. AC
*Hit:* 1d12 + 8 damage, and the target is marked until the end of the champion's next turn.

**Minor Actions**

**Dragon Breath** (fire) ✦ **Encounter**
*Attack:* Close blast 3 (creatures in blast); +11 vs. Reflex
*Hit:* 3d6 + 5 fire damage, and the target is marked (save ends).

**Triggered Actions**

**Fiery Assault** (fire, weapon) ✦ **At-Will**
*Trigger:* An enemy marked by the champion moves on its turn.
*Attack (Opportunity Action):* Melee 1 (triggering enemy); +13 vs. AC
*Hit:* 1d12 + 8 damage, and ongoing 5 fire damage (save ends).

**Fiery Rebuke** (fire) ✦ **At-Will**
*Trigger:* An enemy marked by the champion makes an attack that does not include the champion as a target.
*Attack (Immediate Reaction):* Close blast 3 (triggering enemy in blast); +11 vs. Reflex
*Hit:* 2d6 + 5 fire damage.

| | | |
|---|---|---|
| **Str** 21 (+9) | **Dex** 11 (+4) | **Wis** 12 (+5) |
| **Con** 16 (+7) | **Int** 10 (+4) | **Cha** 18 (+8) |

**Alignment** chaotic evil **Languages** Common, Draconic
**Equipment** plate armor, fullblade

## Fire Temple Champions in Combat

Lurking near the entrances to shrines, fire temple champions keep a vigilant watch for intruders and spies. They retain just enough sanity to be useful protectors for cults.

# Flameborn

A cult of the Fire Lord operates on a small scale, working its evil against a single community. Loyal to their master's fiery aspect, flameborn erect temples from which to raise forces to burn neighboring lands. Cults of the Fire Lord that thrive and gain Imix's blessing might eventually be set to work on the goal of freeing the Elder Elemental Eye. These temples might temporarily join forces with rival cults of earth or air to enact some greater evil.

*Chosen of Imix, fire temple champion, and conflagration orb*

| **Flameborn** | **Level 15 Artillery (Leader)** |
|---|---|
| Medium natural humanoid, human | XP 1,200 |
| **HP** 111; **Bloodied** 55 | **Initiative** +8 |
| **AC** 27, **Fortitude** 28, **Reflex** 28, **Will** 28 | **Perception** +11 |
| **Speed** 6 | |
| **Resist** 10 fire | |
| **Traits** | |
| ☼ **Fire Within** ✦ **Aura** 5 | |
| Allies within the aura gain resist 5 fire. | |
| **Standard Actions** | |
| ⊕ **Flail** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +20 vs. AC | |
| *Hit:* 1d10 + 10 damage. | |
| ⚹ **Fire Bolt** (fire) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +20 vs. Reflex | |
| *Hit:* 2d6 + 6 fire damage, and ongoing 10 fire damage (save ends). | |
| ✧ **Blessing of Imix** (fire) ✦ **Encounter** | |
| *Attack:* Close burst 3 (enemies in burst); +18 vs. Reflex | |
| *Hit:* 3d6 + 6 fire damage, and the flameborn pushes the target 3 squares. | |
| *Effect:* Each ally in the burst gains 10 temporary hit points. | |
| **Minor Actions** | |
| ⚹ **Fiery Eye** ✦ **At-Will** (1/round) | |
| *Attack:* Ranged 10 (one creature taking ongoing fire damage); +20 vs. Will | |
| *Hit:* The flameborn slides the target 2 squares, and the target grants combat advantage (save ends). | |
| **Skills** Arcana +15, Intimidate +18 | |
| **Str** 20 (+12) **Dex** 12 (+8) **Wis** 18 (+11) | |
| **Con** 15 (+9) **Int** 17 (+10) **Cha** 23 (+13) | |
| **Alignment** chaotic evil **Languages** Common, Primordial | |
| **Equipment** flail | |

## Flameborn in Combat

A flameborn issues crazed commands to Fire Lord cultists and servants of the Fire Lord while remaining safely at the rear. When a divine character offers prayers to a god, he or she draws the wrath of a flameborn, which leaps at the chance to deliver fiery death to a divine servant. The eye of a flameborn seems to erupt in flame as it wields the power of Imix to inspire madness in those it ignites.

# Conflagration Orb

Coaxed from the Elemental Chaos through heinous rituals, a conflagration orb is an avatar of Imix and a manifestation of the Fire Lord's approval. A conflagration orb's presence gives Imix an opportunity to take a direct hand in mortal events. As with the aspects of gods, a primordial's avatar contains a fragment of the primordial's power and is loyal only to its maker. A conflagration orb is unpredictable and has little concern for Imix's servants, incinerating them along with enemies.

## Conflagration Orbs in Combat

A conflagration orb is a miniature sun that hurls flames from its superheated mass. An orb avoids melee combat. It flies high above the battlefield, from where it can rain down white bursts of flame on ally and foe alike. As its cloying flames char the skin of enemies, it glows bright and lets out a gleeful, sizzling cackle that emanates from its core.

CHRIS SEAMAN

**Conflagration Orb** **Level 20 Artillery**
Medium elemental animate (fire) XP 2,800

**HP** 143; **Bloodied** 71 **Initiative** +17
**AC** 34, **Fortitude** 30, **Reflex** 35, **Will** 34 **Perception** +13
**Speed** 6, fly 8 (hover)
**Immune** disease; **Resist** 20 fire

Standard Actions

**Roiling Flame** (fire) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +23 vs. Reflex
*Hit:* 2d6 + 6 fire damage, and ongoing 10 fire damage (save ends).
*Effect:* The conflagration orb shifts 1 square.

**Scorching Bolts** (fire) ✦ **At-Will**
*Attack:* Ranged 10 (one or two creatures); +25 vs. Reflex
*Hit:* 3d6 + 8 fire damage, and ongoing 10 fire damage (save ends).

**Fire Tempest** (fire) ✦ **Recharge** ⚄ ⚅
*Effect:* The conflagration orb makes the following attack three times, and each burst must have an area of effect that doesn't share any squares with the attack's other bursts.
*Attack:* Area burst 1 within 10 (creatures in burst); +25 vs. Reflex
*Hit:* 2d6 + 7 fire damage, and if the target has ongoing fire damage, the ongoing damage increases by 5.

**Waves of Flame** (fire, zone) ✦ **Recharge** when first bloodied
*Attack:* Close burst 3 (creatures in burst); +23 vs. Reflex
*Hit:* 3d6 + 7 fire damage, and the conflagration orb pushes the target 3 squares.
*Effect:* The burst creates a zone that lasts until the end of the orb's next turn. The zone is lightly obscured, and any creature that enters the zone or ends its turn there takes 10 fire damage.

**Str** 19 (+14) **Dex** 25 (+17) **Wis** 17 (+13)
**Con** 17 (+13) **Int** 15 (+12) **Cha** 22 (+16)
**Alignment** chaotic evil **Languages** Primordial

# Chosen of Imix

Imix views his mortal followers as expendable, and he offers them power only as long as they remain useful. Devotees who prove their commitment can attain special status within his cults, rising to become priests within the Fire Lord's mightiest temples.

## Chosen of Imix in Combat

As the highest-ranking members of the Fire Lord's temples, the chosen of Imix wield great power. A chosen of Imix has humanoid forces and elemental thralls at his or her command. Within the confines of temples, the chosen commune directly with the Prince of Elemental Fire, translating their master's desires into orders for their servants. Chosen rarely emerge from their inner sanctums, preferring to engage foes where they can empower their fiery assaults with elemental energy (see "Font of Power," *Dungeon Master's Guide*, page 68). They bring forth servitors to deal with intruders and hurl blazing fireballs from a distance. In the throes of death, a chosen calls out to Imix before erupting into flames.

**Chosen of Imix** **Level 22 Controller (Leader)**
Medium elemental humanoid, genasi XP 4,150

**HP** 207; **Bloodied** 103 **Initiative** +15
**AC** 34, **Fortitude** 33, **Reflex** 32, **Will** 36 **Perception** +12
**Speed** 6
**Resist** 15 fire

Traits

**Fire Within** ✦ **Aura** 5
Allies within the aura gain resist 10 fire.

Standard Actions

**Dagger** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +27 vs. AC
*Hit:* 2d4 + 10 damage, and the target gains vulnerable 10 fire until the end of the chosen's next turn.

**Fiery Orb** (fire) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +25 vs. Reflex
*Hit:* 3d8 + 15 fire damage, and each enemy adjacent to the target takes 5 fire damage.

**Servants of Elemental Fire** (fire) ✦ **Recharge** when no fire grue is within 10 squares of the chosen at the start of its turn
*Effect:* The chosen creates four fire grues, or six while the chosen is bloodied, each in an unoccupied square within 10 squares of it. The grues cannot take actions. Any creature that starts its turn adjacent to one or more grues takes 10 fire damage. The grues have defenses equal to the chosen's and 1 hit point each. A missed attack never damages a grue. Each grue lasts until the end of the encounter or until the chosen ends its turn more than 10 squares from it. As a minor action, the chosen can move each grue up to 6 squares.

**Fire's Fury** (fire) ✦ **Encounter**
*Effect:* The chosen reduces a fire grue within 10 squares of it to 0 hit points and makes the following attack centered on the grue.
*Attack:* Close burst 1 (enemies in burst); +25 vs. Reflex
*Hit:* 2d8 + 8 fire damage, and the target is dazed (save ends).

Triggered Actions

**Demand Focus** ✦ **At-Will**
*Trigger:* An enemy willingly moves away from a fire grue without shifting.
*Attack (Opportunity Action):* Close burst 10 (triggering enemy in burst); +25 vs. Will
*Hit:* The target is slowed until the end of its next turn.

**Firepulse** (fire) ✦ **Encounter**
*Trigger:* An enemy hits the chosen with a melee attack.
*Attack (Immediate Reaction):* Melee 1 (triggering enemy); +25 vs. Reflex
*Hit:* 3d6 + 9 fire damage.

**Claimed by Imix** (fire)
*Trigger:* The chosen drops to 0 hit points.
*Attack (No Action):* Close burst 3 (enemies in burst); +25 vs. Reflex
*Hit:* 2d8 + 9 fire damage, and the target is dazed (save ends).

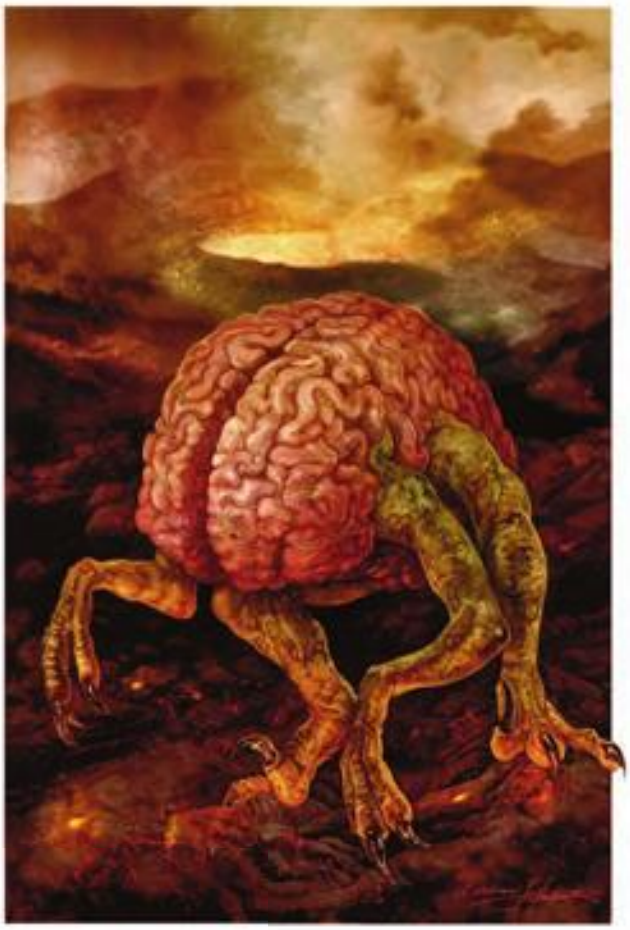
**Skills** Arcana +18, Intimidate +25
**Str** 14 (+13) **Dex** 18 (+15) **Wis** 12 (+12)
**Con** 23 (+17) **Int** 15 (+13) **Cha** 28 (+20)
**Alignment** chaotic evil **Languages** Common, Primordial
**Equipment** dagger

# Intellect Devourer

Of all the terrors of the Underdark, intellect devourers are among the most feared. These hideous creatures carry the taint of the Far Realm, roaming deep tunnels and dank caverns in search of sentient prey. When it attacks, an intellect devourer consumes a foe's psychic energy, drinking deep until only an empty husk remains.

## Lore

**Dungeoneering DC 23:** Intellect devourers are psychic parasites birthed from the madness of the Far Realm. In their larval form, called ustilagors, they are little more than ratlike vermin that skulk in the shadows and feed on the psychic energies of larger creatures. They are said to be formed from the brain tissue of creatures killed by other intellect devourers. As adults (intellect predators), they are more akin to wolves, hunting in packs or serving more intelligent creatures as guard beasts. Those rare few that survive long enough metamorphose a second time, becoming the truly monstrous intellect gluttons, which are also called brain collectors.



## Encounters

Intellect devourers can be found wherever aberrant creatures gather, either among their own kind or in service to more powerful masters. Mind flayers frequently keep intellect devourers as pets and sentries. The largest intellect gluttons sometimes serve as steeds for mind flayers and other cruel creatures.

## Ustilagor

The dwarves at the last outpost had warned the explorers of the ustilagors—the intellect devourer's larval form. It was said that these young lacked the potent powers of their parents. However, when three of the group's vanguard fell shrieking beneath a pack of these horrid creatures, the other explorers were forced to rethink their endeavor.

| **Ustilagor** | **Level 7 Lurker** |
|---|---|
| Small aberrant magical beast (blind) | XP 300 |
| **HP** 59; **Bloodied** 29 | **Initiative** +9 |
| **AC** 21, **Fortitude** 19, **Reflex** 17, **Will** 20 | **Perception** +11 |
| **Speed** 6 | Blindsight 10, blind |
| **Immune** blinded, gaze | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +12 vs. AC | |
| *Hit:* 3d6 + 5 damage. | |
| ⸸ **Clinging Menace** (psychic) ✦ **At-Will** | |
| *Requirement:* The ustilagor must not have a creature grabbed. | |
| *Effect:* The ustilagor jumps 4 squares without provoking opportunity attacks and then makes the following attack. | |
| *Attack:* Melee 1 (one creature granting combat advantage to the ustilagor); +12 vs. AC | |
| *Hit:* 1d6 + 3 damage, and the ustilagor grabs the target. While the target is grabbed by the ustilagor, the target is dazed and takes ongoing 5 psychic damage. | |
| ⸸ **Thought Lash** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +10 vs. Will | |
| *Hit:* 2d6 + 5 psychic damage, and the target grants combat advantage until the end of the ustilagor's next turn. | |
| **Minor Actions** | |
| ⸸ **Cloud Thoughts** (illusion) ✦ **At-Will** (1/round) | |
| *Attack:* Ranged 10 (one creature); +10 vs. Will | |
| *Hit:* The ustilagor becomes invisible to the target (save ends). | |
| **Triggered Actions** | |
| **Mind's Resilience** ✦ **At-Will** | |
| *Trigger:* The ustilagor takes damage while subject to an effect that a save can end. | |
| *Effect (No Action):* The ustilagor makes a saving throw. | |
| **Skills** Stealth +10 | |
| **Str** 16 (+6) **Dex** 15 (+5) **Wis** 16 (+6) | |
| **Con** 11 (+3) **Int** 6 (+1) **Cha** 21 (+8) | |
| **Alignment** chaotic evil **Languages** telepathy 10 | |

## Ustilagors in Combat

Ustilagors hunt in small packs, warily following their prey for hours as they wait for an opportune time to strike. They use *thought lash* against different enemies and then gang up on the first foe to grant combat advantage, until one of them gets an enemy in its clutches with *clinging menace*. A creature grabbed by

WOODROW HINTON III

an ustilagor finds its mind becoming hazy and unfocused as the ustilagor robs it of thought.

## Intellect Predator

The predator paced its attacks at first, its rending claws seeming to judge the strength of each target. Then suddenly the creature was gone. The paladin, who had been parrying the creature's attacks a moment earlier, abruptly let out a mad shriek and turned her sword on her companions.

**Intellect Predator** **Level 14 Controller**
Medium aberrant magical beast (blind) XP 1,000

**HP** 140; **Bloodied** 70 **Initiative** +12
**AC** 25, **Fortitude** 26, **Reflex** 23, **Will** 27 **Perception** +18
**Speed** 8 Blindsight 10, blind
**Immune** blinded, gaze

**Standard Actions**

**Claw ✦ At-Will**
*Attack:* Melee 1 (one creature); +19 vs. AC
*Hit:* 4d6 + 8 damage.

**Body Thief** (charm, psychic) **✦ At-Will**
*Attack:* Melee 1 (one stunned creature); +17 vs. Will
*Hit:* 2d6 + 6 psychic damage, and the target is dominated (save ends; the target takes a -2 penalty to the saving throw). While the target is dominated by the predator, the predator occupies the target's space and cannot be targeted or take damage. The predator cannot use *claw* while the target is dominated. When the target saves, the predator appears in the unoccupied space nearest to the target.
*Aftereffect:* The target is dazed (save ends).

**Thought Lance ✦ Recharge** ⚄ ⁞⁞
*Attack:* Ranged 10 (one creature); +17 vs. Will
*Hit:* The target is stunned until the end of the predator's next turn.

**Mind Shock** (psychic) **✦ Encounter**
*Attack:* Close burst 5 (enemies in burst); +17 vs. Will
*Hit:* 1d6 + 6 psychic damage, and the target is dazed (save ends). In addition, the predator slides the target 1 square.

**Minor Actions**

**Puppet Master** (charm) **✦ At-Will** (1/round)
*Effect:* The predator causes the creature dominated by its *body thief* power to take a move action or a minor action.

**Triggered Actions**

**Mind's Resilience ✦ At-Will**
*Trigger:* The predator takes damage while subject to an effect that a save can end.
*Effect (No Action):* The predator makes a saving throw.

**Skills** Stealth +17
**Str** 16 (+10) **Dex** 20 (+12) **Wis** 16 (+10)

## Intellect Predators in Combat

An intellect predator initially savages its foes with melee attacks to downplay the deadliness of its mental powers. After striking with *thought lance*, a predator then merges with a stunned enemy, dominating it and forcing the creature to attack its own allies.

## Intellect Glutton

The intellect devourers that the adventurers had faced before did not prepare them for the heaping creature that stood before them. The monstrosity had grown bloated from all the intelligence it had consumed. Spiderlike legs supported its swollen bulk. Its crusty carapace bore strange patterns reminiscent of faces—perhaps a last trace of its victims.

**Intellect Glutton** **Level 21 Controller**
Large aberrant magical beast (blind) XP 3,200

**HP** 196; **Bloodied** 98 **Initiative** +16
**AC** 35, **Fortitude** 32, **Reflex** 33, **Will** 35 **Perception** +20
**Speed** 8, climb 6 (spider climb) Blindsight 10, blind
**Immune** blinded, gaze

**Traits**

**Thought Static ✦ Aura** 5
Enemies within the aura take a -2 penalty to Will.

**Standard Actions**

**Claw ✦ At-Will**
*Attack:* Melee 2 (one creature); +26 vs. AC
*Hit:* 3d8 + 16 damage.

**Mind Rend** (fear, psychic) **✦ At-Will**
*Attack:* Ranged 10 (one creature); +23 vs. Will
*Hit:* 1d12 + 7 psychic damage, and the intellect glutton slides the target 1 square.
*Special:* While the intellect glutton has a creature dominated, it can use this power once per round as a minor action.

**Mockery of Life** (charm, healing) **✦ Recharge** when no creature is dominated by this power
*Effect:* One dead creature regains 20 hit points and is dominated until the end of the encounter or until it drops to 0 hit points or fewer.

**Thought Feast** (charm, psychic) **✦ Recharge** when no creature is dominated by this power
*Attack:* Ranged 10 (one creature); +23 vs. Will
*Hit:* The target is dominated and takes ongoing 10 psychic damage (save ends both). While the target is dominated by the intellect glutton, the intellect glutton is insubstantial.

**Triggered Actions**

**Mind's Resilience ✦ At-Will**
*Trigger:* The intellect glutton takes damage while subject to an effect that a save can end.
*Effect (No Action):* The intellect glutton makes a saving throw.

**Skills** Arcana +16, Bluff +23, Insight +20, Stealth +21
**Str** 16 (+13) **Dex** 23 (+16) **Wis** 21 (+15)
**Con** 20 (+15) **Int** 12 (+11) **Cha** 26 (+18)
**Alignment** chaotic evil **Languages** telepathy 10

## Intellect Gluttons in Combat

An intellect glutton's powers develop to such an extent that it no longer needs to merge with a victim. Instead, it can siphon a prey's mind from a distance. While it forces a foe to attack its own allies, a glutton hammers away at other targets with *claw* and *mind rend* attacks. If an enemy or ally is slain, a glutton uses *mockery of life* to revitalize the creature and keep it in combat.

# JACKALWERE

All lands were ravaged when the war between the gods and the primordials shook the world. Primal humanoid tribes were hard-pressed to survive, fighting fiercely with the predators for control of the scattered herds.

In one fierce series of battles, a tribe of ancient humans fought and destroyed a great nation of primal jackals—cunning creatures that had intelligence exceeding that of normal beasts. Alone and destitute, the few surviving jackals howled their fear and fury to the heavens, never suspecting that the primal spirit called Dark Sister would hear their cries. She gave the jackals her gifts, and they became jackalweres.

## Lore

**Nature DC 15:** Jackalweres can be found across the frontiers of humanoid lands; they seldom settle in cities. Though they are skilled hunters, jackalweres exult in deception and cunning as much as in the eventual kill. They are noted for establishing themselves in remote villages, frontier roadhouses, and isolated trading posts. A jackalwere has two forms. In human form, it welcomes visitors, gaining their trust. In jackal form, it can unleash a bloody massacre.

Wild packs of jackalweres forego the trappings of civilization to hunt as their ancestors did. These creatures use their shapechanging talents to throw off suspicion when their attacks on frontier settlements and trade caravans are noticed. Adventurers who are called to investigate a massacre at a wayside inn or the destruction of a small farming community might encounter another party of humans already searching for the killers. Some have accepted an offer from such a group, only to have the group's members transform and tear out the adventurers' throats in the night.

## Encounters

Jackalweres typically travel in packs consisting of a mated pair of deceivers, a coterie of bravos, and a mob of feral harriers—either young jackalweres or wounded survivors from a clash with another pack. Jackalweres in humanoid form often hire mercenaries to aid them, hoping to conceal their true nature in the event of a bandit raid or orc attack. Half-orcs, warforged, and goliaths are favored as mercenaries, because jackalweres have little appetite for the flesh of such creatures.

Lone jackalweres can sometimes be found among followers of Zehir, cults of Asmodeus, and other groups that value treachery and deception. Such jackalweres are typically more civilized than their frontier kin, serving as spies, informants, or assassins.

## Jackalwere Bravo

The younger members of a jackalwere pack are beholden to their elders, acting as servants and menial laborers. These young bravos resent their status, but they cannot slake their thirst for blood until their masters allow it. When they are ordered to attack, their pent-up fury turns them into ravening beasts that never back down.

**Jackalwere Bravo** **Level 3 Brute**
Medium natural humanoid (shapechanger) XP 150

**HP** 56; **Bloodied** 28 **Initiative** +3
**AC** 15, **Fortitude** 16, **Reflex** 15, **Will** 14 **Perception** +1
**Speed** 6

**Traits**

**Bravo's Fury**
The bravo's attacks deal 1d6 extra damage against dazed, helpless, or prone creatures.

**Standard Actions**

⊕ **Bite** ✦ **At-Will**
*Requirement:* The bravo must be in jackal form.
*Attack:* Melee 1 (one creature); +8 vs. AC
*Hit:* 2d6 + 2 damage, and the target falls prone.

⊕ **Falchion** (weapon) ✦ **At-Will**
*Requirement:* The bravo must be in human form.
*Attack:* Melee 1 (one creature); +8 vs. AC
*Hit:* 4d4 + 4 damage. If the bravo scores a critical hit, this attack instead deals 2d4 + 20 damage.

↯ **Howling Frenzy** ✦ **Recharge** when first bloodied
*Effect:* The bravo uses *bite* twice. If both attacks hit the same target, the target is dazed until the end of the bravo's next turn.

**Minor Actions**

**Change Shape** (polymorph) ✦ **At-Will**
*Effect:* The bravo alters its physical form to appear as a Medium jackal or a human until it uses *change shape* again or until it drops to 0 hit points. The creature retains its statistics in its new form. Its clothing, armor, and other possessions do not change. To assume a specific individual's form, the bravo must have seen that individual. Other creatures can make a DC 26 Insight check to discern that eithet form is a disguise.

**Skills** Athletics +9, Bluff +8, Stealth +8

| | | |
|---|---|---|
| **Str** 17 (+4) | **Dex** 15 (+3) | **Wis** 11 (+1) |

**Equipment** falchion

### Jackalwere Bravos in Combat

A jackalwere bravo enters combat in a blood rage. It focuses on targets susceptible to *bravo's fury*. Otherwise, it attacks at random as it tears across the battlefield. Only under the direction of an elder jackalwere do bravos adopt more complex tactics.

## Jackalwere Harrier

Jackalwere packs on the fringes of humanoid society use dark cunning to sate their bloodlust in secret. However, the lowly harriers eschew the trappings of humanoid culture, running as wild as the primal beasts from which they were descended.

*Jackalwere bravo*

| **Jackalwere Harrier** | **Level 3 Minion Soldier** |
|---|---|
| Medium natural humanoid (shapechanger) | XP 38 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +5 |
| **AC** 19, **Fortitude** 16, **Reflex** 17, **Will** 14 | **Perception** +1 |
| **Speed** 6 | |
| **Traits** | |
| **Combat Advantage** | |
| Whenever the harrier hits a creature granting combat advantage to it, that creature falls prone. | |
| **Standard Actions** | |
| ⓘ **Bite** ✦ **At-Will** | |
| *Requirement:* The harrier must be in jackal form. | |
| *Attack:* Melee 1 (one creature); +8 vs. AC | |
| *Hit:* 5 damage. | |
| ⓘ **Dagger** (weapon) ✦ **At-Will** | |
| *Requirement:* The harrier must be in human form. | |
| *Attack:* Melee 1 (one creature); +8 vs. AC | |
| *Hit:* 3 damage, and the target grants combat advantage to the next attack made against it before the start of the harrier's next turn. | |
| **Minor Actions** | |
| **Change Shape** (polymorph) ✦ **At-Will** | |
| *Effect:* The harrier alters its physical form to appear as a Medium jackal or a human until it uses *change shape* again or until it drops to 0 hit points. The creature retains its statistics in its new form. Its clothing, armor, and other possessions do not change. To assume a specific individual's form, the harrier must have seen that individual. Other creatures can make a DC 26 Insight check to discern that either form is a disguise. | |
| **Skills** Athletics +9, Stealth +8 | |

| **Con** 14 (+3) **Int** 10 (+1) **Cha** 14 (+3) | |
| **Alignment** evil **Languages** Common | |
| **Equipment** dagger | |

## Jackalwere Harriers in Combat

As befits their lowly status, harriers are cautious fighters that attack in large groups or not at all. A harrier flanks if fighting alongside bravos or deceivers, forgoing its own attack to aid its more powerful kin.

# Jackalwere Deceiver

In sparsely traveled lands, a frontier roadhouse offers respite for the weary, its proprietor a retired adventurer who welcomes travelers. However, those who pass within the inn's doors stay longer than they intended, interred in deep furrows in the cellar. After the jackalwere deceiver that runs this lonely establishment buries its latest victims, it patiently awaits its next visitors.

| **Jackalwere Deceiver** | **Level 4 Controller** |
|---|---|
| Medium natural humanoid (shapechanger) | XP 175 |
| **HP** 54; **Bloodied** 27 | **Initiative** +5 |
| **AC** 18, **Fortitude** 15, **Reflex** 16, **Will** 16 | **Perception** +3 |
| **Speed** 6 | |
| **Standard Actions** | |
| ⓘ **Bite** ✦ **At-Will** | |
| *Requirement:* The deceiver must be in jackal form. | |
| *Attack:* Melee 1 (one creature); +9 vs. AC | |
| *Hit:* 1d6 + 4 damage, and the target falls prone. | |
| ⓘ **Short Sword** (weapon) ✦ **At-Will** | |
| *Requirement:* The deceiver must be in human form. | |
| *Attack:* Melee 1 (one creature); +9 vs. AC | |
| *Hit:* 2d6 + 5 damage. | |
| **Vicious Howl** (thunder) ✦ **At-Will** | |
| *Requirement:* The deceiver must be in jackal form. | |
| *Attack:* Close blast 3 (enemies in blast); +7 vs. Fortitude | |
| *Hit:* 1d6 + 3 thunder damage, and the target falls prone. | |
| **Gaze of Sleep** (sleep) ✦ **Recharge** ⚄ ⚅ | |
| *Attack:* Ranged 5 (one creature); +7 vs. Will | |
| *Hit:* The target falls unconscious (save ends). Whenever the target takes damage, it can make a saving throw against the effect. | |
| **Minor Actions** | |
| **Change Shape** (polymorph) ✦ **At-Will** | |
| *Effect:* The deceiver alters its physical form to appear as a Medium jackal or a human until it uses *change shape* again or until it drops to 0 hit points. The creature retains its statistics in its new form. Its clothing, armor, and other possessions do not change. To assume a specific individual's form, the deceiver must have seen that individual. Other creatures can make a DC 26 Insight check to discern that either form is a disguise. | |
| **Skills** Bluff +10, Diplomacy +10, Insight +8, Streetwise +10 | |
| **Str** 15 (+4) **Dex** 17 (+5) **Wis** 13 (+3) | |
| **Con** 14 (+4) **Int** 14 (+4) **Cha** 16 (+5) | |
| **Alignment** evil **Languages** Common | |
| **Equipment** short sword | |

## Jackalwere Deceivers in Combat

Whether hunting alone or leading a jackalwere pack, a deceiver is a cunning and patient foe. It avoids combat for as long as possible, using its humanoid form to gain the trust of its enemies. A deceiver singles out a foe as the target of *gaze of sleep*. With that enemy unconscious, it calls the rest of its pack to attack that foe. If pressed, a deceiver adopts its jackal form to harry foes with *vicious howl*.

TOMÁS GIORELLO

# KRAKEN

In the uncharted darkness, alien monstrosities dream of the destruction of all things. At the beginning of time, the monstrous krakens escaped the Far Realm and made their way across the Astral Sea and the mortal realm, trailing the detritus of broken worlds. Krakens emerge from time to time from their dark demesnes, slaughtering at will and leaving nothing but ruin in their wake.

## Lore

**Arcana DC 21:** Krakens existed before mortal life began, at a time when the planes were filled with the mad creatures of the Far Realm. Some say that the Blood War or the Dawn War was the cataclysm that saw these dread creatures scattered and lost. Whatever the cause, krakens are rare in both the world and the Astral Sea.

The sea kraken is a herald of chaos and a primeval force of destruction. It is said to bring forth storms that smash seawalls, topple towers, and drag the bodies of the drowned out to sea. Mighty warships caught in such storms vanish in the grasp of tentacles. The few survivors suffer visions of a great beast rising from the darkness.

The appearance of a kraken in the mortal realm or the Astral Sea is often connected with cult activity, and the foolish ignore the plots of such groups at their peril.

## Encounters

Some of the foulest cults of the mortal and immortal realms worship krakens, and when one of these monstrosities appears, its twisted followers are rarely far behind it. Aberrant creatures see krakens as living avatars of the madness of the Far Realm. With dark rituals, they awaken these creatures from their slumber beneath the waves or in the vast emptiness of the Astral Sea. Like all creatures of the Far Realm, krakens hunger for the destruction of living things. No matter where they first appear, they are inevitably drawn to concentrations of sentient creatures, whether the smallest seaside settlement or a great astral dominion teeming with life.

## Sea Kraken

Beneath the waves it sleeps for untold ages, awaiting some fell sign or calling. The mortal races blithely sail their ships across the sea and build shining cities on its shores. Praying to the gods of the sea and the primal spirits for protection, they forget that the dark water holds terrors older than both.

**Sea Kraken** **Level 10 Solo Soldier**
Gargantuan aberrant magical beast (aquatic) XP 2,500

**HP** 432; **Bloodied** 216 **Initiative** +13
**AC** 24, **Fortitude** 26, **Reflex** 22, **Will** 22 **Perception** +15
**Speed** 6, swim 10 Darkvision
**Saving Throws** +5; **Action Points** 2

**Traits**

**Aquatic**
The sea kraken can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

**Threatening Reach**
The sea kraken can make opportunity attacks against all enemies within 3 squares of it.

**Standard Actions**

**Crushing Tentacles ✦ At-Will**
*Attack:* Melee 3 (one creature); +15 vs. AC
*Hit:* 2d8 + 5 damage, and the kraken grabs the target. The kraken can grab up to eight creatures at one time.
*Sustain Minor:* The kraken sustains all its grabs, and each creature grabbed by the kraken takes 5 damage.

**Devourer of Ships ✦ At-Will**
*Attack:* Melee 3 (one vehicle); +13 vs. Fortitude
*Hit:* 2d10 + 10 damage, and the target is restrained while the kraken remains within 3 squares of it. While restrained by this power, the vehicle takes 20 damage at the start of the kraken's turn. The pilot of the vehicle can spend a standard action to give the vehicle a saving throw. On a save, the vehicle is no longer restrained.

**Coils of Doom ✦ At-Will**
*Effect:* The kraken uses *crushing tentacles* twice and *devourer of ships* once.

**Wavewrack** (zone) **✦ Encounter**
*Effect:* The kraken creates a zone in a close burst 3 that lasts until the end of the encounter. The zone is difficult terrain. Any creature that starts its turn within the zone takes 5 damage and is slid 2 squares. Once per round as a minor action, the kraken can move the zone up to 3 squares.

**Minor Actions**

**Fatal Plunge ✦ At-Will**
*Attack:* Melee 1 (one creature grabbed by the kraken); +13 vs. Fortitude
*Hit:* 1d8 + 5 damage, and the kraken slides the target 3 squares.

**Fling ✦ At-Will**
*Effect:* The kraken slides a creature grabbed by it 5 squares to a square adjacent to a creature. The grab ends, and the kraken makes the following melee attack against both creatures.
*Attack:* +13 vs. Fortitude
*Hit:* 1d8 + 5 damage, and the target falls prone.

**Venom Bolt** (poison) **✦ At-Will** (1/round)
*Attack:* Ranged 10 (one creature); +13 vs. Fortitude
*Hit:* 2d8 + 4 poison damage, and the target is blinded (save ends).

**Triggered Actions**

**Vengeful Constriction ✦ At-Will**
*Trigger:* A creature grabbed by the kraken deals damage to it.
*Effect (Immediate Reaction):* Each creature grabbed by the kraken takes 5 damage.

PETER BERGTING

## Sea Krakens in Combat

A sea kraken rises from a storm-tossed sea to attack a ship and its crew with *coils of doom*. It targets grabbed enemies with *fatal plunge* to pull them into the water as it squeezes the ship to splinters. The kraken refrains from movement to maximize its attacks, striking with *venom bolt* and *fling*.

# Astral Kraken

The stars shimmer and shift as a form materializes from the void. Its writhing, luminescent body appears to be made of stars and shadow, set with the pits of two unblinking black eyes. The astral kraken is a horror of the Far Realm, its tentacles striking to drag mortal creatures into screaming madness.

## Astral Krakens in Combat

Madness precedes an astral kraken and follows in its wake. As the creature's tentacles lash out to surround an *astral skiff* and its crew, the minds of those it seizes are rent by *absorb psyche* and *touch of madness*. An astral kraken makes a full slate of attacks each turn as its sustains its grabs. It dazes foes with *nullifying pulse*, while dominated enemies or those touched by its madness are turned against their own allies.

**Astral Kraken** **Level 25 Solo Controller**
Gargantuan aberrant magical beast XP 35,000

**HP** 928; **Bloodied** 464 **Initiative** +19
**AC** 39, **Fortitude** 41, **Reflex** 37, **Will** 39 **Perception** +24
**Speed** fly 10 (hover) Blindsight 20
**Saving Throws** +5; **Action Points** 2

### Traits

**Threatening Reach**
The astral kraken can make opportunity attacks against all enemies within 4 squares of it.

### Standard Actions

**Tentacles from Beyond** (psychic) ✦ **At-Will**
*Attack:* Melee 4 (one creature); +30 vs. AC
*Hit:* 3d8 + 9 damage, and the kraken grabs the target. The kraken can grab up to eight creatures at one time.
*Sustain Minor:* The kraken sustains all its grabs, and each creature grabbed by the kraken takes 15 psychic damage.

**Absorb Psyche** (psychic) ✦ **At-Will**
*Attack:* Melee 4 (each creature grabbed by the kraken); +28 vs. Will
*Hit:* 2d8 + 9 psychic damage, and until the end of the encounter, the kraken gains a +5 bonus to attack rolls with *touch of madness* against the target.

**Devourer of Ships** ✦ **At-Will**
*Attack:* Melee 4 (one vehicle); +28 vs. Fortitude
*Hit:* 2d10 + 10 damage, and the target is restrained while the kraken remains within 4 squares of it. While restrained by this power, the vehicle takes 20 damage at the start of the kraken's turn. The pilot of the vehicle can spend a standard action to give the vehicle a saving throw. On a save, the vehicle is no longer restrained.

**Touch of Madness** ✦ **At-Will**
*Attack:* Melee 4 (one creature); +28 vs. Will
*Hit:* The target uses its highest-level encounter attack power against a creature or creatures of the kraken's choice. This use of the power does not expend it. The target uses the power even if the power has been expended.

### Minor Actions

**Nullifying Pulse** ✦ **Recharge** ⚄ ⚅
*Attack:* Close blast 4 (enemies in blast); +28 vs. Will
*Hit:* The target is dazed (save ends).

### Triggered Actions

**Psychic Scream** (psychic) ✦ **Encounter**
*Trigger:* The kraken is first bloodied.
*Attack (No Action):* Close burst 10 (enemies in burst); +28 vs. Will
*Hit:* 4d10 + 9 psychic damage, and the target is stunned (save ends).
*Miss:* Half damage, and the target is dazed (save ends).

**Behold the Horror** (charm, psychic) ✦ **At-Will**
*Trigger:* An enemy misses the kraken.
*Attack (Immediate Reaction):* Close burst 10 (triggering enemy in burst); +28 vs. Will
*Hit:* 3d8 + 9 psychic damage, and the target is dominated until the end of its next turn.

**Skills** Stealth +26

# KUO-TOA

The foul and loathsome kuo-toas view themselves as superior to all other creatures. Adventurers and explorers who challenge their mastery of the black seas of the Underdark risk torture, enslavement, and sacrifice at the hands of this unfeeling race.

## Lore

**History DC 23:** Although their inherent madness makes them unpredictable, kuo-toas apply reasonably coherent tactics in combat. Kuo-toa whips and monitors direct the attacks of lashes, cutters, and drowners, all of which fight in concert while they remain under control. If the kuo-toa leaders are overcome, the warriors quickly devolve to a disorganized mob. Some might flee in shock; others willingly sacrifice themselves in doomed attempts to bring down those who killed their leaders.

## Encounters

Kuo-toa war bands incorporate various kinds of foul creatures. On rare occasions, the insular kuo-toas ally with other races out of dark need or for short-term gain. Drow exiles sometimes seek out kuo-toas to help them strike back against their own kind, and githyanki enlist kuo-toas for raids against their former illithid masters. The kuo-toas demand great rewards for their assistance, and these alliances are never long-lived.

## Kuo-Toa Mad One

Many tales are told of the mad ones. The infectious insanity that plagues the kuo-toa race manifests strongly in these specimens. Hidden within crumbling temples and ancient ruins lie artifacts and weapons from the earliest days of the race. Such relics are worth a fortune to any who can find them, but fortune means little when the vengeful mad ones come looking for you.

| **Kuo-Toa Mad One** | **Level 12 Minion Skirmisher** |
|---|---|
| Medium natural humanoid (aquatic) | XP 175 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +12 |

| **Alignment** evil **Languages** – | |

### Kuo-Toa Mad Ones in Combat

Mad ones attack any creatures that enter their cities, ganging up on targets with rending claws and mindless shrieking. When a foe falls, a mad one quickly loses interest in it. Savvy adventurers overwhelmed by kuo-toas can sometimes save themselves by feigning death during a battle and hoping that the mad ones wander away.

## Kuo-Toa Drowner

They swarmed the boat like shadows—powerful kuo-toas armed with wicked hooks and barbed nets. These were the drowners the explorers had been warned of—patient foes that haul their prey down into the murky depths of the Underdark's seas. In dwarven outposts, it is said that the last thing the victim of a drowner sees are its baleful eyes and wicked grin, growing ever darker as the water closes in.

### Kuo-Toa Drowners in Combat

A drowner attacks first with *barbed net,* keeping its foes pinned down as the drowner and its allies move in. It uses *dredging hook* to drag a target into the water, where it gains the advantages of aquatic combat and attempts to drag the victim down.

JASON FELIX

**Kuo-Toa Drowner** **Level 14 Soldier**
Medium natural humanoid (aquatic) XP 1,000

**HP** 137; **Bloodied** 68 **Initiative** +15
**AC** 30, **Fortitude** 26, **Reflex** 26, **Will** 24 **Perception** +8
**Speed** 6, swim 6 Darkvision

**Traits**

**Aquatic**
The drowner can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

**Standard Actions**

**Hook** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +19 vs. AC
*Hit:* 3d8 + 9 damage.

**Dredging Hook** (weapon) ✦ **At-Will**
*Requirement:* The drowner must be wielding a hook.
*Attack:* Melee 1 (one creature); +17 vs. Reflex
*Hit:* 3d8 + 9 damage, and the drowner slides the target 3 squares to a square adjacent to it.

**Barbed Net** (weapon) ✦ **At-Will**
*Attack:* Ranged 5/10 (one creature); +17 vs. Reflex
*Hit:* 2d6 + 6 damage. The target takes 8 extra damage if it moves willingly before the start of the drowner's next turn.

**Move Actions**

**Slick Maneuver** ✦ **At-Will**
*Requirement:* The drowner must be adjacent to an enemy.
*Effect:* The drowner shifts 3 squares to another square adjacent to the enemy.

**Str** 19 (+11) **Dex** 23 (+13) **Wis** 13 (+8)
**Con** 17 (+10) **Int** 13 (+8) **Cha** 18 (+11)
**Alignment** evil **Languages** Deep Speech
**Equipment** hook, 4 barbed nets

# Kuo-Toa Lash

The surprise assault was led by the kuo-toa lashes—a lesser caste of priests tasked with overseeing sacrifices. If the scout and his party weren't careful, they would become that sacrifice.

**Kuo-Toa Lash** **Level 15 Artillery**
Medium natural humanoid (aquatic) XP 1,200

**HP** 115; **Bloodied** 57 **Initiative** +12
**AC** 27, **Fortitude** 28, **Reflex** 27, **Will** 26 **Perception** +10
**Speed** 6, swim 6 Darkvision

**Traits**

**Aquatic**
The lash can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

**Standard Actions**

**Trident** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +20 vs. AC
*Hit:* 2d8 + 9 damage.

**Lightning Trident** (weapon) ✦ **At-Will**
*Attack:* Ranged 3/6 (one creature); +22 vs. AC
*Hit:* 3d8 + 10 lightning damage.
*Effect:* The trident returns to the lash.

**Fill Lungs** ✦ **At-Will**
*Attack:* Ranged 20 (one creature); +20 vs. Fortitude
*Hit:* 2d6 + 7 damage, and the target is slowed and takes ongoing 5 damage (save ends both).

**Forked Lightning** (lightning) ✦ **Recharge** when the lash bloodies an enemy or reduces an enemy to 0 hit points or fewer
*Attack:* Area burst 2 within 10 (one, two, or three creatures in burst); +20 vs. Fortitude
*Hit:* 2d6 + 6 lightning damage, and the target is blinded until the start of the lash's next turn.

**Move Actions**

**Slick Maneuver** ✦ **At-Will**
*Requirement:* The lash must be adjacent to an enemy.
*Effect:* The lash shifts 3 squares to another square adjacent to the enemy.

**Skills** Dungeoneering +15, Religion +14
**Str** 23 (+13) **Dex** 20 (+12) **Wis** 17 (+10)
**Con** 19 (+11) **Int** 15 (+9) **Cha** 18 (+11)
**Alignment** evil **Languages** Deep Speech
**Equipment** trident, ceremonial knife

## Kuo-Toa Lashes in Combat

A lash catches as many enemies as possible with *forked lightning*, invoking the divine wrath of that power each time it recharges. Powerful melee combatants are stricken with *fill lungs*, slowing them so the lash's allies can deal with them.

# Kuo-Toa Cutter

The defenders fought valiantly against the tide of kuo-toa slavers. None noticed the sleek shape that darted behind them until it was too late. The cutter's barbed dagger was a black blur as it struck.

**Kuo-Toa Cutter** **Level 16 Skirmisher**
Medium natural humanoid (aquatic) XP 1,400

**HP** 151; **Bloodied** 75 **Initiative** +17
**AC** 30, **Fortitude** 28, **Reflex** 30, **Will** 27 **Perception** +12
**Speed** 6, swim 6 Darkvision

**Traits**

**Aquatic**
The cutter can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

**Standard Actions**

**Barbed Dagger** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +21 vs. AC
*Hit:* 4d4 + 14 damage.

**Crippling Strike** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature granting combat advantage to the cutter); +21 vs. AC
*Hit:* 2d4 + 4 damage, and the target is slowed and takes ongoing 10 damage (save ends both).

**Move Actions**

**Slick Maneuver** ✦ **At-Will**
*Requirement:* The cutter must be adjacent to an enemy.
*Effect:* The cutter shifts 3 squares to another square adjacent to the enemy.

**Triggered Actions**

**Swift Strike** ✦ **At-Will**
*Trigger:* An enemy misses the cutter with a melee attack.
*Effect (Immediate Reaction):* The cutter shifts 4 squares and uses *barbed dagger*.

**Skills** Acrobatics +20, Stealth +20
**Str** 21 (+13) **Dex** 24 (+15) **Wis** 19 (+12)
**Con** 15 (+10) **Int** 17 (+11) **Cha** 17 (+11)
**Alignment** evil **Languages** Deep Speech
**Equipment** dagger

## Kuo-Toa Cutters in Combat

A kuo-toa cutter stays in constant motion on the battlefield, using *swift strike* to dart from target to target.

# LOLTH

A TEMPESTUOUS REALM where demons carve out empires, the Abyss is home to fiends of every kind, including the dark goddess of the drow, Lolth. Known also as the Demon Queen of Spiders, the Mistress of Lies, and the Lady of Shadows, this exiled goddess is one of the most powerful entities in the Abyss. In its shadowy depths, she nurses ancient hatreds and plans the downfall of those responsible for her exile.

## LORE

**Religion DC 37:** Lolth is a capricious goddess. She subverts and manipulates those in her service, expending them without thought. Her cruelty is legendary. She feasts on the misfortune and misery of her subjects, propagating betrayal and deceit.

Lolth favors the guise of a lithe dark elf woman dressed in a gossamer gown woven from the silk of spiders. Her long, silvery hair cascades down her back and frames a face of exquisite beauty. This appearance is a deception, though; Lolth's true form captures her corrupt nature. In reality, Lolth is a massive spider, a black widow with dripping fangs and eight chitinous legs that support her body, which is bloated on devoured souls.

Lolth lairs in the sixty-sixth layer of the Abyss, a terrible realm known as the Demonweb. In this

### DISCORPORATION

When Lolth drops to one-quarter of her hit points, her mind leaves her body and she is unable to assume physical form for a time. This discorporation usually lasts at least a few months, and it can last up to several years. During this time, Lolth's power is weaker, but it is far from negligible.

If PCs wish to truly kill Lolth, they must fulfill one or more conditions specific to her. This could require destroying her most prominent temple or finding an artifact that can deliver the killing blow. If the specific conditions are satisfied, Lolth cannot discorporate and instead remains present. Here are some sample quests.

**Loom of Fate:** Hidden in Nath Seldarie, Corellon's palace in Arvandor, is the Loom of Fate. Once used by the Spider Queen, this artifact can be used to rearrange the threads of Lolth's destiny. Corellon keeps the artifact safe from Lolth but fears to use it.

**Egg of Lolth:** Finding and destroying the *Egg of Lolth*, an ancient and mysterious artifact, can seal the gates in the Demonweb Pits and prevent the goddess's escape.

**Lolth's Prison:** The adventurers must travel to Lolth's Prison, a demiplane beyond the Demonweb Pits. There, they must destroy the Bone Colossus to recover the *pendant of truth*. Holding this relic before Lolth prevents her discorporation.

**Lolth** — **Level 35 Solo Lurker**
Medium immortal humanoid, drow (shapechanger, god) — XP 235,000

**HP** 634; **Bloodied** 317 — **Initiative** +33
**AC** 51, **Fortitude** 46, **Reflex** 49, **Will** 49 — **Perception** +31
**Speed** 8, climb 8 (spider climb), teleport 8 — Darkvision, blindsight 20
**Immune** poison
**Saving Throws** +5; **Action Points** 2

**TRAITS**

**Lolth's Retribution** (poison)
Whenever an enemy taking ongoing poison damage attacks Lolth, that enemy cannot save against ongoing poison damage until its next turn.

**STANDARD ACTIONS**

**Scourge** (poison, weapon) ✦ **At-Will**
Attack: Melee 3 (one creature); +40 vs. AC
*Hit:* 4d4 + 13 damage, and Lolth slides the target 3 squares.
*Effect:* The target takes ongoing 20 poison damage (save ends).

**Insidious Poison** (charm, poison) ✦ **Recharge** ⚅ ⚄ ⚃
*Effect:* Choose one enemy within 10 squares of Lolth that is taking ongoing poison damage. That enemy makes a basic attack against a creature of Lolth's choice, and the attack deals 3d10 + 9 extra poison damage.

**MINOR ACTIONS**

**Lolth's Kiss** (poison) ✦ **At-Will** (1/round)
*Attack:* Melee 1 (one creature); +38 vs. Reflex
*Hit:* 2d10 + 12 damage, and the target takes ongoing 20 poison damage (save ends).
*Aftereffect:* The target is dazed (save ends).

**Poison Strands** (poison) ✦ **At-Will** (1/round)
*Attack:* Ranged 10 (one creature); +38 vs. Reflex
*Hit:* The target is immobilized (save ends).
*First Failed Saving Throw:* The target is restrained instead of immobilized (save ends).
*Second Failed Saving Throw*: The target is instead restrained and takes ongoing 50 poison damage (save ends both).

**Impenetrable Darkfire** (fire, zone) ✦ **Encounter**
*Attack:* Close burst 5 (creatures in burst); +36 vs. Will
*Hit:* The target is blinded, takes ongoing 20 fire damage and cannot benefit from invisibility or concealment (save ends all).
*Effect:* The burst creates a zone that lasts until the end of Lolth's next turn. The zone blocks line of sight for all creatures but Lolth. Any creature other than Lolth is blinded while within the zone.

**TRIGGERED ACTIONS**

**Dominating Rebuke** (charm) ✦ **At-Will**
*Trigger:* An enemy hits Lolth.
*Effect (Immediate Reaction):* The triggering enemy is dominated until the end of the enemy's next turn.

**Immortal Resilience** ✦ **At-Will**
*Trigger:* Lolth is subjected to an effect that a save can end.
*Effect (No Action):* Lolth makes a saving throw against the effect.

**Form of the Spider Queen** (fear, polymorph) ✦ **Encounter**
*Trigger:* Lolth drops to 0 hit points.
*Attack (No Action):* Close burst 10 (enemies in burst); +36 vs. Will
*Hit:* The target is stunned and gains vulnerable 20 to all damage (save ends both).
*Aftereffect:* Lolth pushes the target its speed, and the target is dazed until the end of its next turn.
*Effect:* Lolth assumes the form of the Spider Queen until the end of the encounter. While in the form of the Spider Queen, she gains new powers and cannot use powers from her former form.

JOHN STANKO

## Lolth in Combat

Lolth guards herself with demonic servants and the most powerful of her loyal drow servitors, and relies on these bodyguards to dispatch those who dare to challenge her in her home. Any adventurers who defeat her guards earn her grudging respect, and her first inclination is to seduce such heroes to her side, weaving intricate webs of deceit and flattery. Those who prove intractable, however, soon discover that her reluctance to join in battle is no indication of weakness.

Lolth fights in her drow form, wielding a terrible barbed scourge that secretes a virulent venom. She uses poison to wrack the bodies and wrench the minds of her foes, turning them upon each other and punishing them when they attack her. When Lolth is seemingly slain, she undergoes a terrible transformation into her true spider form, striking fear into her enemies' hearts. As a spider, she fights with her bite and her blade-tipped legs, spewing acid-coated webs.

## Aspect of Lolth

Lolth does not visit the mortal world, fearing destruction at the hands of Corellon and his allies. Instead, she commands her priestesses to act on her behalf. Sometimes she sends a yochlol as an advisor or a draegloth as an enforcer. To her most devoted servants, she offers a piece of her essence—an aspect of herself.

### Lore

**Religion DC 31:** Most mortals gladly receive their deities' aspects, but Lolth's servants fear to draw the Spider Queen's attention. Lolth instead uses her aspects to influence drow society. An aspect might murder a high-ranking noble and replace that individual. If Lolth disfavors the noble's house, the aspect acts like a cancer on it, consuming its resources and fostering betrayal until the house eventually topples.

### Aspects of Lolth in Combat

An aspect of Lolth moves through drow society, hiding its true form beneath the guise of a beautiful drow female. It might reveal its true nature to the priestesses, or it might hide among them, observing their actions and weighing their worth. When drawn into battle, it discards its disguise and reveals its terrible spider form.

**Aspect of Lolth** **Level 25 Elite Lurker**
Large immortal magical beast (shapechanger, spider) XP 14,000

**HP** 368; **Bloodied** 184 **Initiative** +24
**AC** 38, **Fortitude** 37, **Reflex** 36, **Will** 34 **Perception** +23
**Speed** 6, climb 6 (spider climb) Darkvision, blindsight 5
**Resist** 30 poison
**Saving Throws** +2; **Action Points** 1

**Traits**

**Combat Advantage**
When the aspect of Lolth hits a creature granting combat advantage to it, that creature is weakened and takes ongoing 20 poison damage (save ends both).

**Standard Actions**

**Bite** ✦ **At-Will**
*Attack:* Melee 1 (one creature); +30 vs. AC
*Hit:* 4d6 + 19 damage.

**Acid Webs** (acid) ✦ **Recharge** ⚅ ⚄ ⚃
*Attack:* Close blast 5 (enemies in blast); +28 vs. Reflex
*Hit:* 3d8 + 8 acid damage, and the target is slowed (save ends).
*First Failed Saving Throw:* The target takes ongoing 20 acid damage (save ends).

**Worthy Sacrifice** (zone) ✦ **Recharge** when first bloodied
*Attack:* Area burst 2 within 10 centered on a nonminion demon, drow, or spider ally (enemies in burst); +28 vs. Reflex
*Effect:* The demon, drow, or spider drops to 0 hit points.
*Hit:* The target is immobilized (save ends).
*Effect:* The burst creates a zone that lasts until the end of the encounter. The zone is difficult terrain, and any nonspider that ends its move within the zone is immobilized (save ends).

**Minor Actions**

**Cloud of Darkness** (zone) ✦ **At-Will** (1/round)
*Effect:* The aspect creates a zone in a close burst 1 that lasts until the end of the aspect's next turn. The zone blocks line of sight for all creatures except the aspect. Any creature other than the aspect is blinded while within the zone.

**Change Shape** (polymorph) ✦ **At-Will**
*Effect:* The aspect alters its physical form to appear as a Medium drow until it uses *change shape* again or until it drops to 0 hit points. The creature retains its statistics in its new form. Its clothing, armor, and other possessions do not change. To assume a specific individual's form, the aspect must have seen that individual. Other creatures can make a DC 43 Insight check to discern that the form is a disguise.

**Triggered Actions**

**Impaling Legs** (poison) ✦ **At-Will**
*Trigger:* An enemy moves to a square adjacent to the aspect.
*Attack (Immediate Interrupt):* Melee 1 (triggering enemy); +30 vs. AC
*Hit:* 2d6 + 4 damage, and the target is grabbed. Until the grab ends, the target takes ongoing 10 poison damage.

**Skills** Bluff +26, Diplomacy +26, Insight +23, Intimidate +26
**Str** 29 (+21) **Dex** 27 (+20) **Wis** 23 (+18)
**Con** 28 (+21) **Int** 22 (+18) **Cha** 28 (+21)
**Alignment** chaotic evil **Languages** Supernal

## Eclavdra, Exarch of Lolth

No other of Lolth's servants better reflect the goddess's cruelty and cunning than Eclavdra. This drow priestess won her place at Lolth's side by betraying the Demon Queen, proving she had the intelligence and wherewithal to outwit a goddess. Eclavdra's

EVA WIDERMANN

influence in the world is so great that her name evokes fear to rival that of Lolth.

## Lore

**History DC 28:** Eclavdra embodies the quintessential drow, and as a result, she is the Spider Queen's greatest ally and staunchest foe. Twice, Eclavdra has schemed to depose Lolth. The first time, she allied with the cult of the Elder Elemental Eye, and the second time with Graz'zt. Her machinations failed both times, yet her charm and charisma have helped her remain in good standing with Lolth. Most believe that Lolth, as the mistress of strife and lies, cannot help but admire Eclavdra's audacity.

## Eclavdra in Combat

Eclavdra might prefer gowns and jewelry to armor and shields, but she is no less a warrior. She wields her beauty as a weapon, using seduction to cut through her enemies' resolve. Foes must resist her intoxicating presence; those who cannot deny her allure are dominated or destroyed.

**Eclavdra** **Level 28 Elite Soldier (Leader)**
Medium fey humanoid, drow XP 26,000

**HP** 508; **Bloodied** 254 **Initiative** +26
**AC** 44, **Fortitude** 38, **Reflex** 42, **Will** 40 **Perception** +20
**Speed** 7 Darkvision
**Saving Throws** +2; **Action Points** 1

**Traits**

☼ **Spider Queen's Emissary** ✦ **Aura** 5
Any demon, drow, or spider ally within the aura gains a +2 power bonus to attack rolls and can shift 1 square as a minor action.

**Standard Actions**

⊕ **Tentacle Rod** (weapon) ✦ **At-Will**
*Requirement:* Eclavdra must be wielding a tentacle rod.
*Attack:* Melee 3 (one creature); +33 vs. AC
*Hit:* 3d8 + 18 damage.

⸸ **Tentacle Lash** (weapon) ✦ **At-Will**
*Requirement:* Eclavdra must be wielding a tentacle rod.
*Attack:* Melee 3 (one, two, or three creatures); +33 vs. AC
*Hit:* 3d8 + 18 damage, and the target cannot benefit from immunity or resistance to poison until the end of the encounter. In addition, the target is slowed (save ends).
*First Failed Saving Throw:* The target is immobilized instead of slowed (save ends).
*Second Failed Saving Throw*: The target is immobilized and weakened instead of immobilized (save ends both).

↝ **Insidious Offer** (charm, psychic) ✦ **Recharge** when first bloodied
*Attack:* Ranged 10 (one creature); +31 vs. Will
*Hit:* 1d10 + 9 psychic damage, and the target chooses either to take 30 extra psychic damage or to become dominated (save ends).

**Minor Actions**

⇜ **Entrancing Beauty** (charm, psychic) ✦ **At-Will** (1/round)
*Attack:* Close burst 5 (enemies in burst); +31 vs. Will
*Hit:* 1d6 + 9 psychic damage, and Eclavdra pulls the target 2 squares.

⸸ **On Your Knees** (weapon) ✦ **Recharge** ⚄ ⚅
*Requirement:* Eclavdra must be wielding a tentacle rod.
*Attack:* Melee 3 (one creature); +33 vs. Will
*Hit:* The target falls prone and cannot stand up (save ends).

**Triggered Actions**

**Blinking Escape** (teleportation) ✦ **At-Will**
*Trigger:* Eclavdra is hit by an area or a close attack.
*Effect (Immediate Reaction):* Eclavdra teleports 6 squares and gains concealment until the end of her next turn.

**Skills** Bluff +27, Insight +25, Intimidate +27, Religion +26
**Str** 17 (+17) **Dex** 30 (+24) **Wis** 23 (+20)
**Con** 22 (+20) **Int** 25 (+21) **Cha** 26 (+22)
**Alignment** chaotic evil **Languages** Abyssal, Common, Elven
**Equipment** tentacle rod

Although Eclavdra uses guile and charm, she is also armed with a traditional weapon. She carries a deadly *tentacle rod*, a relic from her days of serving the Elder Elemental Eye. The rod's touch saps strength, slowing foes and robbing them of power.

Like her mistress, Eclavdra avoids situations that are beyond her capabilities. She uses servants to contain her enemies while she remains safe. If diplomacy and magic fail, she blinks away, seeking safety to plot her revenge.

# MEAZEL

Experienced adventurers know the dark tales of the meazels, but most are lucky enough to never encounter proof of those legends. Wretched survivors of a cruel pact with an archdevil, the diseased and disfigured meazels feast on living beings, craving humanoid flesh above all else.

## Lore

**History DC 21:** In ages past, a plague wreaked havoc across an isolated human city. Terror and rage engulfed the residents as riots and fires flared out of control. Just when all seemed lost, a soothing voice was heard in the ears and minds of the city's panicked people.

"Your gods have fled this place. The spirits of the world no longer walk your streets. Your mages' spells have failed you. In your hour of need, I alone hear your pleas." To the wretched victims, this apparition made a simple bargain. In exchange for their fealty, the people of the city would enjoy limitless food, and the plague would cause no more deaths.

History does not record whether these doomed folk made any effort to discover the true nature of their would-be savior, or whether they were too desperate to care. In the end, however, they struck a pact with Baalzebul, duke of Maladomini, the seventh hell. In their desperation to survive, the folk of the city became the first meazels. They were not slain by the plague, as Baalzebul had promised, but instead were stricken with the weeping sores and endless hunger that were its hallmarks.

The meazels found that the food they formerly ate did not nourish them anymore. In search of the limitless food Baalzebul had promised, they left their city for the wide world, where they soon discovered that the flesh of sentient humanoids was the only thing that could nourish their ravening appetites.

## Encounters

Meazels rarely ally with intelligent humanoids, owing to their appearance and their morbid appetite. They do keep wild beasts, including spiders and drakes, as pets and guards. Powerful meazel hunters use ritual magic to summon and bind elementals.

Occasionally, meazels set aside their hunger to work with a group that promises to rid them of their curse. Cults dedicated to Baalzebul's rivals, such as Levistus, sometimes ally with meazels.

## Meazel Bravo

From the shelter of the ruins, a pack of bravos attacked. With no room to spread out, the scouts felt the wretched curse of the meazels like the cold touch of death. As the battle went on, the defenders felt their ability to protect themselves seemingly stripped away.

| **Meazel Bravo** | **Level 11 Brute** |

JASON FELIX

## Meazel Bravos in Combat

Meazel bravos fight under the direction of a tribe's hunters, shielding the hunters and the stranglers from enemies. Their hatred and hunger keeps them in the thick of combat, where they willingly lay down their lives for the tribe.

# Meazel Hunter

The dwarf patrol was in the deepest sublevels of the Nerath ruins when the first volley of black-fletched shafts arced out of the darkness. They took few enough hits, but the dwarves soon discovered that the hunters had coated their arrows with the diseased blood of meazels. The dwarves' best warriors were suddenly doubled over in pain, barely able to move as the shrieking creatures began their full assault.

**Meazel Hunter** **Level 12 Artillery**
Medium natural humanoid XP 700

*Hit:* 2d8 + 5 damage, and the target grants combat advantage until the end of the hunter's next turn.

➶ **Plague-Tainted Shot** (necrotic, weapon) ✦ **Encounter**
*Requirement:* The hunter must be wielding a ranged weapon.
*Attack:* Ranged 20/40 (one creature); +17 vs. Fortitude
*Hit:* 2d8 + 5 damage, and ongoing 10 necrotic damage (save ends). Until the target saves, any ally of the target that starts its turn adjacent to the target takes 10 necrotic damage.

**Skills** Stealth +16
**Str** 15 (+8) **Dex** 20 (+11) **Wis** 17 (+9)
**Con** 10 (+6) **Int** 11 (+6) **Cha** 10 (+6)
**Alignment** chaotic evil **Languages** Common
**Equipment** spear, longbow, 40 arrows

## Meazel Hunters in Combat

Hunters attack from ambush. They climb up rubble and walls to snipe from above. A hunter focuses *distracting shot* on heavily armored targets, granting an advantage to its allies fighting in melee.

# Meazel Strangler

Meazels like their humanoid prey fresh, whole, and screaming. Explorers have learned from grim experience that a meazel strangler's job is to ensure that the choicest targets are snatched from the edge of battle and dragged kicking and screaming to a tribe's bloody feast.

**Meazel Strangler** **Level 13 Controller**
Medium natural humanoid XP 800

**HP** 125; **Bloodied** 62 **Initiative** +11
**AC** 27, **Fortitude** 24, **Reflex** 26, **Will** 24 **Perception** +9
**Speed** 6 Darkvision
**Immune** disease

**Traits**

☼ **Wretched Curse of Baalzebul ✦ Aura** 1
Any enemy that starts its turn within the aura is affected by the curse of Baalzebul until the end of its next turn. While a creature is affected by the curse of Baalzebul, it takes a -2 penalty to all defenses and gains vulnerable 5 to all damage. In addition, any ally of that creature that starts its turn adjacent to the cursed creature becomes affected by the curse of Baalzebul until the end of its next turn. Multiple curses do not stack.

**Standard Actions**

⊕ **Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +18 vs. AC
*Hit:* 2d6 + 10 damage.

⸸ **Garrote** (weapon) ✦ **At-Will**
*Requirement:* The strangler must not have a creature grabbed.
*Attack:* Melee 1 (one creature granting combat advantage to the strangler); +16 vs. Reflex
*Hit:* 1d10 + 5 damage, and the strangler grabs the target.
*Sustain Standard:* The strangler sustains the grab, and the target takes 3d10 + 5 damage.

⸸ **Plague Touch** (necrotic) ✦ **Encounter**
*Attack:* Melee 1 (one creature); +16 vs. Fortitude
*Hit:* 2d6 + 5 damage, and the target is blinded and takes ongoing 5 necrotic damage (save ends both).

**Move Actions**

**Drag to the Feast ✦ At-Will**
*Effect:* The strangler moves its speed, pulling a creature it has grabbed with it. In addition, the creature remains grabbed, and the strangler does not provoke an opportunity attack from the grabbed creature. Any opportunity attacks against the strangler for this movement that miss the meazel instead hit the grabbed creature.

**Skills** Athletics +14, Stealth +16, Thievery +16
**Str** 16 (+9) **Dex** 20 (+11) **Wis** 16 (+9)
**Con** 13 (+7) **Int** 11 (+6) **Cha** 11 (+6)
**Alignment** chaotic evil **Languages** Common
**Equipment** leather armor, short sword, garrote

## Meazel Stranglers in Combat

A meazel strangler is driven by hunger but compelled to keep a victim alive so that its elders in the tribe can feed first. Stranglers flank with each other or with their kin. Once a strangler has an enemy by the neck, it starts dragging the creature away.

# MEENLOCK

The Far Realm has unleashed countless horrors on the world, but few are as feared by the common folk as the meenlocks. The cabins of woodcutters, trappers, and hunters are typically built to be as tough as their inhabitants. However, such folk know enough to line their floors with thick stones, carefully selected and protected by the blessings of gods or primal spirits. These people have heard the old tales of creatures that burrow up from beneath the earth. The meenlocks come to snatch the unguarded, leaving only an empty bed and a dark tunnel plunging into the earth.

## Lore

**Dungeoneering DC 19:** Folk tales speak of various creatures that burrow beneath the homes of woodland settlers. The least threatening of these tales tell of faerie creatures that seek out ale, wine, candies, and other treats, which they carry deep into their burrows for debauched celebrations. The worst of these stories talk about meenlocks, which hunger to transform humanoids into their own corrupt kind. These loathsome mockeries dwell in hidden lairs in the Underdark. They are masters of fey magic and psionic power, infecting victims with a foul psychic corruption that calls them inexorably to the meenlocks' lairs.

These lairs are located in shafts dug deep into the earth in remote dungeons or in isolated swamps and forests. A meenlock lair is well hidden and well guarded, its entrance sealed behind a large rune-covered stone. Spy holes give advance warning of any approach. Pushing aside the stone is easily done (Strength DC 14), but anyone who does so or who enters the lair is exposed to meenlock corruption.

Meenlocks in their lair flee from danger, but they fight to the death if cornered. If a group of meenlocks manages to get safely out of sight, it forms a hunting party that can trail interlopers for days. The creatures wait for the right moment to exact retribution.

Creatures infected with and dominated by meenlock corruption inevitably return to the lair of the meenlocks that exposed them to the disease. A dominated creature kept within the meenlocks' lair for more than two days becomes one of these loathsome creatures. If the meenlock that dominated a creature is slain and its body burned, the victim can be restored to life by the use of both the Remove Affliction and Raise Dead rituals.

## Encounters

Meenlocks usually ally only with other aberrations. They commonly fight alongside foulspawn for the promise of victims to convert to their kind. On rare occasions, a meenlock pack takes up with an evil wizard, a psion, or some other expert in the arcane or psionic arts.

## Meenlock Stalker

The stalker's dark thoughts cut their way into the hunter's mind like a knife, weaving a horrid landscape of chilling visions and maddening whispers. The hunter knew the power by which this creature harvested fresh victims for its nest: a blend of fey magic and the dark power of the Far Realm. As hard as he fought, however, his fear summoned up the whispered tales of what happened to those who fell to a stalker's power—becoming a meenlock first in mind, then in body.

| **Meenlock Stalker** | **Level 9 Controller** |
|---|---|
| Small aberrant humanoid | XP 400 |
| **HP** 97; **Bloodied** 48 | **Initiative** +8 |
| **AC** 23, **Fortitude** 20, **Reflex** 21, **Will** 22 | **Perception** +4 |
| **Speed** 5 | Darkvision |
| **Immune** meenlock corruption | |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +14 vs. AC | |
| *Hit:* 2d6 + 7 damage. | |
| **Maddening Whispers** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature affected by this stalker's *horrid link*); +12 vs. Will | |
| *Hit:* 1d6 + 4 psychic damage, and the target is dazed (save ends). | |
| **Twisting Whispers** (charm, disease, psychic) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature affected by this stalker's *horrid link*); +12 vs. Will | |
| *Hit:* 1d6 + 4 psychic damage, and the target makes a basic attack against one creature of the stalker's choice. The target is then exposed to meenlock corruption (see page xx). | |
| **Move Actions** | |
| **Dimension Step** (teleportation) ✦ **Recharge** ⚅ ⚄ ⚃ | |
| *Effect:* The stalker teleports 8 squares. | |
| **Minor Actions** | |
| **Horrid Link** (psychic) ✦ **Recharge** ⚅ ⚄ ⚃ | |
| *Effect:* The stalker forges a link with one creature within 10 squares of it. The link lasts until the start of the stalker's next turn or until the stalker uses *horrid link* again. Whenever the stalker takes damage, the target of its *horrid link* takes 1d10 + 5 psychic damage. | |
| **Skills** Athletics +9, Stealth +13 | |
| **Str** 10 (+4) **Dex** 18 (+8) **Wis** 11 (+4) | |
| **Con** 17 (+7) **Int** 13 (+5) **Cha** 20 (+9) | |
| **Alignment** chaotic evil **Languages** Common, Deep Speech | |

### Meenlock Stalkers in Combat

A meenlock stalker's battleground is the mind of its victim. A creature affected by the stalker's *horrid link* experiences a waking nightmare of suffocating horror. A stalker focuses on the target of that link, dazing a foe or turning it against its own allies.

## Meenlock Corruptor

The adventurers had seen no sign of any other creatures for the last mile of twisting tunnels, yet the rogue sensed the presence of meenlocks just the same. Meenlock corruptors lurked somewhere in the darkness, using their magic to warp her view of reality. Then suddenly, she drew her sword without knowing why. A nightmarish landscape appeared before her, filled with deadly creatures. She plunged her blade into one, only to realize she had just buried her blade in her companion's back.

**Meenlock Corruptor** **Level 11 Lurker**
Small aberrant humanoid XP 600

**HP** 89; **Bloodied** 44 **Initiative** +13
**AC** 25, **Fortitude** 22, **Reflex** 23, **Will** 24 **Perception** +6
**Speed** 5 Darkvision
**Immune** meenlock corruption

**Standard Actions**

**Claw ✦ At-Will**
*Attack:* Melee 1 (one creature); +16 vs. AC
*Hit:* 3d6 + 5 damage.

**Corrupting Mind** (charm, disease, illusion) **✦ At-Will**
*Attack:* Ranged 10 (one creature); +14 vs. Will
*Hit:* The target is exposed to meenlock corruption. In addition, the target is affected by mental disarray (save ends). While the target is affected by mental disarray, it is dominated, it deals 2d6 extra damage with all attacks, and the corruptor is invisible to the target.
*First Failed Saving Throw:* The target is affected by mental disarray until the end of the encounter. Whenever the target takes 10 damage or more, the corruptor takes an equal amount of damage, and the target can make a saving throw to end the mental disarray.

**Psychic Shriek** (psychic) **✦ Encounter**
*Attack:* Close blast 5 (enemies in blast); +14 vs. Will
*Hit:* 2d6 + 5 psychic damage, and the target falls prone.
*Miss:* Half damage.

**Move Actions**

**Dimension Step** (teleportation) **✦ Recharge** ⚅ ⚄ ⚃
*Effect:* The corruptor teleports 8 squares.

**Skills** Athletics +10, Stealth +14

| | | |
|---|---|---|
| **Str** 10 (+5) | **Dex** 18 (+9) | **Wis** 13 (+6) |
| **Con** 17 (+8) | **Int** 13 (+6) | **Cha** 20 (+10) |

**Alignment** chaotic evil **Languages** Common, Deep Speech

### Meenlock Corruptors in Combat

A meenlock corruptor stays well behind its allies, keeping to the shadows and waiting until the battle begins. A corruptor dominates the strongest melee combatants, turning them against their allies and exposing them to the taint of meenlock corruption.

## Meenlock Corruption

A meenlock's attack can crush a foe's mind, turning it into a puppet under the meenlock's control. Even if the attack is shaken off, the target feels the lingering effect of the psychic corruption these creatures inflict.

**Meenlock Corruption** Level 9 Disease **Insight** improve DC 20, maintain DC 15, worsen DC 14 or lower

The target is cured. ◀ **Initial Effect:** The target takes a -4 penalty to Will. ◀▶ The target grants combat advantage. ▶ **Final State:** Unless prevented from doing so, the target moves toward the lair of the meenlocks that infected it. Treat the target as dominated by meenlocks until the disease is cured.

DAVE ALLSOP

# Mimic

The legend seems little more than a joke when told across a tavern table: A chest of treasure in the deepest recesses of a dungeon suddenly transforms into a monstrosity, attacking those who had been set to loot it a moment earlier. The adventurers who know the true origin of the mimic do not laugh at its deadly threat.

## Lore

**Arcana DC 19:** For countless ages, these creatures of the Far Realm have assumed apparently harmless forms, infiltrated settled lands, and hunted sentient humanoids. Impersonator mimics absorb the language and memories of the creatures they devour, sometimes carrying on the victim's life as normal while scouting for new prey. As an impersonator kills, it eventually splits into new object mimics and mimic spawn, which mature to become impersonator mimics and continue the cycle.

## Encounters

Mimics ally with few creatures other than their own kind and more powerful aberrant monsters. However, mimics in the world and in the Underdark can form a kind of symbiotic relationship with other creatures. Mimics sometimes inhabit the lairs of constructs or incorporeal undead, lurking within the shadows to devour the remains of victims that those monsters cannot consume. Dragons and other powerful creatures sometimes keep object mimics to guard their treasure in return for a steady diet of intruders and explorers.

## Object Mimic

A plain, unadorned chest holds the ancient riches of a long-forgotten king. A barred oak door leads to a chamber of arcane secrets. A priceless work of art hangs within easy reach. The object mimic is a deadly predator, using curiosity and greed to lure duped prey into its ravenous maw.

| **Object Mimic** | **Level 8 Lurker** |
|---|---|
| Medium aberrant magical beast | XP 350 |
| **HP** 71; **Bloodied** 35 | **Initiative** +11 |
| **AC** 23, **Fortitude** 21, **Reflex** 19, **Will** 21 | **Perception** +14 |
| **Speed** 5 | Darkvision, tremorsense 5 |
| **Resist** 5 acid | |

**Traits**

**Ambush**

The object mimic deals 2d6 extra damage against surprised creatures.

**Standard Actions**

**Slam ✦ At-Will**

*Attack:* Melee 1 (one creature); +13 vs. AC

*Hit:* 2d8 + 7 damage.

**Crushing Tendrils** (acid) **✦ At-Will**

*Attack:* Melee 3 (one creature); +13 vs. AC

*Hit:* 1d8 + 4 damage, and the mimic grabs the target. The target takes a -5 penalty to attempts to escape the grab.

*Sustain Standard:* The object mimic sustains the grab, and the target takes 15 acid damage.

**Ravening Maw ✦ Recharge** ⚄ ⁞⁞

*Attack:* Melee 2 (one creature); +13 vs. AC

*Hit:* 2d8 + 11 damage, and the target is slowed (save ends).

**Minor Actions**

**Shapeshift** (polymorph) **✦ At-Will** (1/round)

*Effect:* The mimic assumes one of the following forms. It can't change its size. It remains in the chosen form until it uses this power again.

*Ooze Form:* The mimic becomes an ooze. When it squeezes while it is in this form, it moves at full speed rather than half speed, it doesn't take the -5 penalty to attack rolls, and it doesn't grant combat advantage for squeezing,

*Object Form:* While in this form, the mimic has resist 10 to all damage, is immobilized, and cannot attack. In addition, a creature must succeed on a DC 24 Perception check to notice that the mimic is a living creature.

**Skills** Bluff +11, Stealth +12

| | | |
|---|---|---|
| **Str** 20 (+9) | **Dex** 16 (+7) | **Wis** 21 (+9) |
| **Con** 17 (+7) | **Int** 19 (+8) | **Cha** 15 (+6) |

**Alignment** unaligned **Languages** Common, Deep Speech

### Object Mimics in Combat

An object mimic initiates combat by posing as an object designed to entice its prey close. When it senses a potential meal, the mimic abandons its object form and attacks. When multiple object mimics lair together, they coordinate their forms according to the features of the area.

When sorely pressed, an object mimic flees combat. Once out of sight, it transforms into a rock or some other nondescript object. Many adventurers, hot in pursuit of a fleeing mimic, have run past it and later been attacked from behind.

THOMAS M. BAXA

# Impersonator Mimic

A young girl begs for bread at the door, and an old lady's act of kindness is her last. Then, in the form of the old lady, an impersonator mimic lures a passing farmhand inside, begging for help moving a table. Next, as the farmhand, it accompanies a team of woodcutters. For the mimic, each persona it assumes means another victim's unmarked grave.

**Impersonator Mimic** **Level 16 Controller**
Medium aberrant magical beast XP 1,400

**HP** 160; **Bloodied** 80 **Initiative** +14
**AC** 30, **Fortitude** 27, **Reflex** 28, **Will** 27 **Perception** +13
**Speed** 6 Darkvision, tremorsense 5
**Resist** 10 acid

**Standard Actions**

**Slam ✦ At-Will**
*Attack:* Melee 2 (one creature); +21 vs. AC
*Hit:* 3d8 + 11 damage.

**Forcible Conversion** (charm) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Melee 2 (one creature); +19 vs. Fortitude
*Hit:* The target is dominated (save ends).

**Minor Actions**

**Call to Harvest** (charm) ✦ **At-Will** (1/round)
*Attack:* Ranged 10 (one creature); +19 vs. Will
*Hit:* The mimic slides the target 4 squares, and the target grants combat advantage until the end of the mimic's next turn.

**Shapeshift** (polymorph) ✦ **At-Will** (1/round)
*Effect:* The mimic assumes one of the following forms. It can't change its size. It remains in the chosen form until it uses this power again.
*Ooze Form:* The mimic becomes an ooze. When it squeezes while it is in this form, it moves at full speed rather than half speed, it doesn't take the -5 penalty to attack rolls, and it doesn't grant combat advantage for squeezing,
*Humanoid Form:* The mimic gains a +4 bonus to Bluff checks. In addition, it can use all the languages known by the last humanoid creature it killed.
*Object Form:* While in this form, the mimic has resist 10 to all damage, is immobilized, and cannot attack. In addition, a creature must succeed on a DC 31 Perception check to notice that the mimic is a living creature.

**Free Actions**

**Absorb ✦ At-Will** (1/round)
*Requirement:* The mimic can use *absorb* only during its turn.
*Effect:* The mimic reduces one mimic spawn that is adjacent to it or occupying its space (see the mimic spawn's *one with master* power) to 0 hit points. When it does so, it gains 1 action point.

**Skills** Bluff +20 (+24 while the mimic is in humanoid form), Stealth +19
**Str** 21 (+13) **Dex** 22 (+14) **Wis** 20 (+13)
**Con** 24 (+15) **Int** 26 (+16) **Cha** 24 (+15)
**Alignment** unaligned **Languages** Common, Deep Speech

## Impersonator Mimics in Combat

An impersonator mimic hunts by luring prey into a trap. In ruins and other remote locations, an impersonator's lair is inhabited by mimic spawn posing as objects suited to the environment.

# Mimic Spawn

They scuttle and crawl through windows, doors, and chimneys in search of prey. Each mimic spawn shares the horrid form of an impersonator mimic, shifting shape under its master's direction.

**Mimic Spawn** **Level 16 Minion Lurker**
Medium aberrant magical beast XP 350

**HP** 1; a missed attack never damages a minion. **Initiative** +18
**AC** 30, **Fortitude** 27, **Reflex** 29, **Will** 26 **Perception** +13
**Speed** 6 Darkvision, tremorsense 5
**Resist** 10 acid

**Traits**

**One with Master**
The mimic spawn can end its move in the same space as an impersonator mimic. While it occupies an impersonator mimic's space, the mimic spawn moves with the impersonator mimic and cannot attack, be targeted, or take damage. Up to four mimic spawns can occupy an impersonator mimic's space.

**Standard Actions**

**Slam ✦ At-Will**
*Attack:* Melee 1 (one creature); +21 vs. AC
*Hit:* 12 damage.

**Minor Actions**

**Shapeshift** (polymorph) ✦ **At-Will** (1/round)
*Effect:* The mimic assumes one of the following forms. It can't change its size. It remains in the chosen form until it uses this power again.
*Ooze Form:* The mimic becomes an ooze. When it squeezes while it is in this form, it moves at full speed rather than half speed, it doesn't take the -5 penalty to attack rolls, and it doesn't grant combat advantage for squeezing,
*Object Form:* While in this form, the mimic has resist 10 to all damage, is immobilized, and cannot attack. In addition, a creature must succeed on a DC 31 Perception check to notice that the mimic is a living creature.

**Skills** Stealth +19
**Str** 21 (+13) **Dex** 22 (+14) **Wis** 20 (+13)
**Con** 24 (+15) **Int** 26 (+16) **Cha** 24 (+15)
**Alignment** unaligned **Languages** Common, Deep Speech

## Mimic Spawn in Combat

Mimic spawn stay in object form until prey is engaged in combat. The spawn stay close to their impersonator master, ready to sacrifice themselves for its sake.

# MIND FLAYER

Within their dismal cities in the Underdark, these aberrant monstrosities watch as their thralls dutifully erect monuments glorifying them and the dark creatures they revere. Mind flayers communicate their foul plans to each other without words, plotting raids against the subterranean cities of the drow and dwarves or undertaking dark experiments filled with madness and death.

## Lore

**Dungeoneering DC 27:** Even the most malign races of the Underdark are loath to deal with mind flayers. Drow and duergar can recount the legends of illithid assaults against their settlements, their kin taken prisoner or left as brainless corpses scattered throughout the ruined remains of their cities. Illithids seek the downfall and subjugation of all other races. They might work to accomplish this through a single mind flayer heading a clandestine cabal of dark magic, or through a host of dread creatures led by the peerless intellect of an elder brain.

Although all mind flayers inspire fear in combat, the Thoon hulks strike terror into the hearts of even hardened Underdark explorers. Thoon is an entity that remains a mystery to all except the mind flayers, which speak of it with a reverence normally accorded to a god. The process of transformation that creates a Thoon hulk drives the creature mad, but in its insanity, it seems to attain a better understanding of what Thoon is.

An elder brain controls all the creatures within a collective—an extended community of mind flayers and their slaves. Each brain coordinates the defenses of its city or enclave, and its link to its servants provides the creature with intelligence across a wide area. All elder brains have an insatiable appetite for knowledge, and they dedicate vast resources to pillaging ancient libraries, capturing lost artifacts and relics, and kidnapping followers of Ioun and Vecna.

When a group of illithids passes a specific tipping point in size and knowledge, its wisest member is chosen to undergo a transformation. The mind flayer's head is severed from its body and placed in a vat of protoplasmic fluid. Psionic crystals act as conduits that allow members of the collective to pour their knowledge into the brain of the chosen. Over decades, the creature grows larger and more powerful. Eventually, it becomes an elder brain—repository for the illithid collective's lore and a mastermind for the collective's schemes.

## Encounters

Most allies of mind flayers are weak-willed thralls that have been bent to service. Although a lone mind flayer or a small group might occasionally work with renegade drow, devils, star spawn, or other twisted humanoids, the illithids do so only on their own terms. Mind flayers are known to enslave virtually any humanoid race, using the creatures as soldiers or laborers. Common thralls include troglodytes, grimlocks, kuo-toas, trolls, derros, foulspawn, and duergar. A mind flayer collective might also control aberrant beasts such as carrion crawlers, gricks, chuuls, balhannoths, and neogi.

EVA WIDERMANN

# Mind Flayer Inquisitor

Even the thieves' guild steered clear of the dark caverns that spread beneath the city, so when the first bodies were found, no one knew who to blame. Nobles, sages, and spellcasters had begun disappearing, each found days or weeks later washed up in the sewer channels with his or her brains torn out. Some in the city guard suspected demon cultists, while others searched for evidence of an evil cabal of spellcasters. None suspected the more horrifying truth—or could guess at the full extent of its threat.

| **Mind Flayer Inquisitor** | **Level 20 Controller** |
|---|---|
| Medium aberrant humanoid | XP 2,800 |
| **HP** 190; **Bloodied** 95 | **Initiative** +15 |
| **AC** 34, **Fortitude** 31, **Reflex** 33, **Will** 33 | **Perception** +16 |
| **Speed** 7 | Darkvision |

**Standard Actions**

**Tentacles ✦ At-Will**
*Requirement:* The inquisitor must not have a creature grabbed.
*Attack:* Melee 1 (one creature); +23 vs. Reflex
*Hit:* 3d6 + 13 damage, and the inquisitor grabs the target.

**Implant Delusions** (charm, psychic) **✦ At-Will**
*Attack:* Melee 1 (one creature grabbed by the inquisitor); +23 vs. Will
*Hit:* 3d8 + 15 psychic damage, and the target begins suffering delusions (save ends). While the target is suffering delusions, allies adjacent to it take a -2 penalty to attack rolls and a -2 penalty to all defenses.

**Mind Blast** (psychic) **✦ Recharge** ⚄ ⁞⁞
*Attack:* Close blast 5 (enemies in blast); +23 vs. Will
*Hit:* 2d8 + 6 psychic damage, and the target is dazed (save ends).
*Miss:* Half damage.

**Own Worst Enemy** (charm) **✦ Recharge** when first bloodied
*Effect:* Each enemy in an area burst 2 within 10 squares uses one of its ranged or melee at-will attack powers of the mind flayer's choice against itself as a free action.

**Minor Actions**

**Unwilling Confession** (charm) **✦ At-Will** (1/round)
*Attack:* Close burst 10 (one creature in burst); +23 vs. Will
*Hit:* The target is dazed, cannot be the target of healing powers, and cannot be affected by powers that grant a saving throw (save ends all).

**Triggered Actions**

**Forceful Submission ✦ At-Will**
*Trigger:* An enemy the inquisitor can see succeeds on a saving throw.
*Effect (Immediate Interrupt):* The triggering enemy makes the saving throw again with a -2 penalty.

**Skills** Bluff +22, Insight +21

| | | |
|---|---|---|
| **Str** 20 (+15) | **Dex** 20 (+15) | **Wis** 22 (+16) |
| **Con** 22 (+16) | **Int** 24 (+17) | **Cha** 25 (+17) |

**Alignment** evil **Languages** Deep Speech, telepathy 10

## Mind Flayer Inquisitors in Combat

A mind flayer inquisitor surrounds itself with lesser creatures, typically soldiers or brutes, which protect it while it sows chaos and strife among its foes. An inquisitor that grabs an enemy implants delusions that cause the target to hinder its own allies in combat. *Unwilling confession* can draw secrets from an enemy's mind, which the mind flayer then reveals telepathically during battle, hoping to sow conflict between the victim and its allies.

# Mind Flayer Scourge

As the psionic powers of the mind flayers were honed over countless generations, inhabitants of the surface were also learning and refining psionic disciplines. The first psions, battleminds, and ardents were tested in the Underdark. They sought out the lairs of the mind flayers, trying to steal the secrets of psionic power. Mind flayers began training warriors specialized in dealing with these psionic interlopers, and from that effort, the mind flayer scourge arose.

| **Mind Flayer Scourge** | **Level 21 Skirmisher** |
|---|---|
| Medium aberrant humanoid | XP 3,200 |
| **HP** 199; **Bloodied** 99 | **Initiative** +18 |
| **AC** 35, **Fortitude** 31, **Reflex** 34, **Will** 33 | **Perception** +16 |
| **Speed** 7 | Darkvision |
| **Resist** 10 psychic | |

**Traits**

**Mind Leech**
Whenever the mind flayer scourge starts its turn with a creature grabbed, the scourge can make a saving throw or an extra recharge roll. It can recharge *psychic assault* but must roll a 6 on the recharge roll.

**Standard Actions**

**Tentacles ✦ At-Will**
*Requirement:* The scourge must not have a creature grabbed.
*Attack:* Melee 1 (one creature); +24 vs. Reflex
*Hit:* 2d8 + 5 damage, and the scourge grabs the target. Until the grab ends, the target is dazed.

**Mind Blast** (psychic) **✦ Recharge** ⚄ ⁞⁞
*Attack:* Close blast 5 (enemies in blast); +24 vs. Will
*Hit:* 2d8 + 5 psychic damage, and the target is dazed (save ends).
*Miss:* Half damage.

**Psychic Assault** (charm) **✦ Encounter**
*Attack:* Melee 1 (one creature grabbed by the scourge); +24 vs. Will
*Hit:* 1d8 + 5 damage, and the target is dominated (save ends; the target takes a -4 penalty to the saving throw).
*Miss:* Half damage, and the target is dominated (save ends).

**Minor Actions**

**Alter Reality** (teleportation) **✦ At-Will**
*Effect:* The scourge teleports a creature adjacent to it 2 squares.

| | | |
|---|---|---|
| **Str** 20 (+15) | **Dex** 23 (+16) | **Wis** 22 (+16) |
| **Con** 23 (+16) | **Int** 26 (+18) | **Cha** 25 (+17) |

**Alignment** evil **Languages** Deep Speech, telepathy 10

## Mind Flayer Scourges in Combat

Scourges guard the perimeters of mind flayer territories in the Underdark. They also make up the raiding parties that strike select targets both belowground and on the surface. A scourge uses its powers to evade and distract its enemies, preventing it from being tied down in melee. *Mind blast* softens up foes

for its allies. The scourge then uses *psychic assault* to dominate a spellcaster or a psionic creature, forcing that individual to unleash its powers against its comrades.

## Thoon Hulk

The darkest legends of the illithids speak of the dire experiments they put their slaves and captives through. However, explorers of the deepest Underdark inevitably discover that these vile creatures have no compunction against performing the same experiments on their own kind. Thoon hulks are the product of generations of alchemical and psychic enhancement. Their minds are dulled, their powers enhanced, and their bodies stretched to the limits of physical endurance. A Thoon hulk is wholly obedient to the whims of its masters, but its dread transformation keeps it permanently on the brink of madness.

### Thoon Hulks in Combat

Thoon hulks can be encountered in the service of other aberrants, including mind flayers, star spawn, and aboleths. A Thoon hulk tears across the battlefield, using *mind blast* to hinder its foes as it grabs and eviscerates one of them. It uses *call of Thoon* to draw in a ranged attacker or a spellcaster lurking at the edge of the fray, but otherwise it focuses on the nearest foes.

| **Thoon Hulk** | **Level 22 Brute** |
|---|---|
| Large aberrant humanoid, mind flayer | XP 4,150 |
| **HP** 255; **Bloodied** 127 | **Initiative** +18 |
| **AC** 34, **Fortitude** 35, **Reflex** 33, **Will** 32 | **Perception** +19 |
| **Speed** 6 | Darkvision |
| **Resist** 10 psychic | |

**Standard Actions**

**Eviscerate ✦ At-Will**
*Attack:* Melee 2 (one creature); +27 vs. AC
*Hit:* 4d10 + 16 damage (6d10 + 16 against a creature grabbed by the Thoon hulk).

**Mind Blast** (psychic) ✦ **Recharge** ⚅
*Attack:* Close blast 5 (enemies in blast); +25 vs. Will
*Hit:* 1d12 + 7 psychic damage, and the target is dazed (save ends).

**Call of Thoon** (charm, psychic) ✦ **Encounter**
*Attack:* Ranged 10 (one creature); +25 vs. Will
*Hit:* 4d12 + 20 psychic damage.
*Effect:* The Thoon hulk pulls the target 10 squares to a square adjacent to it.

**Minor Actions**

**Tentacles ✦ At-Will**
*Requirement:* The Thoon hulk must not have a creature grabbed.
*Attack:* Melee 1 (one creature); +25 vs. Reflex
*Hit:* The Thoon hulk grabs the target.

**Triggered Actions**

**Psychic Explosion** (psychic)
*Trigger:* The Thoon hulk drops to 0 hit points.
*Attack (No Action):* Close burst 2 (enemies in burst); +26 vs. Will
*Hit:* Ongoing 15 psychic damage (save ends).

DAVE ALLSOP

# Elder Brain

The many forays the dwarves had made against the mind flayers could not have prepared them for what they faced in the end. The legends of the elder brain were true, but the worst of those legends could not convey the intellect and terrible cunning of this aberrant horror. Lurking at the heart of the illithids' vast city, the elder brain shared a psychic connection with the creatures that served it. By the time the dwarves arrived at the elder brain's lair, it had called up an army to repel the team's assault.

| **Elder Brain** | **Level 23 Elite Controller** |
|---|---|
| Large aberrant magical beast (blind) | XP 10,200 |
| **HP** 436; **Bloodied** 218 | **Initiative** +17 |
| **AC** 37, **Fortitude** 33, **Reflex** 35, **Will** 37 | **Perception** +19 |
| **Speed** 2, teleport 6 | Blindsight 10, blind |
| **Immune** blinded, gaze | |
| **Saving Throws** +2; **Action Points** 1 | |
| **Traits** | |
| ☼ **Warp Reality** ✦ **Aura** 5 | |
| Any enemy that teleports while within the aura takes 10 damage. | |
| **Absorb Thoughts** | |
| Whenever a nonminion ally within 10 squares of the elder brain drops to 0 hit points, the elder brain makes a saving throw or a power recharge roll. | |
| **Unseeing Telepathy** | |
| The elder brain can communicate with other creatures telepathically even if it does not have line of effect to those creatures. | |
| **Standard Actions** | |
| ⊕ **Tentacle Warp** (teleportation) ✦ **At-Will** | |
| *Attack:* Melee 3 (one creature); +26 vs. AC | |
| *Hit:* 1d8 + 8 damage. The elder brain teleports the target 3 squares, and the target is immobilized until the end of the elder brain's next turn. | |
| ⊕ **Flailing Warp** ✦ **At-Will** | |
| *Effect:* The elder brain uses *tentacle warp* three times, making each attack against a different target. | |
| ✧ **Mind Burst** (psychic) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close burst 5 (enemies in burst); +27 vs. Will | |
| *Hit:* 3d8 + 6 psychic damage, and the target is dazed (save ends). | |
| *Miss:* Half damage. | |
| **Minor Actions** | |
| ✧ **Sensory Overload** (psychic, teleportation) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close burst 5 (enemies in burst); +27 vs. Will | |
| *Hit:* 2d8 + 6 psychic damage, and the target is blinded and deafened until the end of the elder brain's next turn. The elder brain then teleports the target 3 squares. | |
| **Triggered Actions** | |
| **Baleful Transfer** ✦ **At-Will** | |
| *Trigger:* The elder brain saves against an effect. | |
| *Effect (No Action):* An enemy within 5 squares of the elder brain is subjected to the same effect the elder brain saved against (save ends). | |
| **Skills** Arcana +25, Bluff +24, Diplomacy +24, Dungeoneering +24, | |
| **Str** 23 (+17) **Dex** 23 (+17) **Wis** 26 (+19) | |
| **Con** 26 (+19) **Int** 28 (+20) **Cha** 27 (+19) | |
| **Alignment** evil **Languages** Deep Speech, telepathy 50 | |

FRANZ VOHWINKEL

## Elder Brains in Combat

An elder brain is typically encountered at the center of an illithid city or enclave. It lies in a pool of ooze that enhances its powers, allowing it to communicate with its followers across vast distances. An elder brain exercises absolute authority over the creatures under its command, and it is always heavily guarded. However, an elder brain's arrogance inevitably pulls it into combat. It hits its foes as often as possible with *mind burst*, using *flailing warp* and *sensory overload* against the nearest melee combatants. If an elder brain's allies are defeated and it is bloodied, the creature tries to save itself, offering knowledge or wealth in exchange for its life.

# MINOTAUR

The history of the bestial minotaurs is red with slaughter and rife with secrets as dark and twisted as the labyrinths in which they dwell. The most potent of these secrets are kept by the minotaurs of the Blood League—warriors that steal the power of other creatures by consuming their still-beating hearts.

## Lore

**Arcana DC 23:** Only the most depraved minotaurs are inducted into the Blood League, a group that practices rituals that can steal the power of other creatures by consuming their beating hearts. Victims are hunted, pushed to the limits of their endurance, within a labyrinth under the league's control.

## Encounters

Minotaurs of the Blood League work with servants of Torog and Baphomet, whose ideals and methods mesh with their own. Mind flayers also work alongside the league. In exchange for their service, the illithids get to devour the brains of victims.

## Pale Bloodfiend

Those who know of the blasphemous ritual that creates these vampiric creatures fear the bloodfiend minotaurs, and stories of their battle prowess make the creatures all the more terrifying.

| **Pale Bloodfiend** | **Level 12 Brute** |
|---|---|
| Medium natural humanoid, minotaur | XP 700 |
| **HP** 140; **Bloodied** 70 | **Initiative** +11 |
| **AC** 24, **Fortitude** 25, **Reflex** 24, **Will** 23 | **Perception** +10 |
| **Speed** 8 | Darkvision |
| **Standard Actions** | |
| ⊕ **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. AC | |
| *Hit:* 2d8 + 6 damage. | |
| ⸸ **Double Claw** ✦ **At-Will** | |
| *Requirement:* The bloodfiend must not have a creature grabbed. | |
| *Effect:* The bloodfiend uses *claw* twice against the same target. If both attacks hit, the bloodfiend grabs the target. | |
| ⸸ **Goring Charge** ✦ **At-Will** | |
| *Effect:* The bloodfiend charges and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d10 + 10 damage, and the target falls prone. | |
| **Minor Actions** | |
| ⸸ **Heart of the Vampire** (healing) ✦ **Recharge** at the end of the bloodfiend's turn if the power misses | |
| *Attack:* Melee 1 (one creature grabbed by the bloodfiend); +15 vs. Fortitude | |
| *Hit:* 2d6 + 6 damage, and the target is dazed and weakened (save ends both). The bloodfiend regains 20 hit points. | |
| **Triggered Actions** | |
| ⸸ **Bloodfiend Ferocity** | |
| *Trigger:* The bloodfiend drops to 0 hit points. | |
| *Effect (Immediate Interrupt):* The bloodfiend uses *claw*. If the attack hits, the target is dazed until the end of the target's next turn. | |
| **Skills** Athletics +17, Intimidate +15 | |
| **Str** 22 (+12) **Dex** 20 (+11) **Wis** 19 (+10) | |
| **Con** 20 (+11) **Int** 19 (+10) **Cha** 19 (+10) | |
| **Alignment** evil **Languages** Common | |

### Pale Bloodfiends in Combat

A pale bloodfiend charges howling into battle, ignoring all threats as it lays into foes with *double claw*. Once bloodied, it seeks out a suitable target for *heart of the vampire*.

## Cinderhoof Trampler

This minotaur smells of brimstone and burning hair. A cinderhoof trampler has the qualities of the nightmare whose heart it consumed. As the creature charges, its hooves ignite with hellfire.

| **Cinderhoof Trampler** | **Level 13 Skirmisher** |
|---|---|
| Medium natural humanoid, minotaur | XP 800 |
| **HP** 132; **Bloodied** 66 | **Initiative** +14 |
| **AC** 27, **Fortitude** 26, **Reflex** 26, **Will** 23 | **Perception** +10 |
| **Speed** 8 | |
| **Resist** 10 fire | |
| **Traits** | |
| **Combat Advantage** (fire) | |
| Whenever the trampler hits a creature granting combat advantage to it, that creature takes ongoing 10 fire damage (save ends). | |
| **Standard Actions** | |
| ⊕ **Gore** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d10 + 5 damage. | |
| ⸸ **Goring Charge** ✦ **At-Will** | |
| *Effect:* The trampler charges and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 1 (one creature); +19 vs. AC | |
| *Hit:* 2d10 + 10 damage, and the target falls prone. | |
| ⸸ **Heart of the Nightmare** (fire) ✦ **Recharge** ⚅ | |
| *Effect:* The trampler moves its speed and can move through enemies' spaces during the move. Any creature that hits the trampler with an opportunity attack provoked by this movement takes 10 fire damage. Each time the trampler enters an enemy's space for the first time during the move, it makes the following attack against that enemy. | |
| *Attack:* Melee 0; +16 vs. Reflex | |
| *Hit:* 3d6 + 7 damage, and the enemy falls prone. | |
| **Triggered Actions** | |
| ⸸ **Trampler Ferocity** | |
| *Trigger:* The trampler drops to 0 hit points. | |
| *Effect (Immediate Interrupt):* The trampler uses *gore*. If the attack hits, the trampler pushes the target 2 squares and knocks it prone. | |
| **Skills** Athletics +17, Stealth +17 | |
| **Str** 22 (+12) **Dex** 22 (+12) **Wis** 19 (+10) | |
| **Con** 20 (+11) **Int** 19 (+10) **Cha** 22 (+12) | |
| **Alignment** evil **Languages** Common | |

### Cinderhoof Tramplers in Combat

A cinderhoof trampler charges constantly across the battlefield, using *heart of the nightmare* as often as possible. It focuses its attacks on prone targets, which feel the fury of its fiery hooves.

## Ironskin Warrior

The most powerful members of the Blood League worship the gorgon as the epitome of a bull's form.

| **Ironskin Warrior** | **Level 14 Soldier** |
|---|---|
| Medium natural humanoid, minotaur | XP 1,000 |
| **HP** 140; **Bloodied** 70 | **Initiative** +15 |
| **AC** 30, **Fortitude** 27, **Reflex** 26, **Will** 25 | **Perception** +13 |
| **Speed** 6 | |
| **Resist** 10 poison | |
| **Standard Actions** | |
| ⊕ **Greataxe** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +19 vs. AC | |
| *Hit:* 2d12 + 9 damage, and the target is slowed and cannot shift (save ends both). | |
| ⸸ **Goring Charge** ✦ **At-Will** | |
| *Effect:* The warrior charges and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 1 (one creature); +20 vs. AC | |
| *Hit:* 2d10 + 11 damage, and the target falls prone. | |
| ✧ **Heart of the Gorgon** (poison) ✦ **Encounter** | |
| *Attack:* Close blast 5 (enemies in blast); +17 vs. Fortitude | |
| *Hit:* 3d6 + 5 poison damage, and the target is slowed (save ends). | |
| *First Failed Saving Throw:* The target is immobilized instead of slowed (save ends). | |
| *Second Failed Saving Throw:* The target is petrified. | |
| **Triggered Actions** | |
| ⸸ **Ironskin Ferocity** | |
| *Trigger:* The warrior drops to 0 hit points. | |
| *Effect (Immediate Interrupt):* The warrior uses *greataxe*. If the attack hits, the target is immobilized until the end of the target's next turn. | |
| **Skills** Athletics +18, Endurance +17 | |
| **Str** 23 (+13) **Dex** 23 (+13) **Wis** 23 (+13) | |
| **Con** 20 (+12) **Int** 20 (+12) **Cha** 20 (+12) | |
| **Alignment** evil **Languages** Common | |
| **Equipment** greataxe | |

### Ironskin Warriors in Combat

An ironskin warrior stays in motion with *goring charge*, positioning itself close to as many foes as possible before unleashing *heart of the gorgon*.

## Shardhorn Hunter

The most feared assassins of the Blood League are said to feast on the hearts of unicorns. Wielding the creature's horn, they twist the unicorn's magical properties for their own murderous ends.

### Shardhorn Hunters in Combat

Shardhorn hunters are cruel, even by minotaur standards. A hunter alternates *heart of the unicorn* with *backstab*, striking different targets each turn.

| **Shardhorn Hunter** | **Level 15 Lurker** |
|---|---|
| Medium natural humanoid, minotaur | XP 1,200 |
| **HP** 116; **Bloodied** 58 | **Initiative** +17 |
| **AC** 29, **Fortitude** 27, **Reflex** 28, **Will** 26 | **Perception** +13 |
| **Speed** 8 | Darkvision |
| **Standard Actions** | |
| ⊕ **Horn Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +20 vs. AC | |
| *Hit:* 4d4 + 10 damage. | |
| ⸸ **Backstab** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature granting combat advantage to the hunter); +20 vs. AC | |
| *Hit:* 4d4 + 10 damage, and ongoing 10 damage (save ends). | |
| ⸸ **Goring Charge** ✦ **At-Will** | |
| *Effect:* The hunter charges and makes the following attack in place of a melee basic attack. | |
| *Attack:* Melee 1 (one creature); +21 vs. AC | |
| *Hit:* 2d10 + 10 damage, and the target falls prone. | |
| **Move Actions** | |
| **Heart of the Unicorn** (illusion, teleportation) ✦ **Recharge** when the hunter uses *backstab* | |
| *Effect:* The hunter teleports 6 squares and becomes invisible until the end of its next turn or until it makes a melee attack roll. | |
| **Triggered Actions** | |
| ⸸ **Shardhorn Ferocity** | |
| *Trigger:* The hunter drops to 0 hit points. | |
| *Effect (Immediate Interrupt):* The hunter uses *horn dagger*. If the attack hits, the target is dazed until the end of the target's next turn. | |
| **Skills** Intimidate +17, Stealth +18 | |
| **Str** 23 (+13) **Dex** 23 (+13) **Wis** 23 (+13) | |
| **Con** 20 (+12) **Int** 20 (+12) **Cha** 20 (+12) | |
| **Alignment** evil **Languages** Common | |
| **Equipment** unicorn horn dagger | |

WAYNE ENGLAND

# NAGPA

The nagpas once served the primordials but betrayed their masters when the gods' victory was imminent. In retribution, the primordials levied a terrible curse on these creatures. Most nagpas lust endlessly after gold, gems, and magic items, but none can ever touch that which their hearts crave.

## Lore

**Arcana DC 19:** When the primordials created the nagpas, they sought to give their new servants true sentience. In their battles against the gods, the primordials found that the elementals they commanded were too limited in intellect and appearance to be of any worth except as shock troops. The nagpas were thus created and bestowed with the cunning of devils and the beauty of nymphs. The scheming nagpas quickly showed their worth, wreaking havoc on the gods and their followers with ambush, seduction, and trickery.

As the Dawn War approached its end, the nagpas were clever enough to see that the primordials' defeat was inevitable. They struck a pact with the gods to betray their masters. Their treachery was discovered, though, and the primordials levied a horrid curse on their creations. The primordials transformed them into hideous creatures with an insatiable appetite for wealth and bodily comforts.

Nagpas are immortal, heightening the torment of their existence. When slain, they reincarnate within a few decades with all the memories of their past lives and deaths. Because nagpas hate the hideous appearance that the primordials bestowed on them, they destroy any mirrors that might reveal their faces.

## Encounters

With its combination of magical prowess and cunning charm, a nagpa recruits bandits, thieves, and other servants to obtain the wealth and comforts it desires. Nagpas are commonly served by trolls, ogres, and other dim and brutish creatures. A nagpa's natural arrogance leads it to treat humanoids in its service as little better than beasts. This behavior can work in an adventuring group's favor, for a nagpa's servants have little loyalty to the creature and tend to flee quickly if the fight goes bad.

Nagpas are known to work with and respect oni, employing them to oversee their brutish servants. Adventurers who eliminate a cult or a gang led by an oni might soon discover that the group was in fact led by a nagpa when the vengeful creature exacts punishment on them for their interference.

## Nagpa Corruptor

In the heart of the ruins, the adventurers found themselves in what seemed to be the salon of a wealthy connoisseur of the arts. Cordoned off by partitions and lengths of rope, paintings hung from whitewashed walls and marble busts sat atop polished wooden stands. The explorers were ready to leap in and start taking the treasures, until their guide halted them and advised the adventurers of what they had really found: the lair of a nagpa.

| **Nagpa Corruptor** | **Level 9 Controller** |
|---|---|
| Medium elemental humanoid | XP 400 |
| **HP** 97; **Bloodied** 48 | **Initiative** +6 |
| **AC** 23, **Fortitude** 19, **Reflex** 21, **Will** 21 | **Perception** +8 |
| **Speed** 6 | Low-light vision |
| **Standard Actions** | |
| **Withering Staff** (necrotic, weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. Reflex | |
| *Hit:* 2d6 + 10 necrotic damage, and the nagpa pushes the target 2 squares. | |
| **Withering Blast** (implement, necrotic) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +13 vs. Will | |
| *Hit:* 2d8 + 4 necrotic damage, and the target is immobilized (save ends). | |
| **Devouring Fire** (implement, fire) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Ranged 5 (one creature); +13 vs. Fortitude | |
| *Hit:* 2d10 + 10 fire damage, and ongoing 5 fire damage (save ends). | |
| *Each Failed Saving Throw:* Each ally within 3 squares of the target takes 5 fire damage. | |
| **Corrupting Curse** (necrotic, zone) ✦ **Encounter** | |
| *Attack:* Area burst 3 within 10 (enemies in burst); +13 vs. Fortitude | |
| *Hit:* 2d6 + 5 necrotic damage. | |
| *Effect:* The burst creates a zone that lasts until the end of the encounter. Any enemy within the zone cannot regain hit points. | |
| **Minor Actions** | |
| **Enervating Blast** (implement) ✦ **Encounter** | |
| *Attack:* Close blast 5 (enemies in blast); +13 vs. Will | |
| *Hit:* The target is weakened until the end of the nagpa's next turn. | |
| **Skills** Arcana +13, Bluff +12, Diplomacy +12, History +13 | |
| **Str** 12 (+5) **Dex** 14 (+6) **Wis** 19 (+8) | |
| **Con** 17 (+7) **Int** 19 (+8) **Cha** 16 (+7) | |
| **Alignment** evil **Languages** Common, Primordial | |
| **Equipment** staff | |

### Nagpa Corruptors in Combat

Nagpa corruptors prefer to let hired thugs do the fighting for them, and they are careful to keep one or two such servants nearby. A corruptor uses *withering blast* and *devouring fire* from the edge of the fray. If it is surrounded, it uses *enervating blast* before retreating to a safer location.

If a fight breaks out in a corruptor's lair, it devotes its resources to protecting its beloved wealth. An item in a nagpa's collection can be destroyed by any ranged or melee attack that targets the item. The first

time an item in its collection is destroyed, a nagpa is dazed until the end of its next turn.

Once its allies are slain, a corruptor flees or begs for its life unless it has a good chance of defeating its foes. A corruptor freely bargains with information and lore, but it fights to the death before it parts with its treasure.

## Nagpa Carrion Lord

The mouthwatering scent of a finely cooked meal coming from a remote desert camp was entirely out of place, but welcome. When the travelers entered the carrion lord's camp, hoping for a delicious meal, they had no idea of the grave danger the meal brought with it. This legendary nagpa lived for the pleasures of the flesh, fine food, and strong drink. Yet the creature's ancient curse meant that it could never fully enjoy those sensual delights, and the frustration filled it with madness and rage.

| **Nagpa Carrion Lord** | **Level 14 Artillery** |
|---|---|
| Medium elemental humanoid | XP 1,000 |
| **HP** 111; **Bloodied** 55 | **Initiative** +9 |
| **AC** 28, **Fortitude** 23, **Reflex** 25, **Will** 26 | **Perception** +11 |
| **Speed** 6 | Low-light vision |
| **Standard Actions** | |
| ⊕ **Rotting Staff** (necrotic, weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. Fortitude | |
| *Hit:* 2d6 + 8 necrotic damage. | |
| ⊗ **Bolt of Putrescence** (implement, necrotic) ✦ **At-Will** | |
| *Attack:* Ranged 20 (one creature); +19 vs. Reflex | |
| *Hit:* 2d10 + 10 necrotic damage. | |
| **Rain of Ruin** (acid, implement) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Ranged 10 (two or three creatures); +19 vs. Reflex | |
| *Hit:* 2d10 + 5 acid damage. | |
| **Consuming Shadows** (implement, necrotic, zone) ✦ **Encounter** | |
| *Attack:* Area burst 1 within 10 (enemies in burst); +19 vs. Fortitude | |
| *Hit:* 4d6 + 5 necrotic damage, and ongoing 5 necrotic damage (save ends). | |
| *Effect:* The burst creates a zone that lasts until the end of the carrion lord's next turn. The zone blocks line of sight for the carrion lord's enemies. | |
| *Sustain Minor:* The zone persists. | |
| **Minor Actions** | |
| **Ghostly Escape** ✦ **Encounter** | |
| *Effect:* The carrion lord is insubstantial and phasing until the end of its next turn. | |
| **Skills** Arcana +17, Bluff +17, Diplomacy +17, History +17 | |
| **Str** 12 (+8) **Dex** 14 (+9) **Wis** 19 (+11) | |
| **Con** 21 (+12) **Int** 21 (+12) **Cha** 20 (+12) | |
| **Alignment** evil **Languages** Common, Primordial | |
| **Equipment** staff | |

NAGPA

### Nagpa Carrion Lords in Combat

Bloated and fattened on its fine but foul-tasting meals, a nagpa carrion lord holds court in its dining hall, where it is usually encountered. A carrion lord is likely to start combat from the comfort of its chair, letting its servants and *ghostly escape* protect it from foes attempting to get close. A carrion lord fights with calm deliberation. Attacking the same foes relentlessly with *rain of ruin* and *bolt of putrescence*, it savors their pain and torment like a full-course meal.

If overwhelmed, a carrion lord escapes to a defensible location, where more guards or traps await characters who pursue it.

STEVE ELLIS

# Nerra

Deep in the Astral Sea, hidden from the well-traveled routes of voyaging merchants and githyanki pirates, the Constellation of Eyes is an astral dominion unlike any other. This strange realm is a sphere of reflective crystal orbited by countless massive, curved mirrors. Images from across the planes flash across these mirrors—images observed and recorded by the nerras. Within the Constellation's ancient halls, these creatures use their lore to perform mysterious raids across the planes and into the mortal realm.

## Lore

**History DC 27:** The nerras are an enigmatic race that appeared shortly after the Dawn War. They were created from a group of powerful invokers known as the Sect of Seventy, whose members believed that the gods were too detached from worldly affairs to protect mortals from the threats that lingered in the war's aftermath. Even though they did not oppose the gods, they believed that only mortals could properly defend their world.

The Sect of Seventy built the Constellation of Eyes to watch over the mortal realm. With mighty rituals, they granted themselves the power to see across the cosmos. The Constellation of Eyes was intended to be the first of many such observatories. Ultimately, the sect's ambition proved to be its downfall.

Unknown to the leaders of the sect, a handful of priests of Asmodeus infiltrated their ranks, planning to use the powerful planar magic of the Constellation of Eyes to open a gate to the Nine Hells. The sect uncovered this plot only after the final ritual had begun. Divine magic flared as the two factions fought, creating a beacon so bright that the gods dispatched exarchs and angels to investigate.

By the time the divine servants arrived, it was too late. As the Sect of Seventy stood on the verge of defeat, its surviving members made a fateful decision. By corrupting the ritual used to create the Constellation of Eyes, they could channel its magic against Asmodeus's followers—and themselves. This process destroyed the priests and the invokers who fought them, transforming them into the first nerras. These strange beings reflect their surroundings even in shadow and darkness.

From their home in the Constellation of Eyes, the nerras keep watch over the world and the planes—uncaring observers recording events on fragile shards of mirrored glass. The nerras control an incalculable catalog of lore, but a nerra record can be read only when viewed at a specific angle.

Over long centuries, the nerras began to show a discontent with simply watching history. At first, a few nerras used their mirrors to travel across the planes. Since the earliest of these missions, the nerras have seized important and powerful figures, carrying them back to the Constellation of Mirrors. The nerras' power is then used to create a physically exact but morally opposite copy of the victim. Both the copy and the victim are then freed into the world to do as they wish.

Though such kidnappings remain relatively rare, more than a few ancient kingdoms are known to have undergone historic upheavals as their newly minted twin leaders struggled for power. As the duplicates they craft scheme and do battle against one another, the nerras dispatch warriors and spellcasters to join the fight on both sides.

The nerras strike at good and evil in equal measure, but their overall goals remain unknown. Some theorize that since this race was spawned from both good and evil invokers, an internal struggle rages among these creatures. A few scholars have speculated that the nerras want to answer the age old question—whether good or evil is stronger. To this effect, they create the duplicates to measure the outcome. Other scholars suggest that the nerras support both good and evil to manipulate history and preserve tension. Whatever the nerras' origins, however, their involvement in mortal affairs usually results in chaos.

The nerras undertake expeditions across the planes, seeding spies and warriors into areas that appear to be of possible significance. These scouts record their explorations, but they also strike at random against various factions and powerful creatures. These attacks sometimes end wars and sometimes start them. The nerras seem unconcerned with which side wins.

## Encounters

Nerras fight alongside most other creatures, though they abhor demons, devils, and the beings spawned by the Far Realm. They are close to the weavers, with which they share a mastery of planar magic. However, few of their allies know their motives, for nerras keep that information to themselves.

# Varoot Nerra

Lurking at the edge of the fray, a varoot nerra takes a role in combat that belies its importance to its people. The varoots are elite scouts and vanguards. They venture forth from the Constellation of Eyes to lay the groundwork for the nerras' campaigns in the world. A varoot is said to be a spy beyond compare, able to capture the form of any humanoid creature and create an all but impenetrable disguise.

| **Varoot Nerra** | **Level 16 Lurker** |
|---|---|
| Medium immortal humanoid (shapechanger) | XP 1,400 |
| **HP** 116; **Bloodied** 58 | **Initiative** +17 |
| **AC** 30, **Fortitude** 27, **Reflex** 30, **Will** 28 | **Perception** +14 |
| **Speed** 6 | |
| **Standard Actions** | |
| ⨁ **Shard Blade** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +21 vs. AC | |
| *Hit:* 2d8 + 15 damage. | |
| **Reflection Theft** (polymorph) ✦ **At-Will** | |
| *Effect:* The varoot becomes a perfect duplicate of one enemy within 10 squares of it. The effect lasts until the end of the encounter or until the varoot attacks. While the varoot is in this form and adjacent to the duplicated enemy, whenever a creature other than the duplicated enemy makes a melee or a ranged attack against the varoot, roll a d20. On a result of 10 or higher, the attack targets the enemy instead of the varoot. In addition, the varoot gains a +2 bonus to attack rolls and a +5 bonus to damage rolls against the enemy it duplicated. | |
| **Move Actions** | |
| **Mirror Step** (teleportation) ✦ **At-Will** | |
| *Effect:* The varoot teleports 5 squares to a square adjacent to a mirror or another nerra. | |
| **Minor Actions** | |
| **Mirrored Grasp** (teleportation) ✦ **At-Will** | |
| *Effect:* One Tiny or smaller unattended object of up to 20 pounds that the varoot can see and is within 10 squares of it is teleported to the varoot's hand. | |
| **Skills** Bluff +20, Diplomacy +20, Insight +14, Thievery +18 | |
| **Str** 20 (+13) **Dex** 21 (+13) **Wis** 13 (+9) | |
| **Con** 14 (+10) **Int** 13 (+9) **Cha** 24 (+15) | |
| **Alignment** unaligned **Languages** Supernal | |
| **Equipment** longsword | |

## Varoot Nerras in Combat

A varoot approaches a chosen target and adopts its guise, creating a mystical link between the two. As long as the nerra and its foe remain near each other, outside observers see their images appear to shift and swap places, playing havoc with melee and ranged attacks.

# Meerak Nerra

Meeraks make up the brunt of a nerra force. Their bodies are composed of jagged shards that hinder and slash foes they engage. Packs of meeraks cluster at the vanguard of each assault, crippling the first lines of defenders as their more powerful kin crash in behind them.

| **Meerak Nerra** | **Level 18 Minion Soldier** |
|---|---|
| Medium immortal humanoid | XP 500 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +16 |
| **AC** 34, **Fortitude** 30, **Reflex** 29, **Will** 29 | **Perception** +14 |
| **Speed** 6 | |
| **Standard Actions** | |
| ⨁ **Mirror Slash** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +23 vs. AC | |
| *Hit:* 13 damage, and the target is marked until the end of the meerak's next turn. | |
| **Move Actions** | |
| **Mirror Step** (teleportation) ✦ **At-Will** | |
| *Effect:* The meerak teleports 5 squares to a square adjacent to a mirror or another nerra. | |
| **Triggered Actions** | |
| **Mirror Defense** | |
| *Trigger:* An enemy hits the meerak with a melee attack. | |
| *Effect (Immediate Interrupt):* The meerak deals 10 damage to a different enemy within 10 squares that it can see. | |
| **Str** 23 (+15) **Dex** 21 (+14) **Wis** 20 (+14) | |
| **Con** 15 (+11) **Int** 8 (+8) **Cha** 8 (+8) | |
| **Alignment** unaligned **Languages** Supernal | |

## Meerak Nerras in Combat

A meerak throws itself into battle with suicidal bravery, trusting in the destructive potential of its fractured body to leave a foe reeling. Against powerful combatants, meeraks form an impenetrable cordon, forcing an enemy to tear itself to shreds as it claws its way through them.

FRANZ VOHWINKEL

# Kalareem Nerra

The attackers knew that "kalareem" was a title given to respected nerra knights, but that knowledge did not hint at the deadliness of these creatures in battle. Their blades were forged of sharpened glass, and their bodies seemed to flow like molten metal as they struck. The kalareems proved almost impossible to attack. Their rippling forms turned back blows and then hardened to unleash clouds of steel shards that cut even the strongest warriors to bloody shreds.

**Kalareem Nerra** **Level 19 Soldier**
Medium immortal humanoid XP 2,400

**HP** 175; **Bloodied** 87 **Initiative** +17
**AC** 34, **Fortitude** 32, **Reflex** 31, **Will** 30 **Perception** +14
**Speed** 6

**Standard Actions**

**Shard Blade** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +24 vs. AC
*Hit:* 3d8 + 14 damage, and the target is marked until the end of the kalareem's next turn.

**Shard Blast** ✦ **At-Will**
*Attack:* Close blast 3 (enemies in blast); +24 vs. AC
*Hit:* 3d6 + 8 damage, and the target is marked until the end of the kalareem's next turn.

**Move Actions**

**Mirror Step** (teleportation) ✦ **At-Will**
*Effect:* The kalareem teleports 5 squares to a square adjacent to a mirror or another nerra.

**Triggered Actions**

**Mirror Image** ✦ **At-Will**
*Trigger:* An enemy marked by the kalareem and adjacent to it makes a melee or a ranged attack that does not include the kalareem as a target.
*Effect (Immediate Interrupt):* The triggering enemy targets the kalareem instead.

**Mirror Defense** ✦ **Recharge** if the power misses
*Trigger:* An enemy hits the kalareem with a melee attack.
*Attack (Immediate Interrupt):* Melee 1 (triggering enemy); +25 vs. Will
*Hit:* The target takes the same damage dealt by its attack.

**Skills** Insight +19
**Str** 24 (+16) **Dex** 22 (+15) **Wis** 20 (+14)
**Con** 15 (+11) **Int** 16 (+12) **Cha** 10 (+9)
**Alignment** unaligned **Languages** Supernal

## Kalareem Nerras in Combat

A kalareem acts as a bodyguard for other nerras, and it gladly gives its life to protect those it defends. It uses *mirror image* to misdirect attacks intended for its allies as it lays into foes with *shard blade*. A kalareem reserves *mirror defense* until hit by a powerful attack. Then, the nerra's entire body shimmers with the reflection of the enemy as the attack's power is turned against the creature.

# Sillit Nerra

The sillits are the most mysterious of the nerra forces. These powerful spellcasters plan their intrigues across the planes, serving as field agents and deadly scouts. In the thick of battle, sillits show their true strength when the best enemy warriors suddenly vanish—stolen away within the reflections that ripple across the nerras' deadly forms.

**Sillit Nerra** **Level 19 Controller**
Medium immortal humanoid XP 2,400

**HP** 181; **Bloodied** 90 **Initiative** +10
**AC** 31, **Fortitude** 30, **Reflex** 31, **Will** 32 **Perception** +11
**Speed** 6

**Standard Actions**

**Mirror Portal** (teleportation) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +22 vs. Will
*Hit:* 3d8 + 9 damage, and the sillit teleports the target to a space adjacent to one of the sillit's allies within 10 squares of the sillit.

**Warped Image** (teleportation) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +22 vs. Fortitude
*Hit:* 2d10 + 16 damage, and the sillit teleports the target 3 squares.

**Captured Image** ✦ **Recharge** ⚄ ⚅
*Attack:* Ranged 10 (one creature); +22 vs. Will
*Hit:* The target is removed from play (save ends). Until the effect ends, whenever the sillit takes damage from an enemy, the target takes 20 damage. When the effect ends, the target appears in an unoccupied square of the sillit's choice within 5 squares of the sillit. If the sillit drops to 0 hit points, the effect ends.

**Move Actions**

**Mirror Step** (teleportation) ✦ **At-Will**
*Effect:* The sillit teleports 5 squares to a square adjacent to a mirror or another nerra.

**Minor Actions**

**Mirrored Grasp** (teleportation) ✦ **At-Will**
*Effect:* One Tiny or smaller unattended object of up to 20 pounds that the sillit can see and is within 10 squares of it is teleported to the sillit's hand.

**Skills** Arcana +20, Bluff +18, Diplomacy +18, Insight +16
**Str** 12 (+10) **Dex** 13 (+10) **Wis** 14 (+11)
**Con** 21 (+14) **Int** 22 (+15) **Cha** 19 (+13)
**Alignment** unaligned **Languages** Supernal

## Sillit Nerras in Combat

A sillit's powers draw on the reflected images that course across its body. By warping and shifting those reflections, it manipulates the creatures and objects they depict, hurling foes across the battlefield and snatching objects into its own hands. *Captured image* is a sillit's most dangerous power, for it can trap a creature within the walls of a mirrored prison.

# Delphar Nerra

Nerra forces attack on the orders of the delphars. A delphar spends long years leading strike teams across the planes, hardening its resolve and honing its tactics. The soldiers under its command shatter defensive lines like a living wave, and the delphar's shimmering blade cuts a bloody swath as it leads the way.

| **Delphar Nerra** | **Level 20 Soldier (Leader)** |
|---|---|
| Large immortal humanoid | XP 2,800 |
| **HP** 187; **Bloodied** 93 | **Initiative** +16 |
| **AC** 35, **Fortitude** 32, **Reflex** 30, **Will** 32 | **Perception** +20 |
| **Speed** 8 | |
| **Traits** | |
| ☼ **Mirrored Rampart** ✦ **Aura** 5 | |
| Nerras within the aura can teleport 10 squares with *mirror step* instead of 5. | |
| **Standard Actions** | |
| ⊕ **Shard Blade** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +25 vs. AC | |
| *Hit:* 4d8 + 10 damage, and the target is marked until the end of the delphar's next turn. | |
| ⊁ **Razor Blast** ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +23 vs. Reflex | |
| *Hit:* 4d6 + 7 damage, and the target is marked until the end of the delphar's next turn. | |
| **Move Actions** | |
| **Mirror Step** (teleportation) ✦ **At-Will** | |
| *Effect:* The delphar teleports 5 squares to a space adjacent to a mirror or another nerra. | |
| **Triggered Actions** | |
| ⇦ **Mirrored Grasp** (teleportation) ✦ **At-Will** | |
| *Trigger:* An enemy marked by the delphar makes an attack that does not include the delphar as a target. | |
| *Attack (Immediate Reaction):* Close burst 10 (triggering enemy in burst); +25 vs. Will | |
| *Hit:* The delphar teleports the target adjacent to it. | |
| **Skills** History +21, Insight +20 | |
| **Str** 26 (+18) **Dex** 18 (+14) **Wis** 21 (+15) | |
| **Con** 19 (+14) **Int** 23 (+16) **Cha** 15 (+12) | |
| **Alignment** unaligned **Languages** Supernal | |
| **Equipment** longsword | |

## Delphar Nerras in Combat

A delphar fights at the center of combat, its allies staying close to increase the potency of their *mirror step*. It marks powerful melee combatants with *shard blade*, hindering their attacks against its less powerful allies. When a marked enemy ignores a delphar, it uses that foe's reflection to bring the creature over to it.

# Teltarym Nerra

The teltaryms were the nerras' laborers. Though humanoid in form, these simple brutes fight more like crazed animals. Their massive fists can pound enemies to a bloody pulp. However, their most potent power is their ability to reflect the pain of their enemies' attacks.

| **Teltarym Nerra** | **Level 21 Brute** |
|---|---|
| Large immortal humanoid | XP 3,200 |
| **HP** 237; **Bloodied** 118 | **Initiative** +15 |
| **AC** 33, **Fortitude** 33, **Reflex** 30, **Will** 31 | **Perception** +16 |
| **Speed** 8 | |
| **Standard Actions** | |
| ⊕ **Hammer Fist** ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +26 vs. AC | |
| *Hit:* 2d10 + 10 damage, and the teltarym pushes the target 1 square. | |
| ⸸ **Hammer Flurry** ✦ **At-Will** | |
| *Effect:* The teltarym uses *hammer fist* twice. | |
| **Move Actions** | |
| **Mirror Step** (teleportation) ✦ **At-Will** | |
| *Effect:* The teltarym teleports 5 squares to a space adjacent to a mirror or another nerra. | |
| **Triggered Actions** | |
| **Reflected Pain** ✦ **Recharge** when first bloodied | |
| *Trigger:* An enemy hits the teltarym with a melee attack. | |
| *Effect (Immediate Reaction):* The triggering enemy takes damage equal to half the damage of the attack. | |
| **Str** 26 (+18) **Dex** 21 (+15) **Wis** 23 (+16) | |
| **Con** 17 (+13) **Int** 8 (+9) **Cha** 10 (+10) | |
| **Alignment** unaligned **Languages** Supernal | |

## Teltarym Nerras in Combat

A teltarym is a stoic warrior, its mouthless face registering no sign of injury or pain. It uses *hammer flurry* against powerful-looking melee combatants, trusting in *reflected pain* to deter enemies from attacking it. Each time that power triggers, an enemy's reflected image appears to lash out at the attacker.

FRANZ VOHWINKEL

# NORKER

The surging magic and unearthly power of the Elemental Chaos can transmute the very essence of living creatures that dwell there. Bizarre mutations arise when such creatures are exposed to planar energy over the course of generations. The power of the elements suffuses their bodies, becoming an intrinsic part of their being.

The norkers arose from goblins that ventured from the world into the planes. Too weak to survive for long in the open Elemental Chaos, they sought shelter in the deep caverns of mountains and islands of elemental earth. In time, they gained the strength and resilience of that earth.

## Lore

**History DC 23:** Although the norkers of the Elemental Chaos share the small stature of their goblin forebears, the strength of earth gives them the ability to survive even in that cruel plane. Norkers have also crossed back to live in the mortal realm. These worldly norkers retain the abilities of their kin, dwelling in and exploring the Underdark.

Norkers in the world are found near sites of elemental power, including volcanoes and planar rifts. Likewise, they are drawn to temples and shrines of Elemental Evil. Their limited intellect makes norkers perfect laborers and frontline troops.

The connection between norkers and the Cult of Elemental Evil is thought by some sages to be more than coincidence. Scholars speculate that the goblins that became the first norkers might have dwelled in earthen domains that were fonts of power for Ogrémoch or his master, the Elder Elemental Eye. Norkers in the service of the Cult of Elemental Evil spend much of their time seeking out forgotten temples and hidden shrines to the Elder Elemental Eye.

## Encounters

Norkers make devoted servants and slaves. A norker pack is typically encountered under the command of a priest of Elemental Evil, a demon, or some other powerful elemental leader. The acolytes of the Elder Elemental Eye use norkers to defend their temples, to serve as bodyguards, and as expendable physical labor. These dimwitted brutes make excellent servants of the cult, because they are typically too dense to understand or inadvertently pass along secrets.

## Norker Stone Shield

An unruly mob, armed only with simple clubs and shields, approached the norkers, intent on putting them down for their service to the Elder Elemental Eye. The more heavily armed and armored humans shuffled toward the creatures, decrying them as mere goblin rabble. A handful of veterans remained silent, though. They had faced these creatures before, and they knew that the norkers were more of a threat than they appeared to be.

| **Norker Stone Shield** | **Level 12 Soldier** |
|---|---|
| Small elemental humanoid | XP 700 |
| **HP** 124; **Bloodied** 62 | **Initiative** +12 |
| **AC** 28, **Fortitude** 25, **Reflex** 23, **Will** 23 | **Perception** +8 |
| **Speed** 6 | Low-light vision |
| **Standard Actions** | |
| **Club** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. AC | |
| *Hit:* 3d6 + 8 damage, and the target is marked until the end of the stone shield's next turn. | |
| **Javelin** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 10/20 (one creature); +17 vs. AC | |
| *Hit:* 2d6 + 4 damage, and the target is marked until the end of the stone shield's next turn. | |
| **Triggered Actions** | |
| **Elemental Rebuke** ✦ **At-Will** | |
| *Trigger:* An enemy hits the stone shield with a melee attack. | |
| *Attack (Immediate Reaction):* Melee 1 (triggering enemy); +19 vs. AC | |
| *Hit:* 1d8 + 4 damage. | |
| **Shield Slam** ✦ **At-Will** | |
| *Trigger:* An enemy marked by the stone shield and adjacent to it shifts. | |
| *Attack (Opportunity Action):* Melee 1 (triggering enemy); +15 vs. Fortitude | |
| *Hit:* 2d6 + 4 damage, and the target falls prone. | |
| **Str** 19 (+10) **Dex** 19 (+10) **Wis** 15 (+8) | |
| **Con** 20 (+11) **Int** 8 (+5) **Cha** 17 (+9) | |
| **Alignment** chaotic evil **Languages** Common | |
| **Equipment** light shield, club, 3 javelins | |

### Norker Stone Shields in Combat

Cults of the Elder Elemental Eye, worshipers of Ogrémoch, and others devoted to elemental earth recruit, equip, and train norker stone shields. These norkers serve as the first line of defense. They fight in tight formations, battering foes with *club* and *shield slam*.

## Norker Grunt

Lowly grunts make up the vast majority of the norker forces. They attack in waves, and though their blows are weak, a foe mobbed by these creatures quickly finds itself overwhelmed.

| **Norker Grunt** | **Level 15 Minion Brute** |
|---|---|
| Small elemental humanoid | XP 300 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +11 |
| **AC** 28, **Fortitude** 28, **Reflex** 25, **Will** 27 | **Perception** +11 |
| **Speed** 6 | Low-light vision |
| **Traits** | |
| **Harassing Brute** | |
| An enemy adjacent to the grunt takes extra damage from the grunt's allies' attacks equal to twice the number of grunts adjacent to it. | |
| **Standard Actions** | |
| **Club** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 11 damage. | |
| **Str** 17 (+10) **Dex** 19 (+11) **Wis** 18 (+11) | |
| **Con** 23 (+13) **Int** 6 (+5) **Cha** 11 (+7) | |
| **Alignment** chaotic evil **Languages** Common | |
| **Equipment** club | |

### Norker Grunts in Combat

Grunts lack the initiative and insight to employ any tactics other than charging into the thick of battle. However, they follow the commands laid down by their leaders, clearing the way for more powerful allies. An opponent surrounded by grunts can quickly fall under the increasingly powerful attacks of the grunts and their allies.

## Norker Stone Walker

The power of elemental earth flows through all norkers, yet their warriors are typically too dull to learn to use such power. The stone walkers are a deadly exception. Trained by powerful disciples of elemental power, a stone walker has the ability to move through earth as though it wasn't there.

| **Norker Stone Walker** | **Level 15 Skirmisher** |
|---|---|
| Small elemental humanoid | XP 1,200 |
| **HP** 150; **Bloodied** 75 | **Initiative** +14 |
| **AC** 29, **Fortitude** 27, **Reflex** 25, **Will** 26 | **Perception** +11 |
| **Speed** 6 | Low-light vision |
| **Traits** | |
| **Combat Advantage** | |
| The stone walker's attacks deal 5 extra damage against any creature granting combat advantage to it. | |
| **Nimble Reaction** | |
| The stone walker gains a +4 bonus to AC against opportunity attacks. | |
| **Standard Actions** | |
| **Handaxe** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +20 vs. AC | |
| *Hit:* 3d6 + 13 damage. | |
| **Handaxe** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +20 vs. AC | |
| *Hit:* 3d6 + 8 damage. | |
| **Move Actions** | |
| **Earth Glide** ✦ **At-Will** | |
| *Effect:* The stone walker moves its speed and can pass through earth and rock as if it were phasing. | |
| **Triggered Actions** | |
| **Elemental Rebuke** ✦ **At-Will** | |
| *Trigger:* An enemy hits the stone walker with a melee attack. | |
| *Attack (Immediate Reaction):* Melee 1 (triggering enemy); +20 vs. AC | |
| *Hit:* 1d8 + 2 damage. | |
| **Str** 17 (+10) **Dex** 20 (+12) **Wis** 19 (+11) | |
| **Con** 22 (+13) **Int** 8 (+6) **Cha** 11 (+7) | |
| **Alignment** chaotic evil **Languages** Common | |
| **Equipment** 3 handaxes | |

### Norker Stone Walkers in Combat

Norker stone walkers typically enter combat under the command of a more powerful ally. On command, a norker uses *earth glide* to phase into melee, making *handaxe* attacks and counting on *elemental rebuke* to inhibit counterattacks against it.

STEVE ELLIS

# Nymph

Among the great primal spirits of the world, four sisters came into being in the world's youth, more beautiful and more wild than any other spirit of nature. The sisters were the seasons—Summer, Autumn, Winter, and Spring—and they played a riotous game, chasing one another through the world even as the chaos of the Dawn War raged through the cosmos. In their play, they encountered brothers of the wind, who were shrouded in shimmering rain and fog and rich ocean scents. The children of the four seasons and these four wind brothers were the nymphs, fey beings who embody both their mothers' ties to the seasons and their fathers' fickle and tempestuous nature.

*Spring nymph and autumn nymph*

When the Dawn War came to a close, the spirits of the seasons faced a new task: maintaining the orderly progression of nature's cycles in a new world liberated from divine meddling and primordial destruction. The nymphs withdrew at first into the Feywild, where they could live free and wild in harmony with nature, but such wild spirits were not content to live quietly forever. Their attention was drawn to the mortal creatures of the world, and they were amused. They laughed at how easily trifling words could sway mortal hearts to action, how mortals became distressed by a change of winds and favor, how profoundly they were affected by the nymphs' wild beauty, how fervently they swore oaths of loyalty and devotion to win the nymphs' favor. The nymphs played with mortals, especially mortal men, toying with their minds and hearts, and they were pleased by such diverting toys.

If the toys sometimes broke, what of it? The nymphs learned that breaking their toys could be fun—either turning mortals into brokenhearted husks of their former selves or simply shattering their feeble bodies when their capacity to amuse their mistresses ended. The nymphs were unconcerned: Life is abundant, a game in constant renewal. Only the fun of the game mattered to the nymphs, nothing else. Nothing at all.

## Lore

**Nature DC 23:** Of the fey, the nymphs are the wildest and most capricious. Their beauty—the splendor of raw, unbridled nature—is so sublime that even demigods and divine exarchs have sought the nymphs as brides.

Winter nymphs cling to the pragmatic view that the strongest survive. Spring nymphs see new life always budding forth to replace the old. Summer nymphs live in contemplative wonder of the mysteries of eternity. Autumn nymphs are prone to melancholy, for they see life in perpetual decline.

In sadness, some autumn nymphs cast off their forms and games and give themselves up to their wild nature. Wood nymphs are the first stage in the transformation of these despairing fey, but some go on to become dryads. These former nymphs retain an illusion of their previous selves, a veil of wind and rain they use to beguile mortals who are intent on harming the natural world. Fierce and violent in their sadness, these fallen nymphs protect the woodlands and other wild places, all but forgotten by their playful sisters.

## Encounters

Lusty satyrs and stately treants inhabit spring nymphs' meadows, and gnomes and elves enjoy the playful nymphs' sports. Winter nymphs hunt astride

HOWARD LYON

the backs of wolves, howling and sounding horns beneath the full moon. Although male humanoids seek nymphs as companions or wives, these unions normally end in heartbreak or anger when a mercurial nymph pledges her troth to another, swept away by a fancy.

## Spring Nymph

She stands near the river in the meadow, a collar of colored petals encircling her smiling, perfect face. Her gown is adorned with roses and daisies, crocuses and daffodils, and apple and cherry blossoms. The warm spring breeze wafts thick with the fragrance of her attire.

In the sunshine, she beckons with a single finger. As an observer approaches, she laughs, turns, and skips away. Intrigued, the mortal follows.

| **Spring Nymph** | **Level 5 Controller** |
|---|---|
| Medium fey humanoid | XP 200 |
| **HP** 63; **Bloodied** 31 | **Initiative** +6 |
| **AC** 19, **Fortitude** 16, **Reflex** 17, **Will** 18 | **Perception** +3 |
| **Speed** 6 (forest walk) | Low-light vision |
| **Traits** | |
| **Charmed Defense** | |
| The spring nymph gains a +3 bonus to all defenses while it is adjacent to a creature dominated by it. | |
| **Standard Actions** | |
| ⓘ **Passion's Kiss** (charm, psychic) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +8 vs. Will | |
| *Hit:* 1d6 + 3 psychic damage, and the target is dazed (save ends). | |
| ⓘ **Song of the Spring** (charm, psychic) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +8 vs. Will | |
| *Hit:* 1d8 + 5 psychic damage, and the target is slowed (save ends). | |
| **Floral Perfume** (charm) ✦ **Recharge** when no enemy is dominated by this power | |
| *Attack:* Ranged 10 (one slowed or dazed creature); +8 vs. Will | |
| *Hit:* The nymph pulls the target 3 squares, and the target is dominated (save ends). | |
| **Cloud of Blossoms** (sleep) ✦ **Encounter** | |
| *Attack:* Area burst 2 within 10 (nondominated enemies in burst); +10 vs. Will | |

### Spring Nymphs in Combat

Myriad sensation is a spring nymph's one desire. When her tantalizing mind games grow tiresome, a spring nymph longs for pleasure derived from the physical games mortals play. A spring nymph revels in longing, love, and struggle. She delights in watching mortals fight one another in her defense or for a promised token of her regard. The death of one means nothing to her; spring always brings new life. However, a spring nymph does make an effort to spare one of the combatants. She dominates the most comely or entertaining mortal. Outside combat, a spring nymph can make this dominance permanent through continual exposure to her mesmerizing scent.

## Autumn Nymph

In autumn, after the harvest, the wind turns cold, and old leaves press together. As they await their fall, they whisper stories about how they drank up storms in springtime, bathed in summer's eternal light, bore fruit, and shed seeds. Such is the narrative of every living thing, and collecting the intimate details of these stories is an autumn nymph's pleasure.

Autumn nymphs count the rings in the stumps of fallen trees and gather ancient stories from the wood. They trade in secrets, one for one, gleefully exchanging intricate facts of a mortal's life for the life-dreams of a great old tree that has witnessed the triumphs and follies of hundreds of mortal years.

| **Autumn Nymph** | **Level 8 Skirmisher** |
|---|---|
| Medium fey humanoid | XP 350 |
| **HP** 89; **Bloodied** 44 | **Initiative** +11 |
| **AC** 22, **Fortitude** 21, **Reflex** 19, **Will** 20 | **Perception** +7 |
| **Speed** 6, fly 6 (clumsy) | Low-light vision |
| **Standard Actions** | |
| ⓘ **Oaken Strength** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d6 + 9 damage, and the nymph pushes the target 1 square. | |
| **Dark Revelation** (charm, psychic) ✦ **Recharge** ⁞⁞ | |
| *Attack:* Melee 1 (one creature); +11 vs. Will | |
| *Hit:* 1d8 + 4 psychic damage, and the target is stunned (save ends). | |
| **Whisper Game** (psychic) ✦ **Recharge** if the power misses | |
| *Attack:* Ranged 10 (one creature); +11 vs. Will | |
| *Hit:* 1d8 + 4 psychic damage, and ongoing 5 psychic damage (save ends). Until the end of the encounter or until the nymph drops to 0 hit points, whenever any creature saves against this ongoing damage, the nearest ally within 10 squares of it gains the ongoing damage. When the nymph drops to 0 hit points, the effect ends and the creature currently affected by the ongoing damage takes 15 psychic damage. | |
| **Move Actions** | |
| **Autumn Wind** ✦ **At-Will** (1/round) | |
| *Effect:* The nymph either shifts 1 square or moves its speed and then uses *oaken strength*. | |
| **Triggered Actions** | |
| **Secret of Autumn Leaves** ✦ **At-Will** | |
| *Trigger:* An enemy misses the nymph with a melee attack. | |
| *Effect (Immediate Reaction):* The nymph shifts 3 squares. | |

| **Alignment** unaligned **Languages** Common, Elven | |

### Autumn Nymphs in Combat

She whispered to the male the secret he sought, but he refused to offer one of his own in trade. So the nymph told him other tales, gossips true and gossips

false, nourishing the seeds of doubt and fear buried in the heart of every mortal. Though the full force of this *dark revelation* has passed, he still hears her whisper on every gust of wind and in the rustling of the leaves, warning him of events that might or might not come to pass, of false friends, and of untrue loves. She reminds him that happiness and beauty are fleeting. He regrets ever speaking to the nymph, for her vengeance is as persistent as the wind. He longs once more for the comfortable security of ignorance.

# Wood Nymph

Deep in the wilderness, a traveler spies a tree in the vague shape of a human female. Its branches stretch heavenward, entreating the sky. Sometimes, only an imprecise pattern on the bole or the grain is reminiscent of a female's face. She looks trapped inside the wood, her eyes dull and haunted. Scholars say the spirit of a cursed maiden dwells inside the trunk of such a tree, doomed to live out her existence in isolation. Adventurers, however, speak of lost autumn nymphs who have grown tired of their games or lost their hearts in futile love for mortals who escaped their clutches. These autumn nymphs became wood nymphs, caught midway in a transformation from nymph to tree.

| **Wood Nymph** | **Level 10 Soldier** |
|---|---|
| Medium fey humanoid | XP 500 |
| **HP** 104; **Bloodied** 52 | **Initiative** +10 |
| **AC** 26, **Fortitude** 21, **Reflex** 21, **Will** 24 | **Perception** +13 |
| **Speed** 6 (forest walk) | Low-light vision |
| **Traits** | |
| **Regeneration** (healing) | |
| Whenever the wood nymph has at least 1 hit point and starts its turn adjacent to or within its tree, it regains 5 hit points. | |
| **Treebound** | |
| Each wood nymph is bound to a tree that occupies 1 square. The wood nymph can enter this square and has superior cover while there. In addition, the wood nymph treats the tree as an ally for the purpose of flanking. | |
| **Standard Actions** | |
| **Wooden Hands** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +15 vs. AC | |
| *Hit:* 3d8 + 5 damage, and the target is slowed until the end of the nymph's next turn. | |
| **Trapped in the Wood** (teleportation) ✦ **Recharge** when no enemy is within the nymph's tree | |
| *Attack:* Melee 1 (one creature); +13 vs. Reflex | |
| *Hit:* The nymph teleports the target 6 squares to the square containing the nymph's tree, and the target is removed from play (save ends). When the effect ends, the target appears in an unoccupied square of its choice adjacent to the tree. | |
| *Effect:* The nymph teleports 8 squares to a square adjacent to its tree. | |
| **Lonely Keening** (charm, psychic) ✦ **Encounter** | |
| *Attack:* Ranged 20 (one creature); +15 vs. Will | |
| *Hit:* 2d8 + 9 psychic damage. | |
| *Effect:* Until the end of the encounter or until the nymph drops to 0 hit points, the target is marked and takes 5 damage at the end of any turn in which it is not either adjacent to the nymph or closer to the nymph than when it began its turn. | |
| **Minor Actions** | |
| **Tree Home** (teleportation) ✦ **At-Will** | |
| *Requirement:* The nymph must be within 6 squares of its tree. | |
| *Effect:* The nymph teleports to a square adjacent to its tree. | |

| **Alignment** unaligned **Languages** Common, Elven | |

## Wood Nymphs in Combat

Woodcutters talk in fearful tones about the time they angered a wood nymph. The workers' faces drain of color, and their eyes grow large. They say the forest's trees came to life, beating at them with massive limbs while gouging eyes and skin. They tell how the nymph embraced one of them, and both then disappeared into a tree, never to reappear.

On winter nights, the woodcutters raise a toast to their comrade's empty seat and tell each other that perhaps somewhere he survives, trapped in the wood with the lonely nymph.

# Winter Nymph

In the remote hills and mountains where winter nymphs reside, they play a predatory game. Winter nymphs run wild in the wind, whooping and shouting, as they bring down the strongest quarry. The weak are of little concern to them; the nymphs have time to wait for calves to mature into worthy prizes. The heads of their kills decorate the frost-lined valleys that the nymphs call home.

| **Winter Nymph** | **Level 15 Artillery** |
|---|---|
| Medium fey humanoid | XP 1,200 |

### Winter Nymphs in Combat

Winter nymphs run at the head of the Wild Hunt. They are dressed in buckskin, and the wind carries them. Their hair, composed of green and brown nettles, spreads out behind them as the wind speeds them toward their prey. Not just any quarry satisfies a winter nymph. Only the most cunning and worthy humanoid or beast entices these creatures. They are winter's sharp scythes, chopping down old life to make room for new.

## Summer Nymph

Oldest and wisest of the seasons' children, a summer nymph sees everything as it comes to pass. Her eyes are the color of the sun. She radiates warmth like that of summer days in childhood. She delights in an ancient game that spans all time and all worlds. From her home in the Feywild, she reaches into the world, the Shadowfell, the Astral Sea, and the Elemental Chaos. She plays with gods and dragons, and creatures from each world do her bidding. She is the child of the first living thing, and her memories are rooted deep in antiquity. The wind, her father, is at her disposal.

| **Summer Nymph** | **Level 25 Controller (Leader)** |
|---|---|
| Medium fey humanoid | XP 7,000 |
| **HP** 233; **Bloodied** 116 | **Initiative** +16 |
| **AC** 39, **Fortitude** 36, **Reflex** 37, **Will** 38 | **Perception** +25 |
| **Speed** 6 (forest walk) | Low-light vision |
| **Traits** | |
| ☼ **Renewing Growth** ✦ **Aura** 5 | |
| Squares within the aura are difficult terrain for enemies. Any enemy within the aura that does not move during its turn is slowed until the end of its next turn. | |
| **Standard Actions** | |
| ⓘ **Wisdom's Touch** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +28 vs. Will | |
| *Hit:* 3d8 + 10 damage, and the target is dazed until the end of the nymph's next turn. | |
| ⓡ **Eyes of Summer** (radiant) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +28 vs. Reflex | |
| *Hit:* 3d6 + 3 radiant damage, and the target is blinded (save ends). | |
| ✧ **Call Storm Winds** (lightning, thunder, zone) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Area burst 3 within 20 (enemies in burst); +28 vs. Fortitude | |
| *Hit:* 4d8 + 10 thunder and lightning damage, and the nymph slides the target 3 squares. | |
| *Effect:* The burst creates a zone that lasts until the end of the nymph's next turn. | |
| *Sustain Minor:* The zone persists, and the nymph slides each enemy within the zone 3 squares. | |
| **Move Actions** | |
| **Omniscient Strategy** ✦ **At-Will** | |
| *Effect:* The nymph shifts 1 square, and one ally within 5 squares of it moves its speed as a free action. | |
| **Skills** Arcana +26, History +26, Insight +25, Nature +25 | |
| **Str** 16 (+15) **Dex** 19 (+16) **Wis** 26 (+20) | |

HOWARD LYON

*Winter nymph and summer nymph*

### Summer Nymphs in Combat

When King Radain the Bull laid siege to the lumber cities of Kort, the attackers stood amazed when a host of bears, wolves, and walking trees joined them against their enemies.

Miles away, in another time, villagers near the peaceful harbor of Anolath were befuddled when lightning, wind, flooding, and a horde of savage animals obliterated the riverside port.

It is not for the game pieces to know the player's mind, and summer nymphs reveal neither their secrets nor their motivations. The elements, the beasts of the earth, and the land are theirs to command to any end they choose.

# Oblivion Moss

The mossy forests of the fey wilderlands seem an idyllic place, possessed of plentiful wildlife and bordering on fertile farmland. However, even tribes of hardened orc raiders fear to enter the deep woods.

The hunters who brave the darkness within the trees and return to speak about it describe sensing hazy flashes of horror. They recount how twisted humanoid shapes rose from the mossy forest floor, while a disembodied presence gleefully stole their memories.

## Lore

**Nature DC 21:** An oblivion moss is never content to devour the memories of a field mouse or a flying squirrel. This foul creature instead seeks out the minds of foes whose plans extend beyond the search for a next meal on the forest floor. Many elves, eladrin, and devas live in fear of the oblivion moss, which considers such long-lived creatures and their extensive memories a delicacy.

In most cases, a person who survives an oblivion moss attack suffers no permanent effect. An adventurer's specialized knowledge often returns even before the fight is done, with mundane memories returning after a few hours' rest. However, random memories, from recently discovered information to the names and faces of a character's oldest acquaintances, can take weeks to return.

When an oblivion moss is destroyed, the memories of those it has slain linger within it. By eating a portion of the moss, an individual can temporarily gain the memories of the oblivion moss's recent victims. These memories are difficult to recall, often taking the form of vague visions and daydreams. A character who consumes oblivion moss that has absorbed the memories of a bandit scout will not immediately know the location of the bandits' lair. However, he or she might remember the secret door's triggering mechanism once it is found. Such memories usually last until the creature who consumes the moss takes an extended rest.

## Encounters

In areas heavy with oblivion moss, lost forest ruins tend to stay lost. Explorers who attempt to map hidden paths in the deepest mossy woods often stumble out days later with only hazy memories of their journey, and with little inclination to attempt the trek again. For their own protection, dryads and

*Oblivion moss mindmaster and mosslings*

TOMÁS GIORELLO

treants cultivate memory moss near them. They hope that outsiders who stumble upon their domains will be unable to return.

## Oblivion Moss Mindmaster

The oblivion moss mindmaster is a foul plant that feeds on the memories of its foes. Though it moves slowly and seldom ventures far from its concealed lair in the deep forest, a mindmaster can shed chunks of its own body, creating mossy simulacra to torment other creatures. These simulacra rise up from the moss carpet like bodies from the grave, born of the memories that their master steals.

A mindmaster sinks its mental tendrils deep into the mind of its prey, seeking out the specialized training and experience unique to its victims. By plundering these facets of a creature's mind, a mindmaster can create simulacra that can use the enemy's power.

**Oblivion Moss Mindmaster** **Level 12 Elite Controller**
Large fey magical beast (plant) XP 1,400

**HP** 250; **Bloodied** 125 **Initiative** +6
**AC** 26, **Fortitude** 24, **Reflex** 22, **Will** 25 **Perception** +12
**Speed** 2 (forest walk), climb 2 Blindsight 20
**Saving Throws** +2; **Action Points** 1

**Traits**

☼ **Mind Blindness** ✦ **Aura** 1
Any enemy that starts its turn within the aura treats the mindmaster as invisible until the start of the enemy's next turn.

**Standard Actions**

⊕ **Corroding Touch** (acid) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +17 vs. AC
*Hit:* 1d8 + 5 acid damage, and ongoing 10 acid damage (save ends).

⊛ **Scramble the Mind** (psychic) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +15 vs. Will
*Hit:* 3d6 + 7 psychic damage, and the mindmaster slides the target 5 squares.

⊛ **Scour the Mind** (psychic) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +15 vs. Will
*Hit:* 3d6 + 7 psychic damage, and the mindmaster or one of its allies is invisible to the target until the end of the mindmaster's next turn.

⊛ **Absorb Memories** (psychic) ✦ **Recharge** when no mossling duplicate remains
*Attack:* Ranged 5 (one enemy); +15 vs. Will
*Hit:* The target is dazed and cannot use its encounter or daily attack powers (save ends both).
*Effect:* The mindmaster creates a mossling duplicate of the target within 5 squares of the mindmaster. Choose the mossling minion that best reflects the target's role and powers.

**Minor Actions**

**Direct Mossling** ✦ **At-Will** (1/round)
*Effect:* One mossling minion within 10 squares of the mindmaster can move its speed as a free action.

**Triggered Actions**

**Absorb Damage** ✦ **At-Will**
*Trigger:* A mossling within 20 squares of the mindmaster takes damage.
*Effect (Immediate Interrupt):* The mindmaster takes the damage instead of the mossling.

| | | |
|---|---|---|
| **Str** 17 (+9) | **Dex** 10 (+6) | **Wis** 23 (+12) |
| **Con** 21 (+11) | **Int** 19 (+10) | **Cha** 16 (+9) |

**Alignment** unaligned **Languages** Common, telepathy 10

## Mossling Guardian

The caravan guard should have made short work of the mossy interloper, but his best combat moves had fled his mind. As the mossling's lashing tendrils forced him across the forest floor, he took the brunt of an attack with a gnarled wooden greatsword. It was a twisted mockery of his own weapon.

**Mossling Guardian** **Level 12 Minion Soldier**
Medium fey humanoid (plant) XP 175

**HP** 1; a missed attack never damages a minion. **Initiative** +11
**AC** 28, **Fortitude** 25, **Reflex** 22, **Will** 23 **Perception** +10
**Speed** 6 (forest walk) Blindsight 10

**Traits**

☼ **Forgotten Purpose** ✦ **Aura** 1
Any enemy that starts its turn within the aura is slowed until the end of its next turn.

**Mindmaster's Thrall**
If the guardian was created by an oblivion moss mindmaster, it acts immediately after its creator's turn.

**Standard Actions**

⊕ **Tendril Strike** ✦ **At-Will**
*Attack:* Melee 1 (one creature); +17 vs. AC
*Hit:* 10 damage, and the guardian shifts 1 square and slides the target 1 square into the space it occupied.

⸸ **Simulacrum Attack** ✦ **At-Will**
*Effect:* When the guardian first acts during the encounter, choose one at-will melee attack power belonging to an enemy that the guardian can see. If the mossling was created by an oblivion moss mindmaster, choose one at-will melee attack power belonging to the enemy that the mindmaster hit to create the guardian.
*Attack:* Melee 1 (one creature); +17 vs. AC
*Hit:* The target takes damage and is subject to effects as though it were hit by the chosen attack. The damage roll uses the ability score modifier of the creature from whom the power was chosen. The damage does not include any bonuses or penalties to the damage roll that the owner of the power might have. In addition, the guardian gains any benefits from the power's Hit entry, using the ability score modifiers of the creature from whom the power was chosen but not including any bonuses or penalties.

## Mossling Creeper

Bursting from the mass of oblivion moss, the simulacrum adopted a representation of the rogue, right down to his dangling earring and his dagger's distinctive guard. He struck with all his speed, but the mossling was gone—sidestepping his attack and returning it as if the creature was a deadly reflection.

| Mossling Creeper | Level 12 Minion Skirmisher |
|---|---|
| Small fey humanoid (plant) | XP 175 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +14 |
| **AC** 26, **Fortitude** 23, **Reflex** 25, **Will** 24 | **Perception** +11 |
| **Speed** 8 (forest walk) | Blindsight 10 |

**Traits**

**Combat Advantage**

The creeper deals 2 extra damage against any creature granting combat advantage to it.

**Mindmaster's Thrall**

If the creeper was created by an oblivion moss mindmaster, it acts immediately after its creator's turn.

**Standard Actions**

**Tendril Strike ✦ At-Will**

*Attack:* Melee 1 (one creature); +17 vs. AC

*Hit:* 10 damage.

*Effect:* The creeper shifts 2 squares.

**Simulacrum Attack ✦ At-Will**

*Effect:* When the creeper first acts during the encounter, choose one at-will melee attack power belonging to an enemy that the creeper can see. If the creeper was created by an oblivion moss mindmaster, choose one at-will melee attack power belonging to the enemy that the mindmaster hit to create the creeper.

*Attack:* Melee 1 (one creature); +17 vs. AC

*Hit:* The target takes damage and is subject to effects as though it were hit by the chosen attack. The damage roll uses the ability score modifier of the creature from whom the power was chosen. The damage does not include any bonuses or penalties to the damage roll that the owner of the power might have. In addition, the creeper gains any benefits from the power's Hit entry, using the ability score modifiers of the creature from whom the power was chosen but not including any bonuses or penalties.

**Triggered Actions**

**Mossy Slide ✦ At-Will**

*Trigger:* An attack misses the creeper.

*Effect (Immediate Reaction):* The creeper shifts 2 squares.

**Skills** Acrobatics +17

# Mossling Hurler

Time after time, she evaded the simulacrum's *eldritch blast*—her *eldritch blast*, stolen from her own mind—even as the feral creature drew strength from its master to stay on its feet. However, when she finally dropped the mossling, her satisfaction was short-lived as the creature's death shriek sent a torrent of painful memories through her mind.

| Mossling Hurler | Level 12 Minion Artillery |
|---|---|
| Small fey humanoid (plant) | XP 175 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +6 |
| **AC** 24, **Fortitude** 22, **Reflex** 22, **Will** 26 | **Perception** +12 |
| **Speed** 6 (forest walk) | Blindsight 10 |

**Traits**

**Mindmaster's Thrall**

If the hurler was created by an oblivion moss mindmaster, it acts immediately after its creator's turn.

**Standard Actions**

**Bash ✦ At-Will**

*Attack:* Melee 1 (one creature); +17 vs. AC

*Hit:* 8 damage.

**Simulacrum Attack ✦ At-Will**

*Effect:* When the hurler first acts during the encounter, choose one at-will ranged attack power belonging to an enemy that the hurler can see. If the hurler was created by an oblivion moss mindmaster, choose one at-will ranged attack power belonging to the enemy that the mindmaster hit to create the hurler.

*Attack:* Ranged 10 (one creature); +19 vs. AC

*Hit:* The target takes damage and is subject to effects as though it were hit by the chosen attack. The damage roll uses the ability score modifier of the creature from whom the power was chosen. The damage does not include any bonuses or penalties to the damage roll that the owner of the power might have. In addition, the hurler gains any benefits from the power's Hit entry, using the ability score modifiers of the creature from whom the power was chosen but not including any bonuses or penalties.

**Triggered Actions**

**Memory Deathstorm** (psychic)

*Trigger:* The hurler drops to 0 hit points.

*Attack (No Action):* Close burst 2 (enemies in burst); +15 vs. Reflex

*Hit:* 8 psychic damage, and the target is dazed (save ends).

| | | |

**Alignment** unaligned **Languages** –

## Using Oblivion Moss in Your Game

When designing encounters around oblivion moss, you might worry about the logistics of having to know and use the PCs' at-will powers when a mossling makes its *simulacrum attack*. You can avoid this extra work by having the player of the PC make the mossling's attack and damage rolls. Doing so also heightens the sense that PCs in combat with mosslings are fighting themselves. It's also a good idea to pick at-will attack powers that are simple to use and don't have a lot of effects that are difficult to track.

The aftermath of an encounter with an oblivion moss can trigger minor quests or side treks, when PCs who eat the remains of an oblivion moss gain the hazy memories of other creatures. A character might recall an important message being relayed by an eladrin scout killed by the oblivion moss, or might dream of a fomorian vault deep within the Feydark. However, such visions must be acted on quickly. Once a party rests, these memories are usually lost, and instinctive information such as the appearance of the eladrin's contact or how to avoid the vault's traps cannot always be recalled clearly enough to be written down.

The remains of an oblivion moss can also be part of a treasure parcel. Raw moss can be sold to an alchemist or herbalist, or can be used as a component in rituals requiring Arcana or Nature checks.

## Mossling Grower

As the mossling grower stood next to its allies, it seemed to shield them with a constant influx of new, mossy growth. When the adventurers finally turned their attention to killing the grower, the creature proved easy enough to dispatch. However, upon its death, it burst in a spray of vigor, augmenting other plant creatures around it.

**Mossling Grower** **Level 12 Minion Controller (Leader)**
Small fey humanoid (plant) XP 175

**HP** 1; a missed attack never damages a minion. **Initiative** +10
**AC** 26, **Fortitude** 23, **Reflex** 24, **Will** 25 **Perception** +9
**Speed** 8 (forest walk) Blindsight 10

**Traits**

**☼ Shield of Vines ✦ Aura** 1
Plant allies within the aura gain a +2 bonus to all defenses.

**Mindmaster's Thrall**
If the grower was created by an oblivion moss mindmaster, it acts immediately after its creator's turn.

**Standard Actions**

**⊕ Tendril Strike ✦ At-Will**
*Attack:* Melee 1 (one creature); +17 vs. AC
*Hit:* 10 damage, and the target is slowed until the end of its next turn.

**⚕ Simulacrum Attack ✦ At-Will**
*Effect:* When the grower first acts during the encounter, choose one at-will melee attack power belonging to an enemy that the grower can see. If the grower was created by an oblivion moss mindmaster, choose one at-will melee attack power belonging to the enemy that the mindmaster hit to create the grower.
*Attack:* Melee 1 (one creature); +17 vs. AC
*Hit:* The target takes damage and is subject to effects as though it were hit by the chosen attack. The damage roll uses the ability score modifier of the creature from whom the power was chosen. The damage does not include any bonuses or penalties to the damage roll that the owner of the power might have. In addition, the grower gains any benefits from the power's Hit entry, using the ability score modifiers of the creature from whom the power was chosen but not including any bonuses or penalties.

**Triggered Actions**

**Cultivating Burst**
*Trigger:* The grower drops to 0 hit points.
*Effect (No Action):* Each nonminion plant ally within 3 squares of the grower gains 20 temporary hit points.

| | | |

## Mossling Vinecaller

A mix of moss and vines, the vinecaller is a writhing mess of plant life. The forest floor twists and pulls at its behest, slowing any foes that approach. The creature's appearance is misleading, for although its arms look small and feeble, they contain vines that can strike like a viper and toss a foe around like a rag doll.

**Mossling Vinecaller** **Level 12 Minion Controller**
Small fey humanoid (plant) XP 175

**HP** 1; a missed attack never damages a minion. **Initiative** +9
**AC** 26, **Fortitude** 24, **Reflex** 23, **Will** 25 **Perception** +10
**Speed** 8 (forest walk) Blindsight 10

**Traits**

**☼ Writhing Moss ✦ Aura** 1
Enemies treat squares within the aura as difficult terrain.

**Mindmaster's Thrall**
If the vinecaller was created by an oblivion moss mindmaster, it acts immediately after its creator's turn.

**Standard Actions**

**⊕ Tendril Strike ✦ At-Will**
*Attack:* Melee 3 (one creature); +17 vs. AC
*Hit:* 10 damage, and the vinecaller slides the target 2 squares.

**Simulacrum Attack ✦ At-Will**
*Effect:* When the vinecaller first acts during the encounter, choose one at-will ranged attack power belonging to an enemy that the vinecaller can see. If the vinecaller was created by an oblivion moss mindmaster, choose one at-will ranged attack power belonging to the enemy that the mindmaster hit to create the vinecaller.
*Attack:* Ranged 10 (one creature); +17 vs. AC
*Hit:* The target takes damage and is subject to effects as though it were hit by the chosen attack. The damage roll uses the ability score modifier of the creature from whom the power was chosen. The damage does not include any bonuses or penalties to the damage roll that the owner of the power might have. In addition, the vinecaller gains any benefits from the power's Hit entry, using the ability score modifiers of the creature from whom the power was chosen but not including any bonuses or penalties.

**Triggered Actions**

**Vine Call**
*Trigger:* The vinecaller drops to 0 hit points.
*Effect (No Action):* The vinecaller's square and each square adjacent to it become difficult terrain until the end of the encounter.

**Alignment** unaligned **Languages** –

## Oblivion Mosses in Combat

The first sign of an oblivion moss mindmaster is the wrenching sensation of memories being stolen as the creature lies in wait, unseen. The attack of a mossling follows. The mindmaster then splits its time between its own attacks and keeping the mossling in the thick of the fray. The longer the fight drags on, the more of these foul simulacra a party will face.

Oblivion mosses are drawn to longer-lived creatures because of their extensive memories. Elves, eladrin, devas, and other races that have long life spans are often targeted first by an oblivion moss.

Against an oblivion moss attack, the most grizzled veteran and the keenest tyro are reduced to making the clumsiest attacks as they are dragged across the battlefield. All the while, the unearthly laughter of the oblivion moss mindmaster echoes in their thoughts as their memories disappear.

# Ogre

Ogres have a reputation for mindless brutality, but those who write these creatures off as unthinking brutes do so at their peril. The most powerful ogres nurture a spark of cunning that ranks them among the deadliest foes an adventurer can face.

## Lore

**Nature DC 21:** An ogre's size and ferocity usually allow it to take what it wants, but intelligent ogres quickly learn to negotiate when foes display significant power. Ogres respect physical strength, and they enjoy loud displays of rock throwing, tree falling, and wrestling. An outsider who can best an ogre tribe's champion gains significant respect and might even negotiate a short-term alliance or an end to hostilities.

## Encounters

Ogres seldom engage in long-term alliances, but warriors sometimes take up as mercenaries, typically in exchange for armor and weapons they cannot make themselves. Young ogre dreadnoughts are more commonly found in the free service of other creatures, including giants that can provide the weapons and armor that allow a dreadnought to one day challenge for the leadership of a tribe. Ogres sometimes raise dire animals and other large beasts as guards or companions. Such monsters that prove too difficult to train are kept in pit traps within an ogre tribe's lair.

## Ogre Cave Hunter

The adventurers pursued the ogre raiders for a week through the wilderness before finding their cave at last. Four of them sat crouched around a fire, as if hoping to make themselves easy targets. Too late did the heroes see the rest of the pack waiting in the shadows.

**Ogre Cave Hunter** — **Level 8 Lurker**
Large natural humanoid — XP 350

**HP** 70; **Bloodied** 35 — **Initiative** +12
**AC** 22, **Fortitude** 20, **Reflex** 19, **Will** 18 — **Perception** +4
**Speed** 8

**Standard Actions**

⊕ **Club** (weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +13 vs. AC
*Hit:* 2d8 + 7 damage.

⸸ **Skull Bash** (weapon) ✦ **At-Will**
*Attack:* Melee 2 (one dazed creature); +13 vs. AC
*Hit:* 4d8 + 7 damage.

⸸ **Smash and Swing** (weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +13 vs. AC
*Hit:* 1d8 + 3 damage, and the target is dazed until the end of the cave hunter's next turn. In addition, the cave hunter slides the target 5 squares to a square within 2 squares of the ogre.

**Triggered Actions**

**Victim Shield** ✦ **At-Will**
*Requirement:* A dazed enemy must be within 2 squares of the cave hunter.
*Trigger:* The cave hunter is hit by a melee or a ranged attack.
*Effect (Immediate Interrupt):* The cave hunter gains a +4 bonus to all defenses against the attack. If the attack misses the cave hunter, one dazed enemy takes damage as if it had been hit by the attack. The cave hunter then slides that enemy 4 squares to a square within 2 squares of it.

**Str** 21 (+9) — **Dex** 18 (+8) — **Wis** 10 (+4)
**Con** 16 (+7) — **Int** 8 (+3) — **Cha** 6 (+2)
**Alignment** chaotic evil — **Languages** Giant
**Equipment** hide armor, club

### Ogre Cave Hunters in Combat

A cave hunter stays in the thick of combat, keeping as many targets within reach as it can. It alternates between attacks, first using *smash and swing* to daze creatures and then targeting them with *skull bash* on the next turn. It uses dazed creatures as living shields against their own allies whenever an attack might otherwise hit the cave hunter.

## Ogre Ironclad

In place of the skins and hides that normally clad their kind, ogre ironclads wear piecemeal armor of chain and plate. They advance with the precision and force of cavalry, breaking through enemies' front lines like a hammer blow.

**Ogre Ironclad** — **Level 9 Soldier**
Large natural humanoid — XP 400

**HP** 96; **Bloodied** 48 — **Initiative** +9
**AC** 26 (24 while the ironclad is bloodied), **Fortitude** 24, **Reflex** 21, **Will** 19 — **Perception** +3
**Speed** 8

**Traits**

**Barreling Charge**
While bloodied, the ironclad uses a melee basic attack against one or two targets at the end of a charge instead of against one target.

**Standard Actions**

⊕ **Maul** (weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +14 vs. AC
*Hit:* 2d8 + 8 damage, and the target is marked until the end of the ironclad's next turn.

**Triggered Actions**

⸸ **Ironclad Reaction** (weapon) ✦ **At-Will**
*Trigger:* An enemy marked by the ironclad makes an attack that does not include the ironclad as a target.
*Attack (Immediate Reaction):* Melee 2 (triggering enemy); +14 vs. AC
*Hit:* 2d8 + 8 damage, and the ironclad pushes the target 1 square and knocks it prone.

**Str** 22 (+10) — **Dex** 17 (+7) — **Wis** 8 (+3)
**Con** 16 (+7) — **Int** 6 (+2) — **Cha** 6 (+2)
**Alignment** chaotic evil — **Languages** Giant
**Equipment** chainmail, maul

## Ogre Ironclads in Combat

An ogre ironclad fights with a degree of tactical precision unknown to its more brutish kin. Its armor affords it initial protection as it charges around the battlefield. As the battle goes on, though, the armor weakens from repeated blows.

# Ogre Storm Shaman

The ogres had been raiding the frontier outposts for the better part of a month, aided by strange storms that made it all but impossible to track them. The younger defenders shrugged it off, but the veterans knew the signs of a storm shaman.

| **Ogre Storm Shaman** | **Level 11 Controller** |
|---|---|
| Large natural humanoid | XP 600 |
| **HP** 114; **Bloodied** 57 | **Initiative** +8 |
| **AC** 25, **Fortitude** 23, **Reflex** 20, **Will** 22 | **Perception** +8 |
| **Speed** 8 | |

**Standard Actions**

**Thunder Staff** (thunder, weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +16 vs. AC
*Hit:* 3d6 + 9 thunder damage. A blinded or deafened target is also dazed (save ends).

**Thunder Blast** (thunder) ✦ **Recharge** ⚄ ⚅
*Attack:* Close blast 5 (enemies in blast); +14 vs. Fortitude
*Hit:* 2d6 + 6 thunder damage, and the target is deafened (save ends).

**Call Lightning** (lightning) ✦ **Recharge** when first bloodied
*Attack:* Area burst 1 within 10 (enemies in burst); +14 vs. Reflex
*Hit:* 3d8 + 6 lightning damage, and the target is blinded (save ends).

**Minor Actions**

**Drenching Rain** ✦ **At-Will**
*Effect:* The storm shaman creates a zone in an area burst 3 within 10 squares that lasts until the end of the encounter or until the storm shaman uses this power again. Any enemy within the zone takes a -2 penalty to attack rolls and a -2 penalty to all defenses.

| | | |
|---|---|---|
| **Str** 23 (+11) | **Dex** 16 (+8) | **Wis** 16 (+8) |
| **Con** 18 (+9) | **Int** 12 (+6) | **Cha** 11 (+5) |

**Alignment** chaotic evil **Languages** Giant
**Equipment** hide armor, staff

## Ogre Storm Shamans in Combat

Storm shamans lead their tribes in a primal faith that brings the fury of the storm to bear against their foes. A storm shaman first traps enemies within a zone of *drenching rain*. It then wades into combat with its kin, using *thunder staff* against targets blinded by *call lightning* or deafened by *thunder blast*.

# Ogre Dreadnought

Throughout the long night, the gate held against the ogre assault. However, at dawn's first light, the dreadnought approached, and the defenders felt fear for the first time. Its howl shook the high walls, echoed by the lesser ogres as they closed ranks and prepared for a final assault.

| **Ogre Dreadnought** | **Level 14 Soldier** |
|---|---|
| Large natural humanoid | XP 1,000 |
| **HP** 140; **Bloodied** 70 | **Initiative** +12 |
| **AC** 30, **Fortitude** 28, **Reflex** 24, **Will** 26 | **Perception** +12 |
| **Speed** 8 | |

**Traits**

**Threatening Reach**
The dreadnought can make opportunity attacks against all enemies within 2 squares of it.

**Standard Actions**

**Greatsword** (weapon) ✦ **At-Will**
*Attack:* Melee 2 (one creature); +19 vs. AC
*Hit:* 1d12 + 16 damage, and the target is immobilized until the end of the dreadnought's next turn.

**Triggered Actions**

**Dreadnought Resolve** ✦ **Recharge** ⚀ ⚄ ⚅
*Trigger:* The dreadnought fails a saving throw.
*Effect (No Action):* The dreadnought rerolls the saving throw with a +2 bonus.

**Skills** Athletics +19

| | | |
|---|---|---|
| **Str** 24 (+14) | **Dex** 16 (+10) | **Wis** 20 (+12) |
| **Con** 20 (+12) | **Int** 8 (+7) | **Cha** 23 (+13) |

**Alignment** chaotic evil **Languages** Common, Giant
**Equipment** plate armor, greatsword

## Ogre Dreadnoughts in Combat

A fully equipped ogre dreadnought is a terror on the battlefield, laying into foes with *greatsword* and shrugging off the effects of enemy powers.

CHIPPY

# OGRÉMOCH

With his passage, the ground trembles. Known by many names—the Stone Tyrant, Lord of the Black Earth, Prince of Elemental Earth—Ogrémoch is one of several primordials who serves the Elder Elemental Eye. Through his devotion, he unwittingly grants power to Tharizdun, the Chained God. (See "The Elder Elemental Eye" sidebar on page xx for more information.) Although other primordials scorn the Elemental Princes for their service to the mysterious entity, Ogrémoch nevertheless demands their fear and respect. Still, despite his power, Ogrémoch met with defeat during the Dawn War. Now he is bound, shackled to his realm and working toward the day when both he and his master will be freed to wreak vengeance against the hated gods.

**Ogrémoch** **Level 34 Solo Soldier**
Gargantuan elemental humanoid (earth, primordial) XP 195,000

**HP** 1,244; **Bloodied** 622 **Initiative** +24
**AC** 50, **Fortitude** 48, **Reflex** 45, **Will** 47 **Perception** +26
**Speed** 8 (earth walk), burrow 8, climb 8 Darkvision, tremorsense 20
**Immune** disease, poison, sleep
**Saving Throws** +5; **Action Points** 3

**Traits**

**Jagged Earth ✦ Aura 5**
Squares within the aura are difficult terrain. The first time any creature enters a square within the aura during its turn, it must succeed on a DC 32 Athletics or Acrobatics check or take 20 damage. Creatures that have earth walk ignore the aura's effects.

**Earthbound**
While standing on a solid surface, Ogrémoch can ignore forced movement and cannot be knocked prone.

**Earth Glide**
Ogrémoch can pass through earth and rock as if it were phasing.

**Standard Actions**

**Slam ✦ At-Will**
*Attack:* Melee 4 (one creature); +39 vs. AC
*Hit:* 4d8 + 24 damage, and each enemy adjacent to the target is dazed until the end of Ogrémoch's next turn.

**Ogrémoch's Fury ✦ At-Will**
*Effect:* Ogrémoch uses *slam* twice, or three times while he is bloodied. If Ogrémoch hits the same target more than once, he pushes the target 10 squares and the target is treated as having failed a saving throw against *encasing shards* if he or she is currently affected by it.

**Earth Smash ✦ At-Will**
*Attack:* Close blast 5 (creatures in blast); +37 vs. Reflex
*Hit:* 2d8 + 12 damage, and the target falls prone and is dazed (save ends).
*Miss:* Half damage.

**Tremendous Quake ✦ Recharge** when first bloodied
*Attack:* Close burst 10 (creatures in burst); +37 vs. Fortitude
*Hit:* 5d8 + 12 damage, and Ogrémoch slides the target 4 squares and knocks it prone. In addition, the target cannot stand up and is dazed (save ends both).
*Miss:* Half damage, and Ogrémoch slides the target 1 square and knocks it prone.

**Minor Actions**

**Earthshatter ✦ At-Will** (1/round)
*Requirement:* Ogrémoch must be bloodied.
*Target:* A petrified creature within 10 squares of Ogrémoch
*Effect:* The creature is no longer petrified, and Ogrémoch makes the following attack centered on the creature and including the creature.
*Attack:* Close burst 3 (creatures in burst); +37 vs. Fortitude
*Hit:* 3d8 + 12 damage.

**Encasing Shards ✦ Recharge** ⚄ ⁞⁞
*Attack:* Close blast 5 (creatures in blast); +37 vs. Fortitude
*Hit:* The target is immobilized (save ends).
*First Failed Saving Throw*: The target is stunned (save ends).
*Second Failed Saving Throw*: The target is petrified (save ends; the target takes a -5 penalty to the saving throw).

**Triggered Actions**

**Jagged Eruption ✦ At-Will**
*Trigger:* An enemy hits Ogrémoch with a melee attack.
*Attack (Immediate Reaction):* Close burst 3 (enemies in burst); +37 vs. Reflex
*Hit:* 2d8 + 12 damage, and the target is immobilized (save ends).
*Aftereffect*: The target takes 10 damage.

**Eternal Resilience ✦ At-Will**
*Trigger:* Ogrémoch is subjected to an effect that a save can end.
*Effect (No Action)*: Ogrémoch makes a saving throw against the effect.

**Variable Resistance ✦ 3/Encounter**
*Trigger:* Ogrémoch takes acid, cold, fire, lightning, or thunder damage.
*Effect (Free Action):* Ogrémoch gains resist 20 to the triggering damage type until the end of the encounter or until it uses *variable resistance* again.

| | | |
|---|---|---|
| **Str** 34 (+29) | **Dex** 21 (+22) | **Wis** 29 (+26) |
| **Con** 31 (+27) | **Int** 24 (+24) | **Cha** 27 (+25) |

**Alignment** chaotic evil **Languages** Primordial

## Lore

**Arcana DC 33:** Before the natural world came to be, there was formless substance: roiling, clashing, and billowing matter. The first to stir in this chaotic sea were the primordials, beings formed from the substance but possessed of cunning and awareness. These first few sired other primordials and together fashioned the world from creation's building blocks.

The Stone Tyrant has lived since the dawn of time and has witnessed the rise and fall of his children. He has seen the formation of a world and endured when it was ripped from his scions' hands to be reshaped and populated by the hated gods. He has waited. He has watched. Through it all, his anger has grown.

Like other primordials, Ogrémoch had little use for the gods and their designs, but he grew worried by their burgeoning interests in the natural world. Such concern made it possible for the Stone Tyrant to set aside his distrust of his fellow Elemental Princes and ally with them in an attempt to free the Elder Elemental Eye, whom they believed to be the first primordial. Despite this alliance, the gods proved triumphant and the Elemental Princes were beaten, their power shattered.

MATIAS TAPIA

Ogrémoch fell back to the Elemental Chaos at the war's end, where he languishes in his great flat-topped mountain deep in the plane, a prisoner in his own realm. Moradin forged the chains that would hold the Elemental Prince, binding him with the whipping winds that rage in the heart of his mountain home. Still, Ogrémoch's confinement doesn't prevent him from touching the mortal world. Cults dedicated to him toil to free both him and the Elder Elemental Eye, which holds the promise of absolute power.

## Encounters

Ogrémoch has many followers, but when confronting a foe, he prefers to do so alone. He fights on vast plains of earth or in enormous caverns, where he can use terrain to his advantage. He causes cave-ins and sunders great chasms in the ground. If any of his followers attempt to assist him, they know that Ogrémoch is an unforgiving lord and will not usually distinguish between them and enemies.

## Ogrémoch in Combat

The Stone Tyrant is not subtle. At his approach, the ground shakes and shatters. He slams enemies with rocky fists and wades through foes, causing the land to shudder with every step.

Ogrémoch's mere presence disrupts the earth, making the ground quickly drop away or rise up in deadly shafts. The earth obeys Ogrémoch's commands, and with a rumbling word, Ogrémoch can order the stone to encase his foes.

When Ogrémoch is attacked, he exudes jagged spikes with a thought, impaling his foes. The earth cracks and groans under his demands, yet it always yields. When Ogrémoch's fury is greatest, he calls for a quake that throws creatures in every direction.

Ogrémoch is every bit as violent and unpredictable as his peers, but age gives the ancient primordial wisdom. If the Elemental Prince becomes severely injured and beset by too many enemies, he burrows to safety.

# Ogrémoch's Cultists

In hidden grottos, old root cellars, and ruins deep within the Underdark's warrens lurk the cultists of Elemental Earth. Followers find the Stone Tyrant an uncaring master who displays a distant and sometimes cruel power. Yet the exiles and lunatics that worship Ogrémoch recognize that he rewards his greatest servants with dread power. For such a boon, they gladly pay homage to the Elemental Prince.

Ogrémoch is sparing with the power he grants, forcing cultists to rely on servitors to protect their altars. Cult leaders prey on rustic folk, manipulating their superstitions and beliefs to lure them into Ogrémoch's smothering embrace. Deluded into believing the primordial to be a benevolent power of earth, many join these cults. By the time they realize their error, it is far too late to escape the cult's clutches.

## Lore

**History DC 17:** Ogrémoch's cults are primitive, mysterious, and, in the eyes of those who revere the divine, backward. Ceremonies are particular to each cult. Some bloodthirsty groups offer living sacrifices to the uncaring primordial, while more cerebral followers see Ogrémoch as the lord of mysteries and secrets, of hidden places, and of dark moist earth and the creatures within it. Ogrémoch attracts diverse servants, from hedge witches in isolated hamlets to troglodyte tribes that offer gifts by throwing captives into black chasms.

Ogrémoch sometimes gains followers from unexpected sources. Some worship the primordial as an alternative to the gods. As a mighty power, hidden from mortal eyes, the Stone Tyrant represents strength and endurance. As the lord of earth, he also claims dominion over hidden treasures. Those seeking gold, silver, and gemstones offer him sacrifices, making him popular with greedy prospectors, miners, and, of course, dwarves.

Temples devoted to elemental earth are always buried, sequestered from rival forces to enable the followers to revel in the Elemental Prince's power in its purest form. The smallest cells might claim old cellars or dungeons, while larger groups congregate in the Underdark's desolate regions.

Ogrémoch's most devout followers are eventually imparted with knowledge of the existence of Ogrémoch's master, the Elder Elemental Eye. Once initiated, these enlightened cultists take up the cause of freeing the Eye, seeing it as the absolute expression of elemental power. They come to understand that Ogrémoch is one facet of that great force, along with Imix and the other Elemental Princes. Rivalries between elemental cults fade away at the highest levels, with all devotees focused on the same goals: empowering their masters and freeing the Elder Elemental Eye.

Since most earth temples form in uncivilized communities such as grimlock and troglodyte settlements, these groups also attract a wide range of monstrous allies. Ogres, giants, and ettins give service to these temples even if they do not embrace the faith. They act as grunts, shock troops, and guardians, blocking access to hidden shrines through their powerful build and menacing appearance.

Earth elemental creatures are quite common too. Galeb duhrs create new shrines and might claim Ogrémoch as their maker. Gargoyles, gorgons, and ropers also support earth temples, usually as incidental allies, but some take stronger roles. Underdark fauna infests these temples, including bulettes, basilisks, and even aberrant creatures and undead. Few Ogrémoch cultists use demonic servants. They rely on elemental allies instead, finding them more reliable and useful in the end.

## Earth Cultist

Earth cultists are common servitors, those simple folk who obey because they know nothing else. Few cultists understand their peril at first, but as their knowledge about the primordial grows, Ogrémoch's malevolence slowly corrupts them until it overwhelms them entirely.

**Earth Cultist** **Level 8 Minion Controller**
Medium natural humanoid, human XP 88

**HP** 1; a missed attack never damages a minion. **Initiative** +7
**AC** 22, **Fortitude** 23, **Reflex** 21, **Will** 18 **Perception** +3
**Speed** 5

**Standard Actions**

**Warhammer** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 8 damage.

**Triggered Actions**

**Petrifying Fount**
*Trigger:* The cultist drops to 0 hit points.
*Effect (No Action):* Each enemy adjacent to the cultist is slowed (save ends).
*First Failed Saving Throw:* The target is petrified (save ends).

| | | |
|---|---|---|
| **Str** 21 (+9) | **Dex** 16 (+7) | **Wis** 8 (+3) |
| **Con** 16 (+7) | **Int** 10 (+4) | **Cha** 11 (+4) |

**Alignment** evil **Languages** Common
**Equipment** leather armor, warhammer

### Earth Cultists in Combat

Earth cultists appear human, but dark rituals and blasphemous ceremonies have stripped away their fundamental nature. Dark blood flows like mud in their veins, their eyes turning to black orbs as the clinging earth slowly fills their bodies. When they fall in battle, putrid soil and broken rubble erupts from their flesh to wash everything around them with debris.

## Fist of the Stone Tyrant

During the Age of Chains, dwarves served the primordials as slaves. Although the dwarves eventually threw off the shackles of their enslavement, a few emerged from their captivity resentful not of the primordials but of the gods. These dwarves believed the gods had betrayed them, so they turned to the Stone Tyrant for revenge. They whispered terrible oaths to Ogrémoch, vowing eternal war against their kin and the gods they worship.

**Fist of the Stone Tyrant** **Level 9 Soldier (Leader)**
Medium natural humanoid, dwarf XP 400

**HP** 98; **Bloodied** 49 **Initiative** +6
**AC** 25, **Fortitude** 23, **Reflex** 18, **Will** 21 **Perception** +7
**Speed** 5 (earth walk) Low-light vision

**Traits**

**Rotting Earth ✦ Aura** 1
Any enemy that starts its turn within the aura is slowed until the start of its next turn.

**Stone Tyrant's Boon ✦ Aura** 1
Allies within the aura gain a +2 power bonus to AC and Fortitude.

**Stand the Ground**
Whenever the fist of the Stone Tyrant is pulled, pushed, or slid, it can move 1 square less than the effect specifies.

**Standard Actions**

**War Pick** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +14 vs. AC
*Hit:* 2d8 + 7 damage, and the target is marked until the end of the fist's next turn.

**Triggered Actions**

**Stone Tyrant's Grasp** (necrotic) ✦ **At-Will**
*Trigger:* An enemy marked by the fist leaves the *rotting earth* aura.
*Effect (Immediate Reaction):* The fist shifts 1 square and makes the following attack.
*Attack:* Melee 1 (triggering enemy); +16 vs. AC
*Hit:* 1d8 + 5 damage plus 5 necrotic damage, and the target is immobilized until the end of the fist's next turn.

**Steady Footed ✦ At-Will**
*Trigger:* An effect knocks the fist prone.
*Effect (No Action):* The fist makes a saving throw. If the fist saves, it remains standing.

| | | |
|---|---|---|
| **Str** 21 (+9) | **Dex** 11 (+4) | **Wis** 16 (+7) |
| **Con** 18 (+8) | **Int** 9 (+3) | **Cha** 11 (+4) |

**Alignment** chaotic evil **Languages** Common, Dwarven, Primordial
**Equipment** plate armor, heavy shield, war pick

### Fists of the Stone Tyrant in Combat

Fists of the Stone Tyrant fight with fervor, vying for the favor of Ogrémoch. Bellowing war songs as they launch attacks, the fists revel in each sickening crunch of their war picks. They ignore injuries, claiming supremacy even as enemies strike them down.

## Stone Thrall

Giants associated with earth have long venerated Ogrémoch, and their devotion spreads to their servants. Many ogres that share lands with hill giants embrace Ogrémoch not out of any special kinship, but instead because they are foolish and gullible. Cults take advantage of these thralls, using them as guards for their hidden grottos.

*Fist of the Stone Tyrant and chthonic stoneshaper*

| **Stone Thrall** | **Level 15 Brute** |
|---|---|
| Large natural humanoid, ogre | XP 1,200 |
| **HP** 184; **Bloodied** 92 | **Initiative** +9 |

## Stone Thralls in Combat

A stone thrall is somewhat smarter and more alert than other ogres, but it remains a dim creature, driven by base needs. Thralls fight as their masters bid, smashing enemies in exchange for food, drink, and shiny baubles that appeal to their greedy nature. If their benefactors are killed, stone thralls are not above fleeing to find easier prey.

# Earth Weird

The Lord of the Black Earth is a distant master, offering little to those who fight in his name. Mortals are specks, not important enough to stir the ancient primordial from his stony prison. Yet from time to time, a wicked mortal displays an affinity for earth so profound that even the Stone Lord takes notice. Ogrémoch rewards such power with a small infusion of his own might, knowing that by their very nature the earth weirds will advance his cause.

| **Earth Weird** | **Level 16 Controller** |
|---|---|
| Medium elemental humanoid, genasi | XP 1,400 |
| **HP** 148; **Bloodied** 74 | **Initiative** +10 |
| **AC** 30, **Fortitude** 26, **Reflex** 28, **Will** 28 | **Perception** +12 |
| **Speed** 5 (earth walk) | |
| **Standard Actions** | |
| **Morningstar** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +21 vs. AC | |
| *Hit:* 2d10 + 13 damage, and the weird pushes the target 1 square. | |
| **Quake Bolt** ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +19 vs. Reflex | |
| *Hit:* 3d6 + 8 damage, and the target falls prone. | |
| **Bury** ✦ **At-Will** | |
| *Attack:* Ranged 5 (one prone enemy); +19 vs. Fortitude | |
| *Hit:* The target cannot stand up, is immobilized, and takes ongoing 10 damage (save ends all). | |
| *Aftereffect:* The target is slowed until the end of its next turn. | |
| **Stoneburst** (zone) ✦ **At-Will** | |
| *Attack:* Area burst 1 within 5 (creatures in burst); +19 vs. Reflex | |
| *Hit:* 2d10 + 7 damage. | |
| *Effect:* The burst creates a zone of difficult terrain that lasts until the end of the earth weird's next turn. | |
| **Minor Actions** | |
| **Earthshock** ✦ **Encounter** | |
| *Attack:* Close burst 1 (enemies in burst touching a solid surface); +19 vs. Fortitude | |
| *Hit:* The target falls prone. | |
| **Skills** Arcana +19 | |
| **Str** 15 (+10) **Dex** 15 (+10) **Wis** 18 (+12) | |

| **Alignment** chaotic evil **Languages** Common, Primordial | |
| **Equipment** morningstar | |

## Earth Weirds in Combat

Earthen debris trembles at an earth weird's approach, shuddering and skittering toward the elemental mage. Drawing deep on elemental power, an earth weird wields stone and soil as weapons, hurling seething orbs of kinetic energy and causing the

MATIAS TAPIA

ground to split and the earth to grasp at its enemies. Creatures allied with an earth weird see it as a living example of Ogrémoch's blessings and rally to the cause in the weird's proximity.

## Chthonic Apostle

Hill giants are not known for their devotion. Like most giants, they serve the primordials out of fear, not loyalty. A few hill giants and their stone giant comrades might work with an earth cult, having been drawn by omens that seemed to guide them toward a great destiny. The cult leaders bind these hulking beasts with dark magic, infusing them with elemental power to make them more useful servants.

**Chthonic Apostle** **Level 24 Soldier**
Large natural humanoid (giant), hill giant XP 6,050

**HP** 225; **Bloodied** 112 **Initiative** +17
**AC** 40, **Fortitude** 37, **Reflex** 32, **Will** 35 **Perception** +18
**Speed** 8

**Traits**

**Stone Cursed**
While bloodied, the chthonic apostle has speed 4 and resist 10 to all damage.

**Standard Actions**

**Greatspear** (weapon) ✦ **At-Will**
*Attack:* Melee 3 (one creature); +29 vs. AC
*Hit:* 2d12 + 14 damage, and the target is marked until the end of the apostle's next turn.

**Impale** (weapon) ✦ **At-Will**
*Attack:* Melee 3 (one creature the apostle has marked); +29 vs. AC
*Hit:* 1d12 + 8 damage, and the target enters the apostle's space. The target is immobilized and takes ongoing 10 damage (save ends). The target automatically moves with the apostle while immobilized, and each time the apostle hits with a *greatspear* attack, the immobilized target takes 10 damage and is dazed until the end of the apostle's next turn. When an immobilized creature saves against the effect, it shifts to a square adjacent to the apostle.

**Triggered Actions**

**Petrification**
*Trigger:* The apostle drops to 0 hit points.
*Effect (No Action):* The apostle permanently becomes a stone statue and counts as blocking terrain. If a creature is immobilized by the apostle's impaling thrust when this occurs, that creature is trapped in the apostle's space and becomes restrained (save ends). When a restrained creature saves, it appears in an unoccupied space of its choice adjacent to the apostle.

**Str** 27 (+20) **Dex** 16 (+15) **Wis** 22 (+18)
**Con** 25 (+19) **Int** 10 (+12) **Cha** 11 (+12)

**Alignment** chaotic evil **Languages** Giant, Primordial
**Equipment** plate armor, greatspear

### Chthonic Apostles in Combat

Ogrémoch's blessings awaken new awareness in som hill giants, stirring their consciousness to make them smarter and far more dangerous than other such giants. A chthonic apostle establishes a defensive position, blocking passage to its allies. When an enemy comes into reach, the apostle impales the creature, raising its weapon so the enemy slides down the length. One by one, the apostle skewers its foes until it collects a brace of enemies.

An apostle contains elemental energy through force of will and concentration. As a chthonic apostle takes damage, its body assumes a stony appearance. The petrifaction worsens the more damage the giant takes until when it is killed, it becomes a stone statue.

## Chthonic Stoneshaper

Worship of Ogrémoch is an old faith, one whose legacy extends back to the world's formation. Shrines to the Prince of Elemental Earth persist in the deep earth, lost in cool caverns far from the highways. Those who have earned their master's blessing sometimes seek out these ancient sites, braving the Underdark's perils to tease forth their distant master's secrets. Few survive such expeditions, but those who do prove their worth. As a reward, they lose something of their essential nature, their consciences fading and leaving behind cold hatred and renewed commitment to serving their elemental lord.

**Chthonic Stoneshaper** **Level 24 Artillery**
Medium natural humanoid, human XP 6,050

**HP** 175; **Bloodied** 87 **Initiative** +16
**AC** 34, **Fortitude** 36, **Reflex** 34, **Will** 36 **Perception** +18
**Speed** 6 (earth walk)

**Standard Actions**

**Warhammer** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +29 vs. AC
*Hit:* 2d10 + 13 damage.

**Stony Embrace** ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +29 vs. Reflex
*Hit:* 2d6 + 7 damage, and the target is restrained and takes ongoing 10 damage (save ends both).

**Rending Earth** ✦ **At-Will**
*Attack:* Ranged 20 (one creature restrained by the stoneshapers's *stony embrace*); +29 vs. Fortitude
*Hit:* 2d8 + 7 damage, and the target is stunned (save ends).

**Minor Actions**

**Unruly Earth** ✦ **Recharge** ⚅ ⚄ ⚃
*Attack:* Close burst 2 (enemies in burst); +29 vs. Reflex
*Hit:* 2d6 + 8 damage, and the stoneshaper pushes the target 3 squares and knocks it prone.

**Skills** Arcana +19, Endurance +24, Intimidate +26
**Str** 19 (+16) **Dex** 19 (+16) **Wis** 23 (+18)
**Con** 25 (+19) **Int** 14 (+14) **Cha** 28 (+21)

**Alignment** chaotic evil **Languages** Common, Primordial
**Equipment** warhammer, ceremonial knife

### Chthonic Stoneshapers in Combat

Stone bends to a chthonic stoneshaper's touch, flowing like water, obeying its every whim. A stoneshaper uses its absolute mastery to bind enemies in earthen chains that tighten as a foe struggles. Once a victim is encased in rock, the stoneshaper gestures and the chains twist around the creature to pulp flesh and splinter bones.

# Rot Grub

Lurking within the rotting flesh of a slain adventurer, a rot grub poses a deadly threat to those who venture into ancient crypts and abandoned dungeons. Some claim that they are Torog's spawn and that these ever-hungry worms seek only to cause pain and death in Torog's name. Orcs abandon dungeons that rot grubs infest, while gnolls capture rot grubs and use them to torment captives in bizarre rites to Yeenoghu.

A rot grub is a deadly parasite that feasts on both living and dead flesh. Its voracious appetite leads it to burrow into a living creature, gorging itself on its victim's muscles and innards. A victim of rot grubs suffers wracking pain that ends only when a rot grub reaches and devours its victim's heart.

## Lore

**Dungeoneering DC 17:** A menace in underground regions for untold years, rot grubs are held in check by the same hunger that makes them a threat. The inhabitants of dungeons vigilantly guard against rot grub infestations, squashing them before they become a great threat. When an infestation rages out of control, the survivors flee elsewhere, while the grubs gorge themselves on those left behind. When food runs short, the grubs die out, and only a few hardy specimens survive to find a new hunting ground.

Rumors persist of vast Underdark caverns filled with undulating seas of rot grubs. Supposedly, the grubs in these living seas feed on the decaying flesh of a forgotten god.

## Encounters

Rot grubs are too indiscriminate in the carnage they spread to have allies, but other creatures sometimes make use of them. Kobolds brave and stupid enough to hunt these creatures sometimes keep them in small, ceramic containers that they hurl at intruders. Bugbears keep pits filled with rot grubs to dispose of corpses and make their traps more deadly.

## Rot Grub Swarm

When a rot grub swarm first enters an area, it brings down several victims and then retreats to the center of its prey's decaying corpses and begins to lay eggs. A single rot grub swarm can lay ten thousand eggs before it dies. Unless the body is burned, within a month it spawns a new swarm of ravenous rot grubs.

| **Rot Grub Swarm** | **Level 4 Brute** |
|---|---|
| Medium natural beast (swarm) | XP 175 |
| **HP** 63; **Bloodied** 31 | **Initiative** +3 |

| *Second Failed Saving Throw*: Ongoing 15 damage (save ends). | |
| **Str** 10 (+2) **Dex** 13 (+3) **Wis** 11 (+2) | |
| **Con** 13 (+3) **Int** 2 (-2) **Cha** 4 (-1) | |
| **Alignment** unaligned **Languages** – | |

### Rot Grub Swarms in Combat

A rot grub swarm surges toward the closest living creature. Relentless in its overpowering urge to eat, the swarm ignores environmental dangers such as fire or water. A victim covered by rot grubs suffers horrible pain. Humanoid monsters sometimes lure swarms into hotly contested dungeon corridors, relying on the victims' screams to serve as a crude alarm system.

JASON FELIX

# Rot Grub Zombie

Long after a victim has died from a rot grub infestation, the creatures continue to eat away at the rotting flesh. From time to time, the corpse reanimates into a dark parody of life, creating a zombie that acts as a carrier for a swarm of rot grubs.

| **Rot Grub Zombie** | **Level 8 Skirmisher** |
|---|---|
| Medium natural humanoid (undead) | XP 350 |
| **HP** 86; **Bloodied** 43 | **Initiative** +9 |
| **AC** 22, **Fortitude** 20, **Reflex** 19, **Will** 17 | **Perception** +2 |
| **Speed** 6 | |

| *Hit:* 2d6 + 9 damage. | |
| **Flailing Slam ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d6 + 9 damage. | |
| *Effect:* Before or after the attack, the zombie shifts 1 square. | |
| **Rot Grub Hunger** (disease, necrotic) **✦ Recharge** ⚄ ⁞⁞ | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d6 + 9 damage plus 2d6 necrotic damage. | |
| *Effect:* If the target is bloodied, it is exposed to rot grub infestation (see page xx). | |
| **Triggered Actions** | |
| **Corpse Collapse** | |
| *Trigger:* The zombie drops to 0 hit points. | |
| *Effect (No Action):* A rot grub swarm appears in an unoccupied square adjacent to the zombie. | |
| **Str** 20 (+9) **Dex** 16 (+7) **Wis** 6 (+2) | |
| **Con** 14 (+6) **Int** 4 (+1) **Cha** 13 (+5) | |
| **Alignment** unaligned **Languages** – | |

## Rot Grub Zombies in Combat

A rot grub zombie is unusually spry for its undead state because the body reanimates quickly after death by rot grubs. Scholars debate whether a rot grub swarm exerts control over a zombie. They cite evidence that a rot grub zombie seeks out those who have sustained injuries and are more susceptible to infestation.

# Awakened Rot Grub Swarm

Tales persist of strange, roiling masses of rot grubs that have acquired an extraordinary sentience. Some believe that these rot grubs devoured a psionic creature. Others speculate that these swarms are the result of duergar efforts to turn rot grubs into beasts of war.

| **Awakened Rot Grub Swarm** | **Level 10 Brute** |
|---|---|
| Medium natural beast (swarm) | XP 500 |
| **HP** 123; **Bloodied** 61 | **Initiative** +6 |

| **Con** 13 (+6) **Int** 8 (+4) **Cha** 4 (+2) | |
| **Alignment** evil **Languages** Deep Speech, telepathy 10 | |

## Awakened Rot Grub Swarms in Combat

The motion of an awakened swarm has a strange symmetry, as if each grub were moving in perfect formation with the rest. The swarm's telepathy manifests as a constant chatter of moans and simple phrases in Deep Speech, such as "All must join, all must find sanctuary," and "Without us, within them, reap their flesh." The psyches of those devoured by a swarm sometimes crop up among these thoughts as well.

**Rot Grub Infestation** Level 4 Disease **Endurance** improve DC 18, maintain DC 12, worsen DC 11 or lower

The target is cured.

◀ **Initial Effect:** The target loses a healing surge and gains vulnerable 5 necrotic.

◀▶ The target loses two healing surges, which cannot be regained until he or she is cured. The target also takes a -4 penalty to skill checks until he or she is cured.

▶ **Final State:** The target dies and immediately becomes a rot grub zombie.

# SCARECROW

A visitor to the Feywild might see a line of scarecrows and assume that a farmer or a hunter set them up to mark the edge of his or her territory. When a human or a dragonborn might blunder on ahead, heedless of the danger, an eladrin, gnome, or other native of the Feywild retreats in fear. Although people in the world place scarecrows to scare off birds, in the Feywild they serve as a dire warning of the consequences of trespass. Unlike the mundane scarecrows of the world, a scarecrow in the Feywild can clamber down from its perch to rip the entrails from anyone foolish enough to ignore it.

Hags constructed the first animated scarecrows by weaving them from straw stolen from a farmer at the stroke of midnight, clothes taken from a freshly slain corpse, and thread made from the hair of a nightmare's mane. Years have passed since the creation of these creatures, and now animated scarecrows are common in the world as well as the Feywild.

## Lore

**Arcana DC 22:** Although scarecrows are constructs, they are smarter and wilier than golems, homunculi, and other creatures created from inanimate materials. This cunning is further enhanced by the bond between the scarecrow and its creator.

When a scarecrow spots enemies, its creator instantaneously becomes aware of that fact. When a scarecrow hits a creature with an attack, its creator receives a clear mental image of the foe's appearance and location. The creator sees the target as the scarecrow sees it, though it still cannot distinguish invisible or hidden creatures.

The connection between creator and scarecrow makes these creatures ideal sentinels. Powerful hags and ritualists post them as sentinels at the edge of their domains, and they mix them in with mundane scarecrows.

## Encounters

Eladrin, gnomes, fomorians, hags, and ritual casters employ scarecrows as guardians and sentinels. Within isolated ruins, deep Feywild woods, the Underdark, and the forests of the world, large numbers of scarecrows hold an endless vigil. When the master of a scarecrow dies, the construct remains fully functional and continues to carry out its creator's last commands.

ADAM GILLESPIE

## Scarecrow Shambler

Normally the process of crafting a scarecrow requires months of careful, precise work. Each stitch, each handful of straw, and each scrap of cloth must be positioned, trimmed, and assembled to serve as a proper vessel for the magic that animates a scarecrow. However, a skilled ritual caster might instead create dozens of crude but effective scarecrows. The magic that animates a scarecrow shambler barely holds it together, yet its shoddy construction belies the ferocity and strength of its attacks.

| **Scarecrow Shambler** | **Level 10 Minion Brute** |
|---|---|
| Medium fey animate (construct) | XP 125 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +7 |
| **AC** 22, **Fortitude** 22, **Reflex** 21, **Will** 21 | **Perception** +7 |
| **Speed** 6 | Low-light vision |
| **Immune** disease, poison, sleep | |
| **Standard Actions** | |
| ⊕ **Claws** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 11 damage. | |
| **Triggered Actions** | |
| **Toxic Straw** (poison, zone) | |
| *Trigger:* The shambler drops to 0 hit points. | |
| *Effect (No Action):* The shambler's death creates a zone in a close burst 1 that lasts until the end of the encounter. The zone is lightly obscured, and any creature that ends its turn within the zone takes 10 poison damage. | |
| **Str** 18 (+9) **Dex** 14 (+7) **Wis** 15 (+7) | |
| **Con** 15 (+7) **Int** 11 (+5) **Cha** 10 (+5) | |
| **Alignment** unaligned **Languages** Common | |

### Scarecrow Shamblers in Combat

When shamblers fall like wheat before the scythe in battle, their destruction creates swirling clouds of straw, rags, and other debris. The straw within a shambler contains a poisonous mold that leaves creatures reeling.

## Scarecrow Guardian

A guardian resembles a normal scarecrow, except for the tough, burlap sack that covers its head. Two holes in this sack reveal a pair of glowing, red eyes that burn with simmering hatred. Hags hang scarecrow guardians on high trees, posts, and ruins near their lairs. From such a vantage point, a scarecrow guardian watches over the hag's domain. When it spots intruders, it tears itself from its perch to launch an attack.

| **Scarecrow Guardian** | **Level 13 Soldier** |
|---|---|
| Medium fey animate (construct) | XP 800 |
| **HP** 107; **Bloodied** 53 | **Initiative** +10 |
| **AC** 29, **Fortitude** 25, **Reflex** 23, **Will** 24 | **Perception** +14 |
| **Speed** 6 | Low-light vision |
| **Immune** disease, poison, sleep; **Vulnerable** 10 fire | |
| **Standard Actions** | |
| **Claws ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d6 + 9 damage, and the target is marked until the end of the guardian's next turn. | |
| **Luring Gaze** (charm, psychic) **✦ At-Will** | |
| *Attack:* Ranged 10 (one creature); +16 vs. Will | |
| *Hit:* 1d6 + 5 psychic damage, and the guardian pulls the target 5 squares. | |
| **Minor Actions** | |
| **Horrid Gaze** (fear) **✦ Encounter** | |
| *Attack:* Close blast 3 (enemies in blast); +18 vs. Will | |
| *Hit:* The target is immobilized until the end of the guardian's next turn. | |
| **Triggered Actions** | |
| **Malleable Straw ✦ At-Will** | |
| *Trigger:* An attack damages the guardian. | |
| *Effect (Immediate Interrupt):* The guardian takes half damage from the triggering attack. | |
| **Skills** Acrobatics +13 | |
| **Str** 18 (+10) **Dex** 14 (+8) **Wis** 17 (+9) | |
| **Con** 15 (+8) **Int** 11 (+6) **Cha** 10 (+6) | |
| **Alignment** unaligned **Languages** Common | |

### Scarecrow Guardians in Combat

Scarecrow guardians seek to divide their enemies so that each creature can occupy one foe in battle. The straw and other innards stuffed into a guardian move within it to turn a grievous blow into a glancing hit.

## Scarecrow Haunter

Scarecrow haunters are crafted using the same process as for other scarecrows, except for one critical difference: A haunter's creator sews the heart of a humanoid that died at the hands of a scarecrow into the creature's interior. The fear that the victim felt in those last few seconds pours forth from the scarecrow in waves, instilling terror into the haunter's victims.

| **Scarecrow Haunter** | **Level 13 Lurker** |
|---|---|
| Medium fey animate (construct) | XP 800 |
| **HP** 99; **Bloodied** 49 | **Initiative** +14 |
| **AC** 27, **Fortitude** 24, **Reflex** 26, **Will** 25 | **Perception** +9 |
| **Speed** 6 | Low-light vision |
| **Immune** disease, poison, sleep; **Vulnerable** 10 fire | |
| **Traits** | |
| **Lurking Horror** | |
| When the haunter hits a creature that cannot see it, the attack deals 5 extra damage and increases any of the attack's forced movement by 2 squares. | |
| **Standard Actions** | |
| **Claws ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 2d6 + 9 damage. | |
| **Haunting Echoes** (charm, fear, psychic) **✦ At-Will** | |
| *Attack:* Area burst 2 within 10 (enemies in burst); +18 vs. Will | |
| *Hit:* The haunter slides the target 2 squares. The target then makes a melee or a ranged basic attack against a creature of the haunter's choice. | |
| **Fluttering Straw** (polymorph) **✦ At-Will** | |
| *Effect:* The haunter shifts 6 squares and then is invisible and insubstantial until the end of its next turn. | |
| **Minor Actions** | |
| **Terrifying Gaze** (fear, psychic) **✦ Recharge** ⚄ ⚅ | |
| *Attack:* Close blast 3 (enemies in blast); +16 vs. Will | |
| *Hit:* 1d6 + 5 psychic damage, and the haunter pushes the target 2 squares. | |
| **Skills** Stealth +15 | |
| **Str** 14 (+8) **Dex** 18 (+10) **Wis** 17 (+9) | |
| **Con** 15 (+8) **Int** 11 (+6) **Cha** 10 (+6) | |
| **Alignment** unaligned **Languages** Common | |

### Scarecrow Haunters in Combat

A haunter lives up to its name, wielding powerful fey magic that creates disturbing moans, flashes of horrid, ghostly figures, and other unnerving distractions that erode its enemies' sanity. During combat, a scarecrow haunter can focus its energy and explode into a cloud of rotting hay and tattered rags that can later re-form beyond the reach of enemies. The haunter uses this ability defensively and also as a tactic for surprising foes. While in this unseen form, the creature evokes visions and noises that send enemies running.

# SECRET OF VECNA

A secret of Vecna is the shell of a petitioner who has angered Vecna by sharing secrets or otherwise failing the god. In its normal form, it appears as a bald human with plain features. A secret of Vecna wears simple robes and carries a dagger or a staff. Once bloodied, it undergoes a horrific transformation. The creature's skin sloughs away, and it sprouts long claws, which it uses to rip away its face and reveal a fanged, twisted visage.

## Lore

**Arcana DC 23:** Each secret of Vecna was once a follower who possessed knowledge that Vecna valued. The Maimed God punished that follower when he or she betrayed him by sharing that knowledge. Powerful spellcasters and clerics seek to capture secrets of Vecna to try to reconstruct their shattered minds and learn Vecna's secrets. The creatures possess a maddening intellect, though, and no one has yet succeeded in restoring their sanity. A ritual to mend a secret of Vecna is rumored to exist, but it is supposedly guarded by Vecna's most devoted followers.

## Encounters

A secret of Vecna guards locations important to Vecna and aids the god's followers in their clandestine endeavors. Few in the lower ranks of Vecna's cult trust a secret of Vecna to do anything other than look after Vecna's long-term interests. This mistrust is earned, because a secret of Vecna lacks any will of its own. As an empty husk, it goes where its god and his high-ranking priests command, and it never reveals more than Vecna allows.

## Enigma of Vecna

The typical enigma of Vecna was once a spellcaster who sought to unlock the Maimed God's secrets. The spellcaster grew too greedy and offered to sell or share what he or she had learned. As a result, the spellcaster paid the price for betraying his or her god.

### Enigmas of Vecna in Combat

In its humanoid form, an enigma of Vecna delights in suppressing knowledge, especially in those it faces in combat. The enigma's power to blast away memory gives it an advantage in combat. Anyone affected by an enigma's mental assault describes the feeling as an agonizing severing, as if something were painfully torn from one's mind. When the memories slam back into place, the shock leaves a victim reeling.

Enigmas of Vecna keep away from the fray, using ranged attacks to wear down foes. When a bloodied enigma transforms, the horror of witnessing the gruesome change causes its enemies to recoil. The enigma uses this opportunity to leap forward and tear into its foes' flesh.

**Enigma of Vecna** — **Level 6 Controller**
Medium natural humanoid — XP 250

## Spell Howler of Vecna

A spell howler is an accomplished arcane spellcaster who failed Vecna. Perhaps the spellcaster failed to discover a secret and then give it to Vecna, or maybe he or she foolishly peered into a tome forbidden to one of his or her rank. Whatever the case, the spellcaster suffered punishment for the transgression and became a spell howler. A spell howler is a mindless, gibbering husk that continually whispers broken fragments of Vecna's secrets. In combat, this speech reaches a fevered pitch as the spell howler unleashes blasts of arcane energy.

### Spell Howlers of Vecna in Combat

In battle, a spell howler screams and shrieks as if wracked with pain. It focuses its attacks on enemy spellcasters, particularly wizards and warlocks, because it covets the power it once wielded.

| **Spell Howler of Vecna** | **Level 18 Artillery** |
|---|---|
| Medium natural humanoid | XP 2,000 |
| **HP** 130; **Bloodied** 65 | **Initiative** +10 |
| **AC** 30, **Fortitude** 28, **Reflex** 30, **Will** 30 | **Perception** +11 |
| **Speed** 6 | |

**Standard Actions**

**Maddening Touch** (psychic) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +21 vs. Will
*Hit:* 2d8 + 12 psychic damage.

**Word of Force** (force) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +23 vs. Fortitude
*Hit:* 2d10 + 15 force damage.

**Word of Doom** (psychic) ✦ **At-Will**
*Requirement:* The spell howler must be affected by *horrific visage.*
*Attack:* Ranged 10 (one creature); +23 vs. Will
*Hit:* 2d8 + 6 psychic damage, and the target is dazed until the end of the spell howler's next turn.

**Word of Madness** (psychic) ✦ **Recharge** if the power misses
*Attack:* Melee 1 (one creature); +21 vs. Will
*Hit:* 2d8 + 5 psychic damage. The spell howler slides the target 3 squares, and the target makes a basic attack as a free action against a creature of the spell howler's choice.

**Word of Pain** (necrotic) ✦ **Encounter**
*Attack:* Ranged 10 (one creature); +23 vs. Fortitude
*Hit:* 4d10 + 10 necrotic damage.
*Miss:* Half damage.

**Triggered Actions**

**Horrific Visage** (psychic) ✦ **Encounter**
*Trigger:* The spell howler is first bloodied.
*Attack (No Action):* Close burst 2 (enemies in burst); +22 vs. Will
*Hit:* 2d6 + 4 psychic damage, and the spell howler pushes the target 3 squares.
*Effect:* Until the end of the encounter, the spell howler cannot use any power except *word of doom* and *maddening touch*.

**Alignment** chaotic evil **Languages** Common

# Secret of Vecna

A secret of Vecna is a priest of the god of secrets who allowed a piece of hidden doctrine to fall into a non-believer's hands. Vecna personally attends to such failures, blasting his erstwhile follower's mind into mush and transforming the person into a monster of lightning and thunder.

| **Secret of Vecna** | **Level 19 Skirmisher** |
|---|---|
| Medium natural humanoid | XP 2,400 |
| **HP** 176; **Bloodied** 88 | **Initiative** +18 |
| **AC** 33, **Fortitude** 31, **Reflex** 31, **Will** 31 | **Perception** +11 |
| **Speed** 8, teleport 4 | |

**Standard Actions**

**Shocking Grasp** (lightning) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +24 vs. AC
*Hit:* 2d10 + 16 lightning damage, plus 10 extra lightning damage if the secret is invisible to the target.

**Thundering Claws** (thunder) ✦ **At-Will**
*Requirement:* The secret must be affected by *horrific visage.*
*Attack:* Melee 1 (one creature); +24 vs. AC
*Hit:* 3d10 + 17 thunder damage. The secret slides the target 1 square and knocks it prone.

**Cloak of Ignorance** (charm, psychic) ✦ **At-Will**
*Attack:* Close burst 3 (enemies in burst); +22 vs. Will
*Hit:* 3d6 + 6 psychic damage, and the secret is invisible to the target (save ends).

**Triggered Actions**

**Horrific Visage** (psychic) ✦ **Encounter**
*Trigger:* The secret is first bloodied.
*Attack (No Action):* Close burst 2 (enemies in burst); +22 vs. Will
*Hit:* 2d6 + 4 psychic damage, and the secret pushes the target 3 squares.
*Effect:* Until the end of the encounter, the secret cannot use any power except *thundering claws.*

| | | |
|---|---|---|

| **Con** 16 (+12) | **Int** 13 (+10) | **Cha** 18 (+13) |

**Alignment** chaotic evil **Languages** Common

## Secrets of Vecna in Combat

A secret of Vecna slips through folds in space, leaving a rumble of thunder and the scent of ozone in its wake. Its hands crackle with lightning as it slips unseen through enemy ranks. In keeping with Vecna's desire to punish transgressors, a secret has an irresistible urge to rush foes and claw at them.

DAVE ALLSOP

Lurking in the Shadowfell are many strange and dark monsters. Foremost among these threats are shadows, flickering motes of darkness that subsist on the shadows cast by living creatures. Thought by many to be undead, shadows are in fact creatures that stand on the thin line between life and death. In a shadow's eyes, the world is a web of darkness pierced by annihilating light. The creature views the shadow cast by a living creature as a captive that it must devour in order to liberate it.

## Lore

**Arcana DC 18:** Many folk mistake shadows for undead creatures, but they are instead creatures native to the Shadowfell. They venture into the world to devour and manipulate the stuff of shadows. Some wish to feed off it, while others seek to collect its power to wield for their own sinister purposes.

Shadows hate bright light, and radiant energy is lethal to them. They have no particular weakness to daylight other than the light's ability to reveal their presence. The creatures' reliance on stealth and darkness keeps them confined to dungeons and other dark places.

The number of shadows in the world is increasing each year, as if a powerful force is driving them. Expeditions to the Shadowfell have yet to uncover a power behind them, so perhaps the shadows' increased presence is only a product of their propagation.

## Encounters

Shadows ally with any creature that offers them the chance to slay living foes. Evil wizards, devotees of dark gods, and humanoid tribes work with shadows, though they view the creatures as unreliable. Shadows have consistently shown that alliances and gods hold little sway over them. A shadow fights alongside a mortal because the relationship is convenient, not because the creature shares a sense of service or duty.

Although few mortals traffic in shadow magic, those who do follow that perilous practice gain the ability to command shadows. Shadows are eager to serve such mortals, as if the shadows know a horrid secret that their mortal master cannot yet comprehend.

## Shadow Stalker

A shadow stalker walks between darkness and light. It flits from shadow to shadow, taking care to avoid the horrid pain of illumination. The creature preys on the shadows of living creatures, devouring them for sustenance. However, it cannot feast upon a shadow while the shadow's owner lives.

**Shadow Stalker** **Level 3 Lurker**
Medium shadow humanoid XP 150

**HP** 25; **Bloodied** 12 **Initiative** +9
**AC** 15, **Fortitude** 14, **Reflex** 16, **Will** 14 **Perception** +3
**Speed** 8 Darkvision
**Resist** insubstantial; **Vulnerable** 5 radiant

**Traits**

**Born of Shadows**
The stalker can make a Stealth check to become hidden when it has concealment instead of needing total concealment.

**Standard Actions**

⨁ **Shadowy Touch** (necrotic) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +6 vs. Reflex
*Hit:* 1d8 + 6 necrotic damage.

⨁ **Shadow Stalk** (necrotic) ✦ **Recharge** when the stalker uses *shadow step*
*Attack:* Melee 1 (one creature); +8 vs. Reflex
*Hit:* 1d6 + 8 necrotic damage, and the stalker shifts into the target's space and melds with its shadow (save ends). While the stalker is melded with the target's shadow, it moves when the target moves without provoking opportunity attacks, and it gains a +4 bonus to all defenses and a +5 bonus to attack rolls against the target. When the target saves, the stalker shifts to a square adjacent to the target.

**Triggered Actions**

**Shadow Step** (teleportation) ✦ **At-Will**
*Trigger:* A living creature within 5 squares of the stalker drops to 0 hit points or fewer.
*Effect (Free Action):* The stalker teleports to a square adjacent to the triggering creature and gains a +2 bonus to attack rolls until the end of its next turn.

**Skills** Stealth +10

| | | |
|---|---|---|
| **Str** 12 (+2) | **Dex** 19 (+5) | **Wis** 14 (+3) |
| **Con** 13 (+2) | **Int** 12 (+2) | **Cha** 11 (+1) |

**Alignment** evil **Languages** Common

### Shadow Stalkers in Combat

While hunting for prey in the world, a shadow stalker lurks in places where mortals commonly battle. It skulks in the darkness, waiting for living creatures to die so that it can devour their shadows. A creature, whether dead or on the brink of death, turns an unhealthy, pale gray when its shadow is devoured. Only by killing the creature that devoured his or her shadow can the victim regain it.

## Shadow Strangler

Like a spellcaster among its kind, a shadow strangler uses the magic of the Shadowfell to control and manipulate darkness. A strangler uses the shadows it devours as fuel for its magic, so it must feed frequently.

**Shadow Strangler** **Level 9 Artillery**
Medium shadow humanoid XP 400

**HP** 53; **Bloodied** 26 **Initiative** +8
**AC** 23, **Fortitude** 18, **Reflex** 21, **Will** 22 **Perception** +6
**Speed** 8 Darkvision
**Resist** insubstantial; **Vulnerable** 5 radiant

**Traits**

**Born of Shadows**
The strangler can make a Stealth check to become hidden when it has concealment instead of needing total concealment.

BEN WOOTTEN

| Standard Actions |
|---|
| ⊕ **Shadowy Touch** (necrotic) ✦ **At-Will** |
| *Attack:* Melee 1 (one creature); +12 vs. Reflex |
| *Hit:* 2d6 + 5 necrotic damage, and the strangler becomes invisible to the target until the end of the strangler's next turn. |
| **Blinding Shadows** (necrotic) ✦ **At-Will** |
| *Attack:* Ranged 10 (one creature); +14 vs. Reflex |
| *Hit:* 2d6 + 5 necrotic damage, and the target cannot see anything more than 3 squares away from it until the end of the strangler's next turn. |
| **Strangling Darkness** (necrotic) ✦ **Recharge** ⚄ ⚅ |
| *Attack:* Ranged 10 (one creature); +14 vs. Fortitude |
| *Hit:* The target is restrained and takes ongoing 15 necrotic damage (save ends both). |
| **Devouring Dark** (necrotic) ✦ **Encounter** |
| *Attack:* Area burst 2 within 10 (enemies in burst); +14 vs. Reflex |
| *Hit:* 1d10 + 7 necrotic damage, and the target is blinded until the end of the strangler's next turn. |
| *Miss:* Half damage. |
| **Skills** Arcana +10, Stealth +13 |
| **Str** 12 (+5) **Dex** 19 (+8) **Wis** 14 (+6) |
| **Con** 17 (+7) **Int** 12 (+5) **Cha** 19 (+8) |
| **Alignment** evil **Languages** Common |

## Shadow Stranglers in Combat

At a shadow strangler's command, the stuff of raw darkness reaches out to attack and claw at its enemies. Tendrils of shadow wrap around a creature's face and legs, blinding the prey while holding it in place. Victims of these attacks hear the shadow's strange whispers, which tell them that they must die to allow their shadows, their "true forms," to escape.

# Shadow Puppeteer

Although other shadows devour the umbra cast by living creatures, a shadow puppeteer seeks subtler delights. It absorbs the fleeting and almost imperceptible shadows cast by souls as they depart for the afterlife.

| **Shadow Puppeteer** | **Level 14 Lurker** |
|---|---|
| Medium shadow humanoid | XP 1,000 |
| **HP** 74; **Bloodied** 37 | **Initiative** +17 |
| **AC** 24, **Fortitude** 25, **Reflex** 26, **Will** 26 | **Perception** +9 |
| **Speed** 8 | Darkvision |
| **Resist** insubstantial; **Vulnerable** 5 radiant | |
| **Traits** | |
| **Born of Shadows** | |
| The puppeteer can make a Stealth check to become hidden when it has concealment instead of needing total concealment. | |
| **Standard Actions** | |
| ⊕ **Shadow Touch** (necrotic, zone) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. Reflex | |
| *Hit:* 3d6 + 12 necrotic damage, or 3d6 + 17 necrotic damage against a target that cannot see the puppeteer. | |
| *Effect:* The puppeteer creates a zone in the target's space and each square adjacent to it. The zone is lightly obscured, and it lasts until the end of the puppeteer's next turn. | |
| **Shadow Puppet** (charm, necrotic) ✦ **Recharge** when the shadow hits a creature that cannot see it | |
| *Attack:* Melee 1 (one creature); +17 vs. Will | |
| *Hit:* 2d6 + 5 necrotic damage, or 2d6 + 10 necrotic damage against a target that cannot see the puppeteer. The target is dominated until it starts its turn not adjacent to the shadow. | |
| **Skills** Stealth +18 | |
| **Str** 12 (+8) **Dex** 22 (+13) **Wis** 14 (+9) | |
| **Con** 17 (+10) **Int** 12 (+8) **Cha** 19 (+11) | |
| **Alignment** evil **Languages** Common | |

## Shadow Puppeteers in Combat

A shadow puppeteer rarely leaps into the front of any battle. Instead, it lingers at the edge of combat and hides from one enemy's vision. Then it darts through the battlefield and delivers a strike to seize control of that creature's shadow. The creature forces its new puppet to charge across the battlefield as the shadow and its allies attack the creature while its guard is down. The puppeteer sticks close to its puppet. When the domination ends, the shadow attempts to retreat back to the darkness until it can find another opportunity to turn an enemy into its puppet.

# SHARDMIND

In the days of the war between gods and primordials, the Living Gate stood as a sentinel against the horrid Far Realm. Under the Gate's watchful eye, the Far Realm's power remained in check. In time, mind flayers, beholders, and other aberrant monstrosities sundered the Gate and surged forth to conquer, kill, and enslave.

The Living Gate was not defeated so easily. Though its shattered pieces were spread across the cosmos, its will lived on. From its wreckage arose shardminds, psionic creatures whose bodies were composed of crystal. Driven by a racial memory as old as the cosmos, the shardminds seek to rebuild the Living Gate and end the Far Realm's foul influence.

Some shardminds follow the philosophy of the Shard Slayer. They believe that killing shardminds helps restore the Living Gate. They also see other humanoids as disposable resources useful for eliminating and outmaneuvering their rivals.

## Lore

**Arcana DC 19:** If shardminds can be said to have a common weakness, it is their inability to understand charity and sacrifice. This weakness gives rise to the Shard Slayer philosophy. This belief system is the one with which most common folk are familiar, because it is the most visible of the three shardmind philosophies. Shardminds of this philosophy scour the planes in search of others of their kind to recruit or slay, all in a deluded mission to restore the Living Gate. In addition, they hunt for psionic artifacts and pieces of the Living Gate.

## Encounters

Shardminds prefer to work with creatures they can outwit. Ogres, trolls, and orcs are just a few of the brutes that shardminds consider easy to control.

## Shardmind Warseeker

A warseeker wanders from town to town, never lifting the visor on its plate armor. It asks people if they have seen creatures of living crystal or have heard tales of "wizards" who work magic through the power of their

| **Shardmind Warseeker** | **Level 6 Soldier** |
|---|---|
| Medium immortal humanoid (living construct) | XP 250 |

| **Alignment** evil **Languages** Common, Deep Speech, telepathy 5 | |
| **Equipment** plate armor, broadsword, heavy crossbow, 20 bolts | |

VINCENT DUTRAIT

mind. Its impassive tone matches the dull, iron visage of its faceplate.

When a warseeker hears such stories, it becomes agitated and demands more information. If the tale-teller cannot offer a satisfactory answer, it draws its sword, shrieks in rage, and hacks the person to death. Its fury sated, the warseeker disposes of the body and continues its search.

### Shardmind Warseekers in Combat

Early in a fight, a warseeker is an impassive, calculating tactician. As the battle progresses and it sustains injuries, it becomes increasingly enraged and frustrated. Eventually, its impassive facade collapses and a berserker's fury overcomes it.

## Shardmind Dominator

A shardmind dominator perceives the ebb and flow of psychic energy through a creature's mind. To a dominator, seizing control of another creature is as simple and morally acceptable as picking up a rock and throwing it into a pond.

| **Shardmind Dominator** | **Level 8 Controller** |
|---|---|
| Medium immortal humanoid (living construct) | XP 350 |
| **HP** 86; **Bloodied** 43 | **Initiative** +4 |
| **AC** 22, **Fortitude** 17, **Reflex** 19, **Will** 21 | **Perception** +13 |
| **Speed** 6 | |
| **Resist** 5 psychic | |
| **Standard Actions** | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 3d4 + 9 damage. | |
| **Overwhelming Mind** (charm) ✦ **At-Will** | |
| *Effect:* One creature within 5 squares of the dominator makes a melee or a ranged basic attack as a free action against a target of the dominator's choice. If the attack hits, the dominator slides the attacking creature 3 squares. | |
| **Psionic Puppet** (charm) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Ranged 10 (one creature); +11 vs. Will | |
| *Hit:* The target is dominated (save ends). | |
| **Mind Swarm** (psychic, zone) ✦ **Encounter** | |
| *Attack:* Area burst 1 within 5 (enemies in burst); +11 vs. Will | |
| *Hit:* 2d10 + 7 psychic damage. | |
| *Effect:* The burst creates a zone that lasts until the end of the encounter. When any enemy ends its turn within the zone, the dominator can slide it 3 squares as a free action. | |
| **Move Actions** | |
| **Shardswarm** (teleportation) ✦ **Encounter** | |
| *Effect:* Each enemy adjacent to the dominator grants combat advantage until the end of the dominator's next turn. The dominator then teleports 3 squares. | |
| **Skills** Arcana +12, Bluff +10 | |
| **Str** 11 (+4) **Dex** 10 (+4) **Wis** 18 (+8) | |
| **Con** 14 (+6) **Int** 17 (+7) **Cha** 13 (+5) | |
| **Alignment** evil **Languages** Common, Deep Speech, telepathy 5 | |
| **Equipment** dagger, orb | |

### Shardmind Dominators in Combat

A dominator believes that its victory in a fight is inevitable. The creature laughs haughtily as its attacks render enemies helpless and force them to smash allies.

## Shardmind Executioner

A shardmind executioner is a skilled killer dispatched to eliminate rival shardminds before they pose a threat. Shardmind executioners rarely mix with other humanoids unless they are on a mission. They rarely speak aloud, preferring telepathy.

| **Shardmind Executioner** | **Level 10 Lurker** |
|---|---|
| Medium immortal humanoid (living construct) | XP 500 |
| **HP** 81; **Bloodied** 40 | **Initiative** +11 |
| **AC** 22, **Fortitude** 18, **Reflex** 20, **Will** 21 | **Perception** +14 |
| **Speed** 6 | |
| **Resist** 5 psychic | |
| **Standard Actions** | |
| **Shardblade** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +15 vs. AC | |
| *Hit:* 2d10 + 7 damage. | |
| **Mind Shadows** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +13 vs. Will | |
| *Hit:* 1d8 + 4 psychic damage, and the target is blinded until the end of the executioner's next turn. | |
| **Psychic Infiltration** (psychic, weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature that cannot see the executioner); +13 vs. Will | |
| *Hit:* The target takes ongoing 20 psychic damage and is dazed (save ends both). Until the target saves against this effect or drops to 0 hit points or fewer, the executioner is removed from play. When this effect ends, the executioner appears in an unoccupied square of its choice adjacent to the target. | |
| **Move Actions** | |
| **Shardswarm** (teleportation) ✦ **Encounter** | |
| *Effect:* Each enemy adjacent to the executioner grants combat advantage until the end of the executioner's next turn. The executioner then teleports 3 squares. | |
| **Triggered Actions** | |
| **Psionic Boost** (psychic) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Trigger:* The executioner hits with *shardblade* or *mind shadows*. | |
| *Effect (Free Action):* The attack deals 2d6 extra psychic damage. | |
| **Skills** Athletics +11, Bluff +11, Stealth +12 | |
| **Str** 12 (+6) **Dex** 15 (+7) **Wis** 19 (+9) | |
| **Con** 15 (+7) **Int** 20 (+10) **Cha** 12 (+6) | |
| **Alignment** evil **Languages** Common, Deep Speech, telepathy 5 | |
| **Equipment** greatsword | |

### Shardmind Executioners in Combat

A shardmind executioner relentlessly pursues its chosen foe. It assaults its quarry's mind, sending the enemy to a strange dreamscape of endless corridors and shadowy chambers. In this maze of the mind, the executioner remains on its prey's heels, fostering feelings of helplessness and terror in its victim.

# Skulk

The skulks come at night, prowling the streets and seeking victims, from the richest merchant to the poorest laborer. Long ago, they were a caste of slaves who toiled for the empire of Bael Turath. When the empire forged a pact with devilkind, it left the skulks out of the agreement. The slaves responded with a night of rage that left cities in flames and nobles, merchant princes, and other slave masters dead, their throats slashed while they slept. The demon lord Graz'zt, delighted by the slaves' treachery, granted those who survived that night the gift of supernatural stealth. To this day, the skulks forsake the trappings of civilization that once kept them in chains. Like predators in the wild, they slink through alleys and streets, stalking their prey until they close in for the kill.

## Lore

**History DC 16:** As Bael Turath crumbled, the skulks danced in their former masters' ruins, yet even the empire's destruction was not enough. The surviving tieflings spread far and wide, and the skulks followed them. Here and there, new tiefling realms took root, but invariably assassinations and murders shattered these nascent societies. When a tiefling champion emerged to reestablish a realm for his or her people, that individual invariably met an untimely and inglorious death in a bed chamber or a back alley. Even today, renowned tieflings, from heroic paladins to devious rogues, disappear more often than other adventurers in the rougher quarters of towns and cities.

In combat, skulks target tieflings in preference over other humanoids. All other things being equal, a skulk would rather sink its blade into the descendants of those who once enslaved and mistreated its ancestors.

## Encounters

The skulks' debt to Graz'zt is encoded in the *Tome of the Blinded Eye*, a manual that established the compact between the demon lord and the skulks. Followers of the Dark Prince demand and receive absolute obedience from skulks. They dispatch skulks to slay and terrorize enemies of Graz'zt. The mysterious death of the demon Kurland, an enemy of Graz'zt that was found decapitated in his palace of molten iron, points to a terrifying prospect: mighty skulk assassins personally serving the Dark Prince.

## Skulk Mesmerist

A group of drunken bravos cheers as one of its number stumbles down an alley to the waiting arms of a beautiful maiden. As the pair disappears into a nearby doorway, the revelers continue on their way. After a guard finds their friend's mutilated corpse the next day, the poor serving wench that a skulk mesmerist mimicked becomes the skulk's second victim as a vengeful mob turns on her.

| **Skulk Mesmerist** | **Level 3 Controller** |
|---|---|
| Medium natural humanoid | XP 150 |
| **HP** 45; **Bloodied** 22 | **Initiative** +4 |
| **AC** 16, **Fortitude** 14, **Reflex** 15, **Will** 16 | **Perception** +3 |
| **Speed** 6 | Low-light vision |
| **Traits** | |

### Skulk Mesmerists in Combat

A skulk mesmerist relies on other skulks, usually murderers, to trail a victim and pick out an appropriate disguise. The mesmerist then appears to its victim as a would-be lover, a hated rival, or a cherished friend, drawing it into an ambush. It particularly likes dilapidated buildings that have weak floors, holes, and other dangerous spots that can make a death seem an accident.

## Skulk Murderer

One murder rarely provokes fear, particularly in a rough town, but the second, third, and fourth cast a chill across the town. Citizens carry daggers with them and look upon strangers with a watchful eye. Nobles remain confined to their homes, leaving only with a couple of bodyguards in tow. Meanwhile, the skulk murderers slip unnoticed through town, seeking their next victim.

| **Skulk Murderer** | **Level 3 Lurker** |
|---|---|
| Medium natural humanoid | XP 150 |
| **HP** 37; **Bloodied** 18 | **Initiative** +8 |
| **AC** 17, **Fortitude** 14, **Reflex** 16, **Will** 15 | **Perception** +3 |
| **Speed** 6 | Low-light vision |

**Traits**

**Peerless Camouflage**
The murderer can make a Stealth check to become hidden when it has cover or concealment instead of needing superior cover or total concealment. The murderer remains hidden after moving if it has cover or concealment after it ends the move.

**Stealthy Step**
The murderer does not take a penalty to Stealth checks for moving more than 2 squares or for running.

**Unseen Strike**
The murderer deals 5 extra damage to any target that couldn't see it at the start of the skulk's turn.

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +8 vs. AC
*Hit:* 1d6 + 6 damage.

**Shuriken Volley** (weapon) ✦ **Encounter**
*Effect:* The murderer makes the following attack three times.
*Attack:* Ranged 6/12 (one creature); +8 vs. AC
*Hit:* 1d4 + 2 damage, and the target is immobilized (save ends).

TOMÁS GIORELLO

## Skulk Murderers in Combat

Only death can slake a skulk murderer's hatred of civilization. These fiends eagerly stop to deliver a coup de grace against a fallen foe. Sometimes, the town guard manages to capture or kill a skulk murderer only because the creature was too intent on hacking at a fallen victim.

# Skulk Hunter

The town guard faces pressure from nobles and merchants to step up its investigations into the mysterious murders that plague the town. When someone finds the guards' best investigators slashed to death in a back alley, even the bravest member of the guard feels the temptation to pin the murder on an unpopular foreigner.

| **Skulk Hunter** | **Level 5 Soldier** |
|---|---|
| Medium natural humanoid | XP 200 |
| **HP** 61; **Bloodied** 30 | **Initiative** +6 |
| **AC** 21, **Fortitude** 18, **Reflex** 16, **Will** 17 | **Perception** +9 |
| **Speed** 6 | Low-light vision |

**Traits**

**Stealthy Step**
The hunter does not take a penalty to Stealth checks for moving more than 2 squares or for running.

**Standard Actions**

**Baffling Blade** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +10 vs. AC
*Hit:* 1d8 + 6 damage, and the hunter remains hidden from the target if it was hidden from the target when it attacked.
*Effect:* The target is marked until the end of the hunter's next turn.

**Invisible Blade** (weapon) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Melee 1 (one creature that cannot see the hunter); +10 vs. AC
*Hit:* 2d8 + 6 damage, and ongoing 5 damage (save ends).
*Effect:* The target is marked until the end of the hunter's next turn.

**Triggered Actions**

**Watchful Hunter** ✦ **At-Will**
*Trigger:* An enemy marked by the hunter shifts.
*Effect (Opportunity Action):* The hunter can use *baffling blade* against the triggering enemy.

**Skills** Arcana +9, Bluff +12, Stealth +9

| | | |
|---|---|---|
| **Str** 12 (+3) | **Dex** 15 (+4) | **Wis** 14 (+4) |
| **Con** 13 (+3) | **Int** 12 (+3) | **Cha** 19 (+6) |

**Alignment** chaotic evil **Languages** Common
**Equipment** leather armor, longsword

## Skulk Hunters in Combat

Hunters circle their enemies like sharks, hiding from sight as they move ever closer. When they launch an ambush, they spread out, and each takes on a foe. Skulk hunters pride themselves on slaying the toughest foe, so they usually engage heavily armored fighters and paladins first. Each hunter carries bits of broken armor on its belt, tokens of its former victims.

# SLAAD

Untouched by the writhing tendrils of chaos storms, slaads ride these destructive phenomena and revel in their ruin and mayhem. Yet not all slaads escape the tempests untouched; a few undergo profound transformations by absorbing the storm's power. Some collapse into jellied pools, their forms reduced to iridescent slime. Others transform into creatures that embody chaos, changing constantly in hue.

## Lore

**Arcana or Religion DC 27:** A golden slaad is created when a chaos storm washes across a member of its chromatic kin. The creature's form is unstable, though. A golden slaad collapses into a viscous creature after physical wounds weaken its body.

Necromancers sometimes transform living slaads into undead slaads called putrid slaads. They preserve the slaads' essential chaotic nature, making these creatures deadly but difficult to control. The slaad retains its hunger for wanton destruction, consuming life around it, which is then putrefied and later regurgitated upon foes.

Mages and necromancers create most putrid slaads, but some come into being on their own. Slaads destroyed in the Abyss can rise spontaneously. Such putrid slaads are often forced to submit to the wills of demon lords.

## Encounters

Slaads gather around their golden kin in the same way that they dance merrily amid chaos storms. A golden slaad shows little interest in forming alliances with nonslaads, though it fights alongside demons and elementals if the mood strikes it.

Putrid slaads are servants and never masters. Necromancers, dark mages, and anyone else that traffics with the undead keep putrid slaads, but only powerful creatures have any hope of controlling one. Putrid slaads do not mingle with their living kin, with one exception: the void slaad.

## Golden Slaad

A chaos storm burns within the essence of a golden slaad, also known as a chaos slaad. Its gleaming body shines vibrantly as the slaad spreads destruction and

| **Golden Slaad** | **Level 20 Controller** |
|---|---|
| Huge elemental humanoid | XP 2,800 |
| **HP** 193; **Bloodied** 96 | **Initiative** +15 |
| **AC** 32, **Fortitude** 33, **Reflex** 30, **Will** 29 | **Perception** +12 |
| **Speed** 8, teleport 6 | Low-light vision |
| **Immune** chaos phage | |

**Standard Actions**

**Bite** ✦ **At-Will**
*Attack:* Melee 3 (one creature); +25 vs. AC
*Hit:* 2d10 + 13 damage. If the attack roll is odd, the slaad slides the target 3 squares. If the attack roll is even, the target is dazed until the end of the slaad's next turn.

**Chaos Croak** (disease, psychic) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Close burst 5 (enemies in burst); +23 vs. Will
*Hit:* 2d6 + 8 psychic damage. For each target, roll a d6 to determine an additional effect.
1. The target teleports 1d6 squares in a random direction (roll a d8 to determine the direction).
2. The target makes a melee basic attack as a free action against a random creature adjacent to it.
3. The target is stunned until the end of its next turn.
4. The target is slowed (save ends).
5. The target takes 10 damage of a random type. Roll a d10: (1) acid, (2) cold, (3) fire, (4) force, (5) lightning, (6) necrotic, (7) poison, (8) psychic, (9) radiant, (10) thunder.
6. The target is exposed to chaos phage (see page xx). In addition, if the target is dazed by the slaad's *bite*, it becomes dazed (save ends).

**Triggered Actions**

**Amniotic Transformation** (polymorph) ✦ **At-Will**
*Trigger:* The slaad is first bloodied.
*Effect (No Action):* The slaad collapses into a viscous heap until the end of the encounter. While in this form, the slaad cannot teleport and its speed drops to 4.

**Corrosive Pseudopodia** (acid, healing) ✦ **At-Will**
*Requirement:* The slaad must be affected by *amniotic transformation*.
*Trigger:* An enemy adjacent to the slaad moves or makes an attack.
*Attack (Opportunity Action):* Melee 1 (triggering enemy); +25 vs. AC
*Hit:* 1d6 + 8 acid damage, and the slaad grabs the target.
*Sustain Minor:* The slaad sustains all its grabs, and each creature grabbed by the slaad takes 2d6 + 8 acid damage. The slaad regains 5 hit points for each creature grabbed by it.

**Skills** Athletics +23, Intimidate +19

| Chaos Phage | Level 16 Disease | Endurance improve DC 25, maintain DC 20, worsen DC 19 or lower |
|---|---|---|

The target is cured. | **Initial Effect:** A slaad embryo is implanted in the target. | The target takes a –2 penalty to Will. While bloodied, the target succumbs to madness and attacks the nearest creature. | **Final State:** The target dies, and a slaad tadpole burrows out of its skull.

mayhem. The slaad's eldritch croaks add a dissonant quality to the crash of chaos storms, though even a golden slaad cannot abide a storm's touch for long. A chaos storm draws power and vigor from the slaad. If a slaad becomes too damaged, it loses the ability to hold its chaotic form together and transforms into an oozy mass.

### Golden Slaads in Combat

A golden slaad seeks to share the wonder of a chaos storm with its enemies. It teleports about the battlefield, sinking its fangs into foes to impart madness. Enemies who hear the baleful croak of a golden slaad find themselves experiencing bizarre and unexpected effects, as if they were within a chaos storm.

## Putrid Slaad

Elemental creatures are not immune to necromantic magic. Unlike other natives to the Elemental Chaos, slaads are formed from chaos, so when life flees one's corpse, decay consumes the remains in a matter of hours. Thus, to create a putrid slaad, a necromancer must capture a slaad and infuse it with shadow magic while it's still alive. The process is lethal, but the undead creature retains its shape and is as resilient as any other kind of slaad.

| **Putrid Slaad** | **Level 19 Brute** |
|---|---|
| Large elemental animate (undead) | XP 2,400 |
| **HP** 227; **Bloodied** 113 | **Initiative** +14 |

### Putrid Slaads in Combat

Faint, mewling croaks emanate from a putrid slaad. It waddles into battle, its claws pulling enemies close. When it catches a victim, it leans close, opens its cavernous maw, and spews a blend of rot and digestive juices onto its enemy.

# SPAWN OF KYUSS

LIKE A CANCER IN THE EARTH, spawn of Kyuss rise from the depths to spread suffering and anguish across the land. Driven by their maker's obscene will, they infect the living and the dead with bright green worms that bend creatures to the will of Kyuss, the Worm that Walks. In frightened whispers, seers prophesize the presence of the spawn as heralding the Age of Worms, the world's apocalyptic end.

Spawn of Kyuss come from the insane fools who heeded Kyuss's diseased vision when he was mortal. After Kyuss slew them to fuel his apotheosis, the worms of his new body spread to their bloated corpses, awakening the creatures to undeath. These grim messengers then became carriers of Kyuss's dark desires and added new victims to their numbers.

## LORE

**Religion DC 23:** The Leprous Chronicles tell of the Age of Worms and the final days before squirming legions annihilate the living. Scribed by the prophet Corbius, who dwelled in seclusion on the Island of Fear, the legend holds that the world will be devoured by an endless hunger, and all that now lives shall be dead and yet walk the world in twisted, writhing forms. Corbius claimed to have witnessed apocalyptic events revealed to him by a dark angel from the endless heavens. One figure dominates his ravings: Kyuss.

If the portents are right, an endless swarm of Kyuss's undead will overrun the strongholds of the living, casting the world into an endless night. Who can say what kingdoms might have already fallen on the borders of the known world? The Age of Worms could already be near.

## ENCOUNTERS

Spawn of Kyuss serve only the Worm that Walks and his minions. The only reason they work with others is to further their own ambitions. Alliances with spawn of Kyuss are brief and dangerous, because the spawn see everything in the world as worthy of only one of two fates: death or infection.

## SON OF KYUSS

Even when a host is destroyed, Kyuss's worms tend to escape by burrowing into the earth or clinging to their enemies' clothing. When the worms find a new

◀▶ The target loses two healing surges. If it drops to 0 or fewer healing surges, it dies and rises immediately as a son of Kyuss.

▶ **Final State:** The target dies and immediately becomes a son of Kyuss.

THOMAS M. BAXA

carcass, they plunge into the corpse and infuse it with terrible power. After a few moments, a new son of Kyuss is born.

### Sons of Kyuss in Combat

Sons of Kyuss stumble forth from the wild's darkness and descend on isolated villages, where they drift from hovel to hovel, bestowing Kyuss's gift upon young and old, living and dead. Many mistake their single-minded purpose for mindlessness. A glimpse into the wriggling eye sockets of a son of Kyuss gives an impression of chilling and intelligent malignity.

## Wretch of Kyuss

Legends persist of ancient kingdoms of the walking dead, where an outbreak of the touch of Kyuss spawned thousands upon thousands of these wretches. In crumbling cities and villages, these creatures await the signal to begin their long march on civilization. When news of these creatures spreads, people flee the area before the wretches' contagion can touch them.

### Heralds of Kyuss in Combat

When a herald of Kyuss appears, all hear its master's name in the susurrus created by the herald's attendant swarms. If listeners ignore the glory of its master's name, the herald focuses its wrath upon those people. It calls forth worms and maggots to devour foes, producing more wretches of Kyuss to spread misery and disease.

# SPIDER

Spiders have a sinister reputation, since the evil goddess Lolth has long been acknowledged as their queen. Whether prodded into battle by drow or goblins, or hunting alone in the dim reaches of a dungeon, spiders have claimed the lives of an untold numbers of adventurers.

## Encounters

Evil humanoids that dwell in subterranean depths use spiders as beasts of war. The spriggans of the Feywild use spiders to create web barriers in their haunted forests. In the Elemental Chaos, drow agents of Lolth rarely travel anywhere without a pack of spider guardians.

## Ambush Spider

These wily hunters hide among the hidden niches of rock formations and behind curtains of webbing until prey comes near.

### Ambush Spiders in Combat

An ambush spider weaves thick sheets of webbing in its lair to cover the walls and ceilings. From behind these curtains, it leaps forward, attacking its prey with lightning-fast precision before scurrying back into the darkness. In the secure shadows, it allows its poison to affect quarry before attacking again.

| **Ambush Spider** | **Level 2 Lurker** |
|---|---|
| Medium natural beast (spider) | XP 125 |
| **HP** 28; **Bloodied** 14 | **Initiative** +8 |
| **AC** 16, **Fortitude** 12, **Reflex** 14, **Will** 13 | **Perception** +8 |
| **Speed** 8, climb 8 (spider climb) | Tremorsense 5 |
| **Traits** | |
| **Camouflage** | |
| The spider can make a Stealth check to become hidden when it has cover or concealment instead of needing superior cover or total concealment. | |
| **Standard Actions** | |
| ⊕ **Bite** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +7 vs. AC | |
| *Hit:* 1d8 + 5 damage. | |
| ⸸ **Venomous Bite** (poison) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature the spider is hidden from); +7 vs. AC | |
| *Hit:* 1d8 + 5 damage, and the target is slowed and takes ongoing 5 poison damage (save ends both). | |
| *First Failed Saving Throw:* The target is immobilized instead of slowed and takes ongoing 5 poison damage (save ends both). | |
| *Special:* When charging, the spider can use this power in place of a melee basic attack. | |
| **Skills** Acrobatics +9, Stealth +9 | |
| **Str** 13 (+2) **Dex** 17 (+4) **Wis** 14 (+3) | |
| **Con** 10 (+1) **Int** 4 (-2) **Cha** 7 (-1) | |

## Feyspitter Spiders in Combat

A feyspitter spider uses fey magic to compel its victims to dance into traps, pits, and other hazards. Kobolds, goblins, sprites, and spriggans recruit these spiders with gifts of food and treasure, hoping to have them guard areas sown with perils.

# Lolth's Reaver

The most favored among Lolth's spiders are weaned on the blood of elves, eladrin, angels, and demons. In time, they grow to monstrous size. These beasts serve as pets, guardians, and mounts in Lolth's mightiest temples.

| **Lolth's Reaver** | **Level 25 Brute** |
|---|---|
| Large elemental beast (mount, spider) | XP 7,000 |
| **HP** 287; **Bloodied** 143 | **Initiative** +14 |
| **AC** 37, **Fortitude** 37, **Reflex** 34, **Will** 35 | **Perception** +19 |
| **Speed** 8, climb 6 (spider climb) | Tremorsense 5 |
| **Traits** | |
| **Web Saddle** (mount) ✦ **At-Will** | |
| While a friendly rider of 25th level or higher is mounted on the Lolth's reaver, the rider cannot be dismounted from the reaver by forced movement. | |
| **Standard Actions** | |
| **Bite** (poison) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +30 vs. AC | |
| *Hit:* 3d10 + 5 damage, and ongoing 20 poison damage (save ends). | |
| **Grasping Thread** ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +28 vs. Reflex | |
| *Hit:* The reaver pulls the target 5 squares, and the target is restrained (save ends). | |
| *Each Failed Saving Throw:* The reaver pulls the target 5 squares. | |
| **Web Leap** ✦ **Encounter** | |
| *Effect:* The reaver jumps 8 squares without provoking opportunity attacks. The reaver then makes the following attack. | |
| *Attack:* Close blast 3 (enemies in blast); +28 vs. Reflex | |
| *Hit:* 3d12 + 12 damage, and the target falls prone and cannot stand up (save ends). | |
| **Str** 28 (+21) **Dex** 15 (+14) **Wis** 25 (+19) | |
| **Con** 27 (+20) **Int** 14 (+14) **Cha** 14 (+14) | |
| **Alignment** chaotic evil **Languages** Elven, Abyssal | |

## Lolth's Reavers in Combat

In battle, a reaver attacks elves and eladrin before any other targets. Raised on the blood of such creatures, it hungers for a fresh meal. It launches long, ropy strands of webbing and drags prey into its deadly mandibles.

## Spider Webs

Spiders can spin walls of thick webbing, though the process is too long and involved for the spider to do so during a battle. You can use the following terrain features to represent the webbing found in a spider's lair. Use DCs appropriate for the encounter's level based on the table on page 42 of the *Dungeon Master's Guide*.

**Web Sheets:** A spider can weave a nearly invisible wall of sticky webbing to catch unwary intruders. A Perception check (hard DC) allows a character to spot the webbing. A creature that enters the web's space is subject to an attack (encounter level + 3 vs. Reflex). On a hit, the target is immobilized (save ends). A close or area fire attack destroys the web, and a melee fire attack can destroy 1 square of the sheet.

**Cobwebs:** A spider can weave thick webs to cover the walls and ceilings to conceal its presence. These webs provide total concealment, though the spider's tremorsense allows it to "see" through them without penalty. Spiders use these webs to sneak up on victims or drop on them from above, using the Acrobatics skill to avoid falling prone and taking damage.

# STAR SPAWN

Distant stars glimmer in the reaches of the cosmos, portending the advent of sinister creatures, the culmination of dark conspiracies, and the occurrence of catastrophes. In the world, a green star flares brightly in the night, watched only by cloistered scholars and mad warlocks. With the sound of a thousand screams, a rift tears through the fabric of reality, releasing an aberrant monstrosity into the world. It surveys the surroundings and spots the glimmer of lantern light from a nearby farm. The creature then creeps forward, advancing on its target.

Star spawn come in all shapes and sizes, but most bear a semblance of humanoid features. The stars are their only masters. Although nihilistic cultists offer frenzied petitions to star spawn, the creatures follow their own ambitions. Warped by proximity to the Far Realm, the creatures have a purpose incomprehensible to even the most unbalanced humanoids. Regardless, one can be sure that the appearance of a star spawn is a harbinger of terrible things to come.

## Lore

**Dungeoneering DC 33:** Before his disappearance, the warlock Thulzar posed a question to the scholars and philosophers of the world. "Why do some stars hate the world?" he asked. None could answer the question, because the stars and their spawn have remained quiescent about what motivates their loathing.

A silent war has persisted between the stars and the world for millennia. Sometimes called the Forgotten War, owing to the subtlety of the conflict compared to the Dawn War, this battle is more significant than most believe. Star spawn are the stars' soldiers in this battle, and through these creatures' influence in the world, the stars seek to unravel civilization—and, ultimately, life.

With the aid of powerful looking-glasses, a few warlocks have dared to search the deepest parts of the sky for the answer to Thulzar's question. Those who have retained their sanity—who have seen the place where the Far Realm meets the oblivion of space—have seen dark, sinister creatures stirring. Forgotten by the gods and the primordials, these malevolent creatures wait for something. They watch as Allabar, Opener of the Way, glides patiently across the sky, inciting the stars to war.

## Encounters

When a star spawn descends from the sky, it has no allies. Soon after, it might have an entire cult or town under its thrall. A spawn such as an emissary of Caiphon might disguise its form to insinuate itself within a town, gaining powerful allies there. Because star spawn seek to cause chaos and destruction, they find allies among demons, tulgars, undead, elementals, beholders, mind flayers, and aboleths. Whether they are leaders or servants to such creatures, the spawn hold no allegiance to their allies; whether those creatures live or die is of little concern. Self-interest and the interest of the star it represents is a star spawn's only motivation.

## Spawn of Ulban

A bolt of blue fire comes streaking down from the cosmos, racing across the night sky above a peaceful kingdom. The kingdom's citizens look on with awe, yet soon they see the significance of the event. Rebellions spring up in the realm's borders, and soothsayers cannot sense the future or provide guidance to the kingdom's leaders.

The spawn of Ulban is a cunning star spawn whose presence upsets creatures' ability to distinguish friend from foe.

| **Spawn of Ulban** | **Level 26 Controller** |
|---|---|
| Medium aberrant humanoid | XP 9,000 |
| **HP** 241; **Bloodied** 120 | **Initiative** +22 |
| **AC** 40, **Fortitude** 37, **Reflex** 39, **Will** 38 | **Perception** +25 |
| **Speed** 8 | Darkvision |
| **Immune** dominate (any enemy that hits with a power that would dominate the spawn is instead dominated by it [save ends]) | |
| **Standard Actions** | |
| ⊕ **Bluefire Strike** (cold, fire) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +29 vs. Reflex | |
| *Hit:* 3d8 + 12 cold and fire damage, and the target is dazed until the end of its next turn. | |
| ⸸ **Touch of Strife** (charm) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +29 vs. Will | |
| *Hit:* 2d10 + 5 psychic damage, and the target makes a melee or a ranged basic attack as a free action against a creature of the spawn's choice. | |
| ✧ **Ripple of Betrayal** (charm, psychic) ✦ **Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close burst 1 (enemies in burst); +29 vs. Will | |
| *Hit:* 3d10 + 5 psychic damage, and the target is dominated (save ends). | |
| **Minor Actions** | |
| **Far Realm Reflection** ✦ **At-Will** | |
| *Effect:* Choose one creature the spawn of Ulban can see. The spawn forms an eldritch bond with that creature until the end of the encounter or until the spawn uses this power again. Whenever the target of this power shifts, the spawn can shift an equal number of squares as a free action. | |
| **Triggered Actions** | |
| **Psionic Boost** (psychic) ✦ **Recharge** when the spawn takes psychic damage | |
| *Trigger:* The spawn hits with *bluefire strike* or *touch of strife*. *Effect (Free Action):* The attack deals 3d10 extra psychic damage. | |
| **Skills** Bluff +26, Diplomacy +26, Insight +25 | |
| **Str** 22 (+19) **Dex** 29 (+22) **Wis** 24 (+20) | |

| **Alignment** evil **Languages** Common, Deep Speech | |

*Spawn of Ulban*

## Spawns of Ulban in Combat

A spawn of Ulban assures itself a place of security while it undermines those around it. Foes must fight their way through traps and lackeys before they can confront one of these creatures. Even then, the spawn is a nimble combatant. For these reasons, a spawn of Ulban makes an excellent villain or villain's sidekick.

# Emissary of Caiphon

Caiphon lurks on the horizon and watches the world day and night. With each passing year, it bides its time, providing guidance. As times grow hard and a community is beset by famine, plague, or oppression, Caiphon grows bright, as if to remind people of its reassuring presence. When prayers to gods fail, people offer whispered pleas to the star for help. And Caiphon listens. When their calls grow loud enough, Caiphon sends one of its emissaries.

A stranger might arrive in town one day, offering hints for how the people might end their suffering: The stranger subtly suggests that because the lord of the town hasn't been afflicted by the plague yet, perhaps he has a cure. Soon, those who whispered pleas to Caiphon lie strewn across a vacant battlefield or at the walls of a fortress, victims of a desperate revolt they staged at the suggestion of the stranger.

| **Emissary of Caiphon** | **Level 28 Controller (Leader)** |
|---|---|
| Medium aberrant humanoid | XP 13,000 |
| **HP** 257; **Bloodied** 128 | **Initiative** +23 |
| **AC** 42, **Fortitude** 38, **Reflex** 41, **Will** 41 | **Perception** +21 |
| **Speed** 6 | Darkvision |

**Traits**

**Aura of Ruin** ✦ **Aura** 2
Enemies within the aura take a -2 penalty to saving throws.

**Blinding Backfire**
Any enemy that hits with a power that would blind the emissary of Caiphon is instead blinded (save ends).

**Standard Actions**

**Touch of Despair** (psychic) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +31 vs. Reflex
*Hit:* 4d6 + 12 damage, and the target takes 20 psychic damage the first time it fails a saving throw before the start of the emissary's next turn.

**Blinded by Greed** (charm, psychic) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +31 vs. Will
*Hit:* 3d6 + 8 psychic damage, and the emissary slides the target 2 squares. The target then makes a melee basic attack as a free action against a target of the emissary's choice.

**Blinded by Need** (charm, psychic) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +31 vs. Will
*Hit:* 3d8 + 18 psychic damage, and the emissary chooses one of its allies. The target is marked by this ally. Until the end of the emissary's next turn, the emissary and all its allies except the chosen ally are invisible to the target.

**Minor Actions**

**Deceptive Veil** (illusion) ✦ **At-Will**
*Effect:* The emissary can disguise itself to appear as any Medium or Small humanoid. A creature that succeeds on a DC 40 Insight check can see through the illusion.

**Invocation of Calamity** ✦ **Recharge** when first bloodied
*Attack:* Ranged 5 (one creature); +33 vs. Will
*Hit:* The target fails any saving throws it makes until the end of the emissary's next turn.

**Triggered Actions**

**Psionic Boost** (psychic) ✦ **Recharge** when the emissary takes psychic damage
*Trigger:* The emissary hits with *blinded by greed* or *blinded by need*.
*Effect (Free Action):* The attack deals 3d10 extra psychic damage.

**Foretelling of Doom**
*Trigger:* The emissary drops to 0 hit points.
*Effect (Immediate Interrupt):* One enemy within 10 squares of the emissary that is subject to an effect that a save can end takes a -5 penalty to all saving throws against that effect until the end of the encounter.

**Skills** Bluff +26, Diplomacy +26, Insight +25

| **Str** 22 (+20) | **Dex** 29 (+23) | **Wis** 24 (+21) |
| **Con** 25 (+21) | **Int** 26 (+22) | **Cha** 27 (+22) |

**Alignment** evil **Languages** Common, Deep Speech

## Emissaries of Caiphon in Combat

An emissary of Caiphon magically disguises itself as a humanoid while it works to bring about the downfall of those around it. The creature operates covertly within a society, studying its inhabitants and learning their weaknesses. Thus, when one confronts an emissary of Caiphon, the creature already knows a good deal about its enemies. An emissary might jeer during combat to incite its foes to be reckless, or it perhaps has gathered allies that are resistant to the types of attacks its enemies make.

EVA WIDERMANN

*Serpent of Nihal and emissary of Caiphon*

## Serpent of Nihal

The dreaded serpents of Nihal have long held a place of infamy in the annals of history. The jungle nation of Az-Kiral once had a mighty presence in the world due to backing from Zehir and his snaketongue cultists and yuan-ti. The leaders of the nation sought more power than Zehir alone could offer, and they began to search the stars for a force that would help them grow their nation into an empire. They found their solution in the form of Nihal, sometimes called the Serpent Star because of its slithering route across the sky. They created a portal to the star, and through it they brought serpents made of star-stuff into the world. Nihal had different plans, though, and the onslaught of serpents consumed the nation's inhabitants, leaving its cities desolate. The dreaded serpents still wander the jungles of the cosmos, swallowing any prey they find, feeding Nihal's unceasing hunger.

| **Serpent of Nihal** | **Level 29 Minion Lurker** |
|---|---|
| Medium aberrant beast | XP 3,750 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +28 |
| **AC** 43, **Fortitude** 40, **Reflex** 43, **Will** 40 | **Perception** +22 |
| **Speed** 7 | Darkvision |
| **Resist** 20 all damage | |
| **Standard Actions** | |
| ⨁ **Mindbite** (psychic) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +32 vs. Will | |
| *Hit:* 15 psychic damage, and if the target has two or more of the serpent's allies adjacent to it, the target takes 8 extra damage and cannot spend action points or power points (save ends). | |
| **Triggered Actions** | |
| **Depart Reality ✦ At-Will** | |
| *Trigger:* An enemy misses the serpent. | |
| *Effect (Immediate Reaction):* The serpent is removed from play until the start of its next turn. The serpent then appears in an unoccupied square within 20 squares of its original location and adjacent to an enemy. | |
| **Sudden Reality Warp ✦ Encounter** | |
| *Trigger:* The serpent rolls initiative. | |
| *Effect (Free Action):* The serpent is removed from play. At the start of the serpent's first turn, it appears in an unoccupied square within 20 squares of its original location and adjacent to an enemy. | |
| **Str** 26 (+22) | **Dex** 30 (+24) | **Wis** 26 (+22) |
| **Con** 24 (+21) | **Int** 3 (+10) | **Cha** 17 (+17) |
| **Alignment** chaotic evil | **Languages** – | |

### Serpents of Nihal in Combat

Where one serpent of Nihal is present, more lurk nearby. A serpent blinks in and out of reality, so in combat, a group of them might appear initially, only to be followed by more and more as the first round unfolds. A serpent on its own acts at the behest of Nihal. A powerful master might control a group of serpents, sending a slithering mass against its foes.

## Allabar, Opener of the Way

As it wanders the sky, Allabar seeks to fulfill a dire vision of the cosmos. A few stars are not confined to stationary positions, bound to watch distant worlds and exert minimal influence. Allabar is one such star, and it has used its mobility to generate strife between the creatures of the stars and those of the world. In the early days of creation, the primordials created Allabar as a planet like the mortal world. The gods noticed the primordials' new creation and experimented with it, attempting to create a thinking, living planet. The gods managed to ignite a spark of life within the planet, but they feared the power that their creation possessed. Thus, they cast away the planet, Allabar, into the Far Realm.

In the Far Realm, Allabar was warped in body and mind, so when it returned to the cosmos millennia later, it came full of cunning and malevolence. In the intervening years, Allabar has instigated the stars' hatred of the world. It has used its power to help create star spawn and transport them into the world

EVA WIDERMANN

| **Allabar, Opener of the Way** | **Level 30 Solo Soldier** |
|---|---|
| Gargantuan aberrant animate | XP 95,000 |
| **HP** 1,100; **Bloodied** 550 | **Initiative** +25 |
| **AC** 45, **Fortitude** 43, **Reflex** 41, **Will** 43 | **Perception** +25 |
| **Speed** 6, fly 6 (hover) | Darkvision |
| **Saving Throws** +5; **Action Points** 2 | |

**Traits**

**Gravity Well ✦ Aura** 20
Any enemy that starts its turn within the aura is pulled a number of squares depending on Allabar's current hit points: 776 to 1,100, 1 square; 551 to 775, 2 squares; 226 to 550, 4 squares; 1 to 225, 8 squares.

**All-Around Vision**
Enemies can't gain combat advantage by flanking Allabar.

**Bloodied Fury**
Whenever Allabar is bloodied, it gains an extra standard action during each turn, even if it is dazed.

**Standard Actions**

**Tentacle ✦ At-Will**
*Attack:* Melee 4 (one creature); +35 vs. AC
*Hit:* 3d8 + 15 damage, and the target is restrained until the end of Allabar's next turn.

**Triple Attack ✦ At-Will**
*Effect:* Allabar uses *tentacle* three times, making each attack against a different target.

**Devour Body ✦ At-Will**
*Attack:* Close burst 1 (enemies in burst at 0 hit points or fewer); +33 vs. Fortitude
*Hit:* Allabar pulls the target into its space, the target dies, and *psionic boost* recharges.

**Wrath of the Forsaken World** (psychic) **✦ Recharge** ⚄ ⁞⁞
*Attack:* Close blast 5 (enemies in blast); +33 vs. Fortitude
*Hit:* 4d10 + 25 psychic damage, and the target sprouts a hostile tentacle (save ends). While the target is affected by the hostile tentacle, any ally of the target that ends its turn within 2 squares of the target takes 20 damage.

**Minor Actions**

**Unravel Essence ✦ Recharge** when no enemy is affected by this power
*Attack:* Melee 4 (one creature); +33 vs. Fortitude
*Hit:* Ongoing 20 damage (save ends).
*First Failed Saving Throw:* The ongoing damage increases to 25.
*Second Failed Saving Throw*: The target is also weakened and insubstantial (save ends all).
*Third Failed Saving Throw*: The target drops to 0 hit points unless it is already below 0 hit points.

**Triggered Actions**

**Psionic Boost** (psychic) **✦ Recharge** when Allabar takes psychic damage
*Trigger:* Allabar hits with *tentacle*.
*Effect (Free Action):* The attack deals 4d10 extra psychic damage.

*Allabar*

to sow chaos. Its ultimate goal might be nothing short of the world's destruction, or it might plot something more sinister—perhaps to transform the world into a perverted semblance of life, much like itself.

## Allabar in Combat

Allabar is intelligent and cunning, so it tries to fight on its own terms. Allabar works to keep its foes close so that when they inevitably die, it can absorb them into its fleshy bulk. When Allabar is bloodied and senses that its enemies pose a true threat, it sprouts more tentacles and enters into a flurry of attacks.

## Using Allabar in Your Game

Allabar should figure into a campaign as a climactic villain that enters the world through an eldritch portal, or it should be an entity the characters encounter in the far reaches of the Astral Sea. Allabar is the type of creature that works from afar, manipulating star spawn and other lackeys within the world. When confronted, the creature communicates in combat, foretelling the dire fate of the world and each of its enemies. Although the ravages of the Far Realm have rendered the creature half insane, it still possesses a keen intellect and cruelty.

As a planetary entity, Allabar is Gargantuan. However, you can also increase or reduce its size to modify the scale of the encounter. Obviously, the characters can't fight something that is the size of a real planet, so you have a couple of options for framing the encounter's narrative. The creature that the characters fight could be an avatar of Allabar, and upon its defeat, Allabar might disappear from the sky—its light forever snuffed out. Alternatively, Allabar could reduce its size before the fight, condensing its form into a creature better suited for confronting its audacious enemies.

ROB ALEXANDER

# SU MONSTER

Known as the "wolf of the treetops," a su monster is a territorial creature with unnatural cunning. It moves unheard among the trees, communicating silently by using its strong, prehensile tail to make gestures. A su monster kills far more than it can eat. It buries the remains of an unfinished meal just below the ground, marking the location with whatever treasures the victim might have. More than one adventurer has stumbled into one of these natural meat lockers after spotting the valuables hanging on trees.

## Lore

**History DC 19:** Su monsters come from the Isle of Dread, a jungle island based in the Feywild. A wizard named Halkith created the creatures to guard his tower from the island's other inhabitants, including yuan-ti and hostile humanoid tribes. To create su monsters, Halkith combined the intellect and cunning of primates with the strength and stealth of fey panthers. Halkith also gifted the su monsters with a psychic link, which allowed him to monitor the island's activities from his tower. However, when an event sent psionic energy flooding into the world, the power overwhelmed the creatures, transforming their psyches and driving them mad. Halkith disappeared soon after that, either killed by his creations or forced to flee to another demesne. Once the su monsters broke from the bond of their creator, they spread across the planes and took up residence in jungles and around sources of psionic power.

## Encounters

When not encountered in the wild, su monsters serve spellcasters and powerful psionic creatures as guards. A warlock or a wizard might array su monsters in the forest around a stronghold or tower, or the spellcaster could have a menagerie where he or she keeps the beasts. Su monsters are smart enough to create their own collectives, though, and sometimes su monsters form primitive alliances with other beasts in their territory.

## Su Sentinel

Most of a su tribe's members are su sentinels. One su sentinel watches over a vast swath of jungle from a hollow it created in the trunk of a large tree. A su sentinel might watch an area for several days before returning to a tribe's lair. If it spots potential prey, it returns to report the quarry to the tribe.

| **Su Sentinel** | **Level 10 Skirmisher** |
|---|---|
| Medium fey beast | XP 500 |
| **HP** 107; **Bloodied** 53 | **Initiative** +12 |

ARNIE SWEKEL

## Su Sentinels in Combat

Su sentinels are patient creatures that wait for the perfect opportunity to drop down from treetops, tree hollows, walls, or cliff sides. They use terrain to their advantage, waiting until prey enters an area where the sentinels can use their climb speed and forest walk.

# Su Ambusher

A long palisade points toward a dense forest, protecting a settlement's inhabitants from the creatures that lurk in the woods. In the night, a couple of lone members of the militia keep a lookout, searching for movement. The fields that stand between the settlement and the forest are wide and open, yet only when a militia member hears the anxious whinny of a nearby horse does the group detect movement. The warning bell is never rung. In the morning, a half-dozen trails of blood lead back to the forest, grim evidence of the night's events.

| **Su Ambusher** | **Level 11 Minion Soldier** |
|---|---|
| Medium fey beast | XP 150 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +13 |
| **AC** 27, **Fortitude** 21, **Reflex** 25, **Will** 23 | **Perception** +14 |
| **Speed** 7 (forest walk), climb 7 | Darkvision |
| **Standard Actions** | |
| ⊕ **Claw ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +18 vs. AC | |
| *Hit:* 8 damage. | |
| ⸸ **Seize Prey ✦ At-Will** | |
| *Effect:* The ambusher moves its speed and makes the following attack at any point during the move. | |
| *Attack:* Melee 1 (one creature); +14 vs. Fortitude | |
| *Hit:* 8 damage. If the ambusher continues the move after the attack, it pulls the target with it and does not provoke opportunity attacks from the target. | |
| **Triggered Actions** | |
| ⸸ **Tribal Fury ✦ Encounter** | |
| *Trigger:* An ally within 3 squares is first bloodied. | |
| *Effect (Free Action):* The ambusher uses *claw*. | |

## Su Ambushers in Combat

A group of su ambushers lurks around a clearing, waiting for a herd of animals or a company of adventurers to walk through. In combat, su ambushers work with allies to isolate prey by seizing foes and carrying them to the far reaches of the battlefield. Su ambushers focus their attacks on smaller creatures, such as halflings and gnomes.

# Su Alpha

Competition is fierce in su tribes because ascending to the alpha position requires both strength and cunning. Contests for dominance in a tribe result in the death or exile of the loser. Battles between su monsters rage across the jungles, and evidence of a recent fight is left in the scars on tree trunks and the trampled foliage. A large tribe might have several su alphas.

| **Su Alpha** | **Level 12 Brute** |
|---|---|
| Medium fey beast | XP 700 |
| **HP** 149; **Bloodied** 74 | **Initiative** +11 |
| **AC** 24, **Fortitude** 25, **Reflex** 24, **Will** 23 | **Perception** +10 |
| **Speed** 7 (forest walk), climb 7 | Darkvision |
| **Standard Actions** | |
| ⊕ **Claw ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +17 vs. AC | |
| *Hit:* 3d10 + 7 damage. | |
| ⸸ **Backhand Slam ✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +15 vs. Fortitude | |
| *Hit:* 3d8 + 7 damage, and the alpha pushes the target 1 square. | |
| ⇜ **Su Howl** (psychic) ✦ **Recharge** when the alpha takes psychic damage | |
| *Attack:* Close burst 3 (enemies in burst); +15 vs. Will | |
| *Hit:* 2d10 + 3 psychic damage, and the target gains vulnerable 5 to all damage (save ends). | |
| *Miss:* Half damage, and the target gains vulnerable 5 to all damage until the end of the alpha's next turn. | |
| **Triggered Actions** | |
| ⸸ **Flesh-Ripper ✦ At-Will** | |
| *Trigger:* An enemy is pulled, pushed, or slid to a square adjacent to the alpha. | |
| *Attack (Immediate Reaction):* Melee 1 (one creature); +17 vs. AC | |
| *Hit:* 1d12 + 6 damage. | |
| ⸸ **Tribal Fury ✦ At-Will** | |
| *Trigger:* An ally within 3 squares is first bloodied. | |
| *Effect (Free Action):* The alpha uses *claw*. | |
| **Psionic Boost** (psychic) ✦ **Recharge** when the alpha takes psychic damage | |
| *Trigger:* The alpha hits with *claw*, *flesh-ripper*, or *backhand slam*. | |
| *Effect (Free Action):* The attack deals 2d8 extra psychic damage. | |
| **Skills** Acrobatics +16, Athletics +17, Stealth +16 | |
| **Str** 22 (+12) **Dex** 20 (+11) **Wis** 18 (+10) | |
| **Con** 19 (+10) **Int** 2 (+2) **Cha** 15 (+8) | |
| **Alignment** unaligned **Languages** – | |

## Su Alphas in Combat

A su alpha lumbers out into combat to try to draw attacks away from its allies. An alpha sometimes enters an area alone, hoping to bring its foes near it before its stealthy allies spring out.

# TANARUKK

TANARUKKS ARE A COMBINATION OF ORC FLESH, the blood of demons, and the fiery stuff of the Abyss's most forbidding regions. For centuries, demon lords and ambitious mortal spellcasters have created these creatures. Blasphemous rituals spawn dozens of tanarukks from vats of pulsing flesh and ichor. A newly created tanarukk is welcomed to the world with a vicious blow to the head to keep it from immediately going on a murderous rampage.

## LORE

**Arcana DC 20:** Luckily for the civilized realms, tanarukks cannot breed. Although the rituals used in their creation spawn dozens of these fiends at a time, the steady attrition of wars and infighting keep their numbers in check. In addition, tanarukks are so inherently violent that only the mightiest or most foolish spellcaster attempts to keep more than a dozen. Although tanarukks are relatively rare in the mortal world, a demon cult might have a few of them among its ranks.

The best method for defeating a tanarukk lies in coordination and teamwork, traits that tanarukks rarely exhibit or understand. When death draws near, a tanarukk's strength increases. Thus, the best tactic for dispatching a tanarukk is for comrades to make two or three attacks in quick succession. This way, the tanaukk never has a chance to unleash its wrath upon foes.

## ENCOUNTERS

Demon lords given to wrath, most notably Baphomet, create tanarukks in large numbers. These creatures rarely exist outside the grasp of whatever titan, demon lord, or spellcaster created them. However, a few wandering bands of tanarukks do exist. They serve as mercenaries, working with anything or anyone that gives them treasure and regular opportunities to pillage and kill.

When tanarukks enter the mortal world, they exult in the rarity of warriors who can match them. They rampage, leveling villages and towns, until suitable champions arise to slay them.

## TANARUKK MARAUDER

Only by the thorough application of corporal punishment do tanarukk marauders learn not to attack their allies. When marauders finally face an enemy, their pent-up rage spills forth and they become mindless berserkers.

**Tanarukk Marauder** **Level 17 Skirmisher**
Medium elemental humanoid (demon), orc XP 1,600

**HP** 165; **Bloodied** 82 **Initiative** +12
**AC** 31, **Fortitude** 29, **Reflex** 28, **Will** 28 **Perception** +11
**Speed** 6 Darkvision
**Resist** 5 fire

**TRAITS**

**Nimble Reaction**
The marauder gains a +4 bonus to AC against opportunity attacks.

**STANDARD ACTIONS**

⊕ **Greataxe** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +22 vs. AC
*Hit:* 2d12 + 12 damage.

⸸ **Brutal Rampage** ✦ **At-Will**
*Effect:* The marauder moves its speed and can move through enemies' spaces during the move. At any point during the move, the marauder can use *greataxe*. The marauder gains a +5 bonus to the damage roll for each opportunity attack made against it during the move before the attack.

⊗ **Hand Axe** (weapon) ✦ **At-Will**
*Attack:* Ranged 5/10 (one creature); +22 vs. AC
*Hit:* 2d6 + 12 damage.

⸸ **Flame Harrower** (fire, weapon) ✦ **Encounter**
*Attack:* Melee 1 (one creature); +20 vs. Fortitude
*Hit:* 2d12 + 10 fire damage, and the target takes ongoing 15 fire damage and grants combat advantage (save ends both).

**TRIGGERED ACTIONS**

**Indomitable Fury**
*Trigger:* The marauder drops to 0 hit points for the first time.
*Effect (No Action):* The marauder instead has 1 hit point, and it gains a +2 bonus to attack rolls and a +4 bonus to damage rolls until the end of the encounter.

**Skills** Athletics +19

| | | |
|---|---|---|
| **Str** 22 (+14) | **Dex** 15 (+10) | **Wis** 17 (+11) |
| **Con** 21 (+13) | **Int** 8 (+7) | **Cha** 10 (+8) |

**Alignment** chaotic evil **Languages** Abyssal, Common
**Equipment** hide armor, greataxe, 3 handaxes

WAYNE ENGLAND

### Tanarukk Marauders in Combat

Marauders throw themselves into battle with suicidal bravery. In the moments before an enemy lands a killing blow, marauders enter a crazed state of wrath and might. They relish this state, and they see death as a small price to pay for spreading carnage.

## Tanarukk Steel Warrior

The toughest of tanarukks, those that take the most punishment during their creation, are set aside to be trained as steel warriors. Steel warriors have plate armor riveted into their hides. This method of equipping them with armor grants them a deadly combination of protection and agility.

**Tanarukk Steel Warrior** **Level 18 Soldier**
Medium elemental humanoid (demon), orc XP 2,000

**HP** 177; **Bloodied** 88 **Initiative** +13
**AC** 33, **Fortitude** 30, **Reflex** 29, **Will** 30 **Perception** +12
**Speed** 5 Darkvision
**Resist** 5 fire

**Standard Actions**

**Broadsword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +23 vs. AC
*Hit:* 3d10 + 10 damage.
*Effect:* The target is marked until the end of the steel warrior's next turn.

**Crossbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 15/30 (one creature); +23 vs. AC
*Hit:* 3d8 + 6 damage.

**Burning Cage** (fire, weapon) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Melee 1 (one creature); +21 vs. Reflex
*Hit:* 3d10 + 20 fire damage, and the target takes 5 fire damage whenever it enters a square during its turn (save ends).

**Triggered Actions**

**Combat Awareness** ✦ **At-Will**
*Trigger:* An enemy marked by the steel warrior shifts or makes an attack that does not include the steel warrior as a target.
*Effect (Opportunity Action):* The steel warrior can use *broadsword* against the triggering enemy.

**Indomitable Fury**
*Trigger:* The steel warrior drops to 0 hit points for the first time.
*Effect (No Action):* The steel warrior instead has 1 hit point, and it gains a +2 bonus to attack rolls and a +4 bonus to damage rolls until the end of the encounter.

**Skills** Athletics +20
**Str** 22 (+15) **Dex** 15 (+11) **Wis** 17 (+12)
**Con** 25 (+16) **Int** 8 (+8) **Cha** 10 (+9)
**Alignment** chaotic evil **Languages** Abyssal, Common
**Equipment** plate armor, heavy shield, broadsword, crossbow, 10 bolts

### Tanarukk Steel Warriors in Combat

Steel warriors have a slender measure of control over their fury. This control makes them more fearsome, because they can unleash their wrath in focused bursts. Steel warriors love to corner weaker enemies and cut into them if the creatures try to escape.

## Tanarukk Flame Speaker

The ritual used to spawn tanarukks involves an infusion of fiery energy harvested from the Abyss. This spark grants the tanarukks their essence of life. It also gives some of them the ability to manipulate fire.

A flame speaker is a tanarukk that shows an especially developed talent for magic. Fire dances and rages at its command, making it a spellcaster among its kind.

**Tanarukk Flame Speaker** **Level 17 Artillery**
Medium elemental humanoid (demon), orc XP 1,600

**HP** 129; **Bloodied** 64 **Initiative** +11
**AC** 29, **Fortitude** 29, **Reflex** 29, **Will** 29 **Perception** +11
**Speed** 6 Darkvision
**Resist** 10 fire

**Standard Actions**

**Staff** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +22 vs. AC
*Hit:* 3d6 + 10 damage.

**Fire Bolt** (fire, implement) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +22 vs. Reflex
*Hit:* 3d8 + 12 fire damage.

**Fire Barrage** (fire, implement) ✦ **Recharge** ⚄ ⁞⁞
*Attack:* Ranged 10 (one, two, or three creatures); +22 vs. Reflex
*Hit:* 2d10 + 7 fire damage.

**Winds of Fire** (fire, implement, zone) ✦ **Encounter**
*Attack:* Area burst 2 within 20 (creatures in burst); +22 vs. Reflex
*Hit:* 3d6 + 6 fire damage.
*Effect:* The burst creates a zone that lasts until the end of the encounter. Any creature that enters the zone or ends its turn there takes 10 fire damage and is pulled 1 square toward the burst's origin square.

**Triggered Actions**

**Indomitable Fury**
*Trigger:* The flame speaker drops to 0 hit points for the first time.
*Effect (No Action):* The flame speaker instead has 1 hit point, and it gains a +2 bonus to attack rolls and a +4 bonus to damage rolls until the end of the encounter.

**Avenging Fire** (fire)
*Trigger:* An enemy reduces the flame speaker to 0 hit points for the second time.
*Effect (No Action):* The triggering enemy takes 2d10 + 5 fire damage.

**Skills** Arcana +15
**Str** 20 (+13) **Dex** 17 (+11) **Wis** 17 (+11)
**Con** 21 (+13) **Int** 14 (+10) **Cha** 12 (+9)
**Alignment** chaotic evil **Languages** Abyssal, Common
**Equipment** staff

### Tanarukk Flame Speakers in Combat

Flame speakers have no fear of death. When a flame speaker's body is struck down, the fire within it leaps back to the Abyss, scouring the flame speaker's killer on its way.

# Thri-kreen

Thri-kreen inhabit the world's arid climes, scratching out a living across vast tracts of remorseless land. The creatures' hard carapace reflects their steely, rugged temperament. Tribes are usually composed of one or two dozen thri-kreen, which depend upon one another for survival. They regard those who live beyond their blasted lands as weak, for only one who has been tested by the desert is worthy of respect. Thri-kreen draw no lines on maps to mark their borders, but woe be to the foolish traveler or adventurer who stumbles into their territory without paying proper homage to the tribe that calls those lands home.

## Lore

**History DC 14:** Thri-kreen believe that the primal spirit Old Grandfather, whom they call Sand Father, created them. They say that when the world was young, Sand Father looked across the vast deserts of the world and, seeing they were so empty, plucked a small desert beetle from the sands. From that beetle, he made the first thri-kreen. Realizing the beetle needed more than just a hard shell to protect itself, he gave the thri-kreen the wisdom of the lizard and the cunning of the desert fox.

For thousands of years, thri-kreen lived in small nomadic bands. Then, centuries ago, they came together to form a nation that spanned the world's greatest desert. The nation, known as Val-Karri, remained strong for about a century before a larger and more ambitious nation overshadowed it: The dragonborn empire of Arkhosia subjugated the lands of the thri-kreen and disassembled their empire. The thri-kreen remained vassals of the dragonborn until, at last, the conflict between Arkhosia and Bael Turath brought both of those empires to their knees, which enabled the thri-kreen to free themselves. After attaining their freedom, the thri-kreen returned to a nomadic life.

## Encounters

Thri-kreen lead lives of isolation, sometimes going for years without encountering other humanoids. Because of their strong primal and psionic sensibilities, thri-kreen find allies among beasts and among other psionic creatures. Thri-kreen find a common cause with druids and wardens in their defense of the land. Some groups of thri-kreen become corrupted by evil primal spirits and join with demon worshipers, ogres, giants, lizardfolk, and gnolls to form cults that willfully transform or corrupt the land.

## Thri-Kreen Ambusher

Even arid deserts and scrublands abound with life if one knows where to look. Thri-kreen ambushers spend their youth learning the ways of the land until, at adolescence, they are cast out to survive for one year on their own. During this time of solitude, they travel widely, putting into practice the skills they have learned.

**Thri-Kreen Ambusher** **Level 6 Lurker**
Medium natural humanoid XP 250

**HP** 58; **Bloodied** 29 **Initiative** +11
**AC** 20, **Fortitude** 17, **Reflex** 19, **Will** 17 **Perception** +11
**Speed** 8 Low-light vision

**Standard Actions**

**Spear** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 2d8 + 4 damage.

**Spinning Spears** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +11 vs. AC
*Hit:* 1d8 + 2 damage, and the ambusher gains a +5 bonus to all defenses until the end of its next turn. In addition, the ambusher's *psionic boost* recharges.

**Mind Stab** (psychic) ✦ **At-Will**
*Attack:* Ranged 5 (one creature); +9 vs. Will
*Hit:* 1d6 + 2 psychic damage, and the target is dazed until the end of the ambusher's next turn.

**Move Actions**

**Mantis Jump** ✦ **Encounter**
*Effect:* The ambusher jumps a number of squares equal to its speed. This movement does not provoke opportunity attacks.

**Triggered Actions**

**Psionic Boost** (psychic) ✦ **Encounter**
*Trigger:* The ambusher hits with *spear* or *mind stab*.
*Effect (Free Action):* The attack deals 2d6 extra psychic damage.

**Skills** Endurance +11, Stealth +12

| | | |
|---|---|---|
| **Str** 14 (+5) | **Dex** 19 (+7) | **Wis** 17 (+6) |
| **Con** 16 (+6) | **Int** 16 (+6) | **Cha** 11 (+3) |

**Alignment** unaligned **Languages** Common
**Equipment** 2 spears

### Thri-Kreen Ambushers in Combat

No tracks mark the land where an ambusher has trod. Extended periods of time spent in solitude have developed the creature's psionic abilities, allowing it to strike out at the mind of an unwary foe.

## Thri-Kreen Scout

A lone thri-kreen stands vigilant atop a sand dune, staring off at the horizon. For hours she is still while the sun passes overhead. Then, she suddenly turns and focuses on a distant point, as though beckoned by an invisible force. She then sets off to warn her tribe of intruders.

### Thri-Kreen Scouts in Combat

Thri-kreen scouts act cautiously at first, preparing traps or maintaining a safe distance while they

JASON A. ENGLE

| Thri-Kreen Scout | Level 7 Skirmisher |
|---|---|
| Medium natural humanoid | XP 300 |

monitor potential threats. Once battle begins, however, scouts are frenetic combatants, scurrying in and out of melee while focusing on bringing down a single tough enemy.

## Thri-Kreen Desert Talker

The desert's laws are harsh, and a thri-kreen tribe's desert talker passes judgment on those who violate them. In a smoky tent, the desert talker sits before a group of trespassers, citing ancient rules handed down from Sand Father. The desert talker eventually pronounces judgment—either execution or exile to the deep reaches of the desert.

| Thri-Kreen Desert Talker | Level 8 Controller |
|---|---|
| Medium natural humanoid | XP 350 |
| **HP** 88; **Bloodied** 44 | **Initiative** +6 |
| **AC** 22, **Fortitude** 19, **Reflex** 20, **Will** 21 | **Perception** +9 |
| **Speed** 7 | Low-light vision |
| **Standard Actions** | |
| **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +13 vs. AC | |
| *Hit:* 2d6 + 6 damage. | |
| **Shuriken** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 10/20 (one or two creatures); +13 vs. AC | |
| *Hit:* 2d4 + 4 damage. | |
| **Shifting Dune Rend** ✦ **At-Will** | |
| *Attack:* Area burst 1 within 10 (enemies in burst); +11 vs. Reflex | |
| *Hit:* The target falls prone. | |
| *Effect:* The desert talker slides the target 2 squares. | |
| **Desert Tempest** ✦ **Recharge** when first bloodied | |
| *Attack:* Close blast 5 (enemies in blast); +11 vs. Reflex | |
| *Hit:* 1d6 + 5 damage, and the desert talker pushes the target 2 squares. In addition, the target is blinded (save ends). | |
| **Move Actions** | |
| **Mantis Jump** ✦ **Encounter** | |
| *Effect:* The desert talker jumps a number of squares equal to its speed. This movement does not provoke opportunity attacks. | |
| **Minor Actions** | |

### Thri-Kreen Desert Talkers in Combat

A desert talker prefers to watch coolly from afar while combat unfolds. Whorls of sand might dance about the thri-kreen while he gathers his power. Then, with all four arms outstretched, he appeals to Sand Father and the spirits of the land to bring down their wrath upon his tribe's enemies.

# TULGAR

For those who can pay the price, tulgars are a resource that can turn the tide of war, deliver a brutal blow to an unsuspecting enemy, or raze even the best-guarded vaults. Born in the days of the Dawn War, these savage creatures can be found across the planes, from lost archipelagos in the mortal world, to abandoned astral dominions, to massive earthmotes drifting through the Elemental Chaos. These tall, muscular humanoids live in clans ranging in size from a few dozen to several hundred. Tulgars accept pay from any masters in exchange for their specialty service—violence and destruction.

## Lore

**Nature DC 29:** The tulgars were once primal spirits. They embodied a place of primal power that was eradicated by a cataclysm during the Dawn War. Devoid of purpose, the primal spirits once bound to these sites were cast into the world and abandoned by their own kind, who were focused on their conflict with the gods. Filled with resentment toward the deities that made their sacred sites into battlegrounds and toward the mortals who had transformed those sites into cities, mines, and farms, these primal spirits made a pact to destroy everything the gods and their followers had created.

To that end, the spirits took on forms of flesh and abandoned their primal heritage. Their enmity shaped their new bodies, giving them height and strength beyond those of normal mortals. Vengeance eluded the first of the tulgars, however. In the aftermath of the Dawn War, the gods stayed safe in their astral dominions, even as the mortal races spread and grew. Unable to consummate their rage, the tulgars became bitter and barbaric, transforming over centuries into a race of powerful mercenaries. Today, the tulgars are divided into countless clans. Some tulgars have all but abandoned their ancient pact; others curse the weak hearts of their kin and hold revenge against the gods as a central tenet of their lives.

The first tulgars' decision to place their spirits within mortal bodies came at a great cost. Rejected by the gods and the primal spirits alike, a tulgar that dies is forced to return to flesh, often far from its comrades and clan. In this way, tulgars maintain a cycle of swift reincarnation. Their minds and memories survive the process intact, keeping the tulgars' ancient enmity alive forever.

Nowadays, with the Dawn War a distant memory, it is rare for a primal spirit to lose its place and identity as the tulgars once did. However, when a spirit is left adrift, all tulgars sense it. Such an event represents one of the few circumstances under which the tulgar clans take action on their own behalf. They travel in search of the displaced spirit to offer it refuge among them—and to destroy any mortal creatures that stand in their way.

The great warriors of the past guide the actions of the tulgars, with spirit talkers and other powerful leaders interpreting their will. It is said that a spirit talker can look into the eyes of another tulgar and see the spirits of fallen warriors incarnated within it. Spirit talkers are more in touch with their primal essence than other tulgars are, but the long-ago schism that gave birth to the race means that this power drives many spirit talkers mad. Tulgars call the malady "spirit sickness," and they ritually murder any tribe member that shows signs of it. With the body's death, a tulgar's troubled spirit is cleansed and can be reborn.

Tulgars covet trophies taken from the enemies they slay. Warriors and flesh hunters seize weapons and armor from fallen foes, lashing these items to themselves even if they cannot use the items. Half-spirits and spirit talkers collect totems, fetishes, and religious icons that demonstrate their superiority over the faithful of gods and primordials alike. Tulgars sometimes carry magic items whose powers they remain unaware of, and they guard even the most worthless of their treasures with their lives.

## Encounters

Tulgars are found across the planes and in the company of virtually any intelligent creature that has enough power and wealth to hire them. Tulgars sometimes work toward their own ends, pillaging cities or delving into ruins in search of artifacts or displaced primal spirits.

MATT DIXON

The tulgars' eternal hatred toward the gods that destroyed them and the primal spirits that rejected them manifests as enmity for immortals and natural creatures alike. As such, many tulgars work freely with factions that try to undermine those groups, including the forsaken, aberrants, demon cults, and elementals. However, some tulgars have no such inhibitions, taking up service with devils or the devotees of Bane, Gruumsh, Tiamat, and other dark gods.

## Tulgar Flesh Hunter

When they come for you, the only thing to do is run. The problem is, they want you to run. Generations spent hunting down humanoids have granted tulgar flesh hunters an acute sense of smell. A flesh hunter is a relentless tracker, leading the other members of a tulgar tribe as they close in on their foes.

**Tulgar Flesh Hunter** **Level 22 Skirmisher**
Medium natural humanoid XP 4,150

**HP** 209; **Bloodied** 104 **Initiative** +21
**AC** 36, **Fortitude** 34, **Reflex** 35, **Will** 33 **Perception** +22
**Speed** 7 (forest walk)

**Traits**

**On the Hunt**
Whenever the flesh hunter hits an enemy, until the end of its next turn the flesh hunter does not provoke opportunity attacks when it moves.

**Standard Actions**

**Spear** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +27 vs. AC
*Hit:* 2d8 + 10 damage.

**Handaxe** (weapon) ✦ **At-Will**
*Attack:* Ranged 5/10 (one creature); +27 vs. AC
*Hit:* 2d6 + 8 damage.

**Hunter's Onslaught** ✦ **At-Will**
*Effect:* The flesh hunter uses *spear* and then uses *handaxe* against a different target.
*Special:* Using *handaxe* as part of this power does not provoke opportunity attacks. When charging, the flesh hunter can use this power in place of a *spear* attack.

**Rotting Strike** (necrotic, weapon) ✦ **Recharge** ⚄ ⚅
*Attack:* Melee 1 (one creature); +27 vs. AC
*Hit:* 2d8 + 8 damage, and the target is dazed and takes ongoing 10 necrotic damage (save ends both).

**Triggered Actions**

**Unbroken Spirit**
*Trigger:* The flesh hunter drops to 0 hit points.
*Effect (No Action):* The flesh hunter's nearest ally gains 10 temporary hit points and a +2 bonus to attack rolls, damage rolls, and all defenses until the end of its next turn.

**Skills** Stealth +24
**Str** 24 (+18) **Dex** 26 (+19) **Wis** 23 (+17)
**Con** 25 (+18) **Int** 23 (+17) **Cha** 20 (+16)
**Alignment** unaligned **Languages** Common
**Equipment** hide armor, spear, 4 handaxes

### Tulgar Flesh Hunters in Combat

A flesh hunter focuses on a single foe, whether the leader of an adventuring party pursued by a tulgar war band or a target hunted at the behest of a patron. A flesh hunter is more cautious than other tulgars, often studying or tracking a foe for hours or days before attacking. The tulgar's keen olfactory sense allows it to determine useful information about a foe, including what other creatures it travels with, its health, its race, and even what the creature's armor and weapons are made of.

## Tulgar Savage

The angels cut through the tulgars' ranks, yet always more tulgars approached to fill the spaces, possessed of the strength of the greatest tulgar warriors that had lived and died before them. Each tulgar savage that fell embraced its death with an unholy purpose, its spirit strengthening its allies as they closed steadily in.

**Tulgar Savage** **Level 22 Minion Brute**
Medium natural humanoid XP 1,038

**HP** 1; a missed attack never damages a minion. **Initiative** +17
**AC** 34, **Fortitude** 35, **Reflex** 33, **Will** 35 **Perception** +24
**Speed** 7 (forest walk)

**Traits**

**Critical Threat**
The savage can score a critical hit on a roll of 19-20. When the savage scores a critical hit with *greataxe*, one ally within 2 squares of it can make a melee basic attack as a free action.

**Standard Actions**

**Greataxe** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +27 vs. AC
*Hit:* 18 damage.

**Handaxe** (weapon) ✦ **At-Will**
*Attack:* Ranged 5/10 (one creature); +27 vs. AC
*Hit:* 12 damage.

**Triggered Actions**

**Unbroken Spirit**
*Trigger:* The savage drops to 0 hit points.
*Effect (No Action):* The savage's nearest ally gains 10 temporary hit points and a +2 bonus to attack rolls, damage rolls, and all defenses until the end of its next turn.

**Str** 27 (+19) **Dex** 23 (+17) **Wis** 26 (+19)
**Con** 24 (+18) **Int** 20 (+16) **Cha** 23 (+17)
**Alignment** unaligned **Languages** Common
**Equipment** hide armor, greataxe, handaxe

### Tulgar Savages in Combat

Tulgar savages charge headlong into combat, mobbing targets with *greataxe*. A savage's bloodcurdling war cry turns to a shout of triumph as it falls dead. A savage feels victorious if it can lend the strength of its spirit to a nearby ally.

# Tulgar Half-Spirit

When their best warriors began to disappear from the edge of the fray, the general knew the battle had taken a deadly turn. The tulgars had unleashed their half-spirits, rare warriors able to take a form that reflected their primal origin. Striking unseen from the shadows, these stealthy killers could turn the tide of any fight.

| **Tulgar Half-Spirit** | **Level 23 Lurker** |
|---|---|
| Medium natural humanoid | XP 5,100 |
| **HP** 116; **Bloodied** 58 | **Initiative** +23 |
| **AC** 35, **Fortitude** 35, **Reflex** 36, **Will** 36 | **Perception** +24 |
| **Speed** 7, phasing | |
| **Resist** insubstantial | |
| **Traits** | |
| **Spirit Shock** | |
| Whenever the half-spirit hits an enemy that cannot see the half-spirit, that enemy is dazed until the end of its next turn. | |
| **Standard Actions** | |
| **Claw** (illusion, necrotic) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +28 vs. AC | |
| *Hit:* 1d6 + 8 necrotic damage, and the target is immobilized until the end of the half-spirit's next turn. | |
| *Effect:* The half-spirit becomes invisible until the end of its next turn. | |
| **Handaxe** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +28 vs. AC | |
| *Hit:* 2d6 + 8 damage. | |
| **Triggered Actions** | |
| **Unleash the Inner Spirit** (illusion, necrotic, teleport) ✦ **Encounter** | |
| *Trigger:* The half-spirit is first bloodied. | |
| *Attack (Free Action):* Close burst 3 (enemies in burst); +26 vs. Fortitude | |
| *Hit:* 2d6 + 3 necrotic damage, and the target is stunned until the end of the half-spirit's next turn. | |
| *Effect:* The half-spirit becomes invisible until the end of its next turn. The half-spirit can then teleport 5 squares. | |
| **Unbroken Spirit** | |
| *Trigger:* The half-spirit drops to 0 hit points. | |
| *Effect (No Action):* The half-spirit's nearest ally gains 10 temporary hit points and a +2 bonus to attack rolls, damage rolls, and all defenses until the end of its next turn. | |
| **Skills** Stealth +24 | |
| **Str** 25 (+18) **Dex** 27 (+19) **Wis** 26 (+19) | |
| **Con** 22 (+17) **Int** 24 (+18) **Cha** 23 (+17) | |
| **Alignment** unaligned **Languages** Common | |
| **Equipment** 2 handaxes | |

## Tulgar Half-Spirits in Combat

A tulgar half-spirit phases through combat, immobilizing foes and striking unseen. Although half-spirits fight alongside their kin, they have a vindictive nature that is all but impossible to control. Even after other tulgars have retreated or agreed to a parley, half-spirits keep on fighting, intent only on wreaking destruction.

# Tulgar Warrior

The initial assault had been tough enough, but the fury of the lesser tulgars was forgotten quickly as the advance of the tulgar warriors began. The bloodthirsty howls and whirling axes of these great brutes sent the defenders scattering.

| **Tulgar Warrior** | **Level 23 Brute** |
|---|---|
| Medium natural humanoid | XP 5,100 |
| **HP** 265; **Bloodied** 132 | **Initiative** +18 |
| **AC** 35, **Fortitude** 36, **Reflex** 34, **Will** 35 | **Perception** +24 |
| **Speed** 7 (forest walk) | |
| **Traits** | |
| **Inveterate Warrior** | |
| The warrior can score a critical hit on a roll of 19-20 and deals 3d12 extra damage on a critical hit. | |
| **Standard Actions** | |
| **Greataxe** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +28 vs. AC | |
| *Hit:* 2d12 + 19 damage, and the target takes a -2 penalty to AC until the end of the warrior's next turn. | |
| **Whirling Frenzy** (weapon) ✦ **Encounter** | |
| *Primary Attack:* Close burst 1 (enemies in burst); +28 vs. AC | |
| *Hit:* 3d12 + 6 damage. | |
| *Effect:* The warrior shifts 3 squares and makes a secondary attack. | |
| *Secondary Attack:* Close burst 1 (enemies in burst not hit by the primary attack); +26 vs. AC | |
| *Hit:* 2d12 + 6 damage. | |
| **Triggered Actions** | |
| **Unbroken Spirit** | |
| *Trigger:* The warrior drops to 0 hit points. | |
| *Effect (No Action):* The warrior's nearest ally gains 10 temporary hit points and a +2 bonus to attack rolls, damage rolls, and all defenses until the end of its next turn. | |
| **Str** 28 (+20) **Dex** 24 (+18) **Wis** 26 (+19) | |
| **Con** 25 (+18) **Int** 21 (+16) **Cha** 23 (+17) | |
| **Alignment** unaligned **Languages** Common | |
| **Equipment** hide armor, greataxe | |

## Tulgar Warriors in Combat

A tulgar warrior seeks out powerful foes against which to test its mettle. However, its hubris in combat means that a warrior can sometimes be drawn away from its chosen target by taunts or threats.

# Tulgar Spirit Talker

The shrieking voice of a spirit talker rings out over the crash of combat, offering up oaths to the primal power from which the tulgars were spawned. The archers take the brunt of the spirit talkers' attacks while the spirit talkers call forth minions to contend with the enemy's melee combatants. Despite the best attempts of the defending spellcasters, they could not keep their defensive magic up. The spirit talker shattered their zones of magic, its cackling laughter echoing among the ruins.

| **Tulgar Spirit Talker** | **Level 24 Controller** |
|---|---|
| Medium natural humanoid | XP 6,050 |
| **HP** 225; **Bloodied** 112 | **Initiative** +18 |
| **AC** 37, **Fortitude** 35, **Reflex** 37, **Will** 37 | **Perception** +25 |
| **Speed** 7 (forest walk) | |
| **Traits** | |
| ☼ **Primal Barrier** ✦ **Aura** 2 | |
| Squares within the aura are difficult terrain to creatures that are not phasing or do not have forest walk. | |
| **Standard Actions** | |
| ⊕ **Spear** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +29 vs. AC | |
| *Hit:* 4d8 + 14 damage, and the target is marked by an ally within 10 squares of the spirit talker until the end of the spirit talker's next turn. | |
| ⊕ **Incite Savagery** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +27 vs. Will | |
| *Hit:* 4d10 + 10 psychic damage. If the target does not make a melee attack during its next turn, it grants combat advantage until the end of its following turn. | |
| **Minor Actions** | |
| **Dismissal** ✦ **Recharge** ⚅ ⚄ ⚃ | |
| *Special:* Choose a conjuration, a summoned creature, or a zone that is within 10 squares of the spirit talker, which then makes the following attack. | |
| *Attack:* Ranged 10 (creator of the chosen effect); +29 vs. Will | |
| *Hit:* The chosen effect ends. | |
| **Call Spirit Warrior** ✦ **Recharge** ⚃ | |
| *Effect:* A tulgar savage appears within 5 squares of the spirit talker. The savage's initiative follows the spirit talker's. | |
| **Triggered Actions** | |
| **Death's Embrace** (zone) | |
| *Trigger:* The spirit talker drops to 0 hit points. | |
| *Effect (No Action):* The spirit talker's nearest ally gains 10 temporary hit points and a +2 bonus to attack rolls, damage rolls, and all defenses until the end of its next turn. | |
| The spirit talker's death creates a zone in a close burst 2 that lasts until the end of the encounter. The zone is difficult terrain for creatures that aren't phasing or don't have forest walk. | |
| **Str** 22 (+18) **Dex** 23 (+18) **Wis** 27 (+20) | |
| **Con** 25 (+19) **Int** 26 (+20) **Cha** 28 (+21) | |
| **Alignment** unaligned **Languages** Common | |
| **Equipment** spear | |

MATT DIXON

## Tulgar Spirit Talkers in Combat

A spirit talker draws on the primal spirits that are its people's lifeblood, shouting oaths and appeals in combat to the great tulgar leaders of the past. It calls forth spirit warriors, surrounding itself with these minions as it avoids combat and uses *incite savagery*. It makes use of *dismissal* to clear away zones and conjurations that hinder its allies or grant protection to enemies.

# UMBER HULK

Umber hulks are indirectly responsible for some of the greatest clashes in the history of the Underdark. As umber hulks hunt, they leave labyrinthine burrows in their wake. Over time, the lattice of tunnels they build draws creatures that perhaps would prefer isolation into contact with each other. For this reason, most intelligent creatures of the Underdark hunt umber hulks to capture or slay them. In their mindless burrowing, umber hulks prefer to tunnel through veins of metal ore, making them dangerous to miners and prospectors. Umber hulks make good guard beasts, and if well fed they are both obedient and easily trained.

## Lore

**Dungeoneering DC 18:** Umber hulks are among the oldest creatures in the cosmos. Writings recovered from before the Dawn War mention them, and some sages believe that umber hulks emerged from the raw stuff of the world before the primordials finished crafting it. The tunnels they dig form an important network of passages in dungeons and in regions of the Underdark.

"Chasing an umber hulk" is a dwarf expression for a dangerous plan that could, with luck, offer a great reward. It refers to the prospector's strategy of trailing after umber hulks in the hope of finding veins of gold and mithral that the beasts uncover.

## Encounters

Umber hulks are too dim to seek out allies of their own. Instead, other creatures trap, feed, and train umber hulks. Although they are incapable of speaking, umber hulks can understand verbal messages n Deep Speech, which allows them to follow complex commands. Grimlocks and orcs use umber ravagers as hunting beasts, and abyssal hulks are found in the ranks of almost every demon lord's army.

HOWARD LYON

## Umber Ravager

The smallest of the umber hulks are called umber ravagers. They range through the upper layers of the earth, burrowing into dungeons in search of a meal. Although nearly as large as their kin, they are weaker and less capable of employing the mind-bending gaze for which the umber hulk is renowned.

| **Umber Ravager** | **Level 7 Brute** |
|---|---|
| Medium natural magical beast | XP 300 |
| **HP** 95; **Bloodied** 47 | **Initiative** +4 |
| **AC** 19, **Fortitude** 20, **Reflex** 18, **Will** 19 | **Perception** +5 |
| **Speed** 5, burrow 2 (tunneling) | Darkvision, tremorsense 5 |
| **Standard Actions** | |
| **Claw ✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +12 vs. AC | |
| *Hit:* 1d10 + 5 damage. | |
| **Claw Flurry ✦ At-Will** | |
| *Effect:* The ravager uses *claw* twice. | |
| **Crushing Gaze** (psychic) **✦ At-Will** | |
| *Attack:* Close blast 3 (enemies in blast); +10 vs. Will | |
| *Hit:* 3d8 psychic damage, and the target falls prone. | |
| **Minor Actions** | |
| **Disarming Gaze ✦ Recharge** ⚅ | |
| *Attack:* Ranged 3 (one creature); +10 vs. Will | |
| *Hit:* The target is stunned (save ends). | |
| **Str** 19 (+7) **Dex** 13 (+4) **Wis** 14 (+5) | |
| **Con** 15 (+5) **Int** 5 (+0) **Cha** 11 (+3) | |
| **Alignment** unaligned **Languages** understands Deep Speech | |

### Umber Ravagers in Combat

An umber ravager is motivated primarily by hunger. It uses *disarming gaze* to render a foe helpless so that it can then feast on its prey at its leisure. An umber ravager attempts to isolate a single enemy. If pressed on all sides, it sends a few opponents staggering with *crushing gaze*, giving the creature time to retreat.

Although they are occasionally encountered alone, umber ravagers usually hunt in packs. The brutes in a pack will attack groups of travelers, with each creature initially selecting a single opponent to focus on to the exclusion of all other targets.

# Abyssal Hulk

Although umber hulks are most common within the Underdark, their scourge long ago spread across the planes. According to legend, the earliest umber hulks burrowed deeper and deeper into the world until they finally emerged in other planes, where they ate the strange new creatures they encountered. Umber hulks that ventured into the Elemental Chaos found that the Abyss was a teeming hunting ground. Even though many of their number died, enough survived to feast on demon flesh, warping them to reflect their new environment. The stuff of the Abyss gave these hulks acidic blood, and their gaze became more maddening than hypnotic. A creature that falls under an abyssal hulk's control howls and shrieks as if crazed.

| **Abyssal Hulk** | **Level 15 Controller** |
|---|---|
| Large elemental magical beast | XP 1,200 |
| **HP** 152; **Bloodied** 76 | **Initiative** +9 |
| **AC** 29, **Fortitude** 28, **Reflex** 26, **Will** 27 | **Perception** +11 |
| **Speed** 5, burrow 2 (tunneling) | Darkvision, tremorsense 5 |
| **Resist** 10 acid | |
| **Standard Actions** | |
| ⊕ **Claws** ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +20 vs. AC | |
| *Hit:* 2d10 + 12 damage. | |
| ✧ **Gaze of Chaos** (charm, psychic) ✦ **At-Will** | |
| *Attack:* Close blast 3 (enemies in blast); +19 vs. Will | |
| *Hit:* 1d6 + 5 psychic damage, and the hulk slides the target 3 squares. The target then makes a melee basic attack as a free action against a creature of the hulk's choice. | |
| ✧ **Acidic Spew** (acid) ✦ **Recharge** ⚅ | |
| *Attack:* Close blast 5 (enemies in blast); +19 vs. Fortitude | |
| *Hit:* Ongoing 10 acid damage (save ends). | |
| **Minor Actions** | |
| ✧ **Gaze of Crushed Will** (fear) ✦ **At-Will** (1/round) | |
| *Attack:* Close blast 5 (enemies in blast); +19 vs. Will | |
| *Hit:* The hulk slides the target 3 squares, and the target takes a -5 penalty to any saving throws it makes during the move. | |
| **Str** 29 (+16) **Dex** 15 (+9) **Wis** 18 (+11) | |
| **Con** 24 (+14) **Int** 7 (+5) **Cha** 13 (+8) | |
| **Alignment** chaotic evil **Languages** understands Deep Speech | |

## Abyssal Hulks in Combat

These hulks burrow through layers of the Abyss, sometimes creating new passages between different layers. Yeenoghu's minions have gathered many of these creatures as guardians and watchers. These abyssal hulks lurk beneath the ground along well-traveled paths in the Abyss. They rise up to hack their foes to death with claws or else send them plummeting over a cliff edge.

# Astral Hulk

Just as umber hulks somehow migrated to the Abyss, they have also come to inhabit the Astral Sea, where they plague settlements large and small. Perhaps the result of a primordial's mad scheme to undermine the gods, these creatures devour the very substance of astral dominions in the manner of oversized termites. They rip and tear into a domain, and in time, splinter and rend the domain into a cloud of massive rocks and floating detritus. Throughout the Astral Sea, these enormous debris clouds serve as a grim reminder of the threat these beasts pose and the fate of dominions they infest.

| **Astral Hulk** | **Level 17 Soldier** |
|---|---|
| Large immortal magical beast | XP 1,600 |
| **HP** 167; **Bloodied** 83 | **Initiative** +13 |
| **AC** 33, **Fortitude** 29, **Reflex** 28, **Will** 29 | **Perception** +12 |
| **Speed** 5, burrow 2 (tunneling) | Darkvision, tremorsense 5 |
| **Standard Actions** | |
| ⊕ **Claws** ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +22 vs. AC | |
| *Hit:* 2d10 + 14 damage, and the target is marked until the end of the hulk's next turn. | |
| ✧ **Gaze of Lassitude** (charm) ✦ **At-Will** | |
| *Attack:* Close blast 5 (enemies in blast); +20 vs. Fortitude | |
| *Hit:* 2d6 + 3 damage, and the hulk pulls the target 4 squares. In addition, the target is slowed (save ends). | |
| ✧ **Gaze of Annihilation** ✦ **Encounter** | |
| *Attack:* Close blast 5 (enemies in blast); +20 vs. Fortitude | |
| *Hit:* 2d10 + 5 damage. | |
| *Miss:* Half damage. | |
| *Effect:* The target is marked until the end of the hulk's next turn. | |
| **Triggered Actions** | |
| ⸸ **Entrapping Mandibles** ✦ **At-Will** | |
| *Requirement:* The hulk must not have a creature grabbed. | |
| *Trigger:* An enemy marked by the hulk shifts. | |
| *Attack (Immediate Interrupt):* Melee 1 (triggering enemy); +22 vs. Fortitude | |
| *Hit:* The target is grabbed. | |
| **Str** 30 (+18) **Dex** 17 (+11) **Wis** 18 (+12) | |
| **Con** 23 (+14) **Int** 8 (+7) **Cha** 13 (+9) | |
| **Alignment** evil **Languages** understands Deep Speech | |

## Astral Hulks in Combat

Concerned only with annihilation, astral hulks seek to destroy everything with which they come into contact. The gaze of an astral hulk induces a dangerous lethargy in its prey, slowing reactions and suppressing the instinct of self-preservation. The victim of an astral hulk's gaze can be made to walk directly into the beast's waiting mouth.

Some cruel torturers, particularly servants of Zehir and Vecna, capture astral hulks and train them to torture captives.

# VERBEEG

Although verbeegs are physically powerful, they view clever tricks and deception as tactics far superior to clubbing an enemy over the head. A verbeeg loves to mimic the expectations of its prey, pretending by its speech and actions to be, for example, the densest ogre or giant. Once its enemies are convinced that they have outwitted the giant, the verbeeg turns the tables on them. If a verbeeg can prey on another creature's sense of honor, fairness, or justice, so much the better.

One of the most famous tales among the verbeegs concerns Jack Longears, a verbeeg who lived near a bridge in the Feywild. Jack would sit by the bridge and charge travelers a toll. The toll, however, applied only if the travelers returned to his side of the bridge. If they swore to pay him, Jack would let the travelers pass. When the travelers were halfway across the bridge, Jack grabbed the rails of the bridge and tilted it toward him. When the targets of his swindle slid down the bridge and landed at his feet, he demanded his toll.

## Lore

**Streetwise DC 21:** Although verbeegs are utter rascals, they do possess a warped sense of honor. Verbeegs obey the following two rules: First, a verbeeg never gives a sucker an even break. Second, a verbeeg must keep its word. It might twist, turn, and torture the phrasing of a promise, but once it makes a pledge, it must uphold it.

## Encounters

Verbeegs seek out big, dense creatures, most notably ogres and hill giants. If such creatures aren't available, verbeegs turn their attention to less powerful allies that they can bully into service, such as orcs, goblins, and unscrupulous fey.

Because of their greed, verbeegs also readily hire themselves out as mercenaries. They work for almost anyone, as long as they need to fight only rarely and are kept well supplied with food and strong drink.

## Verbeeg Rowdy

Most verbeegs seek an easy life that features more food, drink, and rest than battle or labor. Despite their great strength, verbeegs would much rather steal a purse of coins than fight for one. The rowdy is a typical verbeeg thug, intent on getting what it wants with little effort or risk.

EVA WIDERMANN

| **Verbeeg Rowdy** | **Level 9 Skirmisher** |
|---|---|
| Large fey humanoid (giant) | XP 400 |
| **HP** 99; **Bloodied** 49 | **Initiative** +8 |
| **AC** 23, **Fortitude** 21, **Reflex** 20, **Will** 18 | **Perception** +4 |
| **Speed** 8 | Low-light vision |
| **Traits** | |
| **Combat Advantage** | |
| The rowdy deals 5 extra damage against any creature granting combat advantage to it. | |
| **Verbeeg Stealth** | |
| The rowdy can make a Stealth check to become hidden as long as one square it occupies has superior cover or total concealment from the creature it is attempting to hide from. | |
| **Standard Actions** | |
| ⊕ **Spear** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 2 (one creature); +14 vs. AC | |
| *Hit:* 2d8 + 8 damage. | |
| ⸸ **Skewering Strike** (weapon) ✦ **Encounter** | |
| *Attack:* Melee 2 (one creature); +12 vs. Reflex | |
| *Hit:* 2d12 + 8 damage, and the rowdy slides the target 5 squares to a square within 2 squares of the rowdy. | |
| **Move Actions** | |
| **Bounding Maneuver** ✦ **At-Will** | |
| *Effect:* The rowdy is no longer marked, and it shifts 3 squares and can move through enemies' spaces during the shift. | |
| **Minor Actions** | |
| ⸸ **Cunning Trick** ✦ **Recharge** ⚄ ⚅ | |
| *Attack:* Melee 3 (one creature); +12 vs. Will | |
| *Hit:* The rowdy knocks the target prone or slides it 3 squares. | |
| **Skills** Bluff +11, Stealth +11, Thievery +11 | |
| **Str** 24 (+11) **Dex** 14 (+6) **Wis** 11 (+4) | |
| **Con** 19 (+8) **Int** 13 (+5) **Cha** 14 (+6) | |
| **Alignment** evil **Languages** Common, Elven, Giant | |
| **Equipment** hide armor, light shield, spear | |

## Verbeeg Rowdies in Combat

When a rowdy fights, it does so because it has no other choice or because it thinks it can easily overpower an enemy. Even against a weaker foe, though, it rarely remains still. Rowdies move constantly to avoid counterattacks, gladly throwing their allies in front of their opponents to escape unharmed. Rowdies laugh and jeer at their foes, especially when *cunning trick* lets them embarrass an enemy. To fool a foe, a rowdy might make a quick feint, use deceptive footwork, or even crack a joke or give a false shout of warning.

# Verbeeg Ringleader

Just as verbeegs bully and cajole service from dense brutes, so too do they jostle for dominance among themselves. The ringleader is the cleverest verbeeg in a gang, the one responsible for plotting heists and concocting schemes.

| **Verbeeg Ringleader** | **Level 11 Artillery (Leader)** |
|---|---|
| Large fey humanoid (giant) | XP 600 |
| **HP** 91; **Bloodied** 45 | **Initiative** +15 |
| **AC** 25, **Fortitude** 23, **Reflex** 23, **Will** 24 | **Perception** +10 |
| **Speed** 8 | Low-light vision |
| **Traits** | |
| **Cunning Insight ✦ Aura** 5 | |
| Any ally within the aura gains a +5 power bonus to damage rolls against any creature granting combat advantage to that ally. | |
| **Verbeeg Stealth** | |
| The ringleader can make a Stealth check to become hidden as long as one square it occupies has superior cover or total concealment from the creature it is attempting to hide from. | |
| **Standard Actions** | |
| **Spear** (weapon) **✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +16 vs. AC | |
| *Hit:* 2d8 + 5 damage. | |
| **Longbow** (weapon) **✦ At-Will** | |
| *Attack:* Ranged 15/30 (one creature); +18 vs. AC | |
| *Hit:* 2d10 + 8 damage, and the target grants combat advantage until the end of the ringleader's its next turn. | |
| **Distracting Shot ✦ Recharge** ⚄ ⁞⁞ | |
| *Effect:* The ringleader uses *longbow*. If the attack hits, one of the ringleader's allies can make a melee basic attack against the target of the attack as a free action. | |
| **Get Them! ✦ Encounter** | |
| *Effect:* Three of the ringleader's allies within 5 squares of it can charge one creature of the ringleader's choice as a free action. | |
| **Skills** Arcana +13, Stealth +12, Thievery +12 | |
| **Str** 24 (+12) **Dex** 14 (+7) **Wis** 11 (+5) | |
| **Con** 19 (+9) **Int** 19 (+9) **Cha** 19 (+9) | |
| **Alignment** evil **Languages** Common, Elven, Giant | |
| **Equipment** hide armor, spear, longbow, 40 arrows | |

## Verbeeg Ringleaders in Combat

A ringleader expects its followers to do the dirty work. It shouts orders, usually punctuated with oaths and insults, to direct them. Accustomed to leading ogres and hill giants, a ringleader knows that the most effective orders are loud, crude, and simple. A verbeeg ringleader's high initiative modifier ensures that it will likely go first, allowing it to call its brethren quickly into combat with *get them!* A verbeeg ringleader is a consummate ambusher; it loves nothing more than to lie in wait for opponents before springing a clever trap.

# Verbeeg Trickster

Although few verbeegs have the patience or energy to master magic, a few manage to steal spellbooks and learn a few tricks. A verbeeg trickster has the barest understanding of magic, relying on its own instincts and cunning to use spells that are useful for theft and stealth.

| **Verbeeg Trickster** | **Level 11 Controller** |
|---|---|
| Large fey humanoid (giant) | XP 600 |
| **HP** 115; **Bloodied** 57 | **Initiative** +7 |
| **AC** 25, **Fortitude** 23, **Reflex** 21, **Will** 19 | **Perception** +5 |
| **Speed** 8 | Low-light vision |
| **Traits** | |
| **Verbeeg Stealth** | |
| The trickster can make a Stealth check to become hidden as long as one square it occupies has superior cover or total concealment from the creature it is attempting to hide from. | |
| **Standard Actions** | |
| **Spear** (weapon) **✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +16 vs. AC | |
| *Hit:* 2d8 + 10 damage, and the target falls prone. | |
| **Staggering Bolt** (force, implement) **✦ At-Will** | |
| *Attack:* Ranged 5 (one creature); +14 vs. Reflex | |
| *Hit:* 3d6 + 9 force damage, and the trickster slides the target 1 square. | |
| **Blinding Blast** (implement, radiant) **✦ Recharge** ⚄ ⁞⁞ | |
| *Attack:* Close blast 5 (enemies in blast); +14 vs. Fortitude | |
| *Hit:* 1d6 + 5 radiant damage, and the target is blinded until the end of the trickster's next turn. | |
| **Bewildering Bolt** (implement, psychic) **✦ Encounter** | |
| *Attack:* Ranged 10 (one creature); +14 vs. Will | |
| *Hit:* 1d10 + 7 psychic damage, and the target cannot attack (save ends). | |
| **Concealing Mist** (zone) **✦ Encounter** | |
| *Effect:* The trickster creates a zone in a close burst 2 that is lightly obscured and lasts until the end of the encounter. Any verbeeg that starts its turn within the zone gains combat advantage against creatures outside the zone until the end of the verbeeg's turn. | |

## Verbeeg Tricksters in Combat

A trickster loathes moving into close range with its enemies. Instead, it prefers to remain at the edge of any brawl, using magic to incapacitate foes. A trickster lets other lackeys handle melee combat. Driven by greed, a trickster is likely to rifle an unconscious enemy's pockets and flee the battle with a fistful of coins.

# WEAVER

The ancient pyramid was abandoned, or so Brandis thought. After all, Coldfall Mountain was an inhospitable place. It wasn't until he reached the heart of the pyramid that Brandis saw any signs of life.

The creatures had mirrorlike skin, and they were dismantling a cracked furnace and transporting it through a portal that glowed with azure light. When Brandis turned to retreat, he found a cloaked, six-armed creature standing before him.

He had hoped he wouldn't need his magic. Before he could summon up the arcane power, though, the six-armed creature slammed Brandis against the wall with a wave of its hand. The creature then raised a multicolored disk and pointed it in his direction.

*Battle weaver and spell weaver*

Before Brandis could do anything, he felt the disk sucking away his soul.

## Lore

**Arcana or Religion DC 24:** The great and ancient weaver civilization was destroyed long ago. All parts of the weavers' civilization seem to have been shattered and twisted. What remain are a few ruins, highly prized by treasure hunters for the valuables that lie within them. The ruins that have been explored have proved illuminating to scholars.

The writings describe how the weaver civilization stood against a terrible incursion from the Far Realm. The weavers tried to prevent a seed of chaos from entering the cosmos. They failed to stop it entirely, and the seed ruptured, breaking their homeland apart and scattering it across the planes.

The weavers say that their civilization predates the gods and the primordials, though most scholars discount these claims. For this reason, weavers believe they are above the gods, and they care nothing for mastering divine power. Weavers suggest that the planar disjunction that toppled their society created the Astral Sea and the Elemental Chaos.

Weavers work constantly to rebuild their lost civilization. They seek out their lost ruins and gather energy for a dangerous plan. The ruins that the weavers repair and reactivate become powerful nodes linked together by a network of planar gates. Deep within these nodes are huge furnaces that harness the life force of mortals and magic items. The weavers gather this energy from across the cosmos, using chromatic disks that function only for them. The purpose of these furnaces is shrouded in mystery, but sages suggest that the network of nodes will eventually be used in an attempt to reunite the planes—an event so catastrophic that not even the gods would survive it.

## Encounters

Weavers are self-reliant, but they do use members of other races as servants. The nerras are powerful allies of the weavers, because their ability to construct plane-spanning gates makes the connections between the nodes possible. Some scholars believe that weavers created the nerras through complex ceremonies involving the metallic blue blood of the weavers.

Because the weavers' primary opponents to the unification of the planes are the gods, weavers often work with creatures that are thorns in the sides of deities, such as tulgars and forsaken. Efreets and other elemental forces are sometimes assisted by a battle weaver or a spell weaver. On the few occasions when weavers have been amenable to negotiations with other races, the meetings have taken place in the City of Brass.

JOHN STANKO

# Spell Weaver

For a spell weaver, arcane thought is second nature; its mind and body are so in tune with arcane power that a spell weaver can cast a spell in the blink of an eye. The creature can rain down magical fire with one pair of arms while using the others to throw back foes with thundering waves of energy.

## Spell Weavers in Combat

Spell weavers use rituals to create temporary portals into otherwise well-defended locations to steal magic items used to power their gigantic furnaces. These attacks are unexpected, fast, and frequently successful. Spell weavers patiently plan a raid months in advance, using rituals or underlings to spy on the target.

Spell weavers are usually in charge of raiding parties, while subordinate allies take on supporting tasks, such as tying up opponents or guarding an escape portal. A spell weaver methodically presses toward its goal, most often a powerful magic item or an arcane soul it can siphon into its chromatic disk. Once a spell weaver has what it wants, the creature teleports back to the portal and escapes. A spell weaver is a master of teleportation and can move itself and its enemies across the battlefield as it wishes.

| **Spell Weaver** | **Level 28 Elite Artillery** |
|---|---|
| Medium immortal humanoid | XP 26,000 |
| **HP** 400; **Bloodied** 200 | **Initiative** +22 |

RAVEN MIMURA

# Battle Weaver

Battle weavers are masters of melee combat, acting out a well-rehearsed ballet of blades. Their weapons are as graceful as their movements. A battle weaver hunts down the best fighters in existence with the goal of drawing a master fighter's soul into its chromatic disk.

| Battle Weaver | Level 26 Elite Soldier |
|---|---|
| Medium immortal humanoid | XP 18,000 |
| **HP** 488; **Bloodied** 244 | **Initiative** +20 |
| **AC** 42, **Fortitude** 39, **Reflex** 36, **Will** 39 | **Perception** +22 |
| **Speed** 6, teleport 6 | Darkvision |
| **Saving Throws** +2; **Action Points** 1 | |

**Traits**

☼ **Blade Mastery** ✦ **Aura** 1
Any enemy that starts its turn within the aura takes 10 damage and is marked until the end of the battle weaver's next turn.

**Multitasking Brain**
While dazed, the battle weaver can spend a standard action and a minor action instead of only a standard action, and it can still take immediate actions.

**Standard Actions**

⨺ **Longsword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +31 vs. AC
*Hit:* 3d8 + 11 damage.

**Minor Actions**

⨺ **Quick Jab** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +31 vs. AC
*Hit:* 1d8 + 11 damage, and the weaver slides the target 3 squares to a square adjacent to it.

⨺ **Sidestep Stab** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +31 vs. AC
*Hit:* 1d8 + 11 damage.
*Effect:* The weaver shifts 3 squares to a square adjacent to the target.

⚚ **Extract Martial Soul** (healing, psychic) ✦ **Recharge** ⚄ ⁞⁞
*Requirement:* The weaver must be holding a chromatic disk.
*Attack:* Ranged 5 (one bloodied creature that has martial powers); +29 vs. Will
*Hit:* 2d12 + 12 psychic damage, and the target is dazed (save ends).
*Miss:* Half damage.
*Effect:* The weaver regains 24 hit points.

**Triggered Actions**

⸸ **Marked Assault** (teleportation) ✦ **At-Will**
*Trigger:* An enemy marked by the weaver and within 10 squares of it makes an attack that does not include the weaver as a target.
*Effect (Immediate Interrupt):* The weaver teleports to a square adjacent to the triggering enemy and makes a melee basic attack against the enemy as a free action.

**Skills** Acrobatics +23, Athletics +25, Endurance +27

| | | |
|---|---|---|
| **Str** 25 (+20) | **Dex** 21 (+18) | **Wis** 28 (+22) |
| **Con** 28 (+22) | **Int** 23 (+19) | **Cha** 19 (+17) |

**Alignment** unaligned **Languages** telepathy 40
**Equipment** chromatic disk, 4 longswords

## Battle Weavers in Combat

A master fighter would sooner take on an army of orcs than meet the steel of a single battle weaver. A battle weaver's blades are so synchronized that parrying one shot leaves a fighter open to another. It is impossible to escape combat with a battle weaver unscathed. Battle weavers are disciplined and graceful warriors that follow orders to the letter. Once the goal of a combat is lost, a battle weaver withdraws to protect its allies. A battle weaver willingly gives up its own life to make sure a mission is successful.

# Thought Weaver

Each weaver has its own area of expertise. Spell weavers are masters of magic, and battle weavers are

| Thought Weaver | Level 27 Elite Controller (Leader) |
|---|---|
| Medium immortal humanoid | XP 22,000 |
| **HP** 500; **Bloodied** 250 | **Initiative** +20 |
| **AC** 41, **Fortitude** 38, **Reflex** 38, **Will** 41 | **Perception** +24 |
| **Speed** 6, teleport 6 | Darkvision |
| **Saving Throws** +2; **Action Points** 1 | |

**Traits**

**Multitasking Brain**
While dazed, the thought weaver can spend a standard action and a minor action instead of only a standard action, and it can still take immediate actions.

**Standard Actions**

**Command the Puppet** (charm, psychic) ✦ **At-Will**
*Effect:* One creature dominated by the weaver within 10 squares of it takes 2d6 + 10 psychic damage. In addition, the weaver slides the creature 5 squares. The creature then uses an at-will attack of the weaver's choice against one of its allies of the weaver's choice.

⚚ **Mental Puppet** (charm) ✦ **Recharge** when no creature is dominated by this power
*Attack:* Ranged 10 (one creature); +32 vs. Will
*Hit:* The weaver slides the target 5 squares. The target then makes a basic attack against one of its allies of the weaver's choice. In addition, the target is dominated (save ends).

**Minor Actions**

⨺ **Quick Strike** ✦ **At-Will**
*Attack:* Melee 1 (one creature); +32 vs. AC
*Hit:* 2d6 + 10 damage.

⚚ **Mind Spike** (psychic) ✦ **At-Will**
*Attack:* Ranged 10 (one creature); +31 vs. Will
*Hit:* 2d6 + 10 psychic damage, the target takes a -2 penalty to all defenses until the end of the thought weaver's next turn, and the thought weaver slides the target 3 squares.

⚚ **Extract Psionic Soul** (healing, psychic) ✦ **Recharge** ⚄ ⁞⁞
*Requirement:* The weaver must be holding a chromatic disk.
*Attack:* Ranged 5 (one bloodied creature that has psionic powers); +30 vs. Will
*Hit:* 2d12 + 12 psychic damage, and the target is dazed (save ends).
*Miss:* Half damage.
*Effect:* The weaver regains 25 hit points.

**Standard Action, Move Action, or Minor Action**

**Coordinated Strike** ✦ **At-Will** (1/round)
*Requirement:* The weaver can use this power only during its turn.
*Effect:* The weaver grants an action of the same type as the one used to activate this power to an ally within 5 squares of it. That ally then immediately uses an action of that type as a free action.

**Triggered Actions**

**Guardian Puppet** (charm) ✦ **At-Will**
*Trigger:* An enemy willingly leaves a square adjacent to a creature dominated by the weaver.
*Effect (Immediate Interrupt):* The dominated creature makes a basic attack against the triggering enemy.

**Skills** Insight +29

| | | |
|---|---|---|
| **Str** 17 (+16) | **Dex** 24 (+20) | **Wis** 32 (+24) |
| **Con** 26 (+21) | **Int** 26 (+21) | **Cha** 24 (+20) |

**Alignment** unaligned **Languages** telepathy 40
**Equipment** chromatic disk

masters of the body. Thought weavers are the masters of the mind. Thought weavers rarely accompany their brethren on raids, but they are frequently found in remote ruins, trying to accomplish the weavers' ultimate goal of reuniting the planes. They are often the masterminds behind far-reaching schemes and can coordinate the actions of their many allies both on and off the battlefield.

### Thought Weavers in Combat

A thought weaver is nearly motionless in combat. Subtle movements of its arms and hands result in the eyes of an enemy glazing over as he swings at his nearby ally. The rare thought weaver that accompanies a raiding party coordinates its allies' escape once the raid is complete.

## Hex Weaver

Commanding magic drawn from the Shadowfell, hex weavers sometimes oversee portals that connect to that plane. The most autonomous among the weavers, hex weavers lead small bands of followers on specific tasks rather than getting closely involved with the greater goals of the weaver race. Even other weavers find hex weavers complicated and difficult to understand.

### Hex Weavers in Combat

Hex weavers are terrifying in battle, preferring to utilize stealth and surprise. They are consummate schemers and always go into a fight knowing what they want to achieve. Once its goal is met, a hex weaver and its allies retreat. If there's no reward for combat, a hex weaver avoids battle entirely.

Cabals led by hex weavers pursue inscrutable missions. Hex weavers forge alliances with death titans and lich vestiges, but also employ the services of retrievers and similar servants. Hex weavers don't always care what the rest of their race is working toward. They frequently ignore their duties to pursue personal goals. When a hex weaver's ambitions collide with those of other weavers, a terrible conflict can erupt.

**Hex Weaver** **Level 27 Elite Lurker**
Medium immortal humanoid XP 22,000

**HP** 382; **Bloodied** 191 **Initiative** +26
**AC** 41, **Fortitude** 37, **Reflex** 40, **Will** 40 **Perception** +18
**Speed** 6, teleport 6 Darkvision
**Saving Throws** +2; **Action Points** 1

**Traits**

**Multitasking Brain**
While dazed, the hex weaver can spend a standard action and a minor action instead of only a standard action, and it can still take immediate actions.

**Standard Actions**

**Shadow Grasp** ✦ **At-Will**
*Attack:* Ranged 10 (one or two creatures); +30 vs. Fortitude
*Hit:* 3d6 + 9 damage.
*Effect:* The weaver is invisible to the target until the end of the weaver's next turn.

**Stinging Shroud** (necrotic) ✦ **At-Will**
*Attack:* Close burst 1 (enemies in burst); +30 vs. Fortitude
*Hit:* 2d8 + 9 necrotic damage. The attack deals 20 extra damage if the target is granting combat advantage to the weaver.

**Shadow Mask** (illusion) ✦ **Encounter**
*Effect:* The weaver becomes invisible until the end of its next turn.

**Minor Actions**

**Shrouded Eye** ✦ **At-Will** (1/round)
*Attack:* Melee 1 (one creature); +30 vs. Reflex
*Hit:* 2d10 + 9 damage.
*Effect:* The weaver is invisible to the target until the end of the weaver's next turn.

**Extract Shadow Soul** (healing, psychic) ✦ **Recharge** ⚄ ⁞⁞
*Requirement:* The weaver must be holding a chromatic disk.
*Attack:* Ranged 10 (one bloodied creature that has shadow powers); +30 vs. Will
*Hit:* 2d8 + 9 psychic damage, and the target is dazed (save ends).
*Miss:* Half damage.
*Effect:* The weaver ends one condition currently affecting it.

**Triggered Actions**

**Step into Shadow** (illusion, teleportation) ✦ **Recharge** ⚅ ⚄ ⁞⁞
*Trigger:* The weaver takes damage.
*Effect (Immediate Reaction):* The weaver is insubstantial until the end of its next turn. The weaver then teleports its speed.

**Skills** Arcana +25, Stealth +27
**Str** 18 (+17) **Dex** 29 (+22) **Wis** 20 (+18)
**Con** 23 (+19) **Int** 25 (+20) **Cha** 29 (+22)
**Alignment** unaligned **Languages** telepathy 40
**Equipment** chromatic disk

# WILDEN

The wilden have only recently emerged from the Feywild to battle the corrupting influence of the Far Realm. They are still new to the world and finding their place among other creatures. Some turn to elves, gnomes, and eladrin for guidance. Others are more feral, patterning their behavior on that of wild beasts. The latter pose a deadly threat to adventurers. They are territorial, aggressive, and xenophobic, traits that lead to armed clashes between wilden and the explorers that enter their territories.

## Lore

**Nature DC 17:** Wilden tribes rely on their ancients for guidance. Wilden have little communal lore to draw upon when making decisions or plans for the future. For this reason, wilden can be a threat when they enter a new area. A group of loggers might be mistaken for a despoiling force that must be destroyed, and a hunter who ventures into wilden territory risks death. The wilden are also vulnerable to charismatic, manipulative folk who would turn them to evil.

The best way to sway a wilden tribe away from an evil path is to convince the tribe's ancients to seek a new course of action. The ancients might require a test or another demonstration of skill, such as a quest to defeat a green dragon that menaces the forest. Although the quest might be deadly, its success ensures the friendship of the wilden.

## Encounters

As creatures that are new to the world, wilden have attracted a mixed bag of allies. Many of them fight alongside elves, eladrin, and gnomes to defend their Feywild homes. In some areas, the wilden fall in with fomorians, xivorts, and other evil creatures. These wilden become as villainous as their allies.

Most wilden tribes keep beasts for use in hunting, particularly drakes, spiders, and wolves.

## Wilden Destroyer

The warriors of a wilden tribe wield elaborately carved war clubs that reflect their past battles and deeds. Each time a destroyer survives a battle, it meditates upon the conflict while carving an image or a symbol of the battle into its weapon.

| **Wilden Destroyer** | **Level 2 Soldier** |
|---|---|
| Medium fey humanoid | XP 125 |
| **HP** 39; **Bloodied** 19 | **Initiative** +4 |
| **AC** 18, **Fortitude** 14, **Reflex** 13, **Will** 16 | **Perception** +4 |
| **Speed** 6 | Low-light vision |
| **Traits** | |
| **Furious Retribution** | |
| Whenever an enemy marked by the destroyer makes an attack that does not include the destroyer as a target, the destroyer gains a +4 bonus to attack rolls and damage rolls against the triggering enemy until the end of the destroyer's next turn. | |
| **Standard Actions** | |
| **Greatclub** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +7 vs. AC | |
| *Hit:* 2d4 + 4 damage. | |
| *Effect:* The target is marked until the end of the destroyer's next turn. | |
| **Handaxe** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +7 vs. AC | |
| *Hit:* 1d6 + 4 damage. | |
| **Triggered Actions** | |
| **Wrath of the Destroyer** ✦ **Encounter** | |
| *Trigger:* A bloodied enemy attacks the destroyer or one of the destroyer's allies adjacent to it. | |
| *Effect (Immediate Reaction):* The destroyer uses *greatclub* against the triggering enemy. If the attack hits, the target is also stunned until the end of the triggering enemy's next turn. | |
| **Skills** Athletics +9 | |
| **Str** 16 (+4) **Dex** 13 (+2) **Wis** 16 (+4) | |
| **Con** 15 (+3) **Int** 10 (+1) **Cha** 11 (+1) | |
| **Alignment** unaligned **Languages** Common, Elven | |
| **Equipment** hide armor, greatclub, 3 handaxes | |

### Wilden Destroyers in Combat

As the warriors of a tribe, wilden destroyers seek out the toughest enemies. They take pride in recording deeds of bravery and skill on their weapons. When multiple destroyers fight together, they prefer to split the enemies among them. To a destroyer, single

TOMÁS GIORELLO

combat is the best measure of one's skill. Destroyers gang up only against larger enemies or if they outnumber their foes.

## Wilden Hunter

Wilden are creatures of the woods, excellent hunters and trackers. Travelers can move through a forest for days without realizing that wilden hunters are on their trail.

| **Wilden Hunter** | **Level 2 Lurker** |
|---|---|
| Medium fey humanoid | XP 125 |
| **HP** 33; **Bloodied** 16 | **Initiative** +8 |
| **AC** 16, **Fortitude** 13, **Reflex** 15, **Will** 14 | **Perception** +9 |
| **Speed** 6 | Low-light vision |

**Traits**

**Camouflage**
The hunter can attempt a Stealth check to hide when it has cover or concealment instead of needing superior cover or total concealment.

**Sniper**
Whenever the hunter is hidden and misses with a ranged attack, it remains hidden.

**Hidden Shot**
The hunter deals 5 extra damage against enemies from which it is hidden.

**Standard Actions**

**Short Sword** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +7 vs. AC
*Hit:* 1d6 + 5 damage.

**Longbow** (weapon) ✦ **At-Will**
*Attack:* Ranged 20/40 (one creature); +7 vs. AC
*Hit:* 1d10 + 3 damage.

**Triggered Actions**

**Pursuit of the Hunter** ✦ **Encounter**
*Trigger:* An enemy ends its movement within 2 squares of the hunter.
*Effect (Immediate Reaction):* The hunter shifts 3 squares. Until the end of its next turn, the hunter's ranged attacks against the triggering enemy deal 5 extra damage and ignore cover and concealment.

**Skills** Athletics +6, Stealth +9

| | | |
|---|---|---|
| **Str** 11 (+1) | **Dex** 16 (+4) | **Wis** 17 (+4) |
| **Con** 15 (+3) | **Int** 11 (+1) | **Cha** 10 (+1) |

**Alignment** unaligned **Languages** Common, Elven
**Equipment** leather armor, short sword, longbow, 20 arrows

### Wilden Hunters in Combat

Hunters prefer to ambush foes. They scout out the best places to hide along a path and then wait there, sometimes for days at a time. A hunter is a consummate sharpshooter and resorts to its short sword only as a desperate measure.

## Wilden Ancient

The wilden refer to their shamans as ancients. According to wilden lore, an ancient can cast its mind back through the collective history of the Feywild and some regions of the world. When an ancient slips into one of these trances, activity in its tribe comes to a halt. The ancient invariably awakens with an important prophecy that guides the tribe's actions.

| **Wilden Ancient** | **Level 4 Artillery (Leader)** |
|---|---|
| Medium fey humanoid | XP 175 |
| **HP** 45; **Bloodied** 22 | **Initiative** +2 |
| **AC** 16, **Fortitude** 13, **Reflex** 12, **Will** 15 | **Perception** +11 |
| **Speed** 6 | Low-light vision |

**Standard Actions**

**Spear** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +9 vs. AC
*Hit:* 1d8 damage, and one ally adjacent to the target can make a melee basic attack against the target as a free action with a +4 bonus to the attack roll.

**Spectral Vine** (implement) ✦ **At-Will**
*Attack:* Ranged 20 (one creature); +9 vs. Reflex
*Hit:* 1d8 + 7 damage, and the ancient pulls the target 2 squares.

**Rumbling Earth** (implement) ✦ **Recharge** ⚄ ⚅
*Attack:* Area burst 1 within 10 (creatures in burst); +9 vs. Will
*Hit:* 1d6 + 4 damage, and the target is immobilized (save ends).

**Lightning Storm** (lightning, implement) ✦ **Encounter**
*Attack:* Area burst 1 within 20 (enemies in burst); +9 vs. Fortitude
*Hit:* 3d6 + 4 lightning damage.
*Miss:* Half damage.

**Minor Actions**

**Wisdom of the Ancient** ✦ **At-Will** (1/round)
*Effect:* One ally within 5 squares of the ancient gains a +2 power bonus to attack rolls until the end of the ally's next turn.

**Triggered Actions**

**Voyage of the Ancients** (teleportation) ✦ **Encounter**
*Trigger:* The ancient hits an enemy with a close or an area attack.
*Effect (Free Action):* The ancient teleports 3 squares. One enemy of the ancient's choice that was hit by the attack grants combat advantage until the end of the ancient's next turn.

**Skills** Arcana +9, History +9, Nature +11

| | | |
|---|---|---|
| **Str** 12 (+3) | **Dex** 10 (+2) | **Wis** 19 (+6) |
| **Con** 15 (+4) | **Int** 15 (+4) | **Cha** 14 (+4) |

**Alignment** unaligned **Languages** Common, Elven
**Equipment** hide armor, spear, totem

### Wilden Ancients in Combat

An ancient is almost always accompanied by several destroyers that serve as its bodyguards. An ancient fights near the front ranks, far enough from its enemies to use its ranged attacks and area attacks without fear of provoking opportunity attacks. As it fights, an ancient shouts words of encouragement, invoking prophecies of victory while also providing sound tactical advice.

# XIVORT

Xivorts are the warped cousins of gnomes. In ages past, they were captured by fomorians, tortured, and changed by fell magic. Over time, they adapted to their home in the Shadowdark by developing blue skin and saucerlike, leering yellow eyes.

In some ways, xivorts are pathetic creatures that can hardly be held accountable for their malice. Although some are still slaves to the fomorians, many have escaped to the Feywild and the world. They raid villages for food and treasure, seeking to dole out the same pain they endured at the fomorians' hands.

## Lore

**History DC 15:** After the xivorts escaped from the clutches of the fomorians, they slipped into the Shadowfell as part of a bargain they made with a cabal of hags. The journey exaggerated the xivorts' already twisted forms, leaving them with glowing eyes, blue skin, and dark hair.

The hags had little use for the xivorts. They freed them solely to deal a blow to the fomorians. Cast adrift into the world, the xivorts took to pillaging. They harbor hatred for larger creatures and particularly enjoy tormenting goliaths and half-orcs.

## Encounters

Xivorts have a natural affinity for creatures of the shadows, particularly dark ones. Evil gnomes and halflings recruit xivorts as spies and minions. Xivorts hate ogres and giants, which enslave the creatures and use them as laborers and cannon fodder.

Xivorts have the ability to speak with bats and rats, and they use these beasts as allies and beasts of burden. Some xivorts even ride the creatures into battle.

## Xivort Slasher

A slasher fights not for the thrill of victory or to defend its home, but simply to inflict pain. Each cut of its blade is like a stroke of an artist's brush, carefully guided to cause the most agony.

| **Xivort Slasher** | **Level 1 Skirmisher** |
|---|---|
| Small fey humanoid | XP 100 |
| **HP** 26; **Bloodied** 13 | **Initiative** +4 |
| **AC** 15, **Fortitude** 12, **Reflex** 13, **Will** 13 | **Perception** +1 |
| **Speed** 5 | Darkvision |
| **Standard Actions** | |
| **Short Sword** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +6 vs. AC | |
| *Hit:* 1d6 + 5 damage. | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +6 vs. AC | |
| *Hit:* 1d4 + 3 damage. | |
| **Triggered Actions** | |
| **Cunning Step** ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the slasher is hit by an attack. | |
| *Effect (Free Action):* The slasher shifts 1 square. | |
| **Shadow Step** (teleportation) ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the slasher hits it. | |
| *Effect (Immediate Reaction):* The slasher teleports to another square adjacent to the triggering enemy. | |
| **Skills** Bluff +5, Stealth +7 | |
| **Str** 13 (+1) **Dex** 14 (+2) **Wis** 12 (+1) | |
| **Con** 10 (+0) **Int** 10 (+0) **Cha** 11 (+0) | |
| **Alignment** evil **Languages** Common, Elven | |
| **Equipment** leather armor, short sword, 4 daggers | |

### Xivort Slashers in Combat

Xivort slashers prefer to fight in close quarters, such as in the confines of their burrows and lairs. They use *shadow step* to gain flanking against a foe. They love to gang up on one enemy using *cunning step*.

## Xivort Darter

Many xivorts learned the advantage of using small weapons that are easily hidden while fighting their fomorian masters decades ago. Instead of using large, bulky bows and crossbows, xivort darters hurl small, poisoned darts at foes.

| **Xivort Darter** | **Level 1 Artillery** |
|---|---|
| Small fey humanoid | XP 100 |
| **HP** 22; **Bloodied** 11 | **Initiative** +2 |
| **AC** 13, **Fortitude** 12, **Reflex** 13, **Will** 13 | **Perception** +1 |
| **Speed** 5 | Darkvision |
| **Standard Actions** | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +6 vs. AC | |
| *Hit:* 1d4 + 3 damage. | |
| **Dart** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5/10 (one creature); +6 vs. Reflex | |
| *Hit:* 1d4 + 3 damage. | |
| **Dart Volley** (weapon) ✦ **At-Will** | |
| *Effect:* The darter uses *dart* twice. | |
| **Dream Venom Dart** (poison, weapon) ✦ **Encounter** | |
| *Attack:* Ranged 5/10 (one creature); +6 vs. Reflex | |
| *Hit:* 1d4 + 3 damage, and the target is dazed (save ends). | |
| **Triggered Actions** | |
| **Darter's Step** (teleportation) ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the darter hits it. | |
| *Effect (Immediate Reaction):* The darter teleports 2 squares. | |
| **Str** 13 (+1) **Dex** 14 (+2) **Wis** 12 (+1) | |
| **Con** 10 (+0) **Int** 10 (+0) **Cha** 11 (+0) | |
| **Alignment** evil **Languages** Common, Elven | |
| **Equipment** dagger, 4 darts | |

### Xivort Darters in Combat

Darters focus on heavily armored warriors. Although their narrow darts rarely score a deadly blow, darters are skilled at hitting gaps between armor plates.

# Xivort Net Caster

In their battles against larger creatures, xivorts have learned a simple lesson: A larger foe brought to the ground is easier to overwhelm. The net caster's tactics reflect that lesson.

| **Xivort Net Caster** | **Level 1 Controller** |
|---|---|
| Small fey humanoid | XP 100 |
| **HP** 26; **Bloodied** 13 | **Initiative** +3 |
| **AC** 15, **Fortitude** 12, **Reflex** 13, **Will** 13 | **Perception** +1 |
| **Speed** 5 | Darkvision |
| **Traits** | |
| **Cruel Slasher** | |
| The net caster gains a +2 bonus to damage rolls against prone, immobilized, slowed, or restrained enemies. | |
| **Standard Actions** | |
| **Short Sword** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +6 vs. AC | |
| *Hit:* 1d6 + 5 damage. | |
| **Net** (weapon) ✦ **At-Will** | |
| *Attack:* Area burst 1 within 5 (creatures in burst); +5 vs. Reflex | |
| *Hit:* The target is restrained (save ends). | |
| **Minor Actions** | |
| **Bolas** (weapon) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +5 vs. Reflex | |
| *Hit:* The target falls prone and cannot stand up until the end of the net caster's next turn. | |
| **Triggered Actions** | |
| **Shadow Step** (teleportation) ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the net caster hits it. | |
| *Effect (Immediate Reaction):* The net caster teleports to another square adjacent to the triggering enemy. | |
| **Str** 13 (+1) **Dex** 16 (+3) **Wis** 12 (+1) | |
| **Con** 10 (+0) **Int** 10 (+0) **Cha** 11 (+0) | |
| **Alignment** evil **Languages** Common, Elven | |
| **Equipment** leather armor, short sword, 2 bolas, 4 nets | |

## Xivort Net Casters in Combat

A net caster's code of ethics reflects the xivorts' long years of slavery: A net caster believes that a weakened, helpless enemy is the best foe to attack. Net casters crowd around enemies downed by their bolas to put a quick end to them.

# Xivort Shadow Caller

Xivort spellcasters use a form of shadow magic. They gladly send parts of their souls to the Shadowfell in exchange for magic they can use to shield their warrens and slay their enemies.

## Xivort Shadow Callers in Combat

A shadow caller can animate and bind its enemies' shadows. *Shadow strangler* causes a foe's shadow to come to life and strangle its host. *Shadow phantoms* is a spell known only to xivorts. The eyes of the target's enemies glow with a horrid light that causes the target to shriek and cower.

STEVE ELLIS

| **Xivort Shadow Caller** | **Level 2 Artillery (Leader)** |
|---|---|
| Small fey humanoid | XP 125 |
| **HP** 32; **Bloodied** 16 | **Initiative** +2 |
| **AC** 14, **Fortitude** 14, **Reflex** 14, **Will** 13 | **Perception** +5 |
| **Speed** 5 | Darkvision |
| **Standard Actions** | |
| **Dagger** (weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +7 vs. AC | |
| *Hit:* 1d4 + 4 damage. | |
| **Shadow Phantoms** (fear, implement, psychic) ✦ **At-Will** | |
| *Attack:* Ranged 10 (one creature); +7 vs. Will, with a +1 bonus per creature adjacent to the target | |
| *Hit:* 1d8 + 4 psychic damage, and the target grants combat advantage until the end of the shadow caller's next turn. | |
| **Deathmark Bolt** (implement, necrotic) ✦ **Recharge** ⚅ ⚄ ⚃ | |
| *Attack:* Ranged 10 (one creature); +7 vs. Will | |
| *Hit:* 1d8 + 4 necrotic damage, and one of the shadow caller's allies adjacent to the target can make a melee basic attack against the target as a free action. | |
| **Shadow Strangler** (implement) ✦ **Encounter** | |
| *Attack:* Ranged 10 (one creature); +7 vs. Reflex | |
| *Hit:* The target is immobilized and takes ongoing 5 damage (save ends both). | |
| **Triggered Actions** | |
| **Shadow Step** (teleportation) ✦ **At-Will** | |
| *Trigger:* An enemy adjacent to the shadow caller hits it. | |
| *Effect (Immediate Reaction):* The shadow caller teleports to another square adjacent to the triggering enemy. | |
| **Str** 11 (+1) **Dex** 14 (+3) **Wis** 11 (+1) | |
| **Con** 14 (+3) **Int** 17 (+4) **Cha** 16 (+4) | |
| **Alignment** evil **Languages** Common, Elven | |
| **Equipment** dagger, wand | |

# Yeti

The mournful cries of a yeti carry a chill across the rugged land and evoke fear in the hearts of the mountain folk. A yeti stalks mountain passes with others of its kind. Some say its eerie howls are meant to send prey fleeing, giving the creatures a scent to follow. The wise people of the mountains say otherwise. They say the howls are a reminder to civilized folk that in the mountains, the yetis reign.

## Lore

**Nature DC 17:** Although yetis are a constant danger to those who inhabit the hills, people have adapted to their presence. A yeti's sense of smell is uncanny, and hunters have discovered that the yeti's greatest strength is also its weakness. Because yetis find the scent of rotting flesh abhorrent, they can be repelled from an area if it is festooned with spoiled meat.

To keep from being surprised by a yeti attack, mountain folk carefully monitor their herds of deer, goats, and bighorn sheep. When these creatures become agitated or seek refuge, it's a sure bet that yetis are near.

## Encounters

In the wild, yetis live only among their own kind. However, captive yetis might be found fighting in an arena among a menagerie of beasts.

Army commanders sometimes capture groups of wild yetis to release upon enemy encampments. Wicked feudal lords have learned to manipulate the environment by diminishing the wild game in an area so that the hungry yetis move into neighboring lands, ripening them for conquest. Other evil humanoids, such as orcs, hobgoblins, gnolls, and bugbears, keep yetis captive. They use the beasts to dispose of disloyal subordinates and prisoners.

## Yeti Hunter

The people of the high mountains travel in armed groups, because a yeti can smell flesh fifteen miles away. A yeti hunter is aware when its prey struggles up an icy incline, picks a careful path around a drop-off, or takes shelter in an abandoned mining camp. It moves swiftly and effortlessly over ice and stone, whooping and howling as it closes in.

| **Yeti Hunter** | **Level 3 Soldier** |
|---|---|
| Medium natural beast | XP 150 |
| **HP** 49; **Bloodied** 24 | **Initiative** +6 |
| **AC** 19, **Fortitude** 17, **Reflex** 15, **Will** 13 | **Perception** +8 |
| **Speed** 6 (ice walk) | Low-light vision |
| **Resist** 5 cold | |
| **Standard Actions** | |
| **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +8 vs. AC | |
| *Hit:* 1d6 + 2 damage. | |
| **Twin Claw Grab** ✦ **At-Will** | |
| *Effect:* The hunter uses *claw* twice. If both attacks hit the same target, the hunter grabs the target. | |
| **Howl of Challenge** (psychic) ✦ **At-Will** | |
| *Attack:* Ranged 5 (one creature); +8 vs. Fortitude | |
| *Hit:* 1d6 + 2 psychic damage, and the target is marked until the end of the hunter's next turn. | |
| **Call for Blood** (psychic) ✦ **Recharge** when first bloodied | |
| *Attack:* Close burst 3 (enemies in burst); +6 vs. Will | |
| *Hit:* 2d6 + 2 psychic damage, and the target is marked (save ends). | |
| **Fearsome Howl** (fear, thunder) ✦ **Encounter** | |
| *Attack:* Close blast 4 (enemies in blast); +6 vs. Will | |
| *Hit:* 1d6 + 3 thunder damage, and the hunter pushes the target 3 squares. | |
| **Skills** Intimidate +7 | |
| **Str** 18 (+5) **Dex** 17 (+4) **Wis** 15 (+3) | |
| **Con** 17 (+4) **Int** 9 (+0) **Cha** 13 (+2) | |
| **Alignment** unaligned **Languages** – | |

### Yeti Hunters in Combat

A yeti hunter's howls echo from peak to peak, making it impossible for listeners to tell the creature's direction or proximity. The travelers flee in terror over the treacherous ground until one falls to a twisted ankle. Most of the travelers choose to leave their injured companion behind. A few virtuous

JASON A. ENGLE

members might stay to fight—and perhaps to die. It matters little to the yetis; cowards and warriors taste the same. The hunt ends quickly. A chorus of euphoric howls signals the outcome of the fight. Soon, the red-tinged snow and white bones disappear under a coat of fresh snow, erasing the evidence of those who stayed to fight the yetis.

## Yeti Howler

The mountain folk tell stories of wailing ghosts—the spirits of loved ones tragically killed in avalanches and blizzards. They believe that yetis are embodiments of angry ghosts. The creatures' howls tell of the sad injustice of their premature deaths.

Before an avalanche, a blizzard, or a deadly frost, ghastly shrieks emanate from the mountaintops. Without fail, the yetis sweep down, riding the icy wind to hunt the low mountains. Some believe the howls to be a warning, a prescient call from a departed companion. Others say they are merely the wails of ravenous monsters.

| **Yeti Howler** | **Level 4 Controller** |
|---|---|
| Medium natural beast | XP 175 |
| **HP** 58; **Bloodied** 29 | **Initiative** +5 |
| **AC** 18, **Fortitude** 16, **Reflex** 15, **Will** 16 | **Perception** +11 |
| **Speed** 6 (ice walk) | Low-light vision |
| **Resist** 5 cold | |
| **Traits** | |
| **Chilling Wail** ✦ **Aura** 3 | |
| Any enemy that ends its turn within the aura takes 5 psychic damage and takes a -2 penalty to defenses until the end of its next turn. | |
| **Standard Actions** | |
| **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +9 vs. AC | |
| *Hit:* 1d6 + 5 damage. | |
| **Hurl Boulder** ✦ **Recharge** ⚄ ⚅ | |
| *Attack:* Area burst 1 within 5 (creatures in burst); +9 vs. AC | |
| *Hit:* 1d10 + 3 damage. | |
| **Fearsome Howl** (fear, thunder) ✦ **Encounter** | |
| *Attack:* Close blast 4 (enemies in blast); +7 vs. Will | |
| *Hit:* 1d8 + 4 thunder damage, and the yeti pushes the target 3 squares. | |
| **Piercing Shriek** (thunder) ✦ **Encounter** | |
| *Attack:* Close burst 3 (enemies in burst); +7 vs. Will | |
| *Hit:* 1d10 + 5 damage, and if the target ends its next turn within 5 squares of the yeti, it takes 5 thunder damage. | |
| **Skills** Intimidate +9 | |
| **Str** 18 (+6) **Dex** 16 (+5) **Wis** 18 (+6) | |
| **Con** 18 (+6) **Int** 10 (+2) **Cha** 15 (+4) | |
| **Alignment** unaligned **Languages** – | |

### Yeti Howlers in Combat

The wail of mountain winds carries with it the terrorizing, dissonant call of yeti howlers. At the noise, cats hiss and arch their backs, dogs whine and pace, and even a stalwart warrior feels his or her hair standing on end.

## Yeti Rampager

The prospect of gold and silver sends miners to the hills, filling them with dreams of wealth. From nothing, a mining town arises; its founders seek to build a life of luxury and privilege upon a rugged, inhospitable foundation. The prospectors might be able to endure despite collapsing mines, lethal gas, avalanches, and blizzards—but they are sorely tested by the one force of nature that actively seeks them out. A yeti rampager is a horned creature of fang, fur, claw, and terror, and it delivers death to those who venture into its domain.

| **Yeti Rampager** | **Level 5 Skirmisher** |
|---|---|
| Medium natural beast | XP 200 |
| **HP** 67; **Bloodied** 33 | **Initiative** +7 |
| **AC** 19, **Fortitude** 19, **Reflex** 17, **Will** 15 | **Perception** +11 |
| **Speed** 7 (ice walk) | Low-light vision |
| **Resist** 5 cold | |
| **Traits** | |
| **Furious Charger** | |
| The rampager deals 5 extra damage on charge attacks. | |
| **Standard Actions** | |
| **Claw** ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +10 vs. AC | |
| *Hit:* 1d6 + 6 damage. | |
| **Battle Howl** (fear, psychic) ✦ **At-Will** | |
| *Attack:* Ranged 7 (one creature); +8 vs. Will | |
| *Hit:* 1d6 + 4 psychic damage, and the rampager charges the target. | |
| **Trample** ✦ **Encounter** | |
| *Effect:* The rampager shifts its speed and can enter enemies' spaces during the shift. Each time the rampager enters an enemy's space for the first time during the shift, it makes the following attack against that enemy. | |
| *Attack:* Melee 0; +8 vs. Reflex | |
| *Hit:* 1d6 + 4 damage, and the enemy falls prone. | |
| **Fearsome Howl** (fear, thunder) ✦ **Encounter** | |
| *Attack:* Close blast 4 (enemies in blast); +8 vs. Will | |
| *Hit:* 1d10 + 6 thunder damage, and the rampager pushes the target 3 squares. | |
| **Str** 19 (+6) **Dex** 17 (+5) **Wis** 19 (+6) | |
| **Con** 19 (+6) **Int** 11 (+2) **Cha** 16 (+5) | |
| **Alignment** unaligned **Languages** – | |

### Yeti Rampagers in Combat

When food is scarce, not even the strongest defenses can deter yeti rampagers. They break down gates and tear apart buildings, moving quickly from meal to meal, never staying long before darting away in search of more fresh meat.

# YUAN-TI

Through dark ruins, yuan-ti slither and slide, twining themselves around ancient statues of their dark god, Zehir. They might lurk beneath the floorboards of a tavern, in the sewers under the streets, and in the echoing halls of an abandoned manse. Their plots are devious and expansive. Yuan-ti send assassins to kill enemies of the faith, equipping the rogues with venom from their serpentine bodies. They act from the darkness, corrupting or killing anyone who stands in their way.

Among Zehir's followers are snaketongue cultists, who pay homage to Zehir by seeking to remake themselves in the dark god's image. As Zehir's followers spread like poison through the veins of the world, the god plots and plans in the Astral Sea. The mightiest of the yuan-ti, those who have proven themselves to be the most clever and the most capable, are privy to Zehir's divine machinations. While most of his followers seek to topple political structures of the world, Zehir and his most trusted devotees have a greater objective: absolute authority over the cosmos.

Zehir believes that only a single, powerful ruler can check the primordials' return to power. Other deities are content to let Zehir spread havoc among their enemies. Still, they keep an eye on him, lest his plans grow to threaten their own grips on power.

## Lore

**Nature DC 28:** As a baby snake devours small prey and grows in strength and size, so too does a yuan-ti start with small victories, feeding and nurturing itself to increase the overall might of its race. The greatest yuan-ti exhibit strength, cunning, and adaptability, and those that attain great victories in the name of Zehir receive blessings from the dark god.

A cult of Zehir works to spread the will of its god surreptitiously in communities both large and small. People living in a settlement might not notice the presence of a cult until it has worked its way into a position to strike. Then, using either force or the area's local politics, the cult coerces a community's citizens into converting. Once the yuan-ti gain control, they gather useful resources such as weapons, food, and magic items, and they send the goods to other sects or even through portals to Zehir's realm. The objective of these cultists is to spread Zehir's control over the world by fostering burgeoning groups of worshipers.

JIM NELSON

## Encounters

Although yuan-ti believe that their race knows no equal, they wisely use any allies they can obtain. Medusas and nagas hold a place of honor among yuan-ti because of their serpentine physiques. As a means to an end, yuan-ti might join rakshasas or jackalweres for short times. Monsters of more rudimentary intelligence, such as snakes, behirs, and cockatrices, are welcome pets and guardians. Creatures that are deaf to the dark god's persuasion or blind to the merits of allying with yuan-ti become either hirelings or food for hatchlings.

## Coil of Zehir

More snake than humanoid, a coil of Zehir uses its arms and legs infrequently, preferring to slither rather than walk. Other yuan-ti admire a coil of Zehir's grace and form.

| Coil of Zehir | Level 26 Controller |
|---|---|
| Large magical beast (reptile) | XP 9,000 |
| **HP** 235; **Bloodied** 117 | **Initiative** +17 |
| **AC** 39, **Fortitude** 38, **Reflex** 39, **Will** 38 | **Perception** +15 |
| **Speed** 7, climb 7 | |
| **Resist** 15 poison | |
| **Standard Actions** | |
| **Slam ✦ At-Will** | |
| *Attack:* Melee 3 (one creature); +31 vs. AC | |
| *Hit:* 3d10 + 10 damage, and the coil of Zehir pulls the target 2 squares and grabs it. The coil of Zehir can have only one creature grabbed at a time. | |
| **Crushing Coils ✦ At-Will** | |
| *Attack:* Melee 3 (one creature grabbed by the coil of Zehir); +31 vs. Fortitude | |
| *Hit:* 40 damage, and the target is dazed until the end of the coil of Zehir's next turn. | |
| **Minor Actions** | |
| **Tail Sweep ✦ Recharge** ⚅ | |
| *Attack:* Close burst 3 (enemies in burst); +31 vs. Reflex | |
| *Hit:* The target falls prone. | |
| **Str** 22 (+19) **Dex** 19 (+17) **Wis** 15 (+15) | |
| **Con** 19 (+17) **Int** 12 (+14) **Cha** 10 (+13) | |
| **Alignment** evil **Languages** Draconic | |

## Coils of Zehir in Combat

A coil of Zehir relishes twining its body around a foe and squeezing the life out of it. As the pressure increases, the last sensation the prey feels is the darting tongue of the coil of Zehir.

# Yuan-ti Abomination Berserker

Zehir gifted his berserkers with muscles instead of minds. A berserker of Zehir understands combat and little else. It knows not to attack other yuan-ti and cultists. Other yuan-ti treat a berserker gently, as they would treat a child—a dangerous, rabid child.

| Yuan-ti Abomination Berserker | Level 26 Brute |
|---|---|
| Large natural magical beast (reptile) | XP 9,000 |
| **HP** 293; **Bloodied** 146 | **Initiative** +15 |
| **AC** 37, **Fortitude** 38, **Reflex** 37, **Will** 36 | **Perception** +16 |
| **Speed** 7 | |
| **Resist** 15 poison | |
| **Standard Actions** | |
| **Slam ✦ At-Will** | |
| *Attack:* Melee 2 (one creature); +31 vs. AC | |
| *Hit:* 4d10 + 15 damage. | |
| **Roundhouse Slam ✦ Recharge** ⚅ | |
| *Effect:* The berserker uses *slam* against each enemy adjacent to it. | |
| **Triggered Actions** | |
| **Berserk Attack ✦ At-Will** | |
| *Requirement:* The berserker must be bloodied. | |
| *Trigger:* An attack hits the berserker. | |
| *Effect (Immediate Reaction):* The berserker uses *slam*. | |
| **Str** 28 (+22) **Dex** 15 (+15) **Wis** 17 (+16) | |
| **Con** 23 (+19) **Int** 7 (+11) **Cha** 10 (+13) | |
| **Alignment** evil **Languages** Draconic | |

## Yuan-ti Abomination Berserkers in Combat

Rampaging across the battlefield with little regard for tactics, berserkers strike at whatever enemy is nearest or obvious. They attack foes that mark them, more from a primitive impulse than because of good sense.

# Yuan-ti Malison Guard

Yuan-ti battle plans almost always rely on yuan-ti malison guards. Though a malison guard must deal with the stigma of appearing more humanoid than others of its kinfolk, it carries itself with pride and confidence.

| Yuan-ti Malison Guard | Level 27 Soldier (Leader) |
|---|---|
| Medium natural humanoid (reptile) | XP 11,000 |
| **HP** 242; **Bloodied** 121 | **Initiative** +21 |
| **AC** 42, **Fortitude** 39, **Reflex** 38, **Will** 37 | **Perception** +15 |
| **Speed** 7 | |
| **Resist** 15 poison | |
| **Traits** | |
| **Overlapping Scales ✦ Aura** 1 | |
| Allies within the aura gain a +2 power bonus to AC. | |
| **Standard Actions** | |
| **Scimitar** (poison, weapon) **✦ At-Will** | |
| *Attack:* Melee 1 (one creature); +32 vs. AC | |
| *Hit:* 2d8 + 11 damage, and the target is marked and takes ongoing 15 poison damage (save ends both). | |
| **Longbow** (poison, weapon) **✦ At-Will** | |
| *Attack:* Ranged 20/40 (one creature); +32 vs. AC | |
| *Hit:* 2d10 + 4 damage, and ongoing 15 poison damage (save ends). | |
| **Skills** Athletics +23, Endurance +22 | |
| **Str** 21 (+18) **Dex** 22 (+19) **Wis** 15 (+15) | |
| **Con** 18 (+17) **Int** 10 (+13) **Cha** 19 (+17) | |
| **Alignment** evil **Languages** Draconic | |
| **Equipment** scimitar, longbow, 20 arrows | |

## Yuan-ti Malison Guards in Combat

Teamwork is the hallmark of malison guards. With fervor for its dark god coursing through its veins, a guard performs a sinuous dance of sword and scale, defending allies and threatening foes.

# Yuan-ti Abomination Spitter

These creatures are also known as cobra strikers because of their flaring hoods and dangerous venom. A spitter's exposure to powerful divine magic gives its poison a virulence far exceeding that of a normal serpent.

| Yuan-ti Abomination Spitter | Level 27 Artillery |
|---|---|
| Large natural magical beast (reptile) | XP 11,000 |
| **HP** 186; **Bloodied** 93 | **Initiative** +18 |
| **AC** 39, **Fortitude** 39, **Reflex** 39, **Will** 37 | **Perception** +22 |
| **Speed** 7, climb 7 | |
| **Resist** 15 poison | |
| **Standard Actions** | |
| ⊕ **Bite** (poison) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +32 vs. AC | |
| *Hit:* 2d6 + 8 damage, and ongoing 15 poison damage (save ends). | |
| **Spit Venom** (poison) ✦ **At-Will** | |
| *Attack:* Ranged 20 (one creature); +32 vs. Reflex | |
| *Hit:* 3d6 + 9 poison damage, and ongoing 15 poison damage (save ends). | |
| **Venom Spray** (poison) ✦ **Recharge** ⚅ ⚄ ⚃ | |
| *Attack:* Close burst 5 (enemies in burst); +32 vs. Fortitude | |
| *Hit:* 2d8 + 5 poison damage, and the target is dazed (save ends). | |
| *Miss:* Half damage. | |
| **Triggered Actions** | |
| **Cobra Hood** ✦ **At-Will** | |
| *Trigger:* An attack hits the spitter. | |
| *Effect (Immediate Reaction):* The spitter gains a +4 bonus to AC until the end of its next turn. | |
| **Str** 22 (+19) **Dex** 20 (+18) **Wis** 19 (+17) | |
| **Con** 18 (+17) **Int** 7 (+11) **Cha** 10 (+13) | |
| **Alignment** evil **Languages** Draconic | |

## Yuan-ti Abomination Spitters in Combat

Nothing pleases a spitter more than to punish those who resist Zehir. It considers the poison coursing through it to be divine, so it seeks to unleash the venom upon nonbelievers. Enemies affected by the poison feel a slight prickle and then a sudden jolt, as if a million tiny shards of ice were moving throughout the body. Spitters call this moment "seeking the dark god's punishment."

# Yuan-ti Malison Blessed

Members of Zehir's priesthood aspire to become his blessed. A blessed receives power from the deity to further Zehir's ambition across the planes.

| Yuan-ti Malison Blessed | Level 28 Controller (Leader) |
|---|---|
| Medium natural humanoid (reptile) | XP 13,000 |
| **HP** 250; **Bloodied** 125 | **Initiative** +23 |
| **AC** 39, **Fortitude** 36, **Reflex** 39, **Will** 38 | **Perception** +27 |
| **Speed** 7 | |
| **Resist** 15 poison | |
| **Traits** | |
| ☼ **Zehir's Favor** ✦ **Aura** 3 | |
| Any ally within the aura can reroll one failed power recharge roll at the start of its turn. | |
| ☼ **Zehir's Agony** (poison) ✦ **Aura** 5 | |
| Any enemy that starts its turn within the aura takes 15 poison damage. | |
| **Slither Away** | |
| While the blessed is bloodied, it gains a +2 bonus to speed and a +5 bonus to all defenses. | |
| **Standard Actions** | |
| ⊕ **Scimitar** (poison, weapon) ✦ **At-Will** | |
| *Attack:* Melee 1 (one creature); +33 vs. AC | |
| *Hit:* 3d8 + 8 damage, and the target loses poison resistance and takes a -2 penalty to saving throws against poison effects (save ends both). | |
| **Minor Actions** | |
| **Zehir's Command** ✦ **Recharge** ⚃ | |
| *Effect:* One or two allies within 5 squares of the blessed can each either make a melee basic attack as a free action or shift its speed as a free action. | |
| **Triggered Actions** | |
| **Shifting Feet** ✦ **At-Will** | |
| *Trigger:* An enemy within 5 squares of the blessed shifts. | |
| *Effect (Immediate Reaction):* The blessed slides the triggering enemy 2 squares. | |
| **Skills** Athletics +23, Religion +25 | |
| **Str** 18 (+18) **Dex** 28 (+23) **Wis** 26 (+22) | |
| **Con** 18 (+18) **Int** 22 (+20) **Cha** 21 (+19) | |
| **Alignment** evil **Languages** Draconic | |
| **Equipment** scimitar | |

## Yuan-ti Malison Blesseds in Combat

Honored by its deity with a gift that enables it to instill fervor in its allies, a blessed collaborates with malison guards to capture and control yuan-ti anathemas, which they imprison and force into service.

# Yuan-ti Malison Assassin

Zehir has the patience of a god, but when his plans are foiled, that patience is replaced by unbridled rage. He tasks his elite assassins with tracking and slaying those who defy his power. These warriors believe they are reincarnated repeatedly and are fated to serve their lord for eternity.

JIM NELSON

| Yuan-ti Malison Assassin | Level 28 Lurker |
|---|---|
| Medium natural humanoid, yuan-ti (reptile) | XP, 13,000 |
| **HP** 194; **Bloodied** 97 | **Initiative** +28 |
| **AC** 41, **Fortitude** 39, **Reflex** 40, **Will** 40 | **Perception** +26 |
| **Speed** 8 | |
| **Resist** 15 poison | |

**Standard Actions**

**Longsword** (poison, weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +33 vs. AC
*Hit:* 2d8 + 9 damage, and the target is blinded until the end of the assassin's next turn.

**Death Strike** (poison) ✦ **At-Will**
*Attack:* Melee 1 (one creature that cannot see the assassin); +33 vs. AC
*Hit:* 4d8 + 18 damage, and the target takes ongoing 15 damage and a -2 penalty to saving throws (save ends both).
*First Failed Saving Throw:* The ongoing damage increases by 5, and the penalty to saving throws worsens by 1.

**Triggered Actions**

**Shield of Zehir** ✦ **At-Will**
*Trigger:* A ranged or a melee attack hits the assassin.
*Effect (Immediate Reaction):* The triggering attack also hits a blinded enemy adjacent to the assassin of the assassin's choice.

**Skills** Athletics +23, Bluff +22, Stealth +29

| | | |
|---|---|---|
| **Str** 19 (+18) | **Dex** 30 (+24) | **Wis** 24 (+21) |
| **Con** 20 (+19) | **Int** 19 (+18) | **Cha** 17 (+17) |

**Alignment** evil **Languages** Common, Draconic
**Equipment** longsword

## Yuan-ti Malison Assassins in Combat

Malison assassins strike from ambush, and their brazen attacks draw the ire of the gods whose domains they enter. To gain access to astral dominions, an assassin or group of assassins adopts an innocent disguise, such as a traveling monk or a merchant and his retinue. The assassins then act with deadly speed and flee before they can be brought to justice.

# Yuan-ti Malison Stalker

The stalkers are Zehir's instrument of vengeance, favored warriors that pursue enemies of the yuan-ti. They hunt those who have defiled yuan-ti holy places, stolen sacred artifacts, or hurt yuan-ti young or adolescents.

| Yuan-ti Malison Stalker | Level 28 Skirmisher |
|---|---|
| Medium natural humanoid (reptile) | XP 13,000 |
| **HP** 254; **Bloodied** 127 | **Initiative** +24 |
| **AC** 42, **Fortitude** 40, **Reflex** 40, **Will** 41 | **Perception** +21 |
| **Speed** 8 | |
| **Resist** 15 poison | |

**Traits**

**Doom of Zehir**
If the only creature adjacent to the stalker is the target of its melee attack, the stalker rolls the attack twice and takes the higher of the two results.

**Standard Actions**

**Greataxe** (weapon) ✦ **At-Will**
*Attack:* Melee 1 (one creature); +33 vs. AC
*Hit:* 3d12 + 17 damage.

**Minor Actions**

**Serpent's Dance** (teleportation) ✦ **At-Will**
*Effect:* The stalker teleports 3 squares.

**Skills** Athletics +23, Religion +21, Stealth +27

| | | |
|---|---|---|
| **Str** 19 (+18) | **Dex** 27 (+22) | **Wis** 24 (+21) |
| **Con** 22 (+20) | **Int** 14 (+16) | **Cha** 15 (+16) |

**Alignment** evil **Languages** Common, Draconic
**Equipment** greataxe

## Yuan-ti Malison Stalkers in Combat

Stalkers use stealth and speed to close in on their targets. They prefer to fight one-on-one, placing *doom of Zehir* upon their prey. A stalker typically uses *serpent's dance* to pursue a foe, but it also employs that power to withdraw into hiding and thereby gain a tactical advantage.

# Molt of Zehir

The sloughed skin of a powerful yuan-ti attracts hordes of snakes that fill the cast-off form, animating it and creating a molt of Zehir.

| Molt of Zehir | Level 26 Minion Skirmisher |
|---|---|
| Medium natural beast (reptile) | XP 2,250 |
| **HP** 1; a missed attack never damages a minion. | **Initiative** +21 |
| **AC** 39, **Fortitude** 38, **Reflex** 39, **Will** 37 | **Perception** +16 |
| **Speed** 7 | |
| **Resist** 15 poison | |

**Standard Actions**

**Bite** ✦ **At-Will**
*Attack:* Melee 1 (one creature); +31 vs. AC
*Hit:* 17 damage.

**Triggered Actions**

**Horde of Snakes** (poison)
*Trigger:* The molt drops to 0 hit points.
*Attack (No Action):* Close burst 1 (enemies in burst); +30 vs. Fortitude
*Hit:* 10 damage, and ongoing 15 poison damage (save ends).

| | | |
|---|---|---|
| **Str** 22 (+19) | **Dex** 22 (+19) | **Wis** 17 (+16) |
| **Con** 17 (+16) | **Int** 3 (+9) | **Cha** 10 (+13) |

**Alignment** evil **Languages** –

## Molts of Zehir in Combat

The surface of a molt's skin isn't still. Instead, it ripples because of the snakes that slither within the former yuan-ti's skin. Some who have watched the final moments of a molt of Zehir claim that seeing the form collapse into a writhing pile of snakes is worse than being bitten by the mass that pours forth.

# GLOSSARY

This glossary defines some of the game terms used in this book, as well as terms related to them. The material here assumes you're familiar with Chapter 5 (Skills) and Chapter 9 (Combat) in the *Player's Handbook*.

This information supersedes previous sources and incorporates clarifications and new rules.

**aberrant [origin]:** Aberrant creatures are native to or shaped by the Far Realm.

**acid [keyword]:** A damage type. See also **damage type**.

**air [keyword]:** An air creature is strongly connected to the element of air.

**angel [keyword]:** Angels are immortal creatures native to the Astral Sea. They don't need to breathe, eat, or sleep.

**animate [type]:** Animate creatures are given life through magic. They don't need to breathe, eat, or sleep.

**aquatic [keyword]:** Aquatic creatures can breathe underwater. In aquatic combat, an aquatic creature gains a +2 bonus to attack rolls against nonaquatic creatures. See also "Aquatic Combat," *Dungeon Master's Guide*, page 45.

**beast [type]:** Beasts are either ordinary animals or creatures akin to them. They behave instinctively.

**blind [keyword]:** A blind creature relies on special senses, such as blindsight or tremorsense, to see within a specified range, beyond which the creature can't see. The creature is immune to gaze attacks and cannot be blinded.

**blinded [condition]:** While a creature is blinded, it can't see, which means its targets have total concealment against it, and it takes a –10 penalty to Perception checks. It also grants combat advantage and can't flank.

**blindsight:** A creature that has blindsight can clearly see creatures or objects within a specified range and within line of effect, even if they are invisible or obscured. The creature otherwise relies on its normal vision.

**blocking terrain:** A type of terrain that blocks squares, often by filling them. *Examples:* Walls, doors, and large pillars. Blocking terrain provides cover, interferes with movement around it, and blocks line of effect. It also blocks line of sight, unless it's transparent. See also "Terrain and Obstacles," *Player's Handbook*, page 283.

**burrow speed:** A creature that has a burrow speed can move through loose earth at a specified speed, and the creature can move through solid stone at half that speed. The creature can't shift or charge while burrowing.

**charm [keyword]:** An effect type. A charm power controls a creature's actions in some way. This control is often represented by the creature being forced to attack its ally or being subjected to the dominated condition.

**climb speed:** A creature that has a climb speed moves on vertical surfaces at that speed without making Athletics checks to climb. While climbing, the creature ignores difficult terrain, and climbing doesn't cause it to grant combat advantage.

**clumsy:** Some creatures are clumsy while using a specific movement mode (noted next to that mode in the creature's "Speed" entry), and others are clumsy while on the ground (noted next to the creature's speed). While a creature is clumsy, it takes a –4 penalty to attack rolls and all defenses.

**cold [keyword]:** A damage type. A creature that has this keyword is at least partially composed of ice. See also **damage type**.

**construct [keyword]:** Constructs are not living creatures, so effects that specifically target living creatures do not work against them. They don't need to breathe, eat, or sleep.

**damage type:** Many attacks deal a specific type of damage. Each damage type has a keyword associated with it. If a power has such a keyword, the power deals that type of damage (the exception is poison, the keyword for which refers to damage, a nondamaging effect, or both).

**darkvision:** A creature that has darkvision can see in dim light and darkness without penalty. This means the creature ignores the –2 penalty to attack rolls when it attacks a target that has concealment as a result of dim light and the –5 penalty to attack rolls when it attacks a target that has total concealment as a result of darkness.

**dazed [condition]:** While a creature is dazed, it can take either a standard, a move, or a minor action on its turn. It can still take free actions, but it can't take immediate or opportunity actions. It also grants combat advantage and can't flank.

**deafened [condition]:** While a creature is deafened, it can't hear, and it takes a –10 penalty to Perception checks.

**demon [keyword]:** Demons are chaotic evil elemental creatures native to the Abyss. They don't need to sleep.

**devil [keyword]:** Devils are evil immortal creatures native to the Nine Hells. They don't need to sleep.

**disease [keyword]:** Some powers expose a creature to a disease. If a creature is exposed to a disease one or more times during an encounter, it makes one saving throw at the end of the encounter to determine if it contracts that disease. If the saving throw fails, the creature is infected. See also "Disease," *Dungeon Master's Guide*, page 49.

**dominated [condition]:** While a creature is dominated, it can't take actions. Instead, the dominator chooses a single action for the creature to take on its turn: a standard, a move, or a minor action. The only powers the dominator can make the creature use are at-will powers. The creature also grants combat advantage and can't flank.

**dragon [keyword]:** Dragons are reptilian creatures. Most of them have wings as well as a breath weapon.

**earth [keyword]:** An earth creature is strongly connected to the element of earth.

**earth walk:** A type of terrain walk. A creature that has earth walk ignores difficult terrain that is rubble, uneven stone, or an earthen construction.

**elemental [origin]:** Elemental creatures are native to the Elemental Chaos.

**extra damage:** Many powers and other effects grant the ability to deal extra damage. Extra damage is always in addition to other damage. This means an attack that deals no damage, such as the wizard power *sleep*, can't deal extra damage.

**fear [keyword]:** An effect type. A fear power inspires fright. This fright is often represented by a creature being forced to move, taking a penalty to attack rolls, or granting combat advantage.

**fey [origin]:** Fey creatures are native to the Feywild.

**fire [keyword]:** A damage type. A creature that has this keyword is strongly connected to the element of fire. See also **damage type**.

**fly speed:** A creature that has a fly speed can fly a number of squares up to that speed as a move action. To remain in the air, the creature must move at least 2 squares during its turn, or it crashes at the end of its turn. While flying, the creature can't shift or make opportunity attacks, and it crashes if it's knocked prone. See also "Flying," *Dungeon Master's Guide*, page 47.

**force [keyword]:** A damage type. See also **damage type**.

**forest walk:** A type of terrain walk. A creature that has forest walk ignores difficult terrain that is part of a tree, underbrush, or some other forest growth.

**gaze [keyword]:** A kind of attack. Blind or blinded creatures are immune to gaze attacks, and a creature cannot make a gaze attack while blinded.

**giant [keyword]:** Giants are Large or larger humanoid creatures.

**grabbed:** See "Escape" and "Grab," *Player's Handbook*, pages 288 and 290.

**half damage:** When a power or another effect deals half damage, apply all modifiers to the damage, including resistances and vulnerabilities, and then divide the damage in half.

**healing [keyword]:** An effect type. A healing power restores hit points, usually either by restoring hit points immediately or by granting regeneration.

**heavily obscured:** A measure of visibility and a type of obscured terrain. A creature has total concealment when it is in a heavily obscured square, although it has only concealment against an enemy adjacent to it. *Examples:* Heavy fog, smoke, or foliage. Contrast with **lightly obscured** and **totally obscured**.

**helpless [condition]:** While a creature is helpless, it grants combat advantage and can be the target of a coup de grace (*Player's Handbook*, page 288).

**hidden:** When a creature is hidden from an enemy, the creature is silent and invisible to that enemy. A creature normally uses the Stealth skill to become hidden. See also **invisible**.

**hindering terrain:** A type of terrain that hinders creatures, usually by damaging them. *Examples:* Pits, lava, and deep water. A creature can make a saving throw when it is pulled, pushed, slid, or teleported into hindering terrain. See also "Falling," *Player's Handbook*, page 284, and **teleportation**.

**homunculus [keyword]:** Homunculi are animate constructs tasked with guarding a creature, an area, or an object.

**hover:** If a creature can hover, it can remain in the air without moving during its turn. It can also shift and make opportunity attacks while flying. See also **fly speed**.

**humanoid [type]:** Humanoid creatures vary greatly in how much they resemble humans. Most are bipedal.

**ice walk:** A type of terrain walk. A creature that has ice walk ignores difficult terrain that is ice or snow.

**illusion [keyword]:** An effect type. An illusion power deceives the mind or the senses. Illusions often obstruct vision or redirect attacks. If an illusion power deals damage, the damage itself is not an illusion.

**immobilized [condition]:** When a creature is immobilized, it can't move, unless it teleports or is pulled, pushed, or slid.

**immortal [origin]:** Immortal creatures are native to the Astral Sea. Unless they are killed, they live forever.

**implement [keyword]:** An accessory type. This keyword identifies a power that can be used through an implement. A monster's statistics block notes the implements it uses. See also "Adding Equipment," *Dungeon Master's Guide*, page 174.

**insubstantial:** When a creature is insubstantial, it takes half damage from any damage source, including ongoing damage. See also **half damage**.

**invisible:** If a creature is invisible, it has several advantages against creatures that can't see it: It has total concealment against them, it does not provoke opportunity attacks from them, and they grant combat advantage to it.

**lightly obscured:** A measure of visibility and a type of obscured terrain. A creature has concealment when it is in a lightly obscured square. *Examples:* Dim light, foliage, fog, smoke, and heavy rain or falling snow. Contrast with **heavily obscured** and **totally obscured**.

**lightning [keyword]:** A damage type. See also **damage type**.

**living construct [keyword]:** Unlike other constructs, living constructs are living creatures.

**low-light vision:** A creature that has low-light vision can see in dim light without penalty. This means the creature ignores the –2 penalty to attack rolls when it attacks a target that has concealment as a result of dim light.

**magical beast [type]:** Magical beasts resemble beasts but often behave like people.

**marked [condition]:** When a creature marks a target, that target takes a –2 penalty to attack rolls for any attack that doesn't include the creature as a target. A creature can be subjected to only one mark at a time, and a new mark supersedes an old one.

**minion:** A minion is destroyed when it takes any damage. If a minion is missed by an attack that deals damage on a miss, the minion doesn't take that damage.

**mount [keyword]:** A creature that has the mount keyword has at least one mount power. A mount power is usable only when the creature's rider has the Mounted Combat feat. See also "Mounted Combat," *Dungeon Master's Guide*, page 46.

**move:** Whenever a creature, an object, or an effect leaves a square to enter another, it is moving, whether that move is done willingly or is forced. This means shifting, teleporting, and being pushed are all moves, for example.

If a power notes a distance that a creature or any of its allies move willingly (for example, "shift 2 squares"), the creature allowed to move can decide to move all, some, or none of that distance. Similarly, if a power forcibly moves an enemy (for example, "push the target 3 squares"), the creature using that power can decide to move the enemy all, some, or none of that distance.

If a power specifies the destination for a creature or an ally's move (for example, "a square adjacent to the target"), the creature allowed to move decides either to move to that destination or not. It can't move partway. Similarly, if a power specifies where a creature forces an enemy to move, the creature decides either to move the enemy there or not.

See also "Movement and Position," *Player's Handbook*, page 282.

**natural [origin]:** Natural creatures are native to the natural world.

**necrotic [keyword]:** A damage type. See also **damage type**.

**once per round:** Some effects are usable only once per round (sometimes noted as "1/round"). If a creature uses such an effect, it can't use the effect again until the start of its next turn.

**ooze [keyword]:** Oozes are amorphous creatures.

**phasing:** While phasing, a creature ignores difficult terrain and can move through obstacles and other creatures, but it must end its movement in an unoccupied space.

**plant [keyword]:** Plant creatures are composed of vegetable matter. They don't need to sleep.

**poison [keyword]:** A damage and effect type. A poison power delivers a nondamaging poisonous effect, deals poison damage, or both. See also **damage type**.

**polymorph [keyword]:** An effect type. Polymorph powers change a creature's physical form in some way.

*One Polymorph at a Time:* If a creature is affected by more than one polymorph power, only the most recent one has any effect. The other powers' effects remain on the creature

and their durations expire as normal, but those effects don't apply. However, when the most recent effect ends, the next most recent one that is still active applies to the creature. For example, if a jackalwere is under the effect of *change shape* and a character uses a polymorph power against the jackalwere, the effect of *change shape* is suppressed until the character's polymorph effect ends on the jackalwere.

*Changing Size:* If a polymorph power reduces a creature's space, the creature does not provoke opportunity attacks for leaving squares as it shrinks.

If a polymorph effect would make a creature too large to fit in the available space, the effect fails against the creature, but the creature is stunned (save ends).

*Death Ends:* Polymorph effects end on a creature immediately when it dies.

**prone [condition]:** When a creature is prone, it is lying down. It takes a –2 penalty to attack rolls, and the only way it can move is by crawling, teleporting, or being pulled, pushed, or slid. In addition, it grants combat advantage to enemies making melee attacks against it, but it gains a +2 bonus to all defenses against ranged attacks from enemies that aren't adjacent to it.

If a creature is flying when it falls prone, it safely descends a distance equal to its fly speed. If it doesn't reach a solid surface, it falls.

A creature can drop prone as a minor action.

**psychic [keyword]:** A damage type. See also **damage type**.

**radiant [keyword]:** A damage type. See also **damage type**.

**regeneration:** See *Player's Handbook*, page 293.

**reliable [keyword]:** If a creature misses every target with a reliable power, the use of that power isn't expended.

**removed from play:** Some effects can temporarily remove a creature from play. While a creature is removed from play, its turns start and end as normal, but it can't take actions. In addition, it has neither line of sight nor line of effect to anything, and nothing has line of sight or line of effect to it.

**reptile [keyword]:** Reptiles are cold-blooded creatures that have scaly skin.

**restrained [condition]:** While a creature is restrained, it is immobilized, and it can't be pulled, pushed, or slid. It also takes a –2 penalty to attack rolls, and it grants combat advantage. See also **immobilized**.

**save:** A successful saving throw. A save ends an effect that includes one of the following notations in parentheses: "save ends," "save ends both," or "save ends all." See also "Saving Throws," *Player's Handbook*, page 279.

*Identical Effects That a Save Can End:* If a creature is subjected to identical effects that a save can end, including ongoing damage, it ignores all but one of those effects. For example, if a creature is dazed (save ends) and then is attacked and again dazed (save ends), it ignores the second effect, since it is identical to the effect it is already suffering.

A creature never makes multiple saving throws against identical effects. It does, however, make separate saving throws against effects that aren't identical, even if they contain the same condition. For example, dazed (save ends) and dazed and immobilized (save ends both) are not identical effects, so a creature must make separate saving throws against them. See also "Ongoing Damage," *Player's Handbook*, page 278.

*Overlapping Durations:* When a creature is subjected to identical effects that end at different times, it ignores all the effects but the one that has the most time remaining. Effects that a save can end work differently, since it's unknown when they're going to end. You, therefore, track effects that a save can end separately from effects that end at specific times. See also "Durations," *Player's Handbook*, page 278.

**shadow [origin]:** Shadow creatures are native to the Shadowfell.

**shapechanger [keyword]:** Shapechangers have the ability to alter their form, whether freely or into specific forms.

**sleep [keyword]:** An effect type. Sleep powers cause creatures to fall unconscious. Unless a power says otherwise, this unconsciousness is not normal sleep, so a creature that is subjected to it cannot be simply awakened; the power specifies how the unconsciousness ends. See also **unconscious**.

**slowed [condition]:** When a creature is slowed, its speed becomes 2 if it was higher than that. This speed applies to all of the creature's movement modes (walking, flying, and so on), but applies to neither forced movement against it nor teleportation. The creature also cannot benefit from bonuses to speed, although it can take actions, such as the run action, that allow it to move farther than its speed. If a creature is subjected to this condition while it is moving, it must stop if it has already moved at least 2 squares.

**spider [keyword]:** Spider creatures include spiders as well as creatures that have spiderlike features: eight legs, web spinning, and the like.

**spider climb:** A creature that can spider climb can use its climb speed to move across overhanging horizontal surfaces (such as ceilings) without making Athletics checks. See also **climb speed**.

**stunned [condition]:** While a creature is stunned, it can't take actions. It also grants combat advantage and can't flank.

**Supernal:** An immortal creature that has the Supernal language can understand speech and writing in any language. In addition, when an immortal speaks Supernal, it can choose to speak so that any creature that understands language can understand it.

A nonimmortal that has the Supernal language can read writing in Supernal and can understand an immortal speaking Supernal, regardless of whether the immortal wants to be understood.

**surprised [condition]:** While a creature is surprised, it can't take actions. It also grants combat advantage and can't flank.

**swamp walk:** A type of terrain walk. A creature that has swamp walk ignores difficult terrain that is mud or shallow water.

**swarm [keyword]:** A swarm is composed of multiple creatures but functions as a single creature. A swarm can occupy the same space as another creature, and an enemy can enter a swarm's space, which is difficult terrain. A swarm cannot be pulled, pushed, or slid by melee or ranged attacks.

A swarm can squeeze through any opening large enough for even one of its constituent creatures. For example, a swarm of bats can squeeze through an opening large enough for one of the bats to squeeze through.

**swim speed:** A creature that has a swim speed moves through water at that speed without making Athletics checks to swim.

**telepathy:** A creature that has telepathy can communicate mentally with any creature that has a language, even if they don't share the language. The other creature must be within line of effect and within a specified range. Telepathy allows for two-way communication.

**teleportation [keyword]:** An effect type. A teleportation power transports creatures or objects instantaneously from one location to another. Use these rules when a creature uses a teleportation power on a target, which might be itself, another creature, or an object.

*Instantaneous:* Teleportation is instantaneous. The target disappears and immediately appears in the destination space chosen by the user of the teleportation power. The movement is unhindered by intervening creatures, objects, or terrain.

*Destination Space:* The destination of the teleportation must be an unoccupied space that the target can occupy without squeezing. If arriving in the destination space would cause the target to fall or if that space is hindering terrain, the target can make a saving throw. On a save, the teleportation is negated.

*Line of Sight:* The user of the teleportation power must have line of sight to the destination space.

*No Line of Effect:* Neither the target nor the user of the teleportation power needs line of effect to the destination space.

*No Opportunity Actions:* The target does not provoke opportunity actions for leaving its starting position.

*Immobilized or Restrained:* Being immobilized or restrained doesn't prevent a target from teleporting. If a target teleports away from a physical restraint, a monster's grasp, or some other immobilizing effect that is located in a specific space, the target is no longer immobilized or restrained. Otherwise, the target teleports but is still immobilized or restrained when it reaches the destination space.

## ABOUT THE DESIGNERS

MIKE MEARLS is the lead designer for the Dungeons & Dragons roleplaying game. His recent credits include *Player's Handbook® 3*, *Hammerfast™*, and *Primal Power™*.

GREG BILSLAND is a game editor at Wizards of the Coast. His design credits include the *Forgotten Realms® Player's Guide*, *Monster Manual® 2*, *Divine Power™*, and *Primal Power*. His recent editing credits include *Player's Handbook 2*, *Monster Manual 2*, and the *Eberron® Player's Guide*. He welcomes anyone to keep up with his work at twitter.com/gregbilsland

ROBERT J. SCHWALB is an award-winning game designer who has contributed design to or developed over one hundred roleplaying game titles for Dungeons & Dragons, *Warhammer Fantasy Roleplay*, *A Song of Ice and Fire*, and the *Star Wars* roleplaying game. Some of his more recent work for Wizards of the Coast can be found in *Player's Handbook 3*, *Martial Power™ 2*, and *Draconomicon™: Metallic Dragons*. In addition, he's a regular contributor to both *Dragon* and *Dungeon* magazines. Robert lives, works, and will probably die in Tennessee.

**threatening reach:** A creature that has threatening reach can make an opportunity attack against any enemy within its reach that provokes an opportunity attack.

**thunder [keyword]:** A damage type. See also **damage type**.

**totally obscured:** A measure of visibility and a type of obscured terrain. A creature has total concealment when it is in a totally obscured square. *Example:* Total darkness. Contrast with **heavily obscured** and **lightly obscured**.

**tremorsense:** A creature that has tremorsense can clearly see creatures or objects within a specified range, even if they are invisible, obscured, or outside line of effect, but both they and the creature must be in contact with the ground or the same substance, such as water or a web. The creature otherwise relies on its normal vision.

**tunneling:** A creature that has tunneling leaves tunnels behind it as it burrows. The creature, as well as smaller creatures, can move through these tunnels without any reduction in speed. Creatures of the same size as the tunneling creature must squeeze through these tunnels, and larger creatures cannot move through them at all. See also **burrow speed**.

**unconscious [condition]:** While a creature is unconscious, it is helpless, it can't take actions, and it takes a –5 penalty to all defenses. It also can't flank. When a creature is subjected to this condition, it falls prone, if possible. See also **helpless** and **prone**.

**undead [keyword]:** Undead are not living creatures, so effects that specifically target living creatures don't work against them. They don't need to breathe or sleep.

**water [keyword]:** A water creature is strongly connected to the element of water.

**weakened [condition]:** While a creature is weakened, its attacks deal half damage, but ongoing damage that it deals is not affected. See also **half damage**.

**weapon [keyword]:** An accessory type. This keyword identifies a power that is used with a weapon, which can be an unarmed strike. Monster attacks don't use proficiency bonuses. See also "Adding Equipment," *Dungeon Master's Guide*, page 174.

**zone [keyword]:** An effect type. Powers that have the zone keyword create zones, magical areas that last for a round or more.

*Fills an Area of Effect:* A zone is created within an area of effect and fills each square in the area that is within line of effect of the origin square.

*Unaffected by Attacks and the Environment:* A zone cannot be attacked or physically affected, and terrain and environmental phenomena have no effect on it. For example, a zone that deals fire damage is unaffected by cold damage.

*Movable Zones:* If the power used to create a zone allows the zone to be moved, it's a movable zone. At the end of its creator's turn, the movable zone ends if it is not within range of at least 1 square of it (using the power's range) or if the creator doesn't have line of effect to at least 1 square of it.

A zone can't be moved through blocking terrain.

*Overlapping Zones:* If zones overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping zones is subjected to the worst penalty. Similarly, a creature in the overlapping area takes damage only from the zone that deals the most damage, regardless of damage type.

*Death Ends:* A zone ends immediately when its creator dies.

## PLAYTESTERS

The following players and Dungeon Masters from the Dungeons & Dragons community reviewed the new statistics block format presented in the book, providing valuable feedback from both in-game and out-of-game discussions on usability, clarity, and presentation. Our thanks go out to everyone who took part, including:

Konrad Brandemuhl, Travis Wolcott, Keith Symcox, Paul Alexander, Tyler Burroughs, Sean Herring

Christian Chaney, Joanna Chaney, Daniel Gordon, Jodi Gordon, Christopher Wright, Danny Joe Jarman Jr.

Sean Molley, Heidi Pritchett, Brian Schoner, Paige Leitman, Bryan Leclair, Dee Leclair

Renout van Rijn, Mark Knobbe, John-Alan Pascoe, Yourik Voogd, Eva Orta, Yannick Braat, Pieter Sleijpen

# MONSTERS BY LEVEL

Every monster in the book appears on this list, which is sorted alphabetically by level and monster role. Monster leaders are indicated with an (L).

| Monster | Level and Role | Page |
|---|---|---|
| Xivort Darter | 1 Artillery | 208 |
| Thornskin Frog | 1 Brute | 90 |
| Lesser Water Elemental | 1 Controller | 83 |
| Xivort Net Caster | 1 Controller | 209 |
| Lesser Air Elemental | 1 Lurker | 80 |
| Lesser Fire Elemental | 1 Skirmisher | 82 |
| Xivort Slasher | 1 Skirmisher | 208 |
| Xivort Shadow Caller | 2 Artillery (L) | 209 |
| Maw Demon | 2 Brute | 42 |
| Blizzard Dragon Wyrmling | 2 Controller | 65 |
| Sporeback Frog | 2 Controller | 91 |
| Ambush Spider | 2 Lurker | 182 |
| Wilden Hunter | 2 Lurker | 207 |
| Cave Fisher Spawn | 2 Minion Brute | 28 |
| Murklord Frog | 2 Skirmisher | 91 |
| Lesser Earth Elemental | 2 Soldier | 81 |
| Wilden Destroyer | 2 Soldier | 206 |
| Cave Fisher Spiker | 3 Artillery | 29 |
| Jackalwere Bravo | 3 Brute | 120 |
| Skulk Mesmerist | 3 Controller | 176 |
| Cave Fisher Angler | 3 Lurker | 28 |
| Shadow Stalker | 3 Lurker | 172 |
| Skulk Murderer | 3 Lurker | 177 |

# Guess What's Coming to Dinner

A wide-eyed band of heroes stands before a gaping archway—the dark maw of an ancient dungeon filled with treasures yet to be plundered. Haunting the chambers and corridors of this forlorn oubliette are vile monsters the likes of which the heroes have never faced. . . .

This Dungeons & Dragons® core rulebook introduces an innovative monster stat block format that makes running monsters easier for the Dungeon Master. *Monster Manual® 3* also presents a horde of iconic monsters that fit easily into any campaign, including:

- New variants of existing monsters, such as the gnoll war fang, the ogre dreadnought, and the putrid slaad.
- Updates of popular and iconic monsters from previous editions, including the cloaker, the nalfeshnee demon, the mimic, the quasit, the rot grub, and the thrikreen.
- Catastrophic dragons, including the earthquake dragon and the volcanic dragon.
- Epic threats, including Lolth (Demon Queen of Spiders) and Imix (Prince of Elemental Fire), along with evil underlings and cultists.

For use with these 4th Edition Dungeons & Dragons® products:

*Player's Handbook®* core rulebooks

*Dungeon Master's Guide®* core rulebooks

*Monster Manual®* core rulebooks

*D&D® Miniatures* *D&D® Dungeon Tiles*

CHAPTER 1

# Dragon Lore

*If a man wishes to become a hero, then the serpent must first become a dragon: otherwise he lacks his proper enemy.*
—Friedrich Nietzsche

**Few creatures** can match the power and splendor of dragons. Armed with claws and fangs that can rend steel, armored in scales as tough as iron, faster than an eagle in flight, and strong enough to shatter castle gates, a full-grown dragon is an awesome foe. Dragons would be exceedingly dangerous creatures even if they were dumb, ordinary beasts, because of their size and power. But they are also gifted with cold, calculating reason and furnaces of elemental energy that provide them with terrible breath weapons.

In some places and times, dragons are scarcely more than legend, creatures so rare and mysterious that centuries pass without a sighting of one. In other times, dragons rule over the world, darkening the skies and destroying or subjugating lesser beings. The current age falls somewhere between these extremes. In the few centers of civilization, dragons are a rare sight. The typical farmer or merchant might see a dragon only once or twice in his life. But in the borderlands or the great wide wildernesses surrounding those domains, dragons are much more common.

This chapter explores the nature of metallic dragons and their place in the world. It includes the following topics.

- **Origins:** How metallic dragons arose in the world, and why they differ from their chromatic kin.
- **Physiology:** A summary of the physical traits that give dragons their unique strengths.
- **Life Cycle:** The stages of a dragon's life, from conception to death.
- **Outlook and Psychology:** A look at the workings of a typical dragon's mind, and how a dragon's power and self-absorption color its personality.
- **Society:** A discussion of the interactions of the highly social metallic dragons.
- **Religion:** How these prideful creatures view the deities, and which ones they consent to worship.
- **Metallic Dragons in Detail:** A brief look at each of the twelve kinds of metallic dragons.

RALPH HORSLEY

RCH
8·09

Dragons have soared through the skies of the world and roamed the far reaches of the cosmos since the earliest days of creation. They are the greatest of mortal creatures, although few in number compared to the myriad hosts of humankind or the numberless hordes of goblins or orcs. Although scores, perhaps hundreds, of dragons are remembered in the myths and the legendary histories of the mortal world, only a handful of sages know the tale of the world's first dragons.

## First Dragons

In the beginning of the world, the gods gave life to the naked substance of the world forged by the primordials. During the days of creation, the gods forged countless mortal vessels, giving rise to all the races, beasts, and plants that would populate the world. But the deity Io chose to bend his will toward creating mortal vessels that would not only live in the world of elements, but would give life and soul to the elements themselves. To contain the awesome power of elements given life, Io had to shape mortal vessels of tremendous strength and hardiness. And so he created the most powerful of all mortal creatures: the dragons.

Learned metallic dragons believe that each time Io created new dragons, he was in a different mood. The god's demeanor laid the seeds that determined what those dragons would eventually become. When Io was filled with compassion and the desire to help others, he created dragons that transformed into metallics after his death. When Io spawned dragons to sate his avaricious or destructive impulses, the god's dark emotions eventually warped those dragons into the first chromatic and catastrophic dragons. In the ages following Io's death, these seeds altered dragonkind into its various kindreds.

Naturally, catastrophic and chromatic dragons do not hold with this version of Io's story. Scourge dragons like it even less—according to this legend, scourge dragons are poor imitations of true dragons, created by jealous godlings that lacked Io's secret of fusing elemental energy with mortal form and soul. Scourge dragons detest this ages-old "slander," and deal harshly with any sage or scholar they find propagating the tale.

## Children of Io

Foremost among the gods in valor and physical power, Io fought and defeated many primordials in the Dawn War. Similarly, his mighty children stood at the forefront of all mortal beings in the fight to preserve creation from the unchecked elemental forces of the angry primordials. But Io finally met an enemy who was his match: the primordial Erek-Hus, the King of Terror. The King of Terror slew Io, and the primordials seemed on the verge of victory. Then, from Io's shattered body, two new gods arose: Bahamut, the Platinum Dragon, and Tiamat, the Chromatic Dragon.

Bahamut and Tiamat together defeated the King of Terror, but then Tiamat turned against the noble Bahamut and attempted to seize dominion over all dragons. Io was a deity who incorporated both honor and fury, ambition and resolve, a love of beauty and a desire to possess it. Tiamat inherited many of Io's darker traits, and she could not suffer the existence of an equal or allow any other creature to reign over dragonkind. Bahamut obtained more of Io's noble qualities and the greater part of Io's strength. The Platinum Dragon defeated Tiamat, and she retreated to the dark depths of Tytherion. She took little part in the rest of the war against the primordials. Bahamut went on to become a champion for the gods nearly as noble and powerful as Io had been.

## The War of Dragons

The bitter strife between Io's heirs carried over to all of dragonkind. For a long age of the world, chromatic dragons battled furiously to throw down Bahamut and elevate Tiamat as the Queen of All Dragons. More than once, metallic dragons established wise

### The Legend of Perfection

Though most dragons believe the different types of dragons arose after Io's death, many metallic dragons claim otherwise. According to the tales they favor, Io created each kindred in turn, growing in skill and understanding with each effort. The catastrophic dragons were Io's first effort to shape mortal vessels that could incorporate living elemental power. They were slaves to their own elemental natures; the elements within warped and twisted the draconic vessel. Io set them aside and shaped the chromatic dragons next, giving them bodies better suited to containing the elemental energy without being changed by it. But these dragons, while true to the physical form that Io intended, had souls that could not master the base passions of their own elemental nature. These too Io set aside. Finally Io forged the metallic dragons, now perfected in both body and soul to be masters of their nature, and not slaves to it. Naturally, the metallic dragons are Io's last and finest creation—or so the old and proud among metallic dragons claim.

KEREM BEYIT

and justly ruled kingdoms over the lesser mortals of the world only to watch their realms destroyed by furious hordes led by wrathful flights of chromatic dragons. But in time, the battles of dragon against dragon grew sporadic, and then ebbed to a rarely remembered collection of old challenges and vendettas. Dragons had grown fewer in number, and those that remained grew more strong-willed, more suspicious, and more self-absorbed as the ages passed. Io had made dragonkind too strong, too proud, to surrender its will to any cause for long, or to acknowledge the dominion of others—even their own kind.

Dragons have rarely united for any great cause. Old rivalries and suspicions dating back to the earliest days of Bahamut and Tiamat's war divide the races of dragonkind irreparably. Although the fiercest feuds are between chromatic and metallic dragons, plenty of suspicions exist between different varieties within each family. Silver dragons hate red dragons, but they also distrust the imperial ambitions of gold dragons and dislike the avarice of copper dragons. White dragons hate and fear the much stronger silver dragons, which often push them out of their chosen territory, but they are just as wary around red dragons, which are likely to demand tribute or kill them. In fact, for many dragons, their worst enemies are other dragons of their own color or kind.

## Io's Charge

Tiamat's drive for dominion over dragonkind is not the only cause of strife between the various types of dragons. Metallic dragons see the world and their place in it differently from how their chromatic or catastrophic cousins do. They remember the words of Io and the stories of his deeds, and discern in them a great purpose for dragonkind. Metallic dragons believe that Io created dragons with their awesome strength, intelligence, and magical might in order to inspire and protect all the lesser mortals of the world. They believe that dragonkind is charged with defending the world against primordial forces that would destroy it, leading mortal civilization, and shaping the world's affairs to someday create the world that Io decreed long ago. Metallic dragons refer to this high purpose as Io's Charge—a great philosophy of existence shaped by ancient prophecies and revelations.

Not all metallic dragons know of Io's Charge, and some that do know of it don't care. Iron, adamantine, and cobalt dragons lead savage and reclusive existences and have little knowledge of the ancient history of their own kind. These dragons make their way in the world by their own wit, power, and judgment, seizing whatever territory or treasure they can and holding it for as long as possible. Other metallics regard Io's Charge as a dream of childlike naïveté, long ago poisoned by Tiamat's greed and ambition and lost forever in the sundering of dragonkind. The cynical among metallic dragons ignore Io's Charge outright, seeing no reason why they should exert themselves on any other creature's behalf. But though some dragons have forgotten it and others have abandoned it, Io's Charge still guides the actions of many of the world's most powerful metallic dragons. Gold, silver, mithral, and orium dragons are especially likely to honor Io's Charge and allow its ancient wisdom to inform their actions.

Those dragons that accept Io's Charge differ greatly (and sometimes violently) on what exactly it means and how it should be met. Gold dragons often interpret Io's Charge as a mandate to rule over lesser

creatures as a just monarch. Steel dragons tend to believe that Io's Charge is best served by safeguarding the freedom of lesser mortals to find their own path. Some dragons think that Io's Charge requires them to crusade mercilessly against races, societies, or institutions they find objectionable. Others believe that Io's Charge is best answered through providing guidance and inspiring examples to the other races of the world.

The other families of dragonkind have different views of Io's Charge. Catastrophic dragons regard the whole idea as pure fancy (if they've heard of it at all) and believe that Io left no great philosophy to guide dragonkind. Chromatic dragons and scourge dragons, on the other hand, believe that the great purpose of dragons is to do as they please with the world and its people. In their view, might makes right, and Io made them the most powerful creatures in the world so that they could subjugate, plunder, and destroy to their hearts' content. When chromatic dragons debate philosophy (a rare occasion, but it's been known to happen), they argue that metallic dragons have fatally misinterpreted and embellished the pure and simple purpose of Io's Charge, which is nothing more or less than the divine mandate to dominate the world and revel in its riches.

## Good and Evil

Given their drive to dominion, the age-old war against chromatic dragons, and the complexities of Io's Charge, metallic dragons play many roles on the world stage. They are kings, counselors, and teachers that seek to bring out the best in others; prophets, visionaries, and oracles that steer the course of events to come; meddlers and manipulators, toying with the fates of kingdoms; protectors and guardians, sometimes benevolent and sometimes absolutely ruthless; gluttons and misers; tyrants and destroyers; great champions and wicked schemers. Just as humans and members of other mortal races do, dragons walk many paths in life.

More so than most other types of dragons, metallics discover and pursue great causes and high purposes. Some are just as brutish and shortsighted as the worst chromatics, of course, but most seek something more than comfortable lairs and plentiful food. Of course, the combination of powerful, long-lived, highly rational beings and great purposes is not necessarily beneficial for the rest of the world. It's unusual for metallic dragons to embrace wantonly evil causes, but many of the purposes they do conceive can be callous, ruthless, destructive, or tyrannical in the eyes of the lesser creatures caught up in draconic dreams.

Metallic dragons are much more likely than other dragons to incorporate humans and members of other sentient races in their machinations. An old, powerful red wyrm might look at a rich dwarven kingdom and plan to despoil it, but a gold wyrm might plot something potentially worse: ways in which it can seize control of that realm for centuries to come and direct its growth and resources to the dragon's purposes. The red wyrm eventually leaves, but the gold wyrm might never finish its work.

With this example in mind, the three salient truths that one should keep in mind about the so-called "good" metallic dragons are these:

**1. Not all metallic dragons are good.**
Some metallic dragons are, in fact, of evil or chaotic evil alignment. Silver and gold dragons are not often evil, but it's not uncommon to find truly evil representatives of the baser metallic dragons, such as iron or cobalt dragons. Some evil metallic dragons regard weaker creatures as miserable rabble to be enslaved, plundered, or toyed with on a whim. Other evil metallic dragons harbor a twisted view of Io's Charge and shape human realms to fit their own dark desires, using whatever means are effective.

**2. Unaligned metallic dragons often pursue dangerous objectives.**
Dragons that aren't committed servants of evil might prove just as dangerous as those that are. Many of the more brutish dragons are highly territorial, quick to anger, or easily lured into hostile actions by the promise of rich rewards. Others regard the power and fortunes of their favored human tribes or realms to be a reflection of their own power. They build up the strongest, most loyal kingdoms to govern, whether these realms are savage, oppressive, warlike, corrupt, or decadent. Wiser, more patient dragons might easily become caught up in the game of toying with kingdoms and history, often to the great detriment of the people who attract their interest.

**3. Even good dragons can be terrible enemies.**
Powerful metallic dragons that serve good in the world can still pose threats to heroic characters. A good dragon might choose to destroy a band of heroes to defend some site or artifact, to fulfill an ancient oath, or to prevent a great evil. Given their long lives and their overwhelming pride and confidence, dragons think little of making the hard choices for lesser creatures and sacrificing the few for the good of the many. True compassion is rare indeed among dragonkind.

## DRAGONS IN HERALDRY

As you might expect of the world's most majestic and powerful creatures, dragons are featured in all manner of heraldic devices and coats of arms. Though culture in the world isn't monolithic enough for widespread, unified systems of heraldry, everyone is familiar with the traits of dragons. Images of dragons can appear as charges (appearing in one of the divisions of a shield) or supporters (figures that stand to either side of the shield and appear to be holding it upright). Dragons are also used as crests, small figurines that top helmets.

Each variety of dragon symbolizes different qualities or virtues. Chromatic dragons in heraldry are viewed as martial, aggressive devices and usually belong to individuals or families who made themselves known through battle. Metallic dragons are regarded as devices signifying dominion and status, and they often reflect titles bestowed for loyalty and accomplishment. However, exceptions abound, and the dragons featured carry no real connotation of the owners' alignment or trustworthiness. A family whose coat of arms features a red dragon is as likely to be honorable and good as one whose coat of arms includes a gold dragon.

The dragons most commonly used in heraldry, and their heraldic qualities, are these:

**Adamantine:** Pride, immovability, or stoicism. Heroes who successfully defend some place against attack are often associated with this device.

**Black:** Death, tragedy, or terror. A black dragon device usually bears a negative connotation, but families that endure curses or heroes renowned for fearlessness in the face of the supernatural sometimes choose this device.

**Blue:** Ambition, superiority, knowledge. The blue dragon device often suggests arcane magic, but might also suggest arrogance. Families that include famous wizards often choose this device.

**Copper:** Wealth, prosperity, or mercantile interests, possibly also luck or good fortune. Families that have roots as merchants often choose copper dragons.

**Gold:** Divine right, nobility, or law. Gold dragon devices are considered royal in many lands and are usually reserved for the highest levels of the nobility.

**Green:** Cunning, revenge, beauty, or fey. Families sworn to overturn some ancient wrong might bear this device, as might those who claim eladrin or elven kinship.

**Iron:** Determination, courage, or zeal. The iron dragon connotes single-mindedness and ardor for battle, but it can also stand for mercilessness.

**Red:** Strength, power, or destruction. Families that took their lands by conquest often feature a red dragon in their heraldry.

**Silver:** Honor, duty, or sacrifice. The silver dragon is a favorite of families that include famous knights or paladins.

**White:** Rage, ferocity, or the hunt. The white dragon device often connotes a willingness to feud or a refusal to overlook slights.

WAYNE ENGLAND

Like their chromatic cousins, metallic dragons contain elemental magic bound inside their brawny reptilian frames. All varieties of dragons wield breath weapons directly related to the elemental energy that courses through their hearts and blood. Elemental energy also powers their magical abilities.

Metallic dragons advance through age categories as chromatic dragons do, growing stronger in every way as they progress through millennia of life.

## The Dragon's Scales

While a chromatic dragon relies on tough, leathery scales to repel attacks, the scales of a metallic dragon are partly composed of metal. Large, overlapping, platelike scales armor the dragon's back and head, growing smaller and more flexible along its limbs. Softer, smoother scales lie side by side on the dragon's belly. Each scale is infused with whichever metal is natural to that dragon. For example, the scales of a gold dragon are infused with a more durable form of gold, and the scales of a bronze dragon are mineralized with an alloy of copper and tin. A metallic dragon's scales are innately magical, as intrinsic to its elemental nature as its heart or blood.

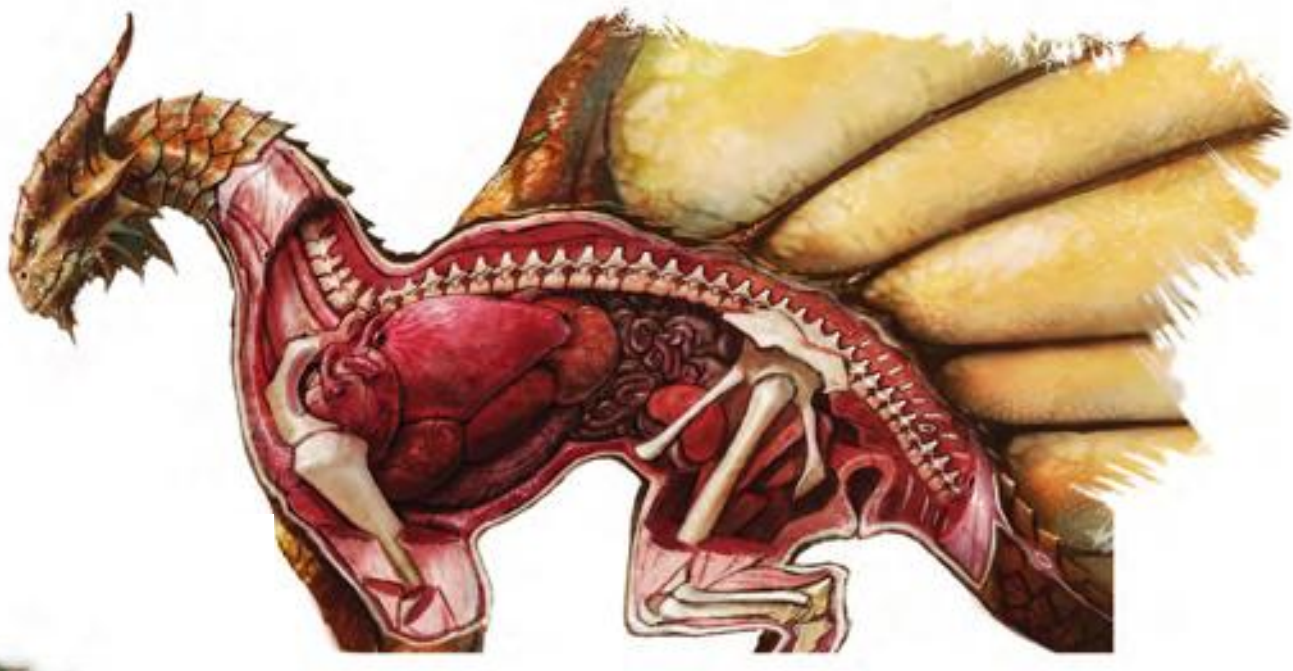
Although a metallic dragon's scales are largely inorganic, the dragon's body produces powerful enzymes that actively bond with and diffuse the metal content throughout their blood. Not only do these enzymes keep scales flexible, they also nourish the living parts of each scale and constantly thicken and replenish the nonliving parts throughout the dragon's life. When a scale is lost through injury or natural molting, it gradually becomes less organic and its metallic content solidifies as the enzymes dry out. This process leaves a dead, brittle scale interlaced with fine veins of pure inorganic metal. If properly smelted, a large detached scale can yield traces of pure metal. However, it is extremely tedious and time-consuming to separate the pure metal from the scales of a dead dragon, and in practice metallic dragon hides aren't worth any more than chromatic dragon hides.

Metallic dragon scales harvested for armor already benefit from being harder than steel, but lose their flexibility and become rigid. The residual metal content is weaker than the natural hardness of a dragon scale. Therefore, metallic dragon scales (with the exception of adamantine scales) do not greatly improve the protection value of armor made from dragon hide.

Many sages have noticed that in addition to its regular diet, a metallic dragon occasionally ingests metal objects appropriate to its kind. For example, a steel dragon can devour a mundane sword (with some care) and metabolize its substance. Although eating metal is by no means required for a metallic dragon, doing so increases the rate at which it regenerates lost scales.

## Internal Anatomy

As with most aspects of their external anatomy, chromatic and metallic dragons share the same organs with virtually no exceptions. Much of what makes a dragon an elemental force to be reckoned with begins with its dense heart, the single most powerful muscle of a dragon's body. Both chromatic and metallic



CHIPPY

dragons have the same vocal range, enormous lung capacity, a fundamentum (a unique organ that concentrates elemental power in the blood), an upper stomach for gathering *breath weapon* blasts, and a gizzard for digestion. Moreover, both chromatic and metallic dragons boast a large brain mass with an extra lobe for controlling their *frightful presence* ability and their capacity for instinctive learning.

The parallels between chromatic and metallic dragons continue in the muscular and skeletal structures that shape their feline postures, from which only the decidedly reptilian neck and tail deviate. A dragon's heart pumps elemental energy throughout its body, making actions possible that would otherwise be impossible. The energy lets it instill fear, stave off exhaustion, and fly on membranous wings. Flushed with elemental blood pumped from the heart, a metallic dragon can stave off fatigue while remaining airborne for hours or days at a stretch. Dragon bones are hollow like those of birds, but immensely strong. The pectoral muscles of a dragon are among the strongest muscle groups in the body, and the tendons and ligaments are exceptionally tough and supple.

The elemental heart of a metallic dragon regulates body temperature regardless of external altitude, environment, or weather. Its heart can also slow down enough to permit hibernation, sometimes for hundreds of years. The elemental energy that flows through the body of a metallic dragon allows it to digest, process, and even subsume virtually anything it eats.

Looking for the origin of moral impulses, some sages have devoted considerable study to the variances in brain composition between chromatic and metallic dragons. Specifically, they have searched for any part of the brain that controls the inclination for good or evil tendencies. The truth, however disappointing, is that no such moral center exists. Dragons are good-natured or evil-minded based on the whims of personality, fate, and experience, much like humans and members of other mortal races, although some varieties of dragon are inclined to be more violent, domineering, and irascible than others.

### Draconic Anatomy

*Draconomicon: Chromatic Dragons* features a more extensive discussion of draconic musculature, skeletal structure, organs, and more. Metallic dragons are much like chromatic dragons in most of these particulars; refer to that supplement for more information.

## Shapechanging Metallic Dragons

Most metallic dragons cannot assume the shapes of humanoids. Those that can have a considerable advantage over their peers, especially in matters of stealth and subterfuge. Shapechanged dragons normally assume the same appearance each time they change form. Other than that, no visual cues betray their true identities—they appear to be normal members of the creatures they imitate. However, some shapechanging dragons naturally include cosmetic characteristics that are borrowed from their metallic dragon bodies, such as eye or hair color that matches their scales. Age and gender of humanoid forms do not have to match those of dragons' natural forms. A male elder steel dragon, for example, could appear as a sprightly young female elf. Moreover, despite the radical difference in size between metallic dragons and humanoids, a disguised dragon's weight accurately reflects the dimensions of its current form. A dragon disguised as a bent and crooked old male human would weigh perhaps 150 pounds, not the thousands of pounds of its true draconic form.

Though a disguised dragon looks the same as a humanoid at a glance, telltale physical quirks can give them away. Although metallic dragons lose their bite, claw, tail, wings, and *breath weapon* in humanoid form, they retain their hit points, defense scores, resistances, and ability scores, leading savvy opponents to surmise that their target is a lot more resilient than appearances indicate.

When a dragon changes shape into humanoid form, the brain and heart make the polymorphic transition and function exactly the same way, pumping a font of magic-infused blood throughout the humanoid form. Sages have surmised that although a humanoid form lacks the mass of a metallic dragon, its elemental heart maintains the density of one. Finally, in addition to the brain, the extra lobe for controlling the *frightful presence* ability also crosses between forms, giving metallic dragons access to this one magical power in either body.

Though some varieties always develop the ability, every metallic lineage has a chance to produce shapeshifters. (See "Alternative Powers," page 219).

# LIFE CYCLE

To truly understand dragons, one must imagine lifetimes that play out across thousands of years. Empires come into power, thrive, and fade into antiquity while ancient metallic dragons indulge the dream of blissfully long sleep. In many respects, dragons are creatures for which the passage of time holds little meaning. Although most are not immortal, the oldest of their kind living today have witnessed the rise and fall of ancient empires.

Dragons of any kind have the potential to live for several thousand years, but metallic dragons are the longest-lived of the dragon families, and often live half again as long as chromatic dragons do (barring death by violence, of course). Conjecture on the reason for this difference is rampant, but most sages believe that the metallic content infusing the scales, blood, organs, and flesh of metallic dragons concentrates the dragons' innate elemental power as they age, and helps them to resist the onset of decrepitude. The baser varieties of metallic dragons, such as brass and steel dragons, often reach ages of 2,500 to 3,000 years. Nobler, more powerful metallic dragons (silver, gold, and mithral) can live two to three times that span.

As with chromatics, metallic dragons experience six stages of life: wyrmling, young, adult, elder, ancient, and twilight. Although metallic dragons mature at the same rate as chromatics and reach adulthood at about the same time, they age more slowly after that and do not grow to elder or ancient status as quickly. (Of course, they remain ancient dragons long after chromatic dragons slip into twilight.)

## Mating

Similar to chromatic dragons, metallic dragons become capable of mating halfway through their young stage of life, peak as adults, and diminish as elders and ancients. Not all dragons engage in the same mating rituals, but some patterns are common to most metallic dragons. Young dragons have little impulse to seek a long-term partner, but sometimes indulge in brief dalliances. These brief relationships rarely produce eggs, but if they do, the eggs are often fostered with older kin (or occasionally nondragons).

Adult dragons slowly awaken to a strong parental drive after establishing themselves in suitable lairs. Both parents closely watch the eggs, with either one becoming the caretaker while the other hunts for the couple, ensuring that one parent maintains a vigilant guard over the clutch. Because familial bonds are stronger among metallic dragons than among chromatics, these relationships rarely end until well after the wyrmlings hatch. Although either parent can raise wyrmlings alone, some metallic dragons—particularly orium, silver, and gold—stay together until their wyrmlings become young dragons.

Elder dragons, although still capable of reproduction, rarely mate. They are more inclined to foster or mentor the offspring of their own children. Ancient dragons do not normally seek out mates, but dragons that have not found a mate or produced descendants earlier in life sometimes choose to mate and lay eggs long after the time when most dragons do so. This

CHRIS SEAMAN

is especially true for ancient dragons that hold wide dominions or great power over the world and want to pass that power on to worthy heirs. Unlike with chromatic dragons, the desire for parenthood never truly goes away and finds many forms of expression throughout metallic dragons' lives.

Monogamy between metallic dragons is common, but each individual of a mated pair almost always maintains a separate lair, and the two spend most of their time apart. On rare occasions, mates form especially strong bonds and choose to reside together, sharing a lair for a few decades or even a century or two. Bronze, gold, orium, and silver dragons are the most likely to form these close bonds. However, once their wyrmlings have grown, most such pairs eventually separate—without young to hold them together, the dragons revert to their solitary ways.

## Eggs

Female dragons control whether or not mating produces fertile eggs. If a female is not satisfied with the circumstances—for example, the size or location of the lairs, or the selection of possible mates—she rarely produces eggs.

Chromatic and metallic dragons are somewhat similar when it comes to laying eggs, with the exception that metallic dragons are more protective of their unhatched eggs. Female dragons lay eggs in small clutches of one to five; the precise count depends on the dragon's variety. Metallic dragons lay their eggs less frequently than chromatic dragons because their eggs' incubation time is considerably longer. Female metallic dragons keep their eggs within their bodies for 18 to 24 months. Eggs typically incubate for two to five years before hatching.

Egg shape and size are comparable to those of chromatic dragons, and egg color resembles that of the parents' scales. Eggs are highly resistant to damage from the *breath weapons* of the parents, but weaken as the wyrmlings grow ready to hatch.

## Hatching

Metallic dragon wyrmlings slowly leech nutrition from the mineral content of the inner shell wall while hibernating during most of their incubation period. Metallic dragons are known to carry on conversations with their eggs. The metal shells weaken during this time, until the wyrmlings rouse from their sleep ready to hatch. An awakened wyrmling quickly grows impatient, clawing, pushing against, and blasting what remains of the inner shell with an early version of its *breath weapon*. Hatching usually takes less than an hour.

Metallic dragon wyrmlings that hatch into the world as orphans are exceedingly rare. Such an event happens only when both parents have been killed but their eggs remained well hidden. Moreover, most metallic dragons are willing to foster orphaned wyrmlings of their own line, so grandparents, aunts, or uncles can step in at need. Even evil metallic dragons are inclined to regard wyrmlings of their family line as potentially valuable minions or allies, and might go to the trouble of minding wyrmlings.

## Wyrmling

Wyrmlings hatch from their eggs as predators that have instinctive knowledge imprinted on their minds. They are not automatically born with the knowledge of bygone generations, but they understood much of what their parents said to them while they were still in the egg. Consequently, after years of incubation, most dragons hatch with an understanding of their familial connections and basic lessons about hoards, hunting, lairs, and territory.

Wyrmlings are not merely born into the mantle of presumed superiority, but are hatched with a tailored understanding of how their supreme presence fits into the hierarchy of the world. They waste no time using their limbs, can usually fly halfway through their first day, and are eager to hunt by day's end. Indeed, after hatching, there is little that gives metallic wyrmlings pause; they are highly precocious creatures.

Wyrmlings live with a parent or parents for several years, but are already willfully independent, exploring outside the territory of their parents as they grow bolder and larger. They seek out and form relationships with other dragons of their familial line, although some especially territorial metallics such as adamantine and cobalt dragons have little tolerance for wandering wyrmlings. It isn't uncommon for wyrmlings to approach humanoids as well, drawn by curiosity, a desire for companionship, or some meddlesome impulse.

If a metallic dragon wyrmling does hatch on its own without the protection of a parent, it can easily survive into adulthood on its own, relying heavily on its inherited instincts and physical bearing. Even a small wyrmling is roughly equal to a large mountain lion in size and power. Its instincts, however, cause an orphaned metallic wyrmling to fixate on a parental figure should one be offered. Even if raised by dragons of a different kind or by lesser creatures, the wyrmling's powerful instincts keep it true to its kind, regardless of how contrary teachings might otherwise lead it astray.

## Young

Although young chromatic dragons leave home and must immediately fight for survival against a world hostile to their presence, a young metallic dragon can take measured steps away from its parent and be more discriminating about how it leaves home. When a metallic wyrmling grows into a young dragon, it becomes eager to find its own lair. Its mind has been intractably gripped by a primal desire to make

a home for itself and gather a hoard on which to sleep. It is now a powerful predator the size of a large horse, with deadly fangs and claws, and wings that can carry it for hours at a time. Once a young dragon departs from its parents' lair, it cannot return without an invitation, which is almost never offered.

Fortunately for the wyrmling, its years as an independent-minded creature were not idly spent. A young metallic dragon usually leaves its parental lair knowing exactly where it wants to establish its own territory, having already done the necessary reconnaissance as a wyrmling. Moreover, this lair will not be a temporary or transitional residence. The wyrmling studies the lands that interest it carefully to ensure that it can fulfill its needs for a draconic lifetime. Naturally, the young dragon strives to find territory that is rich, full of game, and unclaimed by other dragons—or at least larger and more powerful ones.

## Adult

By the time a young metallic dragon comes into its own as an adult, it has established a lair that will serve it for the rest of its life. It is well on its way to gathering a significant hoard. If a metallic dragon plans to involve itself in humanoid affairs, either in its natural form or in a shapechanged guise, it sets the groundwork for those relationships during this time.

Although a metallic dragon becomes fertile approximately halfway through its "young" stage, a metallic dragon reaches its reproductive prime as an adult. After achieving the grandeur, independence, and predatory status of dragonhood it has so desperately craved since the earliest days of its life, an adult dragon begins to feel the drive to procreate. For one dragon this compulsion might be nothing more the urging of instinct, for another it could be a calm and calculated assessment of its biological needs, and for yet another it might manifest as a desire to achieve even greater fame and renown by creating worthy heirs. As a metallic dragon enters the springtime of its life, a female studies potential suitors, and a male competes for and even fights over the right to mate with a desirable female.

In years when mates are not available, the dragon devotes its energy to relentlessly expanding its territory, adding to its hoard, and establishing itself as the master of all it surveys. Adulthood is the time when a metallic dragon conceives its grand purposes and plans and begins to put them into motion. A member of one of the less intelligent or determined varieties—for example, an iron dragon—might not contemplate any great purpose until much later in life, but a silver or gold dragon begins fulfilling its own interpretation of Io's Charge in the flower of adulthood.

## Elder

Maturing into an elder dragon after several centuries of adulthood, a metallic dragon sits atop a veritable mountain of treasure, large enough to humble the wealth of a small barony. Regardless of this fact, the dragon's desire for more wealth remains insatiable. Any humanoid relationships established as an adult have long since come to fruition. An elder dragon holds a position of influence or leadership, as directly or indirectly involved in great affairs and endeavors as it cares to be.

As an elder, a metallic dragon can look back over multiple generations of progeny and feel pride and satisfaction in the families it has spawned. The drive to reproduce and the desperate need to establish territory have ebbed, which means an elder dragon is supremely self-confident. It is more patient and tolerant than a younger dragon. Even a violent and evil elder dragon is inclined to toy with weak enemies, or to solve problems by using subtle manipulation rather than sudden onslaughts.

CHRIS SEAMAN

Likewise, some elder wyrms find satisfaction in passing on their wisdom and life lessons to younger creatures—precocious wyrmlings and young dragons of their own familial lines, or sometimes humanoids of exceptional worth and charisma. Elder wyrms see the value in laying the foundations of legacies that will endure through the centuries, whether those legacies are in the form of destroyed enemies, mighty realms, or protégés that might go on to accomplish great deeds. They are sometimes willing to take under their wings younger descendants and orphaned dragons (provided they arrive with appropriate gifts) that are eager for their valuable and wizened insights about the world. A wyrmling raised by an elder dragon greatly benefits from the elder's experience and can become a formidable presence in the world.

## Ancient

Metallic dragons that attain this robust age are at the height of their power. They can defeat entire armies or lay waste to whole kingdoms. They are not merely forces to be reckoned with, they are the standard by which cataclysms are measured. In the end, dealing with a metallic dragon of this stature becomes less about slaying the creature and more about appeasing its whims. Cities have been abandoned to accommodate their demands, religions have paid homage to their self-proclaimed divinity, and barbaric tribes have launched great raids to garner plunder fit to offer ancient draconic patrons.

It's not surprising that lesser creatures chafe under the influence of ancient dragons. Rare is the accord that strikes a comfortable balance with these oldest of wyrms. Even the best-intentioned ancient dragon monarch or guardian is inflexible and unapproachable by human standards. This is not to say that ancient metallics are incapable of friendship, but that they have reached a point in their lives when only the most heroic and worthy of lesser mortals are worth their attention.

An ancient dragon has mastered every endeavor that caught its interest over the centuries, from simple games to planar rituals. It no longer has patience for trivial details or petty machinations. Most ancient metallics want to build a legacy of gold, magic, and accomplishment that will last forever, sustained by their fearsome reputations. Others think nothing of indulging any appetite or whim that comes to them, utterly heedless of the effects on lesser creatures nearby. Humans and other folk are too frail and ephemeral to merit concern.

## Twilight

Metallic dragons entering their twilight years diminish in power for the first time in their lives. Although twilight dragons are a little less effective in battle, only the foolhardy would consider dragons in this chapter of the life cycle to be vulnerable. A metallic dragon in this stage knows it is slowly dying, and is prepared for this eventuality. It has created a legacy that spawned legends and listened as these stories proliferated, were forgotten, and reemerged as myth.

Not the least part of this legacy is the dragon's hoard. Every metallic dragon handles this matter differently, but regardless of a dragon's kind, the distribution of its hoard will never be left to chance. Some metallic dragons bequeath their hoards to descendants. Some leave entire inheritances to promising heirs or favored charges. Still others place their hoards into the hands of organizations they fostered, ensuring that their influence will persist in perpetuity. In any event, these preparations will have been set into motion long before a twilight dragon succumbs to the ravages of old age. In one instance, a mercury dragon created an elaborate web of clues, puzzles, and traps rumored to span continents, oceans, and planes of existence, parceling out its treasure one piece at a time. It took centuries to arrange, and only after its completion did the mercury dragon finally allow itself to die.

## Death

Despite life spans that border on immortality, almost all dragons succumb to old age. (The exception is mithral dragons, which age but do not die; see page 166.) A metallic dragon, however, can choose the time and place of its demise. Whereas chromatic dragons often go out fighting, metallic dragons play out their final days exactly as planned: ceremonially, privately, publicly, religiously, or even by seeking out gods they worship. Few metallic dragons are interested in lying down to die without first arranging their personal matters. Some metallic wyrms are similar to chromatic dragons in their desire for glory, and those seek out a great rival for one last magnificent battle.

When a metallic dragon finally dies and its body is permitted to decompose naturally, its metal content breaks down and seeps into the ground, permeating the earth with veins of metal. Like chromatic dragons, metallic dragons are prone to environmental diffusion after death. The nature of the environmental change depends on the elemental energy of the dragon. For example, a gold dragon might diffuse into a fiery geyser or a scorching plain of stone.

### Dragons in Twilight

Dragons in twilight fall to one to three levels lower than ancient dragons (see "Increasing or Decreasing Level," page 174 of the *Dungeon Master's Guide*). You can also decrease their ability to recharge powers, or give a penalty to initiative and Perception checks to represent the encroachment of age.

Only a foolish or inept sage would ascribe humanoid traits to dragons. Moral precepts that people apply are based on the incorrect assumption that these creaturs have consciences. Most behave as they will, whether compassionately or pitilessly, not owing to alignment, but rather because their actions serve a larger purpose tied in with their goals. It would be fair to say that alignments have been imposed on dragons by humanoids to quantify the dragons' behavior and put themselves at ease.

## Draconic Dominion

Metallic dragons, unlike their chromatic or catastrophic kindred, rarely prey on humankind or rampage through human realms. They are not driven by the instinct to plunder or destroy. Instead, metallic dragons embody the draconic desire to dominate lesser creatures. A red wyrm might look on a human kingdom as a rich source of plunder and prey, but a gold wyrm sees that kingdom as something to be ordered to its own satisfaction. If it is especially benevolent, that gold dragon sees itself as a wise counselor, a loyal defender, and a stalwart ally of the realm. A different gold dragon might choose to reign openly over the realm, and another could be an inflexible tyrant and oppressor of the worst sort.

Even those metallic dragons that do not seek dominion over lesser races are often bound to them in other ways. Some are champions of good or evil, some are obsessed with old magic or ancient causes, and some are subtle manipulators engaged in a great game spanning the centuries. More than any other dragons, metallic dragons are interested and involved in the affairs of humanity.

## Drives

Most metallic dragons, with the exception of those that can change shape, share little in common with humanoids when it comes to their base desires and needs. In the end, chromatic and metallic dragons share similar motivations, especially when they pertain to hunting. If prey runs, a dragon feels drawn to pursue and run the creature down—but not without caution if pursuing an intelligent creature. Having the mobility and stamina to travel great distances means a metallic dragon can chase a fleeing opponent indefinitely. It stops only when its food has been caught and eaten, because there is no excuse for returning home with an empty belly.

Metallic dragons, however rational when calm, have a primal imperative to attack and kill chromatic dragons on sight, sparing little thought for their own safety and pausing only when the likelihood of failure—not death, but failure—is blatantly apparent. So powerful is this urge that if a metallic dragon reckons it can kill a nest of chromatic dragons at the expense of its own life, its instinctive mind deems that outcome acceptable. The compulsion to battle regularly causes metallic dragons to take on more than they can typically handle. Though dragons of all ages feel this urge, it's more powerful among young and adult metallics. Although chromatic dragons feel the same way toward metallic dragons, they already fight to survive in a world that vilifies their presence. For that reason alone, chromatic dragons pick their battles more carefully than metallic dragons do.

### The Family Line

Although the bonds of family are stronger among metallic dragons than among chromatic dragons, the bond between two metallic dragons that mate is limited to a finite time spent together for the wyrmlings' sake. After their offspring have departed from the lair, mated dragons are strongly drawn apart, back to solitude. If it wasn't for its powerful desire to extend its family line, a dragon would happily keep its own company. Even those dragons that have assumed humanoid forms for extended periods of time observe with bewilderment how humanoid couples and families can spend their entire lives with each other.

Although all dragons breed to ensure survival of their kind, the urge is particularly strong in metallic dragons. Sages attribute the reason to their longer gestation time and the innate awareness of how often their numbers are reduced by conflict against chromatic dragons. Metallic dragons also keep communication open among extended families. The more that a metallic dragon stays in contact with other metallics, though they are still separated by their respective territories, the easier it becomes to aid one's kin when the drive to fight chromatic dragons comes over them.

### The Hoard

Dragons of any kind deem their hoards—cascading piles of glittering coins, gems, and magic items—the marrow of existence. The hoard is why they hunt; it is the bed on which they sleep; it is the source of their self-worth. Dragons never grow bored with the acquisition of untold riches, even after thousands of years. This desire is, without a doubt, the single most important motivation in their lives. Even dragons that resist the natural inclination to possessively hoard wealth can still feel the instinct scratching in the backs of their minds, as if they are somehow missing out on treasure to which they are rightfully entitled.

LARS GRANT-WEST

Despite the constant lure of hoard-building, metallic dragons can still enjoy meaningful lives not consumed or overshadowed by the lust for wealth. Denying their nature, especially to themselves, would be futile. Better to remain introspectively aware of their weakness, to avoid letting it become an instrument of manipulation. As wyrmlings, dragons develop a psychological connection to treasure from which they never completely break free. More than leaving their parents, leaving the lair in which they were raised also means leaving the hoard around which they have played, not one coin of which travels with them abroad. When a wyrmling comes of age, it transitions from the considerable hoard of its parents to no hoard at all. This fact goes a long way toward explaining why young metallic dragons desperately start amassing wealth the moment they leave home.

### The Status Imperative

Any time a dragon interacts with a new creature socially, it immediately assesses how much of a struggle the new creature would put up in a fight. Dragons cannot suppress this instinct, even while conversing peacefully, because their predatory appetite creeps into the subtext of every spoken word. Try as they might to hide their hunting instinct, it translates through their unconscious body language. They size up creatures the way a humanoid might examine a piece of fruit in a marketplace.

For a dragon, establishing where it stands with a creature in combat allows it to adjust its posture accordingly. It lets the dragon know whether to behave arrogantly superior or—in the presence of more powerful opponents—to resort to bluster and subterfuge. Although one metallic dragon might keep this drive more in check than another, getting to know any potential prey is an automatic reaction that can't be controlled.

For this reason, disguising martial prowess is an effective way for some other creature to maintain the rapt attention of a dragon, which might otherwise categorize that creature as an insignificant threat or, worse yet, a possible meal. Not knowing where it stands against a new creature can infuriate or intrigue a metallic dragon. The dragon might invite an adventurer to a play a game of strategy, or make a sudden move to startle him or her into a revealing combat posture.

The benefits and downsides of someone concealing his or her true strength from a dragon are mostly situational. The dragon, driven by curiosity, will want to learn more about a mysterious adventurer, but then that person is the center of draconic attention, desired or not. A metallic dragon might initiate combat strictly for sparring purposes (but often without saying as much beforehand).

If adventurers intend to misrepresent themselves to a dragon, consider a skill challenge designed to fool the creature. Convincing a dragon to underestimate a potential foe might grant a bonus to attack rolls or initiative rolls. If a dragon is led to overestimate its foe, an adventurer might gain a bonus to Diplomacy or Intimidate checks. However, failing at such a ruse likely incenses the dragon, which brings an entirely different set of perils.

## Behavior

Metallic dragons exhibit a broad range of dispositions, ranging from violent territoriality to predatory inquisitiveness to simple bemusement at humanoid antics. Most metallic dragons take great pride in their powers of observation and logical faculties. They see

themselves as dispassionate and rational—though some are just as short-tempered and easily provoked as the most antagonistic of red dragons.

## Habitual Condescension

All dragons have an exceedingly high opinion of themselves. When they deign to engage in conversation with weaker creatures, dragons think they are demonstrating exceptional tolerance, and they expect that those they meet will be flattered by their attentions. Humanoids that find themselves in conversation with dragons would do well to show great appreciation for the honor; metallic dragons want their praises not only sung, but heralded loudly. Their need for affirmation does not stem from insecurity, but rather from a sense of entitlement. Metallic dragons that refrain from subjugating or preying upon humans do so because they're making a deliberate choice that goes against their true instincts. As such, they believe that in exchange for the gift of not being hunted and regularly eaten, humanoids should praise metallic dragons, and some dragons expect nothing less than outright worship.

Little separates the way chromatic and metallic dragons think. All dragons are supremely arrogant, incredibly self-centered, and strongly inclined to view lesser creatures strictly in the light of what possible uses they offer. It does not occur to dragons that humanoids exist for any other purpose than to serve the dragons' designs. The brief and trifling time that humanoids spend breathing requires direction, which they are gracious enough to provide. In the case of chromatic dragons, this attitude means they see humans and other humanoids as sources of food, treasure, or entertainment to be cruelly or callously exploited at will. Most metallic dragons, on the other hand, see humanoids as valuable resources, and carefully cultivate them over the centuries in order to achieve goals they deem appropriate. The rarest and kindest metallic dragons feel obligated to help humanoids build worthy realms and prosper.

Although it's not hard to imagine why dragons elevate themselves above virtually every other kind of creature (going by their physical stature and elemental power alone), pinning down the metallic dragons' inclination to nurture rather than neglect humanoids is more difficult. The divine answer points to Bahamut as the source, because the Platinum Dragon embodies all that was altruistic, charitable, logical, and patient in Io. The mundane answer, however, is that most metallic dragons are supremely rational creatures that see cruelty and callousness as wasteful. They therefore regard their humanoid neighbors with cold, dispassionate logic, which dictates that resources such as humanoids are best used with care. Some dragons come to believe that empowered humanoids are productive humanoids. Whether humanoids' power is real or imagined, they can achieve more when they are not devoured or robbed at random. Truly good dragons might still manipulate and sacrifice lesser creatures, but at least they do so based on the firm conviction that their guidance makes the world a better place.

The only time metallic dragons make any effort to suppress their natural arrogance toward lesser creatures is when they assume humanoid form to infiltrate their societies. To describe these occasions as trying for the dragon would be an understatement. A metallic dragon must constantly bite its tongue to blend in among the rabble. It takes practice, sometimes perfected over centuries, before a metallic dragon can make this transition seamlessly.

## A Dragon Does as a Dragon Will

Dragons are oblivious to societal impositions. The idea that a dragon would base a decision on anything other than its personal desires is entirely foreign. Even the most compassionate and fair-minded silver dragons choose to live by such virtues, not because other silver dragons or societies pressure them to do so, but because those qualities facilitate the achievement of their personal goals.

Where chromatic and metallic dragons differ is in how they interact with lesser creatures, and intelligent humanoids in particular. Although metallic dragons will not be swayed by humanoids' moral arguments, they at least recognize that people inhibit their own behavior with arbitrary laws and ethical rules (which goes a long way toward explaining why metallic dragons also regard them as lesser creatures).

When a metallic dragon listens to what a humanoid has to say, the dragon considers such an act as a privilege philanthropically bestowed, with the expectation that the dragon's time will not be wasted. A humanoid that uses this opportunity as an attempt to evoke a sense of duty in the dragon is doing nothing more than insulting the dragon, and might provoke a violent reaction. Unless a dragon favors a group of humanoids or an individual in some way, it will almost never be motivated to action by kindness.

This is not say that metallic dragons never grant aid or succor when requested, but that the supplicant must understand the dragon's egotistical disposition. The first step is for the requester to find a way to align his or her goals with the ambitions of the metallic dragon. Beyond that point, he or she must describe a way in which those goals can actively benefit the dragon. The benefit to the dragon need not be immediate. Even if it does not manifest until years or decades after an accord has been reached, the benefit is as valued by the dragon as if it had occurred right away.

It helps to think of metallic dragons not as good-natured, but rather exceedingly patient creatures that will not reflexively eat humanoids when they're hungry. If an adventurer manages to annoy a metallic dragon, there is little socially, and virtually nothing morally, that will stop the dragon from picking its teeth clean with the offender's bones.

## Anything Worth Doing Is Worth Contemplating

A metallic dragon is no more inclined than any other dragon to rush into a new endeavor. As a creature whose life spans centuries, it relishes the ability to thoroughly analyze a matter, dissecting the subject with its impressive intellect. It means to figure out all the ways in which it can either command the situation, profit from the undertaking, or both. Assuming that neither its life nor the lives of those it favors are hanging in the balance, a metallic dragon will not be hurried.

Maintaining intense focus, a metallic dragon can remain immersed in thought as it goes about its daily routine. In this state, it is aware of threats but unconcerned with how its presence and size might impact any environment through which it is passing. It doesn't acknowledge the immediate world around it, since it's too busy calculating all the possible advantages and drawbacks of some venture.

When a metallic dragon does finally arrive at a decision, it has not merely formulated a plan of attack, but also has several backup plans in case the main stratagem is somehow undermined. It has devoted considerable time to predicting any obstacles its plans might face and preemptively eliminating those hurdles before they can manifest. Mithral dragons are perhaps the most methodical when it comes to advance planning, but all dragons want absolute control over their schemes before taking a single step. They mean to win the battle before it begins, whether in business, negotiation, or warfare.

All that said, if a young or adult metallic dragon should encounter a chromatic dragon, it casts all its forethought aside and likely finds itself in a fight before assessing whether or not it can win the battle.

## Temper

Metallic dragons choose to interact with humanoids peaceably only as an effective means to achieve their desires. Sting the pride of a metallic dragon, scorn its aid, or stretch its patience too thin, and it can unleash a force every bit as destructive as any chromatic dragon.

It doesn't take much to upset a metallic dragon. Perhaps too many intrusions have been made into its territory without proper acknowledgment, or the tribute for allowing humanoids to coexist in its domain has been consistently undercut. Whatever the case, the latest insult is merely the final straw in a series of perceived offenses, throwing the metallic dragon into a rage. Even if the offense is reasonable by humanoid standards, the dragon's reaction might seem completely out of proportion to the offense. For example, when a wandering wyrmling is killed by a poacher, its metallic dragon parent might raze the closest village for not policing its residents better.

WILLIAM O'CONNOR

Although individual metallic dragons might encounter each other accidentally, peaceably, or violently, dragon society is little more than a loose collection of familial relationships. Metallic dragons fulfill their own ambitions and serve their own purposes. They do not exist within societies so much as let societies take shape around them. Putting aside legendary occasions when metallic dragons of many kinds band together to oppose a common enemy, the closest they ever come to forming a rudimentary society is represented by their loyalties to children and kin. These lasting connections have tenuously united even the most territorial metallic dragons together.

The following four sections summarize how metallic dragons think and behave when they interact with other kinds of dragons or any kinds of humanoids.

## Other Metallic Dragons

When metallic dragons oppose one another, they remain tense and ready for battle. Whether the confrontation is over territory, treasure, or a mate, metallic dragons usually defer to (or flee from) more powerful wyrms, and demand submission from (or attempt to slay) weaker rivals. Evil or ill-tempered dragons are quick to attack when they have the advantage. Two dragons that recognize each other as equals often settle on cool, wary civility, watching carefully for mistakes or signs of treachery. However, the moment blood is spilled between metallic dragons, they no longer have any use for words. In any event, dragons won't compromise. A dragon that has the advantage over its rival claims the entire prize, whatever it might be. A dragon at a disadvantage retreats with nothing.

Negotiations between metallics follow this pattern: First, the two dragons instantly assess each other's age based on size, because seniority rules supreme. Second, a contest of knowledge ensues, in which the dragons compare what they know about a sought-after prize. Superior knowledge improves the standing of a dragon to its next older age category. The metallic dragon that has the oldest "effective age" is considered the rightful victor. Although many dragons respect this outcome and acquiesce to the superior wyrm, some dragons (usually brass, iron, mercury, or cobalt) raise the stakes one step further by challenging their rivals to trial by ritual combat, the result of which trumps all negotiations. Though these battles have been known to result in death, they usually end at first blood.

### Territorial Disputes

When a metallic dragon accidentally enters the established territory of another, the average wyrm forgives the intrusion, but still boldly asserts its rightful claim. A more territorial metallic dragon, on the other hand, treats such an infraction as an opportunity to teach a younger wyrm a lesson—possibly a fatal one. Forgiveness, when offered, comes because a metallic dragon considers accidentally blundering into another dragon's territory to be a mortifying embarrassment. Metallic dragons consider territory, once staked by a metallic dragon of equal strength, to be sacrosanct. However, a covetous metallic dragon that desires the territory of a wyrm two or more age categories its junior considers such a domain ripe for the taking.

Metallic dragons of equal strength meet by invitation only (though older dragons often disregard this formality when associating with younger wyrms). If a message requests an audience, such as when a young dragon seeks tutelage from an older wyrm, a gift of treasure should accompany the request. The value of this treasure forever defines the relationship between the two dragons.

Metallic dragons that encounter each other in the wild outside their respective territories normally acknowledge one another openly, but travel their separate ways. Although some metallic dragons have been observed giving each other this respectful distance, many evil or bad-tempered metallic dragons use these opportunities to eliminate younger dragons that might eventually threaten their resources.

Generally speaking, the purpose of doing so must be extremely important for a metallic dragon to leave its territory and hoard. All metallic dragons accept that they suffer from a powerful attachment to their hoards. When they meet, unless they're actively attempting to thin the competition for resources or territory, they clear a path for one another. They silently acknowledge how vital a purpose must be to lure another dragon from its home. Although a metallic dragon would never characterize its attachment as a weakness, separating it from its hoard for too long can nonetheless be a tool of manipulation.

### The Council of Wyrms

Obscure texts refer to an event known as "the Council of Wyrms." Much of the lore surrounding this event has been lost to history. What little can be assembled tells of the first metallic dragons coming together to form an accord shortly after Bahamut and Tiamat arose from Io's death. These dragons immediately recognized the chromatic spawn as their shared enemy and forged a lasting pact. They vowed to put aside their differences and monetary obsessions to wage war against chromatic dragons whenever the chromatics became a collective threat.

## Chromatic Dragons

With few exceptions, a metallic dragon's rational persona disappears when it spots a chromatic dragon. It engages the dragon on sight, regardless of the consequences to itself or others. If the chromatic dragon is too daunting for one metallic dragon to handle, the metallic immediately seeks out allies and returns with greater numbers to assail the threat.

When battle is joined, metallic dragons fight savagely, eviscerating bellies, gouging eyes, and hamstringing legs. They slaughter chromatic dragon males, females, and wyrmlings without prejudice. After the slaughter ends, a metallic dragon resumes its normal personality as if nothing unusual had transpired, despite being covered in blood and gore. Once, when asked about its astonishing outburst of wrath, a silver dragon replied, "They cannot be allowed to reach critical numbers." Despite their drive to kill, most metallic dragons do not crusade against chromatic dragons. They merely deal with such wyrms as they appear.

Metallic dragons regard stories of cooperation and even forbidden love between the two groups of dragons as tales of fiction. Denials aside, reliable historical records document occasions when ancient and twilight metallic dragons cowed or manipulated chromatic dragons into their service, culminating with the chromatic dragons betraying their own kind, and resulting in the death of even more chromatic dragons.

## Catastrophic and Scourge Dragons

Metallic dragons no more acknowledge catastrophic or scourge dragons than they would violent storms or enduring pestilences. In the eyes of metallic dragons, these other dragons fill necessary roles in the cyclical pattern of the world that metallic dragons witness countless times throughout their lives. Only when catastrophic and scourge dragons fail to respect this objectivity do metallic dragons take umbrage and offer resistance. A metallic doesn't care if a catastrophic or a scourge dragon runs roughshod over the world, as long as that dragon's interests aren't in its path.

## Humanoids

Metallic dragons see value in cultivating relationships with humanoids. This desire is so profound that after millennia of observing humanoid activities, some metallic dragons (including almost all mercury and steel dragons) have developed the innate magical ability to assume humanoid shapes. Their motivation

JASON A. ENGLE

is surprisingly simple: All metallic dragons crave power or wealth, and they frequently crave both. Indeed, whenever they seek influence or treasure, dragons are straightforward. As humanoids began propagating throughout the world, metallic dragons saw great potential in the scurrying little creatures, not for the sake of fostering their desperately short existences, but as creatures that could further the dragons' own agendas. Seeing this potential right away, metallic dragons realized that their goals could be more efficiently achieved through interaction rather than destruction.

Metallic dragons learned early on that to conduct any meaningful business with humanoids, they needed to relate (and be relatable) to them. Although that sometimes means assuming a friendly face, it can also mean impressing them with the majesty of draconic presence. After all, humanoids respond well to fear. In fact, many formidable metallic dragons greatly enjoy commanding armies of reliable humanoid minions to do their bidding.

Metallic dragons that can shapeshift have two faces: One for the social world (their humanoid guise) and one for the solitary life (their dragon form). As dragons, they want to be regarded with awe and feared by nations, but also left to their own devices. In their humanoid forms, they want to be easy to approach, to be respected by merchants, and to travel without fanfare. When they forge relationships with humanoids, shapeshifting dragons usually do so in humanoid form.

## Societal Roles

When they interact with humanoids, metallic dragons can take on many types of roles, from helpful to tyrannical.

### Advisor

Metallic dragons that treat knowledge as the greatest treasure become sources of obscure information from which the rest of the world can benefit. These dragons act as oracles that foresee the future or librarians that share the lore stored in their minds. A dragon in the business of advising humanoids might stay highly accessible to encourage solicitation of their experiences or skills. Alternatively, a dragon might sequester itself from prying questions to meditate or research in peace. Gaining an audience with such a dragon is difficult, and usually requires braving treacherous terrain, but the knowledge it imparts is always valuable.

### Customer

Metallic dragons that value quality over quantity rely on humanoids that specialize in acquiring rare goods. Humanoid crafters make a higher grade of product, and can make treasure to order. A business that supplies a dragon connoisseur can earn a profit for countless generations. These transactions are usually conducted in settled or metropolitan regions. Alternatively, metallic dragons might hire adventuring humanoids to seek out coveted treasures. In such cases, metallic dragons that can change shape maintain their humanoid disguises while interacting with people.

### Gatekeeper

Metallic dragons sometimes stake claims to territory along dangerous or well-traveled humanoid routes. Once established, such a dragon demands tribute from humanoids that want to pass through the region. If they don't pay the toll, the dragon prevents movement through its domain. If the region is dangerous, the tribute guarantees that the dragon will protect travelers through the hostile area. Gatekeeper dragons can become integral parts of trading economies, regarded as yet another levy, tax, or toll.

### God

If primitive humanoids want to worship a metallic wyrm as their deity, the dragon won't argue. Evil metallic dragons prefer having this type of relationship with humanoids, since it requires little effort in exchange for the praise and wealth that is heaped at their feet. In return for worship, metallic dragons grow fiercely protective of their worshipers. Dragonspawn, kobolds, lizardfolk, and troglodytes often become metallic dragon worshipers.

### Guardian

Metallic dragons that feel inclined to guide and protect lesser creatures adopt burgeoning centers of civilization, from small villages to teeming capitals. In exchange for the constant presence of the metallic dragon, the community directs major portions of its revenue to the dragon's hoard. The investment, however steep, is advantageous to both parties. With a dragon looking out for the populace, the community is shielded against outside threats, and its standing army (if it has one) becomes largely redundant. The civilization can focus on its own prosperity. This was the case in the dragonborn empire of Arkhosia, whose capital city became a meeting place for all metallic dragons. In addition to dragonborn, metallic dragons are likely to become guardians of dwarves, elves, halflings, humans, and tieflings.

### Manipulator

Whether puppeteering the politics of empires or bending the ears of prominent decision makers, metallic dragons operate behind the scenes, and as a result their influence is often not suspected. These dragons traffic in blackmail, favors, kickbacks, and (most important) knowledge. Such dragons nest near

WILLIAM O'CONNOR

the humanoid populations they control, and those that can change shape disguise themselves to blend in among the population. Metallic dragons either worm into the jeweled capitals of thriving nations or encourage humanoids to build in the dragons' domains, enticing the people by granting permission to harvest valuable minerals found there. As these settlements grow over time, the metallic dragon quietly remains in the background, pulling the strings of city leaders as needed.

### Tyrant

Some metallic dragons find that nothing motivates lesser creatures more than fear. These dragons behave more like chromatics, with little regard for lives other than their own. Humanoids serve as mere tools, with a finite ability to manipulate, extract, and refine valuable minerals out of the ground. They are resources to be expended rather than individuals to be acknowledged. People in draconic regimes live under the constant threat of death or persecution, but metallics do recognize that some hope must be allowed. As such, they empower select humanoids with limited authority, if for no other reason than to police others of their own kind.

### Language

Although chromatic and metallic dragons are instinctive enemies, they aren't dissimilar enough to have developed independent languages. Chromatic and metallic dragons speak and write identical versions of Draconic. Some sages claim that the two types of dragons emphasize different parts of the same words, but these idiosyncrasies can also be attributed to personality and mood. See the "Language Details" and "Basic Vocabulary" sections on pages 24 and 25 of *Draconomicon: Chromatic Dragons*.

Metallic dragons follow the same naming conventions that chromatic dragons do. They can be named before birth, name themselves, adopt names they are given, or change their names to reflect major events in their lives. Metallic dragons that take humanoid forms, however, choose names for their shapes befitting the races and cultures they infiltrate. The only constant with these names is that they reflect the personas of the humanoids the metallic dragons become, as if the names help the dragons remember to stay in character.

Dragons of any variety worship deities only reluctantly, and they do so in a much different spirit from that of devout humanoids. Instead of humbling themselves before the deities, they strike bargains, seeing divine beings as strong allies and examples worth emulating. Dragons have little patience for pious rituals and behavioral restrictions. They tolerate such limitations only if it helps their pursuit of divine knowledge and righteous power.

## Bahamut

The celestial platinum dragon who embodies the fairness, nobility, and strength of Io, Bahamut represents the foundation of metallic dragon worship and is universally respected by all metallic dragons, regardless of their faith. Strip away everything else, and Bahamut will always be the wyrm who drove Tiamat into a frightened retreat. Metallic dragons that battle against chromatics draw inspiration from his original struggle. When his worshipers conduct themselves in the world, they do so with the dignity of Bahamut. As they dispense justice onto lesser creatures, they ask what Bahamut would do in their place. When they charge into battle against those that oppress the weak, they believe that Bahamut invigorates their attacks.

**Typical Followers:** Bronze and silver dragons. Virtually all metallic dragons invoke Bahamut's name for strength as they launch into battle against chromatics.

## Bane

The god of warmongering, subjugation, and tribute, Bane appeals to metallics that rule by fomenting fear. By honing their martial skill, his followers master fear and spread terror. Since dragons inspire fear merely by existing, Bane favors them. They can single-handedly wage war against an army or decide the outcome of a battle. Metallic dragons pay homage to Bane by fighting when they have not been asked to do so, and then demanding payment for their service. Metallic dragons also honor Bane by making sure neither side of a conflict definitively wins. They do so by switching sides to sustain the war or by leaking information to opposing sides.

**Typical Followers:** Brass, iron, and mercury dragons.

## Erathis

Nothing is more important to dragon followers of Erathis than achieving stability through invention and lawfulness. Although dragons usually avoid living within societies, certain metallics protect civilizations they have deemed worthy. Metallic dragons that protect rising empires as stalwart guardians, or that invisibly manipulate dynasties by guiding them toward prosperity, serve the goals of Erathis whether they mean to or not. As such, metallic dragons study her teachings to take advantage of any divine sanction their plans might already warrant.

**Typical Followers:** Gold and bronze dragons (which have expansionist tendencies), and silver dragons (which believe in the value of civilization).

## Ioun

Virtually all metallic dragons embrace the god of knowledge and prophecy. As creatures of incredible patience and extended life, dragons seek Ioun's insights into both the nature of creation and the unforetold future. If metallic dragons hold any one deity in equal reverence to Bahamut, it would be Ioun for this reason. All dragons have an interest in the ability to accurately predict the future, especially those that work machinations that unfold across centuries. Dragons consider all the angles of a long-term venture before committing to a course of action. Despite how highly metallic dragons regard their own intellect, even they must acknowledge that complications can arise that they couldn't foresee. The ability to minimize those problems by looking into the future is more prized than platinum to many dragons.

**Typical Followers:** Mithral and orium dragons.

## Pelor

A seasonal god who exemplifies summer, the sun, and time, Pelor opposes evil in all forms. Though many dragons are not moved by definitions of good and evil, metallic dragons that feel compassion for lesser creatures and save communities from suffering are quintessential forces for good. If the light of Pelor can help protect their charges, then so much the better.

**Typical Followers:** Gold, silver, and steel dragons.

## Tiamat

A metallic dragon would have to catastrophically lose its way before following the path of Tiamat, yet many have done exactly that. Tiamat represents all that is antithetical to metallic dragons, and especially to their predatory imperative to attack and kill chromatic dragons on sight. Still, with enough self-loathing, metallic dragons can become willing thralls of the draconic god. Although Tiamat is always a strict deity, she demands even more from her metallic converts than from the chromatics that revere her.

She constantly requires proof of their loyalty, usually by asking them to turn on their own kind. If a metallic dragon knows where to find wealth, regardless of familial bonds or lasting friendships, the dragon must plunder in Tiamat's name. In return, she promises the strength to prevail against those that would seek reprisal, and a swift death to weaker opponents.

**Typical Followers:** Iron dragons, and particularly greedy or envious adamantine and copper dragons.

## Exarchs

Deities operate in the mortal world primarily by proxy through their exarchs. In addition to heeding the prayers of worshipers, exarchs serve as divine intermediaries, determining what mortal events are worth mentioning to their patron gods.

The following are a few of the more prominent metallic dragon exarchs.

### Athearsauriv, Eye of Heaven

**Deity:** Ioun
**Dragon Variety:** Mithral
Athearsauriv was an oracle who saw the future not as a fixed path but as an obstacle to be overcome. No venture was wasted, because she knew well in advance whether it would succeed or fail. No battle was lost, because she foresaw every feint or lunge before her opponents attacked. Eventually, Athearsauriv could foresee the future of an idea she idly contemplated: She no longer predicted the future, but could define what would happen. Ioun opened her realm to Athearsauriv out of necessity, and the dragon now guides the fates of mortals remotely.

Dragons that revere Athearsauriv request her visions, the bewildering accuracy of which is regarded as a mixed blessing.

### Edarmirrik

**Deity:** Erathis
**Dragon Variety:** Gold
Edarmirrik, a glutton and master manipulator, infiltrated the family of a great dynasty while he was still a young wyrm. As an adult, he brokered commerce between every capital city on his territorial continent. Now an elder dragon, he manages the gold trade by proxy through a global merchant guild, shaving every gold coin in circulation to supplement his hoard. Erathis, pleased with the civilization the dragon had fostered, invited Edarmirrik to her domain. The dragon refused at first, but then the god assured him that he could still remain active in the world and sleep on his mountains of gold.

Dragons that revere Edarmirrik commend his single-mindedness and his expert management of humanoid societies.

### Thurkearvaeri the Nightdancer

**Deity:** Bane
**Dragon Variety:** Mercury
Thurkearvaeri manipulated wars in the world, but never revealed her agenda to any mortal creature while doing so. She orchestrated battles in which opposing armies would clash, and ensured that the combatants would be enraged on a personal level by having their loved ones assassinated and framing a neighboring kingdom for the deeds. When a battle reached fever pitch, the mercury dragon would appear for the first time, admit her part in causing the hostilities, then join in the bloodshed. Bane fell in love with Thurkearvaeri and successfully enticed her to his realm.

Dragons that revere Thurkearvaeri are drawn by her mystery and her wickedly rational mind, as well as her bloodthirsty nature and her ability to manipulate humanoids into war on a grand scale.

### Vivexkepesk

**Deity:** Bahamut
**Dragon Variety:** Brass
Vivexkepesk challenged every chromatic dragon he could find, young and ancient alike, and relentlessly hunted these creatures. As a side effect, his battles leveled towns, shook the earth, and shattered the landscape. The gods readied to smite Vivexkepesk to prevent this destruction, but Bahamut intervened, volunteering to personally fight the brass dragon and calm its dangerous rage. Miraculously, Vivexkepesk managed to keep the god constantly off balance. Seeing that the brass dragon merely wanted a challenging opponent, Bahamut offered him the opportunity to become an exarch, so he could fight Bahamut's greatest foes.

Dragons that revere Vivexkepesk respect his ferocious combat prowess and his refusal to back down, even when he's fighting a clearly superior opponent.

### No Deity at All?

Metallic dragons are prone to hubris when they compare themselves to gods, seeing the potential for their own deification. Although all dragons carry themselves with an arrogant sense of entitlement, metallic dragons' interactions with lesser creatures feed their ambitions. Metallics are often worshiped as gods in their own right. So although metallic dragons devoted to a deity do exist, they number far fewer than chromatic dragons, whose constant fight to survive causes them to seek a higher power's aid more frequently.

For the most part, the previous material in this chapter applies to all metallic dragons. What follows discusses each kind individually, offering further insight into their personalities, mannerisms, environment, and preferred means of hunting and fighting. These are not ironclad assertions; each kind of metallic dragon might prefer a certain type of treasure or environment, but metallics don't necessarily restrict themselves to the examples given.

In addition to the "main" metallic dragons, seven new varieties appear in this book. Some have appeared previously under other names, while others are recent discoveries, but all are as much a part of the metallic dragon family as the famous gold and silver dragons.

## Adamantine Dragons

Also known as cave dragons, or occasionally Underdark dragons, adamantine dragons are little known on the surface world. Although not the most intelligent of dragons, adamantine dragons are far smarter than their brutish, short-tempered behavior would suggest.

### Lairs and Terrain

Adamantine dragons treat their territories as their personal fiefdoms, ruling over all creatures within. Although they demand obedience and respect at all times, they also take their duty as "ruler" seriously, protecting their subjects (or at least the obedient ones) from attack.

Most adamantine dragons dwell in the Underdark, in lairs filled with great caverns and twisting tunnels. The central lair has ledges or chambers at multiple heights, with at least two or three means of egress large enough for the dragon's bulk.

If Underdark (or at least underground) "kingdoms" aren't available, adamantine dragons lair in rocky mountain ranges, making their homes in caves surrounded with the comforting weight of rock. These adamantine dragons sometimes come into conflict with the equally territorial blue dragons that dwell in high, storm-shrouded mountains.

### Favored Treasure

Adamantine dragons prefer treasures that remind them of, or are native to, their home territory. For instance, an adamantine dragon whose Underdark "kingdom" includes rich veins of silver likely prefers silver treasures over other valuable metals or gems.

### Physical Characteristics

Adamantine dragons are a dark metallic hue. Some underground dwellers that have never seen a true black dragon call adamantines by that name. Their scales protrude in a bladelike fashion, ruffling like feathers when the dragon is irritated or hunting. An adamantine dragon has no horns per se, unless you count the row of spines that begins at the back of its head and runs the length of its body and tail. Its snout is sleeker than those of other dragons, vaguely resembling a snapping turtle's. Oddly, adamantine dragons smell not only like metal, but also vaguely oily, like a well-maintained blade or suit of armor.

### Diet

Adamantine dragons prefer large amounts of smaller prey, a predilection developed over long years underground, where larger game is often unavailable. They particularly enjoy the taste of giant spiders and insects, but anything large enough for them to notice is large enough for them to eat. They don't make a habit of hunting sentient prey, but most won't turn it down if it's available. An adamantine dragon won't consume any of its "subjects" (see "Lairs and Terrain"), unless the only other option is starvation.

Unsurprisingly, given their physical abilities and favored terrain, adamantine dragons prefer to fight and hunt from the ground, flying to close on prey but then landing for the duration of the battle. That said, an adamantine dragon knows the terrain of its territory well and uses short flights to pass over obstacles intended to injure or impede its foes. Even in large caverns or mountain passes, an adamantine dragon prefers to patrol its territory on foot, the better to become familiar with the region.

### Dragons You Can Fight

In previous editions of the Dungeons & Dragons® game, metallic dragons were portrayed as staunch defenders of good, and player characters rarely found reason to battle them. That's changed now. Although some metallics—especially among the silver and gold dragons—are fearsome champions against evil, you can't tell a metallic dragon's alignment just by looking at it anymore. Some metallic dragons are evil, and many are unaligned—which means they won't hesitate to battle heroes who intrude in their territory or interfere in their business.

Even otherwise benevolent dragons might find themselves at odds with good heroes. For example, a copper dragon might be momentarily overcome by its natural avarice, while a silver dragon might decide that honor demands that it slay intruders it catches in a shrine it is sworn to protect. Every dragon poses a potential threat to a party of player characters, regardless of the sheen on its scales.

### Personality and Motivations

Highly territorial and exceptionally proud (even for a dragon), an adamantine dragon demands obedience and respect in its petty kingdom, and it might kill intruders without question. That said, if an explorer talks quickly and is respectful, an adamantine dragon won't necessarily be hostile. It might be willing to enter into treaties, agreements, or alliances with its neighbors.

On the other hand, offering a single insult is often enough to sour negotiations or trigger an instant attack. Adamantine dragons brook disrespect from nobody, and ignorance or carelessness is not an acceptable excuse.

### Relations with Other Creatures

Adamantine dragons rarely encounter other metallic dragons, except when those that live in caves delve too deeply into the Underdark. However, they frequently clash with purple dragons, since the two kinds prefer the same type of territory. Although adamantine dragons are more powerful (assuming comparable age), purple dragons tend to be smarter, wilier, and more likely to use minions, making the contests more even.

Most frequently, adamantine dragons interact with other Underdark-dwelling sentient creatures, particularly humanoids. These include grimlock and troglodyte tribes, which adamantine dragons typically annex, and drow and duergar communities, with which they frequently war. Although adamantine dragons demand obedience from all creatures in their "kingdoms," they don't demand that their "subjects" do anything. (They're far less likely than purple dragons, for instance, to use humanoid spies or assassins.)

## Brass Dragons

Although weaker than many other varieties of dragonkind, brass dragons are still powerful creatures by any measure. They have a strong mercenary streak and often agree to serve as guardians or battle-champions for anyone willing to pay suitably well.

### Lairs and Terrain

Brass dragons crave sunlight and dry heat, so naturally they prefer deserts, arid savannahs, and similar areas. They spend hours lying on sunning rocks high above the desert floor. Brass dragons also live in lands where hot, dry conditions are seasonal—for example, a temperate forest that sees little rainfall in the summertime. Brass dragons residing in such lands either migrate to warmer climes or retreat to subterranean lairs during the cool, rainy months.

Brass dragons make their lairs in rocky caves atop mesas, steep hills, or the walls of inaccessible canyons—preferably facing east, so they can enjoy the morning sun. Typically, an intruder can access the lair only by scrambling or climbing up a long, exposed, barren slope that offers the dragon plenty of opportunity to spot the visitor's approach.

TOMÁS GIORELLO

### Favored Treasure

Although they value all precious items, brass dragons are especially fond of handcrafted work in materials such as bone, wood, stone, or fabric (particularly weaving).

### Physical Characteristics

A prominent head crest shaped like a plowshare distinguishes brass dragons from other varieties. Young brass dragons are a dull, mottled brown. As they age, their color becomes more brassy, taking on a warm luster. They have a faintly acrid odor reminiscent of hot, oiled metal.

### Diet

Brass dragons typically hunt on the wing and prefer to eat mountain goats, sheep, antelope, and other

such creatures. Only the most evil of brass dragons would choose to devour an intelligent creature, but a brass isn't above helping itself to a traveler's mount and leaving him or her stranded on foot. Well adapted for desert life, brass dragons can survive on almost no water.

### Personality and Motivations

Placid and curious, brass dragons are among the most talkative of dragons and are slow to anger. Even in battle, brass dragons are rarely cruel or vengeful, and they frequently allow beaten enemies to retreat. However, they are still dragons—conceited, proud, touchy creatures. Like other dragons, brass dragons take offense at rude or disrespectful behavior. However, when other dragons might lash out in anger, brass dragons are more likely to break off a conversation and leave. Anyone foolish enough to persist in the face of such a clear warning sign deserves whatever he or she gets.

Shameless mercenaries, brass dragons readily strike deals to fight in exchange for rich rewards. The better ones rigorously fulfill their bargains, but less honorable members of the race are lazy and dishonest and have a nasty habit of breaking inconvenient deals if something better comes along. Pure self-interest governs most brass dragons, and they never take sides without first asking, "What's in this for me?"

### Relations with Other Creatures

Brass dragons associate with desert-dwelling humanoids—usually dragonborn, humans, or gnolls. Older, more powerful dragons strike alliances with azers, fire giants, or efreets. Brass dragons make many acquaintances, ranging from other intelligent monsters such as sphinxes or nagas to notable humanoid princes, wizards, or bards. Evil brass dragons create networks of minions and informants instead. Either way, a brass dragon is exceptionally well informed about events in nearby territory.

Brass dragons strongly dislike brown dragons, since they prefer the same environments and compete for territory and influence.

## Bronze Dragon

Duty-bound and honorable to a fault, bronze dragons commit themselves to order and are among the greatest and most devout champions of that ideal. To a bronze dragon, there is no greater calling than to ensure a universe governed by law, where chaos and corruption can gain no foothold. For most bronze dragons, enforcing justice in their lands is enough. But for a few, only absolute order can sate their ethical hunger—even if it means they must act as despots and tyrants, for the ends justify the means. As a

ZOLTAN BOROS & GABOR SZIKSZAI

result, bronze dragons come into conflict with other peoples, even when their values and beliefs are not worlds apart.

## Lairs and Terrain

Bronze dragons choose lairs on rocky islands, granite cliffs overlooking the sea, or other coastal locales. Some bronze dragons eschew land altogether and stake out underwater territory in kelp beds, submerged caverns, or sunken ships. In rare cases, a bronze dragon might protect or rule a community of underwater creatures.

Freshwater bodies can sustain bronze dragons too, though adapting to these environments is slow and painful. Though rare in these environs, a bronze dragon might dwell in a large lake, inland sea, or even a deep river if the available prey can sustain it. Bronze dragons have little love for cold, and are unlikely to live in arctic climes, ceding those areas to cobalt and white dragons.

A bronze dragon's lair is usually accessible by water, its entrances concealed by the waves. Water-filled passages connect to dank and dripping mazes. The dragon uses natural caves to house servants, store treasure, and trap intruders. It might incorporate traps in the form of deadfalls, slides, and shifting tunnels. Often a secondary entrance, usually a chimney, allows the dragon an escape route. Such a passage, often disused and overgrown with creepers or buried under debris, can be even harder to find than the main entrance.

## Favored Treasure

A bronze dragon's hoard consists of whatever the dragon can scavenge from the sea, sunken cities, lost ships, or vessels it attacks. Since saltwater can corrode most metals and other valuables, the dragon's hoard often consists largely of ceramics, statuary, and gemstones—durable goods that are immune to the effects of the dragon's environment.

## Physical Characteristics

A ribbed and fluted crest sweeps back from a bronze dragon's cheeks and eyes, and the ribs end in curving horns, the largest growing from the top of its head. Webbing along its limbs and between its claws helps it swim. A bronze dragon's scales are a metallic dark brown, with a few highlights that look more like polished bronze.

## Diet

Bronze dragons have voracious appetites, so they can't be too selective about what they eat. Most live on the sea's bounty, with kelp, fish, and crustaceans as their dietary staples. They prefer shark to other sea creatures, and often deplete local populations, leaving no sharks alive for leagues around. Like other metallic dragons, bronze dragons don't consume intelligent creatures, though many make an exception for sahuagin, whose flesh is similar to shark meat.

## Personality and Motivations

Bronze dragons have an elevated sense of purpose, believing their way is the proper way. Disagreement, they believe, arises from willful ignorance, and they have little patience for fools. A bronze dragon doesn't debate and doesn't argue, and if someone pushes the dragon, it might react with violence. In fact, most conflicts with bronze dragons arise from misunderstandings.

Bronze dragons see the world in black and white, right and wrong, and they choose not to appreciate the subtlety of gray. Disappointment and frustration with humanoid subterfuge might lead a bronze dragon to act rashly, destroying an entire population out of misapprehension. Even if it is later shown to have been wrong, the dragon would not feel regret and would see the tragedy as being brought on by the dishonesty of its victims.

## Relations with Other Creatures

Bronze dragons are territorial creatures, and they do not tolerate trespassers or explorers in their lands—unless the interlopers offer some sort of tribute. A bronze dragon that settles near shipping lanes or in busy waters often demands payment to protect passing ships against sharks, sahuagin, pirates, and other dangers. Such dragons can be fierce guardians, but their prices are high, and many merchants go bankrupt meeting their demands.

On occasion, a bronze dragon might adopt a community and enforce its laws with an iron fist. It doesn't take long for the dragon to replace the ruler, and when it does, the community must abide by the dragon's rules or face extinction. Bronze dragons might rule over kobold, human, goblin, merfolk, or lizardfolk tribes. Older dragons extend their empires onto other planes, ruling devils, archons, and the like.

Bronze dragons detest evil aquatic creatures, and sahuagin are among their worst enemies. Blue dragons, though, are worse than even the sea devils, and their territories often overlap with those of bronze dragons. When a blue and a bronze meet, they clash violently, and if one retreats, it's never for long. Legends tell of bronze and blue dragons waging war for decades or centuries, with neither getting the upper hand. They spar and raid, striking and retreating until one gives up and flees for safer waters or, more likely, falls in battle.

# Cobalt Dragon

Grim and sullen in demeanor, the fierce cobalt dragons measure success by the territories they rule and the lesser creatures they subjugate. They suffer no traveler to pass through their lands without bending knee and acknowledging their power, and anyone who refuses quickly comes to regret that error. Most cobalts rule over barbaric tribes or small, remote settlements, exacting instant obedience through claw, fang, and icy breath.

## Lairs and Terrain

Cobalt dragons hate hot weather, preferring cold, gloomy lands—snowy forests, tundra, icebound mountains, or windswept downs and hills in northerly lands. Many cobalt dragons live in the Shadowfell, especially in the borderlands of Letherna or other portions that correspond to cold lands in the mortal world. They have little interest in spirits of the dead or necromantic power, instead dominating tribes or settlements of shadowborn humanoids such as shadar-kai.

Cobalt dragons make their lairs in glacial rifts, in low-lying caves hidden in wet gorges, or deep under the north-facing slopes of steep hills. Foes approaching a cobalt's lair on foot might face a difficult climb down an ice- or moss-covered cliff or might have to cross a swift, icy torrent to reach their destination. Cobalts think nothing of splashing through freezing water to enter or leave their lairs, but they rarely choose lairs that are accessible only by extended swimming.

## Favored Treasure

Cobalts prize lavishly decorated arms and armor, admiring the combination of workmanship and practicality. Bejeweled weapons litter their hoards, especially if the weapons feature blue or white gemstones. Cobalt dragons delight in arms and armor taken from long-dead challengers.

## Physical Characteristics

In addition to its dark, rich blue scales, a cobalt dragon's forward-curving, ramlike horns and its stocky build distinguish the creature. Its wing membranes are a pale blue, flecked with spots of darker blue. A cobalt has wide feet and diamond-shaped scales.

## Diet

Cobalt dragons favor large game, especially moose, elk, and reindeer. They also have a taste for bear meat, and many a cobalt carries the scars of its early encounters with full-grown brown bears or dire bears. They prefer to hunt by night, when their keen senses give them a distinct edge over warm-blooded, diurnal prey. Since they're not strong fliers, they rarely try to take prey on the wing. Good-aligned cobalt dragons don't eat intelligent creatures, but unaligned and evil ones do—especially those they regard as pests or adversaries.

## Personality and Motivations

The best way to describe the demeanor of cobalt dragons is possessive. They have a fierce, unyielding desire to hold and control anything they deem important—principally their wealth and their station. Wealth is easy to measure, of course. Like other dragons, cobalts are infatuated with their hoards, and they dream constantly of enlarging them. Cobalts measure their station by the extent of the lands they hold sway over, the strength of the people and creatures they dominate, and the tenacity with which they cling to power. Driven to demand the fear and respect of all others, cobalt dragons fiercely resist any development that might weaken their control.

Cobalt dragons are extremely forceful and demanding creatures. On meeting other intelligent creatures, they engage in physical intimidation and tests of will, determined to dominate any possible rival. Good-aligned cobalt dragons do so to determine the courage and worth of those they face; those who stand up to them win respect. Other cobalt dragons enjoy bullying the weak and are quick to maim or kill those foolish enough to show defiance without having the strength to back up their words.

Although many cobalt dragons are brutal, callous tyrants, the race isn't inherently evil. The best of them are indefatigable, defending the people they have come to rule, and they would rather die than permit an enemy to harm their subjects. However, most cobalt dragons defend their territories and subjects mainly to satisfy their own sense of station and their craving for respect, while feeling little moral obligation toward those they rule. To a cobalt, strength is the ultimate measure of worth. Minions and foes that prove strong win its grudging respect, and the dragon despises those that turn out to be weak.

## Relations with Other Creatures

Cobalt dragons assert themselves as the masters of all they survey. From a young age, they begin to subjugate neighbors that are too weak to win their respect. They count most cold-dwelling races among their subjects, including barbaric dwarves or humans, lycanthropes, orcs, ogres, minotaurs, and trolls—the fiercer the better. More powerful cobalt dragons might rule over oni or frost giants, or force monsters such as manticores or wyverns into their service.

Among dragons, cobalts compete with white dragons, silver dragons, and shadow dragons. They sneer at white dragons, seeing them as stupid weaklings (although a young cobalt is smart enough to stay away from adult or older whites), and they resent the

WAYNE ENGLAND

superior strength of silver dragons. Shadow dragons make for deadly enemies, since they are strong enough to dominate all but the oldest and most powerful cobalt dragons. To a cobalt dragon, nothing matches the ignominy of serving as another dragon's thrall.

## Copper Dragons

Charismatic, sly, and witty, copper dragons are by far the cleverest and most interesting of dragons—or so they say. Schemers and thieves, coppers tend to be charming scoundrels. Even the evil members of the race flaunt their glibness and ironic sense of humor.

### Lairs and Terrain

Copper dragons dwell in temperate hills and mountains. As exceptionally quick and nimble fliers, they prefer terrain that allows them to take advantage of their natural ability. They establish their territories near human settlements or frontiers. In fact, many copper dragons choose to live in the midst of human cities. Most have no natural ability to take on human shape, so city-dwelling copper dragons either hide in deep dungeons or vaults beneath the streets, or they come to an understanding with the local rulers that allows them to take up residence in outlying estates or royal palaces as "nobles," protectors, or advisors.

Copper dragons that have no such arrangements make their lairs in abandoned structures or ruins. An old castle, dungeon, or monastery is perfect, since such a place has thick walls and is highly defensible. Lairs with commanding views of the nearby countryside are especially prized.

### Favored Treasure

Copper dragons value fine art of any kind, especially beautiful metalwork. Well-made jewelry captivates most copper dragons, inflaming the avarice in their hearts.

### Physical Characteristics

A copper dragon is lean and sinuous. It has a prominent pair of swept-back, scale-covered horns, cheek ridges, and jaw frills. Its scales are large, glossy bands or plates, smooth to the touch. Its eyes are bright turquoise. As a copper dragon ages, its scales take on a green tinge, like verdigris on an old statue.

### Diet

In the wild, copper dragons eat small game and fowl. However, they often live close enough to civilized settlements to acquire a taste for human foods, especially wine. Not even the cruelest and most vile of copper dragons would deign to eat an intelligent humanoid. After all, a devoured victim can't appreciate the dragon's wit and beauty.

### Personality and Motivations

Quick-witted, clever creatures, copper dragons cultivate their lively senses of humor. They delight in

outfoxing and deceiving enemies, and they love a good jest—as long as it isn't directed at them. Most are insincere and facile in their dealings with other creatures, and a few are cruel and deceitful, deliberately spreading mayhem with malicious lies and subtle manipulation. The race suffers from covetousness—its chief weakness. All dragons are avaricious to one degree or another, but copper dragons are by far the greediest of the metallic dragons. So taken are they with their own charm, they can't help but believe that they deserve to have whatever they want.

### Relations with Other Creatures

Humankind and the other civilized races fascinate copper dragons. The more covetous copper dragons associate with bandits, thieves, or brigands. More than one thieves' guild is secretly ruled by a copper dragon. Coppers also have good relations with fey creatures such as eladrins, elves, satyrs, and centaurs. Copper dragons don't like to associate with stupid or bloodthirsty monsters. They want to surround themselves with followers that can appreciate their cleverness and humor.

Red dragons are natural enemies of copper dragons. Reds sometimes compete with coppers for territory, and they have no appreciation at all for the wit and charm of their smaller rivals.

## Gold Dragons

Also called royal dragons or imperial dragons, gold dragons are the apex of an already unimaginably powerful race. Of all metallic and chromatic dragons, only mithral dragons might be more powerful—but they don't often overtly involve themselves in mortal events as golds do.

### Lairs and Terrain

Gold dragons tend to favor gently rolling hills and open plains as sites for their lairs, but exceptions to this tendency abound. Gold dragon lairs can also be found in craggy mountains, in deep caves, and even in the midst of humanoid communities (though this last sort of lair is less common for gold dragons than for steel or silver). A gold dragon often settles near a society it has involved itself with or near a great source of magic it has chosen to protect. The actual terrain or climate is often a secondary concern, but golds do dislike living in frigid regions.

Though they have a few preferences, gold dragons can live almost anywhere. And, frankly, if a gold dragon wants to live somewhere, who's going to tell it otherwise? Territorial disputes are the most common cause of conflict between golds and other dragons, and unless there's a major age discrepancy in favor of the opposing dragon, the gold usually proves victorious.

### Favored Treasure

Gold dragons prefer magic items to other valuables, but a gold's hoard isn't likely to consist entirely of magic items. Gold dragons also enjoy well-crafted works of art they can admire, as well as collections of gems and raw ore that are not merely valuable but can serve as a backup larder.

### Physical Characteristics

Gold dragons are born with dull coloration that shifts to gleaming gold—and then to illuminated radiance—as they age. A gold is one of the most sinuous of dragons, graceful and flexible, and its wings are almost fanlike, running the length of its body. It has impressive horns, but they are ineffective as weapons. Facial tendrils, thin strands of muscle that appear almost mustachelike, descend from around its mouth and nostrils. These tendrils are neither strong nor dexterous, but are just prehensile enough to aid the dragon in cleaning food from around its mouth or between its teeth.

A gold dragon gives off a faint scent, which some adventurers liken to the smell of molten metal. They say this aroma is one of the few hints that a humanoid might be a shapechanged gold dragon in disguise.

### Diet

Gold dragons prefer larger prey and deliberately hunt down dangerous monsters. In so doing, they combine their biological needs with their ethical leanings. When appropriate prey isn't available, a gold dragon is more willing than other dragons to subsist on inanimate matter—preferring gems and valuable metals, which befit its high status.

### Personality and Motivations

Gold dragons are strong believers in the rule of order and the greater good, but they are also arrogant and dismissive, more concerned with unfathomable goals than with the needs of "lesser creatures." For every gold dragon champion that aids a community of humanoids, or rules it with a just and benevolent hand, there is another that has become a tyrant, demanding the obedience it deserves "by right," or crushing individual freedoms and creativity in the name of law. Even these dragons tend to view themselves as morally in the right, making the hard choices nobody else can.

Even when cooperating with or benevolently ruling other creatures, gold dragons seem dismissive of the concerns of lesser beings. This attitude isn't necessarily a sign that they don't care for the good of their subjects or allies (though some might not); rather, it's because gold dragons believe in their superiority over other races but don't necessarily understand what that means. A gold dragon watching over a community might not acknowledge the

complaints, needs, or troubles of citizens because it truly doesn't realize how bad things are. Even after dwelling for years among humans, gold dragons are frequently shocked at just how weak and fragile such creatures are.

### Relations with Other Creatures

A gold dragon sees itself as the pinnacle of living creatures and almost never acknowledges any other creature as its superior. It might do so for an older dragon, but that's only temporary. If a gold dragon serves as a mere advisor to a ruler or chooses to stay uninvolved in a region's events, it's because that dragon doesn't feel like taking on the burden of leadership, never because the dragon doesn't think it could do a better job.

Gold dragons and red dragons have a particularly strong rivalry—in part because reds resent the more powerful golds and scheme or gang up against them. Gold dragons rarely consume humanoids, unless the people in question are blatantly evil (or pose some threat to the dragon or its domain). Even a starving gold dragon won't consume a sentient being that it doesn't think deserves to die—though, of course, the definition of who deserves to die varies from dragon to dragon.

## Iron Dragons

Violent and ill-tempered, iron dragons are undoubtedly the most brutish and vicious of the metallic races. Many iron dragons are evil, and most of the rest are, at best, a particularly hungry and dangerous variety of unaligned.

### Lairs and Terrain

Iron dragons naturally favor settings that offer plenty of game and good cover. They build lairs in dense forest or broken hills—terrain that offers many hiding places for a large predator.

Iron dragons hide their lairs well. In the absence of truly inaccessible terrain, an iron dragon settles for the most difficult and tangled ground cover it can find. Caves in brush-filled forest ravines or briar-choked gulches are common iron dragon lairs. Given their tough, thick scales, iron dragons have no qualms about plunging through the thickest patches of thorny foliage. The lair usually consists of several large, unimproved antechambers—natural caves with uneven floors, jagged rocks, or hindering vegetation hanging down from the outside, often festooned with the rotting remains of previous meals—and a deeper, more comfortable den.

JASON A. ENGLE

### Favored Treasure

Treasure of any sort fascinates dragons, but iron dragons particularly love the luster and feel of gold and silver coins—the more the better.

### Physical Characteristics

Iron dragons have coarse, heavy, dark gray metallic scales. Although they might be confused with silver or mithral dragons, the other metallics tend to be much brighter in color, and their scales are smaller and finer. As it ages, an iron dragon develops rusty-brown streaks, especially on scales near major joints and on its wings.

### Diet

Iron dragons prey on midsized game, such as boar, deer, or antelope. Most regard humanoids as prey too, and they prefer small, comparatively weak creatures, such as goblins, kobolds, gnomes, and halflings. Natural ambush predators, they lie hidden in deep thickets or old ruins alongside roads until a tempting target wanders within reach of a sudden charge. Good-aligned iron dragons refrain from devouring intelligent creatures (except for the occasional goblin), but evil ones prize intelligent prey and often roam far from their native forests in search of humanoid settlements, well-traveled roads, and other suitable hunting grounds.

### Personality and Motivation

Iron dragons are governed by their base passions—hunger, greed, creature comforts (of the sort that appeal to dragons, anyway), and the desire to be feared and respected. The best of the race are sullen and reclusive, preferring their own company to that of others. Most iron dragons seek to sate their brutish impulses by devouring or robbing any creature foolish enough to intrude on their demesnes. They are not especially clever and can sometimes be outwitted through bribery, flattery, and other such tactics—their greed can easily override their natural sullenness.

### Relations with Other Creatures

Young iron dragons are easily enticed into serving other monsters as guardians or champions. Goblins and their kin especially prize iron dragons for their fierceness and their susceptibility to bribes, gifts, and flattery. Larger and more powerful monsters, such as giants, can easily bully iron dragons. No matter how their allegiance is won, iron dragons make dangerous and unreliable servants. The larger they grow, the more demanding they become. Few goblin realms successfully keep an iron dragon under control for long after the dragon reaches adulthood, and only the most powerful of masters can retain the loyalty of an elder or an ancient iron dragon.

Iron dragons dislike all other dragons, but they especially resent green dragons. Both prefer the same types of forest environs, and the sly, malicious greens frequently frustrate and outwit iron dragons with their exceptional intelligence.

## Mercury Dragon

Mercury dragons are a little bit crazy—but there's definitely a method to their madness. A mercury dragon craves variety above all else. If another creature offers a wide array of food to hunt and the opportunity to gather a hoard, a mercury dragon will serve that creature in an arrangement of convenience. Thus, mercury dragons can be found as champions, bodyguards, and assassins in the employ of greater powers.

### Lairs and Terrain

Mercury dragons hail from volcanic mountain ranges in tropical climates, and though many of them remain in such locales throughout their lives, the variety has spread far and wide. Many a mercury dragon spends its youth scheming for a way to reach the Elemental Chaos and establish a lair there. For a creature that craves variety, the ever-changing landscape of the Elemental Chaos is the perfect place to construct a lair.

But the most common lair for a mercury dragon is one provided and maintained by someone else. As long as they receive the variety they crave, mercury dragons serve as bodyguards, messengers, or assassins for powerful mages, priests, or rulers—and sometimes more sinister forces. When a mercury dragon works for another creature, the dragon takes part of a larger fortress and makes a section its own, filling it with traps to frighten off any curious lackeys and to keep its personal hoard safe.

Like any dragon, a mercury dragon hates when interlopers or thieves enter its lair. But that hatred is tempered with curiosity about why "lesser creatures" would dare to invade its domain. The traps and guardians on the periphery of a mercury dragon's lair are often nonlethal, intended to capture, wound, or frighten intruders rather than kill them outright. These protections enable the mercury dragon to toy with intruders and extract some sort of unusual experience from the event, instead of just cleaning more corpses out of the bottom of a pit trap.

### Favored Treasure

It should surprise no one that mercury dragons aren't good at assembling matched sets or cohesive collections. A mercury dragon's hoard is a hodgepodge of coins, jewelry, and items from scores of lands and dozens of eras. Older mercury dragons might seek out some items they've heard about but never seen, and they're avid treasure traders. If adventurers can

acquire some rare item from a far-off land, a mercury dragon is often willing to part with treasures from its hoard in exchange, especially if the dragon is trading away a duplicate.

### Physical Characteristics

A mercury dragon has scales of whitish-silver and a sleek and serpentine body. Its frame lacks some of the muscular bulk that other dragons have, and its scales are smaller and more closely set. Mercury dragons are peerless shapechangers, capable of taking both a humanoid form (to blend in among civilized people) and an amorphous, liquid form (for defense and to slither where others cannot go).

### Diet

A carnivore through and through, a mercury dragon always craves something different from whatever it just ate. This compulsion is more than just instinct; a mercury dragon forced to eat the same food meal after meal quickly becomes listless and difficult to awaken from sleep. Mercury dragons are enthusiastic hunters, cunning enough to plan elaborate traps for their prey. They toy with weaker prey before killing and eating it. From the viewpoint of the prey, this behavior amounts to cruelty. To the mercury dragon, it's another expression of its need to experience something different.

### Personality and Motivations

A mercury dragon acts differently from time to time, depending on how much variety it has experienced lately.

If the dragon feels as though it's in a rut, it might attack an adversary right away, then snarl, "Tell me why I shouldn't finish you off." Because the magic of its breath weapon renders a mercury dragon invisible to its prey, it can boast while hidden. What sounds like garden-variety draconic arrogance is, from the dragon's perspective, legitimate questioning. If its adversaries can engage the dragon's interest, it might regard them as more than just a meal and a momentary diversion.

If a mercury dragon thinks its life has been varied enough lately, it talks first and fights later, using its *breath weapon*, natural maneuverability, and *quicksilver form* to elude those who challenge it. Even if the challengers are trying to kill it, the dragon talks to them to understand the stakes. After all, it would be a shame to kill someone who's more interesting when alive. And a mercury dragon shows some cunning when placed in the position of prey. It happily engages in a cat-and-mouse game with hostile pursuers, confounding them and getting them to exhaust themselves before turning the tables and attacking with its full might.

An adult or older mercury dragon can magically alter its shape to appear as an ordinary humanoid, and these dragons tend to be more circumspect when not in their draconic forms. A mercury dragon might take humanoid form when hunting, serving its master on a specific mission, or when it craves to experience "life among the lesser races" for a time. But a mercury dragon lacks the steel dragon's affinity for civilized life, and the nuances of specific cultures are often beyond its understanding. Sometimes, even the basics of humanoid life are foreign to a mercury dragon. For instance, a shapechanged mercury dragon might walk into a butcher shop craving something new to eat, purchase a leg of lamb, and consume it raw on the spot while the butcher looks on in horror.

### Relations with Other Creatures

A mercury dragon will enter into a working arrangement with almost any creature stronger or smarter than itself. Such arrangements tend to be feudal in nature: The mercury agrees to serve as a guardian, messenger, or hired killer in exchange for some combination of lair space, treasure, food, and the promise of varied experience. Such relationships last as long as the master can maintain the mercury dragon's interest—and not one moment longer. Draconic folklore is replete with tales of mercury dragons that eventually turned on their masters "just to see what happens."

Mercury dragons have a natural affinity with other creatures that split their time between the natural world and the Elemental Chaos, such as efreets. Mercury dragons often bargain with efreets for passage to the Elemental Chaos (and eventually for a place to start a lair). But efreets don't offer favors lightly, they and tend to be more shrewd negotiators than mercury dragons. Many a mercury dragon seeks vengeance on a particular efreet for a bargain that didn't turn out the way the dragon thought it would.

## Mithral Dragons

No metallic dragon rivals the mithral for power and majesty. (Though golds are loath to acknowledge their inferiority to anyone.) Natives of the Astral Sea, mithral dragons have uncanny insight. Driven by visions and by Io's will, mithrals interact with other creatures only when doing so is necessary to advance their own enigmatic purposes. The few mithral dragons that appear in the mortal world do so to aid religious organizations or great causes—though such dragons can disappear as suddenly as they appear. Other mithrals traverse astral realms, inhabited or otherwise.

### Lairs and Terrain

No two mithral dragons have the same type of lair, nor do mithrals regularly spend a great deal of time

on any given terrain. When a mithral does remain in one place, it dwells in a mine (where it can sense remnants of Io's divine will by reading gemstone deposits or veins of ore) or an abandoned temple (where it can attune itself to echoes of ancient faith).

On the Astral Sea, mithral dragons live in the domains of deities. Mithrals residing in such places maintain ties to their own deities, but also experience visions related to the dead god's existence.

### Favored Treasure

Mithral dragons do not discriminate about the types of treasure they collect: They take anything that furthers their goals. Unless their goals require wealth, mithrals don't hoard treasure.

### Physical Characteristics

A mithral dragon's scales flex with the muscles beneath them, and they glow faintly. As a mithral ages, the icy white scales of youth darken to silver with white streaks. At the height of a mithral's power, intricate white striations sharply contrast its darker base color. Patterns along the dragon's claws flare with energy during combat.

A ring of spikes crowns a mithral's head, and smaller spikes extend down its neck. The spikes stand on end when the dragon is excited—particularly when it's enraged. The dragon's wings consist of radiant energy instead of flesh.

### Diet

Since living in the Astral Sea can make hunting difficult, mithral dragons developed as creatures that need little food to survive. As befits their omnivorous nature, many mithrals (both in the world and in the Astral Sea) create gardens or instruct followers to tend flocks. This delegation of tasks allows them to stay in their lairs and concentrate on their visions instead of hunting far and wide to find sustenance. Mithrals that have larger appetites make their lairs on verdant earthbergs within the Astral Sea, and they fiercely guard these precious properties.

### Personality and Motivations

Mithral dragons retain strong connections to their home plane, the Astral Sea. They speak seldom, impressing upon listeners a sense of purpose too great for words—a purpose beyond mortal comprehension. Visions from Io guide mithrals of varied faiths and callings toward an end planned millennia ago.

Mithral dragons that live in the dominions of dead deities commune directly with Io's spirit. They take action when roused from ageless slumber by visions and dreams of vast import.

A mithral dragon might associate itself with any good or unaligned deity. Mithral dragons that follow evil deities usually venerate Zehir. Some mithrals disfavor Bahamut, believing that Bahamut fails to further Io's plans and thus does not deserve devotion.

Mithrals destroy without hesitation any creatures that stand between them and their goals. Clever creatures can sway a determined mithral dragon only by convincing it that its goals—and, by extension, Io's will—are served by a temporary alliance.

### Relations with Other Creatures

Mithral dragons that associate themselves with deities also associate with creatures that share their faith. Mithrals without deities keep to themselves, except when their long-term plans benefit from others' assistance. Mithrals that allow others to serve them are commonly evil.

Mithrals deride other dragons, particularly those that collect material goods solely to enlarge their hoards, such as copper dragons and red dragons.

## Orium Dragons

Named after a crimson-hued metal used by ancient empires, orium dragons are likewise obsessed with the secrets of bygone ages. Orium dragons dwell among the crumbling ruins of forgotten fortresses and temples deep in the jungle. But those ruins are more than just a lair to these dragons. An orium dragon regards its home ruins as its most prized possession—a hoard composed of more than just coins and jewels. For an orium dragon, a life spent wresting the secrets from ancient ruins and restoring those ruins to their former glory is a life well spent. And woe to anyone that would trespass in an orium dragon's lair or try to thwart its efforts at reconstruction.

Why the obsession with the ruins of the past? More so than other kinds of dragon, orium dragons feel a strong drive to emulate the ancestral dragons in their bloodline. Many of those bloodlines were sworn to the service of ancient empires (and a few members of orium bloodlines even ruled kingdoms themselves). Thus, the present-day orium dragon sees the reconstruction of its ruined lair as act of homage, not an act of archaeology.

### Lairs and Terrain

Orium dragons favor jungles because they like the climate and love the ruins hidden within those places. In particular, river deltas and sheltered valleys attract orium dragons, since those are locales where long-forgotten civilizations likely dwelled in ages past.

The lure of unexplored ruins sometimes draws orium dragons beyond their jungle homes. Colder climes make orium dragons less comfortable (and thus more irritable), but any orium dragon will put up with great discomfort if the lure of ancient secrets is strong enough. Although an orium dragon in a

polar region would be rare indeed, it's not unusual to encounter one in a temperate climate. Orium dragons aren't accomplished swimmers or climbers, so ocean and mountain locales are unusual, though not unheard of.

After exploring a ruin and killing or subjugating any of its denizens, an orium dragon takes up residence in whatever structure was grandest in the ruin's heyday, often a temple, inner keep, or palace—even if that building is a shambles now. The dragon's servants start to reconstruct the building. If necessary, the workers take building materials from other parts of the ruins, and their reconstruction isn't necessarily accurate. As long as the building evokes the grandeur of a long-dead era, the reconstruction will please the orium dragon.

Still, the dragon might insist on changes to the structure for more practical reasons. For instance, older dragons need wider doorways to accommodate their bulk. And like any dragon, orium dragons want their treasure well protected, so many install traps or magic guardians to watch over their hoards. Orium dragons won't countenance changes that somehow diminish any remaining magic in the ruins or make it more difficult for the dragon to muse upon the ancient mysteries of the ruin.

Though the majority of orium dragons live in the natural world, more than a few call the Feywild home. Most of those are obsessed with the ancient societies of the Feywild and the strange magic of those civilizations. Some older orium dragons try to transport entire ancient ruins from the world to the Feywild, where they can then dream of bygone ages amid the vibrancy and splendor of that plane. Adventurers who encounter the architecture of Nerath or Bael Turath in the depths of the Feywild haven't discovered an extraplanar outpost of those ancient empires—they've stumbled upon the lair of an orium dragon.

## Favored Treasure

An orium dragon follows one simple rule when gathering treasure: the older the better. Antique jewelry, coins bearing unfamiliar portraits and mottos, and magic items with archaic decorations fill its hoard. The dragon gathers much of its hoard from the vicinity of its lair, but sometimes acquires items from distant places, especially if it sends its servants far afield in search of ancient mysteries.

## Physical Characteristics

An orium dragon is somewhat feline in appearance, with a lithe body and feet that look more like paws than reptilian appendages. Elder and ancient oriums use their long, prehensile tails as an extra weapon in battle. An orium dragon takes inordinate pride in its red metallic scales and spends much of its time grooming itself so that its scales gleam amid the mud of the jungle and the dust of the ruins. Older orium dragons sometimes inlay jade designs on their larger scales—part jewelry, part tattoo.

## Diet

Orium dragons, though they are able hunters and true omnivores, would rather study the secrets of the ancients than gather food for themselves. As soon as it's old enough to make its way in the world, an orium dragon intimidates and browbeats other creatures—often a tribe indigenous to the area—into bringing food as tribute. This relationship quickly becomes symbiotic, with the orium dragon providing protection for the tribe in exchange for frequent "sacrifices" of wild game—and, in some cases, captives from rival tribes or trespassing adventurers.

## Personality and Motivations

When characters first meet an orium dragon, they might be surprised at how taciturn it seems. Unlike other dragons, an orium dragon won't bluster or threaten when it first encounters strangers. Instead, it asks simple questions such as "Who are you?" and "Why have you come here?"

The orium dragon's questions are designed to categorize the strangers for its purposes. The vast majority of creatures that an orium dragon encounters fall into one of three categories: thieves, future servants, and food. The orium dragon's mild (for a dragon) demeanor lasts until it has figured out which category the strangers belong in. Then, food and thieves typically are attacked without warning, while future servants are treated to a display of power and intimidation that the orium dragon hopes will cow them into servitude. A typical orium dragon treats only other dragons as equals—and even then, it does so only after it's sure that the other dragon isn't out to steal from the orium's lair.

In the first few rounds of a battle, an orium dragon is quiet, uttering only the occasional grunt of pain (when hit) or derisive chuckle (when hitting). But as the battle goes on, the orium dragon will taunt and countertaunt adversaries who address it in Draconic. Most of an orium dragon's insults play on how young and inexperienced the opponents are—how they have no idea of the ancient power that surrounds them, couldn't possibly comprehend the magic of centuries ago, and so on.

Fundamentally, an orium dragon could be a useful ally for player characters. After all, adventurers and orium dragons tend to do the same things: go into ancient places and abscond with ancient treasure, lore, and powerful magic. But it takes superlative negotiation to persuade an orium dragon to see it that way, because its instinct to classify others into inflexible categories is so strong.

### Relations with Other Creatures

Once a creature demonstrates a basic degree of loyalty and tractability, an orium dragon adopts it as a servant and protects it from others in exchange for tribute and labor in the dragon's lair. Humans (often hunter-gatherer tribes) and lizardfolk are the most common servants, but any creature capable of understanding commands and performing manual labor is a potential servant to an orium dragon.

Once it has moved into a lair, an orium dragon faces two main problems. First, in its zeal to establish a lair, it gives less interesting parts of the ruin only a cursory search. Thus, the remnants of the ancient civilization, any guardians it might have left behind, and other creatures that moved into the ruins before the orium dragon can threaten it—or at the least harass its servants.

Second, members of the orium dragon's servant tribe might reveal the existence of their master's lair, attracting the attention of adventurers and other dragons. An orium dragon has no compunctions about taking another orium dragon's lair, and other kinds of dragons might attempt to steal a jungle lair as well.

## Silver Dragons

Silver dragons embody all that is honorable about dragonkind. Good silver dragons protect weaker creatures. The few silvers that turn to evil maintain their honor and reputation; they do not slaughter unworthy foes or engage in acts of petty malice.

### Lairs and Terrain

Silver dragons love open spaces and lofty heights. They make their homes in mountain ranges, in castles constructed among the clouds, and in the Elemental Chaos. During periods of warm weather, they retreat to the coolest, loftiest heights.

Silver dragons spend less time in their lairs than other dragons do. Wanderlust and curiosity spur them to engage in far-ranging patrols. From time to time, silvers embark on months-long journeys to the corners of the world. Because they spend so much time away from their lairs, silver dragons choose lairs among the highest, least accessible mountain peaks. Those lairs bristle with defenses and traps to protect hoards from other dragons.

### Favored Treasure

Silver dragons especially appreciate exceptionally crafted works of art. They collect carefully cut gems and intricate carvings, textiles, and jewelry.

### Physical Characteristics

The luster of a mature silver dragon accentuates its prominent neck frills, a beaklike snout, plated facial armor, and long, backswept horns. From a distance, the exceptionally fine scales appear to blend together, lending the dragon the appearance of a sculpture.

Silver dragons have a scent reminiscent of rain and evergreen needles. Their powerful build places them among the strongest members of dragonkind.

### Diet

Silver dragons, gifted with keen eyesight, hunt wild game such as mountain goats and deer. They fly gracelessly but dive with great accuracy and power. A silver commonly makes its kill by swooping from a mountainside perch. Silver dragons eat lightly for their size, taking prey only three or four times a month. They do not devour intelligent creatures, because they consider such behavior savage.

### Personality and Motivations

Silver dragons are the knights-errant of dragonkind—fierce champions of great causes. Good silvers defend innocents, assure the prosperity of civilized kingdoms, and protect and nurture noble families and young heroes. Evil silvers are rare in the extreme; those that do exist serve tyrants, guard temples of evil deities, or attempt to use evil artifacts to reshape the world.

To a silver dragon, honor means more than life. Silvers choose silence over lies and keep their word, even when doing so places them in opposition against creatures of their alignment. For example, a good-aligned silver dragon sworn to guard an oracle from all intruders discourages any adventurers from consulting the oracle, regardless of their reason, and attempts to destroy those who disregard the warning—after offering them the option to retreat.

### Relations with Other Creatures

Silver dragons admire civilized races, particularly individuals that have noble or heroic backgrounds. Silvers commonly associate with dwarves and dragonborn. In the Elemental Chaos, silvers ally with azers and djinns.

When a silver dragon wants to observe a lesser creature, it keeps its distance. A few silvers perform rituals to disguise themselves so they can walk among creatures of interest.

Silver dragons are natural enemies of red dragons, and they consider the formidable reds to be the worthiest of adversaries. In return, red dragons, which hate anything that has the potential to match or better them, kill silvers indiscriminately.

Silver dragons favor similar terrain to white dragons. When a white dragon catches wind of a silver, it stays out of the way.

KEREM BEYIT

# Steel Dragons

The sociable steel dragons prefer the company of humanoids to that of other dragons. Their reasons range from admiration to greed. Steels take humanoid form more often they remain in than their natural shape.

## Lairs and Terrain

Because steel dragons live in towns and cities, they live as humanoids do—in houses—and establish humanoid histories and families. In case an enemy discovers its identity, a steel maintains a secondary lair in a ruin, such as a crumbling temple, castle, or tower. The harder it is for other creatures to reach such a site, the better. Wards, traps, and guardians protect these refuges.

## Favored Treasure

Steel dragons invest in property and business. A steel that maintains multiple identities might hold controlling shares in two or more enterprises. Steels outfit their homes with art, antiquities, tomes, magic items, finery, and servants.

## Physical Characteristics

Compared to other metallic dragons, a steel dragon has a slight build and a small head. Swordlike frills grow from its head, elbows, and digits. Its wings consist of overlapping blades that look like feathers, and the scales on the dragon's chest resemble shields. When a steel dragon adopts humanoid form, it retains something of its draconic nature: gray eyes, pale skin, hair the color of steel, or affectations such as steel jewelry.

## Diet

A steel dragon adapts its omnivorous diet to suit its surroundings. A young steel, unaccustomed to assuming humanoid form, might take a while to realize that it needs less to eat in that form than when it's in dragon form. To the disgust and amazement of those around it, such a dragon might consume two to three times more food than a normal humanoid.

## Personality and Motivations

Steel dragons favor humans over other humanoids because of the race's adaptability and cleverness. For this reason, they live in human cities when possible.

For all their fascination with humanoid races, steel dragons cannot tolerate authority. To them, the law serves its purpose only when it maintains order flexibly, so that the dragons can protect their interests and advance their aims. A steel might spark a rebellion to overthrow an oppressive regime, even if doing so could lead to the destruction of its adopted community.

## Relations with Other Creatures

Steel dragons primarily keep the company of humans but also coexist with elves, half-elves, and dwarves. Steels particularly favor adventuring groups that operate on the fringes of established order and fight the despots that the dragons also oppose.

Opposition to tyranny pits steel dragons against gold dragons, bronze dragons, and chromatics. Disagreements with other dragons rarely blossom into violence, however; steel dragons cause trouble for their kin in subtler ways.

CHAPTER 2

# DM's Guide to Dragons

*The woman winked, and the flesh of her face started to flow like water. Her head lengthened as her auburn hair faded into thin air. Then her skin rippled, transforming into gray scales, and she loomed taller as her body stretched to accommodate its new, serpentine dimensions.*

*The voice, though an octave lower, was unmistakably the same: "Were you expecting me to be curled up on a pile of gold coins or something?"*

**Every dragon** in a D&D game is there because a DM put it there. Some await intruders at the center of trap-infested lairs. Others cast long shadows across the countryside, pillaging at will. But metallic dragons in particular are too versatile to be defined by stereotypes. They can be wise counselors, deadly assassins, intermittent allies, or frustrating rivals.

In this chapter, you'll see ways to nudge metallic dragons off their piles of treasure and into the narrative of your game. In particular, you'll learn about:

- **Dragons in the World:** The many campaign roles a dragon can fulfill give you an arsenal of plot elements for any sort of campaign.
- **Draconic Encounters:** Because dragons are solo monsters, crafting encounters with them requires some care. In addition to the standard combat encounter, you'll see examples of social challenges, subdual battles in which the object is to convince the dragon of your worthiness, and traps used by dragons to guard their lairs.
- **Adventures:** In these adventure outlines, you'll see how dragons can be enemies, allies, neutral parties, or objects around which the entire narrative revolves.
- **Draconic Campaigns:** The players will admire and loathe the dragons they meet in these campaign arcs. As each campaign reaches its climax, the players will realize that some dragons are worthy of both admiration and condemnation.
- **Draconic Organizations:** Metallic dragons surround themselves with worthy allies, whether the dragons are trying to be a force for good in the world, to overthrow tyrants, or to safeguard an old prophecy. The characters might be just the allies they need.

RALPH HORSLEY

RICH

Metallic dragons are everywhere in the world of D&D, both geographically and thematically. A metallic dragon can be the most steadfast ally the characters have, or their most confounding enemy. Dragons have what adventurers want, whether that's ancient lore, access to power, or just a big pile of treasure. And metallic dragons specifically have a more nuanced, versatile history than their chromatic counterparts. They're not just "the good dragons." Some are noble, wise, and true, but others are as scheming, arrogant, and venal as any chromatic dragon.

## Metallic Dragon Patrons

A copper dragon working with the characters might be an advisor, suggesting future adventures and providing key clues. The dragon that sees itself as a customer, hiring the characters and insisting that they adhere to its contracts, will behave in a much different way. If the dragon wants to be treated as a god and issues edicts that it expects the heroes to follow without question, it adds a different flavor to your campaign. Yet in all three cases, the dragon's campaign role is the same: patron.

A patron is a powerful creature that sends the characters on missions, provides key campaign information, and sometimes delivers rewards. Played well, a metallic dragon patron can be one of the DM's best friends. It can deliver exposition and explain to the characters (and by extension the players) how the world works. Its lair can serve as the characters' headquarters. The dragon can provide rewards out of its hoard, and it can send characters on all sorts of quests.

Dragons have a lot of attributes that make them good patrons. They have wide-ranging interests, so it's easy to justify almost any quest you want to send the characters on. They live in lairs, so they tend to stay in one place. And they're haughty and arrogant enough that you should have no problem hamming it up when you portray a dragon patron.

But dragon patrons also have some drawbacks. Because dragons are themselves powerful, consider ahead of time why the dragon sends the characters on quests. You want an answer ready when a character asks, "How come you don't just fly over there and do it yourself?" And because a dragon's power is tied to its age, a dragon patron doesn't increase in power at the same rate that the characters do. When the relationship between the patron and the characters changes with growing character power, you can decide whether you want that relationship to evolve into an alliance among equals or into a rivalry that the characters must contend with.

*Draconomicon: Chromatic Dragons* introduced the notion of draconic patrons. This campaign role is a relatively rare occurrence among chromatic dragons, but metallic dragons serve as adventuring patrons with far greater frequency. Some do so as a means of exercising their own power and authority through proxies, rather than risking their own lives or expending their own effort. Some do so purely for the social interaction. Some, such as chromatic

ZOLTAN BOROS & GABOR SZIKSZAI

dragons that serve as patrons, have their own agendas or evil schemes. And others, as in the tragic tale of the dragon known to mortals as Silvara (page 214), do so because they genuinely want to help other races overcome the evils that beset them on a daily basis.

Regardless of motivation, a metallic dragon patron normally provides the characters with funding, shelter, knowledge, and advice. (The latter often takes the form of cryptic hints rather than overt information, especially if the dragon wants to obscure its true motives, nature, or reasons for helping.) Only rarely does a draconic patron assist its adventurers in any physical capacity.

## Missions and Endeavors

Since metallic dragons tend to be both more subtle and more social than chromatic dragons, their reasons for using adventurers as proxies are rather broader and can be adapted to fit the needs of your campaign. Some of the most common reasons that dragons use proxies include the following:

- The dragon thinks the objective isn't terribly important or is too time-consuming to warrant the dragon's full attention.
- The dragon can't accomplish the objective on its own.
- The dragon thinks the objective is too dangerous to attempt itself.

There are times when a dragon might want to keep its involvement in an overall endeavor secret. The dragon might then engage proxies to pursue missions related to larger endeavors such as these:

- Guiding the fate of a mortal family, community, or organization from behind the scenes.
- Acquiring a magic item that the dragon doesn't want its rivals to know it has.
- Completing a goal or task that borders on violating (but doesn't quite break) an oath or religious precept.
- Thwarting an enemy without that foe knowing who was responsible.

Sometimes, the objective is a secondary reason for a dragon to use proxies. The dragon's actual reason might be something such as the following:

- To know if the characters can be trusted with a more important endeavor in the future.
- To learn if the mortals of the region might be able to develop sufficient skill and power to pose a threat, either to the dragon itself or to its allies or enemies.
- To determine if the characters are part of a particular prophecy or religious revelation and, if they are, how best to manipulate them to the dragon's ends.

Another possibility is for the endeavor to be something the dragon wants the characters to find for their own good. Possibilities include:

- A magic item the characters can use to thwart some great evil (or some enemy of their patron's).
- A piece of knowledge or lore the characters will stumble across on their way to completing their assigned mission.
- An opportunity for the characters to grow more skilled (that is, gain levels), perhaps to make them ready for a particular enemy or so the dragon can make more effective use of them later.

## Individual Patrons

Unlike chromatic dragons, which tend to connect with humanoid adventurers only as adults or elder dragons, even very young metallic dragons might employ humanoids. This might be because they don't feel powerful enough to accomplish their objectives, or it might be a means of learning how to interact with the more powerful individuals in humanoid society. Similarly, although ancient chromatic dragons tend either to be loners or to have already established a network of slaves and servants as they age, metallic dragons retain their social nature even into their twilight years and, thus, might continue to take up the role of patron to adventurers.

Bronze, gold, mithral, orium, silver, and steel dragons are more likely to become patrons of adventurers than other kinds of metallic dragons. Bronze and gold dragons often prefer to have a few trusted operatives rather than a wider variety of proxies. Cobalt dragons contact humanoids only when the strength and power of a particular party impresses them, and copper dragons do so only when it seems more profitable than other alternatives. Brass, iron, and mercury dragons, which often find themselves working for others, almost never take up with adventurers, and adamantine dragons do so only when a party involves itself in events in or near the dragon's domain.

*Draconomicon: Chromatic Dragons* offered a number of sample chromatic patrons intended to serve as models for specific types of patrons. That book goes into detail, but here is a quick summary:

- The open patron is up front and honest with the characters about its purposes and draconic nature.
- The hidden patron keeps its draconic nature hidden and might work through proxies, but is otherwise truthful with the adventurers.
- The deceptive patron hides its true nature and also deceives the adventurers as to the true objectives of the quests it offers. It means to use

the characters to further a goal they might not approve of.

- The intimidating patron demands obedience and expects, by virtue of its strength and power, to be obeyed.

These types of patrons are quite common among metallic as well as chromatic dragons. The roles of guiding patron and controlling patron (detailed below) can appear among chromatic dragons, but they are more common among metallic dragons.

As with the samples in *Draconomicon: Chromatic Dragons*, you can use these characters as they are or as models for designing your own patrons.

**Jolvadiris, Guiding Patron:** An adult steel dragon who has held multiple humanoid identities in several major cities, Jolvadiris serves as a patron for adventurers who have widespread reputations. In part, he enjoys interacting with impressive humanoids, but he also—like other guiding patrons—seeks to aid individuals and communities in bettering themselves. He does so partly to alleviate suffering and partly to maintain peace and stability in the region.

Many guiding patrons are up front about their draconic nature. Others, such as Jolvadiris, prefer to maintain a human guise, believing that those with whom they interact are more honest and cooperative that way. Unlike truly open patrons, guiding patrons have no compunctions about lying to or misleading their adventurers, often withholding the true purpose of their missions or the true nature of their endeavors. But unlike a deceptive patron, Jolvadiris believes that he does so for the good of the adventurers, allowing them to gain power and uncover secrets at their own rate.

**Omalikos, Controlling Patron:** A controlling patron, such as the elder orium dragon Omalikos, tends to be straightforward and to expect obedience from its associates. Unlike intimidating patrons that use personal strength and threats to enforce their dictates, Omalikos and his ilk rely on a sense of external authority. Some dragons, for instance, claim rulership of a region that includes the areas where the characters are operating, while others—such as Omalikos—take advantage of their greater knowledge of regional events, using that information to bribe, threaten, or browbeat others into obedience. Omalikos uses adventurers primarily to collect lost lore but also to expand his influence and knowledge of distant regions.

Most relationships with controlling patrons last a short time, unless the dragon holds some legal, moral, or religious authority over the characters. (Those dragons that do not, but that continue to attempt to enforce obedience, tend to shift into intimidating patrons.)

## Other Campaign Roles for a Metallic Dragon

If you don't develop a dragon as a patron for the characters, there are still plenty of ways to use a dragon—or more than one—in interactions or relationships with the adventurers.

Dragons have a wide array of tools. They are smart, conversational, and social enough to gather other monsters around them in order to engage in plots and schemes that eventually include adventurers. And they're physically dangerous. A dragon has the defenses and hit points to stand toe-to-toe with the toughest characters, but it's maneuverable enough that it doesn't have to. Many dragons are magically potent as well, and higher-level dragons have centuries of experience behind them.

Dragons also come with lairs, adventure sites you can populate in whatever way you want. And a lair provides adventurers with at least one inherent motivator: the pile of shiny coins and magic items the dragon sits on. Delving into a dragon's lair delivers a memorable session of D&D. If you want to use a metallic dragon as more than a monster the characters fight for one encounter, try some of the campaign roles described in the following sections.

Chapter 1 discusses the different ways in which metallic dragons interact with humanoids (such as the characters). But you also want to think about how the dragon interacts with your overall narrative—the role it plays in your campaign. A metallic dragon's campaign role doesn't limit it to interacting with the characters only in certain ways.

### Mysterious Stranger

One way a metallic dragon can keep your ongoing narrative in flux is by not appearing at all—or at least, not appearing as a dragon. Some metallic dragons, notably the steel and mercury dragons, can change shape into humanoid forms. A metallic dragon can be the hooded stranger in the corner of the bar, the old crone yelling words of prophecy in the bazaar, or the cloaked thief who absconds with the idol just as the characters reach the temple chamber.

If you introduce a dragon as a mysterious stranger, consider carefully the pacing of the "reveals" you do. You want the dragon to be mysterious, but you don't want it to stay mysterious indefinitely. This is a mystery the characters should solve over time. Let each interaction with a shapechanged dragon provide the characters with another clue about what the mysterious stranger is and why it's skulking about.

Also consider the payoff: the moment when the characters realize that they've been in the company of a dragon all along. Does that knowledge lead to a fight? A social challenge? A rescue from an otherwise catastrophic situation? No matter how it plays out,

this is a moment rich with drama. Try to clear some space in your plot for the characters to enjoy the moment when the dragon ceases to be a mysterious stranger.

More so than other roles, the mysterious stranger role evolves into another role; the dragon, once it's revealed, becomes a rival, a patron, an occasional ally, or some other campaign role. In terms of the plot, it was performing that role all along. But for the players, confounded by the "Who is that guy?" puzzle, the dragon is a mysterious stranger until the moment they solve the mystery.

A metallic dragon without the ability to shapechange can be a mysterious stranger, too. In this case, it stays mysterious by keeping just out of reach. At first, the characters don't encounter the dragon at all. They come across the fresh corpses of enemies the dragon just defeated. Fast-forward a few sessions, and the heroes find smashed treasure chests and some reptilian footprints leading to a stained-glass window with a gaping hole in the middle. They stay one step behind the mysterious stranger for a long time, but each time they come a little closer and gain another clue to solving the mystery. Eventually, they might meet a survivor of the dragon's attacks. Perhaps after that they spy a glimpse of the dragon at a distance. The characters are now primed for the climactic scene: an actual confrontation with the no longer mysterious dragon.

## Occasional Ally

Sooner or later, the characters are going to get in over their heads. When that happens, a metallic dragon can serve as the metaphorical cavalry, flying over the hill and forcing the characters' enemies to flee.

With their intelligence, physical potency, and maneuverability, dragons bring a lot to the table as allies for the characters. A dragon can fight, relay information, give transportation, and provide a safe place to stay when black-clad assassins are burning down every village the characters visit.

What metallic dragons don't do well is fight alongside the characters for extended periods of time. You have enough work to do without dealing with a solo monster as the characters' constant ally. Putting a dragon on the heroes' side in a battle is a fun change of pace once in a while, but when repeated, it loses its luster for the players and becomes a burden for you.

The key part of this campaign role is the word "occasional." Know ahead of time what factors prevent the metallic dragon from working with the characters full-time. Perhaps the dragon won't venture far from its lair, nor stay away too long. Maybe it has other allies that need its help more. Or maybe

CHRIS SEAMAN

it exacts a price (literal or figurative) for its assistance that the characters aren't always willing to pay. Finally, the dragon's personality might render it inherently unreliable.

## Vexing Ally

Characters naturally want a dragon on their side, and this campaign role plays on that inclination. A vexing ally seems like an asset at first, but eventually grows to be more trouble for the characters than it's worth.

A vexing ally might be overzealous, seeking the same overall goal as the characters but seeking it in a way the characters regard as beyond the pale. The dragon might be more militantly religious than the characters, trying to convert everyone it meets. Or the dragon might be so arrogant, short-tempered, or indiscriminate in its diet that the characters can't deal with it even to reach a common goal.

The dragon might also be working toward a goal that seems to be in concert with the characters' goal at first, but gradually diverges over time. A copper dragon can find common cause with characters who are trying to drive ogres out of the nearby foothills, but when the dragon starts constructing a fortress-lair on the hill that overlooks the characters' home town, the characters might wish the ogres were still around.

Like the mysterious stranger campaign role, consider how you'll gradually reveal the vexing aspect of the dragon ally. Eventually, you want the heroes to face the fundamental choice: What do they do about this dragon? Should they rein it in somehow, keep it at arm's length, or confront it once and for all? That choice takes on added richness when the characters have had several interactions with the vexing ally, and each interaction has widened the gap between the characters and the dragon a little more.

Prepare the dragon's response to each of the possible solutions the characters could use to deal with their vexing ally. At this point, the metallic dragon takes on a new campaign role. Whether the dragon becomes an occasional ally, a rival, a villain, or something else entirely is up to you and your players.

## Uncaring Obstacle

Sometimes you want a powerful figure in your campaign that fundamentally doesn't care about your campaign. It starts to look a little suspicious if every creature in the world is consumed with the drow incursions into the surface world (or whatever the overall conflict is in your campaign). It can be useful to have a powerful figure that isn't going to be drawn into the ongoing conflict—neither as an enemy nor as an ally. A metallic dragon's long outlook and tendency to hole up in its lair make it a good uncaring obstacle that the characters must contend with outside of your core narrative, which already has plenty of scheming factions and adversaries.

When you use a metallic dragon in this role, answer three key questions: What does the dragon have? How do the characters find out what the dragon has? What hoops will the dragon make them jump through to get it?

Metallic dragons own all sorts of stuff that adventurers want: rare magic items, powerful rituals, ancient lore, and so on. And you can seed a clue in an early part of your campaign that lets the characters know where to go to obtain these things. They might have to piece together several clues to figure out where the uncaring obstacle dragon is, or it might be as simple as another character telling them, "Only the iron dragon Arthanaclaur knows the secrets of the Twelve Portals."

Figure out what it takes for the characters to get what they want. The simplest solution is for them to battle the dragon in its lair, slay it, and reap the reward they came for. But a dragon might also give up what the characters want after negotiation (a skill challenge), after they answer three riddles (or solve any sort of puzzle), or after they undertake a quest for the dragon (a specific adventure).

How does this role differ from that of the occasional ally? It requires less work in terms of plotting, because the dragon is indifferent to the various machinations of the heroes and villains. It's also less likely to be a recurring campaign role. This dragon is in your campaign to make the characters solve a puzzle or undertake a quest, and it remains offstage thereafter. It's merely a delivery mechanism for a plot element, not a plot element in and of itself.

## Rival

Metallic dragons often have nuanced personalities, and it's easy to have them ride the fence between ally and enemy. A metallic dragon rival might be working toward the same goal as the characters, or it might have schemes of its own that merely run parallel to their plans. The dragon might have the same patron as the characters, and might try to curry favor with the patron and make the characters look incompetent or untrustworthy in the process.

The key element to an ongoing rivalry is providing variety in each interaction with the characters. If the heroes simply fight the rival dragon each time they meet, the dragon just feels like a recurring enemy, not a full-fledged rival. Sometimes the rival dragon merely makes mischief when the characters are engaged in another challenge and then escapes before the characters can confront it directly. Sometimes the rival dragon is the opponent in a skill challenge or in another situation in which it will trade insults but not blows with the heroes. And don't forget one of the oldest plot twists in fiction: two rivals who are forced into a reluctant, temporary alliance to defeat a foe that neither could withstand alone.

That isn't to say you shouldn't let the characters fight their rival. They're going to ache for the chance after a while, and you should satisfy that urge. You have several tools to make sure that the battle doesn't end in death. You can make it a duel of honor (see page 50), have a more powerful creature intervene near the end of the battle, or merely play the rival dragon cautiously enough that it can escape a losing fight of its own volition.

As you introduce a rival dragon, have some idea of when you want to resolve the rivalry—one way or another. The characters become more powerful over time, but dragons tend to stay the same for decades. Make sure your rivalry comes to a dramatic conclusion before the characters' level is high enough to render the dragon rival inconsequential.

This campaign role differs from the vexing ally mostly in that it's not a gradual reveal. The characters feel the rivalry right away and must deal with it throughout the campaign. But a vexing ally can become a rival once the characters realize just how wrong they were to make it their ally.

### Villain

Metallic dragons are less likely to be evil than are chromatic dragons, but even so, there are more than a few bad apples among them. Good and unaligned creatures can make effective villains, too.

Just because a dragon is good doesn't make it wise or honorable. It can be as haughty, quick to anger, and driven by ignoble emotions as humanoids—or other dragons. A good dragon might see the characters as evildoers (whether that's accurate or not), as obstacles to its ongoing schemes, or as necessary sacrifices in order for good to triumph over evil.

An unaligned dragon can likewise be a centerpiece villain in your ongoing campaign. It's easy to justify a dragon that's a callous mercenary, because draconic greed is legendary. And a metallic dragon could be egomaniacal enough to see itself as the arbiter of some sort of cosmic balance, battling the characters lest the forces of good become too powerful.

Truly evil metallic dragons are out there, too. Some are outwardly evil, but others play on the metallic dragons' heritage as children of Bahamut. They hide their evil behind metallic scales, sending their minions out on quests that appear beneficial but have a darker purpose. You can start a dragon in the patron or vexing ally campaign role, and then switch the dragon to a villain role when the characters realize that the dragon they've been fighting with or working for was evil all along.

## Dragons in the Background

Metallic dragons can be important when they aren't directly interacting with the player characters. Even when they're in the background, dragons are bound to catch the interest of the characters.

**Strategic Weapon:** When you need to threaten a town or a city with destruction, nothing does the job better than dragons circling in the sky overhead. Faced with this threat, the characters can try to negotiate with the dragons to keep them on the sidelines, find a magic countermeasure for an impending dragon attack, preempt the villain as he's about to launch the dragon attack, or evacuate the city. None of those responses involves a direct battle with dragons, and only one of them interacts with the dragons at all. The dragons are a plot element that remains in the background but drives the story forward.

**Mass Transit:** Dragons have fast overland flight speeds, making them an effective way to move characters from place to place—when used sparingly. There's something inherently cool about traveling on the back of a dragon, but that sense of the fantastic loses its luster if it becomes commonplace.

**Border:** The *terra incognita* at the edge of the map marked "Here be dragons" is a cartographic cliché. But viewed through the lens of the game world, that cliché becomes far more real: a far-off ridge that people dare not explore because they see brass dragons soaring overhead, for example. You can use the presence of powerful dragons to channel characters' explorations elsewhere until the heroes are powerful enough to face the dragons. At that point, they will have earned the right to cross the border you've set up.

**Scenery:** Dragons have a symbolic value that the players instinctively understand. A dragon signifies power, and it signifies the fantastic. You can put a dragon in the literal background of a scene to add power and a sense of the fantastic to what you're describing. Players are likely to respect a general who has a sleeping dragon curled up behind his tent, even if the dragon never wakes up and neither the general nor the characters mention the dragon in conversation.

When you put a dragon in front of the characters, you'll definitely get the players' attention. More so than any other monster, a dragon makes any encounter something the players will be talking about in the weeks and months to come. Players know that they'll be dealing with a solo monster that has potent attacks, high defenses, and at least some maneuverability. And they probably suspect that where there's a dragon, there's probably a dragon hoard.

But a dragon—especially a metallic dragon—is more than just a statistics block. You have a lot of tools at your disposal, including mixes of dragons and other monsters, subdual encounters, and social challenges.

## Combat Encounters

The obvious way to build a combat encounter with a dragon is to pick a dragon of an appropriate level and use only that dragon. Dragons are solo monsters, after all. Just because that approach is simple doesn't mean it isn't effective. A dragon has enough powers in its arsenal to keep the characters on their toes, and if they can defeat a solo dragon, they've earned their experience points and their treasure. More to the point, a dragon is designed to place roughly the same demands on the characters as five normal monsters would. Play that solo dragon, play it well, and that's all the encounter-building you need to do.

But sometimes the ongoing adventure (or your own sense of creativity) demands that you mix it up a little. Making a solo monster part of a larger encounter is tricky because you face two limiting factors: the experience-point budget for the encounter and the limits of what you can bring to life at the game table.

### Managing the XP Budget

The following tips can help you manage a dragon encounter without ruining the XP budget.

**Raise the Encounter Level:** A solo monster of a level equal to the party's level takes up the entire budget for an encounter of that level. So if you want to add monsters, you can make the encounter tougher (and they're fighting a dragon, so doing so makes some dramatic sense). Adding one standard monster of the dragon's level puts the encounter on the cusp of being one level tougher. If you add two standard monsters or one elite, you're at least one level tougher and sometimes almost two levels tougher.

**Lower the Level, Then Add Monsters:** If you want to add monsters without breaking the budget, you can use a lower-level dragon to begin with. If you use a dragon one level lower than the party's level, you can definitely add one monster and sometimes two monsters and keep the overall encounter at the same level as that of the characters. If you use a dragon two levels lower, then you can add at least two—and often three—standard monsters.

And you can both downshift the dragon and raise the encounter level if you want an encounter in which the dragon is only a small part of the monster mix. (But be aware of the complexity issues described in "Managing the Encounter's Complexity.")

**Use an Elite Dragon:** Turn a normal solo dragon into an elite using the advice given on page 218.

**Give the Characters an Advantage:** If you want to add monsters to a solo dragon encounter without raising the encounter level, you can provide advantageous terrain or other equalizing factors to make for a fair fight. How you pull off this trick depends on the specifics of your adventure, but it's easy to justify the presence of almost anything in a dragon's lair. The characters might benefit from any of these advantages:

- Fantastic terrain such as blood rock, a font of power, or a pillar of life (all described on pages 67–68 of the *Dungeon Master's Guide*). Such terrain is an advantage for the characters only if they seize it before the monsters do. A small piece of terrain such as a single pillar of life might work against the characters if they cluster around it, letting the dragon use its *breath weapon* on everyone at once.
- A distraction that the dragon or some of the monsters must deal with. If the monsters must keep one of their number tending an ongoing ritual every round, for example, they can't focus their full attention on the characters. Although you don't need to immediately explain to the players how the distraction works, what's going on should be apparent after a few rounds of observation. If, for example, the dragon always flies back to the blue orb in the round after the orb flashes, then the characters can put that knowledge to work for them—and they'll have an interesting puzzle (what does the blue orb do?) when the fight ends.
- Reinforcements that enter the fight gradually. If the door opens at the start of round four and kobold cultists start pouring into the dragon's chamber, then you've added monsters but given the characters a key advantage: three rounds of focused attacks against the dragon.
- An unusual victory condition. The characters might be able to overcome the challenge of the encounter without beating every single monster down to 0 hit points. If the dragon yields as soon as it's bloodied, for example, it's not a solo monster. It's more like a supercharged elite, and your encounter planning should reflect that. Likewise, if the other monsters flee or surrender as soon as the dragon goes down, then the characters have a significant advantage.

ZOLTAN BOROS & GABOR SZIKSZAI

If you include an unusual victory condition, realize that it's more meaningful if the players know about it ahead of time. If the characters are tenaciously fighting the dragon, hoping to take it down and thus cow the kobolds into submission, that's tactically useful and a recipe for a dramatic encounter. But if they don't suspect that the kobolds will surrender, they might kill the kobolds first, denying themselves the advantage you intended and making the encounter more difficult than you planned.

### Managing the Encounter's Complexity

Although it's tempting to build a dragon encounter with other monsters, interesting terrain, reinforcements, and an unusual victory condition, it's your ability to manage all those elements that determines whether anyone has fun in your game—including you. By itself, a solo dragon isn't too complicated, but don't mistake that solo dragon for an ordinary monster. When you start adding more monsters, complex terrain, and other factors to your encounter, it's easy for the overall complexity to creep past the point where you (or anyone) can comfortably manage it.

Just as you can give your encounter a bigger XP budget by increasing its level, you can allow yourself more complexity in your encounter by spending time preparing for it beforehand. One overlooked aspect of preparation is practice: running through the fight ahead of time. If you've practiced with the dragon a few times, you can run through its attacks without a lot of thought, position it favorably for *breath weapon* attacks without a lot of contemplation, and remember the details such as auras and recharges that a harried DM can easily forget. Another way you can improve your ability to handle complexity is by having good notes behind your screen. If you've pulled out all the relevant rules text and terrain information, you'll spend less time flipping through books and more time making the fight a challenge for the players.

One final consideration: As you build your dragon encounter, take a critical look at complexity that's invisible to the players, because it's rarely worth the effort. If reinforcements arrive through the north door, there's little point in having them arrive in a random round (the players aren't going to go through the encounter more than once, so it won't be a random round to them). Nor would it be worthwhile to have the type of reinforcements depend on a die roll or the specific situation in the dragon's lair. To the players, it's just monsters coming through a door.

## Subdual Encounters

D&D has a long tradition of dragons that can somehow be subdued—defeated instead of killed. Subduing a dragon makes particular sense in the case of metallic dragons, which are usually less antagonistic than their chromatic counterparts. A subdual encounter provides the players with a fight that's out of the ordinary. And by preserving the dragon for future encounters, a subdual encounter can assist the ongoing narrative.

At its simplest, a subdual encounter is one in which the dragon stops fighting—and the characters win—when the dragon is bloodied. But the degree of the victory matters, so you will need to keep track of how many characters were bloodied during the course of the battle.

Why would a dragon fight this way? For two main reasons: honor and survival. Some dragons abhor needless bloodshed as inherently dishonorable, and those dragons are more likely to be metallic than chromatic. Other dragons will fight a subdual encounter

for more pragmatic reasons. It's likely that the second half of the battle would go the same way as the first half, and if the dragon is bloodied, it's better to pay off or otherwise placate the intruders than to risk its life.

### Building a Subdual Encounter

A dragon four levels higher than the characters is appropriate for a typical subdual encounter. If the battle ends when the dragon is bloodied, it effectively has fewer hit points than a typical solo of the party's level, but its defenses will be higher and its attacks more potent. But it's fundamentally a fair challenge, and the characters deserve the XP and treasure rewards for their victory. Award experience points for an encounter of the party's level, and account for an appropriate treasure parcel either directly (by having the dragon give the characters a gift from its hoard) or indirectly (by increasing the treasure elsewhere in the adventure). You can make part of the treasure reward depend on how many characters avoided becoming bloodied.

A subdual encounter is also a good way for the characters to earn assistance from a dragon. If they beat the dragon in a subdual encounter, the dragon is often inclined to be helpful. After all, those characters might start a fight to the death the next time. A subdued dragon will grant passage through its territory, part with important lore or clues, or end alliances with foes of the characters. Again, you can provide a graduated award. The dragon might part with only cryptic clues if the characters were all bloodied, offer more detailed lore if just one or two were bloodied, and give them an accurate map of their next destination if none of the characters became bloodied.

Many good and some unaligned dragons perform subdual battles as a matter of course; it's how they prefer to deal with hostile humanoids. They'll fight the characters normally until they're bloodied, at which point they'll stop attacking for a round, praise the characters for an honorable defeat, and then make arrangements for a reward. You don't have to tell the players ahead of time that it's a subdual battle, and if the characters want to continue the fight and deal with the consequences, they certainly can. Subdual battles usually work better, though, when characters know the ground rules: They're trying to remain unbloodied, and the battle will end when either the dragon is bloodied or all the characters are.

### Duels of Honor

A duel of honor functions as a subdual encounter—everyone knows ahead of time what the ground rules are. There's an additional complication for the characters: The dragon won't attack bloodied characters, but it expects that bloodied characters will retreat and observe the rest of the battle as spectators. A given dragon might or might not engage in duels of honor. There's no mandate that it has to, and an untrustworthy dragon might claim a duel of honor until defeat seems likely, at which point it breaks the rules and fights a standard battle.

Assuming that everyone follows the rules, a duel of honor makes the battle easier for the dragon than a normal subdual encounter would be, because it's easier for the dragon to knock characters out of the fight. A dragon three levels higher than the party's level is an appropriate challenge for a duel of honor.

When you run a duel of honor, consider its effect on the players—not just their characters. If you focus the dragon's attacks and spend action points early, the dragon might bloody one of the heroes in the first round or two. That player, assuming the characters adhere to the duel's rules, doesn't have anything to do except sit and listen until the fight is over. Spreading the dragon's damage around isn't optimal play, but it makes for better drama. Ideally, you want everyone to be just one attack away from being bloodied and to be sweating each roll of the dice.

Just as with a subdual encounter, if the characters break the rules in a duel of honor, there's a natural consequence: They have to deal with an angry dragon that's three or more levels higher than they are.

## Social Encounters

Countless exceptions exist, but characters are more likely to negotiate with a metallic dragon than a chromatic one. When the characters are talking to a dragon, you've already marked the interaction as important. Dragons have a gravitas unlike other monsters. Dragons demand respect. Including a social encounter with a dragon means you need to deliver on the implicit promise that talking to a dragon is something special.

Let your dragons truly be dragons. Make them casually arrogant, occasionally inscrutable, and perpetually scheming. Have each dragon demonstrate for the characters that it's the whole package: physically powerful, magically potent, and (in the case of older dragons) backed up with the experience of centuries. Dragons can still inadvertently display their weaknesses, though. A dragon should always underestimate smaller creatures (such as the characters), obsess about the treasures in its hoard, and harbor sinister ambitions against its rivals.

### Unmasking the Dragon

*"What do you mean, 'Am I really just a minstrel?' " she asks, revealing a glimpse of a wry grin as she tosses her hair back. "Are you really just a soldier? And is your companion really just a priest?"*

In this challenge, the characters are talking to a dragon that has used its *change shape* power or other magic to appear humanoid.

You can run this challenge in one of two ways. If the characters know that the individual they're conversing with isn't what he or she appears to be, then this challenge is an overt effort to figure out just what they're dealing with.

But it's also possible that the characters' suspicions are more vague: They know that something is amiss, but they don't know for sure that they're dealing with a shapechanged creature, much less that a dragon is in the mix. In this case, you should mix the skill checks called for below with other actions and checks. As the characters simultaneously work on the surface conversation (whatever the dragon is talking about), they're also probing to figure out what's unusual about the stranger they're conversing with. You can combine this social challenge with a negotiation and run two social challenges simultaneously.

Start the skill challenge as soon as a player expresses some suspicion or doubt that the social interaction taking place is as ordinary as it appears.

**Level:** 9 (800 XP).

**Complexity:** 2 (requires 6 successes before 3 failures).

**Primary Skills:** Diplomacy, Insight, Nature, Perception.

*Diplomacy (DC 19, standard action)*: The character's quick talking or smooth manner has coerced some information out of the dragon that hints at its true nature. It could be that the dragon is beginning to trust the characters, or perhaps the hint was unintentional.

*Insight (DC 14, minor action):* The character picks up a clue from body language or a vocal mannerism that's decidedly not humanoid. With each success, reveal a further clue about what lies under the disguise. For example, "She's older than she appears," then "She's not human," then "Whatever she is, she's accustomed to being on all fours," and so on.

*Nature (DC 19, minor action):* The character notices something specifically draconic, such as a slow blink or a sinuous, reptilian stretch of the neck and shoulders. Only 1 success can be gained in this way.

*Perception (DC 19, minor action):* The character spots a strictly physical flaw in the dragon's disguise: a bit of telltale magical blur, or the faint outline of a scale on exposed skin. As with Insight checks, try to show the characters the truth gradually. First reveal evidence that suggests that they're indeed dealing with a disguised creature, and then provide better and better clues about what's under that disguise.

**Secondary Skills:** Bluff, Arcana, Dungeoneering, Religion.

*Bluff (DC 8, standard action):* The character isn't bluffing directly so much as he or she is using adroit conversation to draw the dragon into a lively, fast-paced exchange during which it might inadvertently reveal something. A successful Bluff check doesn't provide a success, but it grants a +2 bonus to the next Insight or Perception check.

*Arcana, Dungeoneering, or Religion (DC 19, minor action):* Success with any of these skills on a monster knowledge check doesn't provide a success in the challenge, but it eliminates the possibility that the creature has one of the origins associated with the skill in question. If the skill check is successful, tell the player, "You don't see any clues that would suggest a creature like the ones you've studied." Each of these skill checks can be attempted only once.

**Success:** The dragon admits what the characters are about to figure out: It's a dragon. If conditions are right, it changes back into its real form and deals with the characters as a dragon.

**Failure:** The characters get no indication they're dealing with a disguised dragon, but they might retain the suspicions they already have. The dragon cuts the interaction short if it can, and is uncommunicative if it can't get away from the characters.

## Begging for Mercy

*As you scatter to avoid the dragon's breath, it circles around, casually tossing your unconscious comrade to the ground at your feet. "You've proved your tenacity," the dragon growls. "But you're about to prove your foolishness. Do you want further demonstrations of how overmatched you are?"*

There's no ironclad guarantee that an encounter with a dragon will be fundamentally fair. In this social encounter, the characters must negotiate a ceasefire with the dragon they're fighting—while surviving long enough to reach the end of the skill challenge.

Don't underestimate the players' willingness to press onward in the face of their near-certain demise. Before you bring this skill challenge into play, make sure you have a way of suggesting to the players that a social encounter might save their characters' lives. This might be as blatant as a "You might be able to talk your way out of this" clue.

This skill challenge begins when a character makes a Bluff, Diplomacy, History, Insight, or Religion check in hopes of ending hostilities. The dragon continues to fight the characters during this skill challenge, but it does so cautiously. If the characters do well (as described in the "Success" paragraph below), the dragon refrains from attacking for a round.

**Level:** 14 (XP 2,000).

**Complexity:** 2 (requires 6 successes before 3 failures).

**Primary Skills:** Bluff, Diplomacy, History, Insight.

*Bluff (DC 18, standard action):* The character engages in deception, trying to make the dragon believe the heroes are either weaker or more capable than they are. A failed check grants the dragon a +2 bonus to attack rolls against that character on the dragon's next turn.

*Diplomacy (DC 18, standard action):* The character tries to persuade the dragon to end the conflict peacefully.

*History (DC 18, standard action):* Reciting a past case in which a dragon spared mortals' lives and benefited from doing so, the character tactfully reminds the dragon of that event.

*Religion (DC 23, standard action):* The character quotes some analects of Bahamut about the nature of honorable mercy. This skill can be used to gain only 1 success.

**Secondary Skills:** Insight, special.

*Insight (DC 11, minor action):* By assessing the dragon's mood, the character gets an idea of how best to convince it to let the party live. Success on an Insight check does not provide a success in the challenge, but it grants a +2 bonus to either Bluff or Diplomacy checks until the end of the character's next turn; the DM determines which skill gains the advantage against the dragon. The character can share this information with allies.

*Special:* If no character has attacked the dragon for a full round, each character gains a +2 bonus to Diplomacy, History, and Insight checks. The first time the characters bloody the dragon, they earn 1 failure in the challenge. If the dragon attacks in a given round but doesn't hit anyone, the party earns 1 success.

**Success:** If the characters achieve 3 or more successes in a single round, the dragon waits for them to continue their argument and doesn't attack on its next turn. It still maneuvers, rolls recharges for its *breath weapon,* and otherwise prepares for the battle to resume. When the characters reach 6 successes, the dragon announces that the battle is at an end. It then converses with the characters—not as equals, but as creatures wise enough to know their proper place in the world.

**Failure:** The dragon won't grant the characters even a temporary respite from its attacks. If the characters want to survive, they must retreat.

## Requesting Transport

*The dragon raises up on its hind legs and unfolds its leathery wings. "It is indeed true that none can travel through the Sorrowflame mountain passes," the dragon intones. "But we dragons spurn such petty inconveniences. The mountains cannot hinder dragons on the wing."*

In this skill challenge, the characters negotiate with a dragon (or possibly several dragons) to persuade it to take them someplace using overland flight.

This encounter assumes a few facts: Travelers can't easily reach the destination (so the dragon knows that its service is valuable), getting there is neither easy nor impossibly difficult, and the destination isn't someplace the dragon often visits, so any wayfinding guidance the characters can provide will be useful. The skill challenge is most effective if the characters are under time constraints.

For the dragon to agree to take the characters where they want to go, they must convince it both that the journey is worth it and that they deserve of the honor of riding a dragon.

**Level:** 15 (2,400 XP).

**Complexity:** 2 (requires 6 successes before 3 failures).

**Primary Skills:** Diplomacy, Intimidate, Nature.

*Diplomacy (DC 18, standard action):* The character makes a direct appeal to the self-interest of the dragon, pointing out advantages of journeying with the characters and employing the obligatory flattery.

FRANZ VOHWINKEL

*Intimidate (DC 18, standard action):* As soon as one character uses Intimidate to argue that he or she is worthy of riding a dragon, have all the characters make Intimidate checks as the dragon assesses them collectively. If the dragon has seen the characters defeat an enemy, give them a +1 bonus to this check; give them a +2 bonus to this check if the characters have previously defeated the dragon. The heroes earn 1 success in the challenge if more characters succeed than fail. Intimidate can be used only once in this way, but it has an alternate use.

*Intimidate (DC 23, standard action):* The character delivers a threat or an ultimatum to the dragon, with a +2 bonus to this check if the characters have previously defeated the dragon. If this check succeeds, perform the Intimidate group check (described above), if you haven't already done so. If this group check fails to earn a success in the challenge, the dragon makes an attack roll against the character who delivered the threat or ultimatum. If that attack hits, the character is knocked prone or slammed into a wall, but takes no damage. This is only a warning: The dragon is punishing the character's temerity.

*Nature (DC 18, standard action):* The character demonstrates his or her knowledge of the journey ahead and its rigors and hazards. This skill can be used to gain only 1 success in the challenge.

**Success:** The dragon agrees to take the characters where they want to go, using overland flight. If battles happen during the journey, the dragon fights alongside the characters.

**Failure:** The dragon is unconvinced that the characters' journey is worthwhile, or that the characters are worthy of flying with it. The dragon will take the characters where they want to go only if they undertake a quest on the dragon's behalf first (see page 62 for some quest ideas). During the journey, it fights only when its own survival is at stake; the characters are otherwise on their own.

## Debating the Scholar

*"Your point about the eldritch connection is well taken, if artlessly expressed," the dragon says, slithering toward a bookstand in the corner.*

*"A dragon named Lorroch-Turhelion spoke of that connection more than twenty of your lifetimes ago—as part of a theory about interactions with the Feywild. She pointed out that the strength of the connection isn't nearly as important as its exact nature. She identified twelve categories, each divided by the relevant influence, origin point, and . . ."*

With their native intellect and centuries-long life spans, dragons are natural sages and lore-keepers. Convincing a dragon to part with that wisdom is no easy task. Nor is it easy to teach an elder or an ancient dragon something new, but that's exactly the goal of characters who find themselves drawn into an academic debate with a dragon.

This skill challenge deliberately doesn't specify the nature of the academic debate. That's a matter for you and your campaign to determine. Ultimately, the specific proposition under debate doesn't matter; it might be relevant to the characters' goals or it might just be a topic chosen by the dragon to test the lesser creatures that have the brashness to question draconic wisdom. Dragons are arrogant enough to savor an argument for its own sake, after all.

**Setup:** For the characters to convince the dragon that they're right, they must win the debate by using arguments that the dragon understands and respects.

**Level:** 24 (12,100 XP).

**Complexity:** 2 (requires 6 successes before 3 failures).

**Primary Skills:** Arcana, History, and whichever knowledge skill is relevant to the debate.

*Specific Knowledge Skill (DC 24, standard action):* The characters argue the merits of the proposition. This will involve an Arcana, Dungeoneering, History, Nature, or Religion check most of the time. History and Nature can be used in other ways to advance the characters' argument, as described below. Characters who speak Draconic gain a +1 bonus to the skill check.

*History (DC 24, standard action):* In his or her argument, the character references ancient authorities and obscure texts—but authorities and texts that a long-lived dragon would know and respect. A character who speaks Draconic gain a +1 bonus to the skill check.

*Nature (DC 29, standard action):* The character applies a uniquely draconic spin on the argument, mimicking dragon speech patterns and picking up on subtle behavior cues that only those who have studied dragons would spot. The characters can earn only 1 success with this approach.

**Secondary Skills:** Insight, special.

*Insight (DC 24, minor action):* The character reads the demeanor of the dragon, learning which lines of argument it finds particularly compelling. Use of this skill doesn't provide a success or failure in the challenge, but a successful check grants a +2 bonus to the next knowledge check a character attempts in the challenge.

*Special:* If the Consult Oracle ritual is performed before engaging the dragon in debate, it can give the characters a head start on constructing a compelling argument. It grants 1 automatic success on the skill challenge for every two questions answered by the oracular spirit.

**Success:** The dragon is convinced by the characters' arguments and impressed by their knowledge. The reward for success is usually something specific to your campaign, but it's reasonable for the dragon to offer a service or boon at this point. Furthermore, the characters earn a +1 bonus to skill checks in future skill challenges with this dragon.

**Failure:** The dragon contemptuously dismisses the characters' arguments, and if possible ends the interaction altogether. The characters take a –1 penalty to future Diplomacy checks or Intimidate checks made to influence this dragon.

## Enemy of My Enemy

*Water drips from the ceiling. Burning naphtha pools cast queer shadows on the cavern walls, throwing red light across the dragon's scales. One moment, a pale membrane covers its great golden eyes; the next, it stares at you, unimpressed by your swords and spells. "Speak quickly, little fools. It has been hours since my last meal."*

Enemies threaten a nearby city, and although the citizens are willing to give their lives toward their community's defense, they are too few to stand against the approaching doom. Allies promise aid, but it will take a week at least for the reinforcements to arrive. The characters need to buy them time, and what better way to gain a few extra days than by stirring a dragon to fight on their behalf? Naturally, the dragon has little interest in the affairs of such feeble creatures, especially when they haven't paid it tribute in generations, and it would take a good argument to persuade the monster to stir from its lair.

The heroes must convince the dragon that the threat to the city is also a threat to itself.

**Level:** 8 (700 XP).

**Complexity:** 2 (6 successes before 3 failures).

**Primary Skills:** Bluff, Diplomacy, History, Insight, Nature.

*Bluff (DC 19, standard action):* The character fabricates a reason why aiding the heroes is in the dragon's best interest.

*Diplomacy (DC 14, standard action):* The character describes how the troubles affecting the city will ultimately trouble the dragon or flatters the dragon and makes it think the city has no chance to stand against the impending doom without its help. The characters might also offer treasure, service, or something of value in exchange for the dragon's assistance. A particularly generous offering can reduce the DC to 8 for a single check.

*History (DC 14, standard action):* The character reminds the dragon of a time when it has come to the aid of good people in the past, or when other dragons have done so, and how the legends of such events are flattering to the dragon and good for its reputation. This skill can be used to gain 1 success in this challenge.

*Insight (DC 14, minor action):* Careful attention helps the character know what the dragon wants to hear, whether it seeks an excuse to help or needs to see the benefit to itself. This skill can be used to gain 1 success in this challenge. A success also grants the party a +2 bonus to either Bluff or Diplomacy checks (characters' choice) for the duration of the challenge.

*Nature (DC 14, standard action):* The character recalls a useful fact about the dragon's diet, lair, or physiology for use as an advantage during the negotiation. This skill can be used to gain 1 success in this challenge.

**Success:** The dragon agrees to aid the community and promises to strike the enemies to slow their progress. If the characters completed the challenge with no failures, the dragon also helps defend the city when the menace finally arrives.

**Failure:** The dragon decides the characters and the city aren't worth the trouble and demands that the characters leave its lair at once, resorting to violence if they don't leave. If the characters achieved no successes in the challenge, the dragon automatically attacks.

## Restoring the Peace

*Through the smoke and the burning buildings, you spy a gleaming beast, its scales shining in the light cast by the flames. The dragon turns its head toward you, revealing a bestial grimace that contorts its astonishing features into a visage of wrath.*

A dragon known to be nonviolent is attacking a town that it had never bothered before. The townsfolk seek a peaceful solution, because the dragon's presence has kept vicious creatures away for many years. The adventurers must discover why the dragon is attacking and restore the peace. The dragon is still rampaging during this challenge, and the characters might be rescuing people or trying to delay the dragon as they play out the challenge. Each character can attempt only one skill check in the challenge per turn.

### Changing Levels for Social Encounters

You can adapt any of these social encounters to fit the level of the characters in your current adventure. Doing so is a simple matter of substitution. Replace the DCs noted in the skill challenges with the appropriate ones in the table below. First, use the table to determine whether the check for each skill used in a challenge is easy, moderate, or hard. Then replace that DC with the easy, moderate, or hard DC at the level appropriate for your game.

| Party Level | Easy | Moderate | Hard |
|---|---|---|---|
| 1st-3rd | 5 | 10 | 15 |
| 4th-6th | 7 | 12 | 17 |
| 7th-9th | 8 | 14 | 19 |
| 10th-12th | 10 | 16 | 21 |
| 13th-15th | 11 | 18 | 23 |
| 16th-18th | 13 | 20 | 25 |
| 19th-21st | 14 | 22 | 27 |
| 22nd-24th | 16 | 24 | 29 |
| 25th-27th | 17 | 26 | 31 |
| 28th-30th | 19 | 28 | 33 |

**Level:** 20 (8,400 XP).

**Complexity:** 3 (requires 8 successes before 3 failures).

**Primary Skills:** Diplomacy, Heal, History, Insight, Bluff, Perception.

*Diplomacy (DC 27, standard action):* Using careful questions so as not to anger the dragon further, the character tries to learn the reason for the dragon's wrath. This skill can be used to gain a maximum of 4 successes in this challenge, but each character can attempt a Diplomacy check only once.

*Heal (DC 14, standard action):* The character offers to treat the injuries the dragon has sustained in battle. A successful check grants the characters 1 success and removes 1 failure. The characters can gain only 1 success (and remove 1 failure) with this skill.

WAYNE ENGLAND

*History (DC 22, standard action):* The character reminds the dragon of the long alliance between it and the people of the land. This skill can be used to gain a maximum of 3 successes in this challenge.

*Insight (DC 27, minor action):* Examining the dragon's words and body language, a character can gain in inkling about the dragon's frustration. A character who succeeds on an Insight check can make a Bluff check during the following round (see below). A failed Insight check, in addition to counting as a failure in the challenge, also imposes a –2 penalty to Diplomacy checks until a successful Insight check is made. This skill can be used to gain a maximum of 3 successes in this challenge.

*Bluff (DC 27, minor action):* After a character gets a sense of the reasons behind the attack with an Insight check, he or she might downplay the severity of the dragon's problem or make false promises to aid the creature. A failed Bluff check, in addition to counting as a failure in the challenge, also imposes a –2 penalty to the next two skill checks in the challenge. This skill can be used to gain a maximum of 3 successes in this challenge.

*Perception (DC 22, standard action):* The character assesses the dragon's victims, the buildings or objects it has destroyed, and any other pertinent details to learn why the dragon is attacking. This skill can be used to gain a maximum of 2 successes in this challenge.

**Secondary Skills:** Intimidate, Nature.

*Intimidate (DC 27, minor action):* The character threatens the dragon with promises of retribution. A successful check grants the characters 1 success, but imposes a –2 penalty to Diplomacy checks and prevents further use of the Heal skill to gain success in this challenge. A failed check blocks further use of the Heal and Intimidate skills to gain success in this challenge. This skill can be used to gain 1 success in this challenge.

*Nature (DC 25, minor action):* The character searches his or her memory for useful lore about the dragon. A successful check grants a +2 bonus to all Diplomacy checks or Insight checks made until the end of the challenge.

**Success:** The dragon's wrath abates, and it confides in the characters the reason for its attack. If the characters offer to help the dragon with its predicament, it stops razing the countryside, but if the characters fail or don't resolve the problem fast enough, the dragon will right the wrongs committed against it, no matter the cost. If the characters completed the challenge with no failures, the dragon gives them a longer time in which to resolve the problem.

**Failure:** The dragon grows frustrated with the characters and turns its full wrath against them. The dragon fights until it becomes bloodied, at which point it flies away. If the characters achieved no successes, the dragon fights to the death.

# Draconic Traps

All dragons value their progeny and their possessions—whether treasure, minions, or territory. They go to great lengths to safeguard those things from rivals and adventurers alike. Though not all dragons use traps, many metallic dragons employ a clever mix of traps and followers to protect their treasure. Copper dragons, in particular, delight in using traps in unexpected ways, finding dark humor in the plight of those that would dare rob them.

**Niter Patch** **Level 5 Lurker**
Hazard XP 200

*When exposed to fire, the white encrustations covering the cavern's walls explode in fiery death.*

**Hazard:** Ten squares scattered across the room's walls bear niter encrustations. When exposed to a fire or lightning attack, they explode into flame and create a zone of caustic salts to burn any creature that enters their area.

**Perception**

✦ DC 7: The character notices a glittering crust covering patches on the walls in its line of sight.

**Additional Skill:** Dungeoneering

✦ DC 12: The character identifies the encrustation as being niter.

**Trigger**

When a niter patch is caught in the area of a fire or a lightning attack, the patch makes an opportunity attack. Each trapped square explodes only once. A triggered niter patch can trigger other niter patches in the blast's area.

**Attack ✦ Acid, Fire, Zone**

**Opportunity Action** **Close** blast 3
**Targets:** Each creature in the blast
**Attack:** +7 vs. Reflex
**Hit:** 1d6 + 4 fire damage.
**Effect:** The blast creates a zone of caustic salt that lasts until the end of the encounter. Any creature that enters the zone or starts its turn there takes 5 acid damage and grants combat advantage to all enemies (save ends). Creatures that are flying are immune to the zone's effect.

**Countermeasures**

✦ A character can neutralize one square of niter with a radiant melee or ranged attack, and he or she can neutralize multiple zones by using a close or area radiant power that encompasses more than one of them.

✦ A character can leap over the zone of caustic salt by making a DC 30 Athletics check (or DC 15 with a running start).

**Upgrade to Elite (400 XP)**

✦ Increase the attack bonus by 2.

✦ The hazard attacks when caught in the area of any close or area attack.

## Tactics

A brass or a bronze dragon prefers to place niter patches at strategic locations in its lair, usually near the entrance or entrances. The dragon then uses its breath weapon to set off an entire patch. Orium and black dragons will sometimes nest on piles of niter, letting their enemies set them off.

**Support Pillar** **Level 6 Blaster**
Hazard XP 250

*A pillar supporting the ceiling shatters, causing rocks to fall from above.*

**Hazard:** Soon after the support pillar is damaged, it falls, causing the rocks above to fall in the immediate area.

**Perception**

No check is required to see the support pillar.

**Additional Skill: Dungeoneering**

✦ DC 12: The character notices structural imperfections in the pillar, indicating that it could easily shatter and cause the ceiling to collapse.

**Initiative** +6

**Trigger**

When the support pillar is damaged by any attack (AC 8, other defenses 6; hp 1), the support pillar rolls initiative. The trap makes a single attack on its initiative count, and then the trap is destroyed.

**Attack ✦ Zone**

**Standard Action** **Close** burst 3
**Target:** Each creature in burst
**Attack:** +11 vs. Reflex
**Hit:** 3d8 + 6 damage.
**Miss:** Half damage.
**Effect:** The burst creates a zone of difficult terrain that lasts until removed.

**Countermeasures**

✦ At your discretion, certain powers or items could delay the support pillar's collapse—for example, *web*, *Bigby's icy grasp*, or a wall power.

## Tactics

Support pillars are the type of hazard of which a dragon isn't always aware. When it is, it either shores up the ceiling to protect the lair or prepares to take advantage of it with intruders. The dragon's *breath weapon* is the safest way for it to activate the pillar. While waiting for the right time to activate the pillar, the dragon stays out of its area of effect in case a character gets any bright ideas.

When many support pillars are near each other, it creates a domino effect: One pillar collapsing triggers the next, and so on, which can make for a neat scene or bring down an entire cavern.

**Dragontooth Passageway** **Level 7 Lurker**
Trap XP 300

*Fang-shaped blades arc out of a slit in the floor to slice into those that pass through this hallway.*

**Trap:** A section of hallway—up to 4 squares by 1 square—contains a slit in the floor that giant blades slice through. A beam of light spans the corridor as a trigger.

**Perception**

✦ DC 14: The character notices the slit in the floor where the blades are hidden.

✦ DC 19: The character notices illuminated dust in the air where the triggering light shines through.

**Additional Skill:** Insight

✦ DC 14: A character notices an enemy moving oddly to avoid crossing the beam of light.

**Trigger**
When a character moves into a trapped square and breaks a beam of light, a rotating blade comes out of the floor and slices through all the trapped squares.

**Attack**
**Opportunity Action** **Melee**
**Targets:** Each creature in the trapped squares
**Attack:** +12 vs. AC
**Hit:** 1d12 + 5 damage.

**Countermeasures**
- ✦ A creature that flies or jumps 5 feet above the trapped squares does not trigger the trap. Jumping it requires a DC 25 Athletics check (with a running start). A failed check triggers the trap.
- ✦ A creature can make a DC 19 Acrobatics check to avoid the blades or a DC 14 check if it is aware of the beam of light and avoids that instead. A failed check triggers the trap.
- ✦ A character can climb around the trapped squares with a DC 15 Athletics check. This climb takes 6 squares of movement.
- ✦ Invisible creatures do not break the light beam, so they do not trigger the trap.

## Tactics

The blades of a dragontooth passageway are in the shape of a dragon's teeth, and such a trap is frequently edged with the teeth of dragons the lair's owner killed. This trap is often handy when the characters are in a hurry and are bound to be less cautious. It can be combined with another trap that requires quick action, such as a crushing walls room (see page 68 of *Dungeon Master's Guide 2*). Monsters that push characters into the beams of light can make this trap more deadly, but that action also can be seen as unfair.

**Scatter Trap** **Level 8 Obstacle**
Trap XP 350

*Infused with ancient magic, the room sports hidden wards to scatter and frustrate intruders.*

**Trap:** Six randomly positioned squares contain nearly invisible glyphs that damage and teleport creatures that enter their spaces. Once a square of the trap attacks, that glyph moves to a different square in the room.

**Perception**
- ✦ DC 19: The character notices a faint glow emanating from the closest square containing a glyph.

**Additional Skill:** Arcana (trained only)
- ✦ DC 24: The character perceives the glyph from which the faint light shines and identifies the space as containing some sort of teleportation trap.

**Trigger**
When a creature enters or begins its turn in a square containing a glyph, the scatter trap attacks that creature.

**Attack ✦ Teleportation**
**Opportunity Action** **Melee** 1
**Target:** The triggering creature
**Attack:** +11 vs. Reflex
**Hit:** 1d8 + 5 damage, and the target teleports 1d4 squares to a random unoccupied space (roll 1d8: 1, north; 2, northeast; 3, northwest; 4, east; 5, west; 6, south; 7, southeast; 8, southwest) and is stunned and invisible until the end of its next turn.
**Effect:** The glyph moves to a random adjacent square (roll 1d8: 1, north; 2, northeast; 3, northwest; 4, east; 5, west; 6, south; 7, southeast; 8, southwest).

**Countermeasures**
- ✦ A character who makes a successful Athletics check (DC 10 or DC 5 with a running start) can jump over a single trapped square.
- ✦ An adjacent character can disable one trapped square with a DC 19 Arcana or Thievery check.
- ✦ With a DC 14 Arcana or Thievery check, an adjacent character can discharge one trapped square without being caught in the effect.

**Upgrade to Elite (700 XP)**
- ✦ Increase the DCs for Arcana, Perception, and Thievery checks by 2.
- ✦ The trap's attacks deal 2d8 + 6 damage, and the target is stunned (save ends).

## Tactics

Dragons place scatter traps in chambers where they anticipate future battles and know they have enough room to stay off the floor, either by flying or using another form of movement (such as climbing). Other dragons inscribe glyphs that only they can see, allowing them to navigate the trapped area and lure enemies into the glyphs. If a dragon can see invisible objects and creatures, it specifically targets the invisible, stunned enemies.

**Fire Egg Fabrication** **Level 9 Warder**
Trap XP 400

*The nest contains what looks like barrel-sized dragon eggs. But once an individual moves close, the eggs explode in a fiery burst.*

**Trap:** One square is filled with a nest containing three to six artificial dragon eggs, primed to explode if disturbed.

**Perception**
- ✦ DC 19: The character notices that the dragon eggs are not real.

**Trigger**
When a creature moves adjacent to the square containing the fire egg fabrication or when the eggs in the nest are moved, the trap attacks.

**Attack**
**Opportunity Action** **Close** blast 3
**Targets:** Each creature in the blast
**Attack:** +12 vs. Reflex
**Hit:** 3d8 + 5 fire damage and ongoing 5 fire damage (save ends).

**Countermeasures**
- ✦ A character can attack the fire egg fabrication (AC 18, other defenses 13; hp 1). If it is damaged, the trap attacks. A character who hits the trap from a sufficient distance, using a ranged, area, or close attack, can set off the trap without causing damage to himself or herself.
- ✦ A character can leap over the nest (and surrounding squares) by making a DC 30 Athletics check (or DC 15 with a running start).

## Tactics

Many dragons use fire egg fabrications to safeguard their eggs. Often, they will leave them in fake hatcheries or among their treasure.

*Dragontooth passageway*

| **Curse of the Dragon's Death** | **Level 10 Lurker** |
|---|---|
| Hazard | XP 500 |

*The spirit of a dragon lives on long after its death, twisted by hate and anger.*

**Hazard:** When a nondragon enters the room, a Medium invisible curse moves its speed toward the closest living creature and attacks to possess that creature.

**Perception**

✦ DC 16: The character notices a shimmering presence in the curse's square.

**Additional Skill:** Religion

✦ DC 15: The character identifies the shimmering presence as a curse of the dragon's death.

**Initiative** +7 **Speed** 5

**Trigger**

When characters enter the area, the hazard rolls initiative, moves, and attacks on its turn.

**Attack ✦ Charm, Psychic**

**Standard Action** **Melee** 1

**Target:** One living creature

**Attack:** +13 vs. Will

**Hit:** 1d8 + 5 psychic damage, and the curse enters the target's space without provoking an opportunity attack. If the target starts its turn with the curse in its space, it is dominated until the end of its turn. The curse usually compels the target to attack one of its adjacent allies or make a charge attack against the closest ally.

**Countermeasures**

✦ A character can attack the curse (AC 24, other defenses 22; hp 20; vulnerable 5 radiant; the curse is invisible). Destroying the curse ends the hazard.

✦ If the curse is hit by an attack against Will, it can't dominate a creature until the end of the attacker's next turn.

✦ If the curse is hit by a radiant attack, it moves up to its speed away from its attacker. If the radiant attack scores a critical hit, the curse is destroyed.

✦ A creature can attempt an Arcana, Intimidate, or Religion check (DC 16) as a standard action to force the curse to shift 1 square to leave a creature's space.

**Upgrade to Elite (1,000 XP)**

✦ Increase the initiative modifier and speed by 2.

✦ Increase the attack bonus by 2.

✦ When the curse is in a creature's space and the creature charges, the curse moves with the target.

## Tactics

Pairing a curse of the dragon's death with creatures or traps that immobilize targets makes it easier for the curse to keep a creature dominated or to keep targets in range of the dominated creature's attacks.

FRANZ VOHWINKEL

**Fake Lair Entrance** **Level 12 Solo Warder**
Trap XP 3,500

*A passageway into the dragon's lair suddenly reaches a large wooden door. When the door is opened to reveal nothing but a dead end, a heavy bronze door falls closed behind the intruders, trapping them as poisonous gas flows into the room.*

**Trap:** A hallway approximately 2 squares wide and 6 squares long has a trapped wooden door at the end that, when triggered, causes a smooth bronze plate to be dropped, entombing the targets in a small area slowly filling with poisonous gas.

**Perception**
✦ DC 16: The character notices the sliding bronze door before it is dropped.
✦ DC 21: The character notices that the wooden door is trapped.
**Additional Skill:** Dungeoneering
✦ DC 21: The character notices that the passageway is not heavily trafficked.
**Initiative** +15

**Trigger**
The trap rolls initiative when the wooden door is opened. Immediately, the sliding bronze door falls and traps those inside the area. Poisonous green gas starts erupting from six hidden nozzles in the walls of the corridor.

**Attack ✦ Poison**
**Standard Action** **Melee**
**Target:** Each creature in the sealed corridor
**Attack:** +17 vs. Fortitude
**Hit:** 1d6 poison damage for each round the trap has been active, up to a maximum of 6d6.
**Miss:** Half damage.
**Effect:** After 10 rounds, the bronze door lifts and the wooden door automatically closes itself, resetting the trap.

**Countermeasures**
✦ A character can disarm the wooden door's triggering trap with a DC 21 Thievery check. The character can now open the wooden door to reveal the blank wall.
✦ A character can try to slow the gas from exiting a vent with a DC 16 Athletics check. If successful, the damage rolled for the next attack is not increased by 1d6 this round.
✦ A character can try to permanently disable a gas vent with a DC 21 Thievery check. If successful, the damage rolled for the next attack is not increased by 1d6, and the maximum damage is 1d6 less per disabled vent.
✦ A character can try to lift the bronze door with a DC 21 Athletics check; one other person can assist from the inside, and two people can assist from the other side of the door.
✦ A character can attack the bronze door (AC 20, other defenses 16; hp 100; resist 10 all). Destroying the door allows characters to leave the trapped area.

## Tactics

A fake lair entrance is designed to kill unwanted visitors without forcing the dragon to rouse from its rest. Even so, a dragon needs to know when the trap has been triggered in order to at least clear it of bodies. Some fake lair entrances ring alarms in the lair or magically alert the dragon. A dragon that investigates the alert might find heroes escaping from its trap.

A dragon that has a poisonour breath weapon might use a fake lair entrance as the real entrance to its lair. Once the trap has run its course, the blank stone wall behind the door clicks open. The dragon then refills the trap's gas supply from its own breath weapon.

**Webs of Elemental Ice** **Level 13 Obstacle**
Hazard XP 800

*Strands of silvery ice spread across the cavern, stretching from floor to ceiling and wall to wall, forming a vast crystalline web.*

**Hazard:** This trap covers a 7-by-7-by-7-square area, filling it with a web of elemental ice. Creatures entering spaces containing the ice trigger an attack from the trap.

**Perception**
No check is necessary to notice the webs of elemental ice.
**Additional Skill:** Arcana
✦ DC 25: The character recognizes the elemental ice for what it is, and that character and all allies gain a +2 bonus to Acrobatics checks made to navigate its spaces.

**Trigger**
When a creature enters a space containing the elemental ice web, the hazard attacks.

**Attack**
**Opportunity Attack** **Melee** 1
**Targets:** Each creature in a square containing the hazard
**Attack:** +18 vs. AC
**Hit:** 1d10 + 6 damage, and the target is slowed and takes a -2 penalty to Will defense (save ends both). If the creature is already slowed, it becomes dazed (save ends) instead.

**Countermeasures**
✦ A character entering one of the hazard's spaces can make a DC 18 Acrobatics check to gain a +4 bonus to AC against the hazard's attacks until the start of the character's next turn.
✦ A character can attack a space containing the elemental ice web (AC 23, other defenses 18; hp 50; vulnerable 10 necrotic). Reducing the hazard's hit points to 0 clears the webbing from the space attacked.

**Upgrade to Elite (1,600 XP)**
✦ Increase the attack bonus by 2.
✦ Increase the hazard's hit points to 100.

## Tactics

Carefully procured and harvested by cobalt, silver, and, occasionally white dragons, webs of elemental ice are considered both pleasing and useful in the defense of a dragon's lair. Often, one of these dragons will place these webs close to its favorite perch—to control those trying to attack it—or in areas close to its hoard—to slow down potential thieves.

**Dragon Simulacrum** **Level 15 Blaster**
Trap XP 1,200

*Exquisitely carved from black basalt, the stone dragon's eyes glitter with malevolence.*

**Trap:** The dragon simulacrum occupies a 2-by-2-square space. It triggers when caught in the area of a dragon's breath weapon and periodically spews a ball of explosive energy to scatter and punish the dragon's enemies.

**Perception**
No check is necessary to see the simulacrum.
**Additional Skill:** Arcana (trained only)
✦ DC 23: The character recognizes the dragon simulacrum's nature.
**Initiative** +9

**Trigger**
When a dragon catches the dragon simulacrum in the area of its breath weapon, the trap rolls initiative and attacks on its turn. The trap continues to attack until no nondragons remain in the room.

**Attack ✦ Special (see text)**
**Standard Action** **Area** burst 1 within 10
**Targets:** Each creature in the burst
**Attack:** +16 vs. Reflex
**Hit:** 2d6 + 6 damage, and the simulacrum slides the target 2 squares.
**Special:** The trap's attack gains the same damage type as the breath weapon used to trigger it.

**Countermeasures**
✦ Characters standing in a space adjacent to the simulacrum gain a +2 bonus to defenses against the trap's attack.
✦ A character can attack the simulacrum (AC 23, other defenses 18; hp 125; resist 10 all).
✦ A character that catches the simulacrum in a close or area attack can choose to change the trap's damage type so that it matches the power's damage type. The power must have a damage type to alter the simulacrum's damage type.

**Upgrade to Elite (2,400 XP)**
✦ Increase the initiative bonus by 2.
✦ Increase the attack bonus by 2.
✦ Increase the area of the burst by 1.

## Tactics

A dragon places a simulacrum in a hall that leads to its lair and uses it to harry intruders. The dragon uses its *breath weapon* on the simulacrum to activate it, then retreats—possibly to recharge its *breath weapon* and return—while the heroes are busy with the statue.

**Echo Gems** **Level 17 Lurker**
Trap XP 1,600

*Glittering crystals stab out from the room's walls and attune to energy created in their presence. Dragons keep these gems to further beef up their breath weapons.*

**Trap:** This trap consists of eight 2-by-2 clusters of echo gems placed throughout the room. Creatures adjacent to the gems gain vulnerability to certain damage types.

**Perception**
No check is necessary to notice the echo gems.
**Additional Skill:** Dungeoneering
✦ DC 25: The character identifies the echo gems' function.
**Initiative** +0

**Trigger**
Whenever a space containing an echo gems cluster is in the area of a close or area attack, that cluster becomes attuned to the attack's damage type, if the attack has one. Each creature adjacent to that cluster gains vulnerable 10 to that damage type while adjacent to the cluster. Each time a cluster is in the area of a close or area attack that has a damage type, it becomes reattuned to the damage type of that attack.

The first time any of the trap's clusters is triggered, the trap rolls initiative. Each time the trap's initiative comes up, a random cluster that has been attuned makes an attack.

**Attack ✦ Zone**
**Standard Action** **Close** burst 2
**Targets:** Each creature in the burst
**Attack:** +20 vs. Reflex
**Hit:** 2d8 + 7 damage of the type to which the cluster is attuned.

**Countermeasures**
✦ A character can attack the echo gems cluster (AC 31, other defenses 29; hp 80; vulnerable 10 thunder). If this attack hits the cluster and deals damage that has a type, the cluster becomes attuned to that damage type. Reducing the cluster to 0 hit points causes it to make the attack described above before it is destroyed, if the cluster was attuned.
✦ A character can make an Arcana check (DC 20) as a standard action to cause a cluster within 5 squares of the character to lose its attunement.

**Upgrade to Elite (3,200 XP)**
✦ Activate two different attuned clusters on the echo gems' initiative.
✦ Increase the vulnerability by 5.

## Tactics

Dragons place echo gems in their lairs to use the gems to amplify the effects of their breath weapons. A dragon keeps its clusters of gems constantly attuned to the damage type of its *breath weapon*, so the echo gem clusters in a dragon's lair have already been triggered.

Use a dragon with a breath weapon that has forced movement or that prevents the target from moving (such as adamantine, brass, bronze, cobalt, and iron dragons) to keep characters in range of the clusters' attacks. If the dragon has allies, include those that use the same damage type.

**Lightning Siphon** **Level 19 Blaster**
Trap XP 2,400

*Crackling bolts of lightning lash out from the object and pull individuals closer.*

**Trap:** When a character steps within 5 squares of a statue of a Large iron dragon, the statue starts blasting nearby creatures with ensnaring bolts of lightning.

**Perception**
✦ DC 22: The character notices an occasional spark coming from the mouth of the dragon statue.
**Additional Skill:** Arcana
✦ DC 27: The character identifies the trap as a lightning siphon.
**Initiative** +11

**Trigger**
When a creature comes within 5 squares of the dragon statue, the trap activates and rolls initiative.

**Attack ✦ Lightning**
**Standard Action** **Close** blast 5
**Target:** Each creature in the blast
**Attack:** +22 vs. Reflex
**Hit:** 2d10 + 7 lightning damage, the trap pulls the target 3 squares, and the target is slowed until the end of its next turn.

**Countermeasures**
✦ An adjacent character can disable the trap with a DC 22 Thievery check.
✦ A character can attack the statue (AC 33, other defenses 31; hp 80; resist 5 all). Destroying the statue disables the trap.

**Upgrade to Elite (4,800 XP)**
✦ Increase the initiative bonus by 2.
✦ Increase the attack bonus by 2.
✦ Use two statues (activating only one each round), or make the statue Huge or Gargantuan.

## Tactics

A lightning siphon is usually created by an iron dragon's allies or underlings. Encounters with lightning siphons rarely include actual dragons. Consider using monsters that have forced movement effects and customizing them with lightning resistance so they can survive fighting near lightning siphons. These traps are frequently placed near doorways to important areas or in long hallways, where it's difficult for creatures to walk around them without coming within 5 squares.

**Grasping Stalagmites** **Level 21 Obstacle**
Trap XP 3,200

*Magically animated rocky tendrils come out of the floor and grab unsuspecting individuals.*

**Trap:** Four stalagmites have been animated by a magic ritual to attack and restrain intruders.

**Perception**
No check is required to see the stalagmites.
**Additional Skill:** Arcana
✦ DC 31: The character notices that the stalagmites are animated.
**Initiative** +10

**Trigger**
When a creature moves within 2 squares of one of the grasping stalagmites, the trap activates and rolls initiative.

**Attack**
**Standard Action** **Melee** 2
**Target:** One creature within melee reach
**Attack:** +24 vs. Reflex
**Hit:** 3d6 + 8 damage, and the target is grabbed. Only one target can be grabbed by a single stalagmite at a time, and the stalagmite cannot attack another target while it has a target grabbed.

**Countermeasures**
✦ A character can attack a stalagmite (AC 32, other defenses 29; hp 25; resist 15 all). Destroying a stalagmite does not affect other stalagmites.

**Upgrade to Elite (6,400 XP)**
✦ Increase the initiative bonus by 2.
✦ Increase the attack bonus by 2.
✦ Add four additional stalagmites to the room.

## Tactics

Grasping stalagmites are a favorite ward of adamantine dragons and other dragons that lair in the deep. Often, dragons will watch areas with these traps from high above, and pounce on those that become ensnared.

**Haunting Conscience** **Level 24 Warder**
Trap XP 6,050

*The dragon's hoard glimmers in the half light. But when it's approached, serpentine tendrils of golden mist curl from the coins and antiquities to doom those that would plunder the dragon's treasure.*

**Trap:** The trap protects a dragon's hoard, occupying each square adjacent to the hoard and all squares containing the hoard. When the trap is triggered, it attacks and compels the triggering creature to protect the treasure at all costs.

**Perception**
✦ DC 24: The character notices a faint chemical smell emanating from the hoard.
**Additional Skill:** Nature
✦ DC 29: The character recognizes the odor as belonging to haunting conscience—an arcane mixture that can charm a dragon's enemies.

**Trigger**
When a creature other than the hoard's owner enters a trapped space, the trap attacks.

**Attack ✦ Charm, Poison, Psychic**
**Opportunity Action** **Melee** 1
**Target:** Each creature in a trapped square
**Attack:** +27 vs. Will
**Hit:** 1d8 + 8 poison damage, and the target is dominated (save ends). A dominated creature screams at the top of its lungs to warn the dragon of the impending robbery (a free action), and attacks (or readies an attack against) the creature closest to the hoard that is not the dragon.
**Aftereffect:** The target is stunned until the end of its next turn.

**Countermeasures**
✦ A character forcibly moved away from the hoard can immediately make a saving throw to end the dominated effect.
✦ Slaying the dragon automatically disables the trap.

**Upgrade to Elite (12,100 XP)**
✦ A dominated creature deals 5 extra damage on its melee attacks.

## Tactics

Haunting conscience, sometimes called dragoncall mist, is used by any dragon that can obtain it to guard the dragon's hoard. More territorial dragons, such as red dragons and adamantine dragons, will also use this strange substance at strategic spots around their territories, allowing the ruckus it causes to rouse them to violent action.

Metallic dragons are versatile enough creatures that you can drop them into an adventure without deeply connecting them to the framework of your ongoing campaign.

Many adventures that use metallic dragons play on the ambiguous nature of the creatures. Because a metallic dragon doesn't have the same reputation as a chromatic dragon, characters are likely to hesitate when they encounter one (rather than immediately charge into battle). As an adventure designer, you can play with that moment of discovery. Your adventure can reward characters who take the time to figure out what the metallic dragon is up to and whether the dragon's purpose is benign or sinister.

## Adventure Hooks and Quests

You can use the following quests and hooks as written or as a guide. The number before each title refers to the level of the most potent dragon in the hook. Use this level as a rough guide for setting encounter levels.

### 4: The Secret Audition

The young gold dragon Yathnikarius leads a knightly order called the Sable Lancers, and is seeking recruits.

One of the values that Yathnikarius treasures most in his lancers is integrity. If a Sable Lancer pledges to do something, Yathnikarius expects him or her to carry out the pledge no matter how tempting the alternatives might be.

Accordingly, Yathnikarius has established a test for those he believes might make good Sable Lancers. He has a confederate hire the prospective recruits to deliver a sealed box to another confederate in a city two weeks' travel away. Yathnikarius engineers several ethical dilemmas that the prospects must resolve along the way.

- **Mother in Distress:** A woman tells the heroes that goblins ran off with her child. In a skill challenge, the characters must follow the tracks and find the child. There are no goblins, and the woman is one of the Sable Lancers, but the child is real. If the characters can't find the child, or if they spurn the woman, they fail.
- **Peacemaking:** Two travelers (both secretly Sable Lancers) are arguing about a wagon collision at a one-lane bridge, and the argument is about to turn violent. The prospects must engage in a skill challenge to defuse the situation. If violence erupts or if the prospects ignore the argument, they fail.
- **Found Money:** The characters find an unconscious male human (a Sable Lancer) in a ditch. A cursory examination reveals that he has several hundred gold coins on him. If the characters take the cash or if they don't revive him, they fail the test.
- **The Box Itself:** If the prospects open the box, its magic summons Yathnikarius, who reclaims it and scolds the prospects for lacking integrity.

Not every encounter is staged; some of the dangers of the road are all too real. The prospects must also deal with bandits on the road, various monsters that attack their camp at night, and a copper dragon that regards the road as its personal hunting grounds.

**Quest Hook:** Yathnikarius identifies some or all of the characters as potential members of the Sable Lancers (or a different organization in your campaign), so he arranges for them to deliver the golden box and face the tests along the way. You can reveal the truth at the end of the adventure, or seed clues along the way that it's all a pretense (such as the absence of goblins, the rich traveler's dubious story, or some flaws in the bridge incident that suggest it was staged). At the end of the adventure, Yathnikarius can become an active patron if the Sable Lancers have a role in your campaign, or membership in the Lancers can be merely a ceremonial honor.

*Quest XP:* Delivering the box and resolving the ethical dilemmas to the satisfaction of Yathnikarius earns a major quest reward of 875 XP.

**Quest Hook:** If the characters are already Sable Lancers, Yathnikarius might want them to stage one of the above ethical dilemmas for potential recruits who are delivering the box.

*Quest XP:* If the characters are convincing in their roles, they earn a minor quest reward of 175 XP.

**Quest Hook:** The copper dragon, Ghalladara, is infuriated and regards Yathnikarius's "tests" as trespassing on her territory. She sends the characters to disrupt Yathnikarius's test and frighten off his prospects. She doesn't want them dead, just out of her territory and out of Yathnikarius's clutches.

*Quest XP:* If the characters can mess up the test and scare off the would-be Sable Lancers, they earn a major quest reward of 875 XP.

### 9: The Golden Facade

It's a feud that has raged for centuries, one that makes a human rivalry look like a child's game. On one side are the descendants of Ravolensurax, an ancient gold dragon; on the other are the members of the bloodline of Inselios, a powerful shadow dragon (*Draconomicon: Chromatic Dragons,* page 199) who has an unmatched mastery of necromantic ritual magic. Nobody outside the two families knows what started the conflict, and, indeed, it might have been nothing

WILLIAM O'CONNOR

more than a territorial or moral dispute. Whatever the case, the families have warred on and off for generations in a struggle that shows no signs of abating.

One of Ravolensurax's bloodline, a young gold named Rovoluserras, was exploring the port city of Ylsinar in human form when the brood of Inselios learned of her presence. Now she remains in hiding, seeking some way to leave the city without revealing her true form or encountering the agents—living and undead, humanoid and draconic—of the enemy.

**Quest Hook:** While the characters are in or near Ylsinar, a stranger approaches and introduces himself as "Rav." He explains to them that his younger sister is somewhere in Ylsinar, and that she is in great danger. Without yet revealing their true nature as dragons, Rav explains that his family's enemies have learned his sister is somewhere in the city, and they are hunting her down. He needs the characters to find her, secretly escort her from the city, and remain at her side until others from his family can arrive to guard her. He offers 2,100 gp (two level 9 treasure parcels) for the safe rescue of his sister.

If an opportunity arises, he takes the heroes outside the city, reveals his true form, and explains his sister's dilemma. The characters must escort her to freedom without counting on her aid, since she must remain in human form for her own safety.

*Quest XP:* If the characters manage to escort Rovoluserras to safety without getting into such trouble that she's forced to reveal her true nature, they earn a major quest reward of 2,000 XP. If Rovoluserras is forced to reveal herself along the way, that reward is reduced to 1,500 XP.

**Quest Hook:** Many of the agents of Inselios are subtle, but others are not so secretive. In their search for Rovoluserras, they have caused a number of mysterious deaths in Ylsinar. The characters might be caught up in the search for the perpetrators, either by chance or at the request of the city watch.

*Quest XP:* If the characters unearth and defeat Inselios's chief operatives in Ylsinar, they earn a major quest reward of 2,000 XP. Although Inselios can call upon a great many powerful creatures and will do so if Rovoluserras is exposed, his current agents in the city are not nearly so potent. If the characters identify these operatives and warn the city government but do not deal with the operatives, they earn only a minor quest reward of 400 XP.

## 12: The Inside-Out Lair

Obsessed with defending his lair, the adult adamantine dragon Bothurion is something of a hobbyist among metallic dragons. For years, he has advertised the wealth of his hoard in an effort to entice thieves to test his defenses.

At first, this tactic brought Bothurion the challenge he wanted. But after many upgrades, Bothurion's lair became practically impregnable. The lair's reputation is well known, so few thieves dare try to steal something now. The few who made such

attempts died in the outer ring of defenses, leaving some of Bothurion's more fiendish traps untested.

With no one to test his obsession, Bothurion resorted to drastic measures. He kidnapped several capable adventurers, threw them atop his treasure hoard, and dared them to reach safety.

Bothurion observes their efforts from a scrying chamber within the lair. He has taken measures to prevent them from short-circuiting his test. For example, the adventurers have no *residuum* or other reagents to manage a portal ritual or other magical escape. But they do have their weapons, armor, and other key items, because Bothurion wants to see how his guardians fare against determined thieves. Bothurion won't reveal himself until the adventurers reach the periphery of his lair—if they last that long.

**Quest Hook:** The characters are among the captives who awaken to find themselves atop an immense pile of coins and jewels. They have no idea where they are, and must find their way out of Bothurion's lair. Along the way, they must navigate elaborate traps, various servants and guardians of Bothurion, and eventually Bothurion himself. If you want to add a strong social element to the adventure, you can include a number of nonplayer character captives, some with sinister motives of their own.

*Quest XP:* Escaping Bothurion's lair earns the characters a major quest reward of 3,500 XP—and all the treasures they manage to carry out with them.

**Quest Hook:** If you have enough players in your campaign (or additional friends who are willing to take part in a one-shot adventure), you can split the characters into two groups. The first group plays the adventure as described above. The second group is the rescuers, who quickly figure out what happened to their friends and then delve into Bothurion's lair from the outside.

Alternate playing sessions (or use two DMs simultaneously) between the groups until they're about to reunite, and then run a combined session in which both groups simultaneously fight Bothurion.

*Quest XP:* Characters who take part in only the escape or the rescue receive minor quest rewards of 700 XP per player in the group, since they have to get only halfway in or halfway out of Bothurion's lair.

## 14: Shell Game

Olenvale is the central and largest town in a network of more than a dozen coastal villages and hamlets that make up one large community. People travel freely among them (during the day, at least), and the various community leaders meet in council before making decisions that might affect their neighbors or the open trade that all the villages enjoy.

Olenvale and its communities also have a sort of guardian angel, albeit a guardian angel for hire. The bronze dragon Vahalapras protects the villages from attack in exchange for a regular tribute of coin and cattle. Those towns that choose not to pay don't gain the benefit of the dragon's protection, but Vahalapras doesn't torment them.

Two days ago, Vahalapras returned to her lair after dealing with a small cadre of bandits to find all her defenses penetrated and her new clutch of eggs missing.

The dragon held onto her temper only through willpower and an intense focus on the duty she owes to those who pay for her protection. Rather than tear apart Olenvale and the other villages looking for her missing clutch, she has made the community leaders an ultimatum: They have one week to locate and return the eggs and to identify the party responsible for taking them. The leaders balked at the short time, but who argues with an enraged dragon that has lost its clutch? If they are unsuccessful, she'll hunt down the eggs and the perpetrators, going through anyone and anything in her way to do it.

**Quest Hook:** With only five days left, the Reeve of Olenvale and the other community leaders turn to outside help—the characters. The townsfolk are too poor to offer much in the way of financial reward. They can pony up a mere 500 gp among them (one-quarter the value of the smallest level 14 treasure parcel). Still, they beg the characters for their help and offer to let them keep the perpetrators' possessions as part of their reward. They have found one clue: an eggshell shard just off the northern road.

Obviously, you must decide who the responsible party is. It could be a group of citizens angry about the extra taxes imposed to pay the dragon's fee—if so, how could they possibly have overcome the dragon's defenses? Were the eggs stolen by evil wizards or by cultists of Tiamat, perhaps with the intention of corrupting the hatchlings into draconians? If so, how long do the characters have before the villains smuggle their prize out of the region?

*Quest XP:* If the characters track down the perpetrators, defeat them or deliver them to the dragon, and return her eggs, they earn a major quest reward of 5,000 XP. If the characters identify the perpetrators and deliver that information to Vahalapras along with her eggs but do not succeed in defeating or delivering the perpetrators, they instead earn 3,000 XP.

**Quest Hook:** In the process of hunting down the eggs and the thieves, the characters might learn how the thieves circumvented Vahalapras's traps and defenses. Alternatively, the dragon might ask them to find this out after the eggs are safely back in her lair.

*Quest XP:* If the characters learn how the thieves broke into the dragon's lair and deliver that information to her, they earn a minor quest reward of 1,000 XP.

**Quest Hook:** If the characters are unable to find the perpetrators in time, they might need to convince Vahalapras to postpone her attack on the villages (by succeeding on a very complex skill challenge) or fight

the dragon themselves in order to protect the people of Olenvale.

*Quest XP:* If the characters successfully protect the people from Vahalapras, they earn two minor quest rewards totaling 2,000 XP. They should not gain both this quest XP and the quest XP offered for tracking down the perpetrators. They undertake this last quest only if the first one fails.

## 18: Unmask the Conspirator

Lord Naumonshra Kell has grand ambitions. Since his father's untimely death two decades ago, Lord Kell has repeatedly added to his lands through subterfuge or outright conquest. Now he's on the verge of declaring himself monarch of the Kingdom of Kell.

In many ways, the duchy of Kell is already acting like a full-fledged kingdom. It has a standing army, a knightly order devoted to defense of the realm, and a court where diplomacy and intrigue rule.

Naumonshra's ambitions have been thwarted of late, seemingly by simple bad luck. Some ambassadors from neighboring duchies have died of untimely but apparently natural causes. War plans locked in Lord Kell's map room disappeared, causing a season's delay in a key border war. The accumulation of power has always come easily to Lord Kell, so when things become difficult, he is certain that it's more than bad fortune holding him back. There must be a spy in his court, Lord Kell reasons—probably a saboteur in the pay of a duchy that's about to be absorbed.

Kell's suspicions aren't far from the truth. A steel dragon named Ralahirah has been lurking on the edge of Kell's court for several months, using shapechanging and espionage techniques to thwart Kell's dreams. Ralahirah has succeeded thus far, but hers is a dangerous game. She's simultaneously pretending to be two courtiers, and if they're ever expected in the same place at the same time, she risks being unmasked.

**Quest Hook:** Naumonshra Kell hires the characters to spend time in his court and find the spy. He figures that because they're new to the court, the characters can't be part of the conspiracy. Eventually, clues will lead to Ralahirah in one of her guises.

*Quest XP:* If the characters expose Ralahirah, they earn a major quest reward of 10,000 XP—even if she escapes to cause future trouble for Lord Kell.

**Quest Hook:** Ralahirah has been trying to singlehandedly prevent the creation of the Kingdom of Kell, but now she has decided that it's too big a task for her to do alone. She directs the characters (either through subterfuge, through persuasion, or by hiring them outright) to foment revolution outside the castle walls. The characters must stay one step ahead of Kell's agents while periodically sneaking back into the castle to receive further instructions from Ralahirah.

*Quest XP:* Each time the heroes strike a blow against Lord Kell and his royal ambitions, they earn a minor quest reward of 2,000 XP.

## 22: The Good of the Many

Locrecean, an elder silver dragon who has devoted his life to opposing the cults and dragons devoted to Tiamat, finds himself in a terrible quandary.

For years, he has pitted himself against the efforts of Ezrian Vakka, a dragonborn warlock and priest of one of Tiamat's cults. Vakka and his humanoid and dragon congregants hatched vile schemes, and time and again, Locrecean—sometimes alone, sometimes with allies—was able to stop them. Locrecean was, however, never able to slay or capture Vakka.

And now it might be too late.

Vakka and his associates have hidden themselves somewhere within the metropolis of Kaddastrei. Once a major city in the empire of Nerath, it is still an enormous community with more than 20,000 inhabitants. Ensconced within, protected against divination and scrying rituals, the cult of Tiamat could remain hidden for years.

But Locrecean doesn't have years to find them. Vakka is mere weeks away from completion of a dark ritual that threatens not only every person in Kaddastrei, but all the communities for thousands of miles, if not farther. (The precise nature of this threat is left for you to develop as best suits your campaign.) He desperately doesn't want to do it, but if he has to, Locrecean will level Kaddastrei itself—killing tens of thousands of innocents—to ensure Vakka's destruction and to prevent the rise of an even greater evil.

What he needs is someone to offer him a better alternative.

**Quest Hook:** The characters have several ways to become involved in the hunt for Vakka's sect. At their level, they doubtless have a widespread reputation, so Locrecean could approach them for aid directly. Alternatively, the authorities of Kaddastrei might have become aware that something's not right in their city—perhaps Vakka's plan requires sacrifices or test subjects, so people have disappeared. The leaders then ask the characters to intervene. Once they have begun to do so, the silver dragon approaches them and explains what's happening.

*Quest XP:* If the characters locate Vakka's hideout, Locrecean can take on the cultists without destroying the city, but there will still be substantial loss of life. If Locrecean is badly wounded in the ensuing battle, he allows much of the cult to escape. In this instance, the characters earn a quest reward of 10,000 XP. If they aid Locrecean in this battle, or find some way to drive Vakka and his people from the city so the dragon can avoid collateral damage, they earn a quest reward of 14,000 XP. If the characters defeat Vakka and his cult without endangering the citizens or forcing Locrecean to take action, they instead earn the full major quest reward of 20,750 XP.

There's almost no limit to how much you can employ metallic dragons in your campaign. They're varied in alignment, motivation, level, campaign role, and the challenges they offer to players. The following campaign outlines feature dragons in a spectrum of roles.

## Awaken the Sleepers

The city of Shurral Deraen has long relied on a brood of silver dragons inhabiting the city's central spire to protect citizens against the predations of hordes of giants in the mountains to the north.

Recently, however, the dragons have spent more and more time in deep slumber, and the mages who serve as emissaries between the dragons and the city are worried that soon they'll be unable to awaken the dragons. Meanwhile, a frost giant jarl is attacking outlying communities, and growing ever more bold as his attacks don't provoke reprisals.

In this campaign, the connection to dragons isn't apparent at first. Only over time will the characters realize that what appears to be a giant invasion has its origin in an ancient rivalry between a cobalt wyrm and a silver wyrm.

### Heroic Tier: Smoke on the Horizon

The giants in the Karralak Mountains, a mix of hill giants and frost giants, are restless. A few weeks after the mountain passes are clear of snow, everyone in the lowlands can see plumes of smoke floating south from the foothills—a sign that someone is occupying the old forts built by the giants centuries ago.

The farming communities of the lowlands aren't sure who's rebuilding the old forts, but the denizens of the mountains aren't waiting to find out. In a series of adventures, the characters must protect the farming villages against banditry from worg-riding goblins, hobgoblins, and bugbears. Through interrogation and evidence, the characters learn that giants from the northern wilds crossed the passes and pushed the goblins out of their mountain warrens.

In the final adventure in this tier, a band of ogres seizes the town of Harranton and declares it the "Throne City of Banakar the Ogre." The characters infiltrate the city and defeat the ogres, even as bandits, goblinoids, and other enemies of Shurral Deraen start gathering under Banakar's banner.

### Paragon Tier: Behind the Curtain

By defeating Banakar, the characters learn that he was acting under the direction of a frost giant jarl inhabiting Fort Ankherang in the Karralak Mountains. The characters travel to Shurral Deraen and inform the city leaders that the giants intend to march on the lowlands in a few months or sooner.

Because the heroes saved the town of Harranton, the city leaders invite them to enter the forbidden Tower of Dragons in the center of Shurral Deraen. They climb to the top in the company of the city's mages and find the silver dragons asleep. Even though the mages perform rituals of awakening over and over again, only one dragon regains consciousness: Launacathra. She reaffirms her commitment to defend Shurral Deraen and flies off to attack Fort Ankherang.

FRANZ VOHWINKEL

The city fathers, in a state of near panic, swear the characters to secrecy and send them into the Feywild to ask an orium dragon named Ossirian why the silver dragons won't awaken.

The journey to Ossirian's lair is an adventure itself through a Feywild domain ruled by fomorians and filled with hostile natives. After a tense negotiation, Ossirian provides a more powerful ritual that should enable the city's mages to counter whatever is making the silver dragons slumber.

The characters return to Shurral Deraen to find out that Launacathra hasn't returned and that one of the tower mages is missing. They must find the mage before he escapes the city or reveals that the dragons are sleeping, which would panic the citizenry.

While the mages start preparing the new awakening ritual, the characters must find a way to slow down the giants. They travel to Fort Ankherang, disrupt the giants' preparations there, and rescue a captured and groggy Launacathra. They also learn that the giants are offering tribute to a dragon—of an unknown variety—named Valkathator, whose lair lies far north of the mountain passes.

### Epic Tier: Invaders Both Overt and Subtle

The characters and Launacathra return to Shurral Deraen with the invading giant horde only days behind them. The giants put the city under siege, and the adventurers must attack repeatedly to keep the invaders off balance long enough for the city's mages to complete the ritual. When the ritual is nearly finished, a huge cobalt dragon appears above the Tower of Dragons and flies inside. The characters run through the trap- and ward-filled tower interior and drive off the cobalt dragon before it kills all the mages and disrupts the ritual. The combined effort of the mages and the characters is sufficient to complete the ritual and awaken the silver dragons. They fly out of the tower and unleash their fury on the giants, who have just breached the city walls.

The giants die in battle with the silver dragons, but the dragons start to fall from the sky as the battle winds down. They're falling asleep again, and this time in full view of the citizens of Shurral Deraen—sparking a citywide riot. Amid the chaos, the characters follow the only clue they have: the cobalt dragon. The dragon is Valkathator, who was an ancient rival of the silver dragon that fathered Launacathra and the city's other dragons.

The characters and an increasingly sleepy Launacathra travel north through the remnants of the giant horde, over the mountain passes, and eventually up to Valkathator's lair, which lies within a blizzard cloud to the north. Launacathra succumbs to slumber just as the characters realize how Valkathator is making the other dragons sleep: by infusing the northern wind itself with magic. In a titanic battle, the characters defeat Valkathator, who is cast out of his lair into the brunt of the northern wind and suffers the fate he intended for all other dragons—a magically induced, unending slumber.

## Prophecy of Doom

For centuries, a loose conclave of mithral dragons has protected the eight *Wells of Futures Foretold*, powerful artifacts capable of not only revealing the future but altering it. Now something is killing those dragons one by one, and the remaining mithral dragons are in a panic because their prophecies aren't revealing who conspires against them. If all eight *Wells* fall into the wrong hands, the forces of evil will be able to remake the future into a dark, terrifying place.

### Heroic Tier: The Oracle Is Closed

Throughout most of this tier, the heroes undertake typical adventures: They fight bandits, delve into undead-infested tombs, and explore ancient ruins. Near the end of the tier, they find themselves caught up in a mystery involving a missing person, and they travel to the lair of a mithral dragon named Ahmidarius, because he is known as a peerless oracle.

After negotiating with Ahmidarius's dragonborn servants, they obtain permission to ascend into the clouds where his lair floats. They discover that despite the promises of Ahmidarius's trusted servants, the dragon has all the traps in his lair engaged, and he attacks the characters as soon as they reach his inner sanctum. After an abbreviated battle, the characters discover why Ahmidarius attacked them: He's expecting an attack from forces that he cannot identify even through his own divinations.

### Paragon Tier: Seeking the Dracoliches

With Ahmidarius's help, the characters resolve their missing-person mystery, but Ahmidarius receives an urgent mental message from his father, an ancient wyrm named Porothelion. The message says, "Come to my lair—you must save the *Wells of Future Foretold*."

Ahmidarius takes the characters into his confidence and makes whatever promises it takes to persuade them to venture into the Astral Sea with him to seek out his father's lair. They arrive to find Porothelion's lair occupied by hordes of undead led by a dreambreath dracolich (*Draconomicon: Chromatic Dragons,* page 202) known as Rhao the Skullcrusher. The characters and Ahmidarius take Porothelion's lair, but not before Rhao escapes, disappearing and taking one of Porothelion's towers with him. Porothelion is nowhere to be found—physically or psychically.

Ahmidarius receives another psychic message, this time informing him that "the conclave approaches."

Three ancient mithral dragons appear and explain that Porothelion was the guardian for one of the *Wells of Future Foretold*, stationary artifacts of unimaginable prophetic power. Dreambreath dracoliches are trying to seize all eight *Wells*, and have found a way to mask themselves from the scrying power of the artifacts.

The ancient mithral wyrms send Ahmidarius in search of Rhao the Skullcrusher. Then they tell the heroes to explore what lies beyond the planar portals in a heavily warded part of Porothelion's lair. The wyrms explain that before his disappearance (and presumed death), Porothelion was trying to track the dracoliches back to their lair. The newly constructed portals might indicate that he had succeeded.

The characters have various adventures beyond the portals. Eventually, they find the lair of a dreambreath dracolich in the Shadowfell.

### Epic Tier: Cataclysm on the Shadowfell

The characters report back to the ancient mithral dragons to find Ahmidarius absent. After receiving the characters' news, the conclave hastily assembles an invading force of dragons and allies the heroes were able to befriend in their adventures beyond the planar portals.

The campaign concludes with an assault on a black fortress in the Shadowfell where the dreambreath dracoliches dwell. The dracoliches can bend reality with the power of the five *Wells* they have seized, so the characters contend with the black fortress as much as they battle the dracoliches. The dracoliches have warped Ahmidarius to their cause, using the power of their corrupted *Wells* to turn him into an insane dracolich.

## A Little Knowledge . . .

Despite its grandiose, even ostentatious, name and customs, the Grand Assemblage of the League of Eternal Discovery—or the Assemblage for short—receives respect far and wide. The guild has knowledge of all manner of ancient wisdom and arcane secrets. From its universitylike hall in the ancient city of Pravarum, the Assemblage's members and reputation have spread almost unimaginably far in these days of dangerous roads and fearful travel.

And why not? The members of the Assemblage are among the most experienced adventurers, explorers, and arcane researchers the world has known since the fall of the great empires. Its members motivated by a shared desire to see all that can be seen, the Assemblage has grown from a tiny adventurers' guild into an organization that has scores of members.

Only those inducted into the Assemblage's highest orders know that several of the organization's patrons are members of an orium dragon family that uses adventurers as its eyes and ears in the world. Yet even these few, and most of the dragons, remain unaware of a threat in their midst, a particularly driven orium wyrm who has goals for the organization far more sinister than the simple accumulation of knowledge.

A synopsis of the Assemblage, allowing you to use the organization in any campaign, can be found on page 75.

### Heroic Tier: Apprentice

After several early successes in their adventures, the characters are approached by a tiefling named Olfien. He says he is a member of the Assemblage and an emissary for Yuniosu, one of the Assemblage's greatest patrons. The characters have come to the patrons' attention, and they would like to work with the party on a freelance basis to better judge the characters' skills. To that end, Olfien hires the heroes for several adventures, nearly all of which revolve around the discovery or recovery of ancient magic or lore.

### Paragon Tier: Journeyman

After the characters undertake several adventures on his behalf, Olfien invites them to the city of Pravarum, where they will be officially inducted as members of the Assemblage. He introduces them to several valuable contacts, but the truly important meeting occurs after the ceremonies, when he takes them to meet Yuniosu—one of the orium dragons.

There, Yuniosu acknowledges that the characters would not normally have been told the secret of the group's patrons so soon, but the patrons needed to swiftly bring in people they could trust from outside. Several members of the Assemblage have vanished or died in recent months. Yuniosu and her relatives believe that someone within the guild might be responsible. The characters will continue to undertake adventures and explorations on behalf of the Assemblage, but their true objective is to get to know the members of the Assembly and attempt to learn who among them is the murderer—and why.

Over the course of their paragon adventures, the characters uncover several instances of corruption and conspiracy within the group, but all seem to be for prestige or power. None appears related to the murders, which increase in frequency. They also meet the other dragons of Yuniosu's family, including Konoktolta, the brood's mighty patriarch.

### Epic Tier: Master

Finally, as the murders and disappearances grow so frequent than the entire membership becomes aware of them, the characters learn that the perpetrator is Konoktolta. The secret-obsessed (and vaguely mad) orium wyrm has become convinced that knowledge of arcane magic is, in itself, too dangerous for the mortal races to have. He assisted his offspring in

manipulating the Assemblage to use its members to hunt down arcane casters. Part of the plan is to assemble the most skilled arcanists in the region so they would be easy to exterminate.

With Yuniosu's help, the characters escape his initial attack. The early levels of the epic tier are spent attempting to save the lives of his other targets and to survive (or at least hide from) his wrath until the party has gained enough power that it can confront the dragon directly. Unwilling to fight to the death, Konoktolta escapes, leaving the characters to track him down before he can start his schemes over.

## An Age of Endless Storms

For centuries, Alkesandreth—a mighty silver dragon and a skilled ritual caster—has battled the evils of the mortal world. Demons, wicked cults, powerful necromancers, rival dragons—Alkesandreth fought them all, and won. Yet for all his efforts, the world is as wretched as ever, and the dragon has grown desperate.

In that desperation, Alkesandreth has turned to a sect called the Scions of the Unclouded Sun. A group consisting of powerful mortals, other dragons, and various sorts of angels, its members believe devoutly that evil flourishes in the world because dark forces—devils, demons, exarchs of vile gods—roam free while the gods of good maintain a "hands off" approach, leaving the fate of mortals to mortals.

Their goal is to force the gods to intercede in the day-to-day functioning of the world. In his study of the slow orbits of the planes, Alkesandreth believes he has discovered just how to do it. Soon, the gods will have no choice but to intervene in the world of mortals, stamping out evil once and for all. And the thousands—maybe millions—who must die to make it happen? They're simply a price that must be paid.

### Heroic Tier: Flood

The party's first adventures are of a standard variety. The only common theme is the weather: The region, wherever the characters travel, is beset with constant violent storms. Winds howl, rains flood low-lying regions, and lightning wreaks havoc as though deliberately targeting the structures of mortal races. As the season turns but the weather grows no better, the characters become aware that something is wrong. They begin encountering a variety of elemental creatures, such as slaad tadpoles running wild, or demons in the service of warlords or criminal guilds.

At the end of the heroic tier, perhaps seeking aid from sages or wizards, the characters learn that the world has come into conjunction with the Elemental Chaos—and that some mystical effect is holding the world there, turning what should have been only a brief period of turbulence into an ongoing danger.

### Paragon Tier: Fire

Even as the heroes search for the cause of the prolonged conjunction, the Elemental Chaos's effect on the mortal realm grows stronger. The weather becomes unnatural, including rains of fire and snows of stone. Elementals, archons, and demons grow more common, demonic and primordial cults increase in power, and elemental dragons (*Draconomicon: Chromatic Dragons*, page 191) hunt the lakes and skies.

Staking out favorable areas, a number of dragons expand their territories, taking advantage of environments that do not harm them but prove hostile to invaders. It is during the characters' encounters with some of these dragons—perhaps while the characters defend besieged communities from their new would-be overlords—that they first hear of Alkesandreth. The silver dragon recently surrounded himself with

KEREM BEYIT

a cabal of powerful creatures and has spent the past several years gathering up enormous amounts of arcane reagents. The characters might assume he is a potential ally trying to end the conjunction, rather than the source who's maintaining it, but either way they have few options but to seek him out.

### Epic Tier: Inferno

The conjunction trembles, and entire communities break loose from the earth and float into the skies, surrounded by clouds of gaseous flame. The characters must hunt down Alkesandreth, and only when they find him do they finally learn that the silver dragon is keeping the conjunction in effect. Although the characters are not quite powerful enough to take him on at his full strength, his devotion to maintaining the ritual allows the party to disrupt his plans, defeating many of his allies and demolishing the components necessary to continue the magic.

Even when the two worlds finally begin to drift apart, Alkesandreth refuses to give up on forcing the deities to intervene in the mortal world. Using the last of his great magics, he flees into the Astral Sea—and eventually to the Nine Hells. Whether to prevent him from finding some way to unleash an army of devils into the world or to keep one of the archdevils from gaining power over an already desperate and faltering silver dragon's soul, the characters pursue him into this realm of torment and suffering.

Here they must overcome him once and for all, even as they struggle to ensure that his death or defeat in Hell doesn't trap his soul there as a weapon for the devils to exploit.

## The Broken Throne

At the height of the Empire of Nerath, one of its greatest kingdoms was the nation of Kindras, a heavily structured military power. Kindrasan soldiers made up a good portion of Nerath's armies, and its codex of laws heavily influenced the empire's code of justice. For all its might, however, when Nerath toppled, Kindras fell along with all the rest of the empire's subject regions. It left behind many independent towns and a few cities, all struggling to survive, all interconnected by a network of roads that has slowly deteriorated over the subsequent years. Where law once reigned, banditry is now the order of the day. Where caravans traversed roads in safety, now those few merchants brave or foolish enough to travel long distances do so with hired guards and one eye ever alert for the monsters that lurk in the overgrown wilds.

The bronze dragon Pelsemesios hopes to change all that. Working through a young local champion, a would-be queen by the name of Lady Casmerra, Pelsemesios hopes to see Kindras reborn into a kingdom of laws and civilization, a bastion of order and society in this wild, chaotic realm.

### Heroic Tier: Consolidation

A variety of patrons commission several groups, including the characters, to clear the region of dangers. After a few simple missions, their employer reveals herself as Lady Casmerra. She aims to consolidate the region into the kingdom of New Kindras. Using the characters to put the local criminals and robber barons on the defensive will allow Casmerra time to establish a permanent capital. She offers the characters long-term employment, perhaps positions in the new kingdom's military, if they assist her in establishing the rule of law.

"Queen" Casmerra frequently sends the characters to the outskirts of the slowing growing kingdom—little more than a few towns and cities so far—so they can deal with monstrous threats or local tyrants who refuse to yield to a larger authority. It is during these adventures that the characters first learn of Pelsemesios, the power behind Casmerra, and that he, too, seeks the return of order and civilization for the good of all who dwell in the region.

Pelsemesios's presence also inspires interference from his rivals. Throughout all the tiers, these enemies (some of them dragons and other monsters) ally with the leaders of rebellious communities to fight against the growing kingdom.

### Paragon Tier: Revolution

The heroes discover during their infiltrations of the surrounding communities that Casmerra and Pelsemesios have been using their soldiers not only against military threats, but against any community that rejects the rule of New Kindras. The two have tried to avoid civilian casualties, and once they've gained control over a region, its citizens are granted the same rights and freedoms that residents anywhere else in the kingdom have. Nonetheless, Casmerra and Pelsemesios are using martial force to conquer those who reject their rule. Several villages have banded together and threaten the newly formed kingdom with armed revolt—a revolt that will fail, but that might destabilize the new government in the process.

If the characters confront them, the dragon and the queen point out that New Kindras can't enforce its rule over regions in which it lacks power. Under the watchful eyes of their soldiers, citizens of areas they conquer gain the benefits of codified laws and protection from the monsters and criminals that still lurk in the wild.

Do the characters stand with Pelsemesios and Queen Casmerra, acknowledging that the rule of law and safety of all take precedence over the rights of self-government for communities that want to maintain their independence? Or do they stand with the rebels against an expanding kingdom that seeks to make the world a safer place for all without regard for those who do not wish to be ruled?

### Epic Tier: Retaliation

Regardless of the characters' decision, attacks by Pelsemesios's enemies intensify. The creators of New Kindras aren't the only would-be monarchs rising to power, and the growth of nations brings an outbreak of war. Many of the leaders hope to conquer other rising kingdoms before they reach their full potential.

These rival kingdoms span the planes, and magical warfare is the order of the day. Among the most dangerous rivals are:

- The efreet Sharamadras, whose dictatorship is based in the Elemental Chaos. Violent weather heralds her slave army's march into battle.
- Akkliar, a vicious devil who built his kingdom in the world so he could avoid the meddling of other devils. Rumors suggest that an archdevil—perhaps Asmodeus himself—is the power behind Akkliar's throne.
- Yorantadrios, the rival most strongly opposed to New Kindras. A much older sibling of Pelsemesios, Yorantadrios long ago became a dracolich. He has grown sinister and cruel since his transformation. Once this enemy is revealed, Pelsemesios claims he began building a kingdom to stop his brother's army of undead and draconic creatures.

The characters can fight alongside a kingdom, or they can try to end the conflict without taking sides.

## The Pontifex Wyrm

Few full-fledged nations or kingdoms remain in a dark and lawless world, but surely Avaat Mahn comes close. A powerful, centuries-old city-state, Avaat Mahn claims dominion over every community within several days' travel of its great stone walls. Thousands of people in more than a dozen communities swear fealty to the Pontifex Council of Avaat Mahn. And, yes, perhaps their taxes are a bit higher, and perhaps their freedom to worship as they choose is curtailed. But at least the roads are far safer, the watch is more efficient, and the priests are ever ready with magic.

And those priests are common indeed, for Avaat Mahn is a strict theocracy, one in which the ruling clergy—the pontifices of the council—hold absolute power. Devoted exclusively to the god Ahn-Sur, the Pontifex Council rules in his name and teaches the people absolute obedience to the deity and to the theocratic authority of the state.

It's all a lie.

There is no deity named Ahn-Sur, even if most of the pontifices believe that there is. The gold dragon Suvankotha, who serves on the council in human form, concocted the entire religion. When he was much younger, Suvankotha decided to rule over the "lesser beings" of the region—for their own good, of course—and chose religious indoctrination rather than overt power as the means to achieve that rule. Today, the temple of Ahn-Sur uses rituals to grant false divine power to its priests, and the Pontifex Council of Avaat Mahn rules over its people with an iron fist—keeping them safe, yes, but only in exchange for their worship and unquestioning obedience.

### Heroic Tier: Followers

The characters begin the campaign as citizens of, or newcomers to, Avaat Mahn. So far in their lives, they've seen only the positive side of life in the city-state. The roads are safe, the peasants in the fields largely unmolested. Indeed, the heroes must travel a good distance to find adventure, and they are encouraged and supported by the Pontifex Council, which is eager to employ people capable of ensuring the region's safety.

Slowly, the characters learn more about some of the "threats" they're dealing with. Certain criminal gangs are, in fact, factions rebelling against the council's tyranny. Citizens of Avaat Mahn often disappear after questioning the council's rulings.

### Paragon Tier: Apostates

Whether or not the characters act on what they have learned, the mere fact that they know it—that they've consorted with "heretics"—comes to the council's attention. Friends of the party begin to disappear, and the characters find themselves attacked by those they thought of as allies. Early in the tier, the characters must fight for their freedom and survival, even as they slowly begin to learn the truth of the Pontifex Council, the dragon in its midst, and the false god Ahn-Sur. They might have to escape Suvankotha's secret dungeon or rescue potential allies from deep within it.

In the latter levels of the tier, the characters are pitted directly against the forces of the Council. They cannot stand alone, but with the evidence they've found, perhaps they can convince enough citizens of the truth to raise a revolt against the theocracy. But even if they manage this, can they defeat Suvankotha?

### Epic Tier: Believers

Now what? Perhaps the characters have thrown off the yoke of Suvankotha and the Pontifex Council, but they've left this theocracy with neither a government nor a spiritual center. They must find a way to maintain the rule of law and to introduce worship of the true gods (or at least some of them) to a populace bitter and betrayed by the one god they knew.

Furthermore, the characters must protect Avaat Mahn from other forces that have learned of its vulnerability. Warriors of dark gods see a chance to grab power, and portions of the populace that refuse to accept the truth see the heroes as heretics against Ahn-Sur. Lurking behind nearly all these threats are the offspring of Suvankotha. This entire family of dragons seeks blood vengeance on the characters and on the culture that betrayed their golden sire.

Some metallic dragons are social creatures. Some enjoy lording over "lesser beings," or at least believe they have the right and responsibility to do so. Some are determined to teach the humanoid races to fend for themselves. And some just need allies or servants that can reach places they cannot. Whatever the case, metallic dragons are far more likely than their chromatic counterparts to found, take over, or at least participate in humanoid organizations and factions. For the dragon, this offers a degree of influence and a pool of potential agents that it might not otherwise have. For the players, it offers the opportunity for their characters to interact, knowingly or unknowingly, with one of these great, potentially campaign-altering creatures.

The following examples can be used as is, or can serve as models for creating your own organizations.

## The Blood of Barastiss

**Goal:** The Blood of Barastiss, a community and religious sect that started out as an extended clan of lizardfolk, is motivated by religious zealotry in the name of a dragon that claims to be a primitive spirit-god. The Blood wants to swiftly expand its tribal borders, enslave and assimilate any communities in its way, and spread its particular religion.

**Size:** Small, located in a secluded region. The sect has not yet encroached on larger communities.

**Alignment:** Unaligned.

**Philosophy:** "Great Barastiss! Bring us meat and bone! Show us the weak so we can take what they do not protect! Great spirit, we bring more to worship at your idol!"

**History:** The Barastiss lizardfolk lived on a small island and worshiped ancestors and regional spirits. They warred with other primitive tribes, and the clan might have disintegrated had the iron dragon Ogthorilak not shown up to lead them. The dragon took the name Barastiss to emulate the clan's spirit-god and turned the group into the sect called the Blood of Barastiss. The Blood then assimilated other races into its ranks and spread to other islands and the nearby coast.

**Leadership:** The leader of the Blood is the iron dragon Barastiss. (He keeps his real name secret.) He poses as the avatar of the spirit the sect worships, communicating his wishes to the tribe's shaman, a greenscale lizardfolk named Varhisthist. The shaman relays those orders to Kromarrok, an orc who serves as the tribe's war leader and secular chieftain.

**Headquarters:** The heart of the Blood's territory lies on the island where the lizardfolk lived for hundreds of generations. Their greatest idol also stands atop the rocky hills of that island, making it the center of their worship.

**Membership Requirements:** The clan accepts members of all races. Petitioners must prove themselves with shows of might and participate in rituals with blood oaths to serve Barastiss.

**Structure:** The Blood's members come from various families and tribes that worship Barastiss. Other than the leaders mentioned above, the Blood doesn't have a hierarchy. The elder of a family holds authority over the younger members, and shamans have authority over the elders. When the sect conquers a region, it takes locals as slaves. Some of these slaves are married into tribal families, and their offspring are raised as members of the Blood.

**Activities:** The Blood's members can be brutal combatants, slave-takers, thieves, and (at times) cannibals. However, they aren't deliberately wicked, and they prefer to avoid the slaughter of noncombatants. Their slaves are well fed, worked hard but not abusively, and punished only when they show deliberate disobedience. The tribe occasionally trades with others beyond its borders, if it would be too difficult to take over those communities.

### Blood of Barastiss Lore

**History DC 8:** The Blood of Barastiss, formerly Clan Barastiss, is an extended family of lizardfolk, kobolds, orcs, shifters, primitive humans, an occasional dragonborn, and a few other random humanoids. Members are united in religious worship of a being called Barastiss; they believe him to be the emissary—perhaps avatar—of a savage, primitive god. Although this fanaticism links them, the Blood's members also reinforce their family bonds through various blood-letting and blood-sharing ceremonies—such as the mingling of open wounds—and marriages between different creatures that would be considered taboo in most civilized cultures.

**History DC 14:** Clan Barastiss was a tribe of greenscale lizardfolk that worshiped a stone idol on a jungle island. An opportunistic iron dragon arrived to lead them, in the name of their god. Under his guidance, the clan became the Blood of Barastiss and spread to encompass all the tribes on the isle. It then grew, reaching the nearest shores of the mainland.

### Adventure Hooks

The obvious purpose for the Blood of Barastiss is that of an adversary, pitting the characters against the soldiers of the tribe and perhaps, eventually, against the expansionist agenda of the iron dragon who rules them. Some possibilities include:

- The characters might be sent to rescue a noble shipwrecked on the tribe's island, only to discover that the noble has been captured by the Blood

ZOLTAN BOROS & GABOR SZIKSZAI

and is in imminent peril of being sacrificed to the "avatar" of the idol. The characters might discover that an artifact or treasure they seek is hidden in the buried vaults of a subterranean temple beneath the idol on a mysterious jungle isle; naturally, the Blood defends its sacred idol from any sort of intrusion. Or the Blood of Barastiss might launch a raid on a nearby coastal town at the dragon's direction, perhaps using a forgotten teleportation circle buried in the vaults beneath its idol.

- The tribe might not be simple adversaries in some adventures. Although many characters will want to see the spread of the Blood checked eventually, the sect is not the most evil power in the region. The heroes might find themselves forced to ally with members of the Blood against a more vile, more dangerous enemy—possibly the cult of a demon or an evil god, or maybe the servants of a dragon far worse than Barastiss himself. The characters would have to keep their allies in check, preventing them from unleashing their violence on those who don't deserve it, all the while walking on eggshells to avoid giving so much offense that the clan revokes its shaky alliance.
- The characters might be forced to prove themselves to the Blood, by a show of strength or prowess, or else negotiate with or bribe them, in order to pass through their territory on the way to an unrelated objective, to win back prisoners taken in a raid, or to earn the right to speak with, and gain certain information from, Barastiss or Varhisthist.
- Finally, the characters might take it upon themselves to end the threat of the Blood of Barastiss by proving to the members that the iron dragon is not, in fact, an avatar of their god. Precisely how the characters would accomplish this is up to them, but creative thinking on their part should be rewarded. Even if they succeed, though, will the tribe return to its old borders, or will someone or something else, perhaps with equally violent aims, take Ogthorilak's place?

## The Guardians of the Gates

**Goal:** A diverse group called the Guardians of the Gates seeks out portals to other planes of existence. In truth, its leader Irthossalur wants to control the portals that access Sigil, the City of Doors (see Chapter 6 of *Dungeon Master's Guide 2* or page 25 of *Manual of the Planes*). This steel dragon believes she is the first line of defense for the city, and she wants to uphold the balance of power the Lady of Pain (see page 190 of *Dungeon Master's Guide 2*) has established.

**Stated Goal:** The Guardians are dedicated to watching over the portals that bridge the planes. In Sigil, the nature of the Guardians' work is more widely known. The Guardians allow natives of Sigil to pass through portals freely, since the society has no with to anger the Lady of Pain.

**Size:** Moderate, with most members clustered in small groups at portal sites rather than gathered in one

central location. Even the main headquarters has no more than two dozen members.

**Alignment:** Unaligned.

**Philosophy:** "The world should look after the world, just as the Feywild should care for the Feywild and the Shadowfell should keep to the Shadowfell. When the grasp of evil extends between the planes, all planes are put in danger."

**History:** The Guardians of the Gates formed shortly after the god Vecna managed what no deity had ever done: He entered the City of Doors. Though Vecna was eventually thrown out of Sigil, the steel dragon Virtraxentyr started the Guardians of the Gates to protect the City of Doors. At first, he and his draconic children protected only gates into Sigil, but he quickly realized how economically powerful a mapped network of dimensional portals would be.

The society quietly constructed sites that would disguise the presence of portals, sites that also became lairs for Virtraxentyr's siblings and hatchlings. As the network grew, Virtraxentyr and his kin brought in more and more assistance by reaching out to humans, elves, and dragonborn.

**Leadership:** A protective steel dragon named Irthossalur is the current leader of the Guardians of the Gates. She spends most of her time disguised as a human known as Suzandra. The network of portals created over centuries of work has allowed Irthossalur to amass a great fortune in both material goods and interplanar knowledge. A council of twenty advisors, scattered across the planes, meets once a year to discuss business. Most of these advisors are Watchers, individuals who oversee specific portal sites.

**Headquarters:** Two buildings linked by a planar portal make up the Guardians' headquarters. A small building in Sigil connects to a similar structure in the world, nestled within the quiet village of Hornburg. In Sigil, the Guardians of the Gates use a front organization called the Planar Explorer Society, whose headquarters is within the Clerk's Ward. These two buildings also serve as Irthossalur's lair, since she loves the cosmopolitan nature of Sigil as well as the quiet and reserved inhabitants of Hornburg.

**Membership Requirements:** Characters must prove themselves to a Watcher. When one of the Guardians' permanent sites comes under attack by extraplanar foes, those who fend off the threat might be offered membership.

**Structure:** Around each portal the Guardians find, they set up a permanent enclave to guard and watch it. The Watchers who oversee these locations have a great deal of autonomy.

**Activities:** Most society members are explorers, spies, and scouts who secretly scour the world seeking functioning gates to other planes. Once a gate is discovered, the society establishes an appropriate cover operation to guard the location, such as an inn or a guard tower. Many of these sites also include teleportation circles, but the keys to operating these portals are kept secret. Teleportation circles that might have been compromised are destroyed. Portal seeking is a dangerous lifestyle, and those who undertake the challenge are richly rewarded by the Guardians.

**Enemies:** Any group or entity that plans an invasion between planes has reason to hate the Guardians. Fortunately for the Guardians, none of their enemies has devoted its full resources to dismantling the organization.

**Rivals:** Many powers within Sigil, and a smaller number in the world, oppose the restrictions the Guardians impose. Though natives of Sigil can pass freely, many travelers oppose the Guardians on principle, believing others should have the same right.

## Guardians of the Gates Lore

**History DC 13:** Guardians of the Gates members scour the world for portals to other planes and protect those portals against incursions. Since the presence of a portal could incite panic in a quiet village, the society works in secret.

**History DC 20:** The society is spread throughout the planes, maintaining a vigilant watch over planar traffic. When the Guardians find an active portal, they set up a permanent site to guard it. Each site has an established leader, known as a Watcher. Each Watcher is in charge of a small team that works to ensure that the local communities are not affected by the presence of the portal. Members of any race can belong to the society, but individuals are assigned to locations where they will blend in with the local communities. It is believed their main headquarters is located within Sigil, the City of Doors.

## Adventure Hooks

Once the characters are ready for travel between the planes, they can partner with the Guardians.

- The characters come across a ruined tower invaded by a shadar-kai cult that has slipped into the world from the Shadowfell. If the heroes successfully fight off the invaders, the Guardians become patrons to the characters and provide further chances for adventures. The characters are tasked with tracking down additional portals to Sigil in unexplored lands. As the characters rise in power, they might be awarded an audience with Suzandra and be given more complex missions, such as destroying an archon stronghold that blocks traffic to the City of Brass or liberating a temple on a remote island in the Astral Sea that has been captured by devils.
- A Watcher decides that the characters shouldn't be allowed access to the gate hidden deep within an abandoned mine. This Watcher is a relative of Irthossalur and might fight the characters if they press the issue. If the characters cause the death of

this relative, Irthossalur uses all her power to track down the murderers of her kin.

## The Grand Assemblage of the League of Eternal Discovery

The Assemblage appears as part of the "A Little Knowledge . . ." campaign arc (page 68), but you can use it in any campaign.

**Goal:** The Grand Assemblage is a highly respected—if, as the name suggests, rather flamboyant—guild for adventurers and arcane scholars. The Assemblage doesn't have any secret motives.

**Size:** Small. Though it's large compared to other adventuring guilds, there aren't that many adventurers out there to fill its ranks.

**Alignment:** Unaligned.

**Philosophy:** "There's so much to learn from the lore of the ancients, and we need brave souls to delve into forgotten ruins and retrieve it. We all benefit from their heroic deeds."

**History:** The Assemblage formed as a circle of sages and wizards sharing occult and arcane lore. It grew slowly, until the founders began allowing more and more members after they realized doing so was the best way to obtain more lore. At this stage in the Assemblage's history, the orium dragon Yuniosu and her siblings approached the organization, becoming its greatest patrons. With their funding and guidance, the organization was able to spread and grow into the respected establishment of today.

**Leadership:** The official leader of the Assemblage is an elected guildmaster who holds the post for 10 years. The current guildmaster is Leore Esennarian.

The organization's true leaders, however, are members of an orium dragon family—the offspring and siblings of the ancient Konoktolta—who serve as the organization's primary patrons. The dragon Yuniosu is the primary contact with the organization. Like other orium dragons, members of Konoktolta's family gather knowledge and lore, and it is this purpose to which they put the members of the Assemblage.

**Headquarters:** The Assemblage's primary headquarters is its sprawling, multistructure campus in the city of Pravarum. It serves as a university to a few rich students. The Assemblage also maintains a few chapterhouses in villages and hamlets on the outskirts of civilization.

**Membership Requirements:** The Assemblage occasionally approaches adventurers who have solid reputations and invites them to join. Most members, however, petition to join (a process requiring them to supply a sufficient record of past accomplishments and discoveries).

**Structure:** The guildmaster decides policy, and each chapterhouse has an overseer. All other members are essentially equal. Yuniosu exerts her influence over whomever she sees fit, putting the right ideas in the right minds to get her way.

**Activities:** Members share information and rumors, offer advice and suggestions for the successful completion of adventures, and sometimes aid one another in their explorations (for a share of the profit, of course). The Assemblage makes membership as attractive to adventurers as possible. It provides access to libraries of lore, disseminates rumors and tales that might lead to rich dungeons, and introduces adventurers to allies who might prove useful on a given endeavor. At rare times, the Assemblage sells rituals and magic items to its members.

### Grand Assemblage Lore

**History or Streetwise DC 7:** The Grand Assemblage of the League of Eternal Discovery is one of the most widespread adventurers' guilds. It's said that members have access to a library of lore, rumors of great treasures and challenges, and the advice of their peers. Accomplished adventurers can join for a minimal fee and the promise to turn over any ancient lore or lost knowledge they come across.

**History or Streetwise DC 12:** The Assemblage began as a small gathering of arcanists and sages who thought it more productive to share their knowledge. Slowly, as more and more individuals joined, the Assemblage expanded its membership to adventurers and explorers of all sorts, realizing that such individuals were most likely to make impressive discoveries.

**History or Streetwise DC 17:** Several wealthy patrons help bankroll the Assemblage in exchange for access to the information the group acquires. To the best of anyone's knowledge—and quite a few people have looked into it—there's nothing particularly sinister behind this, just genuine curiosity and fascination with lost lore.

### Adventure Hooks

The Assemblage can introduce a wide variety of plot hooks to the characters—particularly if they become members. Want to feed them a rumor about a lost tomb, a rampaging dragon, an ancient artifact, or a forgotten shrine? Want to put them in touch with a particular employer? The halls of the Assemblage are the perfect place for doing so. The guildmaster might hire the characters to escort a scholar to a dangerous ruin so that the scholar can make a record of the mysterious hieroglyphics decorating the crumbling palace, entrust the characters with the task of recovering a treasure stolen from the organization's vaults decades ago by a rapacious lich, or even dispatch them on a planar journey to ask a question of a sphinx-guarded oracle. That said, the Assemblage doesn't have to be just a middleman; it can itself be the source of plots.

- Several members of the Assemblage vanished while pursing related goals. As the characters investigate, they discover that Handrakka, a moderately powerful dragonborn within the Assemblage, is behind the conspiracy. He was turned mad during an adventure into a deep mine. The solution to curing him—and thereby discovering where he has imprisoned the missing adventurers—requires delving back into the mine and facing the aberrant creatures dwelling there.
- Once within the ranks of the Assemblage, the characters find the political situation more complicated than they expected. They receive poor (or especially dangerous) assignments from the current guildmaster, Leore. Her term will be up soon, but her lackey Martoli is the frontrunner to replace her. Can the heroes find a suitable candidate who will give them more respect? If they find out about the orium dragons behind the Assemblage, they might be able to pull support from them.
- Other adventurers in the Assemblage might compete with the characters to acquire a specific treasure, or engage in political maneuvering to get one of their own elected as the next guildmaster.
- If the characters aren't members, the Assemblage can become an enemy—well, at least a rival—as its members constantly seek to beat the characters to their prizes and to outdo them in the public eye.

## The Solemn Order of the Knights of Saint Vercesien the Gold

**Goal:** Founded in memory of the gold dragon Vercesien, paladin and champion of Bahamut, the Solemn Order of the Knights of Saint Vercesien the Gold—or just the Knights of Vercesien—stands fast against the evils of the world. Its members struggle not merely to lighten the darkness between civilization's points of light but to expand those points, working for the day when the humanoid (and draconic) races can once again claim a wide empire where the people live safely, peacefully, and under the rule of law. The people of Four Winds and the other cities and roads the knights patrol swear that they've made a difference. In truth, the Knights of Vercesien are effective only on a local level. Their numbers are too small and their methods—patrolling roads and borders, hunting monsters and highwaymen—too narrow to have more than a localized effect.

**Size:** Small. The order is effective only in the areas around a few cities.

**Alignment:** Lawful good.

**Philosophy:** "We will remake the world as it was in the bright age of the past, when the light of just law illuminated all. The cities of peace will grow to become beacons that drive the darkness far away."

**History:** Vercesien lived several hundred years before the rise of the Empire of Nerath. Though not fond of humanoids on a personal level, the gold dragon took to heart the teachings of Bahamut and championed the cause of justice for all creatures. When he fell fighting in Bahamut's name, defending the city of Four Winds, followers of Bahamut revered his memory. It was only a few years later when several of Bahamut's knights, wanting to fight evil as freely as Vercesien had, formed the Solemn Order. The order spread from Four Winds to several major cities.

**Leadership:** The Aureate Shield—a council of three humanoids and a gold dragon—leads the order. By tradition, at least one of those humanoids must be a holy person devoted to Bahamut. Technically, the dragon leads the Aureate Shield, but a unanimous vote by the humanoids can overrule him. Currently, the members include Aureate Lord Emphanetrix, an adult gold dragon; Shield Lord Kelgas Evraine, a human warrior devoted to Bahamut; Shield Lady Renna Hyst, a half-elf arcanist and swordmaster; and Shield Lord Mahess, a dragonborn priest of Pelor.

**Headquarters:** An enormous, stone-walled fortress in the trade city of Four Winds houses the Knights' largest chapterhouse and the meeting hall of the Aureate Shield.

**Membership Requirements:** Knights frequently visit military and religious establishments, attempting to convince experienced "soldiers for good" to join. A sizable minority of enlisters simply approached a chapterhouse and petitioned to test for membership. Such tests measure both prowess and moral standing. Even gold dragons, with which the order maintains a reverent relationship, must be judged. By ancient tradition, only the Aureate Lord and other dragons (if any are members at the time) can judge them.

**Structure:** Beyond the Aureate Shield, rank is determined primarily by seniority, though the Aureate Shield or a chapterhouse's knight-prelate can grant advancement for exceptional service. Members are expected to obey higher-ranking knights without question, unless given an immoral order.

**Activities:** The Knights of Vercesien is an open organization. Though a few of its internal procedures and ceremonies remain secret, its existence and its goals are not. Vercesien chapterhouses accept visitors and hopeful applicants at all times.

### Knights of Vercesien Lore

**History or Religion DC 15:** Members of the Knights of Vercesien, an order made up primarily of fighters and paladins, fight against the monsters of the wilderness and expand the rule of civilization. Though its numbers aren't large enough to make a huge difference, the organization has rendered certain cities and highways relatively safe. The Knights

WILLIAM O'CONNOR

are associated peripherally with the worship of Bahamut, but there's no formal affiliation.

**History or Religion DC 20:** Saint Vercesien was a gold dragon devotee of Bahamut who fell in battle defending a human city from chromatic dragons. To this day, the gold dragon is the symbol of the order, and it's said that gold dragons participate in governing the organization.

The order is known for its use of drakkensteed mounts (see page 196) by its most skilled warriors.

**History or Religion DC 25:** Although most of the organization's members mean well, at times in the history of the group the self-interest of its leaders—or their unyielding interpretation of what "the rule of law" means—has resulted in the knighthood briefly becoming a tool of tyranny. Today, the knights look back on those days with shame and guard against the same thing happening again.

## Adventure Hooks

The most effective use of the Knights of Vercesien in a campaign is to make the characters members, or at least allies, of the order. After all, what is it if not a group devoted to the same principles as many adventuring parties? The order can provide information and point the characters toward objectives they might not otherwise encounter. For example:

- The minions of Tiamat are natural enemies of the Knights; as members, the characters might be assigned to quash a cult of Tiamat causing trouble in a distant city, to recover a holy relic stolen by a cultist, or destroy an evil artifact that granted the cult the ability to command chromatic dragons to do their bidding.
- By interacting with the knights, the characters eventually meet with the Solemn Order's gold dragon leaders. A mission requires the heroes to travel to the frozen north. An ancient cobalt dragon lives there, and it holds a grudge against Aureate Lord Emphanetrix. The characters will need to speak to the dragon for its assistance, and navigate the twisting paths of draconic politics.
- The Knights of Vercesien can serve as foils or rivals for the characters instead of allies. They might both go after the same goal—a powerful artifact, perhaps—but for different reasons. A particularly stern leadership might have the knights seeking justice in the case of a "criminal" whose actions the characters thought were justified. Or a local knight-prelate's pride might be stung if the characters defeat an evil that his Knights could not, and he might then decide to move against them politically.

Dragons have created countless artifacts though the ages. Artifacts link directly to the dragons' essences or, in a few cases, to the power of dragon deities. Two of the more potent artifacts of dragonkind are described below.

## Blood of Io

The *Blood of Io* is appropriate for characters of the epic tier.

**Blood of Io** Epic Level

*This dragon-shaped crystal vessel contains droplets of blood spilled when a primordial's axe divided Io into the twin deities Bahamut and Tiamat. The user of this ichor taps into Io's ancient strength.*

**Wondrous Item**

**Property:** Gain resist 5 acid, resist 5 cold, resist 5 fire, resist 5 lightning, and resist 5 poison.

**Property:** Your attacks deal 2d8 extra damage against targets of the elemental origin.

**Property:** You can speak and understand Draconic and can read Iokharic.

**Power (Encounter ✦ Acid, Cold, Fire, Lightning, or Poison):** Minor Action. You sip from the *Blood of Io*. Until the end of the encounter, you gain an at-will attack power that requires a standard action to use: close blast 5; +30 vs. Reflex; 4d6 + Constitution modifier damage of a type you choose from among acid, cold, fire, lightning, and poison.

**Power (Encounter ✦ Healing):** Minor Action. You sip from the *Blood of Io* and spend a healing surge. Instead of the hit points you would normally regain, you regain 50 hit points, and you gain resist 10 to all damage until the start of your next turn.

### Goals of the Blood of Io

- ✦ Serve and protect chromatic and metallic dragons.
- ✦ Destroy draconic abominations such as draconians, dragonspawn, and dragons touched by the Far Realm.
- ✦ Oppose elemental creatures and their designs.
- ✦ Restore Io to proper form by merging his sundered halves—Bahamut and Tiamat—into one being.

### Roleplaying the Blood of Io

This small quantity of blood came from Io, the progenitor of dragons, and residual traces of the arrogant deity's will and intelligence still smolder within. Only the *Blood*'s owner can hear its whispers, at the rare times when it communicates verbally. The artifact prefers to convey its wishes through dreams. The *Blood* tries to fill its owner with the same burning hatred it feels against the primordials and elementals by showing flashes of past events: glimpses of the horrific first war between the deities and the primordials, of Io's sundering, and of the birth of Bahamut and Tiamat from Io's divided body. It intersperses subliminal hints into these dreams, presenting visions of the course it wants its owner to take and the goals it wants to achieve. The *Blood* tests its possessor, urging the character to resume the war against primordials, to destroy elemental creatures, and to search for a way to knit together Io's halves.

**CONCORDANCE**

| Starting score | 5 |
|---|---|
| Owner gains a level | +1d10 |
| Owner is a dragonborn | +2 |
| Owner performs a service for a chromatic or metallic dragon | +1 |
| Owner kills an elemental (maximum 1/day) | +1 |
| Owner attacks a dragon (maximum 1/encounter) | -1 |
| Owner uses one of the artifact's powers | -1 |

### Pleased (16–20)

*"Drinking the ichor reveals my true path and nourishes me. Nothing in the world can stand against me."*

The *Blood* sees its owner as the catalyst of its rebirth and lends greater power to the character in hopes of restoring Io's ascendancy.

**Property:** Gain resist 10 acid, resist 10 cold, resist 10 fire, resist 10 lightning, and resist 10 poison.

**Property:** Gain a +5 bonus to Diplomacy checks and Insight checks against dragons.

**Power (At-Will):** Move Action. Fly a number of squares equal to your speed + 2. You must land at the end of the movement.

**Power (Daily):** Immediate Interrupt. Use this power when an enemy scores a critical hit against you or against an ally you can see. The hit is a normal hit instead.

**Power (Daily ✦ Healing, Polymorph):** No Action. Use this power when an attack reduces you to 0 hit points. You split into two identical creatures. Place a token for your duplicate in a space adjacent to you. You regain hit points equal to your bloodied value. The duplicate has hit points equal to your bloodied value.

Your duplicate acts immediately after you in the initiative order. It has the same senses, defenses, and other characteristics (such as speed and resistances) that you do.

You and your duplicate share your powers; for example, if one of you uses an encounter power, the other cannot use that power during that encounter.

Whenever one of you starts a turn in a space adjacent to the other, the one whose turn it is grants combat advantage to all attackers until the start of its next turn. If one of you is reduced to 0 hit points, that one fades away. Otherwise, the two of you merge at the end of a short or an extended rest.

FRANZ VOHWINKEL

### Satisfied (12–15)

*"I have proven my worth to the Blood and so have proven my worth to all dragons."*

The wielder erases the *Blood*'s doubts, so the *Blood* sees the wielder as a possible agent of its rebirth and thus grants a measure of greater power.

**Property:** Gain a +2 bonus to Diplomacy checks and Insight checks against dragons.

**Power (Daily ✦ Fear):** Standard Action. You roar with terrifying wrath: Close burst 1; Charisma vs. Will; the target is dazed (save ends). *Aftereffect:* The target takes a -2 penalty to attack rolls until the end of the encounter.

### Normal (5–11)

*"I have yet to prove myself to the Blood. I must strive to live up to its expectations."*

The artifact finds fault with its owner. It encourages the character to discard it so it can find a worthier champion.

### Unsatisfied (1–4)

*"Little fluid remains in the vessel. I fear I have exhausted the Blood's patience."*

Fighting dragons or excessively drinking the *Blood* erodes the artifact's goodwill. The owner must make amends soon, or the *Blood* will leave.

**Property:** Gain vulnerable 5 to all damage.
**Property:** Take a -5 penalty to Diplomacy checks and Insight checks against dragons.
**Special:** The *Blood* places you in harm's way. While marked by any creature, you grant combat advantage to all attackers.

### Angered (0 or Lower)

*"The phial is empty of even the Blood's scorn."*

The *Blood* abandons all hope that its wielder will help it attain its goals. It withdraws its gifts and actively seeks to eliminate the character in favor of one better suited to its purpose.

**Property:** Gain vulnerable 10 to all damage.
**Property:** Take a -5 penalty to Bluff, Diplomacy, Insight, and Intimidate checks against dragons.
**Property:** Take a -5 penalty to death saving throws and to saving throws against effects from enemies that have the elemental origin.
**Property:** You can no longer use powers granted by the *Blood of Io*. (Its properties are still in effect.)

### Moving On

*"The Blood boils in the phial, signaling its imminent departure. I can take heart in having furthered its goals."*

The *Blood of Io* has achieved all it can accomplish in mortal hands and is ready to complete its holy mission. It asks its bearer to deliver it to any ancient dragon that will carry the *Blood* to Bahamut or Tiamat when the dragon passes from the world.

If the owner finds an ancient dragon and the dragon accepts the *Blood of Io*, the owner gains a permanent +2 bonus to Bluff, Diplomacy, Insight, and Intimidate checks against dragons and permanently gains resist 10 acid, resist 10 cold, resist 10 fire, resist 10 lightning, and resist 10 poison.

If the owner gains a level before beginning a quest to find an ancient dragon or gains a second level without completing the quest, the artifact leaves the owner with a curse: In each encounter, the first time the character is hit by an attack that has a damage type, the character gains vulnerable 15 to that damage type until the end of the encounter. Remove Affliction can lift this curse if performed by an epic-tier ritual caster who worships Bahamut or Tiamat.

Until it moves on, the *Blood* retains all powers and properties appropriate for its concordance (or as if it is pleased, if its score is 21 or higher).

# Seal of the Lawbringer

The *Seal of the Lawbringer* is appropriate for characters of 16th level or higher.

**Seal of the Lawbringer** Paragon Level

*This round, platinum medallion features the holy symbol of Bahamut surrounded by seven stylized golden canaries. A fine platinum chain allows its owner to wear it as a pendant.*

The *Seal of the Lawbringer* is a +5 *symbol of hope*. It has the following properties and powers.

**Implement (Holy Symbol)**

**Enhancement:** Attack rolls and damage rolls

**Critical:** +5d6 damage

**Property:** You can speak and understand Draconic and can read Iokharic.

**Power (Encounter ✦ Cold):** Minor Action. You attack with the *breath of Bahamut*: close blast 3; Constitution + 5 vs. Reflex; 2d6 + Constitution modifier cold damage, and the target is immobilized until the end of your next turn.

**Power (Daily):** Immediate Reaction. Use this power when an effect that a save can end targets you or an ally within 5 squares of you. The target gains a +5 bonus to saving throws against that effect.

## Goals of the Seal of the Lawbringer

- ✦ Fight Tiamat and her servants.
- ✦ Protect the weak from evil.
- ✦ Defend civilization from chaos.

## Roleplaying the Seal of the Lawbringer

The *Seal of the Lawbringer* speaks in a calm, authoritative voice that only its bearer can hear. The owner's devotion to Bahamut's tenets increases the artifact's power. The *Seal* encourages its owner to pray to Bahamut often, especially after victory in battle. The *Seal*'s ultimate gift is the ability for the character to transform temporarily into a platinum dragon; however, the transformation drains the *Seal*'s power. The *Seal* seeks out not only owners who are already followers of Bahamut, but also heroes who have capably slain chromatic dragons and might be receptive to the power the *Seal* offers.

### CONCORDANCE

| Starting score | 5 |
|---|---|
| Owner gains a level | +1d10 |
| Owner is a follower of Bahamut | +2 |
| Owner kills a servant of Tiamat (maximum 1/encounter) | +1 |
| Owner furthers a cause of Bahamut | +1 |
| Owner, while above 0 hit points, allows an ally in combat to be reduced to 0 hit points | -1 |
| Owner furthers a cause of Tiamat | -2 |
| Owner uses the *Seal*'s power to transform into a dragon | -5 |

### Pleased (16–20)

*"I am one with the Lawbringer; his will is my will. I must protect the world from evil."*

The bearer and the *Seal of the Lawbringer* are in tune with each other. Bahamut's power infuses the bearer.

**Property:** Gain resist 10 cold and resist 10 fire.

**Property:** On a missed attack from *breath of Bahamut*, the target takes half damage and is not immobilized.

**Power (Daily ✦ Implement, Polymorph):** Minor Action. Push each creature adjacent to you 1 square, and then transform into a Huge platinum dragon until the end of the encounter or until you end the transformation as a minor action. While you are in this form:

- ✦ Gain a fly speed equal to your speed + 2.
- ✦ Your hands are claws with a reach of 3 squares, granting you a +2 proficiency bonus to attack rolls while unarmed and making your unarmed attacks deal 1d10 damage.
- ✦ You cannot use an implement or a weapon other than the *Seal of the Lawbringer*.
- ✦ The *Seal*'s enhancement bonus applies to all powers and unarmed attacks you use.
- ✦ Gain *dragon claw strike* and *platinum presence* (see below).

WAYNE ENGLAND

**Dragon Claw Strike** Seal of the Lawbringer Attack

*You lash out with platinum claws.*

**At-Will ✦ Implement**
**Standard Action** **Melee** 3
**Effect:** Make two melee basic attacks, each of which deals 1d10 + Strength modifier damage.
*Level 21:* 2d10 + Strength modifier damage.

**Platinum Presence** Seal of the Lawbringer Attack

*Your imposing stature fills foes with dread.*

**Daily ✦ Implement**
**Standard Action** **Close** burst 5
**Target:** Each enemy in burst
**Attack:** Charisma vs. Will
**Hit:** The target is stunned (save ends). *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

### Satisfied (12–15)

*"The dawn of a new day nears."*

The *Seal of the Lawbringer* recognizes its wielder's strength and trusts the wielder with a portion of Bahamut's might.

**Property:** *Breath of Bahamut* is a close burst 5 attack.
**Power (Daily):** Minor Action. Spend a healing surge to encase your skin in platinum scales. Gain resist 5 to all damage until the end of the encounter.

### Normal (5–11)

*"I walk the path to freedom and strength, but the journey is long."*

The *Seal* patiently and watchfully guides the wielder on the best course of action.

### Unsatisfied (1–4)

*"I lack discipline and self-control. The Platinum One thinks I am a coward."*

The *Seal* communicates with its bearer only through dreams. In them, Bahamut takes the form of an authority figure in the character's life, such as a parent or tutor, and scolds the bearer. At the end of such dreams, Bahamut takes his true form.

**Property:** Take a -2 penalty to all defenses.
**Special:** Once per day during combat, the *Seal* can make you attack a target within 5 squares of you. Roll a d20 + your level vs. Will; if the attack hits, you mark the target until the end of your next turn, slide 5 squares to a space adjacent to the target, and are dazed (save ends).

### Angered (0 or Lower)

*"The voice that once filled my soul is silent with contempt."*

The *Seal of the Lawbringer* communicates with its bearer only in dreams and only symbolically. The bearer dreams of ignoring an innocent's plight and then trying to reach Bahamut to no avail—drowning in an ocean or being lost as a child. At the end of such a dream, an image of Bahamut takes the place of the dreamer but still does not become aware of the dreamer's troubles; the bearer suffers the same abandonment the innocent suffered.

**Property:** At the start of each encounter, you lose a healing surge.
**Property:** Take a -5 penalty to all defenses.

### Moving On

*"I am ready for the Lawbringer's final trial."*

When the *Seal of the Lawbringer* prepares to move on, it assigns a final task to its bearer. It might ask the bearer to restore a lost temple of Bahamut, to protect endangered innocents from a force of immense power, or to stop machinations of Tiamat's followers. Each morning after the *Seal* assigns the task, one of the golden canaries on the *Seal* morphs into a ghostly gold dragon, flies into the sky, and vanishes.

If the bearer finishes the task before the last canary leaves, the bearer gains 1 point of concordance for each remaining canary. If the bearer does not finish the task, the bearer loses 3 points of concordance. If, during the final encounter of the task, the bearer uses the *Seal*-granted power to turn into a dragon, the level of concordance does not change because the *Seal* moves on at the end of the encounter.

When the *Seal* moves on, if it has a normal or higher level of concordance, the final canary becomes a gold dragon that thanks the bearer for devotion to Bahamut before flying off. A +4 *symbol of hope* marked with the holy symbol of Bahamut remains in the bearer's possession. The bearer gains a permanent +2 bonus to Charisma-based checks and a permanent +3 bonus to his or her healing surge value.

If the *Seal* is unsatisfied or angered when it moves on, the final canary transforms into an elder gold dragon (see *Monster Manual 2*, page 82), and the *Seal* shatters and crumbles into worthless dust. The dragon attacks the bearer, calling the bearer "the Betrayer" and focusing its attacks on that character even if other characters attack it. When the character is reduced to 0 hit points, the dragon flies off, ending the encounter. The character takes a permanent -2 penalty to Charisma-based checks and a permanent -3 penalty to his or her healing surge value.

The *Seal of the Lawbringer* returns to the world only when a need for it develops.

CHAPTER 3

# Dragon Lairs

The dragon's lair is the most iconic adventure locale in the Dungeons & Dragons game. It challenges the characters with one of the toughest monsters in the game and provides one of the richest rewards—the dragon's hoard. Consequently, any dragon lair should be a spectacular and awe-inspiring encounter setting. This is especially true for metallic dragons, which have more refined tastes than their chromatic counterparts and seek out lairs that reflect their appreciation for aesthetics and the trappings of power. A younger and more brutish metallic dragon might settle for a dank cave, but any mature dragon that has even the most meager appreciation of beauty hungers for opulence and splendor in its lair.

Metallic and chromatic dragons often use the same settings for their lairs, with natural caverns and complexes proving the most common. Metallic dragons are more likely than chromatics to make their lairs near, or within, the communities of other creatures, or to dwell in specially constructed structures. (The latter are often built by humanoids employed, ruled, or enslaved by the dragon in question.) Because metallic dragons tend to be more social than chromatics—with other creatures, not just other dragons—they're more likely to choose lairs that other creatures can reach and enter on foot.

In this chapter, you'll find:

- **Designing a Dragon Lair:** A brief look at some of the characteristics of metallic dragon lairs.
- **Heroic Tier Lairs:** Encounters for characters of 1st–10th level.
  - Goblin Folly (iron, 3rd level)
  - The Terror of Prospect Hill (copper, 5th level)
  - Tulkau Shayn (orium, 7th level)
- **Paragon Tier Lairs:** Encounters for characters of 11th–20th level.
  - Mines of Bolmarzh (adamantine, 13th level)
  - The Breaking Tide (bronze, 13th level)
  - Methenaera the Mead-Keeper (silver, 18th level)
- **Epic Tier Lairs:** Encounters for characters of 21st level or higher.
  - The Edge of Chaos (mithral, 23rd level)
  - Citadel of the Golden Architect (gold, 24th level)
  - The Earthen Dagger (mercury, 26th level)

CHIPPY

# DESIGNING A DRAGON LAIR

In many respects, a dragon's lair is as vital to a dragon-based encounter or adventure as the dragon itself. Whether it's a simple cave in a rocky mountain range, a great castle as ornate as any constructed by elves or dwarves, or a palace literally built of clouds and flames, a dragon's lair says everything about its master's persona, power, and goals.

At its simplest, a dragon's lair must serve as a repository for the beast's hoard and a relatively safe sanctum in which the dragon can relax without constantly worrying about intruders and thieves. Most such lairs, however, are far more. When you design a dragon's lair, try to consider the dragon's personality and goals as thoroughly as you would when building an adventure around the wyrm's activities. Is it almost impossible to access without the ability to fly? Is it riddled with traps or interwoven with twisting tunnels? Is it occupied by intelligent creatures that serve the dragon out of awe or fear or greed? Is it distant from communities of humanoids, or does it lie near them, so that the dragon can watch over these "lesser creatures"? Make each lair as unique and memorable as each dragon.

Metallic dragons often concern themselves with the comfort and convenience of their lairs more than with defensibility, but dragons as a rule are highly intelligent and suspicious creatures. Building formidable obstacles and carefully laid defenses for their lairs is one of the few menial tasks that dragons can apply themselves to without growing bored or impatient.

## Purpose

Although chromatic dragons choose lairs that offer the best defensive advantages, metallics care about how convenient a location is in relation to the dragon's purpose. The first step in designing a lair is to ask why a dragon chooses to live in that spot. Some possible answers are discussed below.

**Guarding a Site:** The dragon is the appointed guardian of an important site: the vault of a wizards' guild, a sacred shrine, the sealed prison of a mighty demon, or a magic fountain. Whether the dragon was appointed to its duty or seized the locale for its own benefit, it must remain close to the place it intends to guard. Many such sites are inside the dragon's lair (or, to be more precise, the dragon establishes its lair around the site it guards). These lairs have fewer traits of draconic style because the dragon has to work around a site that was likely created by someone else.

**Protecting Something:** The dragon guards some item or secret instead of a site. The item it protects is portable, so the dragon can choose to live anywhere it likes, as long as it keeps the item safe. Sometimes the item is the dragon's hoard. Most lairs chosen for this purpose are exceedingly well hidden—for example, a natural cavern with a concealed entrance in a remote place or a lair disguised in the middle of some other site, such as a necropolis or ruined stronghold.

**Ruling Others:** The dragon has established itself as the lord or master of lesser creatures nearby—a human tribe or city, a goblin stronghold, a dragonborn village, or some settlement of humanoids. Some dragons are "talons-off" rulers that live in secluded, remote locations far from those they govern, relying on intermediaries to look after the day-to-day details of their realms. However, most dragons that rule over a domain enjoy basking in the fear, love, adulation, or tribute of their subjects; therefore, they choose to live somewhere highly conspicuous near their subjects.

With the resources of a community at its command, a dragon ruler can have a lair constructed or modified to its exacting standards. For example, a

### EXTENDED ABSENCES

A metallic dragon might have a reason for leaving its lair for a extended time. A shapechanging gold dragon might spend years immersed in the court of a kingdom that interests it, while a silver dragon sworn to some great quest could scour the world for decades searching for someone or something. Other dragons might be lured away from their homes to ally with great heroes or spy out the secrets of hated rivals. A dragon contemplating an extended absence takes every precaution to make sure its home and hoard remains safe.

**Concealment:** Remote, natural lairs might be concealed by carefully contrived cave-ins, landslides, floods, or drifting snow or sand.

**Guardians:** Dragons that have access to the proper rituals or resources might use other monsters to safeguard their homes while they are away. Dragons that can't obtain suitable guardians might entrust the protection of their lairs to loyal minions or subjects, or ally with local powers willing to protect their lairs.

**Warding Rituals:** Likewise, dragons use ritual magic to bar entrance to their lairs or create alarms. The most powerful rituals let dragons teleport back to their lairs from wherever they might be wandering.

**Removed Valuables:** A dragon that expects to be gone for a long time might relocate its hoard to a new hiding place. This might be a place the dragon would want to live—for example, a cobalt dragon might burrow a tunnel into a glacier, stash its hoard inside, and then flood and freeze the passage to ensure that no other creature will approach its treasure while it's away.

ruling dragon might live in a spire at the city's center, a golden palace on a hill overlooking the town, a temple dedicated to its glory, or a magnificent cavern decorated by the work of generations of stonemasons.

**Spying on Others:** Many metallic dragons, especially copper and steel dragons, find humans and similar races fascinating. Some establish lairs in places where they can keep a close watch on people, especially if the dragons also have the ability to shapechange and mingle with crowds. A lair intended for spying might be built in a reconditioned sewer chamber, a deserted or ruined portion of a city, an abandoned fortification, or a noble estate (where a mysterious "lord" carefully guards the dragon's secret identity from all but a handful of loyal retainers). In the wilderness, a dragon might use a rarely visited area such as a sacred grove, a holy mountain, or a "taboo" valley as a lair, counting on tribal fears or laws to protect it from discovery.

**Creating Comfort:** Metallic dragons that have no other purpose to affect their choice of lair choose the most comfortable lairs they can find. A place offering a combination of natural beauty, a striking view, and restricted access is always serviceable. Dragons vary in their tastes, but any dragon is happy with a lair that is comfortable, defensible, and filled with items that it finds beautiful and interesting.

## Attendants

Some metallic dragons value solitude, but many find room in their lairs for attending creatures that are anxious to please their draconic masters.

**Sentries:** Weak combatants aren't necessarily useless to a dragon. Even if they can't stand against enemies strong enough to challenge the dragon, they can sound alarms, seal gates, operate traps, and provide crucial time for organizing a lair's defenses.

**Bodyguards:** Creatures strong enough to stand beside their master in battle are obviously valuable. Dragons are careful not to use guards that are too powerful, since they don't want to become servants in their own homes. Bodyguards might include griffons or gargoyles, giants, elementals, or humanoids.

**Counselors and Companions:** Dragons are long-lived, highly intelligent, curious beings. The more sociable ones surround themselves with people whose company they enjoy, ranging from jesters or musicians hired for a few days' entertainment, to artists or scholars whose work is worth patronizing, to lifelong friends. Most attendants of this sort have no business in a battle, and they flee from attack.

**Servants:** A dragon might indulge itself with a staff of bodyservants—valets, cooks, maids, and other such trappings of wealth and luxury. Dragons that live near cities are more likely to maintain servants than those that live in remote wildernesses. Servants, though usually loyal and industrious, take no part in combat if they can avoid it.

## Unusual Lairs

Dungeons, caves, or strongholds are all commonplace lairs for metallic dragons, but the most powerful and intelligent dragons are sometimes unwilling to settle for some dark, dank hole in the ground.

**Draconic Palace:** A draconic palace is a large, strong building constructed specifically to the directions of a powerful dragon monarch. Like the grand castle of a human king or queen, it combines practical defenses, awe-inspiring audience chambers, and decadent luxuries. A draconic palace normally stands atop a high hill, on a harbor or river island, or behind high walls in a wide field. Such a place uually has at least one side of the palace facing terrain the dragon can fly over, but that enemies on foot can't easily negotiate.

A draconic palace usually includes a spire or a high keep accessible only through flight, providing the dragon and its immediate family with an opulent retreat where they can sleep in safety. Portions of the draconic palace meant for both dragon and human access include wide hallways, spacious staircases, and huge, airy chambers that provide plenty of room to move for large, flying creatures. Some draconic palaces might also include humans-only portions (usually servants' quarters or barracks) with halls and doors scaled to human size. However, these are something of a defensive liability, and no dragon wants to leave places in its home where enemies might be able to lurk or move about outside its reach or knowledge.

**Cloud Castles:** Long, tedious, and extraordinarily expensive rituals can create a completely aerial home. A cloud castle is the gold standard of draconic homes. Some are free-floating, carried along wherever the wind takes them. Others are tethered so they roam only over a small area or remain motionless over a particular spot. Many dragons that dwell in such places still desire to have humanoid attendants, guards, and courtiers, so cloud castles routinely touch down at high hilltops or mountainsides where nonflyers can embark or disembark. A cloud castle might feature a well-guarded teleportation circle, stables for flying mounts, or a magic bridge that can bring visitors up from the ground at the master's will.

**Demiplanes:** Dragons of exceptional magical power might be able to create pocket dimensions to call their own. Few are much larger than several miles across, but their contents could include strange islets floating in mist; vast labyrinths or mazes; or cavern-worlds filled with lakes, forests, or anything else the creator desires. A demiplane lair is normally connected to the rest of the cosmos by some sort of magic gate. Intruders seeking access must first find where the door lies. Most of these are well hidden, accessed only through one specific, well-guarded locale in the world.

# GOBLIN FOLLY

**Iron dragon lair for five 3rd-level adventurers**

Beneath the forest canopy of a secluded valley, a goblin band learns a fatal lesson when it foolishly "captures" an iron dragon. The game grows tiresome for the beast, which is confined in the goblins' lair. It's just a matter of time before its amusement turns into anger.

## Background

**History DC 7:** The goblins covet a forested vale, and they have long fought with the other inhabitants for mastery over these lands. Failure after failure diminished their numbers, driving them to desperate measures. A goblin hexer, a favored advisor within the tribe, proposed acquiring additional muscle to drive off the competition. In a rare moment of bravado, he suggested they capture a dragon and compel it into service. They set out to ensnare a young dragon, since the adults are too hard to handle.

**History DC 12:** The plan worked surprisingly well, and after a few days of searching, the goblins netted a young iron dragon named Thraesk. With their superior numbers, they marched the beast to their lair, but they didn't quite know what to do next. Now that the dragon is in their home, the goblins have begun to realize their mistake.

## Environment

This "lair" includes both wilderness terrain and subterranean chambers.

The goblins live in a small cave complex beneath hills that extend north from a heavily forested valley. The hills feature more trees, moss-covered rocks jutting from the rocky soil, and occasional piles of bone and debris. Inside the cave complex, which is accessed through a tunnel at the base of the hills, the muddy floors are dotted with rank puddles. The goblins excavated the place, and their lack of crafting ability shows. Orange, hairlike roots thread through the walls and hang from the ceiling. Scattered about are stones, small shelves filled with human skulls, crude altars, and offerings to dark forces.

**Illumination:** Outside the cave complex, lighting depends on the time of day and the tree cover. Inside the warren, crude lanterns burn animal fat to fill the rooms with bright light.

### THRAESK, THE IRON WIND

Young Thraesk is a curious iron dragon, inquisitive almost to a fault. Having escaped his mother's clutch only a century ago, Thraesk is intrigued by humanoids, and this fascination tends to get him into difficulty.

Thraesk was amused by the goblins' fumbling—yet daring—efforts, and he went along with them without any trouble. But being stuck in a dank and smelly cave was not how he intended to spend his time. Bored with the goblins' posturing, arguing, and occasional threats, the dragon is ready to leave. He might have left peacefully, but one of the goblins struck him—an unforgivable offense.

**As the characters draw near the lair, read:**
*Along the sides of the road, you see trees marked with crude warnings to trespassers. Animal carcasses litter the ground.*

If the characters have been tracking the dragon and his goblin captors, you might consider running a complexity 1 or 2 skill challenge. Use Endurance, Nature, and Perception as primary skills, with moderate DCs. If the characters fail the challenge, they might run afoul of a wandering monster, be delayed by a natural hazard, or become temporarily turned around and arrive at the goblin warren later, only to find a rampaging dragon that has an axe to grind against all humanoids.

### Area 1: Old Wood

Underbrush grows between and around the trees blanketing the valley, making the going slow. The goblins have attempted to warn off intruders with skulls nailed to trees, rotting viscera hanging from low-hanging branches, and graffiti painted on rocks and trunks.

**Tactical Encounter:** "Escaping Goblins," page 88.

### Area 2: Entry Gate

The sentries at the entry gate are under strict orders to protect the chambers beyond and to make sure no one interferes. The goblins keep several wolves here for added security.

**Tactical Encounter:** "Uneasy Sentries," page 89.

### Area 3: Central Chamber

Chambers and tunnels make up the rest of the warren.

The main area, between the sleeping quarters to the east and the room to the west that has been cleared to hold the dragon, is a general storage room where the goblins keep food, water, and the junk they've stolen from caravans and other travelers. At the end of a short tunnel leading away to the southwest is a refuse pit that holds nothing of interest.

### Area 4: Sleeping Chamber

A steep staircase descends 20 feet to the east and opens up into the goblins' cooking area and sleeping quarters, a room choked with lice-ridden blankets and bedrolls.

### Area 5: Chieftain's Chamber

To the west, the central chamber widens as it forms the chieftain's hall. This room holds the dragon and many frightened goblins. Crude scaffolding rings the room, reachable by a ladder. Pieces of the chieftain and other goblins litter the floor, leavings from the angry dragon.

**Tactical Encounter:** "Standoff," page 90.

## Treasure

This set of encounters should provide the characters with three level 3 treasure parcels, one a magic item parcel and the other two monetary parcels.

## Dealing with the Dragon

When the adventurers reach the third encounter, they find the dragon squaring off against the goblins. The dragon is uncertain about the characters' motives, and they need to prove their good intentions to have a chance of forming an alliance with Thraesk.

The characters need not refrain from combat in order to engage in this skill challenge. As long as they engage the goblins without affecting Thraesk, the dragon doesn't attack them unless it is provoked.

**Level:** 4 (XP 175).

**Complexity:** 1 (requires 4 successes before 3 failures).

**Primary Skills:** Bluff, Diplomacy, Insight.

*Bluff (DC 10, standard action):* The character offers aid under false pretenses, vowing to assist but plotting something else. On a failure, the dragon sees through the lies and uses one of its attacks against the character. Each character can attempt this skill check only once during the challenge.

*Diplomacy (DC 15, standard action):* The character earnestly vows to help the dragon defeat the goblins. Each character can attempt this skill check only once during the challenge.

*Insight (DC 10, minor action):* The first character who succeeds on an Insight check can tell that the dragon is angry about the situation the goblins have put it in and seems about evenly matched against them. This skill can be used to gain only 1 success in the challenge. A successful Insight check also grants a +2 bonus to the character and his or her allies when making Diplomacy checks for the remainder of the skill challenge. On a failed check, in addition to gaining 1 failure in the challenge, the character misreads the situation, seeing the dragon either as overmatched or in complete control of the situation.

**Success:** The dragon agrees not to attack the characters and works with them in fighting the goblins.

**Failure:** If the characters achieve 3 failures, the dragon sees them as threats and includes them in its attacks. Once all the goblins are defeated, the dragon turns on the adventurers.

JASON A. ENGLE

# Escaping Goblins

**Encounter Level 2 (625 XP)**

## Setup

**1 goblin underboss (U)**
**1 goblin cursespewer (C)**
**6 goblin cutters (G)**

The goblin underboss and several of his underlings are fleeing the warren for their safety. The goblins want to escape the dragon, but they can't allow the adventurers to despoil their lair. The characters approach from the south along the road.

**When the PCs notice the goblins, read:**
*Goblins are fleeing away from a hole in the base of the hillside ahead. Their fear turns into wrath when they see you.*

**Goblin Underboss (U)** **Level 4 Elite Controller (Leader)**
Small natural humanoid XP 350

**Initiative** +4 **Senses** Perception +8; low-light vision
**HP** 110; **Bloodied** 55; see also *survival instinct*
**AC** 18; **Fortitude** 17, **Reflex** 15, **Will** 16
**Saving Throws** +2
**Speed** 5; see also *superior goblin tactics*
**Action Points** 1

**Short Sword** (standard; at-will) ✦ **Weapon**
+9 vs. AC; 1d6 + 4 damage. *Miss:* An adjacent ally makes a free basic attack.

**Superior Goblin Tactics** (immediate reaction, when missed by a melee attack; at-will)
The goblin underboss and up to two allies within its line of sight shift 1 square.

**Survival Instinct**
A goblin underboss gains a +3 bonus to defenses while bloodied.

**Alignment** Evil **Languages** Common, Goblin
**Skills** Stealth +10, Thievery +10
**Str** 18 (+6) **Dex** 14 (+4) **Wis** 13 (+3)
**Con** 15 (+4) **Int** 11 (+2) **Cha** 16 (+5)
**Equipment** chainmail, short sword

**Goblin Cursespewer (C)** **Level 2 Artillery (Leader)**
Small natural humanoid XP 125

**Initiative** +2 **Senses** Perception +2; low-light vision
**HP** 68; **Bloodied** 34
**AC** 14; **Fortitude** 14, **Reflex** 13, **Will** 15
**Speed** 6

**Sacrificial Knife** (standard; at-will) ✦ **Weapon**
+7 vs. AC; 1d4 + 3 damage.

**Confounding Curse** (standard; at-will)
Ranged 10; targets two creatures; +7 vs. Will; 1d6 + 3 damage, and the target grants combat advantage to allies until the end of the cursespewer's next turn.

**Goblin Doom** (immediate interrupt, when a goblin within 5 squares is hit by a melee attack; at-will) ✦ **Poison**
Area burst 2 within 10, centered on the goblin that was hit; the goblin explodes: +5 vs. Reflex; 1d10 + 3 poison damage, and ongoing 5 poison damage (save ends).

**Goblin Tactics** (immediate reaction, when the goblin cursespewer is missed by a melee attack; at-will)
The goblin shifts 1 square.

**Alignment** Chaotic evil **Languages** Common, Goblin
**Skills** Religion +5
**Str** 11 (+1) **Dex** 14 (+2) **Wis** 12 (+2)
**Con** 16 (+4) **Int** 9 (+0) **Cha** 17 (+4)
**Equipment** leather armor, sacrificial knife, wand

**6 Goblin Cutters (G)** **Level 1 Minion**
Small natural humanoid XP 25 each

**Initiative** +3 **Senses** Perception +1; low-light vision
**HP** 1; a missed attack never damages a minion.
**AC** 16; **Fortitude** 12, **Reflex** 14, **Will** 11
**Speed** 6; see also *goblin tactics*

**Short Sword** (standard; at-will) ✦ **Weapon**
+5 vs. AC; 4 damage (5 damage if the goblin cutter has combat advantage against the target).

**Goblin Tactics** (immediate reaction, when missed by a melee attack; at-will)
The goblin shifts 1 square.

**Alignment** Evil **Languages** Common, Goblin
**Skills** Stealth +5, Thievery +5
**Str** 14 (+2) **Dex** 17 (+3) **Wis** 12 (+1)
**Con** 13 (+1) **Int** 8 (-1) **Cha** 8 (-1)
**Equipment** leather armor, short sword

## Tactics

At the start of combat, the underboss stands near the cursespewer and attacks any enemies who move adjacent to it. The cursespewer uses *confounding curse* and *goblin doom* each round on the cutters, which swarm the characters.

The underboss fights until either the cursespewer or all the cutters are defeated. The others flee if the underboss is slain.

## Features of the Area

**Underbrush:** Squares of underbrush are difficult terrain.

**Trees:** Squares containing trees are difficult terrain and provide cover. Each tree requires a DC 7 Athletics check to climb.

# Uneasy Sentries

**Encounter Level 3 (750 XP)**

## Setup

**2 goblin sentries (S)**
**4 gray wolves** (W)

Goblin sentries watch the warren's entrance, even as their fellows contend with the dragon inside the lair. The gray wolves are trained to attack any nongoblin that comes within 5 squares of the entrance. The goblins are more concerned about what's going on behind them than they are about watching for intruders, especially since the underboss fled just a few moments before. Thus, the goblin sentries (though not the gray wolves) are automatically surprised.

**When the PCs enter this area, read:**
*Three wolves near the cave entrance turn toward you, bristling and growling. Beyond them, you see two goblins dressed in mail and hefting spears. Another wolf is with them. One of the goblins stands in front of a crude, red-painted wooden wall, and the other is visible behind the wall through a gate. Shrieks and growling noises sound from deeper inside the tunnel, and the sentries are totally distracted by the commotion.*

| **2 Goblin Sentries (S)** | | **Level 2 Soldier** |
|---|---|---|
| Small natural humanoid | | XP 125 each |
| **Initiative** +5 | **Senses** Perception +6; low-light vision | |
| **HP** 41; **Bloodied** 20 | | |
| **AC** 18; **Fortitude** 15, **Reflex** 14, **Will** 12 | | |
| **Speed** 5 | | |
| ⊕ **Spear** (standard; at-will) ✦ **Weapon** | | |
| +9 vs. AC; 1d8 + 3 damage, and the goblin slides the target 1 square. | | |
| ➳ **Hand Crossbow** (standard; at-will) ✦ **Weapon** | | |
| Ranged 10/20; +9 vs. AC; 1d6 + 3 damage. | | |
| ↓ **Trip Up** (standard; recharge ⚅) | | |
| +7 vs. Reflex; 1d8 + 4 damage, and the target is knocked prone. | | |
| **Goblin Tactics** (immediate reaction, when missed by a melee attack; at-will) | | |
| The goblin shifts 1 square. | | |
| **Alignment** Evil | **Languages** Common, Goblin | |
| **Str** 12 (+2) | **Dex** 16 (+3) | **Wis** 11 (+1) |
| **Con** 17 (+4) | **Int** 9 (+0) | **Cha** 8 (+0) |
| **Equipment** chainmail, light shield, spear, hand crossbow with 10 bolts | | |

| **4 Gray Wolves (W)** | | **Level 2 Skirmisher** |
|---|---|---|
| Medium natural beast | | XP 125 each |
| **Initiative** +5 | **Senses** Perception +7; low-light vision | |
| **HP** 38; **Bloodied** 19 | | |
| **AC** 16; **Fortitude** 14, **Reflex** 14, **Will** 13 | | |
| **Speed** 8 | | |
| ⊕ **Bite** (standard; at-will) | | |
| +7 vs. AC; 1d6 + 2 damage, or 2d6 + 2 damage against a prone target. | | |
| **Combat Advantage** | | |
| If a gray wolf has combat advantage against the target, the target is also knocked prone on a hit. | | |
| **Alignment** Unaligned | **Languages** – | |
| **Str** 13 (+2) | **Dex** 14 (+3) | **Wis** 13 (+2) |
| **Con** 14 (+3) | **Int** 2 (-3) | **Cha** 10 (+1) |

## Tactics

The gray wolves attack the closest nongoblin, working in pairs to gain combat advantage so that they can knock their targeted enemies prone.

A goblin sentry lures the characters near the wall so its ally can help by stabbing with its spear. Failing this, the goblin behind the wall peppers controllers and leaders with crossbow bolts while the other goblin uses *trip up* to set up the gray wolves' attacks. The wolves fight to the death, but one or both of the goblins might decide to run off.

## Features of the Area

**Ceiling:** The ceiling is 10 feet high.

**Wall and Gate:** Across the tunnel leading into the cave is a crude wooden wall with a gate in its center. The gate hangs on leather hinges. Pulling the gate open requires a DC 10 Strength check as a standard action. Openings in the gate and the wall allow creatures to attack through the barrier. Creatures on either side of the wall have superior cover against attacks originating from the other side of the wall. A 1-square wall section has AC 5, Fortitude 10, Reflex 5, and 20 hit points.

# Standoff

**Encounter Level 5 (1,100 XP)**
**or**
**Encounter Level 8 (1,975 XP)**
**with Thraesk**

## Setup

**Thraesk, young iron dragon** (T)
**1 goblin hexer** (H)
**3 goblin skullcleavers** (S)
**5 goblin warriors** (W)

This encounter is designed to unfold in area 5, where a group of relatively powerful goblins are trying to hold their own against an unhappy iron dragon. The characters should be drawn toward this area by the sounds of shrieks and growling they heard while they were involved with the sentries in the previous encounter.If the adventurers can win over Thraesk by succeeding on the skill challenge (see page 87), the dragon helps them fight the goblins. Otherwise, the characters become the third side in a three-way fight.

**If the PCs head into area 4 right away, read:**
*Amid a clutter of bedding and dirty animal skins, you see several weak-looking goblins cowering before your approach.*

**Thraesk (T)** **Level 4 Solo Lurker**
Young iron dragon
Large natural magical beast (dragon) XP 875

**Initiative** +10 **Senses** Perception +8; darkvision
**HP** 212; **Bloodied** 106; see also *bloodied breath*
**AC** 18; **Fortitude** 16, **Reflex** 18, **Will** 15
**Resist** 15 lightning
**Saving Throws** +5
**Speed** 6, fly 6 (hover), overland flight 8
**Action Points** 2

**Bite** (standard; at-will) ✦ **Lightning**
Reach 2; +9 vs. AC; 2d6 + 3 damage plus 1d8 lightning damage.

**Claw** (standard; at-will)
Reach 2; +9 vs. AC; 1d10 + 3 damage.

**Double Attack** (standard; at-will)
Thraesk makes two claw attacks.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Lightning**
Close blast 5; +5 vs. Reflex; 2d8 + 3 lightning damage, and Thraesk pulls the target 3 squares. *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Thraesk uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +5 vs. Will; the target is stunned until the end of Thraesk's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Confounding Surge** (move; recharge ⚄ ⚄ ⚅) ✦ **Fear**
Thraesk gains concealment and shifts 3 squares. All enemies adjacent to him at the end of this movement grant combat advantage until the end of Thraesk's next turn.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Acrobatics +11, Athletics +9, Stealth +11
**Str** 14 (+4) **Dex** 18 (+6) **Wis** 12 (+3)
**Con** 13 (+3) **Int** 12 (+3) **Cha** 12 (+3)

**Goblin Hexer (H)** **Level 3 Controller (Leader)**
Small natural humanoid XP 150

**Initiative** +3 **Senses** Perception +2; low-light vision
**HP** 46; **Bloodied** 23
**AC** 17; **Fortitude** 14, **Reflex** 15, **Will** 16; see also *lead from the rear*
**Speed** 6; see also *goblin tactics*

**Hexer Rod** (standard; at-will) ✦ **Weapon**
+7 vs. AC; 1d6 + 1 damage.

**Blinding Hex** (standard; at-will)
Ranged 10; +7 vs. Fortitude; 2d6 + 1 damage, and the target is blinded (save ends).

**Stinging Hex** (standard; recharge ⚄ ⚅)
Ranged 10; +7 vs. Will; the target takes 3d6 + 1 damage if it moves during its turn (save ends).

**Vexing Cloud** (standard; sustain minor; encounter) ✦ **Zone**
Area burst 3 within 10; no attack roll; all enemies within the zone take a -2 penalty to attack rolls. The zone grants concealment to the goblin hexer and its allies. The goblin hexer can sustain the zone as a minor action, moving it up to 5 squares.

**Incite Bravery** (immediate reaction, when an ally uses *goblin tactics*; at-will)
Ranged 10; the targeted ally can shift 2 more squares and make an attack.

**Goblin Tactics** (immediate reaction, when missed by a melee attack; at-will)
The goblin shifts 1 square.

**Lead from the Rear** (immediate interrupt, when targeted by a ranged attack; at-will)
The goblin hexer can change the attack's target to an adjacent ally of its level or lower.

**Alignment** Evil **Languages** Common, Goblin
**Skills** Stealth 10, Thievery +10
**Str** 10 (+1) **Dex** 15 (+3) **Wis** 13 (+2)
**Con** 14 (+3) **Int** 9 (+0) **Cha** 18 (+5)
**Equipment** leather robes, hexer rod

If the characters try to engage the warriors in combat, the goblins all flee toward area 5. (They would rather join up with their allies and risk the dragon's wrath than be dispatched on the spot.)

**When the PCs approach area 5 and can see the dragon, read:**
*Goblins face off with an iron dragon that is backed into the far corner of this chamber. A robed goblin standing on scaffolding above the beast issues commands to other goblins.*

When the characters arrive, roll initiative. Refer to "Tactics" for a summary of how the battle unfolds.

## Tactics

When the characters appear on the scene, the goblins and the dragon stop arguing and start fighting. Thraesk uses his *frightful presence* on the goblins, spends an action point to use his *breath weapon*, and then moves to engage the nearest enemy in melee. The dragon singles out the characters for attacks only if they attack him first or otherwise provoke him.

While some of the characters involve themselves with the skill challenge, others might decide to attack the goblins or protect the characters who are

| 3 Goblin Skullcleavers (S) | Level 3 Brute |

not fighting. Once the skill challenge is resolved, Thraesk will be either an ally or an enemy of the characters. Either way, the goblins have a stiff fight on their hands.

As the fight progresses, Thraesk moves toward and then into area 3, intending to make his way out of the goblin warren (but not before taking down as many of his adversaries as possible).

The goblin warriors focus their attacks on the characters. Until the heroes attack them, the skullcleavers and the hexer devote all their effort to attacking the dragon. Goblins, especially the warriors, might not hang around until the end of the encounter.

## Features of the Area

**Ceiling:** The ceiling is 10 feet high in area 3, 40 feet high in area 4, and 30 feet high in area 5.

**Plunder:** The squares in area 3 containing a mix of boxes, barrels, and crates count as difficult terrain.

**Scaffolding:** The northern, southern, and western walls of area 5 have scaffolding built to allow more goblins to attend the now-dead chieftain. It stands 10 feet above the floor. A character can ascend the ladder along the southern wall by spending 3 squares of movement, or can climb up the side of the scaffold with a DC 15 Athletics check. Scaffolding squares have AC 5, Fortitude 10, Reflex 5, and 20 hit points. If three or more squares are destroyed, the scaffolding collapses, dealing 3d6 + 4 damage to any creature underneath it.

# THE TERROR OF PROSPECT HILL

**Copper dragon lair for five 5th-level adventurers**

Deep in the northlands stands an imposing wooden stockade. Initially a source of horror and death for the surrounding communities, over the years it has been conquered, adapted to protect those that were once tormented, and finally left to the ravages of nature.

And now, like nature, the steading has come full circle. The fort on Prospect Hill has become the home of a band of highwaymen, led by a brutal tiefling warlock and accompanied by a copper dragon whose greed is much stronger than her small size and young age would suggest.

## Background

**History DC 7:** Some months ago, a gang of bandits moved into the principality of Kurich, an array of towns and hamlets a few miles from the permafrost of the north. Operating from an old fort atop a rise called Prospect Hill, and led by Chevkos, a sadistic tiefling, the bandits embarked on a campaign to rob and murder the locals.

While Kurich mobilized a militia to hunt down the bandits, Chevkos joined with a copper dragon named Korzinalikur. In exchange for a substantial share of the gang's profits, she became their primary enforcer and soldier, initially proving her worth by destroying the militia.

Today, the bandit gang all but rules the area from the fort on Prospect Hill, taking what they want from whom they want.

**History DC 12:** Chevkos worries that he might have made a devil's bargain. So far, Korzinalikur follows his orders and seems content to operate as an employee. However, she has begun suggesting the gang's next moves, and neither the tiefling nor his bandits have any doubt who would come out on top if–when–the dragon decides to run the show.

## Environment

Anyone in the fortress's tower has a clear view of the surroundings, making it difficult for interlopers to approach undetected. The slope of Prospect Hill is not steep, but in combination with the thick grasses and soft soil, it counts as difficult terrain. The road leading up to the gate and the packed dirt inside the structure, however, are not difficult terrain.

**When the PCs approach Prospect Hill, read:**
*The woods grow thin ahead, and the ground slopes up to form a large hillock. Atop it looms a fort. Enormous planks of wood form a stockade surrounding buildings constructed on an equally large scale. A great tower rises just east of the main gate, providing a clear view of the surroundings.*

### Area 1: The Front Gate

A wide gate in the wooden wall of the fort is the most obvious (and easiest) way to gain access to the inside. For details of how to open or break down the gate, see "Features of the Area" in the tactical encounter that begins on page 94. If the characters decide to try getting in by scaling the wall, that section of the encounter also has the necessary information.

**Tactical Encounter:** "Entering the Fort," page 94.

### Area 2: The Courtyard

The large area extending to the south and east from inside the front gate is devoid of any significant features except for a few trees. High walls, interrupted in a few places by doors, separate other parts of the fort from the courtyard.

**Tactical Encounter:** "Entering the Fort," page 94.

### Area 3: The Tower

The tower on the northern side of the fort stands 40 feet high and has a functioning ballista at its top. The

### KORZINALIKUR

Korzinalikur isn't nearly as potent as she might seem at first glance. Since her birth she has been a somewhat sickly copper dragon, weaker than her clutchmates. Her family drove Korzinalikur out of their territory, forcing her to go find her own place to live. Seething at this treatment, and terrified that her weakened nature might prevent her from attaining the hoard and the respect that are hers "by right," Korzinalikur wandered the wilds for several years, feeding on roving animals and hunting desperately for an opportunity that lay within her capabilities.

She found it in Chevkos's offer. Korzinalikur sees her cooperation with the bandit gang not merely as the chance to build up her own wealth, but also a way to test the limits of her power. Slowly but steadily, she is becoming aware that, though she is weak for a dragon of her age, she is still the most potent force in the region. Like others of her kind, she is patient, willing to let the tiefling keep command of the bandits for now. In her heart, though, she has already begun to think of the fort, the treasure, and the bandits as hers–and she is developing designs on the entirety of Kurich. Korzinalikur works for the day when all the people of the region are devoted to enriching her hoard, and she can vent her simmering resentment upon those weaker than she is, in vengeance for the slights and abuses her family heaped on her.

interior of the tower is hollow, containing nothing but a set of stairs leading upward. (The map shows only the top of the tower.)

**Tactical Encounter:** "Entering the Fort," page 94.

## Area 4: Dining Room

Several of Chevkos's bandits currently occupy this dining room. The tableware, such as it is, is worthless, consisting of mismatched wooden and ceramic pieces.

**Tactical Encounter:** "Entering the Fort," page 94.

## Area 5: Barracks

This disheveled area—nothing more than an elongated room with sleeping pallets and tables scattered throughout—is the living quarters of the surviving members of Chevkos's bandit gang.

**Treasure:** The bandits have 50 gp among them.

**Tactical Encounter:** "Entering the Fort," page 94.

## Area 6: The Audience Chamber

This room borders the lairs of both Korzinalikur and Chevkos. A wide pit in the center gives access to Korzinalikur's lair below (area 9), ringed by columns that extend to the floor below.

The secret door in the east wall, which provides an emergency exit, requires a DC 17 Perception check to locate.

**Tactical Encounter:** "The Central Lair," page 96.

## Area 7: Chevkos's Quarters

This large bedroom serves as the living quarters for Chevkos and his four bugbear bodyguards.

The secret door (Perception DC 17 to locate) leads to spiral stairs that descend to a corridor that leads to area 9.

**Tactical Encounter:** "The Central Lair," page 96.

## Area 8: Treasure Room

This room is kept locked. Chevkos and the bugbears each have a key. The bandit gang's treasures, other than the shares given to the various members, are kept here. The doors require a DC 18 Thievery check to unlock.

**Treasure:** This chamber contains wealth equivalent to one level 5 monetary treasure parcel.

## Area 9: Korzinalikur's Lair

The open chamber beneath area 6 serves as Korzinalikur's lair. It's smaller than the chamber above. A 5-foot-wide corridor (not shown on the map) leads underneath area 6 to the base of the spiral staircase that connects to the side of Chevkos's quarters.

When the fort was built, this area served as a gladiatorial arena, surrounded by an elevated concourse (area 6) from where spectators could watch the battles taking place below them. The corridor that connects this area with the spiral staurcase outside area 7 provided a means for combatants to enter and exit the arena floor. Now, the pit makes a serviceable lair for Korzinalikur. The columns provide support for thick planks that form the walls of the pit, keeping the sides from collapsing.

**Treasure:** Korzinalikur's lair contains wealth or a magic item equivalent to one level 5 treasure parcel.

**Tactical Encounter:** "The Central Lair," page 96.

JASON A. ENGLE

# Entering the Fort

**Encounter Level 6 (1,315 XP)**

## Setup

**2 Chevkos's crossbowmen** (C)
**3 Chevkos's guards** (G)
**10 Chevkos's lackeys** (L)

To reach Chevkos, the characters need to find a way to enter the fort, probably through the gate. There's little cover, and the guards on the tower have a ballista they can fire at the characters. Two minions stand guard outside the gate. Once the characters enter, the bandits swarm out of their dining and sleeping rooms to intercept them before they reach area 6.

As written, this encounter assumes that the characters approach the fort from along the road and enter through the main gate. If they do not, the encounter can still occur largely as presented; adjust descriptions and tactics for the terrain, and possibly add ranged penalties for the crossbowmen.

**When the PCs come within sight of the gate, read:**
*The tall wooden gates are barred. The entrance is guarded by a pair of bandits, and you can see two crossbow-wielding guards looking down from a tower a short distance to the east. You hear shouts of challenge and alarm from up ahead as the occupants take note of your approach.*

**When the crossbowmen first fire the ballista, read:**
*A heavy thump resounds from the tower, as a bolt the size of an ogre's spear flies toward you.*

**When the PCs enter the courtyard, read:**
*The earth inside this large area has been packed down, providing firm footing even on the hillside's slope. A pair of doors on the south side of the tower lead into the ground level of that structure. You also see a row of doors on the west wall and two other pairs of doors that give access to the southwestern portion of the complex.*

**When the bandits come out to fight, read:**
*Doors burst open across the western wall, and a tide of unwashed, unshaven bandits rushes at you.*

**If the PCs enter area 4, read:**
*You're standing in what looks like a slapdash dining room and beer hall. A long table and benches fill the center of the room, and shelves full of food are set into the walls.*

**If the PCs enter area 5, read:**
*A fireplace crackles away, warming a disorganized barracks. Scattered throughout are cots and sleeping pallets. A few rickety tables and old chairs are also visible.*

**2 Chevkos's Crossbowmen (C)** **Level 4 Artillery**
Medium natural humanoid, human XP 175 each

**Initiative** +6 **Senses** Perception +4
**HP** 45; **Bloodied** 22
**AC** 16; **Fortitude** 16, **Reflex** 18, **Will** 16
**Speed** 6

+9 vs. AC; 1d6 + 2 damage.

**Crossbow** (standard; at-will) ✦ **Weapon**
Ranged 15/30; +11 vs. AC; 1d8 + 5 damage.

**Quick Shot** (standard; encounter)
The crossbowman makes crossbow attacks against two different targets.

**Alignment** Unaligned **Languages** Common
**Skills** Stealth +11
**Str** 11 (+2) **Dex** 18 (+6) **Wis** 14 (+4)
**Con** 15 (+4) **Int** 11 (+2) **Cha** 11 (+2)
**Equipment** leather armor, short sword, crossbow with 20 bolts

**3 Chevkos's Guards (G)** **Level 4 Soldier**
Medium natural humanoid, human XP 175 each

**Initiative** +6 **Senses** Perception +3
**HP** 56; **Bloodied** 28
**AC** 20; **Fortitude** 18, **Reflex** 16, **Will** 15
**Speed** 5

**Longspear** (standard; at-will) ✦ **Weapon**
Reach 2; +11 vs. AC; 1d10 + 4 damage, and the target is marked until the end of the guard's next turn.

**Crossbow** (standard; at-will) ✦ **Weapon**
Ranged 15/30; +10 vs. AC; 1d8 + 3 damage.

**Powerful Strike** (standard; requires a reach weapon; encounter) ✦ **Weapon**
Reach 2; +11 vs. AC; 2d10 + 4 damage, and the target is knocked prone.

**Alignment** Unaligned **Languages** Common
**Str** 18 (+6) **Dex** 15 (+4) **Wis** 12 (+3)
**Con** 16 (+5) **Int** 11 (+2) **Cha** 13 (+3)
**Equipment** chainmail, longspear, crossbow with 20 bolts

**10 Chevkos's Lackeys (L)** **Level 4 Minion Skirmisher**
Medium natural humanoid, human XP 44 each

**Initiative** +4 **Senses** Perception +3
**HP** 1; a missed attack never damages a minion.
**AC** 18; **Fortitude** 18, **Reflex** 15, Will 16
**Speed** 6

**Short Sword** (standard; at-will) ✦ **Weapon**
+9 vs. AC; 5 damage.

**Hand Crossbow** (standard; at-will) ✦ **Weapon**
Ranged 10/20; +9 vs. AC; 4 damage.

**Combat Advantage**
A lackey deals 2 extra damage against any creature granting combat advantage to it.

**Alignment** Unaligned **Languages** Common
**Skills** Stealth +7
**Str** 16 (+5) **Dex** 11 (+2) **Wis** 12 (+3)
**Con** 14 (+4) **Int** 10 (+2) **Cha** 13 (+3)
**Equipment** leather armor, short sword, hand crossbow with 20 bolts

### Ballista

The ballista on top of the tower can be fired by any creature adjacent to it. The creature can use the following attack.

**Ballista Shot** (standard; recharge special) ✦ **Weapon**
Ranged 20/40; +9 vs. Reflex; 3d8 + 4 damage, and the target is pushed 2 squares and knocked prone.

Make recharge rolls for the ballista at the start of the turn of the creature that last fired it. The power recharges on ⚄ ⚅ if two creatures are adjacent to the ballista (that is, loading it), or on ⚅ if only one creature is adjacent. The power doesn't recharge if no one is adjacent to the ballista.

## Tactics

The crossbowmen use the ballista to attack once the characters have come within roughly 30 feet of the fortress (as soon as the players place their miniatures on the road at the edge of the tactical map). They continue firing after the characters move into the courtyard. The lackeys try to stand their ground near the gate, but they don't stay put if they notice ranged weapons or magic implements in the characters' hands.

When the characters are inside the walls, the guards and lackeys open the doors leading from the dining room and barracks and move a short distance into the courtyard.

When their numbers have been reduced to one guard or one crossbowman and two or three lackeys, the bandits surrender and beg for mercy.

The guards run out mainly to stop the characters from moving toward the southern end of the fort (where their leader is located). The guards protect the lackeys by marking foes and knocking enemies prone, giving the lackeys combat advantage.

A few lackeys might stop in doorways to fire their hand crossbows. If the characters come near, they retreat into the barracks.

## Features of the Area

**Illumination:** Bright light outside and inside the fort at all times. (At night, lanterns illuminate the exterior and interior of the structure.)

**Hillside Slope:** The slope outside the fortress, with the exception of the road, is difficult terrain.

**Trees:** Squares containing trees inside and outside the fort are difficult terrain and provide cover. A tree can be climbed with a DC 12 Athletics check, and the trees range between 10 and 20 feet in height.

**Doors:** The entry gate to the fortress is barred (DC 12 Strength check to break or DC 17 Thievery check to jimmy the bar out of place). The doors to the tower are locked (DC 12 Strength check to break or DC 17 Thievery check to pick the lock). The doors leading to areas 4 and 5 are unlocked. The doors to area 6 are locked (see the next encounter).

**Tower:** The tower rises 20 feet above the top of the walls. Climbing the side of the tower requires a DC 18 Athletics check.

**Outer Walls:** The walls are 20 feet high and require a DC 17 Athletics check to climb. The tops of the wooden posts that form the walls are spiked; anyone who reaches the top of the wall is subject to an attack: +9 vs. AC; 1d4 + 2 damage, and the character must make a successful DC 17 Athletics check or fall.

**Ceiling:** Areas 4, 5, 7, and 8 have 20-foot-tall ceilings.

**Benches, Tables, and Chairs:** These features are difficult terrain. Jumping onto a bench or a table requires 2 squares of movement. In area 4, a character can tip over the long table to gain superior cover.

**Fireplaces:** At night, the two fireplaces in area 5 hold small fires; a character who enters a fire or begins his turn there takes 1d6 + 3 fire damage.

# The Central Lair

**Encounter Level 7 (1,550 XP)**

## Setup

**Korzinalikur, elite young copper dragon** (K)
**Chevkos, tiefling heretic** (C)
**4 bugbear warriors** (B)

During the previous encounter, none of the bandit gang's leaders emerged from their lair in the fort's central keep. Perhaps they assumed that their underlings could handle whatever the problem might be (and after all, it's not that hard to recruit new thieves and mercenaries). But once the characters gain control of the courtyard, neutralize the ballista, and move deeper into the complex, Chevkos and Korzinalikur fight back.

Each of the descriptions below assumes the characters first spot each foe at or near its starting point. Adjust the read-aloud text as needed if any of the monsters move before they are encountered, or if the characters manage to get into area 7 or 8 before going through area 6.

**When the PCs enter area 6, read:**
*The center of the room drops away into a wide pit, from which wafts a vaguely reptilian scent. Several pillars rise from within the pit, clearly marking the edge.*

*Two bugbears instantly move toward you, morningstars raised high, and something begins to stir loudly in the shadowy depths of the pit.*

**When the PCs enter area 7, read:**
*This chamber serves as a lavish living area, far more extravagant than this place would seem to warrant. An old canopied bed sits in one corner, with several additional bedrolls scattered on the floor nearby. A heap of embers glows dully in the fireplace, radiating warmth throughout the room.*

**When the PCs see Chevkos, read:**
*Before you stands a short tiefling, clad in several layers of fancy clothes. Tiny bits of jewelry pierce his horns all over. He has a menacing glint in his eyes, and balefire crackles across his fingers. Two more bugbears loom nearby, clutching morningstars and grinning viciously.*

**When Korzinalikur first appears, read:**
*An enormous metallic form bursts upward from the pit, wings outspread and jaws agape. The light glints off its copper scales, and thin tendrils of sizzling spittle drip from the corners of its mouth.*

**Korzinalikur (K)** **Level 6 Elite Skirmisher**
Young copper dragon
Large natural magical beast (dragon) XP 500

**Initiative** +10 **Senses** Perception +10; darkvision
**HP** 148; **Bloodied** 74; see also *bloodied breath*
**AC** 20; **Fortitude** 18, **Reflex** 19, **Will** 16
**Resist** 15 acid
**Saving Throws** +2
**Speed** 8, fly 10 (hover), overland flight 15; see also *flyby attack*
**Action Points** 1

⊕ **Bite** (standard; at-will) ✦ **Acid**
Korzinalikur shifts 2 squares before and after making the attack. Reach 2; +11 vs. AC; 1d10 + 4 damage plus 1d6 acid damage.

⊕ **Claw** (standard; at-will)
Reach 2; +11 vs. AC; 1d8 + 4 damage.

⨽ **Double Attack** (standard; at-will)
Korzinalikur makes two claw attacks and then shifts 2 squares.

⨽ **Flyby Attack** (standard; at-will)
Korzinalikur flies up to 10 squares and makes one melee basic attack at any point during that movement. She doesn't provoke opportunity attacks when moving away from the target.

✧ **Breath Weapon** (standard; encounter) ✦ **Acid**
Close blast 5; +7 vs. Reflex; 2d10 + 4 acid damage, and the target is slowed (save ends). *Miss:* Half damage.

✧ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Korzinalikur uses it.

✧ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +7 vs. Will; the target is stunned until the end of Korzinalikur's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Acrobatics +13, Bluff +9, Insight +10
**Str** 16 (+6) **Dex** 20 (+8) **Wis** 14 (+5)
**Con** 18 (+7) **Int** 12 (+4) **Cha** 12 (+4)

**Chevkos (C)** **Level 6 Artillery**
Medium natural humanoid, tiefling XP 250

**Initiative** +8 **Senses** Perception +6; low-light vision
**HP** 60; **Bloodied** 30
**AC** 20; **Fortitude** 17, **Reflex** 18, **Will** 18
**Resist** 11 fire
**Speed** 6

⊕ **Dagger** (standard; at-will) ✦ **Weapon**
+10 vs. AC (+11 against a bloodied target); 1d4 + 2 damage.

⊛ **Balefire** (standard; at-will) ✦ **Fire**
Ranged 10; +9 vs. Reflex (+10 against a bloodied target); 1d8 + 5 fire damage, and ongoing 5 fire damage (save ends).

⊹ **Serpent Curse** (standard; encounter) ✦ **Illusion, Psychic**
Ranged 10; illusory snakes appear and attack the target; +9 vs. Will (+10 against a bloodied target); 1d6 + 5 psychic damage, and ongoing 5 psychic damage (save ends).

**Cloak of Escape** (immediate reaction, when Chevkos is hit by a melee attack; at-will) ✦ **Teleportation**
Chevkos teleports 5 squares.

**Infernal Wrath** (minor; encounter)
Chevkos gains a +1 power bonus to his next attack roll against an enemy that hit him since his last turn. If the attack hits and deals damage, Chevkos deals 5 extra damage.

**Alignment** Evil **Languages** Common
**Skills** Bluff +15, Insight +11, Stealth +15
**Str** 15 (+5) **Dex** 20 (+8) **Wis** 16 (+6)
**Con** 18 (+7) **Int** 13 (+4) **Cha** 20 (+8)
**Equipment** dagger

| **Speed** 6 | |
| ⊕ **Morningstar** (standard; at-will) ✦ **Weapon** | |
| +7 vs. AC; 1d10 + 7 damage. | |
| ǂ **Skullthumper** (standard; requires a morningstar and combat advanage against the target; encounter) ✦ **Weapon** | |
| +5 vs. Fortitude; 1d10 + 7 damage, and the target is knocked prone and dazed (save ends). | |
| **Predatory Eye** (minor; encounter) | |
| The bugbear warrior deals 1d6 extra damage on the next attack it makes against a target granting combat advantage to it. It must apply this bonus before the end of its next turn. | |
| **Alignment** Evil | **Languages** Common, Goblin |
| **Skills** Intimidate +9, Stealth +11 | |
| **Str** 20 (+7) | **Dex** 16 (+5) **Wis** 14 (+4) |
| **Con** 16 (+5) | **Int** 10 (+2) **Cha** 10 (+2) |
| **Equipment** hide armor, morningstar | |

## Tactics

Assuming the characters begin the encounter in area 6, the two bugbears in that area rush to attack. The bugbears that start in area 7 join the combat as soon as they can get there. All the bugbears try to stay in melee with the characters, to keep them away from Chevkos. The bugbears retreat if doing so is tactically sound, but they do not flee.

Korzinalikur erupts from the pit on her initiative count in the first round (requiring 4 squares of movement to do so). She initiates combat with her *breath weapon*, if she can use it without catching either of the bugbears in the blast. She then relies on *flyby attacks*, moving in and out of the chamber and through the entire fort, using the courtyard to circle around and attack from different angles.

If she becomes bloodied, Korzinalikur no longer cares about keeping the bugbears out of the area of her *breath weapon*. She attempts to escape if reduced to 40 or fewer hit points—she's not prepared to risk her life for the bandits—and surrenders if escape proves impossible.

Chevkos hangs back, using his ranged attacks to harry the characters. He uses *cloak of escape* whenever he is hit with a melee attack, teleporting to a place of relative safety in area 6 or even out into the courtyard if possible. He doesn't allow himself to be cornered in area 8. Even though Chevkos does his best to avoid being hit repeatedly, he does not abandon the fort and fights to the death.

## Features of the Area

**Illumination:** Brightly lit, by sunlight or by lanterns.

**Ceiling:** The ceiling in areas 7 and 8 is 20 feet high.

**Beds:** A character can step up onto a bed with 1 extra square of movement. A DC 17 Strength check topples a bed over, allowing it to serve as cover for standing characters, and knocking prone any creatures standing on it.

**Doors:** Most of the interior doors are unlocked and designed to open from either direction. The doors to area 8 are locked and require a DC 18 Thievery check to open. Chevkos and the bugbears each carry keys.

**Fireplace:** At night, this spot holds a small fire; a character who enters the fire or begins his turn there takes 1d6 + 3 fire damage.

**Pit:** The pit is 20 feet deep. Climbing out requires a DC 20 Athletics check.

**Secret Door:** A DC 17 Perception check detects the secret door.

**Spiral Stairs:** The spiral stairs are difficult terrain. They lead to an underground passage that connects to Korzinalikur's lair.

# TULKAU SHAYN

**Orium dragon lair for five 7th-level adventurers**

From the steamy jungles of the south come rumors of the Alabaster City, a place lost to the mists of time, where every citizen was a sage and powerful magic fulfilled every whim of the city's denizens. No explorer can claim to know the location of the city, but lizardfolk wearing strange alabaster jewelry have been captured recently. Eager to save their own lives, the lizardfolk said they served an orium dragon named Zanathakla. She lives in the bottom of a vertical cave deep in the jungle known as Tulkau Shayn ("Gullet Cave" in the lizardfolk's dialect).

The captive lizardfolk claim that Zanathakla doesn't know where the Alabaster City is either, but she searches for it day and night and sends bands of loyal lizardfolk far and wide to look for it. So far, they have found the ruins of several smaller communities, and Zanathakla says the city will soon be theirs.

## Background

**History DC 14:** Zanathakla made Tulkau Shayn her lair about a year ago and quickly seized control of a large tribe of lizardfolk, which now treat her with reverence approaching outright worship. Most of the lizardfolk are in the jungle looking for clues to help find the vast ruins called the Alabaster City, because Zanathakla is obsessed with claiming the ruin's secrets for her own. Only a few of her followers are guarding Tulkau Shayn at any given time.

**History DC 19:** Gullet Cave has long been the source of superstition among the indigenous humans and lizardfolk. A stone outcropping resembling teeth runs along the north edge of the cave mouth, and the cave itself is 200 feet deep. For years, brave youths have crawled to the edge of Tulkau Shayn and peered into the inky blackness below. But until Zanathakla moved in with the lizardfolk tribe, no one knew how deep the cave was—or if it even had a bottom.

## Hook: Discover the Alabaster City

Somewhere within the deep jungle lie the ruins Zanathakla seeks—the last remnants of the Alabaster City. People living near the jungle, or in the safer areas around its outskirts, know many rumors about the city but few facts. If the characters can find the location of the city, they might be able to recover what remains in its vaults, or the greater treasures of forgotten knowledge that lie in the vast libraries rumored to exist within the city.

**Quest XP:** 1,500 XP (major quest).

## Hook: Recover the Trade Goods

A massive nearby river that winds through the jungle carries many merchant ships to towns and cities that dot the shoreline. The creatures under Zanathakla's command have begun attacking these merchants, usually taking preserved food and drink. They have also been known to steal tools. The river merchants ask the characters to retrieve their stolen goods and to end the threat of the lizardfolk raiders. See the descriptions of areas 2 and 7 in the following text for information about the items that belong to the traders.

**Quest XP:** 300 XP (minor quest).

## Environment

Tulkau Shayn is a deep, vertical cave. The entrance opens in the center of the cave's ceiling, and the space within drops straight down 200 feet to a flat, rocky floor. The cave walls angle slightly outward; viewed from the side, the cave looks like an upright cone with the top chopped off.

Several side chambers branch off from the main chamber. Until the lizardfolk constructed the wooden pathway that spirals down the interior cave walls, those chambers were home only to flying creatures—mostly bats and stirges—that would ascend out of the cave each day to find food in the jungle.

**Illumination:** If there's daylight outside, the top 50 feet of the cave are in bright light and the next 50 feet in dim light. It's dark at the 120-foot mark, where the second encounter, "Stirge Chamber," takes place.

**Walls:** The cave walls are rough and have many handholds and footholds, but they slope outward, making a climb more difficult than it would otherwise be. Unless otherwise noted, climbing the cave walls in either direction requires a DC 20 Athletics check.

**Side Chambers:** Most of the side chambers don't contain encounters. Once the characters defeat the guards at the cave mouth, they have to pass a dangerous cave inhabited by stirges and gricks before reaching Zanathakla and accessing Tulkau Shayn's treasures.

Eventually lizardfolk search parties will return to the cave, but they might be too disheartened by Zanathakla's death to fight. (Or perhaps they're mad for vengeance; you make the call.)

### Area 1: Cave Entrance

When the characters make their way through the jungle and finally reach Tulkau Shayn (see the "Approaching the Cave" skill challenge on page 100),

they find the cave's entrance guarded by lizardfolk that revere Zanathakla.

**Tactical Encounter:** "Cave Entrance," page 102.

## Area 2: Living Cave

About 50 feet down inside the cave, connected to the entrance by way of the lashed wooden scaffolding the lizardfolk have built, is a large cave that serves as the lizardfolk's main living chamber.

**When the PCs enter this cave, read:**

*The lizardfolk's bedding—mostly furs and fronds—lies in piles along the walls of this cave. In one corner, barrels contain fresh water and dried meat. In the center of the chamber lie several felled trees, rough wooden planks, and carpentry tools. The planks match those used in the walkway outside. A stone altar stands against the far wall, topped by a reddish statue of a dragon.*

The barrels of food and water and the carpentry tools were stolen from river traders and can be returned as part of the "Recover the Trade Goods" minor quest.

**Ceiling:** The ceiling is 15 feet high along the perimeter of this area, rising to a peak of 25 feet near the chimney.

**Treasure:** A crude stone altar against the far wall holds a jade carving of a dragon worth 250 gp. The lizardfolk have smeared reddish mud on the idol to make it look more like Zanathakla, but a cursory examination reveals the jade underneath.

## Area 3: Stirge Den

This cave of pesky stirges has been easily bypassed by the lizardfolk, but now gricks also lurk inside, making it difficult for the characters to descend deeper into Tulkau Shayn.

**Tactical Encounter:** "Stirge Chamber," page 104.

## Area 4: Artifact Cave

Zanathakla and the lizardfolk keep the evidence of the Alabaster City in this side cave, which is 50 feet above the main cave floor and accessed by way of the wooden walkway. The artifacts include several chunks of alabaster masonry and stonework: cornices, column sections, and so on. Dozens of ceramic urns and pots litter the room, all painted in a distinctive zigzag pattern.

**When the PCs enter the cave, read:**

*Ceramics and chunks of alabaster stonework litter this room, and a map hangs on one wall. Made of pieces of parchment stuck together with tree sap, the map shows the jungle nearby. It's divided into sections based on natural features and shows several ruins. Many of the areas have red "X" shapes marking them. Only a few areas are not struck through.*

The large, patchwork jungle map created by Zanathakla shows civilized communities on the fringe of the jungle and Tulkau Shayn in the middle. Several sketches depict ruins, but almost all of these have "X" marks through them. More important for the characters, the jungle is divided into sections bounded by natural features such as rivers and mountain ridges. It should be obvious to the characters why most of the ruins sections are struck through—and what parts of the jungle Zanathakla and the lizardfolk haven't explored yet.

This map could be useful to the heroes if they're engaged in the "Discover the Alabaster City" quest. It doesn't tell them where to look for the Alabaster City, but it tells them something almost as useful: where not to look.

**Ceiling:** The ceiling is 10 feet high throughout this cave.

## Area 5: Approaching the Bottom

As the characters come closer to the bottom of the cave, Zanathakla becomes aware of their presence. She is careful and cunning, and waits until they reach this point in the cave complex to attack.

**Tactical Encounter:** "Zanathakla's Wrath," page 106.

## Area 6: Cave Floor

Zanathakla spends most of her time sleeping on the cave floor or examining particularly interesting objects discovered by the lizardfolk. Like all orium dragons, Zanathakla is keenly interested in uncovering the secrets of the past. In fact, her zeal has become an obsession, and she spends untold hours coiled up on the cave floor, dreaming of the day when she finds the Alabaster City, builds a new lair in the grandest building still standing, and has her servants bring her book after book full of ancient wisdom.

## Area 7: Treasure Cave

This chamber, level with the cave floor, is where Zanathakla has amassed a typical hoard for a young dragon. It's a good place for three level 7 treasure parcels: one magic item parcel and two parcels made up of art

### Expanding the Lair

As written, "Tulkau Shayn" is the first step on an adventure that could take the characters to the Alabaster City. As a story element, the cave is a receptacle for a useful clue: the map in the artifact cave (area 4). You can easily turn this lair into a complete adventure site in its own right by enlarging and extending the side chambers. One or more of them could connect to an extensive cave network, full of all the monsters, traps, hazards, and treasure you can manage.

objects and coins. Lizardfolk captured the coins from river merchants who explored too deep in the jungle, and recovered the art objects and the magic item from the ancient ruins they've found. The lizardfolk don't enter this chamber; it is for Zanathakla alone.

If the characters return the coins to the traders (part of the "Recover the Trade Goods" minor quest), the traders compensate them with a magic item of equal value, which is more difficult to sell and therefore less valuable to the traders.

**Ceiling:** The ceiling is 15 feet high throughout this area.

## Approaching the Cave

Getting to Tulkau Shayn is no easy task—the characters must journey across miles of trackless jungle to find the entrance to the deep cave. Each character can attempt up to two skill checks per day.

**Level:** 8 (XP 700).

**Complexity:** 2 (requires 6 successes before 3 failures).

**Primary Skills:** Endurance, Perception, Nature.

*Endurance (DC 14, or DC 8 if the group is under the effect of an Endure Elements ritual):* Select two characters in the group at random to make Endurance checks at the start of each day. They attempt to resist the effects of the oppressive heat and humidity, along with the general rigors of an overland hike through the wilderness. A failed check indicates that all members of the group grow weary and lose a healing surge, in addition to counting as 1 failure in the challenge. (If both characters fail their checks, all members of the group lose two healing surges and the characters gain 2 failures.)

*Perception (DC 14, or DC 8 if the characters have a map):* The character makes sure the group stays on course—or at least moves in a consistent direction. Success represents a relatively straight path through the jungle, and failure means the characters become lost or travel in circles. This skill can be used to gain a maximum of 2 successes per day.

*Nature (DC 14):* The jungle's many natural hazards—including quicksand pits, bogs, poisonous plants, and thorny undergrowth—can slow forward progress to a standstill. A successful Nature check maneuvers the characters around these hazards, while a failure represents delays as characters extricate themselves from the hazard and takes a longer path around it. This skill can be used to gain a maximum of 2 successes per day.

**Secondary Skills:** Streetwise.

*Streetwise (DC 14):* This check can be attempted only once, at the start of the skill challenge, while the characters are still in a civilized area. A character can try to secure a map to aid the party in locating Tulkau Shayn. Succeeding on this check does not count as a success in the challenge, but it reduces the DCs for subsequent Perception checks, as shown above.

**Success:** The characters reach the entrance of Tulkau Shayn. After the final successful skill check, put the characters on the edge of the tactical map of area 1 and start the "Cave Entrance" encounter (page 102).

**Failure:** The characters walk into a monster lair. Choose one of the entries on the table below or roll a d6 to generate a random result. After handling the monster encounter, the characters still haven't reached Tulkau Shayn. They must repeat the skill challenge as a complexity 1 test (worth 350 XP and requiring 4 successes before 3 failures) to get there. With another 3 failed checks, they become hopelessly lost and are unable to find Tulkau Shayn without first returning to their starting point. However, they might discover some other strange ruin or adventure site deep in the jungle—maybe the Alabaster City itself.

**JUNGLE ENCOUNTERS**

| d6 | Encounter |
|---|---|
| 1 | 3 grells (*MM* 144) |
| 2 | 2 macetail behemoths (*MM* 31) and 3 ogre savages (*MM* 199) |
| 3 | 2 bloodspike behemoths (*MM* 31) and 2 shambling mounds (*MM* 232) |
| 4 | 2 spectral panthers (*MM* 213) and 3 displacer beasts (*MM* 70) |
| 5 | 3 trolls (*MM* 254) and 2 bog hags (*MM* 150) |
| 6 | 1 berbalang (*MM* 34) |

### The Alabaster City

The Alabaster City can have whatever traits work for your game, or it can be replaced with a different location you want the characters to go to next. Here are a few possible story hooks for the Alabaster City.

- Once ruled by rakshasa barons, the Alabaster City served as a library for dark lore and a site of ritual sacrifices. Ghosts of those slain still haunt the forgotten city, seeking those who can destroy their former captors.
- The Alabaster City fell into a giant sinkhole long ago and was covered over by the boughs of enormous trees. The great city is now inhabited only by ignorant troglodytes. They dwell amid the smashed alabaster ruins and have destroyed many of the tomes held within, burning them for warmth.
- The land where the Alabaster City lies is part of a worldfall (see *Manual of the Planes*, page 34) that links the world and the Feywild. When the Feywild's connection to the site is strong, the city becomes covered in vegetation and dangerous creatures spill over. The periods of Feywild influence last only a brief time, but make the city uninhabitable by civilized creatures.

JASON A. ENGLE

# Cave Entrance

**Encounter Level 6 (1,450 XP)**

## Setup

**1 greenscale marsh mystic** (M)
**2 blackscale bruisers** (B)
**4 greenscale hunters** (H)

The characters emerge from the jungle at the edge of a small clearing and find the entrance to Tulkau Shayn, but they must contend with lizardfolk guardians determined to drive them off.

**When the PCs achieve the final success on the skill challenge to reach Tulkau Shayn, read:**
*The jungle canopy opens up as you enter a clearing. You see a massive pit dead ahead. An outcropping of rock on the pit's edge looks vaguely like a carnivore's teeth.*

**Perception Check**
**DC 14** *You spot a crest—like something you'd see on a reptile's head—over the edge of the pit for a brief moment, but then it's gone.*

**When the PCs reach the edge of the pit, read:**
*Beyond the edge of the pit, you see a great cave that expands outward the deeper it goes. A wooden walkway attached to the cave walls spirals downward. You can see only a short way down before the cave becomes dark.*

The lizardfolk are hidden just behind the edge of the pit, standing on the wooden platform when the encounter starts. It's possible the characters are hiding at the edge of the jungle. The lizardfolk guards are ready but not alert (*DMG* 36).

If both sides are trying to be sneaky, determine surprise:

- The character who has the lowest Stealth modifier makes a Stealth check against the bruisers' passive Perception check of 19.
- The lizardfolk make one Stealth check (using a +4 bonus) against the passive Perception checks of the party.
- If one group noticed the other one and wasn't noticed at the same time, that first group has surprise. Otherwise, no one has surprise.

**Greenscale Marsh Mystic (M)** **Level 6 Controller (Leader)**
Medium natural humanoid (reptile) XP 250

**Initiative** +4 **Senses** Perception +7
**Marsh Blessing (Healing)** aura 5; each ally that starts his or her turn in the aura regains 3 hit points.
**HP** 70; **Bloodied** 35
**AC** 19; **Fortitude** 15, **Reflex** 14, **Will** 19
**Speed** 6 (swamp walk)

⊕ **Spear** (standard; at-will) ✦ **Weapon**
+7 vs. AC; 1d8 + 2 damage.

**Swamp's Grasp** (standard; encounter) ✦ **Zone**
Area burst 2 within 10; +9 vs. Reflex; the target is immobilized (save ends). The zone is difficult terrain until the end of the encounter.

**Bog Cloud** (standard; recharge ⚄ ⚅) ✦ **Poison**
Area burst 2 within 10; +9 vs. Fortitude; 2d8 + 4 poison damage, and the target is dazed until the end of the marsh mystic's next turn.

**Alignment** Unaligned **Languages** Draconic
**Skills** Athletics +10, Nature +12

| | | |
|---|---|---|
| **Str** 15 (+5) | **Dex** 13 (+4) | **Wis** 19 (+7) |
| **Con** 14 (+5) | **Int** 10 (+3) | **Cha** 12 (+4) |

**Equipment** spear, bone breastplate

**2 Blackscale Bruisers (B)** **Level 6 Brute**
Large natural humanoid (reptile) XP 250 each

**Initiative** +6 **Senses** Perception +9
**HP** 86; **Bloodied** 43
**AC** 18; **Fortitude** 19, **Reflex** 16, **Will** 14
**Speed** 8 (swamp walk)

⊕ **Greatclub** (standard; at-will) ✦ **Weapon**
Reach 2; +9 vs. AC; 1d10 + 6 damage, and the target is pushed 1 square.

**Tail Slap** (standard; at-will)
+7 vs. Reflex; 1d8 + 6 damage, and the target is knocked prone.

**Alignment** Unaligned **Languages** Draconic
**Skills** Athletics +14

| | | |
|---|---|---|
| **Str** 22 (+9) | **Dex** 16 (+6) | **Wis** 12 (+4) |
| **Con** 16 (+6) | **Int** 5 (+0) | **Cha** 6 (+1) |

**Equipment** greatclub

**4 Greenscale Hunters (H)** **Level 4 Skirmisher**
Medium natural humanoid (reptile) XP 175 each

**Initiative** +6 **Senses** Perception +8
**HP** 54; **Bloodied** 27
**AC** 17; **Fortitude** 15, **Reflex** 14, **Will** 13
**Speed** 6 (swamp walk)

⊕ **Spear** (standard; at-will) ✦ **Weapon**
+9 vs. AC; 1d8 + 3 damage.

**Sidestep Attack** (standard; at-will)
The lizardfolk shifts 1 square and makes a melee basic attack.

**Alignment** Unaligned **Languages** Draconic
**Skills** Athletics +10, Nature +8

| | | |
|---|---|---|
| **Str** 17 (+5) | **Dex** 15 (+4) | **Wis** 12 (+3) |
| **Con** 14 (+4) | **Int** 8 (+1) | **Cha** 8 (+1) |

**Equipment** light shield, spear

## Tactics

The lizardfolk fight with tenacity; they're on their home turf, and they fear disappointing Zanathakla far more than they fear the adventurers.

The marsh mystic uses *swamp's grasp* as soon as it can, trying to lock down as many enemies as possible. Next it puts a *bog cloud* atop the area of *swamp's grasp* in the second round, then trails behind the hunters and bruisers so it can heal them.

The blackscale bruisers charge into battle, using their greatclub attacks to keep melee combatants far enough away to avoid counterattacks. Remember that they regain 3 hit points if they start their turns within 5 squares of the marsh mystic.

The greenscale hunters maneuver for flanking and combat advantage with *sidestep attack* as often as they can, and they're particularly alert for chances to attack characters who have been knocked prone by the bruisers. They have swamp walk, so they can move through the *swamp's grasp* area, but they aren't immune to poison, so they avoid the marsh mystic's *bog cloud*.

## Features of the Area

**Illumination:** Bright light during the daytime, or dim light at night.

**Platform:** The area where most of the monsters are lurking is 5 feet below ground level. It takes 2 squares of movement to get from the platform to the clearing.

**Walkway:** The gently sloping walkway that trails downward from the platform is difficult terrain. The path is 5 feet wide (meaning that Large creatures must squeeze to move along it).

**Cave:** It's a 200-foot fall to the cave floor (20d10 falling damage), which is almost certainly fatal for anyone in this encounter. But in addition to the saving throw any creature receives if it's pushed, pulled, or slid off an edge, a creature that falls down the pit can make an Athletics check (DC 15) to grab onto the wooden walkway on the way down (as though it were falling while climbing). If the creature succeeds on the check, it takes 3d10 falling damage and lands on the wooden walkway 30 feet below the lip of the cave entrance. It takes 12 squares of movement upward along the walkway to reach the top of the cave.

### Falling Creatures

The precarious dropoff in this encounter is dangerous, and the blackscale bruisers have a power that pushes. Let the characters know this early by having a blackscale knock back a character who isn't near the edge. Treat that event as a warning to the characters; anyone who goes close to the edge after that is a fair target.

After a creature falls and catches itself, it takes more than one move action for that creature to return to the top of the pit. For the lizardfolk, you can remove the monster from the map (and not tell the players that it caught itself), then bring it back after skipping one of its turns.

TULKAU SHAYN

**Brambles:** The large areas of brambles bordering the jungle to the southwest and the east are difficult terrain.

**Rocks:** The rock outcropping next to the slope on the northern end of the pit is an area of difficult terrain.

**Cave Walls:** The walls of the cave near the top of the opening are relatively easy to climb, requiring a DC 10 Athletics check.

## Conclusion

If the characters engage in the time-honored tradition of throwing objects (especially torches and sunrods) down into the cave, they don't see Zanathakla, who is curled up below the wooden walkways. The characters do see the wooden walkway spiraling down into the cave and thus get a general idea of the cave's dimensions.

# Stirge Chamber

**Encounter Level 7 (1,700 XP)**

## Setup

**2 gricks** (G)
**2 dire stirges** (D)
**2 cave stirge swarms** (S)

The jungles around Tulkau Shayn are infested with stirges and other flying beasts. Some of these creatures enter the chambers within the great cave by traveling through the smaller openings and chimneys that reach to the surface. When Zanathakla and the lizardfolk first moved into the cave, they tried to eradicate the dangerous pests in the stirge chamber to no avail. When they killed a group of them, another would take their place. Now the lizardfolk bypass the danger by smearing a pungent salve on themselves when they plan to pass by the chamber. The salve, which smells like dung mixed with rotten eggs (and that might be what it's made of), covers their scent and allows them to pass without attracting the stirges.

**When the PCs approach the pots filled with the smelly salve, read:**

*A pair of pots sit on each side of the walkway just ahead of an opening on the north wall. A makeshift sconce with a single torch hangs over the pot closest to the cave wall. Even from a distance, you can smell that something rancid is in those pots.*

**Nature Check**
**DC 16** *After examining the contents of the pots, you figure out that it is some sort of scent-blocking salve used by lizardfolk hunters.*

If the characters stop and rub the salve on themselves, they can pass the cave without causing the stirges to immediately attack. However, a new threat has recently moved into the caves. A pair of gricks now prowl the chamber, attacking any creature attempting to pass. If the gricks bloody a character, the scent of blood draws the stirges, which then join the fight.

**2 Gricks (G)** **Level 7 Brute**
Medium aberrant beast XP 300 each

**Initiative** +4 **Senses** Perception +10; darkvision
**HP** 96; **Bloodied** 48
**AC** 19; **Fortitude** 19, **Reflex** 14, **Will** 15
**Resist** 5 against effects that target AC
**Speed** 6, climb 4

⨺ **Tentacle Rake** (standard; at-will)
+10 vs. AC; 2d6 + 4 damage, and ongoing 5 damage (save ends).

**Expert Flanker**
A grick gains a +2 bonus to attack rolls against an enemy it is flanking.

**Alignment** Unaligned **Languages** –
**Skills** Endurance +11, Stealth +9

| | | |
|---|---|---|
| **Str** 18 (+7) | **Dex** 13 (+4) | **Wis** 14 (+5) |
| **Con** 16 (+6) | **Int** 2 (-1) | **Cha** 7 (+1) |

**2 Dire Stirges (D)** **Level 7 Lurker**
Small natural beast XP 300 each

**Initiative** +10 **Senses** Perception +3; darkvision
**HP** 60; **Bloodied** 30
**AC** 21; **Fortitude** 17, **Reflex** 19, **Will** 16; see also *bite*
**Speed** 2, fly 6 (hover)

⨺ **Bite** (standard; at-will)
+12 vs. AC; 1d6 damage, and the target is grabbed and takes ongoing 10 damage until the grab ends. A dire stirge doesn't make attack rolls while grabbing a target and gains a +5 bonus to its AC and Reflex.

**Alignment** Unaligned **Languages** –
**Skills** Stealth +11

| | | |
|---|---|---|
| **Str** 10 (+3) | **Dex** 16 (+6) | **Wis** 10 (+3) |
| **Con** 12 (+4) | **Int** 1 (-2) | **Cha** 4 (+0) |

**2 Cave Stirge Swarms (S)** **Level 6 Brute**
Medium natural beast (swarm) XP 250 each

**Initiative** +6 **Senses** Perception +7; darkvision
**Swarm Attack** aura 1; each enemy that starts its turn within the aura takes 5 damage.
**HP** 84; **Bloodied** 42
**AC** 18; **Fortitude** 15, **Reflex** 16, **Will** 17
**Resist** half damage from melee and ranged attacks; **Vulnerable** 10 against close and area attacks
**Speed** 2, fly 6 (hover)

⨺ **Bloodsucking Swarm** (standard; at-will)
+9 vs. AC; 1d8 + 4 damage, and ongoing 5 damage (save ends).

**Alignment** Unaligned **Languages** –
**Skills** Stealth +11

| | | |
|---|---|---|
| **Str** 8 (+2) | **Dex** 16 (+6) | **Wis** 19 (+7) |
| **Con** 14 (+5) | **Int** 1 (-2) | **Cha** 4 (+0) |

## Tactics

Simple hunters, the creatures that issue forth from this chamber use straightforward tactics as they try to claim their next meal.

When the characters enter the side chamber or travel along the walkway to the midpoint between the two entrances, the gricks attack. Skilled hunters, they attempt to find a soft target, flank that target, and fell it before moving on to the next. The gricks know the deep cave is dangerous, and they try not to come too close to the edge. They also attempt to bull rush (+10 vs. Fortitude) creatures that stand on the edge.

The stirges latch onto the closest creature until that creature is dead or has escaped.

The cave stirge swarms flutter in a position where they can deal damage to the most enemies. If enemies are not clustered together, a swarm usually stays near a dire stirge that has grabbed a creature, keeping the grabbed enemy in its *swarm attack* aura.

The stirges and the swarms are not intelligent, but have enough of a survival instinct to flee into the two narrow tunnels to the north if they are reduced to one-quarter or fewer of their hit points.

## Features of the Area

**Illumination:** Darkness. The characters can light the torch above the pot of salve, providing bright light in a 5-square radius.

**Walkway:** The gently sloping walkway along the southern edge of this area is difficult terrain. From here to the bottom of the cave, the path is 10 feet wide.

**Rubble and Guano:** Large areas of rubble are mixed with bat and stirge guano in the cave. These squares are difficult terrain.

### BATS!

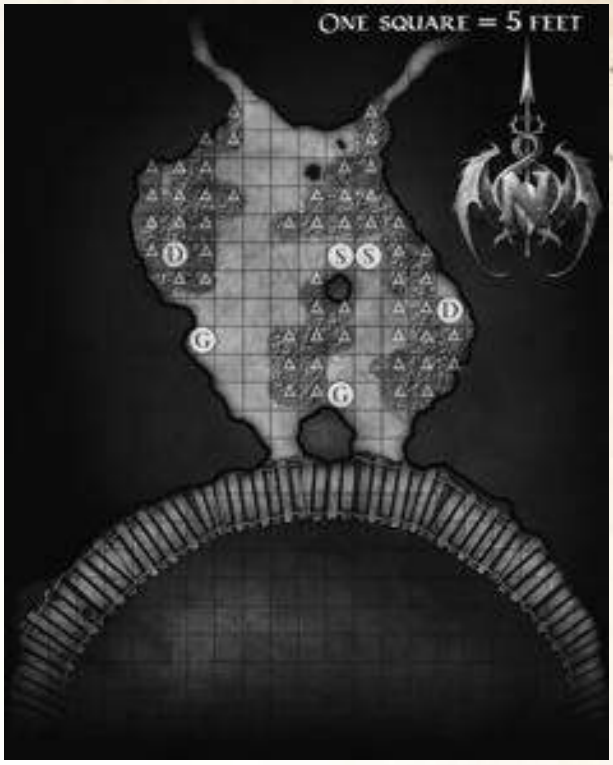
Dozens, possibly hundreds, of bats live in this cave and try to avoid the dangerous stirges and gricks that have moved into their territory. The sounds of combat or the intrusion of bright light startles them. You can use these bats to add some variety to the encounter.

Create a 4-square-by-4-square area of bats along the north wall of the chamber at the end of the first round in which an attack is made or a bright light hits the back of the cave. At the end of each round, determine whether the bats move and what effect they have. Roll separately for movement and behavior, or choose the bats' behavior. The bats don't take sides, and often have both characters and monsters within the squares they occupy.

| d6 | Move | Behavior |
|---|---|---|
| 1-2 | 0 | Swarm creatures (creatures in squares of bats take a -2 penalty to defenses) |
| 3-4 | 3 | Cloud vision (creatures in squares of bats gain concealment) |
| 5-6 | 6 | Impede movement (squares of bats require 1 extra square to move into) |

You'll also need to decide how the bats are affected by powers used in their area (especially burst or blast powers). For instance, if a character uses *fireball* on the area, you might shrink the area of bats to 2 squares on a side or eliminate it entirely.

**Salve (Optional Rule):** Creatures wearing the pungent salve from the pots outside the cave are unaffected by the bats.



TULKAU SHAYN

**Cave:** As in the previous encounter, it's possible a monster might be pushed off the edge of the walkway. In addition to the saving throw any creature receives if it's pushed, pulled, or slid off an edge, a creature that falls down the pit can make an Athletics check (DC 15) to grab onto the wooden walkway on the way down (as though it were falling while climbing). If the creature succeeds on the check, it takes 3d10 falling damage and lands on the wooden walkway 30 feet below. It takes 12 squares of movement upward along the walkway to get back to the location of the stirge lair. A creature that fails the Athletics check falls 80 feet (and takes 8d10 falling damage).

**Narrow Tunnels:** The passages leading northwest and northeast away from the stirge chamber are only large enough for the stirges and the swarms to negotiate. The characters and the gricks cannot move through them, not even by squeezing.

## Conclusion

Once they have made it past the stirge chamber, the characters are free to make their way toward the bottom, where Zanathakla lies in wait. They might stop off in area 4 (see page 99) before moving all the way to the cave floor.

# Zanathakla's Wrath

**Encounter Level 9 (2,150 XP)**

## Setup

**Zanathakla, young orium dragon** (Z)
**2 greenscale darters** (D)

As the characters descend into Tulkau Shayn, they attract the ire of Zanathakla, the orium dragon who makes her lair here. They battle Zanathakla while perched on increasingly unstable platforms.

**When the characters descend to the 60-foot-high platform, read:**
*A series of wooden platforms has been affixed to the inside walls of the cave with pegs and wooden beams. Shallow flights of stairs connect the platforms, making a spiraling pathway down into the darkness.*

**Perception Check**
**DC 21** *There are alcoves in the rock wall on the far side of the cave, and you can see a twitch of movement in them. There's definitely something alive in there.*

Under ordinary circumstances, there's no way the characters can sneak down to the alcoves or the cave floor. The wooden platforms creak loudly, and the characters are silhouetted against the open sky above.

The characters can't see Zanathakla. She remains on the periphery of the cave floor, where the platforms block the heroes from getting a look at her even if they have a powerful light source.

The battle begins when one of two events occurs: A character heads down the stairs from the 60-foot-high platform, or a character spots the creatures in the alcoves to the south (the greenscale darters) and attacks them. Zanathakla flies up through the middle of the cave, lands on a platform, and breathes at the biggest cluster of enemies she can find.

| **Zanathakla (Z)** | **Level 9 Solo Soldier** |
|---|---|
| Young orium dragon | |
| Large natural magical beast (dragon) | XP 2,000 |
| **Initiative** +9 | **Senses** Perception +9; darkvision |
| **HP** 392; **Bloodied** 196; see also *bloodied breath* | |
| **AC** 25; **Fortitude** 23, **Reflex** 21, **Will** 20 | |
| **Resist** 15 acid | |
| **Saving Throws** +5 | |
| **Speed** 6, fly 8 (hover), overland flight 12 | |
| **Action Points** 2 | |
| ⨺ **Bite** (standard; at-will) ✦ **Acid** | |
| Reach 2; +16 vs. AC; 1d10 + 6 damage plus 1d6 acid damage. | |
| ⨺ **Claw** (standard; at-will) | |
| Reach 2; +16 vs. AC; 1d8 + 6 damage, and the target is marked until the end of the dragon's next turn. | |
| ⨺ **Stone Rend** (standard; usable only while a wall is within reach; at-will) | |
| Zanathakla tears stones from the walls and throws them: ranged 10; +14 vs. AC; 2d6 + 5 damage. | |
| ⨺ / ⨺ **Draconic Fury** (standard; at-will) | |
| Reach 2; Zanathakla makes two claw attacks and one bite attack, or makes one bite attack and one *stone rend* attack. | |
| ⨺ **Breath Weapon** (standard; recharges when one of Zanathakla's vaporous spirits is reduced to 0 hit points) ✦ **Acid** | |
| Close blast 5; +14 vs. Fortitude; 2d8 + 4 acid damage, and a Zanathakla vaporous serpent minion (see below) appears in any single unoccupied square in the blast. It acts just after the dragon in the initiative order. | |
| ⨺ **Bloodied Breath** (free, when first bloodied; encounter) | |
| *Breath weapon* recharges, and Zanathakla uses it. | |
| ⨺ **Frightful Presence** (standard; encounter) ✦ **Fear** | |
| Close burst 5; targets enemies; +14 vs. Will; the target is stunned until the end of Zanathakla's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends). | |
| **Alignment** Unaligned | **Languages** Common, Draconic |
| **Skills** History +10, Insight +9, Intimidate +11 | |
| **Str** 21 (+9) | **Dex** 17 (+7) **Wis** 11 (+4) |
| **Con** 18 (+8) | **Int** 12 (+5) **Cha** 15 (+6) |

| **Zanathakla Vaporous Serpent** | **Level 9 Minion Brute** |
|---|---|
| Medium elemental beast | XP – |
| **Initiative** as dragon | **Senses** Perception +1 |
| **HP** 1; a missed attack never damages a minion. | |
| **AC** 21; **Fortitude** 20, **Reflex** 19, **Will** 18 | |
| **Resist** 15 acid | |
| **Speed** 6, fly 4 | |
| ⨺ **Bite** (standard; at-will) ✦ **Acid** | |
| +13 vs. AC; 10 acid damage. | |
| **Alignment** Unaligned | **Languages** – |
| **Str** 17 (+7) | **Dex** 10 (+4) **Wis** 4 (+1) |
| **Con** 12 (+5) | **Int** 4 (+1) **Cha** 4 (+1) |

| 2 Greenscale Darters (D) | Level 5 Lurker |
|---|---|
| Medium natural humanoid (reptile) | XP 200 each |

**Initiative** +10 **Senses** Perception +9
**HP** 50; **Bloodied** 25
**AC** 18; **Fortitude** 14, **Reflex** 17, **Will** 14
**Speed** 6 (swamp walk)

⨁ **Club** (standard; at-will) ✦ **Weapon**
+10 vs. AC; 1d6 + 1 damage.

⤙ **Blowgun** (standard; at-will) ✦ **Poison, Weapon**
Loading the blowgun takes a minor action; ranged 6/12; +10 vs. AC; 1 damage, and the greenscale darter makes a secondary attack against the same target. *Secondary Attack:* +8 vs Fortitude; the target takes ongoing 5 poison damage and is slowed (save ends both).

**Sniper**
A hidden lizardfolk darter that misses with a ranged attack remains hidden.

**Alignment** Unaligned **Languages** Draconic
**Skills** Athletics +8, Stealth +11

| | | |
|---|---|---|
| **Str** 13 (+3) | **Dex** 18 (+6) | **Wis** 15 (+4) |
| **Con** 14 (+4) | **Int** 8 (+1) | **Cha** 8 (+1) |

**Equipment** club, blowgun with 20 poisoned darts

## Tactics

Part of the challenge for the characters is the acid-damaged platforms along the cave walls, so make the monsters move even when they don't need to. That will entice the characters to run—and eventually jump—from platform to platform.

Zanathakla prefers to perch on the platform either ahead of or behind the characters, then breathe her corrosive breath. She's surprised by the damage to the platforms, but she quickly realizes what an advantage it is, and she's proud enough to taunt characters who are standing on a damaged platform. When one of her vaporous serpents appears, she sends it along the platforms to engage the characters in melee. (Unlike ordinary vaporous serpents, a serpent created by Zanathakla's breath has a fly speed.)

Zanathakla fights to the death.

The greenscale darters stay in their alcoves as long as possible, then retreat (either to their alcoves or to the ground below) once they see a platform collapse. The darters try to ascend and escape into the jungle when Zanathakla dies, and they surrender if they can't escape.

## Features of the Area

**Illumination:** Darkness.

**Floor:** The cave floor is difficult terrain—a jumble of rocks and bones from Zanathakla's meals or sacrificial victims thrown into the pit in ancient times.

**Stairs:** The stairs are difficult terrain for a creature ascending them, but normal terrain for a creature descending.

**Platforms:** Each section of platform is marked with its elevation above the cave floor. If a creature is pushed, pulled, or slid off a platform, it takes 1d10 falling damage per 10 feet as normal.

Zanathakla's corrosive breath weakens the pegs holding the platforms to the wall or to other sections of platform. Each section of platform or staircase (marked off with dashed lines on the map) can withstand Zanathakla's breath weapon twice before collapsing.

Each platform or staircase follows the same pattern as it is hit multiple times.

1. The wood visibly weakens.
2. The platform or staircase begins to sway and lurch. It's now challenging terrain, requiring a DC 14 Acrobatics check to cross. A creature that fails the check falls prone in the first space it tries to move into.
3. The third hit causes the platform or staircase to fall apart, and any creature standing on it plummets to the cave floor and takes falling damage. (The height of a fall from a staircase depends on which end of the staircase the creature is closer to when it collapses.)

*Getting Back Up:* A creature can get back to a platform by climbing. The sloping walls make the climb tough, requiring a DC 20 Athletics check.

## Conclusion

When Zanathakla is defeated, the characters are free to explore Tulkau Shayn and have unfettered access to the other locales described in the overview (pages 98-99)—unless you decide to make this lair into a full-blown adventure site, in which case their adventure is just beginning.

### Dangerous Platforms

The unstable platforms in this encounter make it exciting. You want the characters to have an inkling of what's going to happen, so make sure you describe the effect of Zanathakla's *breath weapon* on the platforms, and track how many times Zanathakla's *breath weapon* touches each part of the structure. The *breath weapon* is a close blast 5, so Zanathakla will often hit multiple platforms and staircases with her breath each time she uses it.

**Stunts:** Also keep the rules for Acrobatic stunts in mind. Though the base DC is normally 15, adjust it as needed to make this encounter fun. The standard DCs for 7th level are 8 (easy), 14 (moderate), and 19 (hard). Describe various hanging ropes, fortuitous handholds, and other objects the characters can use to move quickly from one section of the scaffolding to another. The rubble at the bottom of the pit can contain handy objects—such as grappling hooks—that a character could use after being removed from the fight by a fall.

# MINES OF BOLMARZH

**Adamantine dragon lair for five 13th-level adventurers**

In the deeps of the Underdark lie the long-abandoned duergar mines of Bolmarzh. These are now the domain of the adamantine dragon Vanathia, who rules over the grimlocks and gargoyles infesting the chambers and passages of the old gray dwarf delving.

## Background

**History DC 11:** A few years ago, a young adamantine dragon named Vanathia discovered the old duergar mine while searching for a suitable lair. Vanathia settled into her new home and grew to adulthood in the hidden mines.

In recent months, she has plundered several caravans and demanded tribute from nearby villages in the surface lands, creating a serious problem for the local merchants and townsfolk. The call has gone out for someone to best the dragon before her depredations cause utter ruin.

**History DC 18:** Decades ago, a clan of duergar discovered a great chasm in the Underdark. Its walls glittered with veins of gold, and the gray dwarves quickly established a mining outpost they called Bolmarzh—in their tongue, "Secret Treasure." For years, the duergar worked the hidden mine, carving out living spaces for themselves in the surrounding caverns. Eventually, a large and fierce tribe of grimlocks discovered the duergar outpost. The grimlocks pillaged Bolmarzh and erected a crude shrine to the dark god Torog, in celebration of their victory over the gray dwarves. The outpost lay abandoned for a long time, visited occasionally by grimlocks that came to worship at their shrine.

## Environment

The old duergar stronghold alternates between finished chambers and natural tunnels. Chambers that have "straight" walls are at least partially finished, with flagstone floors and walls of dressed stone blocks. Natural caverns have rough rock walls, but the floors have been smoothed and leveled. The exception is the floor of the Great Chasm (area 5), which is littered with heaps of broken rock from the duergar mining.

Although most of the monsters in the mines don't need light, Vanathia prefers a little illumination; several *everburning torches* are located in the lair at the locations indicated on the map. The sound of falling water echoes loudly throughout most of the complex, so Perception checks made to listen take a -5 penalty everywhere except areas 1, 2, and 3.

Vanathia uses grimlocks of the tribe she defeated as her guards and servants. She also commands the loyalties of a large clutch of gargoyles that inhabit the upper reaches of the chasm. At any given time, several small parties of grimlocks and gargoyles are out hunting in the caves and passages surrounding the old mines. (In fact, it might be an encounter with one of these raiding parties that reveals Bolmarzh's existence to a group of adventurers.) In addition, several monsters—a galeb duhr, a beholder, and others lurking in the far corners of the mines—are under the dragon's dominion and serve her loyally.

### Entering the Mine

The old duergar mines can be accessed from below or from above. Surface explorers are likely to discover the doors in area 1, which lie in a deep crevice or alcove of an otherwise unremarkable cavern. The cavern outside the doors of Bolmarzh might lie beneath another dungeon or connect through a series of natural caverns to a lonely mountainside

### VANATHIA, THE BLACK STORM

The mines of Bolmarzh offered Vanathia a strong, secret, defensible home, while the upper reaches of the adjoining chasm provided her with easy access to passages leading up to the abundant hunting of the surface world. In time, the grimlocks discovered the dragon's presence and launched a furious attack to drive Vanathia out of her home. However, the dragon repelled their assault, followed the grimlocks back to their own lair, and slew their chieftain. Vanathia demanded the tribe's fealty, and the grimlocks yielded to her. The best warriors of the tribe must serve the dragon in her lair, doing her bidding. The grimlocks serve Vanathia grudgingly, but they dare not defy her—or disappoint her.

An adamantine dragon newly grown to adulthood, Vanathia is proud and ambitious. The draconic hunger to hoard items of value and to dominate lesser creatures burns brighter in her heart every day.

Vanathia is not cruel or malicious, but she is ruthless and quick to anger—any show of defiance provokes her into a furious attack. Intruders in her domain can expect no mercy, although supplicants who come bearing gifts might be given a chance to respectfully present their requests. Vanathia has a haughty, calculating demeanor, but she is a dragon of her word and sticks to any bargain she agrees to. Of course, that means she expects others to do the same. She hunts down and destroys anyone breaking their word to her.

cave. Vanathia's servants scour the nearby caverns and dungeons regularly, hunting game and gathering various edible fungi and lichens.

Travelers approaching from the deep Underdark are more likely to stumble across the southwest end of the Great Chasm and follow it up to the Lower Gate (area 8). Grimlocks and gargoyles in Vanathia's service roam the tunnels and caverns that connect the chasm to the deeper parts of the Underdark, patrolling against raids by other Underdark monsters.

This lair description assumes that the characters are approaching from the upper side (area 1).

The mines extend for several hundred yards to the southwest, following the chasm. Vanathia's lair occupies only part of the old excavations.

## Area 1: The Front Door

The old duergar-forged doors to the mines still stand. The doors are not locked or barred; the grimlocks go in and out frequently, and they've fallen out of the habit of securing the doors.

**When the PCs see the doors, read:**
*A deep alcove leading down from this cavern ends in a strong set of iron doors, covered in faded Dwarven runes. You can make out the distant sound of falling water from somewhere beyond.*

**If any PCs know Dwarven:**
*The doors read: "Herein lie the Halls of Bolmarzh. Death to those who enter uninvited."*

**Rusty Doors:** A character who makes a DC 23 Perception check realizes that the doors are no longer seated evenly on their posts, and they will scrape loudly over the stone when pulled open. This noise alerts the monsters in area 2 unless the characters lift the doors slightly while opening them or take other measures to open the doors quietly.

**Hidden Window:** A small spy-hole at the back of an alcove near area 2 (Perception DC 27 to notice) looks down on the door from about 15 feet overhead. No one is keeping watch at the spy-hole the first time the characters venture into this area.

## Area 2: The High Hall

This room once served as the banquet room and audience chamber for the duergar lord that ruled Bolmarzh. For Vanathia, it is a guardroom where grimlocks and gargoyles stand watch to intercept intruders. In addition, Vanathia is entertaining a small delegation of duergar visitors that are interested in working Bolmarzh's rich veins again. The dragon has instructed her minions to allow the gray dwarves to camp here while she considers their offer.

The doorways that connect this area with areas 1 and 4 open into the hall underneath the balcony; creatures moving into the room can't see anything on the balcony on their side of the room, although they could see across the room to the balcony on the far side.

A short passage from the balcony leads to a hidden window overlooking the doors in area 1. The window is about 1 foot square and 15 feet above the floor of area 1.

**Tactical Encounter:** "The High Hall," page 112.

**Development:** If the characters leave the mines and return later, Vanathia replaces slain guards with new ones (see the tactical encounter for more information).

## Area 3: Storerooms

**When the PCs enter the area, read:**
*These chambers look like old storerooms. The floors are littered with rank furs, gnawed bones, stone flakes, and other such detritus.*

**Development:** If Vanathia sends for more guards after the characters make their initial foray into the mines, twelve grimlock minions and three grimlock berserkers occupy these rooms.

## Area 4: The Smelter

Long ago, this chamber served as the center of the mining operation in the chasm. The remnants of the duergar excavations are still here.

**When the PCs enter the area, read:**
*A ramshackle old sluice box bisects this room, fed by a dark, swift stream that spills out of a crevice high on the north wall. A waterwheel stands at the front of the sluice, connected by rotting pulleys to a bellows and furnace, both of which have rusted away to junk. Below the sluice box, a small footbridge crosses the stream, which flows southward out of the cavern to the sound of a waterfall. East of the stream, a double door leads out of the room to the south.*

The stream is not deep; a character can wade it easily. The waterfall is in the portion of the stream south of area 4 and north of the pool in the end of the chasm. A character who makes a DC 18 Athletics check can ride out the waterfall (it's only a 20-foot drop) without incident. A character who fails this check takes 1d10 damage. In either case, the character ends up in the shallow pool on the other side of the waterfall.

**Secret Door:** A secret door (Perception DC 27 to notice) is set in the southeast corner of the room, leading into area 7.

## Area 5: The Great Chasm

This long rift is 300 feet high. A shallow stream meanders through it. Two bridges cross the stream and the rubble-covered terrain adjacent to it. The ledges that border the chasm are 60 feet above the lower surface. Characters who travel down the waterfall from area 4 and find themselves in the pool must scale one of the sides of the ledge (Athletics DC 15)

to reach the higher terrain. Staircases that descend toward the south are cut into the ledges, following the slope of the chasm as it contonues south and west.

The chasm continues off the far edge of the map, leading into more excavations and eventually connecting with passages in the deeper Underdark. (You can map out and populate this area as you see fit, if you want this area to extend beyond the immediate vicinity of Vanathia's lair.) In the roof over the higher reaches of the chasm, vertical chimneys wind another hundred feet or so to exits hidden in the steep hills that lie on the surface. The dragon can't fly through these passages, but she can climb them easily enough. (These chimneys are not depicted on the map; they serve only to provide Vanathia with a way of leaving the mines if she manages to escape.)

**Tactical Encounter:** "Chasm Battle," page 114.

## Area 6: Torog's Shrine

Off to the side of the chasm, 60 feet above the floor, is a cave that holds a small shrine dedicated to Torog. The grimlocks venerate the King that Crawls, although Vanathia could care less about the grimlock's religious observances. Before the dragon conquered them, the grimlocks occasionally raided the surface world for suitable sacrificial victims.

**When the PCs enter this area, read:**
*This chamber has a high, stalactite-covered roof 30 feet overhead. In the far end of the area stands a pair of twisted rock pillars fitted with rusty manacles; the south wall of the cave has been crudely chiseled into the image of a monstrous, eyeless face with a fanged maw and writhing tentacles. Humanoid bones—mostly skulls and crushed ribcages—litter the floor.*

**Tactical Encounter:** "Chasm Battle," page 114.

## Area 7: Secret Tunnel

The duergar built this tunnel to serve as an escape route in case some enemy seized the Lower Gate (area 8) and trapped them in the large southern chamber. The secret doors on either end are well hidden (Perception DC 27). The 5-foot-wide and 5-foot-high passageway between them is interrupted by staircases that descend from north to south. Vanathia knows about the secret tunnel, but she has never used it because it would be a difficult squeeze for her to get through it.

**When the PCs enter the area, read:**
*This is a low and cramped passageway. The stairs are covered with thick dust.*

## Area 8: The Lower Gate

The heart of the old duergar stronghold was the cavern that now serves as Vanathia's lair. Here, the miners lived in barracks-buildings. To protect their dwellings, the gray dwarves walled off the mouth of the cavern and built another strong gate, which now suits Vanathia quite well. The doors are not locked or barred, but hidden sentries keep watch inside.

**When the PCs enter this area, read:**
*The steps descending the chasm wall meet a much lower ledge here, only 10 feet above the chasm floor. To the south and west, the chasm continues off into darkness. To the east stands a double door of iron, at the top of a short flight of stairs.*

**Development:** If the characters leave the complex and return, the doors are barred (break DC 28) and several grimlock guards are posted here to defend the entry.

## Area 9: Vanathia's Lair

The duergar called this great cavern the Glimmervault, after the luminous crystals dotting its ceiling. It is so large that they were able to build free-standing buildings of thick stone blocks in this room to serve as the miners' barracks, their chieftain's home, and their chapel. Vanathia has knocked down most of the buildings to give her plenty of elbow room, but the stone footings remain.

The dragon keeps one of her loyal gargoyles close at hand at all times, to act as a messenger and major domo. Vanathia also has another ally in her lair—a galeb duhr that works slowly to shape and sculpt the lair to suit the adamantine dragon's whims. In exchange for its service as a guard, miner, and interior decorator, Vanathia allows the galeb duhr to feed on the rare crystals and rich veins found in the old duergar mines.

**Tactical Encounter:** "Vanathia's Lair," page 116.

## Area 10: Dragon's Hoard

This stone building once served as the personal quarters of the duergar chieftain of Bolmarzh. It is now Vanathia's private den, as well as the location of her hoard.

**When the PCs inspect the building, read:**
*Unlike the other buildings in this cavern, this one is mostly still intact. Inside the wide doorway, a great pile of silver and gold coins lies in the center of the room, with several eye-catching gems and pieces of jewelry carefully arranged around it.*

**Treasure:** Vanathia's hoard consists of a level 16 magic item, 6,000 gp, 22,000 sp, a sapphire-studded gold bracelet worth 800 gp, five diamonds worth 500 gp each, and a mithral goblet fashioned in the shape of dancing nymphs, worth 500 gp. This pile of valuables equals parcels 3 and 5 of a level 14 treasure.

JASON A. ENGLE

# The High Hall

**Encounter Level 14 (5,000 XP)**

## Setup

**2 gargoyle harriers** (G)
**2 duergar hellcallers** (D)
**4 grimlock ambushers** (A)

If the characters managed to open the door from area 1 silently, they surprise the monsters. The positions of the grimlocks and duergar on the map assume that the characters gain surprise. Otherwise, the noise of the old door squealing open alerts them. The grimlocks hide along the wall under the balcony to either side of the archway and surprise the characters with a sudden rush as soon as a character enters the room, while the duergar take cover behind the stalagmites. In either event, don't place the monsters on the map until the characters enter the room.

**When the PCs enter the room, read:**
*This chamber is a natural cavern improved by careful stonework, its floor paved with flagstones, and three of its four walls finished in plain stone blocks. The ceiling still has its glistening stalactites, and the wall to the south is made of pale white stone. A balcony circles the room about fifteen feet above the floor, and a couple of stone statues gaze down on the floor below. An old stone dais stands in the northern part of the room.*

**If the PCs surprise the monsters, read:**
*Several gray-skinned savages with eyeless faces crouch in scattered locations near the west wall of this rom. On the other side of the room, a pair of dwarflike creatures sit near a small, dimly glowing fire, conversing in their guttural language.*

Place the duergar and the grimlocks in the squares indicated, and resolve the surprise round.

**If the monsters surprise the PCs, read:**
*Several gray-skinned savages with eyeless faces and greataxes rush the archway, shrieking in battle fury. Behind them, a pair of dwarflike creatures with red-black skin and beards of stiff, rust-colored hair jump out from behind stalagmites and begin hurling quills plucked from their beards.*

Allow the characters Perception checks (DC 25) to detect the gargoyles for what they are. If the gargoyles go undetected, don't place them on the map. The gargoyles have combat advantage against the characters the first time the gargoyles act in the battle.

**2 Gargoyle Harriers (G)** **Level 11 Lurker**
Medium elemental humanoid (earth) XP 600 each

**Initiative** +13 **Senses** Perception +13; darkvision
**HP** 89; **Bloodied** 44
**AC** 27; **Fortitude** 23, **Reflex** 21, **Will** 21
**Immune** petrification
**Speed** 6, fly 8

⊕ **Claw** (standard; at-will)
+16 vs. AC; 2d6 + 6 damage.

↓ **Flyby Attack** (standard; recharges after using *stone form*)
The gargoyle flies up to 8 squares and makes a melee basic attack at any point during the move, without provoking an opportunity attack from the target. If the attack hits, the target is knocked prone.

**Stone Form** (standard; at-will)
The gargoyle becomes a statue and gains resist 25 to all damage, regeneration 3, and tremorsense 10. It loses all other senses and can take no actions in stone form other than reverting to its normal form (as a minor action).

**Alignment** Evil **Languages** Deep Speech, Primordial
**Skills** Stealth +13
**Str** 21 (+10) **Dex** 17 (+8) **Wis** 17 (+8)
**Con** 17 (+8) **Int** 9 (+4) **Cha** 17 (+8)

**2 Duergar Hellcallers (D)** **Level 12 Artillery**
Medium natural humanoid, dwarf (devil) XP 700 each

**Initiative** +10 **Senses** Perception +13; darkvision
**HP** 96; **Bloodied** 48
**AC** 24; **Fortitude** 23, **Reflex** 23, **Will** 25
**Resist** 10 fire, 10 poison
**Speed** 5

⊕ **Mace** (standard; at-will) ✦ **Weapon**
+19 vs. AC; 1d8 + 5 damage.

**Infernal Quills** (standard; at-will) ✦ **Fire, Poison**
Ranged 10; +19 vs. AC; 1d8 + 3 fire and poison damage, and the target takes ongoing 5 fire and poison damage and a -2 penalty to attack rolls (save ends both).

**Quick Quill Strike** (minor; encounter)
The duergar hellcaller makes an *infernal quills* attack.

**Asmodeus's Ruby Curse** (standard; encounter) ✦ **Fear, Psychic**
Close blast 5; targets enemies; +16 vs. Will; 3d8 + 5 psychic damage, and the duergar hellcaller slides the target to the nearest space outside the blast. This forced movement provokes opportunity attacks.

**Quill Storm** (standard; encounter) ✦ **Fire, Poison**
Area burst 2 within 10; +17 vs. Reflex; 1d8 fire and poison damage, and the target takes ongoing 10 fire and poison damage and a -2 penalty to attack rolls (save ends both).

**Devilish Sacrifice** (immediate interrupt, when an enemy makes a melee attack roll against the duergar hellcaller; encounter)
The hellcaller shifts to the nearest space beyond the triggering enemy's reach. A legion devil hellguard (*MM* 64) appears in the hellcaller's former space and becomes the target of the enemy's attack. The devil acts immediately after the hellcaller's initiative count.

**Alignment** Evil **Languages** Common, Deep Speech, Dwarven
**Skills** Arcana +11, Dungeoneering +13, Religion +11
**Str** 14 (+8) **Dex** 19 (+10) **Wis** 14 (+8)

| **Equipment** greataxe | |

## Tactics

The grimlock ambushers try to overwhelm the heroes with a quick rush. After that, they fight in a loose pack, so that two or three can use their *offensive shift* reaction at once when an enemy provokes it. The ambushers try to save a move action to shift away from enemies after attacking, so that enemies have to move up to attack them and provoke the *offensive shift* of their allies. The grimlocks happily mob any foes knocked prone by the gargoyles' attacks.

The gargoyles prefer *flyby attack*, beginning and ending each swoop on the balcony. They are patient and cunning foes, and they are willing to forego a turn of attacking to assume *stone form*. This act recharges *flyby attack*, so the gargoyles end up attacking every other round.

The duergar begin the battle by using *quill storm*, but only if they can catch at least two enemies in the burst. *Infernal quills* is their default attack. They try to hang back away from the melee, and they are quick to use *devilish sacrifice* or *Asmodeus's ruby curse* to keep enemies from closing on them. If necessary, they climb the stairs up to the balcony to stay out of easy melee reach. The duergar have no particular loyalty to Vanathia or their grimlock allies, and they don't hesitate to flee by any convenient exit once most of the dragon's servants have fallen.

## Features of the Area

**Illumination:** Glowing coals from the duergar campfire provide 5 squares of dim light.

**Ceiling:** The ceiling in this chamber is 30 feet above the floor (15 feet above the balcony).

**Balcony:** The room is ringed by a stone balcony 15 feet above the floor. The squares directly underneath the balcony are open, so creatures can move under the overhang. The overhang blocks line of sght and line of effect between creatures on the balcony and beneath it on the same side of the room.

**Iron Doors:** The iron double doors connecting to areas 1 and 4 are not locked. They have AC 5, Fortitude 10, Reflex 5, and 60 hit points.

**Stalagmites:** Stalagmites are difficult terrain. They provide cover to Medium or smaller creatures. Each stalagmite has AC 5, Reflex 5, Fortitude 10, and 40 hit points.

**Dais and Throne:** This square is difficult terrain. The throne provides cover to Medium or smaller creatures. The throne has AC 5, Reflex 5, Fortitude 10, and 20 hit points.

**Fire Pit:** The square containing these embers is difficult terrain. A creature that enters the fire pit or starts its turn there takes 5 fire damage.

**Spy-Hole Window:** The spy-hole offers superior cover against attacks from area 1.

## Development

If the characters leave the mines and return later, Vanathia sends for more grimlocks to serve as guards. Four grimlock berserkers and two additional gargoyle harriers are alert against future intrusions. The door leading to area 1 is barred (DC 28 to break it down), and one of the gargoyles is posted at the spy-hole to keep watch for intruders. Any duergar slain in this room are not replaced.

## Treasure

The duergar carry substantial wealth in their belt pouches: 25 pp, 300 gp, and a total of three fine emeralds worth 400 gp each. These valuables equal parcel 9 of a level 14 treasure.

# Chasm Battle

**Encounter Level 13 (4,800 XP)**

## Setup

**1 beholder eye of flame** (B)
**1 eidolon** (E)
**3 grimlock berserkers** (G)

The beholder and the grimlocks can see (or sense) the doors leading from areas 3 and 4 from their positions, and are also aware if anyone enters this area by coming down the waterfall, so it's unlikely that the characters can surprise them. If a character attempts to get into this area without attracting notice, allow the character a Stealth check (DC 27). On a success, the character has slipped through the door or into the pool unseen, but any subsequent movement puts the character in view of the monsters—without some means of staying unseen, the character is noticed.

**If the PCs enter this area through the doors in area 4, read:**
*You stand on a landing overlooking an illuminated chamber to the south and a rubble-strewn chasm leading off to the southwest. A steep dropoff separates the chamber from the floor of the chasm. In the distance, you can make out a wooden bridge that spans the chasm and the stream that runs through it.*

**If the PCs enter this area through the door leading from area 3, read:**
*Ahead of you is a wide ledge with a set of ascending stairs that frames one side of a huge chasm. You can see light beyond the top of the stairs to the northeast, and another torch to the south casts light on a wooden bridge that crosses the chasm.*

**If any PCs enter this area through the waterfall, read:**
*You find yourselves in a shallow pool looking south into a giant crevasse that continues as far as you can see. Overhead, a bulbous monster covered in chitinous plates of fiery red glares down at you, prepared to attack.*

**If the PCs move into area 6, read the text on page 110 and continue:**
*Three more of the eyeless savages you encountered earlier are stationed in various spots throughout the shrine. Although they can't possibly see you, each one turns in your direction and snarls as you come closer.*

Place the grimlocks and the beholder on the map. Allow the characters to attempt DC 23 Perception checks; if any character succeeds on this check, place the eidolon, too—the character realized that it was another creature. If all the characters fail these checks, mark the position of the eidolon, but don't acknowledge that it's another creature. Until the eidolon takes its first action, the characters mistake it for an idol of some kind.

**Beholder Eye of Flame (B)** — **Level 13 Elite Artillery**
Large aberrant magical beast — XP 1,600

**Initiative** +11 — **Senses** Perception +15; all-around vision, darkvision
**Eyes of the Beholder** aura 5; at the start of each enemy's turn, if that creature is within the aura and in the eye of flame's line of sight, the eye of flame uses one random *eye ray* power against that creature.
**HP** 204; **Bloodied** 102; see also *fiery burst*
**AC** 26; **Fortitude** 26, **Reflex** 27, **Will** 28
**Saving Throws** +2
**Speed** fly 6 (hover)
**Action Points** 1

⊕ **Bite** (standard; at-will)
+18 vs. AC; 2d6 damage.

**Central Eye** (minor; at-will)
Ranged 8; the target gains vulnerable 10 fire, and any attack that deals fire damage to the target also deals ongoing 5 fire damage (save ends both).

**Eye Rays** (standard; at-will) ✦ **see text**
The eye of flame can use up to two *eye ray* powers (chosen from the list below), at least one of which must be a *fire ray*. Each power must target a different creature. Using *eye rays* does not provoke opportunity attacks.
**1—Fire Ray (Fire):** Ranged 8; +17 vs. Reflex; 2d8 + 6 fire damage.
**2—Telekinesis Ray:** Ranged 8; +17 vs. Fortitude; the target slides 4 squares.
**3—Fear Ray (Fear):** Ranged 8; +17 vs. Will; the target moves its speed away from the eye of flame by the safest route possible and takes a -2 penalty to attack rolls (save ends).

**Fiery Burst** (when first bloodied and again when the eye of flame drops to 0 hit points) ✦ **Fire**
Close burst 2; +17 vs. Reflex; 2d8 + 6 fire damage.

**Alignment** Evil — **Languages** Deep Speech
**Str** 10 (+6) — **Dex** 20 (+11) — **Wis** 19 (+10)
**Con** 18 (+10) — **Int** 14 (+8) — **Cha** 23 (+12)

**3 Grimlock Berserkers (G)** — **Level 13 Brute**
Medium natural humanoid (blind) — XP 800 each

**Initiative** +7 — **Senses** Perception +8; blindsight 10
**HP** 156; **Bloodied** 78
**AC** 25; **Fortitude** 27, **Reflex** 22, **Will** 23
**Immune** gaze
**Speed** 6

⊕ **Greataxe** (standard; at-will) ✦ **Weapon**
+16 vs. AC; 1d12 + 6 damage (crit 2d12 + 18).

**Power Attack** (standard; requires greataxe; at-will) ✦ **Weapon**
+14 vs. AC; 1d12 + 12 damage (crit 2d12 + 24).

**Frenzied Attack** (standard; at-will)
The grimlock berserker makes two greataxe attacks against a bloodied enemy.

**Grimlock Rage**
When a grimlock berserker bloodies an enemy, it gains 10 temporary hit points.

**Alignment** Evil — **Languages** Common, Deep Speech
**Skills** Athletics +17, Endurance +14
**Str** 22 (+12) — **Dex** 12 (+7) — **Wis** 15 (+8)
**Con** 16 (+9) — **Int** 7 (+4) — **Cha** 9 (+5)
**Equipment** greataxe

| **Eidolon (E)** | **Level 13 Controller (Leader)** |
|---|---|
| Large natural animate (construct) | XP 800 |

**Initiative** +8 **Senses** Perception +9
**Fearless Followers** aura 5; each ally in the aura is immune to fear.
**HP** 132; **Bloodied** 66
**AC** 28; **Fortitude** 26, **Reflex** 22, **Will** 23
**Immune** disease, fear, sleep
**Speed** 5

⊕ **Slam** (standard; at-will)
Reach 2; +19 vs. AC; 2d8 + 6 damage.

↯ **Divine Retribution** (immediate reaction, when an enemy attacks the eidolon while *hallowed stance* is active; at-will) ✦ **Radiant**
Divine radiance strikes the creature that attacked the eidolon: ranged 20, +17 vs. Reflex; 2d8 + 5 radiant damage. *Miss:* Half damage. This attack does not provoke opportunity attacks.

↯ **Vengeful Flames** (immediate reaction, when an enemy kills one of the eidolon's allies in the eidolon's line of sight; at-will) ✦ **Fire**
Divine fire engulfs the enemy: ranged 20; +17 vs. Reflex; 1d8 +5 fire damage, and ongoing 5 fire (save ends). This attack does not provoke opportunity attacks.

**Hallowed Stance** (standard; at-will) ✦ **Radiant**
The eidolon assumes a meditative stance. Until the end of its next turn, the eidolon gains resist 20 to all damage, and all allies in its line of sight deal 1d8 extra radiant damage on their melee attacks. If the eidolon moves, the effect ends.

**Alignment** Unaligned **Languages** –

| | | |
|---|---|---|
| **Str** 22 (+12) | **Dex** 14 (+8) | **Wis** 16 (+9) |
| **Con** 20 (+11) | **Int** 7 (+4) | **Cha** 11 (+6) |

## Tactics

The grimlock berserkers prefer to hack their enemies to death with axes, but they are well aware of the opportunity the ledge over the chasm offers—they begin the battle with a charge and a bull rush against any enemies next to the edge (+13 vs. Fortitude, counting the charge bonus). The grimlocks use *power attack* with abandon unless they have trouble scoring hits. The grimlocks fight to the death.

The eidolon remains in the shrine, assuming its *hallowed stance* (which grants its allies 1d8 extra radiant damage on their melee attacks). It remains in *hallowed stance* until one of the grimlocks falls, using *divine retribution* if attacked or *vengeful flames* when its allies fall. After the first grimlock falls, the eidolon abandons its stance and wades into battle, pummeling enemies. The eidolon fights until it is destroyed.

The beholder hovers out over the chasm, staying out of melee reach of enemies on the ledge and 10 to 20 feet above the level of the ledge. It concentrates its *central eye* and *fire ray* on enemies who are capable of hitting it at range, and it uses its *telekinesis ray* to hurl other foes into the chasm. If the rest of the monsters have been defeated, the beholder retreats once it becomes bloodied, flying up into the higher reaches of the chasm until it is safely out of sight.

## Features of the Area

**Illumination:** *Everburning torches* (shown on the map) provide bright light to a radius of 5 squares.

**Waterfall Noise:** The sound of the waterfall spilling out into the chasm is loud here. Perception checks made to listen for sounds take a –5 penalty.

**Ceiling:** The ceiling of the chasm (area 5) is about 200 feet above the ledge. The ceiling of the shrine (area 6) is 20 feet high.

**The Chasm:** The ledge outside area 6 is 60 feet above the chasm floor. Any creature that falls off the ledge takes 6d10 falling damage. A creature forced over the edge by a push, pull, or slide effect is allowed a saving throw before going over the edge; on a success, the creature falls prone at the edge. The chasm walls are rough (Athletics DC 15 to climb).

**Bridges:** The bridges are rickety wooden spans that creak under any amount of weight. Small creatures can move across a bridge without difficulty. Medium creatures treat a bridge as difficult terrain. Large creatures must attempt a DC 15 Acrobatics check to cross. A bridge has AC 4, Fortitude 12, Reflex 4, and 20 hit points.

**Debris:** The chasm floor is littered with broken rock and heavy rubble. It counts as difficult terrain.

**Stream:** The stream is only 2 feet deep, but the bottom is slippery; it counts as difficult terrain.

**Stalagmites:** Stalagmites are difficult terrain. They provide cover to Medium or smaller creatures. Each stalagmite has AC 5, Reflex 5, Fortitude 10, and 40 hit points.

**Doors:** The iron doors connecting with areas 3 and 4 are not locked. They have AC 5, Fortitude 10, Reflex 5, and 60 hit points.

## Development

If the beholder survives the fight, it hides near the top of the chasm until it recovers. If the characters leave the mines without slaying the dragon and return later, the beholder is back at its post, guarding the bridges.

# Vanathia's Lair

**Encounter Level 15 (6,200 XP)**

## Setup

**1 galeb duhr rockcaller** (R)
**1 gargoyle harrier** (G)
**Vanathia, adult adamantine dragon** (V)

The doors at area 8 are unlocked; Vanathia's servants come and go at all times, although they're in the habit of knocking respectfully and waiting to be invited inside. The dragon has a good view of the Lower Gate and won't be surprised by anyone entering the room from that direction.

Characters who descend through the secret tunnel (area 7) can surprise the monsters, since Vanathia doesn't expect anyone to enter from that direction, and the other monsters don't know about the tunnel. Allow characters who carefully open the secret door a Stealth check against the dragon's passive Perception (DC 25) to get the drop on her.

**When the PCs enter area 9 through the double doors, read:**

*This grand cavern climbs toward the east in three stepped tiers, separated by steep 10-foot escarpments. The ceiling glitters with luminous crystals, and a small pool feeds a swift stream that flows out through a culvert. An old flagstone pathway leads up to the middle and upper tiers, where the ruins of several small stone buildings stand. Most of the buildings have been reduced to empty, rubble-filled shells.*

*A dragon with dark, glossy, metallic scales lies at the far end of the cavern, surveying the chamber from the highest ledge. A winged gargoyle crouches near the dragon, attending its master.*

Place the dragon and the gargoyle as shown on the map. Don't place the galeb duhr until a character climbs to the second tier of the room or it takes an action, since it's not visible from the entrance of the room.

**When the PCs see the galeb duhr, read:**

*Amid the ruins of the building to the north, a strange rock-creature lurks. It has a roughly humanoid shape but no discernible head—its face is in the center of its stony chest.*

**If the PCs address the dragon, read:**

*"Fools!" the dragon hisses. "You dare to invade the domain of Vanathia? Beg for your lives, and I may spare you. Otherwise . . . prepare to die."*

Vanathia is willing to allow the characters to surrender, but only if they do so at once. If any character fails to throw down his or her weapon or implement, the dragon attacks.

**Vanathia (V)** **Level 14 Solo Soldier**
Adult adamantine dragon
Large natural magical beast (dragon) XP 5,000

**Initiative** +14 **Senses** Perception +16; darkvision
**HP** 564; **Bloodied** 282; see also *bloodied breath*
**AC** 30; **Fortitude** 27, **Reflex** 26, **Will** 25
**Resist** 20 thunder
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 15
**Action Points** 2

⊕ **Bite** (standard; at-will)
Reach 2; +19 vs. Reflex; 2d6 + 6 damage, and ongoing 5 damage (save ends).

⊕ **Claw** (standard; at-will)
Reach 2; +19 vs. Reflex; 1d10 + 6 damage.

↓ **Draconic Fury** (standard; at-will)
Vanathia makes two claw attacks and then makes a bite attack against a different target.

↓ **Wing Buffet** (immediate reaction when an enemy enters or leaves an adjacent square)
Reach 2; +19 vs. Fortitude; 1d8 + 6 damage, and the target is knocked prone.

↓ **Tail Snap** (minor action; at-will)
Reach 2; targets a prone creature; +19 vs. Reflex; 1d10 + 6 damage, and the target is slowed and weakened (save ends both).

✧ **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Thunder**
Close blast 5; +17 vs. Fortitude; 3d8 + 6 thunder damage, and the target is knocked prone. *Miss:* Half damage.

✧ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Vanathia uses it.

✧ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +17 vs. Will; the target is stunned until the end of Vanathia's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Insight +16, Intimidate +13
**Str** 23 (+13) **Dex** 21 (+12) **Wis** 18 (+11)
**Con** 21 (+12) **Int** 11 (+7) **Cha** 12 (+8)

**Gargoyle Harrier (G)** **Level 11 Lurker**
Medium elemental humanoid (earth) XP 600

**Initiative** +13 **Senses** Perception +13; darkvision
**HP** 89; **Bloodied** 44
**AC** 27; **Fortitude** 23, **Reflex** 21, **Will** 21
**Immune** petrification
**Speed** 6, fly 8; see also *flyby attack*

⊕ **Claw** (standard; at-will)
+16 vs. AC; 2d6 + 6 damage.

↓ **Flyby Attack** (standard; recharges after using *stone form*)
The gargoyle flies up to 8 squares and makes a melee basic attack at any point during the move without provoking an opportunity attack from the target. If the attack hits, the target is knocked prone.

**Stone Form** (standard; at-will)
The gargoyle becomes a statue and gains resist 25 to all damage, regeneration 3, and tremorsense 10. It loses all other senses and can take no actions in stone form other than revert to its normal form (as a minor action).

**Alignment** Evil **Languages** Deep Speech, Primordial
**Skills** Stealth +13
**Str** 21 (+10) **Dex** 17 (+8) **Wis** 17 (+8)
**Con** 17 (+8) **Int** 9 (+4) **Cha** 17 (+8)

| Galeb Duhr Rockcaller (R) | Level 11 Controller |
|---|---|
| Medium elemental humanoid (earth) | XP 600 |

**Initiative** +5 **Senses** Perception +12; tremorsense 10
**HP** 118; **Bloodied** 59
**AC** 25; **Fortitude** 26, **Reflex** 21, **Will** 22
**Immune** petrification, poison
**Speed** 4 (earth walk), burrow 6

⊕ **Slam** (standard; at-will)
+16 vs. AC; 2d8 + 4 damage.

**Rolling Attack** (standard; at-will)
The galeb duhr rockcaller moves up to 4 squares and then attacks an adjacent target; +14 vs. Fortitude; 2d8 + 6 damage, and the target is pushed 1 square and knocked prone.

**Earthen Grasp** (standard; at-will)
An earthen fist rises up to restrain the target. Ranged 10; +14 vs. Fortitude; the target is restrained (save ends). The target must be in direct contact with the ground, or the attack fails. The rockcaller can use *earthen grasp* against only one creature at a time.

**Rocky Terrain** (minor; at-will)
Ranged 10; up to 4 squares within range become difficult terrain. The squares need not be contiguous, but the affected terrain must consist of earth or stone.

**Alignment** Unaligned **Languages** Dwarven, Giant
**Skills** Stealth +10

| | | |
|---|---|---|
| **Str** 19 (+9) | **Dex** 10 (+5) | **Wis** 15 (+7) |
| **Con** 22 (+11) | **Int** 13 (+6) | **Cha** 13 (+6) |

## Tactics

Vanathia is an aggressive and overly confident combatant. She begins a battle by rushing into the middle of her foes and using her *breath weapon*, and then uses *tail snap* against an enemy on the ground. Then she spends an action point to use *frightful presence*. In the next round, she mauls foes with *draconic fury* and moves to attack the enemy who seems most dangerous to her. She saves her last action point for when her *breath weapon* recharges, so that she can use her *draconic fury* and *breath weapon* in the same round.

If Vanathia is reduced to 100 hit points or fewer, she attempts to flee by the nearest exit, or she surrenders if flight is not possible. If she has to, she'll squeeze to flee up the secret passage.

The gargoyle stays well away from the dragon, harrying any character who tries to hang back out of the fight. It uses *flyby attack* on its first attack, and it retreats to use *stone form* if it becomes bloodied or finds two or more characters attacking it at the same time.

The galeb duhr seeks to hinder characters attacking the dragon in melee. It uses *rocky terrain* to make it difficult for enemies to shift around Vanathia and *earthen grasp* to restrain any defender trying to mark the dragon. It avoids melee until the dragon becomes bloodied or it is attacked directly by enemies.

## Features of the Area

**Illumination:** The luminous crystals of this cavern fill the room with dim light. In addition, *everburning torches* at the locations shown on the map provide bright light in a 5-square radius.

**Ceiling:** The ceiling of the cavern is 40 feet above the lower portion of the room, 30 feet above the middle portion, and 20 feet above the uppermost portion.

**Ruined Walls:** Crossing a wall counts as moving into a square of difficult terrain, even if the square on the opposite side is clear. The walls provide cover against attacks that cross the walls.

**Stalagmites:** Stalagmites are difficult terrain. They provide cover to Medium or smaller creatures. Each stalagmite has AC 5, Reflex 5, Fortitude 10, and 40 hit points.

**Escarpment:** The escarpments are 10 feet tall (Athletics DC 15 to climb). Any creature pushed off an escarpment takes 1d10 damage from the fall.

**Pool:** The pool is 5 feet deep. It counts as difficult terrain.

**Doors:** The iron double doors leading to area 8 are not locked. They have AC 5, Fortitude 10, Reflex 5, and 60 hit points.

## Treasure

Vanathia's hoard lies in the intact stone building in the southeast corner of this cavern (area 10). For details, see page 110.

# THE BREAKING TIDE

**Bronze dragon lair for five 13th-level adventurers**

Off the coast of the great Aelathric Ocean, near the Bay of Fins and the multitude of small port towns that line its shores, stands an array of small islands and protruding reefs. Tiny fishing villages, communities that trade their catch with the citizens of the larger towns on shore or the merchants who pass by in their galleons, inhabit some of them.

Others are inhabited by dwellers far less friendly.

Here, the dangers to passing ships go far beyond hidden sandbars and daggerlike reefs waiting to gouge the hulls of unsuspecting ships. For it is here, in a deep grotto on one of these isles, that a savage pack of sahuagin make their home—and here, too, dwells Xyphreneus, the bronze dragon who rules them.

## Background

**History DC 11:** A few years ago, Xyphreneus, a bronze dragon, expanded his territory across portions of the coast and the Aelathric Ocean, including the Bay of Fins. When he learned of the constant sahuagin raids that had been going on for generations, he decided to take steps.

Not quite, as it turned out, the steps that the people of the surrounding communities might have hoped for.

With a few swift shows of strength (and of the consequences for those that disobeyed), Xyphreneus usurped command of the sahuagin tribe. The sahuagin baron, Uvokula, has managed to save face by claiming he has taken on Xyphreneus as a partner, a fellow predator who has seen the wisdom in the ways of Sekolah the shark god.

Today, the sahuagin tribe does not conduct random raids on villages and ships. Rather, it has become Xyphreneus's tax collector, levying tribute from every citizen, every town, every passing ship. After all, as the dragon sees it, he's performing a service, preventing the sahuagin from engaging in their bloody raids. The least the locals can do is show their appreciation and make it worth his while. And as for those who don't? Well, if they won't pay for the service, he's hardly going to keep the sahuagin from attacking them, is he?

The result is that, although the violence and bloodshed have decreased, the economic damage to the communities in the Bay of Fins is staggering. The villages are already poverty-stricken, and shortages might soon become an issue. What the people here need is someone who can deal with the dragon and the sahuagin both . . .

**History DC 18:** For as long as humans and halflings have dwelt on the Bay of Fins, they have had to suffer the depredations of the sahuagin, as well as the giant sharks they use as mounts and hunting animals. The earliest communities here were wiped out entirely, slain to the last individual. But as the Empire of Nerath grew, the Bay of Fins became ever more important to seaborne traffic, and ever larger towns sprung up around it. Before long, the land-dwellers greatly outnumbered the sea devils; the sahuagin attacks changed from wars of extermination to hit-and-run raids, intended to steal valuables and carry off handfuls of citizens as food, as blood sacrifices to their shark god, or both. And if the humans and halflings were too numerous for the sahuagin to pose a terminal threat, so were the sahuagin too stealthy and too brutal for the land-dwellers to defeat.

The result was a peculiar equilibrium. This isn't to say that the local magistrates and militias were happy about losing citizens to the sea devils. They took what steps they could to impede the sahuagin, but the occasional raids and fatalities were accepted as a risk of dwelling in the area; one might as well rail against the weather as expect the sahuagin to relent. On rare occasions, the sahuagin sent a few of their number to trade with the locals for goods they could not acquire in their raids, and the people—though often simmering with anger over those they lost—knew better than to attack those emissaries, lest the sahuagin retaliate with attacks far more fearsome than those that had come before. And so it went, for generations uncounted.

## Environment

The waters around the chain of islands (outside the area depicted on the map) are rough, requiring a DC 15 Athletics check to swim. The tidal currents around and between the islands all have a strength of 3 squares, the direction depending on whether the tide is going out (flowing north) or coming in (flowing south). (See "Aquatic Combat," *DMG* 45.) Ledges and rocky outcrops on the isles are slippery, requiring a DC 25 Athletics check to climb.

Most of the sahuagin tribe is elsewhere, not within the grotto that contains the dragon's lair. As the characters search the island chains for the grotto, they might have additional encounters with sahuagin (*MM* 224), war sharks (see the statistics block on page 120), or a few citizens of the island-based fishing villages who worry that the characters will only antagonize the dragon and make matters worse.

**As the PCs approach the grotto entrance, read:**
*Almost invisible behind a veil of chopping waves and the occasional jagged outcropping, a wide cave entrance gapes open, leading into the darkened interior of the stony isle.*

## Area 1: The Inlet

About half the area in and around the lair is aquatic, taking the form of an inlet that provides access to the caverns along the shore. The water here is deep and the tide strong (as potent as it is outside the grotto). The former leaders of the sahuagin tribe dwell here, eager to take out their frustrations on intruders.

**Tactical Encounter:** "Feeding Frenzy," page 120.

## Area 2: The Shores

The edges of the earth in these areas of the caverns are waterlogged, with layers of pebbles above soft and shifting sands. Although these areas offer a way to reach the higher ground deeper inside the grotto, the soggy terrain makes travel slow and difficult.

**Tactical Encounter:** "Feeding Frenzy," page 120, or "On the Rocks," page 122.

## Area 3: Rocky Slopes

Other than climbing the slippery, sheer sides of the cliffs that border most of the inlet, the only way to get up to the cavern's higher levels is by ascending these steep slopes. The rock in and around the areas marked 3 on the map is challenging terrain, requiring a character to make a DC 18 Athletics check in order t move across it in either direction.

**Tactical Encounter:** "Feeding Frenzy," page 120, or "On the Rocks," page 122.

## Area 4: Xyphreneus's Lair

This cavern, 20 feet above the water level and separated from the rest of the grotto by several thin but strong rock walls, is the home of the bronze dragon.

**Treasure:** Xyphreneus's lair contains wealth and magic items equivalent to one level 14 treasure parcel and half of another one.

**Tactical Encounter:** "On the Rocks," page 122.

## Area 5: The Cavern Below

This cavern, smaller than the one that houses Xyphreneus, is the home of the dragon's lieutenant—a dragonborn raider—as well as the sahuagin leaders, when they're not in the water. This cave runs beneath a portion of the dragon's lair and under the ledge leading from the southern slope up to the lair. The entrance is marked by the semicircle of dashed lines between the two other sets of dashed lines that describe the northern and southern edges of the area.

**Treasure:** The cave contains wealth equivalent to half of a level 14 treasure parcel, partly on the floor and partly on the person of the dragonborn.

**Tactical Encounter:** "On the Rocks," page 122.

JASON A. ENGLE

# Feeding Frenzy

**Encounter Level 14 (5,000 XP)**

*Note:* The XP value for this encounter is slightly higher than normal, due to the aquatic environment, which greatly favors the monsters.

## Setup

**2 Aelathric sahuagin priests** (P)
**Uvokula, sahuagin baron** (U)
**1 war shark** (W)

Moving into the grotto is hard enough, given the tides and the various rocky isles. It becomes harder once the leaders of the sahuagin tribe engage the characters with the full intent of slaughtering them and then consuming the flesh from their bones. In fact, they'll probably eat the bones, too.

The following descriptions assume that the characters are using boats or other aquatic vessels. If they're swimming, flying, or riding aquatic or aerial mounts, adjust the information accordingly.

**When the PCs enter the cave, read:**

*The choppy waters swirl around you, waves rebounding off the stone wall and tides threatening to yank and spin your boat this way and that. Jagged reefs and small isles protrude from the dark sea, threatening to stave in the side of your vessel with the slightest contact. Great walls of stone rise up to either side, coated with ocean salt and bouncing echoes in all directions.*

**Perception Check**

**DC 26 (or 21 if the PCs are underwater)** *Barely visible beneath the violent waters, you catch a glimpse of a dark-scaled creature, humanoid yet inhuman, moving swiftly toward your hull.*

**DC 27 (or 22 if the PCs are underwater)** *Beyond them, a third creature—larger, with four gaunt arms and grasping claws—rises from the darkened depths.*

**DC 29 (or 24 if the PCs are underwater)** *What at first seemed to be an undersea boulder suddenly moves, its body twisting sharply and cutting through the sea in your direction. A dorsal fin slicing the surface of the water like a blade is all the evidence you need that the beast must be a shark of prodigious size.*

## Tactics

The sahuagin and the shark move to attack, leaving their starting points, once the characters have moved a reasonable distance into the grotto. (Assume they attack once the characters move to the east or west side of the large island. If, however, the characters attempt to moor their boat to the shore or climb up onto land before reaching either of those points, the monsters move in to attack anyway.)

**2 Aelathric Sahuagin Priests (P)** **Level 13 Artillery**
Medium natural humanoid (aquatic) XP 800 each

**Initiative** +11 **Senses** Perception +12; low-light vision
**HP** 102; **Bloodied** 51
**AC** 25; **Fortitude** 24, **Reflex** 25, **Will** 26
**Speed** 6, swim 8

⨺ **Trident** (standard; at-will) ✦ **Weapon**
+18 vs. AC; 1d8 + 6 damage.

⤙ **Trident** (standard; at-will) ✦ **Weapon**
Ranged 3/6; +20 vs. AC; 2d8 + 6 damage. The sahuagin priest must retrieve its trident before it can throw it again.

⤙ **Water Bolt** (standard; at-will)
Ranged 10 (20 while in water); +20 vs. AC; 2d6 + 4 damage (3d6 + 6 while in water).

⤙ **Spectral Jaws** (standard; recharges when a target saves against this effect)
Ranged 20; spectral shark jaws appear and bite the target; +18 vs. Will; 3d8 + 4 damage, and the target takes ongoing 5 damage and a -2 penalty to all defenses (save ends both).

**Blood Frenzy**
A sahuagin gains a +1 bonus to attack rolls and a +2 bonus to damage rolls against bloodied enemies.

**Alignment** Chaotic evil **Languages** Abyssal, Common
**Skills** Intimidate +15

| | | |
|---|---|---|
| **Str** 18 (+10) | **Dex** 20 (+11) | **Wis** 22 (+12) |
| **Con** 18 (+10) | **Int** 13 (+7) | **Cha** 18 (+10) |

**Equipment** trident, holy symbol, kelp robe

**Uvokula (U)** **Level 14 Elite Brute (Leader)**
Large natural humanoid (aquatic) XP 2,000

**Initiative** +12 **Senses** Perception +9; low-light vision
**Blood Healing (Healing)** aura 10; each ally within the aura that starts its turn adjacent to a bloodied enemy regains 5 hit points.
**HP** 340; **Bloodied** 170
**AC** 26; **Fortitude** 28, **Reflex** 26, **Will** 25
**Saving Throws** +2
**Speed** 6, swim 8
**Action Points** 1

⨺ **Trident** (standard; at-will) ✦ **Weapon**
Reach 2; +17 vs. AC; 3d4 + 4 damage.

⨺ **Claw** (standard; at-will)
Reach 2; +17 vs. AC; 1d6 + 3 damage, and ongoing 5 damage (save ends).

⤙ **Trident** (standard; at-will) ✦ **Weapon**
Ranged 3/6; +17 vs. AC; 3d4 + 4 damage. Uvokula must retrieve his trident before he can throw it again.

⸸ **Baron's Fury** (standard; at-will)
Uvokula makes a trident attack and two claw attacks.

**Blood Hunger**
Uvokula gains a +2 bonus to attack rolls and a +5 bonus to damage rolls against bloodied enemies.

**Alignment** Chaotic evil **Languages** Abyssal, Common
**Skills** Intimidate +16

| | | |
|---|---|---|
| **Str** 24 (+14) | **Dex** 20 (+12) | **Wis** 14 (+9) |
| **Con** 20 (+12) | **Int** 14 (+9) | **Cha** 18 (+11) |

**Equipment** trident, headdress

The priests remain at a distance, lobbing ranged attacks at the characters. They prefer to focus on obvious ranged combatants, allowing Uvokula and the shark to deal with the party's front-liners.

Uvokula attempts to drag or knock foes into the water, where he has the advantage. If doing this proves impossible, he makes melee attacks against characters in a boat or on the shore.

| War Shark (W) | Level 14 Skirmisher |
|---|---|
| Large natural beast (aquatic, mount) | XP 1,000 |
| **Initiative** +16 **Senses** Perception +9 | |
| **HP** 139; **Bloodied** 69 | |
| **AC** 28; **Fortitude** 26, **Reflex** 28, **Will** 23 | |
| **Speed** swim 11 | |
| ⊕ **Bite** (standard; at-will) | |
| +17 vs. AC; 3d6 + 5 damage. | |
| **Deft Swimmer** (while mounted by a friendly rider of 14th level or higher; at-will) ✦ **Mount** | |
| The war shark's rider gains a +2 bonus to AC against opportunity attacks. While in water, the rider also gains a +2 bonus to attack rolls against creatures without a swim speed. | |
| **Waterborn** | |
| While in water, a war shark gains a +2 bonus to attack rolls against creatures without a swim speed. | |
| **Alignment** Unaligned **Languages** – | |
| **Str** 21 (+12) **Dex** 24 (+14) **Wis** 14 (+9) | |
| **Con** 19 (+11) **Int** 2 (+3) **Cha** 9 (+6) | |

Uvokula prefers to keep close enough to his allies for his *blood healing* aura to benefit them, but he does not give up any tactical advantage, or retreat from melee, to do so.

All three of the sahuagin fight to the death.

The shark goes after any character in the water, preferring wounded targets over those who have not been damaged by the sahugain.

The shark attempts to flee if the sahuagin are dead and it is reduced to 34 or fewer hit points.

## Features of the Area

**Illumination:** The grotto is dimly lit, by sunlight coming in through the opening and by phosphorescent fungi along the rocks and the walls.

**Ceiling:** The ceiling of the grotto stands 70 feet overhead.

**Current:** The current pushes each creature and object in or on the water 3 squares at the start of its turn, unless they spend movement to prevent it. (See "Aquatic Combat," *DMG* 45.) The boat moves on its pilot's turn. (If the characters haven't designated a pilot, have them do so at the start of combat.) The current moves either north or south, as you choose, for the duration of the encounter. A creature or object pushed up against the shoreline inside the grotto stops moving in the square adjacent to the shore.

### Ramming the Boat

Uvokula or the war shark might attempt to ram any vessel the characters occupy. Treat this as a bull rush attack against the Fortitude defense of each character in the boat, and against AC 26 for the boat (roll once for each character and again for the boat, as though it were an area attack). If the boat is hit, it moves 1 square, as with a normal bull rush. This movement might cause the boat to beach itself on one of the low-lying patches of wet sand. It might also push the boat into one of the island reefs (see "Features of the Area"). A character who is hit must make a saving throw. Those who save are knocked prone in the boat; those who fail the saving throw are knocked overboard into the water. A character who is already prone inside the boat does not risk falling overboard during such an attack.

**Echoes and Waves:** Due to the ambient sounds of water inside the cavern, all creatures take a -2 penalty to Perception checks to listen.

**Island Reefs:** If the characters' boat is pushed into one of the islands, either by a bull rush or by the tidal currents, roll a +14 attack against the boat's AC of 26. On a hit, the hull is damaged, and the boat begins to sink. The process takes 1d4 + 1 rounds, at which point, if they have not already climbed onto land, the characters find themselves in the water.

**Cliffs:** It requires a DC 23 Athletics check to climb any of the cliffs at the water's edge.

**Sandy Shores:** Areas of wet sand on the shoreline (marked with triangles on the map) are difficult terrain.

**Stone Outcrops:** Blackened areas on the map are upthrust stone that blocks line of sight and serves as impassable terrain.

**Water:** The water is rough (DC 15 to swim), due to the waves and currents. The water is 10 to 15 feet deep along the shores, but it swiftly drops off to as deep as 90 feet near the cave entrance.

# On the Rocks

**Encounter Level 15 (6,675 XP)**

## Setup

**1 dragonborn raider** (D)
**5 Aelathric sahuagin guards** (S)
**Xyphreneus, adult bronze dragon** (X)

Once the characters emerge from the waters and begin exploring, it's only a matter of time before they encounter the draconic master of the sahuagin band—and unless they've come to offer great riches in tribute, he's not especially pleased to see them.

The read-aloud text below assumes that the characters first encounter each creature at its starting point as indicated on the map, but this won't always be the case. Modify your descriptions accordingly.

**When the PCs first land on any area 2, read:**
*The soft sand squelches out from beneath your feet. Beyond, the earth appears firmer, the rocks—and the footing—more steady.*

**When the PCs approach any area 3, read:**
*A slope rises ahead; it looks slick, but not too hard to traverse. Beyond, stretches of rocky floor lead to several caves.*

**When the PCs enter area 4, read:**
*Atop the slopes stands a cavern, divided into several smaller chambers by winding walls of natural, water-carved stone. Beyond the scent of the ocean, you can make out a musky odor, faintly reptilian in nature.*

*As your eyes adjust, you spot something moving deep in the darkness of the cave, something with a long, sinuous neck and unfolding wings.*

*In a voice that sounds like the crashing of the waves against unyielding rock, the great beast speaks. "I am Xyphreneus. I trust you have come to offer me proper tribute."*

**When the PCs approach area 5, read:**
*An opening in the cliff wall leads beneath the ledges on the western side of the grotto.*

**When the PCs enter area 5, read:**
*The cavern under the grotto smells strongly of fish. In the shadows, several scaled humanoids similar to those who attacked you in the water glare in your direction.*

**Perception Check**
**DC 26** *Another figure, covered not in fishlike scales but reptilian ones of glossy black, creeps toward you, a dagger clutched in each clawed hand.*

## Tactics

The dragonborn and the sahuagin attack as soon as they see the characters, unless the characters are

**Xyphreneus (X)** **Level 14 Solo Brute (Leader)**
Adult bronze dragon
Large natural magical beast (aquatic, dragon) XP 5,000

**Initiative** +12 **Senses** Perception +13; darkvision
**HP** 507; **Bloodied** 253; see also *bloodied breath*
**AC** 26; **Fortitude** 28, **Reflex** 25, **Will** 25
**Resist** 20 lightning
**Saving Throws** +5
**Speed** 6, fly 8 (hover), overland flight 10, swim 6
**Action Points** 2

**Bite** (standard; at-will) ✦ **Lightning**
Reach 2; +17 vs. AC; 2d8 + 8 damage plus 3d6 lightning damage.

**Claw** (standard; at-will)
Reach 2; +17 vs. AC; 2d8 + 10 damage.

**Double Attack** (standard; at-will)
Xyphreneus makes two claw attacks.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Lightning**
Close blast 3; +15 vs. Reflex; 3d8 + 5 lightning damage, and Xyphreneus pushes the target 2 squares. If the attack hit at least one target, Xyphreneus makes a secondary attack against a creature within 10 squares that was not a target of the primary attack. *Miss:* Half damage. *Secondary Attack:* +15 vs. Reflex; 2d10 + 5 lightning damage, and Xyphreneus pushes the target 1 square.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Xyphreneus uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +13 vs. Will; the target is stunned until the end of Xyphreneus's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Xyphreneus's Command** (immediate reaction, when an enemy moves adjacent to an ally; at-will)
The ally can make a melee basic attack against the triggering creature and then shift 1 square.

**Restorative Dive** (minor; while bloodied and completely submerged in water; encounter) ✦ **Healing**
Xyphreneus regains 120 hit points, and each ally in water within 5 squares regains 20 hit points.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** History +13, Intimidate +16
**Str** 26 (+15) **Dex** 21 (+12) **Wis** 13 (+8)
**Con** 21 (+12) **Int** 12 (+8) **Cha** 20 (+12)

### Two Fights or One

This encounter unfolds in one of two ways, depending on what happens first.

If the characters enter area 5 before meeting Xyphreneus, then they find the dragonborn and the sahuagin in their positions as indicated on the map, and combat takes place between the two groups. (When the characters resolve this battle, they should realize that there's still a dragon to be dealt with somewhere in the grotto.)

If the characters find the lair and confront Xyphreneus before entering area 5, the dragon lets out a roar that brings the dragonborn and the sahuagin running. At the start of the fourth round after the characters begin conversing or fighting with Xyphreneus, two of the other creatures enter the lair through the southern opening and join the fray. Two more appear in the fifth round and the final two a round later.

Regardless of the order of events, the encounter isn't over until all the monsters are dealt with.

| Dragonborn Raider (D) | Level 13 Skirmisher |
|---|---|
| Medium natural humanoid | XP 800 |
| **Initiative** +13 **Senses** Perception +13 | |
| **HP** 129; **Bloodied** 64; see also *dragonborn fury* | |
| **AC** 27; **Fortitude** 23, **Reflex** 24, **Will** 21 | |
| **Speed** 7 | |
| ⨺ **Katar** (standard; at-will) ✦ **Weapon** | |
| +19 vs. AC (+20 while bloodied); 1d6 + 4 damage (crit 2d6 + 10). | |
| ⨺ **Twin Katar Strike** (standard; at-will) | |
| If the dragonborn raider doesn't take a move action on its turn, it shifts 1 square and makes two katar attacks, or vice versa. | |
| ⨳ **Dragon Breath** (minor; encounter) ✦ **Acid** | |
| Close blast 3; +14 vs. Reflex (+15 while bloodied); 1d6 + 3 acid damage. | |
| **Combat Advantage** | |
| A dragonborn raider deals 1d6 extra damage against any creature granting combat advantage to it. | |
| **Dragonborn Fury** (only while bloodied) | |
| A dragonborn gains a +1 racial bonus to attack rolls. | |
| **Infiltrating Stride** (move; recharges after the dragonborn raider attacks two different enemies with *twin katar strike*) | |
| The dragonborn raider shifts 3 squares. | |
| **Alignment** Unaligned **Languages** Common, Draconic | |
| **Skills** History +8, Intimidate +9, Stealth +16 | |
| **Str** 18 (+10) **Dex** 21 (+11) **Wis** 14 (+8) | |
| **Con** 17 (+9) **Int** 10 (+6) **Cha** 12 (+7) | |
| **Equipment** leather armor, 2 katars | |

| 5 Aelathric Sahuagin Guards (S) | Level 12 Minion |
|---|---|
| Medium natural humanoid (aquatic) | XP 175 each |
| **Initiative** +9 **Senses** Perception +8; low-light vision | |
| **HP** 1; a missed attack never damages a minion. | |
| **AC** 26; **Fortitude** 24, **Reflex** 23, **Will** 22 | |
| **Speed** 6, swim 6 | |
| ⨺ **Trident** (standard; at-will) ✦ **Weapon** | |
| +17 vs. AC; 6 damage. | |
| ⨳ **Trident** (standard; at-will) ✦ **Weapon** | |
| Ranged 3/6; +17 vs. AC; 6 damage. The sahuagin guard must retrieve its trident before it can throw it again. | |
| **Blood Frenzy** | |
| A sahuagin gains a +1 bonus to attack rolls and a +2 bonus to damage rolls against bloodied enemies. | |
| **Alignment** Chaotic evil **Languages** Abyssal, Common | |
| **Str** 22 (+12) **Dex** 17 (+9) **Wis** 14 (+8) | |
| **Con** 20 (+11) **Int** 10 (+6) **Cha** 12 (+7) | |
| **Equipment** trident | |

conversing with the dragon. Once Xyphreneus attacks, the other creatures engage in combat. They fight to the death while Xyphreneus lives, but if the dragon is slain and they are bloodied, they attempt to escape.

Unless the characters try to offer Xyphreneus tribute (which might require a skill challenge), he grows irritated that they've bothered him (not to mention that they've slain some of his most potent servants, if they visited area 5 first) and attacks.

Xyphreneus prefers to engage in melee, opening with a breath attack and *frightful presence* (using an action point to do both in the same round), and then making claw, bite, and *wing smash* attacks until his *breath weapon* recharges. If more complex tactics are necessary, he circles through the cavern to attack from multiple angles, or else grabbing foes, moving over the water, and dropping them or diving in.

Xyphreneus is proud and refuses to accept defeat. Only if all his allies are slain and he is reduced to fewer than 40 hit points does he try to escape.

## Features of the Area

**Illumination:** Dim light from phosphorescent fungi along the rocks and the walls.

**Ceiling:** The ceiling inside area 5 is 15 feet tall.

**Stone Outcrops:** The blackened areas in and around Xyphreneus's lair are upthrust stone that blocks line of sight and serves as impassable terrain.

**Other Features:** See the previous encounter.

# Methenaera the Mead-Keeper

**Silver dragon lair for five 18th-level adventurers**

Twelve casks of mead—a gift from the dwarven deity Moradin—once filled the hoard of the ancestors of the elder silver dragon Methenaera. Anyone who drank it saw visions of the future. Methenaera's line kept the mead safe for centuries.

Two casks remain. Methenaera will grant them only to seekers she deems worthy of drinking this elixir of deities.

## Background

**History DC 20:** After the defeat of the primordials in their war against the gods, Moradin spent time in the northern mountains, constructing a fortress of polar ice. He befriended the local silver dragons, including Methenaera's ancestors, that loved his mead. In time, Moradin tired of the snow and, leaving casks of the mead as a gift to the dragons, returned to his dominion in the Astral Sea.

Centuries of blizzards transformed Moradin's ice fortress into a glacier indistinguishable from other glaciers in the mountain range. The dragons tapped the casks only when they needed prophetic power.

During the fall of Nerath, powerful heroes traveled north in search of Methenaera's mother and the casks, hoping to find a way to forestall the empire's collapse. Those who drank from the casks saw the future and returned to their ruined homes, sadder and wiser.

After the empire's fall, few sought the casks. Methenaera guards the last two, waiting for the day when she might honor Moradin and her ancestors by ensuring that the last of the mead goes toward a worthy cause.

## Hook: Drink of Methenaera's Mead

When the characters search for clues about their ongoing quests, they can learn about Methenaera and the mead casks and then seek the mead for assistance. As they discover (if they find Methenaera and gain her trust or at least her cooperation), the mead serves as a component in prophetic rituals known by Moradin's high priests. Who better to fetch the casks from Methenaera than the adventurers? Other uses for the mead might develop as your storyline proceeds.

**Quest XP:** 2,000 XP (minor quest).

## Hook: The Roll of Claims

In addition to the remaining casks of mead, Methenaera maintains a chronicle of all who have claimed casks of mead in the past. Her ancestors passed down a scroll called the Roll of Claims, which identifies each person or group that claimed a cask of mead and gives the reason each sought the mead, a brief personal history, and the destination where the recipient was planning to go.

The character who takes on this minor quest might be seeking information about a hero from ages past. A more self-serving character might want to add his or her name to the list simply to gain more fame or greater pride.

**Quest XP:** 2,000 XP (minor quest).

### Methenaera, the Mead-Keeper

Like the other dragons of her line, Methenaera worships Moradin above all other gods. She honors the wishes of her ancestors, who personally knew the god and drank his mead when it was still plentiful. Over the years, the casks have diminished in number as worthy crusaders have come seeking the mead's prophetic visions. Methenaera compels herself to live up to her family's legacy. The greatest shame she could suffer would be letting evil or meek creatures drink from the mead. The silver dragon's test of combat guarantees that any people who comes to collect will prove their dedication with blood.

After dwelling in her lonely cave for so long, Methenaera has little talent for conversation and no tolerance at all for idle chatter. When she does speak, her voice is stern, bordering on aggressive (at least when she's talking to those she hasn't yet fought). She peppers her speech with references to Moradin and invokes his name for success in battle.

Methenaera creates formations of ice crystals with her breath, and these creations jut up from the floor of her cave. Forming these abstract shapes is both a way to pass the time and a way to worship Moradin as the god of creation.

## Environment

A journey to Methenaera's cave by land begins in the logging town of Nordkell, about a hundred miles south of the cave. Characters must contend with winding mountain roads, bad weather (snowstorms and blizzards, even in the summer), and a monster-infested landscape.

For those seeking to use magic to reach Methenaera's cave, the nearest teleportation circle is in Himmerdun, a dwarven fortress about fifty miles south of the cave. The dwarves have trained hippogriffs that can fly through the mountains in good weather.

**Frost Giants:** A clan of frost giants knows of the legend of Moradin's mead and would love to find the cave entrance. They have seen Methenaera flying at a distance, but she stays far enough away from them that they have not attacked her.

**Moradin's Ice Fortress:** One of the dozens of glaciers within a few leagues of Methenaera's cave is Moradin's fortress. Avalanches, blizzards, and the accumulation of ice have worn away the spires and battlements and covered the entrances. Interior chambers remain intact.

Who knows what ancient treasure—and guardians—the fortress might contain? Methenaera wants access; she might send the characters on a quest to find and map the fortress, which could help to convince her that the characters are worthy to drink the mead.

**Cave Entrance:** Methenaera's cave entrance, covered with a crust of snow, is barely wide enough for the silver dragon to squeeze through. It lies at the edge of a snow-covered alpine meadow.

**Ice Stream:** A cold stream from a spring higher up the mountain runs underneath the snow and into the cave. Within the cave, a thin sheet of ice covers the stream, which meanders through the upper chamber before dropping down a chute to emerge farther down the mountain.

### Area 1: Upper Chamber

Four ice archons have served Methenaera's line of dragons since Moradin left for his dominion. The archons guard this chamber. They rest within the two black obelisks on the chamber floor.

**Tactical Encounter:** "Upper Chamber," page 126.

### Area 2: Lower Chamber

When she is not soaring over the mountains and surveying glaciers in a search for intruders or food, Methenaera sleeps in the northern part of the lower chamber, curled around the two casks of mead.

**Tactical Encounter:** "Lower Chamber," page 128.

JASON A. ENGLE

# Upper Chamber

**Encounter Level 17 (9,000 XP)**

## Setup

**1 ice archon frostshaper** (F)
**1 ice archon hailscourge** (H)
**2 ice archon rimehammers** (R)

Before the characters reach Methenaera, they must contend with her ice archons.

**When the PCs reach the cave entrance, read:**
*You enter the cave and stop at the edge of a 20-foot cliff. The stream pours down the cliff face and continues below, to the northwest. The irregularly shaped cave is about 70 feet long and nearly as wide. Rock protrusions block parts of the cave from view.*

*In the middle of the cave floor, a black stone obelisk glows briefly. Two dark-armored creatures made of living ice and wielding massive mauls appear and move slowly toward you.*

**Perception Check**
**DC 20** *In a reflection on an icicle, you see a dark shape around the corner to your left—perhaps another obelisk?*

The dark shape is a second obelisk—one that's producing a frostshaper and a hailscourge.

**Arcana Check**
**DC 20** *Calling upon a sliver of knowledge from your memory, you discern that the obelisks are directly associated with the guardian creatures they spawn. It's possible that you can dismiss the creatures by ruining the obelisks.*

**2 Ice Archon Rimehammers (R)** **Level 19 Soldier**
Medium elemental humanoid (cold) XP 2,400 each

**Initiative** +15 **Senses** Perception +12
**Icy Ground (Cold)** aura 1; enemies treat squares within the aura as difficult terrain.
**HP** 185; **Bloodied** 92
**AC** 35; **Fortitude** 35, **Reflex** 32, **Will** 31
**Immune** disease, poison; **Resist** 30 cold
**Speed** 6 (ice walk)
⊕ **Maul** (standard; at-will) ✦ **Cold, Weapon**
+25 vs. AC; 2d6 + 7 damage plus 1d6 cold damage, and the target is slowed (save ends). Against a slowed target, the ice archon rimehammer deals 2d6 extra cold damage.
**Alignment** Chaotic evil **Languages** Primordial
**Str** 24 (+16) **Dex** 18 (+13) **Wis** 16 (+12)
**Con** 25 (+16) **Int** 14 (+11) **Cha** 15 (+11)
**Equipment** plate armor, maul

**Ice Archon Frostshaper (F) Level 20 Controller (Leader)**
Medium elemental humanoid (cold) XP 2,800

**Initiative** +14 **Senses** Perception +14
**Icy Aura (Cold)** aura 5 (while not bloodied); cold creatures within the aura gain regeneration 10. Enemies treat the squares within the aura as difficult terrain.
**HP** 190; **Bloodied** 95
**AC** 34; **Fortitude** 32, **Reflex** 28, **Will** 32
**Immune** disease, poison; **Resist** 30 cold
**Speed** 6 (ice walk)
⊕ **Ice Blade** (standard; at-will) ✦ **Cold, Weapon**
+23 vs. AC; 2d6 + 8 cold damage.
↗ **Ice Javelin** (standard; at-will) ✦ **Cold, Weapon**
Ranged 5; +23 vs. AC; 2d6 + 8 cold damage, and the target is slowed until the end of the ice archon frostshaper's next turn.
✲ **Icy Burst** (standard; recharges when the ice archon frostshaper hits with a melee attack) ✦ **Cold**
Area burst 1 within 5; +23 vs. AC; 3d8 + 8 cold damage, and the target is slowed (save ends). *Miss:* Half damage, and the target is not slowed.
**Alignment** Chaotic evil **Languages** Primordial
**Skills** Intimidate +23
**Str** 26 (+18) **Dex** 19 (+14) **Wis** 18 (+14)
**Con** 22 (+16) **Int** 14 (+12) **Cha** 27 (+18)

**Ice Archon Hailscourge (H)** **Level 16 Artillery**
Medium elemental humanoid (cold) XP 1,400

**Initiative** +11 **Senses** Perception +10
**HP** 120; **Bloodied** 60
**AC** 30; **Fortitude** 28, **Reflex** 27, **Will** 26
**Immune** disease, poison; **Resist** 20 cold
**Speed** 6 (ice walk)
⊕ **Slam** (standard; at-will) ✦ **Cold**
+19 vs. AC; 1d6 + 4 cold damage.
↗ **Ice Shuriken** (standard; at-will) ✦ **Cold**
Ranged 6/12; +21 vs. AC; 1d6 + 4 damage plus 1d6 cold damage.
↗ **Double Attack** (standard; at-will)
The ice archon hailscourge makes two *ice shuriken* attacks.
✲ **Hail Storm** (standard; recharge ⚄ ⚅) ✦ **Cold**
Area burst 1, 2, 3, or 4 within 20; +21 vs. AC; 2d8 + 4 cold damage. *Miss:* Half damage. The ice archon hailscourge determines the burst radius.
**Frost Shield** (immediate interrupt, when attacked by a ranged, close, or area attack; encounter) ✦ **Cold**
The ice archon hailscourge gains resist 20 to all damage against the triggering attack.
**Alignment** Chaotic evil **Languages** Primordial
**Str** 18 (+12) **Dex** 16 (+11) **Wis** 14 (+10)
**Con** 18 (+12) **Int** 14 (+10) **Cha** 15 (+10)
**Equipment** plate armor

## Tactics

Only a direct order from Methenaera can call off the ice archons. Because they have ice walk, the archons do not make Acrobatics checks to avoid slipping.

The rimehammers move slowly toward the characters; they would rather fight in the chamber than in the entrance, so they can lure characters onto the ice over the stream. Once engaged in melee, the rimehammers focus their attacks on slowed characters. Knowing the ice is thin, the rimehammers shift every round to avoid breaking through it. Their *icy ground*

aura can keep the characters from shifting and puts them at greater risk for falling through the ice.

The frostshaper comes around the corner and drops an *icy burst* on as many characters as possible, even if that means catching other ice archons (which have cold resistance) in the burst. Next, the frostshaper moves 5 squares behind the rimehammers to envelop them in its *icy aura*. It uses *ice javelins* against characters who are not slowed.

The hailscourge stays near the frostshaper and drops *hail storms* on the characters. (Again, the rimehammers' cold resistance should protect them.) When it cannot use *hail storm*, the hailscourge makes a *double attack*.

Although the archons are of chaotic evil alignment, they don't always behave accordingly (see the section about the obelisks in "Features of the Area").

## Features of the Area

**Illumination:** During the day, the upper chamber has bright light at the top of the cliff and dim light below it, because the icy sheen on the walls is reflective. At night, the chamber is dark.

**Obelisks:** One of Methenaera's ancestors, after fending off a group of intruders that proved especially troublesome, used a ritual to construct these obelisks and bind a pair of ice archons into each one. The archons appear and attack when anyone not authorized by Methenaera enters the upper chamber. Each obelisk has AC 5, other defenses 10, and 40 hit points. Destroying an obelisk releases the archons that were bound to it, whereupon those creatures flee out the entryway.

**Walls:** The cave walls are rough, but omnipresent ice makes climbing difficult. A character attempting to climb the walls must make a DC 25 Athletics check.

**Cliffs:** The cliffs at the entrance and dividing the upper chamber from the lower chamber are 20 feet high and require a DC 25 Athletics check to ascend or descend.

**Thin Ice:** The ice-covered stream that runs through the chamber is challenging terrain. When a character enters the first ice square in a turn, the character must succeed on a DC 17 Acrobatics check or fall prone in that square.

In addition, the ice is thin enough to be dangerous. A character who stays in a particular ice square from the start of his or her turn until the end of that turn hears the crack of ice and makes a saving throw. Success results in the character falling prone in an adjacent square as the ice gives way in the square he or she had occupied. On a failed saving throw, a character falls through the ice in his or her location and slides to a randomly determined adjacent square.

The water under the ice is 10 feet deep. A DC 10 Athletics check as a move action allows the character to swim to a square that contains open water. After that, a DC 20 Athletics check as a move action allows the character to climb into an adjacent, unoccupied square.

The stream runs west and then north, cascading from the upper chamber to the lower chamber.

**Ice Crystals:** To amuse herself in her spare time, Methenaera delicately breathes on the ground to coax jagged and complex ice crystal sculptures from it. Ice crystal stands are difficult terrain and provide cover. Each square of ice crystals has AC 8, other defenses 8, and 3 hit points.

**Pit:** The pit in the northwest corner is 50 feet deep. The walls are especially icy (Athletics DC 28 to climb). A narrow passage at the bottom of the pit slopes downward and emerges from the mountain a quarter-mile away.

# Lower Chamber

**Encounter Level 18 (10,000 XP)**

## Setup

**Methenaera, elder silver dragon** (M)

Methenaera wants to fight; even if the characters try diplomacy, a battle ensues. Methenaera fights until bloodied, at which point she offers to surrender a cask of mead. Because this is a subdual encounter (described on page 49), Methenaera is the equivalent of an 18th-level adversary, and the encounter is worth a corresponding amount of XP.

**When the PCs reach the point where the stream seeps into crevices in the wall, read:**

*The cavern seems to be at least 100 feet long. You can tell that the northern part has a lower floor, because you cannot see the floor of that part from where you stand. The near part of the cavern is empty except for stands of ice crystals.*

*An immense silver dragon rises into view in the northern end of the chamber.*

*"You have come for the casks of mead so potent it quenches the thirst of a deity," says the dragon. "I, Methenaera, do not surrender them meekly. Prove your worthiness in battle, or perish."*

## Tactics

Because this is a subdual encounter, Methenaera is effectively a creature with 525 hit points. Show off a variety of powers and tactics quickly to give the characters a full display of her draconic power in the short time they'll be fighting her.

Methenaera opens with a *breath weapon* attack against as many characters as possible. She uses this power in combination with *Methenaera's onslaught* and plays a game of cat and mouse while she's waiting for these powers to recharge.

Methenaera uses *Methenaera's onslaught* as often as she can, usually targeting characters who have vulnerable 10 to all damage thanks to her *breath weapon*.

If neither of her main two attacks has recharged, Methenaera strikes at one enemy, then flies to the north or south part of the chamber. She lets the characters contend with the cliff and the ice crystals, and counts on her *threatening reach* to keep melee combatants at bay. If she's fighting against a powerful ranged attacker, she flies to within 2 squares of that character and attacks it with *tail slam*.

Methenaera uses *frightful presence* early, as soon as characters flank her or otherwise hem her in. After she uses *frightful presence*, Methenaera flies away, landing behind ranged combatants and far from stunned defenders and melee strikers. She drops into a central location (rather than along a wall or in a corner) and uses *wing slice* and opportunity attacks (with *threatening reach*) against characters who surround her. Because Methenaera is a solo monster with a four-level advantage on the heroes, her defenses are high: She can provoke opportunity attacks with little worry about the consequences.

**Methenaera (M)** **Level 22 Solo Brute**
Elder silver dragon
Huge natural magical beast (dragon) XP 20,750

**Initiative** +14 **Senses** Perception +18; darkvision
**HP** 1,050; **Bloodied** 525; see also *bloodied breath*
**AC** 34; **Fortitude** 36, **Reflex** 34, **Will** 34
**Resist** 25 cold
**Saving Throws** +5
**Speed** 8, fly 8 (hover), overland flight 15
**Action Points** 2

⊕ **Bite** (standard; at-will)
Reach 3; +25 vs. AC; 3d8 + 8 damage.

⊕ **Claw** (standard; at-will)
Reach 2; +25 vs. AC; 2d8 + 8 damage.

↓ **Tail Slam** (standard; at-will)
Reach 4; +23 vs. AC; 4d6 + 8 damage, and the target is dazed (save ends).

↓ **Methenaera's Onslaught** (standard; recharge ⚅ ⚄ ⚃)
Methenaera makes a claw attack against each enemy within reach. She also makes one bite attack or *tail slam* attack.

↓ **Wing Slice** (immediate reaction, when an enemy flanking Methenaera attacks her; at-will)
Reach 2; targets the triggering enemy and an enemy flanking with the triggering enemy; +25 vs. AC; 2d8 + 8 damage.

✧ **Breath Weapon** (standard; recharge ⚄ ⚃) ✦ **Cold**
Close blast 5; +25 vs. Reflex; 3d8 + 8 cold damage, and the target gains vulnerable 10 to all damage (save ends). *Miss:* Half damage.

✧ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Methenaera uses it.

✧ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +21 vs. Will; the target is stunned until the end of Methenaera's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Threatening Reach**
Methenaera can make opportunity attacks against each enemy within her reach (3 squares).

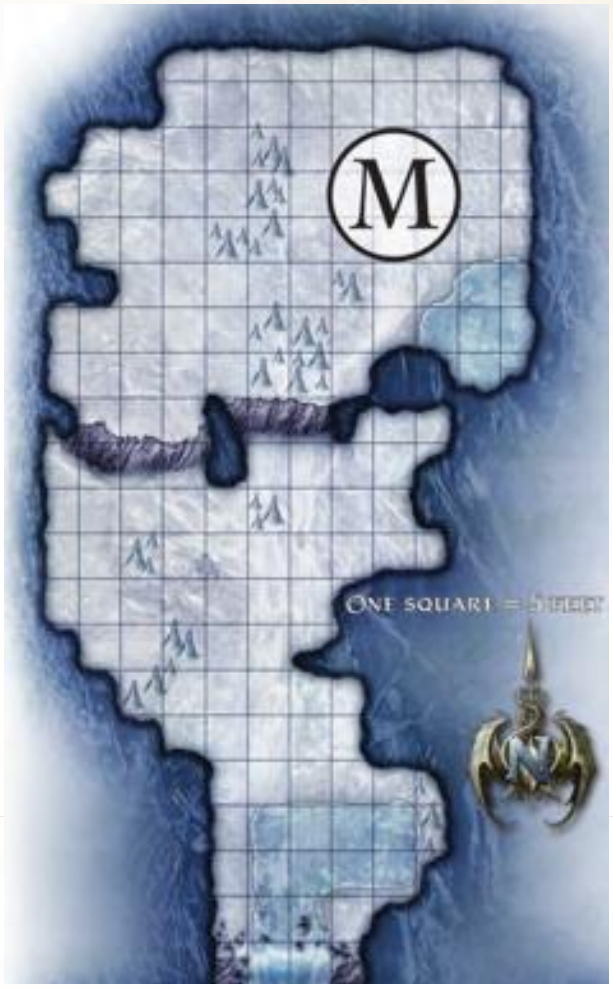
**Unstoppable**
Methenaera makes saving throws against ongoing damage at the start of her turn as well as at the end of her turn.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +26, Insight +18
**Str** 30 (+21) **Dex** 16 (+14) **Wis** 14 (+13)
**Con** 26 (+19) **Int** 14 (+13) **Cha** 15 (+13)

## Features of the Area

**Illumination:** Darkness.

**Ice Crystals:** To amuse herself in her spare time, Methenaera delicately breathes on the ground to coax jagged and complex ice crystal sculptures from it. Ice crystal stands are difficult terrain and provide cover. Each square of ice crystals has AC 8, other defenses 8, and 3 hit points. If faced with a choice of foes to attack and finding no tactical advantage to attacking one over another, Methenaera attacks characters who damage her ice crystals.



**Casks:** Methenaera keeps the mead casks at the base of the eastern cliff, hidden amid stands of ice crystals. If a character picks up a cask (which weighs 20 pounds) without permission, Methenaera attacks that individual, even if another character has marked her.

**Cliffs:** The cliffs bisecting the lower chamber are 30 feet high and require a DC 25 Athletics check to ascend or descend.

**Icy Floor:** Unlike the ice-covered stream in the upper chamber, the stream in the lower chamber has thick ice that does not break under the characters' feet. The stream seeps into the eastern wall.

The ice over the stream and over the pool east of the cliffs is challenging terrain. When a character enters the first ice square in a turn, the character must succeed on a DC 17 Acrobatics check or fall prone in that square.

## Treasure

Methenaera's hoard is concealed at the bottom of the frozen pond in the southeast corner of the area where she begins the encounter. It consists of one level 19 magic item and 29,000 gp in monetary treasure.

Of course, her hoard also includes the two remaining casks of mead. A character who takes a drink of the mead gains the information he or she would receive from a Consult Oracle ritual (see page 302 of the *Player's Handbook*) and a Voice of Fate ritual (see page 314 of the *Player's Handbook*). The amount of information gained, as normal, depends on the result of the drinker's Religion check.

One cask contains enough mead for every member of the party to have one drink. If a character drinks from a particular cask more than once, the mead has no further effect for that character. The mead retains its potency if the casks are taken from the lair.

Also present with the casks, if you see fit, is the Roll of Claims (see the adventure hook on page 124).

## Conclusion

When Methenaera becomes bloodied, she cries, "Enough! I yield. Let this bloodshed end, and I will release a cask to you." On her next turn, she flies away from the characters—to the casks if no characters are near them—and waits for the heroes to stand down. If they stop fighting, Methenaera performs the Raise Dead ritual on any slain character.

If the characters continue to fight, they draw the silver dragon's anger. She becomes more aggressive and focuses fire on individual enemies. She usually targets healers first, and becomes willing to make coup de grace attacks against anyone she drops. When Methenaera falls to fewer than 200 hit points, she repeats her offer of a cask. If the characters decline this offer, she flies to the casks, grabs them up, and attempts to escape. Now the characters will need to destroy her if they want to retrieve the mead.

Methenaera takes her duty seriously—and that duty is not merely to attack those who enter the chamber. Her aim is to ensure that Moradin's mead is used for a good cause. She respects anyone who is able to defeat her, and might even serve as a patron to the characters after her defeat. Since Methenaera's ancestors imbibed Moradin's mead, she has occasional, faint glimpses of the future and notions of Moradin's will. She can provide the characters with quests that advance the will of the god of creation and hints about how to best accomplish their goals.

Methenaera also needs heirs to guard the mead after her death. If she truly trusts the characters, she might charge them with protecting the mead while she travels far away to find a mate.

# THE EDGE OF CHAOS

**Mithral dragon lair for five 23rd-level adventurers**

The strange bastion of Vyc Zaleeth sits upon an earth mote swaying between competing tides of a sea of fire and an ocean of water amid a particularly turbulent area at the edge of the Elemental Chaos. For centuries the Vyc Zaleeth monastery has been a place of ascetic contemplation, where githzerai ponder the nature of chaos at its very edge and develop its counterbalance through their mental discipline. Its strange disciplines were progressed peacefully by generations of monks and initiates that called this place home. Murmuring a constant concert of chants and mantras, the monks of Vyc Zaleeth found sanctuary from the universe and its petty conflicts. That is, until a mithral dragon and a small army of angelic mercenaries murdered them and took over their monastery to pursue a prophecy.

In less than a day, the dragon Astridaria and her angels destroyed all that the githzerai had built and defended for more than half a millennium. As despicable as these actions are, worse still are the dragon's ultimate plans for Vyc Zaleeth—to reignite the war between the creatures of the Elemental Chaos and the powers of the Astral Sea.

## Background

Given enough time, or if the story of how the characters come to Vyc Zaleeth gives them an opportunity, the characters can learn the following background information about Astridaria and her assault on the monastery. Even if the characters stumble upon Vyc Zaleeth, they might discover these plot threads through clues or by interrogating the mithral dragon's allies, or Astridaria might reveal them herself when the characters battle the dragon.

**Arcana or History DC 22:** Since she hatched, Astridaria has received visions of war between the Elemental Chaos and the Astral Sea. Urged by these auguries, she called together a force of angel mercenaries cast adrift when their deity died. Thus she took control of Vyc Zaleeth. A dark naga named Galzaik, for reasons unknown, has also aided Astridaria.

**Arcana or History DC 26:** At the heart of Vyc Zaleeth is a psychic resonance crystal. Astridaria's visions beckon for her to convert the crystal into a weapon of radiant energy powered by her fundamentum.

**Arcana or History DC 28:** The conversion is nearly complete. Astridaria awaits new visions to guide her next step.

### MEMORY CRYSTALS

When Astridaira attacked Vyc Zaleeth, she carefully preserved the githzerais' memory crystals. Repositories of the monastery's wisdom, these crystals come in many sizes, but none are larger than a short sword. Creatures trained in Arcana can make a DC 25 Arcana check to access a crystal as a standard action and then can "read" its memories in a manner similar to how a literate creature might read a book. The smallest crystals hold 1 to 10 pages worth of information, while the largest can hold the equivalent of 10,000 pages of information. These crystals can be used as both ritual books and scrolls.

## Hook: Prevent Astridaria's War

If you run an adventure in or around the Elemental Chaos, the heroes can come upon Vyc Zaleeth—a seeming beacon of order and radiance in the churning chaos—during their explorations. Because the monastery has a permanent teleportation circle, characters might hope to teleport safely from there to the Plane Below, only to find cosmic skulduggery unfolding there. Alternatively, a divine agent or a deity such as Ioun can catch wind of Astridaria's plans and encourage the characters to perform the Planar Portal ritual to travel to the monastery and stop Astridaria.

**Quest XP:** 28,000 XP (major quest).

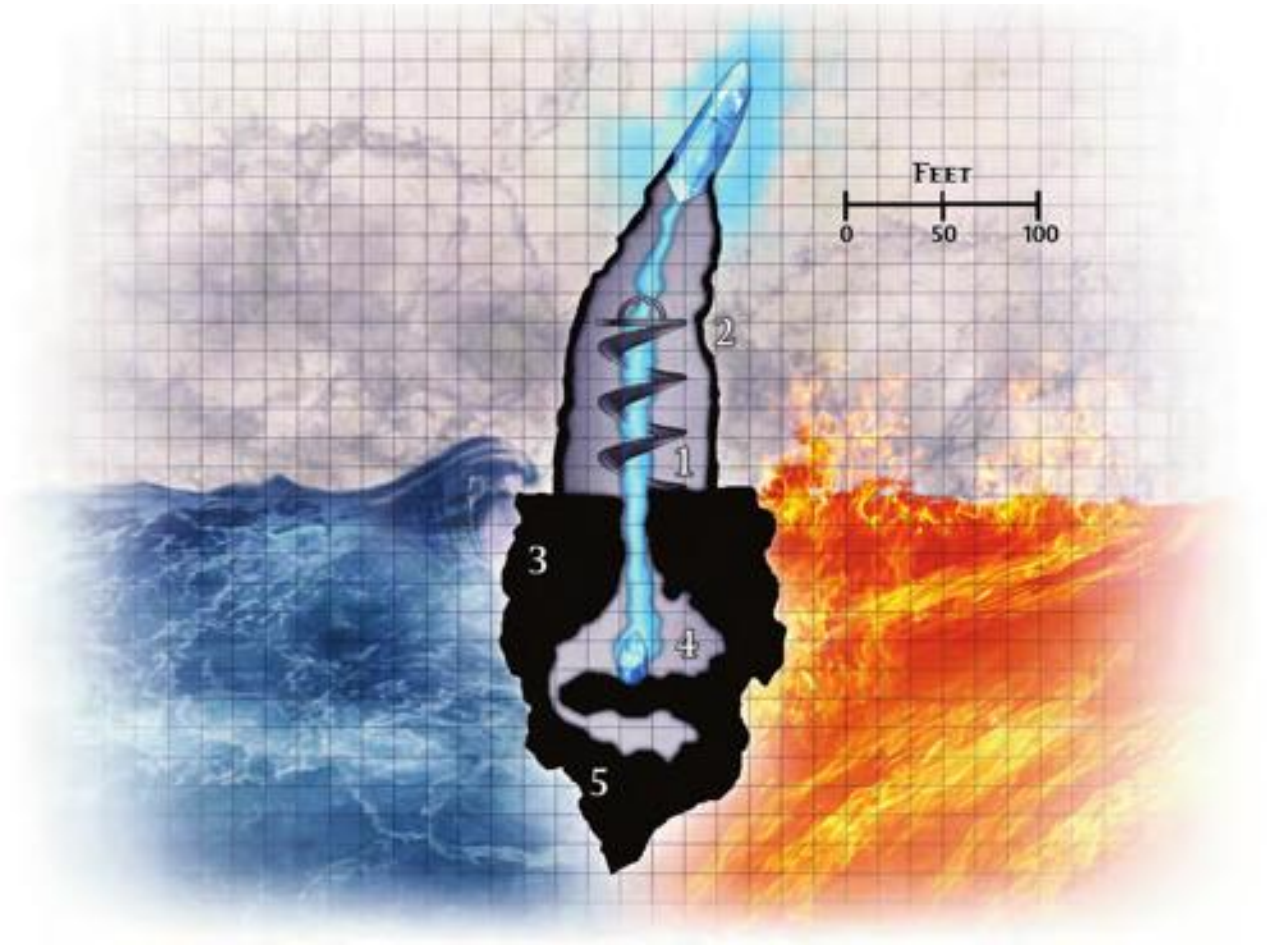
## Environment

Whether the characters arrive by the Planar Portal ritual or by other means, they first clearly see Vyc Zaleeth from the teleportation circle. The circle lies just outside the Chamber of Meditation entrance that faces the ocean of water. That entrance—and two others on either side of the crooked tower, each 20 feet wide—slants down into the tower, which winds from the top of the earth mote to a crown of crystal that once served as a psychic beacon. The crystal bristles with radiant energy so powerful that it sears the flesh of those who come near it and kills creatures that touch it.

The monastery's outer walls consist of pocked black stone flecked with iridescent blue crystals. Pools of primordial water or liquid fire—depending upon which sea a wall faces—collect in the pockets.

**Teleportation Circle:** When creatures use the teleportation circle to arrive at the monastery, the sound of a gong echoes down the nearest corridor to alert those within the Chamber of Meditation. Emblazoned at the edges of the circle is the sigil sequence needed to mke use of this circle for permanent teleportation. The characters can transcribe the pattern in 5 minutes.

**Crowning Crystal:** A creature that starts its turn within 10 feet of the crowning crystal takes 25



radiant damage. A creature that starts its turn touching the crystal takes 100 radiant damage.

**Outer Walls:** The outer walls' organic shape and puddles of dangerous liquid make them difficult to climb, requiring a DC 25 Athletics check.

## Area 1: Chamber of Meditation

The Chamber of Meditation was once the focal point of monastic life at Vyc Zaleeth. Ringed with numerous alcoves that served as the githzerai's living quarters, it features an altar, a spiral staircase ascending to a platform, and a central chasm. Astridaria's angels wait in this chamber until Astridaria unleashes the next part of her plan.

**Tactical Encounter:** "Rage of Angels," page 132.

## Area 2: Platform

From a platform high in the tower, made of blue translucent energy, a select group of angels and the dark naga Galzaik constantly repair and modify overburdened arrays at the base of the tower's crowning crystal. The team must continue to work even when the monastery falls under attack. When confronted, the team defends the array, using part of the apparatus as a weapon. The characters must disrupt the machine and the dragon powering it.

**Tactical Encounter:** "Radiant Array," page 134.

## Area 3: Chasm

Once a conduit for psychic energy generated by githzerai monks, a 100-foot chasm in the center of the Chamber of Meditation's floor now courses with radiant energy. Characters who try to descend the chasm without disrupting the radiant array will likely be disintegrated by radiant energy.

## Area 4: Lower Chamber

Before Astridaria's arrival, the resonance crystal at the center of the lower chamber amplified psychic energy from the monks and channeled that energy through the arcane array to the crystal that crowns the tower. Astridaria uses the chamber in the same way, breathing radiant energy into the crystal to create an amplified stream. Her intent is to create a weapon with which to attack the Elemental Chaos.

**Tactical Encounter:** "Agent of Prophecy," page 136.

## Area 5: Hoard Room

This cave houses the monastery's sacred memory crystals—and now also Astridaria's hoard. It contains at least eight treasure parcels of your choosing. Guarding this place are a pair of hoard guardian sentinels (see "Agent of Prophecy," page 136).

JASON A. ENGLE

# Rage of Angels

**Encounter Level 23 (26,500 XP)**

## Setup

**1 angel of authority** (A)
**10 angels of light** (L)
**2 angels of vengeance** (V)

If the characters used the teleportation circle, the angels have heard the sound of the gong. Otherwise, heroes who can beat the passive Perception of the angels of light with Stealth can surprise them.

The angels are dutifully waiting here until Astridaria unleashes the next part of her plan while waiting for the naga and the angels above at the radiant array to finish making repairs to its mechanisms.

**When the PCs enter the Chamber of Meditation, read:**

*A chamber spans the length, width, and height of the tower. An altar at the far side juts toward a pillar of radiant energy at the center. The energy flows up from below the chamber to a platform and an arcane array. A spiral staircase curls up around the radiant pillar, connecting the chamber's ground floor to the platform. Angelic figures—and one figure dark and serpentine—move about on the platform.*

**If the PCs arrived by the teleportation circle, add:**

*On the ground floor, more than a dozen angels, most the size of humans but others of giants' stature, move toward you.*

**If the angels do not know that the PCs approach, add the following instead:**

*On the ground floor lounge more than a dozen angels, most the size of humans but others of giants' stature. They watch the work on the array, practice with their weapons, or kneel in meditation.*

## Tactics

When the angels spot the characters, they rush to stop them from disrupting the work on the platform.

The angels of light lead the advance.

The angel of authority follows the angels of light. It looses a *lightning bolt* and then closes with the characters to use *majestic rally*. It repeats *majestic rally* whenever the power recharges.

Angels of vengeance use *sign of vengeance* to teleport next to controllers, leaders, and ranged-weapon users and harass them throughout combat.

Although the angels work to repel any intrusion into the monastery, their chief concern is stopping the intruders from disrupting the work being done on the radiant array.

**Angel of Authority (A)** **Level 22 Controller (Leader)**
Large immortal humanoid (angel) XP 4,150 each

**Initiative** +17 **Senses** Perception +18
**HP** 20; **Bloodied** 101
**AC** 36; **Fortitude** 32, **Reflex** 34, **Will** 35
**Immune** fear; **Resist** 15 radiant
**Speed** 8, fly 12 (hover)

⊕ **Quarterstaff** (standard; at-will) ✦ **Radiant, Weapon**
Reach 2; +27 vs. AC; 1d10 + 8 damage plus 1d10 radiant damage.

**Lightning Bolt** (standard; at-will) ✦ **Lightning**
Ranged 10; +26 vs. Fortitude; 2d10 + 8 lightning damage, and the target is dazed until the end of the angel of authority's next turn.

**Majestic Rally** (standard; recharge ⚄ ⚅) ✦ **Radiant, Thunder**
Close burst 5; targets enemies; +26 vs. Will; 1d10 + 8 radiant damage plus 1d10 thunder damage, and the target is weakened (save ends). *Miss*: Half damage. *Effect*: Each angel within the burst gains a +2 bonus to attack rolls until the end of the angel of authority's next turn.

**Angelic Presence** (while not bloodied)
Any attack against the angel of authority takes a -2 penalty to the attack roll.

**Alignment** Unaligned **Languages** Supernal
**Skills** Insight +23, Religion +23
**Str** 20 (+16) **Dex** 22 (+17) **Wis** 25 (+18)
**Con** 19 (+15) **Int** 24 (+18) **Cha** 27 (+19)
**Equipment** plate armor, quarterstaff

**10 Angels of Light (L)** **Level 23 Minion Skirmisher**
Medium immortal humanoid (angel) XP 1,275 each

**Initiative** +19 **Senses** Perception +19
**HP** 1; a missed attack never damages a minion; see also *death burst*.
**AC** 37; **Fortitude** 34, **Reflex** 34, **Will** 36
**Immune** fear; **Resist** 15 radiant
**Speed** 8, fly 12 (hover)

⊕ **Angelic Glaive** (standard; at-will) ✦ **Weapon**
Reach 2; +28 vs. AC; 10 damage.

**Death Burst** (when the angel of light drops to 0 hit points) ✦ **Radiant**
The angel of light explodes in a burst of radiant light: close burst 10; targets enemies; +26 vs. Fortitude; 10 radiant damage. *Effect:* Each angel in the burst gains 10 temporary hit points.

**Alignment** Unaligned **Languages** Supernal
**Str** 18 (+15) **Dex** 23 (+17) **Wis** 27 (+19)
**Con** 23 (+17) **Int** 15 (+13) **Cha** 23 (+17)
**Equipment** glaive

## Features of the Area

**Illumination:** The crowning crystal at the top of the monastery brightly illuminates the entire chamber.

**Ceiling:** The ceiling over this area is 220 feet high at the zenith (the crowning crystal).

**Platform:** The array platform is 120 feet above the floor of this chamber.

**Altar:** A creature that starts its turn on an altar square gains a +2 bonus to Will and a +5 bonus to saving throws against any effect that deals ongoing psychic damage or that dazes, dominates, or stuns. These bonuses last until the end of the creature's next turn.

| 2 Angels of Vengeance (V) | Level 19 Elite Brute |
|---|---|
| Large immortal humanoid (angel) | XP 4,800 each |

**Initiative** +13 **Senses** Perception +16
**HP** 446; **Bloodied** 223
**AC** 34; **Fortitude** 33, **Reflex** 29, **Will** 33; see also *cloak of vengeance*
**Immune** disease, fear; **Resist** 15 cold, 15 fire, 15 radiant; see also *coldfire pillar*
**Saving Throws** +2
**Speed** 8, fly 12 (hover); see also *sign of vengeance*
**Action Points** 1

**Longsword** (standard; at-will) ✦ **Cold, Fire, Weapon**
Reach 2; +25 vs. AC; 1d10 + 9 damage plus 1d8 fire damage plus 1d8 cold damage.

**Double Attack** (standard; at-will)
The angel of vengeance makes two longsword attacks.

**Sign of Vengeance** (minor; encounter) ✦ **Teleportation**
Ranged sight; the angel of vengeance places an invisible sign upon the target. Until the end of the encounter, as a move action, the angel of vengeance can teleport adjacent to the target.

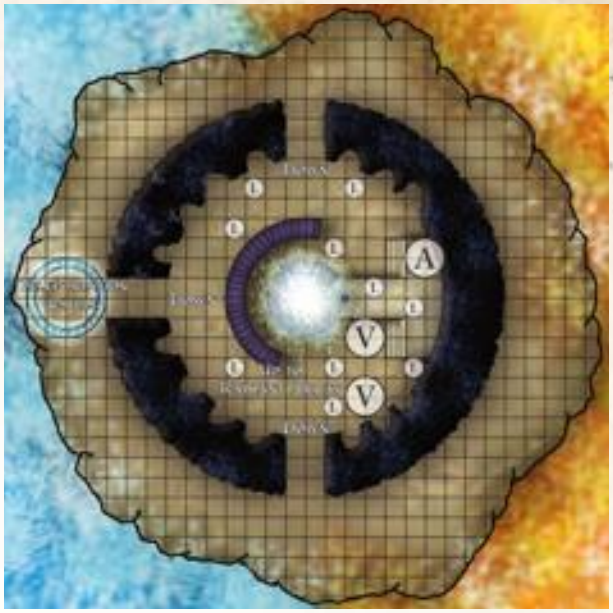
**Coldfire Pillar** (free, when first bloodied; encounter) ✦ **Cold, Fire, Polymorph**
The angel of vengeance transforms into a 30-foot-high pillar of blue flame. Close burst 2; +23 vs. Reflex; 1d8 + 9 cold damage plus 1d8 + 9 fire damage. The angel of vengeance is immune to all damage until the start of its next turn.

**Cloak of Vengeance** (until bloodied) ✦ **Cold, Fire**
Any character attacking the angel of vengeance takes a -2 penalty until the angel is bloodied. While *cloak of vengeance* is in effect, a creature that makes a successful melee attack against the angel of vengeance takes 1d8 fire damage and 1d8 cold damage.

**Alignment** Unaligned **Languages** Supernal
**Skills** Insight +21, Intimidate +22

| | | |
|---|---|---|
| **Str** 27 (+17) | **Dex** 18 (+13) | **Wis** 25 (+16) |
| **Con** 23 (+15) | **Int** 19 (+13) | **Cha** 26 (+17) |

**Equipment** plate armor, 2 longswords



**Energy Pillar:** The radiant energy comprising the pillar has the consistency of water and clings to creatures in contact with it. It flows from beneath the chamber floor up through the platform array to the crowning crystal. A creature entering the pillar or starting its turn within the pillar takes 20 radiant damage and slides 2 squares in the direction of the current (upward). With a DC 20 Athletics check, a creature within the pillar can swim down the current as if in water.

**Spiral Stairs:** This steep flight of stairs winds its way around the energy pillar upward to the platform and the radiant array. The stairs are difficult terrain.

## SCALING FLYING MONSTERS

Many of the monsters in this lair have a fly speed and can hover. Although at epic tier there is a greater possibility that characters have powers or magic items that grant them flight, their ability to fly is by no means certain. Even when they do have flight powers, most are either encounter or daily in frequency, and a procession of encounters with flying enemies that outmaneuver the characters and keep just out of reach of attacks can become frustrating very quickly.

When you run flying monsters, it's critical that you keep your character's fly powers in mind, and cater your monsters' movement tactics accordingly. This doesn't mean you have to make your flying monsters walk into battle. Having flying creatures dive bomb the characters with flying charges, or use their flight to bypass difficult terrain, are fun ways to showcase their fly speed without slowing the encounter to a maddening slog. Have your brute, soldier, and skirmisher fliers hover 1 square off the ground within melee reach of their foes; although this tactic has few mechanical differences from a ground assault, it can grant a tad more maneuverability when the monster is surrounded, and creates an interesting visual. Flying controllers and artillery can hover higher up, but not so high that they are out of reach of the controllers and ranged strikers among the characters. This type of flying will often open interesting options for cover and concealment, especially in a terrain-rich encounter environment.

If the PCs have a number of flight powers at their disposal, and are using them with great frequency in a given encounter, take off the kid gloves. Having the occasional frantic aerial battle that utilizes all three dimensions is one of the fun features of epic-level play.

STEPHEN RADNEY-MACFARLAND

# Radiant Array

**Encounter Level 24 (30,000 XP)**

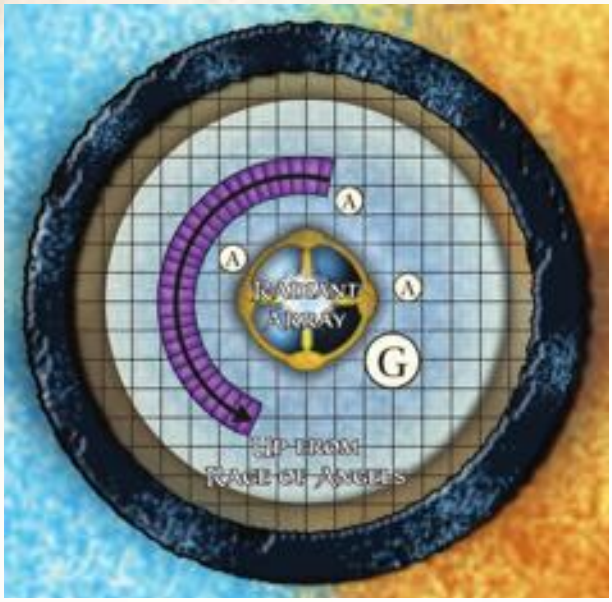
## Setup

**3 angels of the sigil and word** (A)
**Galzaik, dark naga** (G)

While the battle rages on the ground floor, 120 feet below this place, three angels and Galzaik, the dark naga, work to repair the overloaded radiant array. They continue to work on the array until the characters approach.

**When the PCs reach the platform, read:**
*In the middle of the platform, an array studded with crystal controls, strange levers, and eldritch diodes crackles every few moments with unstable bursts of radiant energy. A dark naga and three angels turn from their work on it to face you.*

*The naga hisses, "You are out of your depth here. Leave now, or perish."*



| **3 Angels of the Sigil and Word (A)** | **Level 23 Soldier** |
|---|---|
| Medium immortal humanoid (angel) | XP 5,100 each |
| **Initiative** +18 **Senses** Perception +23 | |
| **HP** 217; **Bloodied** 108 | |
| **AC** 39; **Fortitude** 35, **Reflex** 35, **Will** 35 | |
| **Speed** 6, fly 10 (hover) | |
| (+) **Radiant Sword** (standard; at-will) ✦ **Radiant, Weapon** | |
| +29 vs. AC; 2d10 + 8 radiant damage, and the target is under the effect of *angelic sigil* (save ends). | |
| **Dominating Word** (minor 1/round; encounter) ✦ **Charm** | |
| Close burst 5; targets one creature under the effect of *angelic sigil;* +25 vs. Will; the target is dominated (save ends). | |
| **Repelling Word** (minor 1/round; at-will) ✦ **Force** | |
| Close burst 5; targets one creature under the effect of *angelic sigil;* +25 vs. Fortitude; the angel pushes the target 4 squares, and the target is knocked prone. | |
| **Angelic Presence** (while not bloodied) | |
| Any attack against the angel takes a -2 penalty to the attack roll. | |
| **Angelic Sigil** | |
| Each creature under the effect of *angelic sigil* is marked by the angel and takes a -5 penalty to saving throws. | |
| **Alignment** Unaligned **Languages** Supernal | |
| **Skills** Arcana +22, Thievery +23 | |
| **Str** 22 (+17) **Dex** 24 (+18) **Wis** 24 (+18) | |
| **Con** 25 (+18) **Int** 22 (+17) **Cha** 25 (+18) | |
| **Equipment** plate armor, radiant sword | |

| **Galzaik (G)** | **Level 21 Elite Controller** |
|---|---|
| Large immortal magical beast (reptile) | XP 6,400 |
| **Initiative** +14 **Senses** Perception +21; darkvision | |
| **HP** 404; **Bloodied** 202 | |
| **AC** 35; **Fortitude** 33, **Reflex** 31, **Will** 35 | |
| **Saving Throws** +2 | |
| **Speed** 8 | |
| **Action Points** 1 | |
| (+) **Tail Sting** (standard; at-will) ✦ **Poison** | |
| Reach 2; +24 vs. AC; 2d6 + 8 poison damage (3d6 + 8 poison damage against a dazed target), and the target is slowed (save ends). | |
| **Lure** (minor; at-will) ✦ **Charm** | |
| Close burst 5; targets enemies; +25 vs. Will; the target is pulled 1 square and dazed (save ends). | |
| **Psychic Miasma** (standard; recharge ⚄ ⚅) ✦ **Psychic** | |
| Close burst 3; +26 vs. Will; 3d6 + 10 psychic damage, and the target is dazed (save ends). *First Failed Saving Throw:* The target is stunned (save ends). | |
| **Alignment** Evil **Languages** Common, Draconic, Supernal | |
| **Skills** History +22, Insight +21, Stealth +19 | |
| **Str** 26 (+18) **Dex** 18 (+14) **Wis** 22 (+16) | |
| **Con** 26 (+18) **Int** 24 (+17) **Cha** 30 (+20) | |

## Tactics

Angels of the sigil and word use their radiant swords to place *angelic sigils* on characters and then push those characters off the platform. If some of the characters have powers that enable them to push at will (such as fighters who have *tide of iron*), the angels target those characters with *dominating word* and have those characters knock other characters off the platform.

Galzaik uses *lure* and *psychic miasma* in concert with the angels' powers. He pulls and then dazes or stuns characters for the angels to push or dominate.

STEPHEN RADNEY-MACFARLAND

## Features of the Area

**Illumination:** The crowning crystal at the top of the monastery brightly illuminates the entire area.

**Ceiling:** The ceiling is 100 feet above the platform, ending at the crowning crystal.

**Spiral Stairs:** This steep flight of stairs winds its way around the energy pillar downward to the Chamber of Meditation. The stairs are difficult terrain.

**Platform Floor:** The platform floor consists of a translucent blue, glasslike material as hard as steel.

**Array:** Creatures adjacent to the array can manipulate it to make the following attacks.

**Radiant Ray** (standard; recharge ⚄ ⚅) ✦ **Radiant**
Ranged 10; +25 vs. Reflex; 2d12 + 8 radiant damage, and ongoing 10 radiant damage (save ends).

**Radiant Blast** (standard; recharge ⚅) ✦ **Radiant**
Close burst 5; +23 vs. Fortitude; 2d8 + 8 radiant damage, and the target is pushed 5 squares.

Each of the recharges is for the radiant array, and not the creature using the power. The angels and Galzaik know how to manipulate the array to make both of these attacks, but if another creature wants to make these attacks, it must succeed on a DC 31 Arcana or Thievery check as a minor action to determine how to manipulate the radiant array to make the attacks. A successful check allows the creature to make these attacks for the remainder of the expedition into Vyc Zaleeth.

## Disabling the Array

Once the characters have defeated the angels and the dark naga, their next task is to disrupt the array so they can reach the psychic resonance crystal at the bottom of Vyc Zaleeth. If the players have a hard time figuring this out, have them discover documents in the possession of one of the angels notes that include a side view map of the monastery.

**Setup:** To disable the array, characters must determine what makes it work, to the extent that they can switch it off or disconnect a vital mechanism.

**Level:** 22.

**XP:** 8,300.

**Complexity:** 2 (requires 6 successes before 3 failures).

**Primary Skills:** Arcana, Athletics, Thievery.

*Arcana (DC 17, standard action):* The character tries to determine which of the controls manipulate the streams of radiant energy. A successful check, in addition to counting as 1 success in the challenge, provides a +2 bonus to the next Thievery check made by an ally in this skill challenge. This skill can be used to gain a maxmum of 3 successes in the challenge.

*Athletics (DC 24, standard action):* The character uses brute force guided by the skill of his or her fellow party members to detach large chunks of the array. This skill can be used to gain a maximum of 2 successes in the challenge, but Athletics checks can be attempted only after the characters have already gained 3 successes in the challenge by using other skills.

*Thievery (DC 28, standard action):* The character attempts to disable part of the array. On a failed check, the array erupts, dealing 20 radiant damage to the character and to each creature within 5 squares of him or her.

**Secondary Skills:** Acrobatics, Endurance.

*Acrobatics (DC 28, immediate interrupt, when the array erupts; at-will):* The character shifts 4 squares to avoid the discharged energy. A successful check does not count as a success in the challenge.

*Endurance (DC 17, immediate interrupt, when the array erupts; at-will):* A character can shield an adjacent creature from the effect of the eruption. On a successful check, the shielded character takes no radiant damage. A successful check does not count as a success in the challenge.

**Success:** The radiant energy stream is disrupted. The chasm in the floor becomes a simple 100-foot shaft with sheer walls that require a DC 22 Athletics check to scale.

**Partial Success:** If the characters accrue at least 2 successes before getting 3 failures, the radiant energy stream is partially disrupted. A creature that enters the sputtering energy stream or starts its turn there takes 15 radiant damage instead of 20.

**Failure:** The radiant energy stream continues to flow freely. The characters can repeat the challenge, but all the DCs increase by 4.

# Agent of Prophecy

**Encounter Level 25 (40,600 XP)**

## Setup

**Astridaria, elder mithral dragon** (A)
**2 hoard guardian sentinels**

If the characters did not disrupt the radiant energy stream, they can surprise Astridaria and engage her before her *breath weapon* recharges. Otherwise, the disruption of the stream alerts Astridaria, at which point she teleports to a ledge overlooking the chamber and lies in wait for the characters.

**If the PCs have disrupted the energy pillar before entering the chamber, read:**
*At the center of this chamber, a crystal similar to the one crowning the monastery's tower, though much smaller, hums and sputters with radiant energy.*

**If the PCs have not disrupted the energy pillar, or have only partially disrupted it, read:**
*At the center of this chamber, a crystal similar to the one crowning the monastery's tower, though much smaller, glows intensely and beams the stream of radiant energy skyward.*

**If Astridaria is not prepared for the PCs, add:**
*Next to the crystal is a massive mithral dragon, long and snakelike. As you look on, she uses her breath weapon on the crystal.*

| **Astridaria (A)** | **Level 25 Solo Skirmisher** |
|---|---|
| Elder mithral dragon | |
| Huge immortal magical beast (dragon) | XP 35,000 |
| **Initiative** +24 | **Senses** Perception +24; darkvision |
| **HP** 916; **Bloodied** 458; see also *bloodied breath* | |
| **AC** 39, **Fortitude** 36, **Reflex** 38, **Will** 36 | |
| **Resist** 25 radiant | |
| **Saving Throws** +5 | |
| **Speed** 10, fly 12 (hover), overland flight 16, teleport 10 | |
| **Action Points** 2 | |
| ⊕ **Bite** (standard; at-will) ✦ **Radiant** | |
| Reach 3; +30 vs. AC; 2d8 + 10 damage, and the target takes ongoing 10 radiant damage (save ends). | |
| ⊕ **Claw** (standard; at-will) | |
| Reach 3; +30 vs. AC; 3d8 + 7 damage. | |
| ⨽ **Dimension Strike** (standard; at-will) ✦ **Teleportation** | |
| Astridaria teleports 5 squares, makes a claw attack, teleports 5 squares, and makes a claw attack against a different target. | |
| ⨽ **Wing Buffet** (minor; recharge ⚄ ⁞⁞) | |
| Reach 3; +28 vs. Fortitude; 3d10 + 7 damage, and Astridaria pushes the target 3 squares. | |
| ⤙ **Mithral Prescience** (minor; at-will) | |
| Ranged 10; the target takes a -2 penalty to all defenses against Astridaria's attacks until Astridaria uses this power on another target. | |
| ⇾ **Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Radiant** | |
| Close blast 5; +28 vs. Reflex; 4d8 + 4 radiant damage, and the target is blinded (save ends). *Miss:* Half damage. | |
| ⇾ **Bloodied Breath** (free, when first bloodied; encounter) | |
| *Breath weapon* recharges, and Astridaria uses it. | |
| ⇾ **Dimensional Flurry** (standard; encounter) ✦ **Radiant, Teleportation** | |
| Close burst 10; targets up to four enemies; +28 vs. Reflex; 3d8 + 7 damage, and the target takes ongoing 10 radiant damage and is dazed (save ends both). *Effect:* Astridaria teleports to a space in the burst. | |
| ⇾ **Frightful Radiance** (standard; encounter) ✦ **Fear, Radiant** | |
| Close burst 10; targets enemies; +28 vs. Will; 2d8 + 9 radiant damage, and the target is stunned until the end of Astridaria's next turn. *Miss:* Half damage, and the target is blinded until the end of Astridaria's next turn. | |
| **Prophetic Defense** (immediate interrupt, when attacked; at-will) ✦ **Teleportation** | |
| Astridaria gains a +4 bonus to all defenses against the triggering attack. If the attack misses, Astridaria teleports 6 squares. | |
| **Alignment** Unaligned | **Languages** Common, Draconic, Supernal |
| **Skills** Diplomacy +23, History +23, Insight +24, Intimidate +23, Religion +27 | |
| **Str** 25 (+19) | **Dex** 30 (+22) **Wis** 25 (+19) |
| **Con** 21 (+17) | **Int** 23 (+18) **Cha** 23 (+18) |

## Tactics

Even if the adventurers surprise Astridaria, she uses the ledge as a staging area for her attacks. When flanked, she teleports to the ledge and then charges or swoops back down to loose her *breath weapon*.

Throughout the fight, Astridaria talks to herself about being the agent of prophecy and about her urgent need to restart the war between the Astral Sea and the Elemental Chaos. Even without an Insight check, the characters can tell she is insane.

Astridaria fights until bloodied, at which point she flees to her hoard room in the hope that one or both of her guardians (see below) remain to fight the characters. If confronted again, she fights until reduced to

### Astridaria's Ramblings

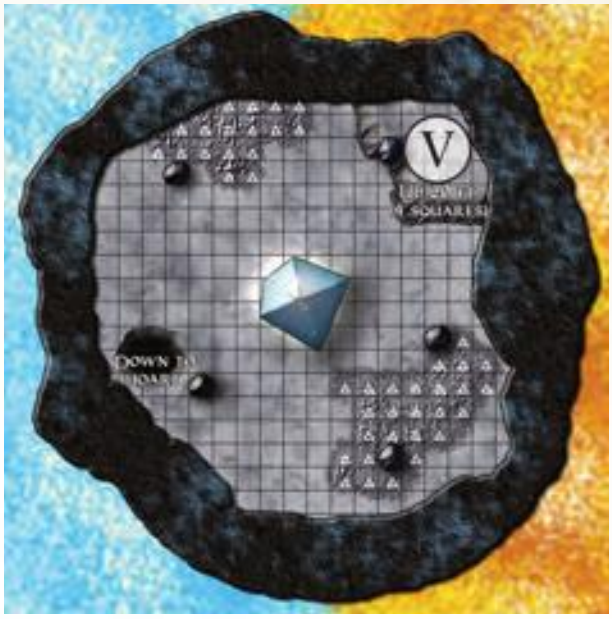
Astridaria is a chatty foe. She constantly quips and pontificates during her battle with the characters. Here are a few bits of dialogue for you to use during the battle.

*"You all are just the sickness of the universe made manifest. Crawling maggots trying to eat away and corrode the function that must occur."*

*"Please, this must be done. It is only through the crucible of this war that the universe can take on its true and just existence."*

*"The Chained One knew this to be true, but used the wrong implement to achieve the proper ends. It's not darkness that will bring everlasting harmony, but light!"*

*"Small-minded fools! You will see the light!"* (Usually uttered just before Astridaria uses her *breath weapon* against the characters).



one-quarter of her hit points (229), at which point she flees again. If cornered, she fights to the death.

## Features of the Area

**Walls:** The rugged stone of the walls is the same stone that comprises the outer walls of the monastery.

**Ledge:** The ledge consists of the same steel-hard, glasslike material as the floor of the array platform in the Chamber of Meditation. It is 20 feet high.

**Ceiling:** The ceiling is 60 feet high at the edges and 80 feet high toward the middle of the chamber. At the very center of the chamber, over the crystal, the monastery's chasm reaches skyward to the Chamber of Meditation.

**Stalagmites:** Stalagmites are blocking terrain and cover the entirety of their squares.

**Rubble:** Rubble is difficult terrain.

**Crystal:** The crystal is blocking terrain. Any creature touching it takes 50 radiant damage. If the crystal is within an area-of-effect attack that deals radiant damage, it flares up after that attack and makes the following attack.

**Radiant Feedback** (standard; recharge ⚄ ⚅) ✦ **Radiant**
Close burst 4; +25 vs. Fortitude; the target takes ongoing 15 radiant damage and is dazed (save ends both). Astridaria is immune to this effect.

## The Hoard Room

The cave just below this chamber is the site of Astridaria's hoard room. Guarding her hoard is a pair of constructs known as hoard guardians.

**2 Hoard Guardian Sentinels** **Level 20 Soldier**
Large natural animate (construct) XP 2,800 each

**Initiative** +15 **Senses** Perception +19, darkvision
**HP** 186; **Bloodied** 93
**AC** 34; **Fortitude** 32, **Reflex** 30, **Will** 28
**Immune** disease, poison, sleep
**Speed** 8

⊕ **Slam** (standard; at-will)
Reach 2; +23 vs. AC; 2d8 + 5 damage, and the sentinel marks the target (save ends) and pulls it 1 square.

↯ **No Escape** (immediate interrupt, when an enemy leaves an adjacent square; at-will)
+25 vs. Reflex; the target doesn't leave the square, and its movement ends.

**Concussive Breath** (standard; recharge ⚄ ⚅) ✦ **Force**
Close blast 5; +23 vs. Reflex; 2d10 + 5 force damage, and the sentinel slides the target 3 squares.

**Petrifying Eyes** (standard; recharge when no creature is affected by this power) ✦ **Cold, Gaze**
Ranged 5; +21 vs. Fortitude; 2d10 + 5 damage, and the target is dazed and slowed (save ends both). *First Failed Saving Throw:* The target is immobilized instead of dazed and slowed (save ends). *Second Failed Saving Throw:* The target becomes a statue of mithral and is petrified.

**Alignment** Unaligned **Languages** –
**Str** 24 (+15) **Dex** 17 (+11) **Wis** 19 (+12)
**Con** 18 (+12) **Int** 14 (+10) **Cha** 4 (+5)

### Tactics

If Astridaria is fighting with the sentinels, the pair form a defensive barrier between the characters and the mithral dragon, giving their mistress a degree of protection while she makes *dimensional strike* forays against soft targets.

Whether or not they are fighting in concert with Astridaria, the sentinels start their attack with *petrifying eyes* and then follow up with *concussive breath*. They use their slam attack only when their other powers are not available.

## Conclusion

Among Astridaria's hoard and the monastery's numerous memory crystals is a strange gray crystal. Though this gray crystal is also a memory crystal, it is not of githzerai make. It takes a DC 30 Arcana check to access its information, which is a jumble of fragmented memories and strange quotations in the Supernal language. By succeeding on the Arcana check, a character can learn that the crystal was constructed by Astridaria herself, and it details how she believes she could have succeeded in unifying the universe. It also explains a method for locating a wandering artifact called the *Crystal of the Ebon Flame* and a ritual to convert the artifact into an object of pure radiant energy, which was her next goal after reigniting the war between the Elemental Chaos and the Astral Sea.

STEPHEN RADNEY-MACFARLAND

# CITADEL OF THE GOLDEN ARCHITECT

**Gold dragon lair for five 24th-level adventurers**

In the Shadowfell, dark clouds tumble across the leaden skies over the Plain of Sighing Stones, but they bring no rain. Cerulean lightning lances between heaven and earth, scorching parched earth while thunder echoes for miles around. Legends tell of an angry god that lives in these clouds, a deity that betrayed its kin to bring comfort to death's scions, those giants that quit the mortal world to forge an empire in its dark reflection.

No god dwells in the perpetual storm, though. The clouds and lightning manifest a mighty dragon's suffering. Cursed with madness and condemned to live out its days as a prisoner of its own disinterest, compromising its once noble ideals to extend its existence in the company of those it detests, the dragon known as the Golden Architect is the doom of heaven, the fallen beast, and the scourge of the Shadowfell.

## Background

**Arcana or History DC 16:** Nearly a thousand years gone, and the Golden Architect's Citadel still roams the skies above the Plain of Sighing Stones, a grim testament to the evils worked in the lands it passes over. Ages ago, giants from the mortal world abandoned their holds to erect a new kingdom, a sprawling empire to immortalize their avarice and arrogance for all time. It was here, on this parched landscape, that some raised a great city, a walled monstrosity more massive than any city yet created by mortal hands. Its construction leached all the resources from the plain, turning it into the barren wasteland that it is today.

**History DC 20:** Though they were fully capable of constructing the city, the giants concerned themselves with combating the Shadowfell's influence and so left the work to their slaves. Cursed dark ones, shadowborn humans whose descendants still roam these lands, and others toiled endlessly to raise the death giants' city. Perhaps they might have fled, might have failed, but they could never falter—because always watching their progress was Golgorax the Golden Architect, a vile beast imprisoned in the floating Citadel, who designed the city and orchestrated its builders.

**History DC 27:** The Golden Architect was not always a cruel tyrant and was once counted among the most virtuous of his kind. Long had the dragon fought against Tiamat's servants, leading dragonborn against abishai, chromatic dragons, and dragonspawn. But each defeat and failure added to the dragon's bitterness, until one day—overcome with grief—the dragon fled the natural world to find the oblivion promised by the Shadowfell.

Not long after his arrival, the Shadowfell ran afoul of the death giants. Too weakened to fight, the dragon surrendered and swore oaths to his new masters, promising to build the city they desired. Though the dragon was already bound by his vows, the giants imprisoned the wyrm in a floating fortress so he could oversee the work and instruct their slaves. Confined in the structure and consumed with despair, the dragon went mad, and with his insanity came cruelty, callousness, and evil.

**History DC 30:** The dragon completed his task and the city was built. The giants did not dwell there long, however, because they proved unable to withstand the Shadowfell's influence. To buttress themselves against the approaching dissolution, they drained the souls from their thralls, which became horrific things trapped between life and death. Dark magic and darker deeds caused the city to crumble away. And after a generation, the once-grand city tumbled down to rubble and dust.

The dragon lived on even as the giants scattered, and he has languished in his fortress for centuries. Although the Citadel is more lair than prison now, the Golden Architect's broken spirit keeps him from leaving. A few death giants remain, captors turned servants. The dragon devours prisoners they capture while the giants consume their souls. They have persisted, but the magic in the Citadel is failing, and the denizens require more souls, more lives to continue their wretched existence. If they fail, they will find the oblivion they fear.

## Environment

The fortress is expertly crafted, assembled from sandstone blocks each as long and wide as a human is tall. Its great age and the Shadowfell's decaying influence have erased much of its splendor. The once-grand draconic images now look sinister and malformed, retaining only the barest suggestion of dragons festooning the exterior. Inside, the place is a collection of passages and chambers arranged as if by a madman. It stands as testament to Golgorax's state of mind as he added to its original structure.

Most of the place is dark, stained by wicked deeds. Light sources brought into its corridors and rooms seem dulled, deadened even though the range of their light is unchanged. Periodically, one can hear the high-pitched cackle of the mad dragon echoing through the passages, bouncing off the walls to distort in an unnerving manner.

From a distance, the Citadel is indistinguishable from a large, black cluster of cumulus clouds, and so it's easily mistaken for a storm. It is an error abetted by the bolts of lightning blasting the land below—those

same bolts had been used to shatter sandstone for the craftsmen to carve into bricks for the giants' city long ago. Reaching the Citadel is impossible unless a character has a way to fly or has patience enough to wait for the cloud to descend just before the death giants emerge to snatch up their next batch of victims. Flying characters can slip inside through the Eye in area 1 or through any of the gaps in the Citadel's floor.

The Citadel rises from the clouds, suspended in the air by ancient magic bound into the stones by the slaves' blood spilled when the structure was built. As presented, the Citadel is a freestanding structure, with other sections having long ago fallen or crumbled away. But you can expand the complex, adding extra levels below through which the adventurers must pass to reach the dragon in its lair.

The clouds supporting the Citadel are not natural phenomena but are instead warped souls trapped in the Shadowfell by death giant magic. Flying through them are all sorts of insubstantial undead, including wraiths, specters, and worse. Moving through the clouds does not draw the attention of these haunts, but those who linger might run into trouble in the form of five dread wraiths (*MM* 267).

**Illumination:** Unless otherwise noted, all rooms are dark.

**Ceiling:** Rooms and passages have ceilings 50 feet high, except where otherwise noted.

**Doors:** Stone doors are all closed and always open toward the west or south. Their size and weight require a DC 24 Strength check to open them, even when they are not locked.

**Gaps:** In places, the floor has fallen away. A creature that slips through the floor falls hundreds of feet until it lands on the Plain of Sighing Stones, likely taking 20d10 damage as a result.

### Golgorax, the Golden Architect

Golgorax is an emaciated gold dragon, a once-proud and mighty beast brought low by ennui and self-loathing. The Golden Architect can no longer muster the will to escape the Shadowfell and contents himself with inane conversation with the death giant attendants and those imagined ghosts from the dragon's past. Exposure to the Shadowfell and his soul's slow siphoning have weakened the Golden Architect, so now he is but a pale shadow of his former greatness.

The dragon rarely stirs from his lair, but his needs are considerable, and he and his death giant lackeys scour the Plain of Sighing Stones for chattel—those savage humanoids that inherited the lands wasted by the giants ages ago. As the cloudborne fortress skims the powdery landscape, giants disembark to round up victims, and feed their bodies to the dragon while keeping their souls for themselves.

## Area 1: The Dragon's Eye

A massive round chamber, this area features the Eye, an opening in the floor. In ancient days, Golgorax monitored his workers by peering through the opening.

To protect this chamber from unwanted guests, the death giants placed a number of sentinels to watch over the opening.

**Tactical Encounter:** "Mute Sentinels," page 142.

## Area 2: Hall of Curses

This hall tells the Golden Architect's tale in the paintings adorning its walls.

**When the PCs can see into this room, read:**
*Painted figures cover the walls in this long hallway. Two sets of stairs lead to exits. The stairs to the west are steep and end at massive stone doors, and the stairs to the north lead up to darkness. Part of the floor is missing here, and through the gap you can see dark clouds.*

Ordinarily this chamber is empty, but from time to time the death giants come here to check up on the undead in area 1.

**Western Doors:** Stone doors block passage to area 5. The doors are sealed, protected by a sturdy lock set in the center between each door. Opening the doors requires four successful Thievery checks before three failures against DC 29. If a character fails to open the door, it can thereafter be opened only by force (break DC 29, AC 4, Fortitude 12, Reflex 4, hp 80). Breaking open the doors automatically alerts all creatures in the complex.

## Area 3: The Portal Room

Once he had destroyed most of the death giants, Golgorax constructed this chamber as an escape route to the natural world. Malaise bred by long years spent in the Shadowfell has kept the dragon from using it. This fact has not prevented the dragon from protecting the room by setting a couple of traps and posting death giants nearby to prevent intrusion or escape.

Recently, a nightwalker has been roaming the complex, and it is puzzling over the traps in hopes of expanding its malign influence into the mortal world.

**Tactical Encounter:** "Night Haunt," page 144.

## Area 4: Stairs

The numerous staircases found in this chamber reveal the gold dragon's brimming madness. Death giant guards often linger here to escape the dragon's rages.

**When the PCs can see this room, read:**
*Staircases and landings fill this high-ceilinged chamber, constructed as if by a mad architect. Unfinished stairs extend out from walls painted with images of alcoves that seemingly serve no purpose. The southernmost staircase leads to an archway carved to resemble a dragon's maw.*

If the characters avoided facing the death giants during the "Night Haunt" encounter described on page 144, the giants make their stand here.

### Area 5: Lost Glory

The hallways here lead to different areas in the dungeon.

**When the PCs can see this area, read:**
*A tarnished copper statue in the center of this area captures a proud dragon's likeness. It wrought to depict the dragon in flight, wings extended out to either side and balanced on a long tail.*

*Four hallways extend away from the intersection. To the north, a short hall ends at descending stairs. The eastern and western halls end at doors. The southern hall extends for a bit before turning west.*

### Area 6: Storeroom

This storeroom holds barrels, boxes, crates, and empty shelves. All containers are empty and dry, though stains suggest they once held food, drink, and other supplies. No one in the complex comes here anymore; therefore, the characters, provided they are not fleeing from any of the Citadel's denizens, can take an extended rest in this room.

### Area 7: Slave Quarters

Long ago, dark ones, shadowborn humans, and other slaves languished in this room. Now the room holds only ghosts, figments from another time.

**When the PCs can see into this room, read:**
*Rotten, infested wood and brittle tangles of old bedding litter this chamber. Flitting about near the ceiling are ghostly forms.*

**Phantoms:** About a dozen or so harmless phantoms move about the ceiling. They do not respond to conversation.

**Secret Door:** The slaves built a secret passage in the wall (the door is visible with a DC 24 Perception check) to lead to the ovens so they could supplement their gruel with more substantial meals.

### Area 8: Death Chambers

Part barracks, part torture chambers, the death giants quarter here when not raiding for fresh victims or attending the Golden Architect in his sanctum.

**When the PCs can see these chambers, read:**
*A macabre scene stretches before you as you take in these chambers. The room near the doors is clearly a torture chamber, replete with a variety of implements used for inflicting pain.*

*Across the room is a short hall that opens into living quarters. There you see beds, chests, and a table, all sized for giants.*

These rooms are normally empty. The equipment here no longer functions, rusted or broken from hard use. The chamber beyond holds old furniture that has been equally abused. Blood stains the floor and is spattered on the walls. Nothing of value can be found in either chamber.

### Area 9: Ovens

Once serving as a kitchen for the living inhabitants, this room now serves to rid the complex of offal, bones, and other detritus.

**When the PCs enter this room, read:**
*Lining the northern and southern walls are two rows of black ovens. Crimson light shines through their grates and the fires fill the room with uncomfortable heat. Bits of rotten flesh, stains, and broken bones litter the floor.*

**Ovens:** Creatures touching the doors take 10 fire damage. Opening an oven door requires a DC 24 Strength check. A creature pushed or placed inside an oven takes 4d10 fire damage and ongoing 15 fire damage (save ends). A target cannot save against the ongoing damage if it ends its turn inside an oven.

### Area 10: Lair of the Golden Architect

Formerly a sumptuous chamber designed to house the dragon in comfort, long years of frustration and idle destruction have brought much of this room to ruin. The Golden Architect spends his time amid the wreckage, lamenting his fate and giving in to the insidious influence and malaise pervading the plane. Golgorax's attendants endure his insults and condemnations characterizing the long stretches between meals, and they shuffle about the room, tossing debris through the hole in the floor to keep the chamber free of rubble.

**Tactical Encounter:** "Gold Madness," page 146.

## Treasure

The lair contains four treasure parcels. Consider including two magic item parcels and two monetary parcels. You can place the treasure with the dragon or spread it around the Citadel. Here is sample treasure for a 24th-level party:

**Parcel 1:** Level 28 magic item from the players' wish lists.

**Parcel 2:** Level 27 magic item from the players' wish lists.

**Parcel 6:** 1,000 pp, a statue of a gold dragon carved from astral fire (worth 50,000 gp), a manuscript describing the lost arts of necromancy penned by Vecna (worth 50,000 gp), and a wooden coffer containing 10 emeralds (worth 5,000 gp each).

**Parcel 9:** A loose pile of 90,000 gp.

JASON A. ENGLE

# Mute Sentinels

**Encounter Level 24 (34,800 XP)**

## Setup

**2 death giant soulfire hurlers** (D)
**4 giant mummies** (M)

Positioned around the opening in the floor are four giant mummies, each the remains of a death giant that angered the Golden Architect. They stand here mutely, watchful for intruders as they stare through the opening at the nothing beyond.

Most of the time, the giant mummies are left alone, but when the characters enter the complex, a pair of death giant soulfire hurlers has come to check on them.

**When the PCs enter area 1, read:**

*A ledge extends out around the opening in the floor's center ending at the curved walls forming the room. Four hulking figures, each wrapped in fabric, stir with unlife. Green eyes flicker at your intrusion. You see a pair of doors behind one giant mummy. Beyond another, where a set of stairs climbs, you spy two coal-gray giants wreathed in ghostly shapes of what can only be souls.*

Place the miniatures where shown on the tactical map, and have the players place their miniatures in squares adjacent to the Eye. The creatures roll for initiative and attack when the first intruder enters. If the characters come to this room through area 2 or from some other direction, the mummies attack only if they or the death giants are first attacked.

## Tactics

The giant mummies each attack a different intruder to cast the widest net with their *despair* auras. On the first round, the giant mummies make bull rush attacks (+16 vs. Fortitude) against the characters to push them out over the opening in the floor. If one of the heroes attacks with a radiant power, all the giant mummies converge on that character and make *rotting slam* attacks until the character falls.

Given the somewhat cramped quarters in this room, the giant mummies likely catch one or more allies in their *dust of blinding death* attacks. The death giants are aware of this attack and try to keep at least

**2 Death Giant Soulfire Hurlers (D)** **Level 27 Artillery**
Large shadow humanoid (giant) XP 11,000 each

**Initiative** +22 **Senses** Perception +23; darkvision
**Soulsnatcher** aura 10; enemies within the aura take 5 necrotic damage and a -2 penalty to attack rolls and all defenses; a creature that dies within the aura bestows one soul shard to the death giant; see also *soul shroud*.
**HP** 180; **Bloodied** 90
**AC** 41; **Fortitude** 39, **Reflex** 41, **Will** 37
**Resist** 15 necrotic
**Speed** 7

⊕ **Greataxe** (standard; at-will) ✦ **Weapon**
Reach 2; +34 vs. AC; 2d6 + 11 damage (crit 6d6 + 18), and the target is pushed 1 square.

**Hurled Soulfire** (standard; at-will) ✦ **Necrotic**
Area burst 1 within 10; +32 vs. Reflex; 2d8 + 9 necrotic damage. The death giant can expend one soul shard to increase the power's damage to 4d8 + 9.

**Consume Soul Shard** (minor; at-will) ✦ **Healing**
The death giant expends one soul shard and regains 20 hit points.

**Soul Shroud**
The *soul shroud* contains soul shards that swirl around the death giant to protect and empower it. At the beginning of an encounter, the *soul shroud* contains four soul shards. When the *soul shroud* is depleted of soul shards, the death giant takes a -2 penalty to attack rolls.

**Alignment** Evil **Languages** Giant, Draconic
**Skills** Intimidate +22
**Str** 24 (+20) **Dex** 29 (+22) **Wis** 21 (+18)
**Con** 23 (+19) **Int** 12 (+14) **Cha** 18 (+17)
**Equipment** chainmail, greataxe

**4 Giant Mummies (M)** **Level 21 Brute**
Large natural humanoid (undead) XP 3,200 each

**Initiative** +12 **Senses** Perception +16; darkvision
**Despair (Fear)** aura 5; enemies within the aura take a -2 penalty to attack rolls against the giant mummy.
**HP** 240; **Bloodied** 120; see also *dust of death*
**Regeneration** 10 (if the giant mummy takes radiant damage, regeneration doesn't function on its next turn)
**AC** 33; **Fortitude** 34, **Reflex** 30, **Will** 31; see also *despair* above
**Immune** disease, poison; **Resist** 10 necrotic; **Vulnerable** 10 fire
**Speed** 6

⊕ **Rotting Slam** (standard; at-will) ✦ **Disease, Necrotic**
+24 vs. AC; 3d8 + 6 necrotic damage, and the target contracts level 21 mummy rot (see below).

**Dust of Blinding Death** (when first bloodied and again when reduced to 0 hit points) ✦ **Acid**
The giant mummy releases a cloud of corrosive dust: close burst 2; +22 vs. Fortitude; 1d8 + 7 acid damage, and the target takes ongoing 10 acid damage and is blinded (save ends both).

**Alignment** Unaligned **Languages** Giant
**Str** 22 (+16) **Dex** 14 (+12) **Wis** 12 (+11)
**Con** 24 (+17) **Int** 6 (+8) **Cha** 16 (+13)

**Mummy Rot** Level 21 Disease **Endurance improve DC 29, maintain DC 24, worsen DC 23 or lower**

The target is cured ◀ **Initial Effect:** The target regains only half the normal number of hit points from healing effects. ◀▶ The target regains only half the normal number of hit points from healing effects. In addition, the target takes 10 necrotic damage, which cannot be healed until the target is cured of the disease. ▶ The target dies.

2 squares between them and their undead allies. If a giant mummy becomes blinded, it shifts in a random direction each round and attacks the closest creature it notices until it succeeds on a saving throw. The giant mummies fight until destroyed.

The death giant soulfire hurlers hang back in area 2 and use *hurled soulfire* against controllers and leaders lurking behind defenders. They use this tactic, falling back deeper into their room if needed, until they exhaust their soul shards. When they can't use their area attacks, they draw their greataxes and engage the lead characters in melee, slaying fallen characters to harvest new soul shards when possible.

The death giants fight until reduced to 44 or fewer hit points. One flees to enlist the death giants in area 4, while the other moves to area 10 to warn the gold dragon.

## Features of the Area

**Illumination:** Darkness.

**Doors:** Two sets of doors are set in the western walls, one off area 1 and the other leading from area 2. The doors off area 1 are unlocked and bear bas-reliefs of the death giant city, a jumble of towers, bridges, and steep walls. The doors leading from area 2 are described on page 139.

**Stairs:** A steep set of stairs climbs to area 2. Each space containing these stairs costs 3 squares of movement to enter. Both sets of stairs in area 2 also are steep and require 3 squares of movement to enter.

**Eye:** A 35-foot-diameter opening occupies the center of area 1. A character falling through the opening drops away to land on the Plain of Sighing Stones. The distance the character falls depends on how high the Citadel is flying (typically 200 feet).

**Damaged Floor:** The floor in area 2 is damaged. Any creature entering a space containing the damaged floor must succeed on a saving throw or fall through the crack to plummet to the plain as described on page 139.

**Statues:** Two statues flank the western doors in area 1. Each statue depicts a towering winged humanoid dressed in robes. In place of a head, each has a skull with green fire burning in the eye sockets. These statues contain necrotic power, and any undead creature starting its turn in a space adjacent to a statue gains 10 temporary hit points. Any living creature in a space adjacent to the statue regains only half its healing surge value when spending a healing surge.

A character can topple a statue with a DC 24 Strength check and cause any creature in the statue's path to be targeted by the following attack: reach 2; +24 vs. Reflex; 2d12 + 8 damage, and the target is knocked prone and is immobilized (save ends). A toppled statue loses its necrotic qualities. A statue has AC 4, Fortitude 10, Reflex 4, and 80 hit points. A DC 16 Athletics check is required to climb a statue.

**Hieroglyphics:** The walls throughout both rooms are painted in complex pictograms recounting the rise and fall of the death giant city. A character capable of reading the Davek or Supernal scripts can make out enough of their meaning to piece together the dragon's history as described in the "Background" entries on page 138.

# Night Haunt

**Encounter Level 24 (32,450 XP)**

## Setup

**1 that which should not be trap (W)**
**1 entropic collapse trap** (E)
**Askaran-Rus** (A)
**3 death giants** (G)

Askaran-Rus was once a mortal necromancer, but when his time ran out and his soul drifted to the Shadowfell, he refused to surrender to fate and instead gathered the stuff of shadow to construct a new body for himself—an obscene thing filled with cruelty, spite, and endless malice.

It was an accident that Askaran-Rus wound up in the Citadel. He, like others before him, sought to enslave the indigenous people wandering the Plain of Sighing Stones and was swept up with the rest when the Citadel descended. Neither the death giants nor the dragon has much interest in the nightwalker, and Askaran-Rus has little interest in them. What he seeks is escape, and he believes he has found it in the portal shining in this room.

This encounter can occur if the characters enter area 3 or area 4. See page 139 for details on area 4.

**When the PCs can see into area 3, read:**
*Beyond the doors, you see what looks to be a shrine of sorts. Strange pillars stretch fifty feet to the ceiling overhead, and a pale stone basin holds a bubbling noxious black slime. At the north end of the room, a shimmering window shines with blue light. You also see a towering figure of a black giant, composed of inky darkness except for its eyes, which burn with white light.*

## Tactics

Askaran-Rus goes on the offensive when he notices the characters. He makes a slam attack against any creature that comes within his reach and uses *void gaze* to rid himself of any defenders or melee strikers. He moves deeper into the room when possible, hoping to lure the adventurers into the area of entropic collapse or push them into that which should not be. He reserves *finger of death* for the character who annoys him the most. Askaran-Rus has no intention of dying today—or any other day. If he thinks he might lose, he'll look for an opportunity to escape.

The death giants respond to sounds of combat, starting on the second round, and move from their starting positions to investigate. Once the death giants join the fight, the nightwalker switches tactics. He uses *void gaze* to push enemies into squares adjacent to the death giants, so the giants can burn the adventurers with their burst attacks. The death giants rely on greataxe attacks until two or more enemies are in range of *soulfire burst*. The death giants fight until destroyed.

**Askaran-Rus (A)** **Level 24 Elite Brute (Leader)**
Large shadow humanoid (undead), nightwalker XP 12,100

**Initiative** +18 **Senses** Perception +17; darkvision
**Void Chill (Cold, Necrotic)** aura 5; each enemy that starts its turn in the aura takes 5 cold and necrotic damage and grants combat advantage until the start of the enemy's next turn.
**HP** 548; **Bloodied** 274
**AC** 35; **Fortitude** 37, **Reflex** 35, **Will** 37
**Immune** disease, poison; **Resist** 20 cold, 20 necrotic; **Vulnerable** 20 radiant
**Saving Throws** +2
**Speed** 8
**Action Points** 1

⊕ **Slam** (standard; at-will) ✦ **Cold, Necrotic**
Reach 2; +27 vs. AC; 1d8 + 8 damage plus 2d8 cold and necrotic damage, and the target is dazed until the end of Askaran-Rus's next turn.

↗ **Finger of Death** (standard; encounter) ✦ **Gaze, Necrotic**
Ranged 5; targets a bloodied creature; +25 vs. Fortitude; the target drops to 0 hit points. (Resistance to necrotic damage doesn't affect this power.)

✧ **Void Gaze** (minor 1/round; at-will) ✦ **Gaze, Necrotic**
Close blast 5; +25 vs. Will; 2d10 + 8 necrotic damage, Askaran-Rus pushes the target 4 squares, and the target takes a -2 penalty to all defenses (save ends).

**Alignment** Evil **Languages** Common, telepathy 20
**Skills** Stealth +23
**Str** 26 (+20) **Dex** 22 (+18) **Wis** 20 (+17)
**Con** 24 (+19) **Int** 16 (+15) **Cha** 26 (+20)

**3 Death Giants (G)** **Level 22 Brute**
Large shadow humanoid (giant) XP 4,150 each

**Initiative** +16 **Senses** Perception +19; darkvision
**Soulcatcher** aura 5; a creature that dies within the aura bestows one soul shard to the death giant (see *soul shroud*).
**HP** 255; **Bloodied** 127
**AC** 34; **Fortitude** 37, **Reflex** 33, **Will** 31
**Resist** 15 necrotic
**Speed** 7

⊕ **Greataxe** (standard; at-will) ✦ **Weapon**
Reach 2; +25 vs. AC; 4d6 + 9 damage (crit 4d6 + 33).

✧ **Soulfire Burst** (standard; at-will) ✦ **Necrotic**
Close burst 1; +23 vs. Reflex; 2d8 + 5 necrotic damage. The death giant must expend one soul shard to use this power.

**Consume Soul Shard** (minor; at-will) ✦ **Healing**
The death giant expends one soul shard and regains 20 hit points.

**Soul Shroud**
The *soul shroud* contains soul shards that swirl around the death giant to protect and empower it. At the beginning of an encounter, the *soul shroud* contains four soul shards. While the *soul shroud* is depleted of soul shards, the death giant takes a -2 penalty to attack rolls.

**Alignment** Evil **Languages** Giant
**Skills** Intimidate +18
**Str** 28 (+20) **Dex** 20 (+16) **Wis** 16 (+14)
**Con** 25 (+18) **Int** 12 (+12) **Cha** 15 (+13)
**Equipment** chainmail, greataxe

**Entropic Collapse (E)** **Level 23 Warder**
Trap XP 5,100

*This chamber swirls with dust, as though no one has disturbed the place in a long, long time.*

**Trap:** Golgorax relishes the idea of sharing his madness with creatures that would dare enter his Citadel. He had set his entropic collapse to release as soon as any creature—magical or not—comes within 2 squares of the portal. It creates a temporary unweaving of the strands of time. Although reality reasserts itself a few moments later, the damage to the psyches of those that glimpse beyond time takes longer to heal.

**Perception**
✦ DC 29: The character notices that the swirling dust appears to glow with faint luminescence.
**Additional Skill:** Arcana
✦ DC 24: The character notices and identifies the telltale dust glow that often presages entropic collapse.

**Trigger**
When a character moves into a square within 2 squares of the portal, or when a character 3 or fewer squares away uses an arcane power, the trap attacks.

**Attack ✦ Psychic**
**Opportunity Action** **Close** burst 3
**Target:** Each creature in burst
**Attack:** +29 vs. Will
**Hit:** 5d6 + 8 psychic damage, and the target is dazed (save ends).
**Miss:** Half damage, and the target is dazed (save ends).
**Special:** Immortals, animates, and undead are immune to the effects of an entropic collapse.

**That Which Should Not Be (W)** **Level 20 Blaster**
Trap XP 2,800

*A black soupy morass fills the basin and when a living creature draws near, it stirs into action.*

**Trap:** The basin ooze is a little touchy, and the trap springs as soon a living creature moves adjacent to it.

**Perception**
✦ DC 16: The character notices the foulness in the basin.
✦ DC 24: The character notices the fluids twitch and writhe.
**Initiative** +24

**Trigger**
When a character ends its movement in a space adjacent to the basin, the hazard rolls initiative and attacks on its turn.

**Attack ✦ Necrotic**
**Standard Action** **Melee** 5
**Target:** One creature
**Attack:** +23 vs. Reflex
**Hit:** 2d6 + 7 necrotic damage, and the target is grabbed. It takes a -5 penalty to attempts to escape the grab. The creature takes ongoing 10 necrotic damage as long as it is grabbed by that which should not be.
**Miss:** Half damage, and the target is knocked prone.
**Special:** That which should not be can have up to four creatures grabbed at once.

**Countermeasures**
✦ A creature can attack that which should not be with a fire attack (AC 32, other defenses 30). If that which should not be is hit with two fire attacks, it is disabled.
✦ With a DC 27 Strength check, a creature can knock the basin to the floor, spilling the ooze and disabling the trap.

## Features of the Area

**Illumination:** Light from the portal provides area 3 with dim light.

**Pillars:** Four 50-foot-tall pillars support the ceiling in area 3. Each pillar has AC 4, Fortitude 10, Reflex 4, and 80 hit points. Destroying a pillar causes it to create a zone of difficult terrain in a close burst 1 centered on the pillar that lasts until cleared. If three or more pillars fall, the ceiling starts to collapse. At the end of each round, make an attack against each creature in the room: +24 vs. Reflex; 2d6 + 7 damage, and the target is knocked prone. On a critical hit, the target is knocked prone and restrained (save ends). After 3 rounds of this, the entire ceiling collapses, automatically burying all creatures in the room. All creatures take 3d10 + 5 damage and are trapped. It takes a DC 26 Athletics check to crawl out of the rubble.

**Statues:** Two statues that depict fused bodies and faces trapped in stasis stand near the middle of area 3. Characters standing in spaces adjacent to these statues grant combat advantage to all enemies. Each statue has AC 4, Fortitude 10, Reflex 4, and 40 hit points. Reducing a statue to 0 hit points causes the statue to make the following attack: close burst 2: +24 vs. Will, and the target is pushed 3 squares and dazed (save ends).

**Permanent Portal:** The portal opens onto the natural world to a location of your choosing. A creature that moves through it passes to the natural world instantly, and the portal becomes inactive until the start of the next round.

**Stairs:** Characters climbing the stairs in area 4 must spend 3 squares of movement to enter their spaces.

# Gold Madness

**Encounter Level 26 (54,352 XP)**

## Setup

**Golgorax, the Golden Architect** (G)
**1 death titan** (T)
**2 voidsoul specters** (V)
**4 death thrall attendants** (D)

The Golden Architect coils around his treasure on the ledge overlooking the room, tossing insults and making impossible demands of his servants.

**When the PCs can see into this area, read:**
*Although this massive chamber stands in shambles, you can still see what this room once was. Walls bear gold leaf in strips. Intricate carvings evoke draconic imagery, wisdom, and architectural wonders—all captured in the complex pictographic patterns still visible in some places. The ceiling has largely given away, revealing ledges tens of feet in the air.*

*As you take in the scene, you notice shapes stirring in the room's shadows. Four large, shadowy humanoids turn eyes toward you, while n even larger one rises from its place to confront you from behind the bronze death mask concealing its features.*

*As the tension spikes, a shrill laugh sounds from above, and you see tarnished gold scales reflecting light dully from the draconic visage peering over the lip of the room's highest ledge.*

**Perception Check**
**DC 34** *You see pale figures swirling around inside the yawning hole in the floor.*

## Tactics

The battle here erupts swiftly. The giants and dragon converge on the adventurers in rage that their inner sanctum has been breached. The gold dragon descends from his ledge, using *fearsome presence* to daze the characters, and then he uses his *breath weapon*, not caring whether it catches his allies. The dragon maneuvers to keep allies inside his aura.

When the death titan exhausts its soul shards, the dragon uses *confer soul shard* to boost its ally's attacks. The death titan uses *soul devourer* against the lead character and then moves and spends its action point to make a melee or *soulfire burst* attack.

The death titan keeps moving to keep the largest number of adventurers inside its aura and fights alongside the thrall attendants so it can scoop up their soul shards when they are slain.

The voidsoul specters creep behind the characters' front lines to attack leaders, ranged strikers, and controllers. They avoid divine characters when possible, turning invisible to escape their notice. All the monsters fight until destroyed.

**Golgorax (G)** **Level 28 Elite Controller (Leader)**
Elder gold dragon
Huge natural magical beast (dragon, shapechanger) XP 26,000

**Initiative** +21 **Senses** Perception +23; darkvision
**Emboldening Flames (Fire)** aura 3; each ally within the aura deals 5 extra fire damage on its melee and ranged attacks.
**HP** 522; **Bloodied** 261; see also *bloodied breath*
**AC** 42; **Fortitude** 39, **Reflex** 42, **Will** 41
**Resist** 25 fire
**Saving Throws** +2
**Speed** 8, fly 12 (hover), overland flight 15
**Action Points** 1

⊕ **Bite** (standard; at-will) ✦ **Fire**
Reach 3; +33 vs. AC; 2d8 + 9 damage plus 2d8 fire damage.

⊕ **Claw** (standard; at-will)
Reach 3; +33 vs. AC; 2d8 + 9 damage.

⸸ **Double Attack** (standard; at-will)
The dragon makes two claw attacks.

✧ **Breath Weapon** (standard; encounter) ✦ **Fire**
Close blast 5; +30 vs. Reflex; 5d8 + 9 fire damage, and the target is weakened (save ends). *Miss:* Half damage.

✧ **Bloodied Breath** (immediate reaction, when first bloodied; encounter)
Golgorax's *breath weapon* recharges, and the dragon uses it immediately.

✧ **Fearsome Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +30 vs. Will; the target is dazed until the end of Golgorax's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

✧ **Fiery Rebuke** (immediate reaction, when hit by an attack; at-will) ✦ **Fire**
Close burst 5; +30 vs. Fortitude; the target is pushed 5 squares and takes ongoing 10 fire damage (save ends).

✧ **Shadow Gloom** (minor; recharge ⚄ ⁞⁞) ✦ **Necrotic**
Close burst 3; targets enemies; +30 vs. Will; the target slides 3 squares and is blinded (save ends).

✧ **Confer Soul Shard** (minor; encounter) ✦ **Necrotic**
The dragon donates part of his soul to a death giant: Ranged 5; targets death giants or death titans; the target gains one soul shard, and the dragon grants combat advantage until the start of his next turn.

**Change Shape** (minor; encounter) ✦ **Polymorph**
The dragon can alter its physical form to take on the appearance of any Medium humanoid or beast (see Change Shape, *MM* 280).

**Alignment** Evil **Languages** Common, Draconic, Giant
**Skills** Arcana +30, Athletics +28, Diplomacy +29, History +30, Insight +23, Intimidate +29, Religion +30

| | | |
|---|---|---|
| **Str** 28 (+23) | **Dex** 24 (+21) | **Wis** 19 (+18) |
| **Con** 29 (+23) | **Int** 32 (+25) | **Cha** 30 (+24) |

## Features of the Area

**Illumination:** Darkness.

**Ceiling:** A domed ceiling rises 100 feet overhead.

**Ledges:** The two ledges in this room are remnants of the multiple levels that made up this chamber. The northern ledge is 30 feet overhead, and the southern one is 60 feet above the floor. The lower ledge is unstable. Any Medium or larger creature that ends its movement there is subject to an attack: +30 vs. Reflex; the floor gives way, dropping the target to the floor below for 3d10 damage.

**Doors:** Unlocked stone doors lead into this room. Because of their size and weight, they require a DC 24 Strength check to open.

| **Death Titan (T)** | **Level 25 Elite Brute** |
|---|---|
| Huge shadow humanoid (giant) | XP 14,000 |

**Initiative** +18 **Senses** Perception +20; darkvision
**Soulburner** aura 5; enemies in the aura take a -2 penalty to attack rolls and defenses; a creature that dies within the aura bestows one soul shard to the death titan (see *soul shroud*).
**HP** 574; **Bloodied** 287
**AC** 39; **Fortitude** 42, **Reflex** 38, **Will** 35
**Resist** 30 necrotic
**Saving Throws** +2
**Speed** 8
**Action Points** 1

**Greataxe** (standard; at-will) ✦ **Weapon**
Reach 3; +28 vs. AC; 2d8 + 10 damage (crit 6d8 + 26).

**Double Attack** (standard; at-will)
The death titan makes two greataxe attacks.

**Soul Devourer** (standard; recharge ⚅) ✦ **Necrotic**
Ranged 5; +28 vs. Fortitude; the target loses a healing surge, and the death titan's soul shroud gains one soul shard. A target without healing surges takes damage equal to half its total hit points.

**Soulfire Burst** (standard; at-will) ✦ **Necrotic**
Close burst 1; +26 vs. Reflex; 2d12 + 6 necrotic damage. The death titan must expend one soul shard to use this power.

**Consume Soul Shard** (minor; at-will) ✦ **Healing**
The death titan expends one soul shard and regains 20 hit points.

**Soul Shroud**
The *soul shroud* contains soul shards that swirl around the death titan to protect and empower it. At the beginning of an encounter, the *soul shroud* contains four soul shards. While the *soul shroud* is depleted of soul shards, the death titan takes a -2 penalty to attack rolls.

**Alignment** Evil **Languages** Giant
**Skills** Intimidate +20
**Str** 31 (+22) **Dex** 23 (+18) **Wis** 17 (+15)
**Con** 27 (+20) **Int** 12 (+13) **Cha** 16 (+15)
**Equipment** plate armor, greataxe

**Statues:** Four obsidian statues depicting the likeness of the gold dragon flank each set of doors. These statues radiate malice, and fear attacks against creatures in spaces adjacent to the statues gain a +2 bonus to the attack rolls.

| **2 Voidsoul Specters (V)** | **Level 23 Lurker** |
|---|---|
| Medium shadow humanoid (undead) | XP 5,100 each |

**Initiative** +23 **Senses** Perception +16; darkvision
**Spectral Cold** (**Cold**) aura 1; each enemy that starts its turn within the aura takes 10 cold damage and takes a -2 penalty to all defenses until the start of its next turn.
**HP** 115; **Bloodied** 57
**AC** 35; **Fortitude** 32, **Reflex** 35, **Will** 34
**Immune** disease, poison; **Resist** 30 necrotic, insubstantial; **Vulnerable** 10 radiant
**Speed** fly 8 (hover); phasing

**Spectral Touch** (standard; at-will) ✦ **Necrotic**
+25 vs. Reflex; 2d12 + 6 necrotic damage.

**Life Siphon** (standard; encounter) ✦ **Healing, Necrotic**
Close blast 5; +25 vs. Fortitude; 2d12 + 6 necrotic damage, and the voidsoul specter regains 5 hit points for every creature damaged by the attack.

**Invisibility** (minor 1/round; at-will) ✦ **Illusion**
The voidsoul specter becomes invisible until it attacks or until it is hit by an attack. It remains invisible while using *life siphon*.

**Alignment** Chaotic evil **Languages** Common
**Skills** Stealth +24
**Str** 12 (+12) **Dex** 26 (+19) **Wis** 10 (+11)
**Con** 19 (+15) **Int** 11 (+11) **Cha** 23 (+17)

| **4 Death Thrall Attendants (D)** | **Level 22 Minion Brute** |
|---|---|
| Large shadow humanoid (giant) | XP 1,038 each |

**Initiative** +16 **Senses** Perception +19; darkvision
**HP** 1; a missed attack never damages a minion.
**AC** 34; **Fortitude** 36, **Reflex** 33, **Will** 32
**Resist** 15 necrotic
**Speed** 7

**Greataxe** (standard; at-will) ✦ **Weapon**
Reach 2; +25 vs. AC; 11 damage (crit 21 damage).

**Soulfire Explosion** (when reduced to 0 hit points) ✦ **Necrotic**
Close burst 1; +23 vs. Reflex; 5 damage and the target loses a healing surge. If the target doesn't have a healing surge available, it takes damage equal to its healing surge value.

**Soul Thrall**
An attendant gains a +2 bonus to attack rolls while in a death giant's or death titan's aura.

**Alignment** Evil **Languages** Giant
**Str** 28 (+20) **Dex** 20 (+16) **Wis** 16 (+14)
**Con** 25 (+18) **Int** 12 (+12) **Cha** 15 (+13)
**Equipment** chainmail, greataxe

Each statue has AC 4, Fortitude 10, Reflex 4, and 80 hit points. If a statue is destroyed, the gold dragon becomes enraged and will spend his action point during his next turn.

**Gap:** A hole in the floor drops away to open air. A character falling through the opening lands on the Plain of Sighing Stones. The distance the character falls depends on how high the citadel is flying (typically 200 feet).

**Damaged Floor:** Each space adjacent to the gap is considered damaged. Any creature that enters a space containing damaged floor must succeed on a saving throw or fall through the crack to plummet to the Plain.

# THE EARTHEN DAGGER

**Mercury dragon lair for five 26th-level adventurers**

Throughout the tempestuous realms of the Elemental Chaos, massive "earthbergs" float through seas of water or magma, and even through the smoke and the empty skies. Some are tiny, mere rocks defying gravity; others are the size of great islands. These are often inhabited by great elementals, by demons, by slaads, by archons, and, yes, by dragons.

One of these, a great inverted mountain called the Earthen Dagger, is perhaps among the most dangerous—not just because it is the home of an amoral dragon of ancient age and mercenary temperament, not merely due to the potent elementals that guard him, not even because of the molten flows and poisonous fumes that rise from the hollows of the mountain as though fed by eternal springs. No, the Earthen Dagger poses such a threat because, thanks to planar magics that infuse its every rock, its orbit carries the earthberg—at seemingly random but all too frequent intervals—from the Elemental Chaos to the clouded skies of the world.

## Background

**Arcana or History DC 17:** There's no telling who or what might have occupied the Earthen Dagger in epochs past. Maybe the mountain occurred naturally in the turbulent Elemental Chaos, or perhaps it was ripped away from a larger landmass and deliberately set afloat. Doubtless, it played home to a wide variety of creatures throughout the years, and it surely spent many more years bereft of inhabitants as it passed through realms of poison, ice, and fire. During its sporadic visits to the mortal realm, powerful wizards and lesser dragons established lairs in its caverns only to find themselves assailed by dangers for which they were woefully unprepared when the mountain returned to its home plane. And then it was found, during one of its mortal world excursions, by the mercury dragon Tananzinaen.

**History DC 22:** A young dragon at the time, Tananzinaen had worked alongside several other dragons, both metallic and chromatic. Rather than compete for his own treasure and territory, Tananzinaen elected to help other dragons establish their territories, in exchange for hunting rights and a small percentage of their collected hoards. At one point, two rival dragons learned that Tananzinaen had hired himself out to both of them, and they expressed their displeasure with him violently. Escaping with nothing more than his life—and only barely that—the mercury dragon stumbled upon the Earthen Dagger and took shelter in its crags, hoping its movements would take him beyond his enemies' territories. Like so many before him, he was swept along when it returned to the Elemental Chaos—but unlike those before him, Tananzinaen was rugged enough to survive the new environment.

**History DC 28:** The ever-pragmatic dragon immediately recognized the value of such a lair. A sanctum that would, on a regular and (after long-term observation) predictable basis, take him to another world where his enemies could not follow was worth a great deal. Tananzinaen made himself at home and continued to hire out his services—as soldier, scout, courier, enforcer, or assassin—to other dragons as well as to mortal kings, emperors, priests, and criminals. He made certain to never again hire himself out to both sides of a conflict, and he swiftly found himself rolling in riches with contacts amid the rich and powerful across the world.

**History DC 31:** As he grew older and became powerful enough that hiding and secrecy were no longer of great concern, Tananzinaen began accepting contracts from creatures of the Elemental Chaos. At times, he worked for various sorts of elementals, but his most frequent employer became the Caliph Ma'mun, a political rival of the efreet Sultan of the City of Brass. As part of his payment, Tananzinaen demanded that the caliph supply him with guards, loyal soldiers that would protect his treasures and his lair when he was away.

And thus it stands today: A mercenary dragon, ancient and powerful, lairs within a floating isle that takes him from the mortal world to the Elemental Chaos and back, keeping him mostly out of reach of the many parties he has wronged. Only the greatest of heroes can hope to reach the Earthen Dagger, let alone fight their way through Tananzinaen's elemental guards and finally end the threat of the ancient dragon.

## Environment

There's nothing remotely normal about the Earthen Dagger and its environs. The inverted mountain floats through the skies of both the mortal realm and the Elemental Chaos. You might decide to give the characters a break and have the winds and weather remain relatively clear. Or you might buffet them with powerful storms or, in the Elemental Chaos, gusts of fire and toxic rains.

The outside slope of the mountain requires a DC 30 Athletics check to climb—in part because of its rough stone and the movement of the mountain, and in part because anyone scaling the mountain must contend with the outward angle of the slope.

The mountain is cloaked in a faint haze, toxic and uncomfortably hot. In addition to its combat effects (defined in the tactical encounters), it has a long-term impact on creatures. This is considered an environmental danger (*DMG* 158) consisting of pervasive smoke, requiring characters to make DC 26 Endurance checks when they enter this area for the first time (or when they reenter it after leaving). Anyone who fails this check loses a healing surge. This danger comes from a combination of the toxic haze and the heat, neither of which is nearly as dangerous on its own. Any creature immune to either fire or poison is not harmed by the haze.

When you run these encounters, decide how high off the ground the mountain is flying. It is important to establish the earthberg's flying height because creatures might find themselves pushed off the edges of area 1 or into the hole and down the slope providing egress from area 2.

The map shows only two levels of the mountain, but others could continue below these, either extensions of Tananzinaen's lair or home to something else of which even the dragon is unaware.

**As the PCs approach the floating isle, read:**
*You see an enormous mass of stone hanging in the sky. It's in the shape of a great mountain, but it is widest on top and tapers to a twisted point hundreds of feet lower. A shimmering haze hovers above its surface, and thick plumes of dark smoke rise from caverns deep within.*

JASON A. ENGLE

### Area 1: The Upper Level

This topmost level of the earthberg is a rugged stone surface, replete with numerous gaping craters that provide access to the level (or levels, if you choose) below. A broad plateau of stone on the southern end rises higher than its surroundings. The efreet guards dwell in a separate area, but most spend their waking hours here.

**Tactical Encounter:** "Fire at Will," page 150, and possibly "Poisoned Pit," page 152.

### Area 2: The Lower Level

This is the lair of Tananzinaen. The efreets do not come here unless in pursuit of invaders. The dragon is guarded by strange creatures formed of toxic haze called venomous remnants, formed by means of an ancient ritual around the escaping essences of those slain by the poisonous smoke. Tananzinaen does not take kindly to intrusion into his lair, and if the characters make it this far without being politely escorted out by the efreets, he assumes that they are enemies.

**Tactical Encounter:** "Fire at Will," page 150, and "Poisoned Pit," page 152.

## Treasure

Hidden in the lower level—within the areas of liquid stone, necrotic crystal, and/or toxic smoke—the characters might find wealth and magic items equivalent to two level 28 treasure parcels.

# Fire at Will

**Encounter Level 26 (53,300 XP)**

## Setup

**3 efreet flamestriders** (F)
**1 efreet karadjin** (K)
**1 efreet pyresinger** (P)
**1 thunderblast cyclone** (C)

The efreets that stand watch over Tananzinaen's lair, as part of his long-term payment from the Caliph Ma'mun, are vicious combatants, and they take their responsibility as sentries seriously. If any strangers—such as the characters—set foot upon the dragon's isle, the efreet karadjin challenges them, demanding to know their purpose. If they don't answer properly—if they do not swiftly convince it that they have come to hire the dragon for some great purpose—the karadjin demands they leave and immediately moves to attack.

**When the PCs first set foot on the earthberg, read:**

*As you set foot on the floating isle, you can feel the heat radiating from the stone surface. An array of ledges and narrow bridges overlook a deep chasm shrouded in dense haze. You can't see what lies below.*

*A thunderous voice, with an undertone of roiling flame, calls through the haze.*

**If any of the PCs speak or understand Draconic, continue:**

*"You have trespassed upon the sovereign domain of the mighty and blessed Tananzinaen, He of the Quicksilver Hide. Explain yourselves swiftly, lest you burn."*

**When the efreets attack, read:**

*Several forms appear in the haze. They have flames flickering across their flesh. One is taller than an ogre and carries a blazing scimitar. The others are slender and move about in the distance. Atop the eastern mesa, you see a whirling cyclone that seems to have lights reminiscent of eyes inside its shapeless form. As you take in this scene, two more efreets rise on columns of fire through the haze below.*

**Arcana Check**
**DC 26** *The smoke that wafts up from below is particularly noxious, leading you to the conclusion that exposure to it would increase your susceptibility to poison.*

## Tactics

The efreet karadjin and the flamestriders close to melee, while the pyresinger and the thunderblast cyclone remain at range, flying back and forth between areas or hovering off the edge of the earthberg to prevent characters from drawing near.

**3 Efreet Flamestriders (F)** **Level 23 Skirmisher**
Large elemental humanoid (fire) XP 5,100 each

**Initiative** +20 **Senses** Perception +15
**Blazing Soul (Fire)** aura 1; each creature within the aura that is taking ongoing fire damage takes 5 extra ongoing fire damage.
**HP** 217; **Bloodied** 108
**AC** 37; **Fortitude** 36, **Reflex** 35, **Will** 34
**Immune** fire
**Speed** 6, fly 8 (hover); see also *fiery teleport*

⨺ **Scimitar** (standard; at-will) ✦ **Fire, Weapon**
Reach 2; +28 vs. AC; 2d10 + 8 damage (crit 6d10 + 28), and ongoing 5 fire damage (save ends).

↛ **Fiery Grasp** (standard; at-will) ✦ **Fire**
Ranged 20; a fiery hand appears and grabs the target; +25 vs. Reflex; 1d6 + 8 fire damage, and the target takes ongoing 10 fire damage and is immobilized (save ends both).

**Fiery Teleport** (move; at-will) ✦ **Teleportion**
The flamestrider can teleport 20 squares, reappearing in a puff of smoke; its destination must be adjacent to a fire creature or a fire.

**Alignment** Evil **Languages** Primordial
**Skills** Bluff +22, Insight +20, Intimidate +20
**Str** 27 (+19) **Dex** 24 (+18) **Wis** 18 (+15)
**Con** 25 (+18) **Int** 16 (+14) **Cha** 22 (+17)
**Equipment** scimitar

**Efreet Karadjin (K)** **Level 28 Soldier (Leader)**
Large elemental humanoid (fire) XP 13,000

**Initiative** +23 **Senses** Perception +23
**HP** 260; **Bloodied** 130
AC 44; **Fortitude** 45, **Reflex** 42, **Will** 42
**Immune** fire
**Speed** 6, fly 8 (hover)

⨺ **Scimitar of Horrendous Flame** (standard; at-will) ✦ **Fire, Weapon**
Reach 2; +35 vs. AC; 2d10 + 9 damage (crit 6d10 + 29) plus 1d10 fire damage, and the target takes ongoing 15 fire damage and is immobilized (save ends both). *Aftereffect:* Ongoing 15 fire damage (save ends). Saving throws against this power take a -2 penalty.

↯ **Fiery Vendetta** (immediate reaction, when an enemy within reach attacks one of the efreet karadjin's allies; at-will) ✦ **Fire, Weapon**
The efreet karadjin makes a melee basic attack against the triggering enemy.

**Elemental Command** (minor; at-will)
One allied elemental creature within 10 squares of the efreet karadjin (and within its line of sight) shifts.

**Alignment** Evil **Languages** Draconic, Primordial
**Skills** Arcana +25, Bluff +26, Insight +23, Intimidate +26
**Str** 28 (+23) **Dex** 25 (+21) **Wis** 18 (+18)
**Con** 30 (+24) **Int** 22 (+20) **Cha** 25 (+21)
**Equipment** scimitar

The melee combatants favor pushing characters off edges or the bridge if circumstances allow, since they can easily follow using flight or teleportation. All the creatures fight to the death.

**Efreet Pyresinger (P)** **Level 25 Controller**
Large elemental humanoid (fire) XP 7,000

**Initiative** +20 **Senses** Perception +16
**Fiery Soul (Fire)** aura 1; each creature that enters the aura or starts its turn there takes 10 fire damage; each creature within the aura that is taking ongoing fire damage takes 5 extra ongoing fire damage.
**HP** 233; **Bloodied** 116
**AC** 40; **Fortitude** 37, **Reflex** 36, **Will** 36
**Immune** fire
**Speed** 6, fly 8 (hover)

⊕ **Scimitar** (standard; at-will) ✦ **Fire, Weapon**
Reach 2; +30 vs. AC; 2d10 + 9 damage (crit 6d10 + 29), and ongoing 5 fire damage (save ends).

↗ **Fire Bolt** (standard; at-will) ✦ **Fire, Weapon**
Ranged 10; +31 vs. AC; 3d6 + 8 fire damage, and ongoing 5 fire damage (save ends).

↗ **Fiery Chains** (standard; recharge ⚅ ⚅ ⚅) ✦ **Fire**
Ranged 10; +28 vs. Reflex; 2d8 + 7 fire damage, and the target takes ongoing 20 fire damage and is restrained (save ends both). As a move action, the efreet pyresinger can slide a target wrapped in *fiery chains* 1 square.

✵ **Sheets of Flame** (standard; recharge ⚅ ⚅ ⚅) ✦ **Fire, Zone**
Area burst 3 within 20; the pyresinger fills the area with 20-foot-high sheets of roaring flame. Any creature that enters the area or begins its turn in it or adjacent to it takes 10 fire damage. The sheets of flame block line of sight and last until the end of the pyresinger's next turn.

**Alignment** Evil **Languages** Draconic, Primordial
**Skills** Arcana +22, Bluff +25, Diplomacy +25, Insight +21, Intimidate +25
**Str** 29 (+21) **Dex** 26 (+20) **Wis** 18 (+16)
**Con** 25 (+19) **Int** 20 (+17) **Cha** 26 (+20)
**Equipment** scimitar, scepter

**Thunderblast Cyclone (C)** **Level 26 Elite Artillery**
Huge elemental magical beast (air, water) XP 18,000

**Initiative** +24 **Senses** Perception +16
**HP** 382; **Bloodied** 191
**AC** 42; **Fortitude** 40, **Reflex** 42, **Will** 35
**Immune** disease, poison; **Resist** 30 lightning, 30 thunder
**Saving Throws** +2
**Speed** fly 10 (hover)
**Action Points** 1

⊕ **Lightning Arc** (standard; at-will) ✦ **Lightning**
Reach 3; +29 vs. Reflex; 2d8 + 11 lightning damage.

↗ **Lightning Bolt** (standard; at-will) ✦ **Lightning**
Ranged 10; +29 vs. Reflex; 2d8 + 11 lightning damage.

✧ **Thunderclap** (standard; at-will) ✦ **Thunder**
Close burst 2; +28 vs. Fortitude; 2d10 + 9 thunder damage.

✧ **Charged Mist** (standard; recharge ⚅ ⚅) ✦ **Lightning**
Close burst 3; no attack roll; 1d10 + 9 lightning damage, and the thunderblast cyclone becomes insubstantial until the end of its next turn.

✵ **Lightning Storm** (standard; begins uncharged; recharges when the fireburst cyclone uses *charged mist*) ✦ **Lightning, Thunder**
Area burst 3 within 20; +29 vs. Reflex; 6d8 + 9 lightning and thunder damage. *Miss:* Half damage.

**Alignment** Unaligned **Languages** Primordial
**Str** 25 (+20) **Dex** 32 (+24) **Wis** 17 (+16)
**Con** 29 (+22) **Int** 8 (+12) **Cha** 15 (+15)

## Features of the Area

**Illumination:** Bright light.

**Bridges:** The bridges run above the interior of the Earthen Dagger, which is represented in the "Poisoned Pit" encounter on the following page.

**Elevation:** The elevation numbers on the map indicate the distance above the floor of the poisoned pit.

**Ledges:** The dashed lines on the map represent places where a ledge drops off from area 1 into area 2. These vertical surfaces require a DC 28 Athletics check to climb.

**Pervasive Haze:** The entire earthberg is cocooned in a faint haze. Creatures treat all squares more than 5 squares away as lightly obscured. The area below the bridges is heavily obscured, meaning creatures can't see down into the poisoned pit.

**Slopes:** A slope counts as difficult terrain for creatures moving up, but not down. A creature that is pushed or that slides down a slope moves 1 extra square, and a character that falls prone on a slope slides 1 square in the direction of lower elevation.

**Toxic Smoke:** The purple blotches on one of the bridges and on the western edge of the largest hole represent toxic smoke billowing up from below. The smoke is also present in the squares on either side of the bridge and those adjacent to the western ledge. A creature that begins its turn in toxic smoke gains vulnerable 10 poison until the end of its next turn.

# Poisoned Pit

**Encounter Level 29 (88,500 XP)**

## Setup

**Tananzinaen, ancient mercury dragon** (T)
**6 venomous remnants** (V)

The lower level of the earthberg is Tananzinaen's lair, where he basks in the warmth and the toxic fumes of the isle's molten pools. Whether he remained unaware of the combat above or chose to allow his guards to handle it, he did not emerge during the initial combat–but once the characters reach the lower level, he deems them a true threat.

**When the PCs enter the lowest level, read:**
*The flickering of molten rock, roiling clouds of toxic fumes, and thick shadows transform the cavern into an echo of the deepest hells.*

**If the PCs arrive more than 10 squares away from the dragon, continue with:**
*The air here is so thick with fumes that you can barely make out the features in front of you.*

**If the PCs arrive or move to within 5 squares of any venomous remnant, continue with:**
*Here and there, a thick pocket of haze seems to be moving. Tendrils of smoke form coiling, winding arms, and burning embers slowly blink, revealing themselves as eyes.*

| **Tananzinaen (T)** | **Level 29 Solo Lurker** |
|---|---|
| Ancient mercury dragon<br>Gargantuan natural magical beast (dragon, shapechanger) | XP 75,000 |

**Initiative** +28 **Senses** Perception +22; darkvision
**HP** 1,044; **Bloodied** 522; see also *bloodied breath*
**AC** 43; **Fortitude** 42, **Reflex** 43, **Will** 39
**Resist** 10 fire, 30 poison
**Saving Throws** +5
**Speed** 9, fly 8 (hover), overland flight 15
**Action Points** 2

**Claw** (standard; at-will)
Reach 4; +32 vs. AC; 2d8 + 12 damage.

**Bite** (standard; at-will)
Reach 4; +32 vs. AC; 2d10 + 12 damage.

**Draconic Fury** (standard; at-will)
The dragon makes two claw attacks and one bite attack.

**Quick Snap** (immediate interrupt, when an enemy moves adjacent to the dragon; at-will)
Tananzinaen makes a bite attack against the triggering enemy. On a hit, the target also grants combat advantage to Tananzinaen (save ends).

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Poison**
Close blast 5; +32 vs. Fortitude; 4d8 + 8 poison damage, and the target takes ongoing 15 poison damage and treats the mercury dragon as invisible (save ends both). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Tananzinaen uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +32 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Caliph's Reward** (minor; usable only while bloodied; encounter) ✦ **Fire**
Close burst 10; targets enemies; +30 vs. Reflex; the target takes ongoing 15 fire damage and a -2 penalty to all defenses (save ends both).

**Fluid Shape** (immediate interrupt; when an enemy targets the dragon; requires a creature be adjacent to the dragon; recharge ⚄ ⁞⁞) ✦ **Polymorph**
The triggering attack targets a different creature adjacent to Tananzinaen.

**Quicksilver Form** (move action; encounter) ✦ **Polymorph**
Tananzinaen becomes a liquid wave of quicksilver and shifts 8 squares. He remains in quicksilver form until the end of his next turn. While in quicksilver form, Tananzinaen can't attack or fly, but gains a climb speed of 6, ignores difficult terrain, and doesn't provoke opportunity attacks. He can squeeze through any aperture a Tiny creature could fit through. Tananzinaen can return to his normal form as a free action on his turn. When he returns to normal, each creature within 2 squares grants combat advantage to him until the end of his next turn. *Sustain Minor:* The quicksilver form persists.

**Change Shape** (minor; at-will) ✦ **Polymorph**
Tananzinaen can alter his physical form to appear as any Medium or Large humanoid, including a unique individual (see "Change Shape," *MM2* 216).

**Combat Advantage**
Tananzinaen deals 3d6 extra damage against a target granting combat advantage to him.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Acrobatics +29, Bluff +26, Stealth +29

| | | |
|---|---|---|
| **Str** 26 (+22) | **Dex** 31 (+24) | **Wis** 17 (+17) |
| **Con** 21 (+19) | **Int** 15 (+16) | **Cha** 24 (+21) |

**If the PCs arrive or move to within 10 squares of the dragon, continue with:**

*In the darkest reaches of the cave, something stirs, something impossibly huge. It blends with the smoke, but you can see that its hide shimmers like liquid in the flickering light of the magma nearby.*

**6 Venomous Remnants (V)** **Level 26 Minion Artillery**
Medium elemental animate XP 2,250 each

**Initiative** +19 **Senses** Perception +18; darkvision
**Choking Aura (Poison)** aura 2; each living creature that enters the aura or starts its turn there takes 5 poison damage.
**HP** 1; a missed attack never damages a minion.
**AC** 38; **Fortitude** 37, **Reflex** 36, **Will** 39
**Immune** disease, poison
**Speed** fly 7 (hover)

**Toxic Touch** (standard; at-will) ✦ **Poison**
+31 vs. Reflex; 8 poison damage.

**Toxic Breath** (standard; at-will) ✦ **Poison**
Ranged 20; +33 vs. Fortitude; 12 poison damage.

**Venomous Rain** (standard; encounter) ✦ **Poison**
Area burst 3 within 20; targets enemies; +33 vs. Fortitude; the target loses any resistance to poison until the end of the venomous remnant's next turn and takes 10 poison damage.
*Effect:* Each venomous remnant in the area gains a +5 bonus to defenses until the end of the triggering remnant's next turn.

**Alignment** Unaligned **Languages** Abyssal, Draconic

| | | |
|---|---|---|
| **Str** 16 (+16) | **Dex** 22 (+19) | **Wis** 20 (+18) |
| **Con** 25 (+20) | **Int** 14 (+15) | **Cha** 28 (+22) |

## Tactics

When combat begins, the venomous remnants approach from multiple directions, possibly even departing the floor of the area and returning from another angle, rather than clumping up to offer characters the opportunity to take them down with a single area effect. They prefer to fight either in the toxic smoke or above the molten squares, because their ability to hover and their poison immunity grant them great tactical advantage in those areas. They take turns using *venomous rain* to make their and Tananzinaen's attacks more effective and to prolong their lives. Venomous remnants fight until destroyed.

Tananzinaen begins combat with his *breath weapon*, if doing so is tactically sound. Otherwise, he focuses an array of melee attacks against a single foe. In any case, Tananzinaen rarely engages in battle for more than a round or two at a time. By using *frightful presence*, his *breath weapon*'s invisibility, *quicksilver form*, or simple shift-and-move tactics, he moves away from melee after a round or two and departs the level. He either reenters with Stealth (keep in mind the concealment offered by the haze and smoke) or entices the characters to come after him—whatever it takes to become hidden or gain combat advantage.

Tananzinaen is a patient fighter, and he's quite content to force the characters to chase him up and down the two levels of the mountain as he watches for opportunities to ambush them (or possibly push them off the edges). He does not, however, grant them an opportunity for a rest; if it appears they aren't going to follow him after a minute or two, he reappears, engages in combat for a round or two, and retreats once more. Like the venomous remnants, he prefers to fight in the toxic smoke—or at least against foes that are in it.

This is Tananzinaen's lair, his treasure, and his place of business. Although he might seem to retreat, as described above, he never departs. He fights to the death to defend his home.

## Features of the Area

**Illumination**: Dim light.

**Ceiling:** Much of the lower level is open to the sky. In the east, the ceiling slopes, from as high as 70 feet to as low as 30 feet.

**Pervasive Haze:** The entire lower area of the earthberg is cocooned in a thick haze. Creatures treat all squares more than 5 squares away as lightly obscured and all squares more than 10 squares away as heavily obscured.

**Hole:** The hole drops roughly 20 feet straight down before turning into a steep slope that runs for another 40 feet to the southeast, leading to an exit from the mountain (not shown on the map). It requires a DC 28 Athletics check to climb.

**Walls and Pillars:** The various vertical surfaces here require a DC 28 Athletics check to climb.

**Molten Rock:** A creature that enters or starts its turn in a square of molten rock (the red areas) takes 10 fire damage and is slowed until the start of its next turn.

**Necrotic Crystal:** This deep violet crystal radiates necrotic magic. Any attack against a creature standing in a patch of necrotic crystal scores a critical hit on a roll of 18–20. On such a critical hit, half the damage is necrotic rather than the attack's normal damage type. (Flying creatures are unaffected, unless they land in such a square.)

**Toxic Smoke:** The smoke in the areas represented by purple blotches rises from the molten rock. A creature that begins its turn in this toxic smoke gains vulnerable 10 poison until the end of its next turn.

CHAPTER 4

# New Monsters

LARS GRANT-WEST

THE FIVE varieties of metallic dragon introduced in *Monster Manual 2*—the adamantine, iron, copper, silver, and gold—are the most common kinds. Many other metallic dragons roam the world and the planes beyond. Fiery brass dragons soar over the desert skies, fierce cobalt dragons lurk amid the cold mists of the Shadowfell, and shapechanging steel dragons roam the crowded cities of humankind in the guises of male and female humanoids.

Like the more commonly known metallic dragons, the members of these varieties run the gamut of alignment, motivation, and personality. Some are noble champions of good, while others are merciless tyrants or self-serving plunderers. Even the most benevolent and reasonable of metallic dragons are proud and inflexible creatures, rarely willing to alter their course at the urging of humans or their kind; more than a few societies have found that a "benevolent" dragon's ambitions signal disaster for lesser beings in the area. Few creatures in the world have the power to act for good or evil as dragons do.

Many creatures can trace their origins to metallic dragons, or claim some kinship with them. The fierce magical warriors known as draconians hatch from corrupted metallic dragon eggs, while vulture drakes and liondrakes are both distant cousins of dragons. Metallic dragons also attract servants and create constructs for their defense. Kobolds, known for their devotion to chromatic dragons, sometimes serve metallic dragons too.

In this chapter, you'll find the following:

- Descriptions of the rarer metallic dragons—brass, bronze, cobalt, mercury, mithral, orium, and steel.
- Wyrmlings of each metallic dragon variety.
- Creatures made from metallic dragons, including the evil race of draconians and hollow dragon constructs.
- Monsters that have draconic heritage or associations, such as couatls and liondrakes.
- Legendary metallic dragons of the world, and the god Bahamut, the Platinum Dragon.
- Methods of customization, including alternative powers and a method for making solo dragons into elites.

# Metallic Dragons

Adamantine, iron, copper, silver, and gold dragons are the most common and well-known metallic dragons (see *Monster Manual 2*). However, other varieties exist, including brass, bronze, cobalt, mercury, mithral, orium, and steel dragons.

## Brass Dragon

Fire-breathing monsters haunting deserts and other dry lands, brass dragons tend to be callous, violent, and selfish. The best are honorable mercenaries, brave and loyal if paid well. The worst are brigands that plunder any travelers who venture into their territory.

### Brass Dragon Lore

**Nature DC 12:** Brass dragons favor deserts and arid badlands. Their breath takes the form of a fiery blast that can force nearby foes to give ground or a jet of flame that can burn an enemy and all others around it.

**Nature DC 17:** Brass dragons have a pronounced mercenary streak and often strike bargains with neighboring monsters to fight on their behalf in exchange for treasure. They ally with azers, dragonborn, efreets, hill giants, humans, and yuan-ti.

### Brass Dragon Tactics

Brass dragons fight on the wing. They make good use of their hover ability to remain airborne and out of the reach of ground-bound enemies, scouring foes with blasts of fire—both their *breath weapon* and *fire stream* attacks. Once its foes are scattered, a brass dragon singles out the foe who poses the most dangerous threat at range and lands to attack. Normally the dragon lands next to its intended victim, attacks with *dragon ire*, and then spends an action point to stun its foes momentarily with *frightful presence* so that it can take to the air again before its enemies can threaten it on the ground.

An elder or ancient brass dragon usually waits to use *ignite* until after it hits multiple targets with its breath weapon.

### Encounter Groups

Brass dragons ally with well-organized humanoid bands that can meet their price (usually, the lion's share of any treasure they take). They prefer to hang back and provide devastating ranged fire, while their brute and soldier allies press the attack.

**Level 6 Encounter (XP 1,325)**
- 3 human guards (level 3 soldier, *MM* 162)
- 1 young brass dragon (level 4 solo artillery)

**Level 13 Encounter (XP 4,000)**
- 1 adult brass dragon (level 11 solo artillery)
- 2 minotaur warriors (level 10 soldier, *MM* 190)

**Young Brass Dragon** **Level 4 Solo Artillery**
Large natural magical beast (dragon) XP 875

**Initiative** +5 **Senses** Perception +9; darkvision
**HP** 232; **Bloodied** 116; see also *bloodied breath*
**AC** 17; **Fortitude** 17, **Reflex** 16, **Will** 15
**Resist** 15 fire
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12
**Action Points** 2

**Bite** (standard; at-will) ✦ **Fire**
Reach 2; +11 vs. AC; 1d8 + 3 damage plus 1d6 fire damage.

**Claw** (standard; at-will)
Reach 2; +11 vs. AC; 1d6 + 3 damage.

**Dragon Ire** (standard; at-will)
The dragon makes two claw attacks or one bite attack, and then shifts 1 square.

**Wing Buffet** (immediate reaction, when an enemy enters or leaves an adjacent square)
Targets the triggering enemy; +9 vs. Fortitude; 1d8 + 3 damage, the target is knocked prone, and the dragon shifts 2 squares.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Fire**
Close blast 5; +9 vs. Reflex; 3d6 + 3 fire damage, and the dragon pushes the target 3 squares. *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Fire Stream** (standard; at-will) ✦ **Fire**
Ranged 5; +9 vs. Reflex; 1d8 + 5 fire damage. *Effect:* Each creature adjacent to the target takes 1d8 fire damage.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +9 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +10, Insight +9, Intimidate +8
**Str** 17 (+5) **Dex** 16 (+5) **Wis** 15 (+4)
**Con** 18 (+6) **Int** 13 (+3) **Cha** 12 (+3)

**Adult Brass Dragon** **Level 11 Solo Artillery**
Large natural magical beast (dragon) XP 3,000

**Initiative** +9 **Senses** Perception +13; darkvision
**HP** 464; **Bloodied** 232; see also *bloodied breath*
**AC** 24; **Fortitude** 24, **Reflex** 23, **Will** 22
**Resist** 20 fire
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12
**Action Points** 2

**Bite** (standard; at-will) ✦ **Fire**
Reach 2; +18 vs. AC; 1d10 + 5 damage plus 1d6 fire damage.

**Claw** (standard; at-will)
Reach 2; +18 vs. AC; 1d8 + 5 damage.

**Dragon Ire** (standard; at-will)
The dragon makes two claw attacks or one bite attack, and then shifts 1 square.

**Wing Buffet** (immediate reaction, when an enemy enters or leaves an adjacent square)
Targets the triggering enemy; +16 vs. Fortitude; 1d10 + 5 damage, the target is knocked prone, and the dragon shifts 2 squares.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Fire**
Close blast 5; +16 vs. Reflex; 3d8 + 5 fire damage, and the dragon pushes the target 3 squares. *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it. If the dragon is flying, it can shift up to 5 squares before making this attack.

**Fire Stream** (standard; at-will) ✦ **Fire**
Ranged 10; +16 vs. Reflex; 2d6 + 5 fire damage. *Effect:* Each creature adjacent to the target takes 2d6 fire damage.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +16 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +14, Insight +13, Intimidate +11
**Str** 19 (+9) **Dex** 18 (+9) **Wis** 16 (+8)
**Con** 20 (+10) **Int** 15 (+7) **Cha** 13 (+6)

## Elder Brass Dragon — Level 18 Solo Artillery

Huge natural magical beast (dragon) — XP 10,000

**Initiative** +14 **Senses** Perception +18; darkvision
**HP** 704; **Bloodied** 352; see also *bloodied breath*
**AC** 31; **Fortitude** 31, **Reflex** 30, **Will** 29
**Resist** 25 fire
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 15
**Action Points** 2

**Bite** (standard; at-will) ✦ **Fire**
Reach 3; +25 vs. AC; 2d6 + 7 damage plus 1d12 fire damage.

**Claw** (standard; at-will)
Reach 3; +25 vs. AC; 1d10 + 7 damage.

**Dragon Ire** (standard; at-will)
The dragon makes two claw attacks or one bite attack, and then shifts 1 square.

**Wing Buffet** (immediate reaction, when an enemy moves enters or leaves an adjacent square)
Targets the triggering enemy; +23 vs. Fortitude; 2d8 + 7 damage, the target is knocked prone, and the dragon shifts 2 squares.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Fire**
Close blast 5; +23 vs. Reflex; 4d10 + 7 fire damage, and the dragon pushes the target 3 squares. *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it. If the dragon is flying, it can shift 10 squares before making this attack.

**Fire Stream** (standard; at-will) ✦ **Fire**
Ranged 15; +23 vs. Reflex; 2d8 + 7 fire damage. *Effect:* Each creature adjacent to the target takes 2d8 fire damage.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +23 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Ignite** (free, after using *breath weapon* or *fire stream*; encounter) ✦ **Fire**
Any creature hit by the triggering attack also takes ongoing 10 fire damage and is dazed (save ends both).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +20, Insight +18, Intimidate +16, Nature +18
**Str** 23 (+15) **Dex** 20 (+14) **Wis** 18 (+13)
**Con** 24 (+16) **Int** 17 (+12) **Cha** 15 (+11)

CHRIS SEAMAN

**Ancient Brass Dragon** **Level 26 Solo Artillery**
Gargantuan natural magical beast (dragon) XP 45,000

**Initiative** +20 **Senses** Perception +23; darkvision
**HP** 968; **Bloodied** 484; see also *bloodied breath*
**AC** 39; **Fortitude** 39, **Reflex** 38, **Will** 37
**Resist** 30 fire
**Saving Throws** +5
**Speed** 8, fly 12 (hover), overland flight 15
**Action Points** 2

**Bite** (standard; at-will) ✦ **Fire**
Reach 4; +33 vs. AC; 2d8 + 9 damage plus 2d8 fire damage.

**Claw** (standard; at-will)
Reach 4; +33 vs. AC; 2d8 + 9 damage.

**Dragon Ire** (standard; at-will)
The dragon makes two claw attacks or one bite attack, and then shifts 2 squares.

**Wing Buffet** (immediate reaction, when an enemy enters or leaves an adjacent square)
Targets the triggering enemy; +31 vs. Fortitude; 2d10 + 9 damage, the target is knocked prone, and the dragon shifts 2 squares.

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Fire**
Close blast 7; +31 vs. Reflex; 5d10 + 9 fire damage, and the target is knocked prone. *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it. If the dragon is flying, it can shift 12 squares before making this attack.

**Fire Stream** (standard; at-will) ✦ **Fire**
Ranged 20; +31 vs. Reflex; 3d8 + 9 fire damage. *Effect:* Each creature adjacent to the target takes 3d8 fire damage.

**Fiery Strafe** (standard; recharge ⁞⁞) ✦ **Fire, Zone**
The dragon flies up to 12 squares and creates a wall of fire 1 square high on the ground directly beneath its path; area wall 12 within 10 (only in squares the dragon flew over); any creature that starts its turn in the wall's space or moves into it takes 25 fire damage. The wall lasts until the end of the dragon's next turn.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +31 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Ignite** (free, after using *breath weapon* or *fire stream*; encounter) ✦ **Fire**
Any creature hit by the triggering attack also takes ongoing 15 fire damage and is dazed (save ends both).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +26, Insight +23, Intimidate +21, Nature +23
**Str** 27 (+21) **Dex** 24 (+20) **Wis** 20 (+18)
**Con** 26 (+21) **Int** 19 (+17) **Cha** 17 (+16)

# BRONZE DRAGON

Order's sworn servants, bronze dragons can seem arrogant and haughty, with an inflated sense of self, a tendency that can put them at odds with those they meet. In rare cases, this self-righteousness grows into something far more sinister, and the bronze dragon takes over what it sees as lesser races, ruling as a cruel tyrant that demands worship and subservience from its subjects. Bronze dragons claim coastlines, inlets, and islands as their own, constructing lairs in coastal caves that have access to the sea. More aggressive bronze dragons purposely choose lairs near shipping lanes so they can claim tribute from merchant vessels as those craft pass by. All bronze dragons share a deep and abiding hatred for blue dragons, and they are vigilant in protecting their homes from these despised interlopers.

## Bronze Dragon Lore

**Nature DC 14:** Bronze dragons live in coastal areas, especially in places where they can collect tribute from other creatures. In combat, a bronze dragon dives directly into melee.

**Nature DC 19:** Arrogant and haughty, bronze dragons sometimes become tyrants over members of lesser races. Bronzes breathe lightning that blasts opponents back, then arcs off to hit others.

## Bronze Dragon Tactics

A bronze dragon is an unsubtle opponent that engages its enemies in close combat, when its attacks are the most effective. The dragon starts combat by moving to a position where it can catch two or more enemies with its *breath weapon*. It uses *frightful presence* to soften up the opposition, and then it spends an action point to use its *breath weapon*, blasting the close targets and then punishing cowards hiding in the back, as lightning arcs from one enemy to the next.

## Encounter Groups

A bronze dragon rarely keeps the company of other creatures, tolerating only those that show it the respect and honor it believes it is due.

**Level 16 Encounter (XP 7,000)**
- 1 adult bronze dragon (level 14 solo brute)
- 8 cyclops guards (level 14 minion, *MM* 46)

**Level 24 Encounter (XP 33,550)**
- 1 elder bronze dragon (level 21 solo brute)
- 1 storm devil (level 23 artillery, *Manual of the Planes* 127)
- 3 war devils (level 22 brute, *MM* 67)

**Young Bronze Dragon** **Level 7 Solo Brute**
Large natural magical beast (aquatic, dragon) XP 1,500

**Initiative** +6 **Senses** Perception +8; darkvision
**HP** 296; **Bloodied** 148; see also *bloodied breath*
**AC** 19; **Fortitude** 21, **Reflex** 18, **Will** 18
**Resist** 15 lightning
**Saving Throws** +5
**Speed** 6, fly 8 (hover), overland flight 10, swim 6
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Lightning**
Reach 2; +10 vs. AC; 1d10 + 6 damage plus 2d6 lightning damage.

⊕ **Claw** (standard; at-will)
Reach 2; +10 vs. AC; 2d6 + 8 damage.

⨽ **Double Attack** (standard; at-will)
The dragon makes two claw attacks.

⨽ **Wing Smash** (immediate reaction, when an enemy moves to a space where it flanks the dragon; at-will)
+8 vs. Fortitude; 1d12 + 6 damage, and the dragon pushes the target 1 square.

↼ **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Lightning**
Close blast 3; +8 vs. Reflex; 2d8 + 4 lightning damage, and the dragon pushes the target 2 squares. If the attack hit at least one target, the dragon makes a secondary attack against a creature within 10 squares that was not a target of the primary attack. *Miss:* Half damage. *Secondary Attack:* +8 vs. Reflex; 2d8 + 4 lightning damage, and the dragon pushes the target 1 square.

↼ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

↼ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +8 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Restorative Dive** (minor; while bloodied and completely submerged in water; encounter) ✦ **Healing**
The dragon regains 74 hit points and gains a +2 bonus to attack rolls until the end of its next turn.

**Alignment** Unaligned **Languages** Common, Draconic
**Str** 23 (+9) **Dex** 17 (+6) **Wis** 11 (+3)
**Con** 18 (+7) **Int** 11 (+3) **Cha** 16 (+6)

**Adult Bronze Dragon** **Level 14 Solo Brute**
Large natural magical beast (aquatic, dragon) XP 5,000

**Initiative** +12 **Senses** Perception +13; darkvision
**HP** 507; **Bloodied** 253; see also *bloodied breath*
**AC** 26; **Fortitude** 28, **Reflex** 25, **Will** 25
**Resist** 20 lightning
**Saving Throws** +5
**Speed** 6, fly 8 (hover), overland flight 10, swim 6
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Lightning**
Reach 2; +17 vs. AC; 2d8 + 8 damage plus 3d6 lightning damage.

⊕ **Claw** (standard; at-will)
Reach 2; +17 vs. AC; 2d8 + 10 damage.

⨽ **Double Attack** (standard; at-will)
The dragon makes two claw attacks.

⨽ **Wing Smash** (immediate reaction, when an enemy moves to a space where it flanks the dragon; at-will)
+15 vs. Fortitude; 2d12 + 6 damage, and the dragon pushes the target 2 squares.

↼ **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Lightning**
Close blast 3; +15 vs. Reflex; 3d8 + 5 lightning damage, and the dragon pushes the target 2 squares. If the attack hit at least one target, the dragon makes a secondary attack against a creature within 10 squares that was not a target of the primary attack. *Miss:* Half damage. *Secondary Attack:* +15 vs. Reflex; 2d10 + 5 lightning damage, and the dragon pushes the target 1 square.

↼ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

↼ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +13 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Restorative Dive** (minor; while bloodied and completely submerged in water; encounter) ✦ **Healing**
The dragon regains 126 hit points and gains a +2 bonus to attack rolls until the end of its next turn.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** History +13, Intimidate +16
**Str** 26 (+15) **Dex** 21 (+12) **Wis** 13 (+8)
**Con** 21 (+12) **Int** 12 (+8) **Cha** 20 (+12)

**Elder Bronze Dragon** **Level 21 Solo Brute**
Huge natural magical beast (aquatic, dragon) XP 16,000

**Initiative** +17 **Senses** Perception +17; darkvision
**HP** 723; **Bloodied** 361; see also *bloodied breath*
**AC** 33; **Fortitude** 35, **Reflex** 32, **Will** 32
**Resist** 25 lightning
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12, swim 8
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Lightning**
Reach 3; +24 vs. AC; 3d10 + 10 damage plus 4d6 lightning damage.

⊕ **Claw** (standard; at-will)
Reach 3; +24 vs. AC; 2d10 + 12 damage.

⨽ **Double Attack** (standard; at-will)
The dragon makes two claw attacks.

⨽ **Wing Smash** (immediate reaction, when an enemy moves to a space where it flanks the dragon; at-will)
+22 vs. Fortitude; 3d12 + 8 damage, and the dragon pushes the target 3 squares.

⨽ **Pinning Claw** (immediate reaction, when an adjacent enemy moves or shifts; at-will)
+24 vs. AC; 2d10 + 12 damage, and the dragon grabs the target. If the dragon uses *double attack* while grabbing a target, it must target a grabbed creature with at least one attack if it is able.

↼ **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Lightning**
Close blast 3; +22 vs. Reflex; 3d10 + 8 lightning damage, and the dragon pushes the target 4 squares. If the attack hit at least one target, the dragon makes a secondary attack against a creature within 10 squares that was not a target of the primary attack. *Miss:* Half damage. *Secondary Attack:* +22 vs. Reflex; 2d12 + 7 lightning damage, and the dragon pushes the target 2 squares.

↼ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

↼ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +22 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Restorative Dive** (minor; while bloodied and completely submerged in water; encounter) ✦ **Healing**
The dragon regains 180 hit points and gains a +2 bonus to attack rolls until the end of its next turn.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** History +17, Intimidate +21
**Str** 30 (+20) **Dex** 24 (+17) **Wis** 14 (+12)

LARS GRANT-WEST

# COBALT DRAGON

Brooding and distrustful, cobalt dragons respect only strength. They breathe bitterly cold clouds of vapor that freeze their victims in thick ice.

Cobalt dragons are usually found in frigid, gloomy lands, such as the forests of the far north or the mist-bound vales of the Shadowfell. They measure their power by the quality and quantity of lesser creatures they can subjugate; most cobalts take pride in the martial spirit and abilities of their minions, but the worst are brutal, bullying tyrants who demand fealty and tribute. This trait makes it dangerous for travelers to venture into lands claimed by cobalt dragons, since the dragons might attack passing travelers to establish their own strength. Good-aligned cobalt dragons are likely to accept a foe's surrender after a suitable show of force and allow them to go their way after a judicious bribe or promise of tribute. Wicked cobalt dragons are inclined to fall on travelers and simply devour them if the lesser creatures can't offer any worthwhile ransom for their lives.

**Young Cobalt Dragon** **Level 5 Solo Controller**
Large natural magical beast (dragon) XP 1,000

**Initiative** +4 **Senses** Perception +9; darkvision
**HP** 268; **Bloodied** 134; see also *bloodied breath*
**AC** 20; **Fortitude** 18, **Reflex** 16, **Will** 16
**Resist** 15 cold

**Saving Throws** +5
**Speed** 6 (ice walk), fly 8 (hover), overland flight 10
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Cold**
Reach 2; +11 vs. AC; 1d8 + 4 cold damage, and the target is slowed (save ends).

⊕ **Claw** (standard; at-will)
Reach 2; +11 vs. AC; 1d6 + 4 damage.

**Dragon's Pounce** (standard; at-will)
The dragon makes a bite attack, shifts 2 squares, and then makes two claw attacks against a different target.

**Wing Flurry** (immediate reaction, when an enemy misses the dragon with a melee or close attack; at-will)
Close burst 2; +7 vs. Fortitude; 1d6 + 4 damage, and the target is pushed 2 squares.

**Savage Mauling** (standard; recharges when first bloodied)
Close burst 2; targets slowed or restrained creatures; +11 vs. AC; 2d6 + 5 damage, the dragon pushes the target 3 squares, and the target is knocked prone. This forced movement can affect a creature restrained by the dragon's own breath weapon.

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Cold**
Close blast 5; +9 vs. Fortitude; 1d6 + 4 cold damage, and the target is restrained (save ends). *Aftereffect:* The target is slowed (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +7 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +11, Endurance +11, Intimidate +9

## Cobalt Dragon Lore

**Nature DC 12**: Cobalt dragons typically haunt cold lands or the borders of the Shadowfell. Their breath is a deadly cold fog that congeals around victims, imprisoning them in ice.

**Nature DC 17:** Cobalt dragons are savage and suspicious. They despise weaklings and respect little aside from strength. They often dominate nearby tribes of barbaric dwarves, humans, orcs, ogres, or giants. The best cobalt dragons are fierce protectors of their chosen people, but others tyrannize their minions as bloodthirsty and vindictive gods.

## Cobalt Dragon Tactics

Cobalt dragons are fierce in battle, throwing themselves into the midst of their foes with abandon. They are not strong fliers and prefer to stay on the ground, using their *breath weapon* and bite to restrain or slow foes, and *dragon's pounce* to attack multiple targets while their foes are slowed. Cobalt dragons often spend an action point to use *savage mauling* immediately after a successful breath weapon attack. They usually save *frightful presence* for stunning enemies when closely pressed, then move out into open ground again.

Older cobalt dragons are fond of pushing enemies right to the feet of their allies and minions. They rarely take any great care to protect their minions—in their eyes, followers that prove weak in battle are unworthy.

## Encounter Groups

Cobalt dragons often rule over tribes of savage or barbaric folk. Their minions are anxious to impress their draconic masters by careening recklessly into battle.

**Level 7 Encounter (XP 1,525)**
- ✦ 3 human berserkers (level 4 brute, *MM* 163)
- ✦ 1 young cobalt dragon (level 5 solo controller)

**Level 14 Encounter (XP 5,150)**
- ✦ 1 adult cobalt dragon (level 12 solo controller)
- ✦ 3 ogre thugs (level 11 minion, *MM* 198)
- ✦ 1 ogre warhulk (level 11 elite brute, *MM* 199)

**Level 21 Encounter (XP 16,800)**
- ✦ 1 elder cobalt dragon (level 19 solo controller)
- ✦ 3 frost giants (level 17 brute, *Monster Manual 2* 122)

# Mercury Dragon

Skilled scouts, emissaries, and assassins, mercury dragons are capable of shapechanging tricks that other dragons can't match. The breath of a mercury dragon poisons the body and the mind, rendering its victims unable to see the mercury dragon escape or circle around for a killing blow. A mercury dragon craves variety and new experiences.

**Young Mercury Dragon** **Level 6 Solo Lurker**
Large natural magical beast (dragon, shapechanger) XP 1,250

**Initiative** +12 **Senses** Perception +8; darkvision
**HP** 288; **Bloodied** 144; see also *bloodied breath*
**AC** 20; **Fortitude** 17, **Reflex** 19, **Will** 18
**Resist** 15 poison
**Saving Throws** +5
**Speed** 6, fly 6 (hover), overland flight 10
**Action Points** 2

**Bite** (standard; at-will)
Reach 2; +11 vs. AC; 1d10 + 6 damage.

**Claw** (standard; at-will)
Reach 2; +11 vs. AC; 1d8 + 6 damage.

**Draconic Fury** (standard; at-will)
The dragon makes two claw attacks and one bite attack.

**Quick Snap** (immediate interrupt, when an enemy moves adjacent to the dragon; at-will)
The dragon makes a bite attack against the triggering enemy. On a hit, the target also grants combat advantage to the dragon (save ends).

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Poison**
Close blast 5; +9 vs. Fortitude; 1d12 + 4 poison damage, and the target takes ongoing 5 poison damage and treats the dragon as invisible (save ends both). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +9 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Quicksilver Form** (move action; encounter) ✦ **Polymorph**
The dragon becomes a liquid wave of quicksilver and shifts 4 squares. It remains in quicksilver form until the end of its next turn. While in quicksilver form, the dragon can't attack or fly, but it gains a climb speed of 6, ignores difficult terrain, and doesn't provoke opportunity attacks. It can squeeze through any aperture a Tiny creature could fit through. The dragon can return to its normal form as a free action on its turn. When it returns to normal, each creature within 2 squares grants combat advantage to the dragon until the end of the dragon's next turn. *Sustain Minor:* The quicksilver form persists.

**Combat Advantage**
The dragon deals 1d6 extra damage against a target granting combat advantage to it.

**Saving Throws** +5
**Speed** 7, fly 7 (hover), overland flight 10
**Action Points** 2

**Bite** (standard; at-will)
Reach 2; +18 vs. AC; 1d12 + 7 damage.

**Claw** (standard; at-will)
Reach 2; +18 vs. AC; 1d10 + 7 damage.

**Draconic Fury** (standard; at-will)
The dragon makes two claw attacks and one bite attack.

**Quick Snap** (immediate interrupt, when an enemy moves adjacent to the dragon; at-will)
The dragon makes a bite attack against the triggering enemy. On a hit, the target also grants combat advantage to the dragon (save ends).

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Poison**
Close blast 5; +16 vs. Fortitude; 2d8 + 4 poison damage, and the target takes ongoing 5 poison damage and treats the dragon as invisible (save ends both). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +16 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Quicksilver Form** (move action; encounter) ✦ **Polymorph**
The dragon becomes a liquid wave of quicksilver and shifts 4 squares. It remains in quicksilver form until the end of its next turn. While in quicksilver form, the dragon can't attack or fly, but it gains a climb speed of 6, ignores difficult terrain, and doesn't provoke opportunity attacks. It can squeeze through any aperture a Tiny creature could fit through. The dragon can return to its normal form as a free action on its turn. When it returns to normal, each creature within 2 squares grants combat advantage to the dragon until the end of the dragon's next turn. *Sustain Minor:* The quicksilver form persists.

**Change Shape** (minor; at-will) ✦ **Polymorph**
The dragon can alter its physical form to appear as any Medium or Large humanoid, including a unique individual (see "Change Shape," *MM2* 216).

**Combat Advantage**
The dragon deals 2d6 extra damage against a target granting combat advantage to it.

**Alignment** Unaligned **Languages** Common, Draconic

## Mercury Dragon Lore

**Nature DC 12:** Mercury dragons often make their homes in volcanoes, mountain peaks, and the Elemental Chaos. But these born travelers sometimes spend months away from their lairs.

**Nature DC 17:** The poison breath of a mercury dragon can render creatures unable to see the dragon for several seconds. And because the poisoned creature can see everything else, the dragon's enemy might not realize that the dragon is effectively invisible. When threatened, a mercury dragon can turn its body into a liquid pool of quicksilver that moves like an ooze.

## Mercury Dragon Tactics

A mercury dragon is stealthy and prefers to observe its quarry for a time before attacking when terrain or timing gives it an advantage. It breathes on its enemies as soon as it can, then attacks those who can't see it. It often uses *frightful presence* in the second round of a fight if its *breath weapon* missed some of its foes, or if some were out of range.

A mercury dragon uses *quicksilver form* either to escape or to move to advantageous terrain, such as a place its adversaries cannot reach. Then it resumes its normal form and alternates between its *breath weapon* and *draconic fury* attacks.

When most enemies shake off the poison breath, the mercury dragon breathes again if the breath weapon has recharged, or the dragon moves away to encourage a foe to move adjacent and thus trigger *quicksilver form*.

An ancient mercury dragon's shapechanging is so effective that it can use *fluid shape* to entice one enemy into attacking another. An older mercury dragon can adopt a humanoid shape and disguise itself as a member of a "lesser" race. Mercury dragons don't have a steel dragon's affinity for civilization, however, and often spoil their disguises by demonstrating their ignorance of customs or manners.

## Encounter Groups

Unlike many other dragons, mercury dragons don't crave social dominance for its own sake. Many a mercury dragon is happier serving as a ruler's grandmaster assassin, special emissary, or mysterious spy than it would be if it had to rule from its lair. With the ability to change shape and use *quicksilver form* to reach places other creatures cannot go, mercury dragons make peerless thieves and scouts as well.

**Level 16 Encounter (XP 7,000)**
- 1 adult mercury dragon (level 13 solo lurker)
- 1 drow priest (level 15 controller, *MM* 95)
- 3 drow warriors (level 11 lurker, *MM* 94)

**Level 23 Encounter (XP 29,400)**
- 1 elder mercury dragon (level 21 solo lurker)
- 1 efreet cinderlord (level 23 artillery, *MM* 98)
- 2 efreet fireblades (level 22 soldier, *MM* 98)

# Mithral Dragon

The mysterious mithral dragons can glimpse the future. Devoted to causes and deities, these dragons involve themselves in the affairs of the faithful, appearing to a select few and then disappearing suddenly. Single-minded in pursuit of its cause, a mithral can be an implacable foe or an unflinching ally.

## Mithral Dragon Lore

**Religion DC 16:** Mithral dragons work for causes, particularly religious ones, and are natives of the Astral Sea. In battle, they attack only when it's advantageous for them to do so, even if a fight drags on.

**Religion DC 21:** Mithral dragons can see into the future and teleport. A mithral might abandon its faith without notice at the behest of a higher calling. Mithral dragons breathe streams of radiant energy.

## Mithral Dragon Tactics

Mithral dragons fight only on battlefields of their choosing. They prefer areas that feature obstructions and difficult terrain, to capitalize on their teleportation abilities and to limit the mobility of earthbound foes.

A mithral dragon spreads its attacks around, herding enemies into a group before unleashing its *breath weapon* or using *dimensional flurry*. It uses *dimension strike* to appear suddenly in the midst of ranged attackers.

Elder and ancient mithrals have *mithral prescience*, which forces slivers of their foresight into their enemies' minds and causes strange draconic visions to overlay their senses. A dragon reserves that attack for formidable foes that prove resilient to its other attacks.

**Young Mithral Dragon** **Level 11 Solo Skirmisher**
Large immortal magical beast (dragon) XP 3,000

**Initiative** +13 **Senses** Perception +14; darkvision
**HP** 444; **Bloodied** 222; see also *bloodied breath*
**AC** 25; **Fortitude** 23, **Reflex** 25, **Will** 23
**Resist** 15 radiant
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12, teleport 10
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Radiant**
Reach 2; +16 vs. AC; 2d8 + 4 damage, and the target takes ongoing 5 radiant damage (save ends).

⊕ **Claw** (standard; at-will)
Reach 2; +16 vs. AC; 2d8 + 4 damage.

↟ **Dimension Strike** (standard; at-will) ✦ **Teleportation**
The dragon teleports 5 squares, makes a claw attack, teleports 5 squares, and makes a claw attack against a different target.

↟ **Wing Buffet** (minor; recharge ⚄ ⁞⁞)
Reach 2; +14 vs. Fortitude; 2d8 + 6 damage, and the dragon pushes the target 3 squares.

✧ **Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Radiant**
Close blast 5; +14 vs. Reflex; 2d6 + 4 radiant damage, and the target is blinded (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Dimensional Flurry** (standard; encounter) ✦ **Radiant, Teleportation**
Close burst 10; targets up to four enemies; +14 vs. Reflex; 2d8 + 4 damage, and the target takes ongoing 5 radiant damage and is dazed (save ends both). *Effect:* The dragon teleports to a space in the burst.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +14 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Prophetic Defense** (immediate interrupt, when the dragon is hit by an attack; at-will) ✦ **Teleportation**
The dragon gains a +4 bonus to all defenses against the triggering attack. If the attack misses, the dragon teleports 6 squares.

**Alignment** Unaligned **Languages** Common, Draconic, Supernal
**Skills** Diplomacy +13, History +13, Insight +14, Intimidate +13, Religion +13
**Str** 18 (+9) **Dex** 23 (+11) **Wis** 18 (+9)

## Adult Mithral Dragon — Level 18 Solo Skirmisher

Large immortal magical beast (dragon) XP 10,000

**Initiative** +19 **Senses** Perception +20; darkvision
**HP** 684; **Bloodied** 342; see also *bloodied breath*
**AC** 32; **Fortitude** 29, **Reflex** 31, **Will** 29
**Resist** 20 radiant
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12, teleport 10
**Action Points** 2

**Bite** (standard; at-will) ✦ **Radiant**
Reach 2; +23 vs. AC; 2d8 + 7 damage, and the target takes ongoing 5 radiant damage (save ends).

**Claw** (standard; at-will)
Reach 2; +23 vs. AC; 2d8 + 7 damage.

**Dimension Strike** (standard; at-will) ✦ **Teleportation**
The dragon teleports 5 squares, makes a claw attack, teleports 5 squares, and makes a claw attack against a different target.

**Wing Buffet** (minor; recharge ⚄ ⁞⁞)
Reach 2; +21 vs. Fortitude; 3d8 + 6 damage, and the dragon pushes the target 3 squares.

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Radiant**
Close blast 5; +21 vs. Reflex; 3d8 + 4 radiant damage, and the target is blinded (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Dimensional Flurry** (standard; encounter) ✦ **Radiant, Teleportation**
Close burst 10; targets up to four enemies; +14 vs. Reflex; 2d8 + 7 damage, and the target takes ongoing 5 radiant damage and is dazed (save ends both). *Effect:* The dragon teleports to a space in the burst.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +21 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Prophetic Defense** (immediate interrupt, when the dragon is hit by an attack; at-will) ✦ **Teleportation**
The dragon gains a +4 bonus to all defenses against the triggering attack. If the attack misses, the dragon teleports 6 squares.

**Alignment** Unaligned **Languages** Common, Draconic, Supernal
**Skills** Diplomacy +19, History +19, Insight +20, Intimidate +19, Religion +19

**Con** 19 (+13) **Int** 20 (+14) **Cha** 20 (+14)

## Elder Mithral Dragon — Level 25 Solo Skirmisher

Huge immortal magical beast (dragon) XP 35,000

**Initiative** +24 **Senses** Perception +24; darkvision
**HP** 916; **Bloodied** 458; see also *bloodied breath*
**AC** 39, **Fortitude** 36, **Reflex** 38, **Will** 36
**Resist** 25 radiant
**Saving Throws** +5
**Speed** 10, fly 12 (hover), overland flight 16, teleport 10
**Action Points** 2

**Bite** (standard; at-will) ✦ **Radiant**
Reach 3; +30 vs. AC; 2d8 + 10 damage, and the target takes ongoing 10 radiant damage (save ends).

**Claw** (standard; at-will)
Reach 3; +30 vs. AC; 3d8 + 7 damage.

**Dimension Strike** (standard; at-will) ✦ **Teleportation**
The dragon teleports 5 squares, makes a claw attack, teleports 5 squares, and makes a claw attack against a different target.

**Wing Buffet** (minor; recharge ⚄ ⁞⁞)
Reach 3; +28 vs. Fortitude; 3d10 + 7 damage, and the dragon pushes the target 3 squares.

**Mithral Prescience** (minor; at-will)
Ranged 10; the target takes a -2 penalty to all defenses against the dragon's attacks until the dragon uses this power on another target.

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Radiant**
Close blast 5; +28 vs. Reflex; 4d8 + 4 radiant damage, and the target is blinded (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Dimensional Flurry** (standard; encounter) ✦ **Radiant, Teleportation**
Close burst 10; targets up to four enemies; +28 vs. Reflex; 3d8 + 7 damage, and the target takes ongoing 10 radiant damage and is dazed (save ends both). *Effect:* The dragon teleports to a space in the burst.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +28 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Prophetic Defense** (immediate interrupt, when the dragon is hit by an attack; at-will) ✦ **Teleportation**
The dragon gains a +4 bonus to all defenses against the triggering attack. If the attack misses, the dragon teleports 6 squares.

**Alignment** Unaligned **Languages** Common, Draconic, Supernal
**Skills** Diplomacy +23, History +23, Insight +24, Intimidate +23, Religion +23

**Con** 21 (+17) **Int** 23 (+18) **Cha** 23 (+18)

## IMMORTAL DRAGONS

Unlike other creatures of the immortal origin, immortal dragons age. However, they do not diminish in old age. An immortal dragon never moves into the twilight stage of dragon development (see page 15).

**Ancient Mithral Dragon** **Level 31 Solo Skirmisher**
Gargantuan immortal magical beast (dragon) XP 115,000

**Initiative** +28 **Senses** Perception +29; darkvision
**HP** 1,120; **Bloodied** 560; see also *bloodied breath*
**AC** 45, **Fortitude** 42, **Reflex** 44, **Will** 42
**Resist** 30 radiant
**Saving Throws** +5
**Speed** 12, fly 14 (hover), overland flight 18, teleport 10
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Radiant**
Reach 4; +36 vs. AC; 2d8 + 12 damage, and the target takes ongoing 15 radiant damage (save ends).

⊕ **Claw** (standard; at-will)
Reach 4; +36 vs. AC; 3d8 + 10 damage.

**Dimension Strike** (standard; at-will) ✦ **Teleportation**
The dragon teleports 5 squares, makes a claw attack, teleports 5 squares, and makes a claw attack against a different target.

**Wing Buffet** (minor; recharge ⚄ ⁞⁞)
Reach 4; +34 vs. Fortitude; 4d10 + 7 damage, and the dragon pushes the target 3 squares.

**Mithral Prescience** (minor; at-will)
Ranged 10; the target takes a -2 penalty to all defenses against the dragon's attacks until the dragon uses this power on another target.

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Radiant**
Close blast 5; +34 vs. Reflex; 4d10 + 5 radiant damage, and the target is blinded (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Dimensional Flurry** (standard; encounter) ✦ **Radiant, Teleportation**
Close burst 10; targets up to four enemies; +34 vs. Reflex; 4d8 + 5 damage, and the target takes ongoing 15 radiant damage and is dazed (save ends both). *Effect:* The dragon teleports to a space in the burst.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +34 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Prophetic Defense** (immediate interrupt, when the dragon is hit by an attack; at-will) ✦ **Teleportation**
The dragon gains a +4 bonus to all defenses against the triggering attack. If the attack misses, the dragon teleports 6 squares.

**Alignment** Unaligned **Languages** Common, Draconic, Supernal
**Skills** Diplomacy +28, History +28, Insight +29, Intimidate +28, Religion +28

| | | |
|---|---|---|
| **Str** 28 (+24) | **Dex** 33 (+26) | **Wis** 28 (+24) |
| **Con** 24 (+22) | **Int** 26 (+23) | **Cha** 26 (+23) |

## Encounter Groups

On the rare occasions when mithral dragons team up with other creatures, they fight alongside soldiers or brutes—allies that fight toe-to-toe with enemies and free the dragon to teleport in and out of combat.

**Level 14 Encounter (XP 5,000)**
- 1 young mithral dragon (level 11 solo skirmisher)
- 4 dragonborn gladiators (level 10 soldier, *MM* 86)

**Level 30 Encounter (XP 95,000)**
- 1 elder mithral dragon (level 25 solo skirmisher)
- 2 godforged colossi (level 29 elite brute, *MM* 44)

KEREM BEYIT

# ORIUM DRAGON

ORIUM DRAGONS LIVE AMONG RUINS of ancient civilizations, commanding lesser creatures to rebuild the glories of yesteryear and recapture the magic of fallen empires. To those under its protection, an orium dragon is a wise but sometimes harsh monarch. Those who threaten the dragon's dreams of renewed empire find themselves choking on its corrosive breath—while they watch the vapor coalesce into a smoky serpent that attacks at the dragon's command.

## ORIUM DRAGON LORE

**Nature DC 14:** Orium dragons make their lairs in ancient ruins, especially those in jungles and other warm environments. They gather and guard the treasure and lore they salvage from the ruins.

**Nature DC 19:** Unlike most breath weapons, an orium dragon's acidic breath doesn't disperse. It collapses in on itself, creating a serpent of magic vapor that attacks the dragon's enemies.

## ORIUM DRAGON TACTICS

The orium dragon's *breath weapon* stands out as its most potent and most versatile ability. It deals damage as other breath weapons do, but then transforms into a vaporous serpent that can move and attack right after the dragon's turn. The *breath weapon* recharges when the minion is destroyed. (Give the players a visual cue when this happens, so they know the consequences of destroying the minion—though the minion also deals enough damage to make it dangerous if it sticks around).

Elder and ancient orium dragons have unusually long tails, which they can coil around an enemy. They use *tail coil* against the first enemy to move adjacent to them, then continue to squeeze every round. If dangerous terrain is nearby, an orium dragon can move a grabbed target, making a Strength attack against the target's Fortitude. If the dragon hits, it can move at half speed and pull the target behind it. Being grabbed by an ancient orium is particularly dangerous if the target is moved inside the dragon's *corrosive fumes* aura.

## ENCOUNTER GROUPS

The typical orium dragon lives in jungle ruins, surrounded by a tribe of monsters that treat it like a god.

**Level 9 Encounter (XP 2,400)**
- 1 young orium dragon (level 8 solo soldier)
- 2 greenscale darters (level 5 lurker, *MM* 178)
- 1 greenscale marsh mystic (level 6 controller, *MM* 179)

**Level 16 Encounter (XP 7,000)**
- 1 adult orium dragon (level 13 solo soldier)
- 3 medusa archers (level 10 elite controller, *MM* 186)

HOWARD LYON

**Young Orium Dragon** **Level 8 Solo Soldier**
*Large natural magical beast (dragon)* *XP 1,750*

**Initiative** +9 **Senses** Perception +9; darkvision
**HP** 360; **Bloodied** 180; see also *bloodied breath*
**AC** 24; **Fortitude** 22, **Reflex** 20, **Will** 19
**Resist** 15 acid
**Saving Throws** +5
**Speed** 6, fly 8 (hover), overland flight 12
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Acid**
Reach 2; +15 vs. AC; 1d10 + 6 damage plus 1d6 acid damage.

⊕ **Claw** (standard; at-will)
Reach 2; +15 vs. AC; 1d8 + 6 damage, and the target is marked until the end of the dragon's next turn.

⸸ **Draconic Fury** (standard; at-will)
The dragon makes two claw attacks and one bite attack.

✧ **Breath Weapon** (standard; recharges when one of the dragon's vaporous spirits is reduced to 0 hit points) ✦ **Acid**
Close blast 5; +13 vs. Fortitude; 2d8 + 4 acid damage, and a young vaporous serpent minion (see below) appears in any single unoccupied square in the blast. It acts just after the dragon in the initiative order.

✧ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

✧ **Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +13 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**HP** 768; **Bloodied** 384; see also *bloodied breath*
**AC** 36; **Fortitude** 34, **Reflex** 32, **Will** 30
**Resist** 25 acid
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 15
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Acid**
Reach 3; +26 vs. AC; 2d6 + 7 damage plus 2d6 acid damage.

⊕ **Claw** (standard; at-will)
Reach 3; +26 vs. AC; 2d6 + 7 damage, and the target is marked until the end of the dragon's next turn.

⸸ **Draconic Fury** (standard; at-will)
The dragon makes two claw attacks and one bite attack.

⸸ **Tail Coil** (immediate reaction, when an enemy moves into an adjacent square; at-will)
Targets the triggering enemy; +24 vs. Reflex; 3d6+7 damage, and the target is grabbed. A creature grabbed by this attack takes 15 damage at the start of each of its turns. The dragon can grab only one creature with *tail coil* at a time.

## BEHIND THE SCREEN: VAPOROUS SERPENT MINIONS

The minions created by an orium dragon's breath are designed to be more powerful than standard minions. They deal more damage, effectively acting as an extra attack for the dragon. They aren't meant to be used on their own or dropped into other encounters.

**Breath Weapon** (standard; recharges when one of the dragon's vaporous spirits is reduced to 0 hit points) ✦ **Acid**
Close blast 5; +21 vs. Fortitude; 3d6 + 6 acid damage, and an elder vaporous serpent minion (see below) appears in any single unoccupied square in the blast. It acts just after the dragon in the initiative order.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +19 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** History +18, Insight +17, Intimidate +19
**Str** 26 (+18) **Dex** 23 (+16) **Wis** 14 (+12)
**Con** 24 (+17) **Int** 16 (+13) **Cha** 18 (+14)

## Elder Vaporous Serpent — Level 20 Minion Brute
Medium elemental beast — XP –

**Initiative** as dragon **Senses** Perception +7
**HP** 1; a missed attack never damages a minion.
**AC** 33; **Fortitude** 32, **Reflex** 31, **Will** 30
**Resist** 25 acid
**Speed** 6

**Bite** (standard; at-will) ✦ **Acid**
+25 vs. AC; 17 acid damage.

**Alignment** Unaligned **Languages** –
**Str** 23 (+16) **Dex** 15 (+12) **Wis** 4 (+7)
**Con** 18 (+14) **Int** 4 (+7) **Cha** 4 (+7)

## Ancient Orium Dragon — Level 28 Solo Soldier
Gargantuan natural magical beast (dragon) — XP 65,000

**Initiative** +24 **Senses** Perception +22; darkvision
**Corrosive Fumes (Acid)** aura 3; any creature that enters the aura or starts its turn there takes 20 acid damage.
**HP** 1,040; **Bloodied** 520; see also *bloodied breath*
**AC** 44; **Fortitude** 42, **Reflex** 40, **Will** 38
**Resist** 30 acid
**Saving Throws** +5
**Speed** 12, fly 12 (hover), overland flight 15
**Action Points** 2

**Bite** (standard; at-will) ✦ **Acid**
Reach 4; +37 vs. AC; 2d10 + 10 damage plus 4d6 acid damage.

**Claw** (standard; at-will)
Reach 4; +34 vs. AC; 2d10 + 10 damage, and the target is marked until the end of the dragon's next turn.

**Draconic Fury** (standard; at-will)
The dragon makes two claw attacks and one bite attack.

**Tail Coil** (immediate reaction, when an enemy moves into an adjacent square; at-will)
Reach 4; +32 vs. Reflex; 3d10 + 10 damage, and the target is grabbed. A creature grabbed by this attack takes 20 damage at the start of each of its turns. The dragon can grab only one creature with *tail coil* at a time.

**Breath Weapon** (standard; recharges when one of the dragon's vaporous spirits is reduced to 0 hit points) ✦ **Acid**
Close blast 5; +29 vs. Fortitude; 3d10 + 8 acid damage, and an ancient vaporous serpent minion (see below) appears in any single unoccupied square in the blast. It acts just after the dragon in the initiative order.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +18 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Insight +23, Intimidate +25, Nature +22
**Str** 30 (+24) **Dex** 27 (+22) **Wis** 17 (+17)
**Con** 28 (+23) **Int** 19 (+18) **Cha** 22 (+20)

## Ancient Vaporous Serpent — Level 28 Minion Brute
Medium elemental beast — XP –

**Initiative** as dragon **Senses** Perception +12
**HP** 1; a missed attack never damages a minion.
**AC** 41; **Fortitude** 40, **Reflex** 39, **Will** 38
**Resist** 30 acid
**Speed** 6

**Bite** (standard; at-will) ✦ **Acid**
+33 vs. AC; 20 acid damage.

**Alignment** Unaligned **Languages** –
**Str** 29 (+24) **Dex** 18 (+19) **Wis** 4 (+12)
**Con** 22 (+21) **Int** 4 (+12) **Cha** 4 (+12)

## THE SECRETS OF ORIUM

Though seldom used today, the red-gold metal orium figures prominently in ancient lore. Many adventurers, and their enemies, look for relics created with this metal.

**Uses:** When prepared properly, using long-lost crafting methods, orium greatly increases the power of magic channeled through it. Most often, ancient crafters used orium to make implements. Some tales, though, describe other magic items made from the metal. A popular legend describes a cabal of ancient wizards who carried spellbooks made up of hundreds of thin sheets of orium. The metal is too soft for weapons or armor, but those items can have orium studs or gilding to enhance their magic.

**History:** Evidence indicates that orium originated in the Feywild, smelted in the workshops of the cyclopses from ore found deep in the Feywild's Underdark. In time, eladrin stole the secret of crafting orium and brought it back to their cities, and eventually to the world. It's said empires as recent as Bael Turath still held the secret, but most extant orium items date from more ancient times.

**Orium's Poison:** The ability to craft orium never entirely disappeared. In fact, smelting it is simple. But unless the crafter purifies the ore during smelting, using the secret techniques of the ancients, the resulting orium is highly poisonous. Even the greatest precautions prove ineffective against unpurified orium, because its subtle, magical emanations contaminate the body and mind over prolonged use. Only the most ambitious spellcasters (especially liches) use implements or magic items made with this substance. Since an orium dragon's breath draws its poison from the metal infused in the dragon's blood, some dragons explore ruins in search of the purified form of the metal. They hope to transfer its secret—and its power—to their own bodies.

# STEEL DRAGON

In humanoid cities, steel dragons conceal their identities by adopting humanoid forms. In battle, steel dragons are quick and employ a wide array of attacks.

## Steel Dragon Lore

**Nature DC 14:** Steel dragons take humanoid form, retaining some evidence of their coloration—gray hair, gray eyes, or steel jewelry. A steel dragon might take any role from a noble to a favored servant of a powerful and charismatic master. Steel dragons work within their communities to promote freedom and undermine authoritarian forces.

**Nature DC 19:** Steel dragons have difficulty with all kinds of absolute authority, even authority that has the best of intentions. Because other kinds of metallic dragons—especially gold dragons—use their power and experience to justify their actions, steel dragons dislike them.

## Steel Dragon Tactics

Steel dragons try to avoid being cornered. When drawn into combat, they keep to areas that offer plenty of maneuvering room.

A steel dragon uses its *breath weapon* to knock foes senseless, then skirts the battlefield's edges. It bites to give itself space and strikes with its claws to bring enemies down. Elder and ancient steel dragons can weave loose bits of energy from their *breath weapons* to ensnare enemies in prisons of crushing force. If a steel dragon is outmatched, it uses *change shape* to hide in crowds of humanoids or to surround itself with innocent bystanders.

## Encounter Groups

Steel dragons primarily keep the company of humans. They join adventuring groups, serve powerful wizards, or ally with revolutionaries.

**Level 8 Encounter (XP 1,800)**
- 1 young steel dragon (level 7 solo skirmisher)
- 4 human lackeys (level 7 minion, *MM* 162)

**Level 22 Encounter (XP 20,800)**
- 1 elder steel dragon (level 21 solo skirmisher)
- 3 rakshasa assassins (level 17 skirmisher, *MM* 217)

**Young Steel Dragon** **Level 7 Solo Controller**
Large natural magical beast (dragon, shapechanger) XP 1,500

**Initiative** +5 **Senses** Perception +11; darkvision
**HP** 324; **Bloodied** 162; see also *bloodied breath*
**AC** 22; **Fortitude** 19, **Reflex** 17, **Will** 20
**Resist** 15 force
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12
**Action Points** 2

**Bite** (standard; at-will) ✦ **Force**
Reach 2; +12 vs. AC; 2d8 + 4 damage plus 1d8 force damage, and the dragon slides the target 1 square.

**Claw** (standard; at-will)
Reach 2; +12 vs. AC; 2d6 + 4 damage.

**Double Attack** (standard; at-will)
The dragon makes two claw attacks.

**Wing Scatter** (immediate reaction, when an enemy moves into an adjacent square; at-will)
Targets the triggering enemy; +11 vs. Fortitude; 1d8 + 4 damage, and the target is knocked prone. *Effect:* The dragon shifts 1 square and flies 3 squares.

**Dragon's Suggestion** (minor 1/round; at-will) ✦ **Charm**
+9 vs. Will; the dragon slides the target 1 square, and the target grants combat advantage until the end of the dragon's next turn. *Effect:* The dragon shifts 1 square.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Force**
Close blast 5; +11 vs. Fortitude; 2d10 + 4 force damage, and the target is dazed (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and the dragon uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +11 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Change Shape** (minor; at-will) ✦ **Polymorph**
The dragon can alter its physical form to appear as a unique human (see "Change Shape," *MM2* 216).

**Alignment** Unaligned **Languages** Common, Draconic

# METALLIC WYRMLINGS

Even immediately after hatching, dragons are powerful creatures, capable of unleashing formidable bite, claw, and *breath weapon* attacks. An impetuous or bored wyrmling still having the curiosity and playfulness of youth can be extremely dangerous.

## Adamantine Dragon Wyrmling

Adamantine wyrmlings are born starving, and they swiftly set out to hunt for food. Dependent on darkness and shadows to hide from larger predators, these creatures might not see light for the first months or years of life. They quickly develop the territoriality and temper of their parents, and this aspect of their nature occasionally results in adamantine wyrmlings killing one another.

These wyrmlings are a dark, dull gray. Their scales are already heavy, but they lie flat, rather than forming overlapping edges as they do on older dragons.

| Adamantine Dragon Wyrmling | Level 5 Elite Soldier |
|---|---|

### Adamantine Dragon Wyrmling Lore

**Nature DC 12:** Adamantine wyrmlings hatch underground and often do not see light for months. Their scales are already remarkably tough.

### Adamantine Wyrmling Tactics

An adamantine wyrmling focuses on a single foe, chewing and chewing on its target until it drops and only then moving on to the next one. It blasts all its foes with its *breath weapon* when it can.

*Top: Cobalt wyrmling. Below, left to right: Bronze, brass, and adamantine wyrmlings*

## Encounter Groups

When they don't remain in family groups, adamantine dragon wyrmlings are found in the company of creatures they can bully or creatures that have stolen and coerced them.

**Level 5 Encounter (XP 1,200)**

- 1 adamantine dragon wyrmling (level 5 elite soldier)
- 1 troglodyte impaler (level 7 artillery, *MM* 252)
- 2 troglodyte maulers (level 6 soldier, *MM* 252)

## Brass Dragon Wyrmling

Most brass dragon wyrmlings live in the dry lands in which they are born. Though they have extremely deadly ranged breath weapons, they are more fragile than other dragons. As a result, they make alliances with small groups of intelligent creatures, such as tribes of nomadic dragonborn. To creatures other than their allies, brass dragons are belligerent bullies with a strong territorial instinct.

At birth, a brass dragon wyrmling's scales are a dull matte brown. As the dragon ages, new metallic scales replace the matte scales.

| **Brass Dragon Wyrmling** | **Level 2 Elite Artillery** |
|---|---|
| Medium natural magical beast (dragon) | XP 250 |

| **Str** 15 (+3) | **Dex** 14 (+3) **Wis** 13 (+2) |
| **Con** 16 (+4) | **Int** 11 (+1) **Cha** 10 (+1) |

FRANZ VOHWINKEL

## Brass Dragon Wyrmling Lore

**Nature DC 10:** A brass dragon lays its eggs in caves hidden in arid, rocky outcroppings or desert hills. These caves are usually close to civilized areas, and brass dragon wyrmlings often become leaders of mercenary bands. Brass dragon wyrmlings have powerful breath weapons they can use at a distance, but are weak in close combat.

## Brass Dragon Wyrmling Tactics

When compared to other wyrmlings, the brass dragon wyrmling is relatively fragile. It uses tougher allies as a defense from melee combatants. A brass dragon wyrmling attacks foes from a distance using *fire stream*. It uses its *breath weapon* once it is in melee, and then retreats from foes. Once forced into melee, the dragon fights with its bite attack and *dragon ire*.

## Encounter Groups

At such a young age, a brass dragon wyrmling seeks out other intelligent creatures for protection, especially those that see the benefit of an alliance with a dragon. Dragonborn and humans are common allies.

**Level 2 Encounter (XP 650)**

- 2 human bandits (level 2 skirmisher)
- 1 human guard (level 3 soldier)
- 1 brass dragon wyrmling (level 2 elite artillery)

# Bronze Dragon Wyrmling

Although it must still learn the precepts of duty from a parent, a bronze wyrmling has a strong sense of responsibility from the moment it leaves the egg—one that causes it to seek out purpose as thoroughly as it hunts for sustenance. Although this is normally fine, it occasionally causes a bronze wyrmling to "fall in with a bad crowd."

Bronze dragon wyrmlings are bright in color when born, easily mistaken for copper dragons. Their scales swiftly darken, however, and before they reach the young stage, they are unmistakably bronze.

## Bronze Dragon Wyrmling Lore

**Nature DC 12:** Bronze dragons lay their eggs near the coast, in dark caves or buried in wet sand. They occasionally compete for territory with blue dragons, which obliterate bronze nests when they find them—or steal the eggs and raise the wyrmlings as servants.

## Bronze Dragon Wyrmling Tactics

A bronze wyrmling acts as though it were already far older and larger when it moves and engages its enemy. It leads off with its *breath weapon* unless foes are too spread out to make it rewarding. Even when hard-pressed, the wyrmling probably won't flee, since it hasn't yet learned to balance its innate senses of purpose and self-preservation.

| **Bronze Dragon Wyrmling** | **Level 5 Elite Brute** |
|---|---|
| Medium natural magical beast (dragon) | XP 400 |
| **Initiative** +3 | **Senses** Perception +2; darkvision |
| **HP** 152; **Bloodied** 76 | |
| **AC** 17; **Fortitude** 19, **Reflex** 16, **Will** 16 | |
| **Resist** 5 lightning | |
| **Saving Throws** +2 | |
| **Speed** 6, fly 6 (hover), swim 6, overland flight 8 | |
| **Action Points** 1 | |
| ⊕ **Bite** (standard; at-will) ✦ **Lightning** | |
| +8 vs. AC; 2d8 + 4 lightning damage. | |
| ⊕ **Claw** (standard; at-will) | |
| +8 vs. AC; 2d6 + 6 damage. | |
| ⸸ **Bronze Flurry** (standard; at-will) | |
| The wyrmling makes a bite attack and a wing attack. If both hit the same target, the target is also knocked prone. | |
| ⇙ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Lightning** | |
| Close blast 3; +6 vs. Reflex; 2d6 + 6 lightning damage. If the attack hit at least one creature, the wyrmling makes a secondary attack against a creature within 5 squares that was not a target of the primary attack. *Secondary Attack:* +6 vs. Reflex; 1d6 + 6 lightning damage, and the target is pushed 1 square. | |
| **Alignment** Unaligned | **Languages** Draconic |
| **Skills** Athletics +11 | |
| **Str** 18 (+6) | **Dex** 13 (+3) **Wis** 10 (+2) |
| **Con** 16 (+5) | **Int** 10 (+2) **Cha** 12 (+3) |

## Encounter Groups

Bronze wyrmlings rarely leave the family, but they occasionally work with other creatures—either when learning the basics of service, while watched over by their parents, or when forced into servitude.

**Level 5 Encounter (XP 1,100)**

- 2 blue wyrmlings (level 4 elite artillery, *Draconomicon: Chromatic Dragons*, page 180)
- 1 bronze wyrmling (level 5 elite brute)

# Cobalt Dragon Wyrmling

Born from nests carved in glaciers near snowy taiga terrain or in shallow underground caves hidden in the Shadowfell, cobalt dragon wyrmlings are vicious savages. A cobalt dragon's hunting grounds lie anywhere prey collects within its territory, such as melting glaciers or cold mountain springs. Although normally isolated, cobalt wyrmlings do form hunting parties when food is scarce or when a more powerful threat appears (such as the encroachment of civilization or the appearance of a hungry young white or black dragon).

Its scales are a reflective, metallic blue that blends in with the dragon's arctic surroundings, allowing the wyrmling to escape or to ambush opponents.

| Cobalt Dragon Wyrmling | Level 3 Elite Controller |
|---|---|
| Medium natural magical beast (dragon) | XP 300 |
| **Initiative** +2 | **Senses** Perception +7; darkvision |
| **HP** 98; **Bloodied** 49 | |
| **AC** 18; **Fortitude** 16, **Reflex** 14, **Will** 14 | |
| **Resist** 5 cold | |
| **Saving Throws** +2 | |
| **Speed** 6 (ice walk), fly 6, overland flight 8 | |
| **Action Points** 1 | |
| ⊕ **Bite** (standard; at-will) ✦ **Cold** | |
| +8 vs. AC; 1d10 + 4 cold damage, and the target is slowed (save ends). | |
| ⊕ **Claw** (standard; at-will) | |
| +8 vs. AC; 1d6 + 5 damage. | |
| ⊹ **Dragon's Pounce** (standard; at-will) | |
| The wyrmling makes a bite attack, shifts 2 squares, and makes a claw attack against a different target. | |
| ✧ **Savage Mauling** (standard; encounter) | |
| Close burst 1; targets slowed or restrained creatures; +9 vs. AC; 3d6 + 3 damage, and the wyrmling pushes the target 3 squares and knocks it prone. This forced movement can affect a creature restrained by the wyrmling's own breath weapon. | |
| ✧ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Cold** | |
| Close blast 4; +7 vs. Fortitude; 1d6 + 3 cold damage, and the target is restrained (save ends). *Aftereffect:* The target is slowed (save ends). | |
| **Alignment** Unaligned | **Languages** Draconic |
| **Skills** Athletics +9, Endurance +9, Intimidate +7, Stealth +7 | |
| **Str** 16 (+4) | **Dex** 12 (+2) **Wis** 12 (+2) |
| **Con** 17 (+4) | **Int** 10 (+1) **Cha** 13 (+2) |

## Cobalt Dragon Wyrmling Lore

**Nature DC 10:** Cobalt dragons nest in cold, forested areas, especially near glaciers or deep in the Shadowfell. Shortly after hatching, cobalt dragon wyrmlings are abandoned to fend for themselves.

## Cobalt Dragon Wyrmling Tactics

A cobalt dragon wyrmling hides in wait and ambushes unsuspecting foes. It restrains as many enemies as possible with its *breath weapon* before following up with its *savage mauling* attack, and might spend its action point to do both in the same round. If quickly overpowered by superior strength and firepower, the wyrmling might be impressed by such a victory and surrender, pledging to help those that defeated it.

## Encounter Groups

Even at a young age, a cobalt dragon wyrmling might be found in charge of a small group of savages. Occasionally, a cobalt wyrmling is subjugated by tougher foes, such as a band of hobgoblin mercenaries. In the Shadowfell, cobalt dragon wyrmlings can be found with undead, especially chillborn zombies.

**Level 3 Encounter (XP 750)**
- ✦ 1 cobalt dragon wyrmling (level 3 elite controller)
- ✦ 1 hobgoblin archer (level 3 artillery, *MM* 139)
- ✦ 2 hobgoblin soldiers (level 3 soldier, *MM* 139)

# Copper Dragon Wyrmling

Copper wyrmlings prefer to dwell in, and hunt from, the safety of rocky terrain that features great crags and protrusions. This environment allows them to hide from threats or to mimic the tactics of older coppers when attacking prey. They develop their covetous nature early, and some copper parents encourage this by rewarding one offspring in view of the others, stoking jealousy and—they believe—the urge to perform better for greater reward.

Unlike many other dragons, copper dragons don't dramatically change in color or shape as they age. Their scales are a lustrous copper at birth, and their wings are fully developed.

| Copper Dragon Wyrmling | Level 4 Elite Skirmisher |
|---|---|
| Medium natural magical beast (dragon) | XP 350 |
| **Initiative** +8 | **Senses** Perception +3; darkvision |
| **HP** 112; **Bloodied** 56 | |
| **AC** 18; **Fortitude** 16, **Reflex** 17, **Will** 14 | |
| **Resist** 5 acid | |
| **Saving Throws** +2 | |
| **Speed** 8, fly 10 (hover), overland flight 10 | |
| **Action Points** 1 | |
| ⊕ **Bite** (standard; at-will) ✦ **Acid** | |
| The wyrmling shifts 2 squares before and after making the attack: +9 vs. AC; 1d6 + 4 damage plus 1d4 acid damage. | |
| ⊕ **Claw** (standard; at-will) | |
| +9 vs. AC; 1d8 + 4 damage. | |
| ⊹ **Double Attack** (standard; at-will) | |
| The wyrmling makes two claw attacks and then shifts 2 squares. | |
| ⊹ **Flyby Attack** (standard; at-will) | |
| The wyrmling flies up to 8 squares and makes one melee basic attack at any point during that movement. The wyrmling doesn't provoke opportunity attacks when moving away from the target. | |
| ✧ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Acid** | |
| Close blast 4; +7 vs. Reflex; 1d8 + 4 acid damage, and the target is slowed (save ends). | |
| **Alignment** Unaligned | **Languages** Draconic |
| **Skills** Acrobatics +11, Bluff +9 | |
| **Str** 14 (+4) | **Dex** 18 (+6) **Wis** 14 (+4) |
| **Con** 16 (+5) | **Int** 11 (+2) **Cha** 12 (+3) |

## Copper Dragon Wyrmling Lore

**Nature DC 15:** Copper dragons lay their eggs in caves or narrow ravines among mountains, rocky hills, or badlands. The hatchlings often hide among the various crags, cracks, and crevices. Hatchlings

*Left to right: Mercury, copper, gold, and iron wyrmlings*

eventually leave the nest when their growing covetousness begins to compete with their parents'. They can sometimes be lured away by promises of treasure they can hide from the family.

## Copper Dragon Wyrmling Tactics

A copper wyrmling imitates its elders, making frequent use of *flyby attack* and saving its *breath weapon* for enemies that clump together. It uses *double attack*—an undeveloped form of the copper dragon's various mobility powers—against lone targets.

## Encounter Groups

Copper wyrmlings work with other creatures any time they are likely to receive higher rewards for the risk and as long as they aren't required to do anything too distasteful.

**Level 5 Encounter (XP 1,100)**

- 1 copper dragon wyrmling (level 4 elite skirmisher)
- 2 dwarf bolters (level 4 artillery, *MM* 97)
- 2 dwarf hammerers (level 5 soldier, *MM* 97)

# Gold Dragon Wyrmling

As befits the mighty (and perhaps arrogant) race of gold dragons, their wyrmlings are born with a wide suite of abilities, including fully functional wings and breath weapons. Gold wyrmlings often challenge one another in games. They take such activities seriously, competing for small territories and prizes (such as prime prey). These efforts help train them for adulthood so that they will be capable—and worthy—of ruling true domains. A gold wyrmling is torn between a burning desire to prove itself to its parents and an innate belief that it is already superior—or destined to be so—to all other creatures it encounters.

A gold wyrmling's scales are dull, almost sand-hued, and grow brighter as the dragon ages.

## Gold Dragon Wyrmling Lore

**Nature DC 15:** Gold dragon eggs are found in caves deep in the hills alongside rolling plains or in the foothills of larger mountain ranges. Gold wyrmlings grow up in the presence of great riches and magic. Even at only a few days old, gold wyrmlings have a strong sense of self and try to command other creatures (including, at times, their siblings).

| **Con** 14 (+5) | **Int** 20 (+8) **Cha** 17 (+6) |

## Gold Dragon Wyrmling Tactics

A gold wyrmling seeks to control a battle from the moment it begins, initiating combat with its *breath weapon* and then moving in to engage foes that have been weakened. A gold wyrmling rarely retreats unless severely injured. The notion of another creature proving superior is alien to the dragon's instincts, even if it can intellectually understand the possibility.

## Encounter Groups

Gold wyrmlings associate with creatures they can boss around (though they would call it "learning how to command").

**Level 4 Encounter (XP 900)**
- ✦ 1 gold wyrmling (level 7 elite controller)
- ✦ 1 griffon (level 7 brute, *MM* 147)

# Iron Dragon Wyrmling

Iron wyrmlings are some of the weakest wyrmlings, but they are born in larger clutches and have a stronger tendency toward social behavior when first hatched. They rarely come out of hiding, except to swiftly strike at the prey they are learning to hunt before diving back into the shadows. They prefer caves but are almost as comfortable hiding beneath the underbrush and dead leaves on the forest floor. They emerge to attack only if they greatly outsize or outnumber their target, and they try to avoid prolonged battles.

An iron wyrmling's scales are a dark rust color that flakes off in a sort of molting as the dragon approaches the young stage of its development.

| **Iron Dragon Wyrmling** | **Level 3 Elite Skirmisher** |
|---|---|
| Medium natural magical beast (dragon) | XP 300 |
| **Initiative** +4 | **Senses** Perception +3; darkvision |
| **HP** 96; **Bloodied** 48 | |
| **AC** 17; **Fortitude** 17, **Reflex** 15, **Will** 14 | |
| **Resist** 5 lightning | |
| **Saving Throws** +2 | |
| **Speed** 6, fly 8 (hover), overland flight 7 | |
| **Action Points** 1 | |
| ⨭ **Bite** (standard; at-will) ✦ **Lightning** | |
| +8 vs. AC; 2d6 + 3 damage plus 1d6 lightning damage. | |
| ⨭ **Claw** (standard; at will) | |
| +8 vs. AC; 1d10 + 3 damage. | |
| ⨮ **Swift Claws** (standard; at-will) | |
| The wyrmling makes two claw attacks and shifts 2 squares. | |
| ⨳ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Lightning** | |
| Close blast 4; +6 vs. Reflex; 2d6 + 2 lightning damage, and the wyrmling pulls the target 1 square. | |
| **Alignment** Unaligned | **Languages** Draconic |
| **Skills** Stealth +9 | |
| **Str** 18 (+6) | **Dex** 15 (+4) **Wis** 13 (+3) |
| **Con** 16 (+5) | **Int** 10 (+2) **Cha** 10 (+2) |

## Iron Dragon Wyrmling Lore

**Nature DC 10:** Iron dragons hide their eggs in caves or darkened woods. Sometimes, the wyrmlings spend their first few days of life without ever emerging into the open. Iron dragons are born in larger clutches than most other varieties of dragons, and they hunt in packs until they grow strong enough to survive on their own. Iron wyrmlings are instinctive ambush predators.

## Iron Dragon Wyrmling Tactics

An iron wyrmling bursts from concealment and attacks quickly before retreating back to a safer position. It flees immediately if the attack proves ineffective. Otherwise, it takes advantage of the maneuverability provided by *swift claws* and its fast fly speed to circle its prey and make opportunistic strikes.

## Encounter Groups

Iron wyrmlings hunt in teams or alongside creatures pressed into service by their parents.

**Level 5 Encounter (XP 1,150)**
- ✦ 3 iron wyrmlings (level 3 elite skirmisher)
- ✦ 2 kobold dragonshields (level 2 soldier, *MM* 168)

# Mercury Dragon Wyrmling

The nests of mercury dragons are found near poisonous volcanic vents and noxious sulfurous springs. These inhospitable conditions require mercury wyrmlings to travel great distances to hunt for food, instilling a desire to explore the world at an extremely young age. As a result, a mercury dragon wyrmling can often be found a great distance from its home.

A mercury dragon wyrmling's form is incredibly fluid, and its reflective appearance makes it difficult to spot in areas that have homogeneous surroundings.

**Mercury Dragon Wyrmling** **Level 4 Elite Lurker**
Medium natural magical beast (dragon, shapechanger) XP 350

**Initiative** +10 **Senses** Perception +2; darkvision
**HP** 90; **Bloodied** 45
**AC** 18; **Fortitude** 15, **Reflex** 17, **Will** 16
**Resist** 5 poison
**Saving Throws** +2
**Speed** 6, fly 6 (hover), overland flight 8
**Action Points** 1

⊕ **Claw** (standard; at-will)
+9 vs. AC; 1d8 + 5 damage.

⸸ **Double Attack** (standard; at-will)
The wyrmling makes two claw attacks.

✧ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Poison**
Close blast 4; +7 vs. Fortitude; 1d12 + 3 poison damage, and the target takes ongoing 5 poison damage and treats the wyrmling as invisible (save ends both).

**Combat Advantage**
The wyrmling deals 1d6 extra damage against a target granting combat advantage to it.

**Quicksilver Form** (move; encounter) ✦ **Polymorph**
The wyrmling becomes a liquid wave of quicksilver and shifts 4 squares. It remains in quicksilver form until the end of its next turn. While in quicksilver form, the wyrmling can't attack or fly, but gains a climb speed of 6, ignores difficult terrain, and doesn't provoke opportunity attacks. It can squeeze through any aperture a Tiny creature could fit through. The wyrmling can return to its normal form as a free action on its turn. When it returns to normal, each creature within 2 squares grants combat advantage to the wyrmling until the end of the wyrmling's next turn.

**Alignment** Unaligned **Languages** Draconic
**Skills** Acrobatics +11, Bluff +10, Stealth +11
**Str** 15 (+4) **Dex** 18 (+6) **Wis** 11 (+2)
**Con** 15 (+4) **Int** 12 (+3) **Cha** 16 (+5)

## Mercury Dragon Wyrmling Lore

**DC 12:** A mercury dragon wyrmling's lair has many small tunnels and narrow passageways filled with noxious gases from deep underground. Since these lairs are usually found near inhospitable lands, a mercury dragon hunts across a large area. A wyrmling's bite isn't developed at such a young age, but its vicious claws can quickly tear apart its enemies, especially when those enemies are caught unaware. A mercury dragon wyrmling can turn into a swiftly moving wave of liquid metal.

## Mercury Dragon Wyrmling Tactics

Those battling a mercury wyrmling within its lair find themselves at a disadvantage. These volcanic caves are typically pocked with smaller caves that only Tiny creatures can access, enabling the wyrmling to take on *quicksilver form* and escape aggressors. Then it flows out of some other seemingly unconnected hole, takes on its normal form, and gains combat advantage against its foes.

## Encounter Groups

A mercury dragon wyrmling nurtures its underlings so they will protect its lair while it's out exploring. Powerful thieves sometimes steal mercury dragon eggs, planning to raise the wyrmling to be an expert spy or assassin.

**Level 3 Encounter (XP 750)**
- 1 mercury dragon wyrmling (level 4 elite lurker)
- 2 needlefang drake swarms (level 2 soldier, *MM* 90)
- 1 spitting drake (level 3 artillery, *MM* 91)

**Level 4 Encounter (XP 900)**
- 1 mercury dragon wyrmling (level 4 elite lurker)
- 2 doppelganger sneaks (level 3 skirmisher, *MM* 71)
- 1 halfling prowler (level 6 lurker, *MM* 153)

# Mithral Dragon Wyrmling

The rare occasion when a mithral dragon wyrmling leaves the Astral Sea signifies the beginning of a time of change. The wyrmling has seen the importance of the moment and has come to guide the world through a chaotic time. A mithral wyrmling's horns are short, as is the ridge of spikes that runs the length of its neck. The ridge stands out only when the wyrmling is angered.

## Mithral Dragon Wyrmling Lore

**Nature DC 15:** Mithral dragon wyrmlings hatch in the Astral Sea and rarely visit the world. A mithral dragon wyrmling can teleport but cannot attack with its wings. Its *breath weapon* blinds foes with radiant light.

*Left to right: Orium, steel, mithral, and silver wyrmlings*

| **Mithral Dragon Wyrmling** | **Level 9 Elite Skirmisher** |
|---|---|
| Medium immortal magical beast (dragon) | XP 800 |
| **Initiative** +11 | **Senses** Perception +7; darkvision |

| **Con** 13 (+5) | **Int** 14 (+6) **Cha** 14 (+6) |

HOWARD LYON

## Mithral Dragon Wyrmling Tactics

An extremely mobile fighter, a mithral dragon wyrmling incapacitates enemies with its *breath weapon* and then focuses attacks upon enemies that are still able to see. A favorite tactic is to use *dimension strike* against two targets and then teleport out of reach.

## Encounter Groups

Mithral dragon wyrmlings fight with allies that allow them their full range of mobility, such as soldiers and controllers that have the ability to slow enemies.

**Level 8 Encounter (XP 1,850)**

- 1 mithral dragon wyrmling (level 9 elite skirmisher)
- 2 angels of valor (level 8 soldier, *MM* 16)
- 1 eladrin twilight incanter (level 8 controller, *MM* 102)

**Level 11 Encounter (XP 3,100)**

- 1 mithral dragon wyrmling (level 9 elite skirmisher)
- 1 githyanki mindslicer (level 13 artillery, *MM* 128)
- 2 githyanki warriors (level 12 soldier, *MM* 128)

# Orium Dragon Wyrmling

As orium dragons accumulate knowledge, they discover the locations of additional crumbling ruins. Not having the time to investigate each potential site, a dragon sends its children to investigate and potentially create their own lairs.

Orium dragon wyrmlings are surprisingly mature for their age. Unlike other wyrmlings, they act cautiously and methodically. They won't fight until threatened, but they believe that threats to their lairs are just as dangerous as threats to themselves.

| **Orium Dragon Wyrmling** | **Level 6 Elite Soldier** |
|---|---|
| Medium natural magical beast (dragon) | XP 500 |
| **Initiative** +7 | **Senses** Perception +3; darkvision |

| **Str** 16 (+6) | **Dex** 10 (+3) **Wis** 4 (+0) |
| **Con** 12 (+4) | **Int** 4 (+0) **Cha** 4 (+0) |

## Orium Dragon Wyrmling Tactics

An orium dragon wyrmling uses its *breath weapon* as soon as it's possible to catch multiple foes in the area of effect, then flanks with its vaporous serpent and makes a *double attack*.

## Orium Dragon Wyrmling Lore

**Nature DC 15:** Orium dragon wyrmlings prize knowledge and are found near areas of archaeological significance, such as ancient temples or decayed ruins of lost civilizations. At a young age, orium wyrmlings are extremely protective over their unexplored lairs. Orium dragon wyrmlings do not have the physical strength that older versions have, but their breath weapons are fully developed.

## Encounter Groups

The lairs of orium dragon wyrmlings have spent centuries hidden away in the wilderness, so they are filled with dangerous wild animals. In ruins formed when civilizations were lost to the Feywild, orium dragons find fey allies. A wyrmling might awe a tribe of intelligent savages into worshiping it.

**Level 6 Encounter (XP 1,250)**
- ✦ 1 orium dragon wyrmling (level 6 elite soldier)
- ✦ 1 dire boar (level 6 brute, *MM* 35)
- ✦ 1 greenscale marsh mystic (level 6 controller, *MM* 179)
- ✦ 1 blackscale bruiser (level 6 brute, *MM* 179)

**Level 7 Encounter (XP 1,600)**
- ✦ 1 orium dragon wyrmling (level 6 elite soldier)
- ✦ 1 vine horror spellfiend (level 7 artillery, *MM* 260)
- ✦ 2 unicorns (level 9 skirmisher, *MM* 257)

# Silver Dragon Wyrmling

From birth, silver wyrmlings learn the importance of forthrightness and righteous combat. They and their siblings engage in vicious mock battles that rarely result in lasting injury. Silver dragon parents take their responsibilities more seriously than other dragon parents do, but still encourage their offspring to spend time in the world.

**Silver Dragon Wyrmling** **Level 5 Elite Brute**
Medium natural magical beast (dragon) XP 400

**Initiative** +4 **Senses** Perception +3; darkvision
**HP** 152; **Bloodied** 76
**AC** 17; **Fortitude** 19, **Reflex** 16, **Will** 15
**Resist** 5 cold
**Saving Throws** +2
**Speed** 5, fly 6 (clumsy), overland flight 8
**Action Points** 1

⊕ **Bite** (standard; at-will)
+8 vs. AC; 2d8 + 4 damage.

⊕ **Claw** (standard; at-will)
+8 vs. AC; 1d6 + 4 damage.

⸸ **Dragon Onslaught** (standard; at-will)
The wyrmling makes a claw attack against each enemy adjacent to it.

✧ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Cold**
Close blast 4; +6 vs. Reflex; 1d6 + 5 cold damage, and the target gains vulnerable 5 to all damage (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +12
**Str** 20 (+7) **Dex** 15 (+4) **Wis** 12 (+3)
**Con** 16 (+5) **Int** 11 (+2) **Cha** 13 (+3)

## Silver Dragon Wyrmling Lore

**Nature DC 12:** Silver dragons hide their eggs in frozen caves, buried in snow. Hatchlings venture from the nest as soon as they can walk. A silver dragon wyrmling uses its *breath weapon* in melee combat, fighting on the ground when possible.

## Silver Dragon Wyrmling Tactics

A silver dragon wymling lands in the midst of enemies and uses *wing slice*. It prefers to fight with allies that can slow or immobilize foes, so the dragon can use *wing slice* and *breath weapon* most effectively.

## Encounter Groups

Silver dragon wyrmlings ally with other creatures to learn combat tactics and to defeat more potent dangers than they can face alone.

**Level 5 Encounter (XP 1,200)**
- 1 silver dragon wyrmling (level 5 elite brute)
- 3 human guards (level 3 soldier, *MM* 162)
- 2 human mages (level 4 artillery, *MM* 163)

# Steel Dragon Wyrmling

Steel dragon parents, entrenched in human affairs, hide their wyrmlings and instruct them secretly until the wyrmlings' shapechanging powers develop. However, a wyrmling's intense curiosity tempts it to escape a watchful parent's eye to hunt and to cause mischief.

A steel wyrmling is extremely slender. The spines on its head are shorter than those of a full-grown steel.

**Steel Dragon Wyrmling** **Level 5 Elite Controller**
Medium natural magical beast (dragon) XP 400

**Initiative** +3 **Senses** Perception +9; darkvision
**HP** 126; **Bloodied** 63
**AC** 20; **Fortitude** 17, **Reflex** 15, **Will** 18
**Resist** 5 force
**Saving Throws** +2
**Speed** 6, fly 8 (hover), overland flight 10
**Action Points** 1

⊕ **Bite** (standard; at-will) ✦ **Force**
+10 vs. AC; 1d8 + 4 damage plus 1d6 force damage, and the wyrmling slides the target 1 square.

⊕ **Claw** (standard; at-will)
+10 vs. AC; 1d10 + 3 damage.

⸸ **Double Attack** (standard; at-will)
The wyrmling makes two claw attacks.

⸸ **Dragon's Suggestion** (minor 1/round; at-will) ✦ **Charm**
+9 vs. Will; the wyrmling slides the target 1 square, and the target grants combat advantage until the end of the wyrmling's next turn.

✧ **Breath Weapon** (standard; recharges when first bloodied) ✦ **Force**
Close blast 5; +9 vs. Fortitude; 2d10 + 2 force damage, and the target is dazed (save ends).

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Bluff +11, Diplomacy +11, Insight +9
**Str** 17 (+5) **Dex** 12 (+3) **Wis** 14 (+4)
**Con** 15 (+4) **Int** 11 (+2) **Cha** 19 (+6)

## Steel Dragon Wyrmling Lore

**Nature DC 12:** Steel dragon wyrmlings cannot change shape. Wyrmlings hatched in civilization are hidden until they learn to blend in with the local population. Steel dragon wyrmlings fight carefully, so they don't harm their allies.

## Steel Dragon Wyrmling Tactics

A steel dragon wyrmling relishes teamwork in combat. It uses *dragon's suggestion* to slide enemies into flanked positions. When it uses its *breath weapon*, it avoids hurting allies.

## Encounter Groups

A steel dragon wyrmling relies on a tight group of associates, possibly a group of bandits and thieves. If far from society, a steel wyrmling befriends the closest group of intelligent humanoids.

**Level 4 Encounter (XP 824)**
- 1 steel dragon wyrmling (level 5 elite controller)
- 1 doppelganger sneak (level 3 skirmisher, *MM* 71)
- 4 human rabble (level 2 minion, *MM* 162)
- 1 wererat (level 3 skirmisher, *MM* 180)

**Level 5 Encounter (XP 1,050)**
- 1 steel dragon wyrmling (level 5 elite controller)
- 1 bugbear strangler (level 6 lurker, *MM* 136)
- 2 bugbear warriors (level 5 brute, *MM* 135)

# Hollow Dragons

A metallic dragon can become a construct called a hollow dragon: an empty shell of the dragon's scales and hide animated by powerful magic and the dragon's essence. Unlike evil chromatic dragons, which turn to the magic of shadow and undeath to prolong their existence (see the dracoliches in the *Monster Manual* and other undead dragons in *Draconomicon: Chromatic Dragons*), metallic dragons use elemental magic to become eternal guardians of great treasures, ancient artifacts, and holy sites.

A hollow dragon lacks bones and organs. Draconic essence and elemental power leak, glowing, from its mouth and eyes, from between its scales, and from runes carved into its scales. The flesh might wither, but the magic, the draconic essence, and the scales endure.

A hollow dragon's attacks have a damage type based on the kind of dragon it was when alive. For instance, gold hollow dragons have fire-based attacks, but those of a steel hollow dragon would be force-based.

**Gold Hollow Dragon** **Level 16 Solo Brute**
Huge natural magical beast (construct, dragon) XP 7,000

**Initiative** +12 **Senses** Perception +17; darkvision
**Manifest Essence (Fire)** aura 3; each creature that starts its turn in the aura takes 5 fire damage. The damage increases to 10 while the dragon is bloodied.
**HP** 640; **Bloodied** 320; see also *bloodied fury*
**AC** 28; **Fortitude** 29, **Reflex** 27, **Will** 28
**Immune** disease, poison; **Resist** 30 fire
**Saving Throws** +5
**Speed** 6, fly 10 (clumsy)
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Fire**
Reach 3; +19 vs. AC; 1d8 + 7 damage, and ongoing 10 fire damage (save ends).

**Tail Slap** (minor; at-will)
Reach 3; +18 vs. AC; 3d8 + 7 damage.

**Bloodied Fury** (free, when first bloodied; encounter)
The dragon makes a bite attack and two *tail slaps*.

**Breath of Power** (standard; recharge ⚄ ⚅) ✦ **Fire**
Close blast 5; +17 vs. Reflex; 2d10 + 7 fire damage, and the target takes ongoing 10 fire damage and is dazed (save ends both). *Miss:* Half damage.

**Burst of Essence** (immediate reaction, when an enemy hits the dragon with a melee or ranged attack; at-will) ✦ **Fire**
The dragon's skin ruptures, releasing a gout of its essence: close blast 3; +17 vs. Reflex; 3d8 + 7 fire damage.

**Essence Explosion** (when reduced to 0 hit points; encounter) ✦ **Fire**
Close burst 5; +17 vs. Reflex; 2d10 + 7 fire damage, and the target is knocked prone. *Miss:* Half damage.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Arcana +16, Insight +17, Intimidate +18
**Str** 22 (+14) **Dex** 19 (+12) **Wis** 18 (+12)
**Con** 24 (+15) **Int** 17 (+11) **Cha** 21 (+13)

**Gold Hollow Wyrm** **Level 24 Solo Soldier**
Gargantuan natural magical beast (construct, dragon) XP 30,250

**Initiative** +21 **Senses** Perception +23; darkvision
**Manifest Essence (Fire)** aura 3; each creature that starts its turn in the aura takes 10 fire damage. The damage increases to 15 while the wyrm is bloodied.
**HP** 904; **Bloodied** 452; see also *bloodied fury*
**AC** 39; **Fortitude** 37, **Reflex** 36, **Will** 36
**Immune** disease, poison; **Resist** 35 fire
**Saving Throws** +5
**Speed** 8, fly 12 (clumsy)
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Fire**
Reach 4; +31 vs. AC; 2d6 + 9 fire damage, and ongoing 10 fire damage (save ends).

**Tail Slap** (minor; at-will)
Reach 4; +29 vs. AC; 4d6 + 8 damage.

**Bloodied Fury** (free, when first bloodied; encounter)
The dragon makes a bite attack and two *tail slaps*.

**Consume** (standard; recharge ⚄ ⚅) ✦ **Fire**
The wyrm traps an enemy inside itself: reach 4; +29 vs. Reflex; 3d8 + 9 damage, and the target is swallowed. While the target is swallowed, it is dazed and restrained, and it takes 20 fire damage at the start of the wyrm's turn. The target has line of sight and line of effect only to the wyrm, and no creature has line of sight or line of effect to the target. The swallowed creature can make only melee or close basic attacks. The wyrm's aura does not affect the target.
As a move action, the target can escape with an Athletics check vs. Fortitude or an Acrobatics check vs. Reflex. If the target escapes this way, it appears in a space adjacent to the wyrm. The target also escapes when the wyrm uses *breath of power,* appearing in a space within the blast after the attack. When the wyrm dies, the target is no longer swallowed and can escape as a move action, appearing in the wyrm's former space.

**Breath of Power** (standard; recharge ⚄ ⚅) ✦ **Fire**
Close blast 7; +29 vs. Reflex; 4d6 + 9 fire damage, and the target takes ongoing 15 fire damage and is dazed (save ends both). *Miss:* Half damage.

**Burst of Essence** (immediate reaction, when an enemy hits the dragon with a melee or ranged attack; at-will) ✦ **Fire**
The dragon's skin ruptures, releasing a gout of its essence: close blast 3; +29 vs. Reflex; 4d8 + 9 fire damage.

**Essence Explosion** (when reduced to 0 hit points; encounter) ✦ **Fire**
Close burst 5; +29 vs. Reflex; 3d10 + 7 fire damage, and the target is knocked prone. *Miss:* Half damage.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Arcana +21, Insight +23, Intimidate +24
**Str** 28 (+21) **Dex** 23 (+19) **Wis** 23 (+18)
**Con** 26 (+20) **Int** 19 (+16) **Cha** 25 (+19)

## Hollow Dragon Lore

**Arcana or Nature DC 20:** The essence of a formerly living dragon animates the otherwise empty hide of a hollow dragon. Dragons that seek immortality but do not want to become dracoliches become hollow dragons. Only a few spellcasters and worshipers of draconic deities know the process to create hollow dragons and hollow wyrms.

**Arcana or Nature DC 25:** Hollow dragons keep to themselves. Though they do not need to eat, old or evil ones might become so far removed from the living that they lose all empathy and become violent predators.

## Hollow Dragon Tactics

A hollow dragon fights up close, allowing enemies to surround it so that it has many targets. It makes multiple melee attacks each round and uses *breath of power* as soon as it can catch several foes with it. It mauls targets with bites and *tail slaps* and then launches *breath of power* in the same round by spending an action point. When bloodied, it spends a second action point and fights to the death.

A hollow wyrm fights like a hollow dragon, with the addition of the *consume* power. It uses *breath of power* even if it has a foe swallowed, unless it has a limited number of targets nearby.

## Encounter Groups

Hollow dragons enjoy their solitude but might accompany other guardians.

**Level 19 Encounter (XP 12,200)**
- 1 hollow dragon (level 16 solo brute)
- 1 cambion hellfire magus (level 18 artillery, *MM* 39)
- 1 stone golem (level 17 elite soldier, *MM* 142)

**Level 26 Encounter (XP 50,350)**
- 1 hollow wyrm (level 24 solo soldier)
- 1 angel of authority (level 22 controller, *MM2* 8)
- 6 angels of light (level 23 minion skirmisher, *MM2* 9)
- 2 marut executioners (level 22 brute, *MM2* 162)

### The Hollow Transformation

Becoming a hollow dragon requires a ritual that unbinds the elemental energy present in a dragon. If performed correctly, it reshapes the subject into an eternal channel for energy funneled directly from the Elemental Chaos. The particulars of the ritual of transformation are widespread among metallic dragons, but known to few others.

**Physical Effects:** When a dragon transforms into a hollow dragon, it lets its internal elemental forces consume its entire body. It endures tremendous pain as every bit of its flesh disintegrates, leaving only a core of vibrant energy contained within a shell of metal scales. Dragons in twilight might be the most desperate to prolong their lives, but also run the greatest risk. The transformation can rend a weaker dragon, causing the creature to explode in a flash of elemental energy. Though the dragon retains much of its former knowledge and personality, it no longer has the magical attributes of its former body. A hollow dragon can no longer shapeshift, nor can a formerly agile dragon move as quickly as it could in life. The transformation even robs the dragon of its *frightful presence*.

**Mental Repercussions:** Few metallic dragons are willing to become hollow dragons, partly because the practice of transformation has a bad reputation. The number of stories of dragons driven mad by the pain of transformation or rent asunder by the force of the process itself are too numerous. Still, the transformation is less risky than transforming into a dracolich. Even those who make it through find their personalities change over time. They grow less and less familiar with the mindset of the living. Without needing to eat, sleep, mate, or fulfill other biological needs, hollow dragons develop a different sense of time, and become inscrutable to normal mortals.

CHIPPY

# Other Creatures

This section covers a selection of creatures that might ally with metallic dragons.

## Couatl

All but a few couatls fight for the forces of good. Evil couatls, perhaps jaded by endless battles, find the allure of power too difficult to resist.

**Couatl Rogue Serpent** **Level 14 Skirmisher**
Large immortal magical beast XP 1,000

**Initiative** +14 **Senses** Perception +8
**HP** 134; **Bloodied** 67
**AC** 28; **Fortitude** 24, **Reflex** 26, **Will** 24
**Speed** 8, fly 10 (hover)

⊕ **Bite** (standard; at-will) ✦ **Poison, Radiant**
+19 vs. AC; 2d6 + 5 damage, and the target takes ongoing 5 poison and radiant damage and takes 5 poison and radiant damage each time it makes an opportunity attack (save ends both).

**Passing Bites** (standard; recharge ⚄ ⚅)
The couatl rogue serpent makes a bite attack, shifts its speed, and makes another bite attack.

**Venomous Teleport** (move; recharge ⚄ ⚅) ✦ **Teleportation**
The couatl rogue serpent swaps positions with a creature within 10 squares of it that is taking ongoing poison and radiant damage.

**Radiant Absorption** ✦ **Radiant**
If a couatl rogue serpent takes radiant damage, its attacks deal 5 extra radiant damage until the end of its next turn.

**Twist Free**
A couatl makes saving throws against immobilizing or restraining effects at the start of its turn as well as at the end of its turn. In addition, a couatl can make saving throws against immobilizing or restraining effects that do not allow saving throws and would normally end at the end of its turn or at the end of an enemy's turn.

**Alignment** Evil **Languages** Supernal
**Skills** Bluff +15, Diplomacy +15, Nature +13, Stealth +17
**Str** 19 (+10) **Dex** 22 (+12) **Wis** 15 (+8)
**Con** 14 (+8) **Int** 18 (+10) **Cha** 19 (+10)

### Couatl Rogue Serpent Tactics

A couatl rogue serpent tries to bite as many enemies as possible with its venom, so it can use *venomous teleport*. Its bite allows it to move away safely. It uses *passing bites* to damage two enemies, and might follow up with *venomous teleport* to put them closer together.

**Couatl Redeemer** **Level 24 Artillery**
Large immortal magical beast XP 6,050

**Initiative** +16 **Senses** Perception +19
**HP** 174; **Bloodied** 87
**AC** 37; **Fortitude** 33, **Reflex** 36, **Will** 36
**Speed** 8, fly 8 (hover)

⊕ **Bite** (standard; at-will) ✦ **Poison, Radiant**
+30 vs. AC; 2d6 + 5 damage, the target is immobilized until the end of the couatl redeemer's next turn, and the target takes ongoing 10 poison and radiant damage (save ends).

**Brilliant Beam** (standard; at-will) ✦ **Radiant**
Ranged 20; +29 vs. Reflex; 2d10 + 10 radiant damage.

**Soul Sear** (standard; encounter) ✦ **Poison, Radiant**
Area burst 2 within 20; +27 vs. Fortitude; 2d6 + 5 poison and radiant damage, the target is weakened, and the target takes ongoing 10 poison and radiant damage (save ends both). *Miss:* Half damage, and the target takes ongoing 5 poison and radiant damage (save ends).

**Whirlwind** (standard; encounter)
Area burst 2 within 20; +27 vs. Reflex; 3d10 + 5 damage, and the target is immobilized in a whirlwind (save ends).

**Radiant Absorption** ✦ **Radiant**
If a couatl redeemer takes radiant damage, its attacks deal 5 extra radiant damage until the end of its next turn.

**Twist Free**
A couatl makes saving throws against immobilizing or restraining effects at the start of its turn as well as at the end of its turn. In addition, a couatl can make saving throws against immobilizing or restraining effects that do not allow saving throws and would normally end at the end of its turn or at the end of an enemy's turn.

**Alignment** Unaligned **Languages** Supernal
**Skills** Arcana +26, Bluff +20, Diplomacy +20, Insight +24
**Str** 18 (+16) **Dex** 19 (+16) **Wis** 24 (+19)
**Con** 24 (+19) **Int** 28 (+21) **Cha** 17 (+15)

### Couatl Redeemer Tactics

A couatl redeemer engages enemies at maximum range, opening with *soul sear* on a cluster of enemies and falling back with *brilliant beam*. It uses *whirlwind* when enemies approach or to help its allies. When forced to enter melee, it immobilizes its foe with a bite and then withdraws.

### Couatl Lore

**Religion DC 18:** A couatl rogue serpent can switch places with any creature suffering from a couatl's venom, and it injects a magic venom that burns more strongly when the couatl's allies are endangered.

**Religion DC 24:** Couatl redeemers can see into other creatures' hearts and know their intentions. Their venom is especially virulent. They can manipulate wind, holding foes in columns of air.

## Encounter Groups

Couatls mistrust other creatures; however, they value potent allies. Couatls lair near powerful creatures, such as dragons, that view interlopers as hostile. Couatls might band with creatures that want to procure the same secrets, treasure, or information that the couatls seek. Couatls ally with less intelligent creatures for greater ease in keeping secrets.

**Level 15 Encounter (XP 6,000)**
- 1 adult orium dragon (level 13 solo soldier)
- 2 couatl rogue serpents (level 14 skirmisher)

**Level 25 Encounter (XP 36,300)**
- 2 couatl redeemers (level 24 artillery)
- 2 angels of supremacy (level 24 soldier, *MM2* 10)
- 2 fell wyverns (level 24 skirmisher, *MM* 268)

### COUATL THEMES

Metallic dragons and couatls share some similar attributes, including the single-minded pursuit of their goals and a tendency to be benevolent. Couatls ally with dragons that guard ancient sites, and you can create themed encounters or adventures around these areas.

**Jungle Ruins:** Orium dragons and couatl rogue serpents or star serpents (see *Monster Manual* 2) guard cyclopean ruins deep within steaming jungles. The mammoth stone ziggurats hold secrets from ancient times. The characters might come to the ruins to seek artifacts they need and find themselves opposed by the dragon and the couatls. Or the creatures might call on the characters for assistance to drive out yuan-ti, demons, or undead that dwell in the tunnels beneath the ruins.

**Domains of Light:** To guard their astral lairs as they meditate, mithral dragons employ couatl allies. These couatls (usually redeemers) believe ardently that the visions of a mithral dragon foretell good fortune, so they aggressively guard the dominions these dragons call home. The characters might run across guardian couatls while sailing through the Astral Sea, and defeating them could draw a mithral dragon's wrath. If the characters merely seek the dragon's help—even if they're invited to an audience—the couatls might try to fight them off to keep the master's reverie unbroken.

**Golden Serpents:** Imperious gold dragons sometimes take couatls on as trusted lords or advisors. To give a sense of prosperity to its domain, a gold might commission beautiful architecture adorned with precious metals, rare pigments, and gems. The couatls also help keep up this appearance (whether deserved or artificial), as the dragon sends out the magnificent serpents to strike awe into its subjects. The characters might have a gold dragon patron that lives in such a domain, or might discover that the place is a facade that masks the misery and starvation of the people.

FRANZ VOHWINKEL

# DRACONIAN

Evil spellcasters and priests create cruel servitors known as draconians by using a ritual that corrupts metallic dragon eggs. The kind of draconian depends on the egg it hatched from. For instance, a gold dragon egg produces a small number of the prized aurak draconians, and a bronze dragon egg can spawn up to a dozen bozak draconians.

The transformation that changes a dragon into a draconian causes the energy transference between the dragon's heart and fundamentum to become unstable. While the draconian lives, the pumping heart keeps a dragon's elemental energy in check, but once the heart stops, the energy exponentially increases and alters the draconian's corpse. Some undergo a minor transformation, such as turning to stone, but in others the elemental forces grow so immense that they cause an explosive overload of destructive energy.

**DRACONIANS AND METALLIC DRAGON EGGS**

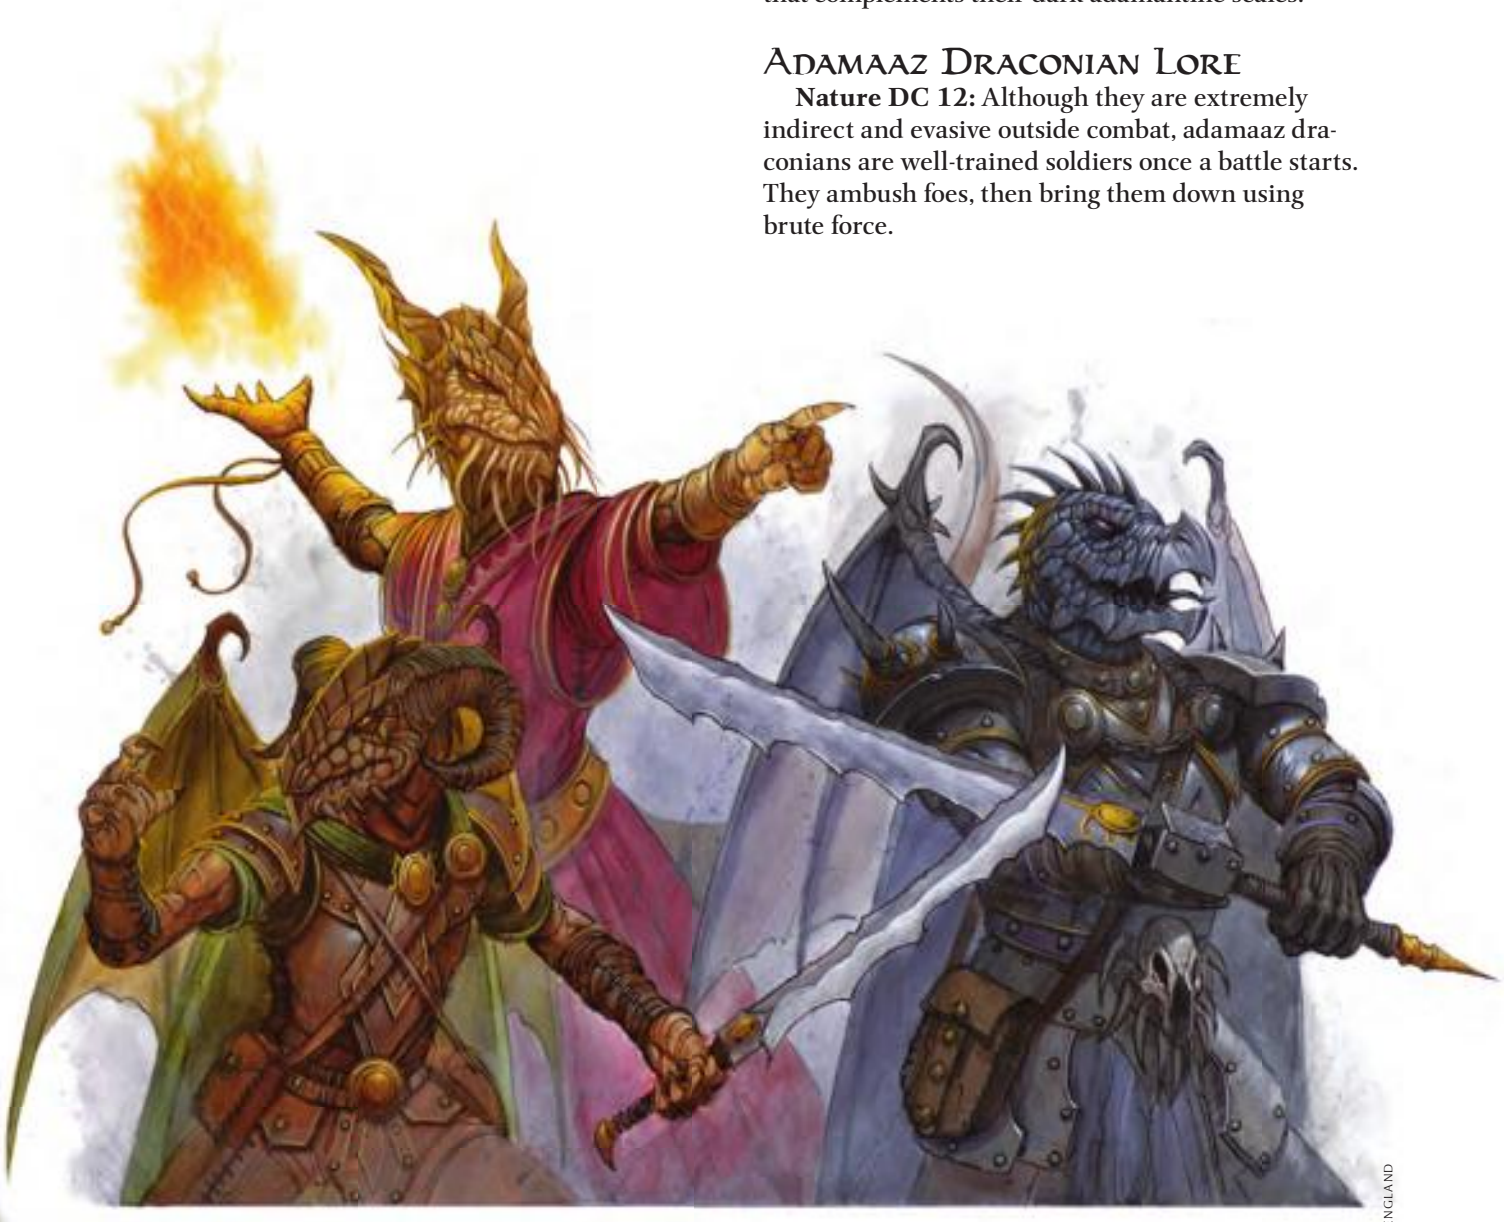
| Draconian Kind | Corrupted Egg |
|---|---|
| Adamaaz | Adamantine |
| Aurak | Gold |
| Baaz | Brass |
| Bozak | Bronze |
| Ferak | Iron |
| Kapak | Copper |
| Kobaaz | Cobalt |
| Sivak | Silver |

## Adamaaz Draconian

Adamaaz draconians are fierce creatures that relish ambushes and melee combat. They stalk their prey in the dead of night, wearing pitch-black armor that complements their dark adamantine scales.

### Adamaaz Draconian Lore

**Nature DC 12:** Although they are extremely indirect and evasive outside combat, adamaaz draconians are well-trained soldiers once a battle starts. They ambush foes, then bring them down using brute force.



*Left to right: Baaz, aurak, and adamaaz draconians*

WAYNE ENGLAND

| **Adamaaz Draconian** | **Level 6 Soldier** |
|---|---|
| Medium natural humanoid (reptile) | XP 250 |
| **Initiative** +9 | **Senses** Perception +5; darkvision |
| **HP** 74; **Bloodied** 37; see also *thunderous throe* | |
| **AC** 22; **Fortitude** 19, **Reflex** 19, **Will** 17 | |
| **Speed** 5, fly 5 (clumsy) | |
| (+) **Falchion** (standard; at-will) ✦ **Weapon** | |
| +13 vs. AC; 2d4 + 5 damage (crit 2d4 + 12). | |
| **Thunderous Throes** (when the draconian drops to 0 hit points) ✦ **Thunder** | |
| Close burst 2; +11 vs. Fortitude; 2d8 + 3 thunder damage, the target is knocked prone, and the target is deafened (save ends). | |
| **Marauding Step** (immediate reaction, when an adjacent enemy shifts; at-will) | |
| The draconian shifts 1 square and makes a melee basic attack against the triggering enemy. | |
| **Alignment** Evil | **Languages** Common, Draconic |
| **Skills** Athletics +12, Intimidate +10, Stealth +12 | |
| **Str** 19 (+7) | **Dex** 18 (+7) **Wis** 14 (+5) |
| **Con** 18 (+7) | **Int** 13 (+4) **Cha** 15 (+5) |
| **Equipment** plate armor, falchion | |

**Nature DC 17:** When an adamaaz draconian is slain, elemental energy is released in a thunderous explosion that deafens and knocks down nearby creatures.

### Adamaaz Draconian Tactics

Surprisingly quick and nimble, an adamaaz draconian prefers to ambush its foes from higher ground—typically a cliff edge or rooftop. A gutsy combatant, it lands in the middle of its foes. It then ducks and weaves through the fray, reacting to its enemy's attacks with *marauding step*, and cutting them down with its powerful falchion.

## Aurak Draconian

Masters of the mind, aurak draconians assault their foes with psychic urgings and twisting thoughts. Aurak draconians are wingless, but they can teleport short distances.

Aurak draconians are also incredibly hard to kill. Before dying, an aurak draconian immolates itself in green flames and flies into a burning, bloody frenzy. It strikes its enemy with savage claws before finally falling.

### Aurak Draconian Lore

**Nature DC 14:** Aurak draconians are rare. They are masters of magic that can twist the mind of a foe to do their bidding.

**Nature DC 19:** When an aurak draconian is killed, it is consumed by a frenzy that transforms the creature into a terrifying, fiery horror. It fights until it burns out or a particularly powerful blow finally downs the creature.

| **Aurak Draconian** | **Level 8 Controller (Leader)** |
|---|---|
| Medium natural humanoid (reptile) | XP 350 |
| **Initiative** +5 | **Senses** Perception +9; darkvision |
| **Fiery Frenzy** (**Fire**) aura 1; only when the aurak draconian drops to 0 hit points; each enemy that starts its turn within the aura takes 5 fire damage. See also *death frenzy*. | |
| **HP** 70; **Bloodied** 35; see also *death frenzy* | |
| **AC** 22; **Fortitude** 19, **Reflex** 21, **Will** 21 | |
| **Speed** 6 | |
| (+) **Claw** (standard; at-will) | |
| +13 vs. AC; 2d6 + 5 damage. | |
| **Fiery Blast** (standard; at-will) ✦ **Fire** | |
| Ranged 5; +12 vs. Reflex; 1d10 + 7 fire damage. | |
| **Mindbend** (standard; encounter) ✦ **Charm, Psychic** | |
| Ranged 10; +12 vs. Will; 1d6 + 5 psychic damage, and the target is dominated (save ends). | |
| **Death Frenzy** (when the draconian drops to 0 hit points) | |
| The draconian does not fall dead, but instead flies into a savage and fiery rage. Its *fiery frenzy* aura is activated. The draconian can make only melee basic attacks, but it deals 1d6 extra damage on those attacks. At the end of each of its turns, the draconian makes a saving throw. If it fails, it dies. It also dies if an enemy scores a critical hit against it. | |
| **Dimensional Step** (move; recharge ⚅) ✦ **Teleportation** | |
| The aurak draconian teleports 5 squares. | |
| **Defend Me!** (minor; at-will) | |
| One ally within 5 squares shifts 1 square. | |
| **Change Shape** (minor; encounter) ✦ **Polymorph** | |
| An aurak draconian can alter its physical form to appear as any Medium humanoid (see "Change Shape," *MM2* 216). | |
| **Alignment** Evil | **Languages** Common, Draconic |
| **Skills** Diplomacy +13, Insight +14 | |
| **Str** 13 (+5) | **Dex** 13 (+5) **Wis** 20 (+9) |
| **Con** 17 (+7) | **Int** 20 (+9) **Cha** 18 (+8) |
| **Equipment** robes | |

### Aurak Draconian Tactics

Arrogant to the extreme, an aurak draconian guides its allies to build a defensive barrier between it and its foes. The aurak then tries to dominate the most powerful enemy, while striking at others with its *fiery blasts*. It constantly moves nearby allies to defensive and offensive positions with its *defend me!* power, while using *dimensional step* to gain a better spot on the battlefield from which to pepper enemies with fiery death.

Once it enters its *death frenzy*, any notion of subtle tactics leaves the aurak. It spends its last actions wreaking as much havoc as possible against as many enemies as it can.

## Baaz Draconian

Baaz draconians serve as rank-and-file troopers of draconian armies. Although lacking the intelligence of other draconians, they are not without guile. Hiding under heavy masks and cloaks, baaz draconians slip into civilized areas to further the draconian cause.

*Bozak draconian*

| **Baaz Draconian** | | **Level 2 Soldier** |
|---|---|---|
| Medium natural humanoid (reptile) | | XP 125 |
| **Initiative** +5 | **Senses** Perception +2; darkvision | |
| **HP** 41; **Bloodied** 20; see also *stone dead* | | |
| **AC** 18; **Fortitude** 15, **Reflex** 14, **Will** 13 | | |
| **Speed** 5, fly 5 (clumsy) | | |
| ⊕ **Longsword** (standard; at-will) ✦ **Weapon** | | |
| +9 vs. AC; 1d8 + 5 damage, and the target is marked until the end of the draconian's next turn. | | |
| ⸸ **Leaping Charge** (standard; at-will) ✦ **Weapon** | | |
| The draconian makes a charge attack, ignoring difficult terrain; +10 vs. AC; 2d8 + 5 damage, and the target is marked until the end of the draconian's next turn. | | |
| ⸸ **Stone Dead** (when the draconian drops to 0 hit points) ✦ **Polymorph** | | |
| The draconian turns into a statue, and the square it occupies becomes difficult terrain that provides cover. If the draconian was reduced to 0 hit points by a melee attack using a weapon, it makes the following attack against that weapon's wielder: +7 vs. Reflex; the target is disarmed, and the weapon is stuck partially inside the statue. An adjacent creature can yank out the weapon as a standard action. The statue crumbles to dust at the end of the encounter. | | |
| **Alignment** Evil | **Languages** Common, Draconic | |
| **Skills** Athletics +7, Bluff +7, Intimidate +7 | | |
| **Str** 13 (+2) | **Dex** 14 (+3) | **Wis** 12 (+2) |
| **Con** 17 (+4) | **Int** 8 (+0) | **Cha** 13 (+2) |
| **Equipment** scale armor, longsword | | |

| **Baaz Draconian Foot Soldier** | | **Level 8 Minion Soldier** |
|---|---|---|
| Medium natural humanoid (reptile) | | XP 88 |
| **Initiative** +9 | **Senses** Perception +4; darkvision | |
| **HP** 1; a missed attack never damages a minion; see also *stone dead*. | | |
| **AC** 24; **Fortitude** 22, **Reflex** 20, **Will** 19 | | |
| **Speed** 5, fly 5 (clumsy) | | |
| ⊕ **Longsword** (standard; at-will) ✦ **Weapon** | | |
| +15 vs. AC; 6 damage, and the target is marked until the end of the draconian's next turn. | | |
| ⸸ **Stone Dead** (when the draconian drops to 0 hit points) ✦ **Polymorph** | | |
| The draconian turns into a statue, and the square it occupies becomes difficult terrain that provides cover. If the draconian was reduced to 0 hit points by a melee attack using a weapon, it makes the following attack against that weapon's wielder: +12 vs. Reflex; the target is disarmed, and the weapon is stuck partially inside the statue. An adjacent creature can yank out the weapon by spending a standard action. The statue crumbles to dust at the end of the encounter. | | |
| **Alignment** Evil | **Languages** Common, Draconic | |
| **Skills** Athletics +11, Bluff +11, Intimidate +11 | | |
| **Str** 15 (+6) | **Dex** 16 (+7) | **Wis** 10 (+4) |
| **Con** 20 (+9) | **Int** 9 (+3) | **Cha** 15 (+6) |
| **Equipment** scale armor, longsword | | |

### Baaz Draconian Lore

**Nature DC 10:** Baaz draconians are the most common draconian variety, and they serve as foot soldiers in a draconian army.

**Nature DC 15:** A slain baaz draconian instantly transforms into a rocky statue. This transformation happens so quickly that the creature can trap the weapon that killed it.

### Baaz Draconian Tactics

Baaz draconians rely on strength in numbers. A group pins down a single opponent, usually a striker, to allow more mobility for the baaz draconians' allies. Baaz draconians do not hesitate to attack enemies that have been disarmed.

## Bozak Draconian

The intelligent bozak draconians become gifted sorcerers and cunning warriors. They hold respected positions in draconian society.

### Bozak Draconian Lore

**Nature DC 12:** Bozak draconians are natural leaders and accomplished in the arcane arts. They can fire bolts of lightning.

**Nature DC 20:** When a bozak draconian is slain, its scaly skin shrivels, revealing a bleached skeleton that explodes in a shower of razor-sharp bone shards.

### Bozak Draconian Tactics

Bozak draconians attack from a distance, relying on allies to tie up enemies. They use *lightning lash* to break apart clustered enemies and *lightning burst* if their foes insist on staying in a close group. When

WAYNE ENGLAND

| Bozak Draconian | Level 5 Artillery |
|---|---|
| Medium natural humanoid (reptile) | XP 200 |
| **Initiative** +4 | **Senses** Perception +6; darkvision |
| **HP** 51; **Bloodied** 25; see also *shrapnel skeleton* | |
| **AC** 17; **Fortitude** 16, **Reflex** 17, **Will** 18 | |
| **Speed** 6, fly 6 (clumsy) | |
| (standard; at-will) ✦ **Weapon**: **Short Sword** +10 vs. AC; 1d6 + 7 damage. | |
| (standard; at-will) ✦ **Lightning**: **Lightning Lash** Ranged 10; +10 vs. Reflex; 1d8 + 4 lightning damage, and all creatures adjacent to the target slide 1 square and take 5 lightning damage. | |
| (when the draconian drops to 0 hit points): **Shrapnel Skeleton** The draconian's flesh crumbles to dust, revealing a skeleton that explodes in a shower of bone shards: close burst 2; +10 vs. Reflex; 2d10 + 4 damage. *Miss:* Half damage. | |
| (standard; encounter) ✦ **Lightning**: **Lightning Burst** Area burst 2 within 20; +10 vs. Reflex; 2d8 + 4 lightning damage. *Miss:* Half damage. | |
| **Alignment** Evil | **Languages** Common, Draconic |
| **Skills** Diplomacy +9, Insight +11 | |
| **Str** 14 (+4) | **Dex** 15 (+4) **Wis** 18 (+6) |
| **Con** 15 (+4) | **Int** 17 (+5) **Cha** 14 (+4) |
| **Equipment** leather armor, short sword | |

it faces imminent death, a bozak draconian moves closer to its enemies, so it can hit creatures with *shrapnel skeleton*.

# Ferak Draconian

Ferak draconians revel in brutal hand-to-hand combat, and use jagged short swords. Highly aggressive but less intelligent than other draconians, they are used as rank-and-file troops.

| Ferak Draconian | Level 3 Brute |
|---|---|
| Medium natural humanoid (reptile) | XP 150 |
| **Initiative** +1 | **Senses** Perception +3; darkvision |
| **HP** 55; **Bloodied** 27; see also *rust cloud* | |
| **AC** 15; **Fortitude** 17, **Reflex** 13, **Will** 15 | |
| **Speed** 7, fly 7 (clumsy) | |
| (standard; at-will) ✦ **Weapon**: **Short Sword** +6 vs. AC; 1d6 + 4 damage. | |
| (standard; at-will): **Double Slash** The draconian makes two short sword attacks. | |
| (when the draconian drops to 0 hit points) ✦ **Zone**: **Rust Cloud** The draconian explodes into a cloud of rust: close burst 2; +4 vs. Fortitude; 2d6 + 3 damage. *Effect:* The draconian's square and all squares in the burst become a zone of lightly obscured squares until the end of the encounter. | |
| **Alignment** Evil | **Languages** Common, Draconic |
| **Skills** Athletics +10, Intimidate +5, Stealth +6 | |
| **Str** 18 (+5) | **Dex** 11 (+1) **Wis** 15 (+3) |
| **Con** 15 (+3) | **Int** 7 (-1) **Cha** 8 (+0) |
| **Equipment** hide armor, 2 short swords | |

## Ferak Draconian Lore

**Nature DC 10:** Ferak draconians are brutal fighters that relish close combat. They are the shock troops of the draconian armies, used to bring about the most casualties possible.

**Nature DC 15:** When a ferak draconian dies, its body bursts into a cloud of rust that hangs in the air.

## Ferak Draconian Tactics

Ferak draconians are not subtle fighters. They ambush enemies by gliding down out of trees or other high structures and landing in the middle of a group of foes, next to fragile targets such as controllers or strikers.

# Kapak Draconian

Kapak draconians serve in draconian armies as stealthy infiltrators and ranged infantry. Their expertise in stealth, and their poisonous saliva, makes them sought-after assassins.

## Kapak Draconian Lore

**Nature DC 12:** Kapak draconians have soft, padded feet that allow them to move quietly. They exude poisonous saliva; when a kapak draconian licks its weapon, it intends to kill.

*Ferak draconian*

TOMÁS GIORELLO

| Kapak Draconian | Level 4 Lurker |
|---|---|
| Medium natural humanoid (reptile) | XP 175 |
| **Initiative** +10 | **Senses** Perception +3; darkvision |
| **HP** 45; **Bloodied** 22; see also *acid pool* | |
| **AC** 18; **Fortitude** 15, **Reflex** 17, **Will** 15 | |
| **Speed** 6, fly 6 (clumsy) | |
| **Short Sword** (standard; at-will) ✦ **Weapon** | |
| +9 vs. AC; 1d6 + 4 damage. | |
| **Shortbow** (standard; at-will) ✦ **Weapon** | |
| Ranged 15/30; +9 vs. AC; 1d8 + 4 damage. | |
| **Acid Pool** (when the draconian drops to 0 hit points) ✦ **Acid, Zone** | |
| The draconian dissolves into a pool of acid: close burst 1; +7 vs. Reflex; 2d8 + 4 acid damage. *Effect:* The draconian's square and all squares in the burst become a zone that lasts until the end of the encounter. Any creature that enters the zone or starts its turn there takes 5 acid damage. | |
| **Apply Poison** (standard, at-will) ✦ **Poison** | |
| The draconian gains a +4 bonus to all defenses and to Stealth checks until the start of its next turn, and it applies poison to its short sword or shortbow by licking the weapon. The next attack with that weapon deals 2d6 extra poison damage. | |
| **Draconian Sniper** | |
| A hidden kapak draconian that misses with a ranged attack remains hidden. | |
| **Alignment** Evil | **Languages** Common, Draconic |
| **Skills** Stealth +11 | |
| **Str** 14 (+4) | **Dex** 19 (+6) **Wis** 14 (+4) |
| **Con** 15 (+4) | **Int** 10 (+2) **Cha** 12 (+3) |
| **Equipment** leather armor, short sword, shortbow with 20 arrows | |

**Nature DC 17:** A kapak draconian transforms into a pool of acid when it is slain, spraying acid on nearby creatures.

## Kapak Draconian Tactics

At first, a kapak draconian engages enemies from a distance, attacking with poisoned arrows. After using a poisoned arrow, it uses *apply poison*, then moves to hide. If it ends up in melee, it uses *apply poison* to increase its defenses, then moves out of the combat.

# Kobaaz Draconian

Kobaaz draconians have a serious temperament that makes them perfect troops. Wielding their sharp glaives, kobaaz draconians are terrifying fighters trained in combating crowds of foes. Kobaaz draconians are uncommon, and more capable than the majority of other draconians variants, so they are afforded better training and equipment.

## Kobaaz Draconian Lore

**Nature DC 12:** Whenever a draconian army needs reliable warriors, the duty falls to the kobaaz draconians. Their expertise with the glaive can keep even the most vicious foes back.

**Nature DC 17:** When a kobaaz draconian is slain, the elemental energy held within it transforms its body into a statue made of ice.

| Kobaaz Draconian | Level 4 Controller |
|---|---|
| Medium natural humanoid (reptile) | XP 175 |
| **Initiative** +4 | **Senses** Perception +3; darkvision |
| **HP** 57; **Bloodied** 28; see also *ice statue* | |
| **AC** 18; **Fortitude** 17, **Reflex** 15, **Will** 14 | |
| **Speed** 5, fly 5 (clumsy) | |
| **Glaive** (standard; at-will) ✦ **Weapon** | |
| Reach 2; +9 vs. AC; 2d4 + 4 damage, and the target slides 3 squares. | |
| **Arching Blade** (standard; encounter) | |
| The kobaaz draconian makes a *glaive* attack against each enemy within reach. If an attack hits, the target is also knocked prone. After these attacks are made, the draconian can shift 1 square. | |
| **Ice Statue** (when the kobaaz draconian drops to 0 hit points) ✦ **Cold, Polymorph** | |
| The kobaaz draconian crystallizes into an icy statue. It becomes blocking terrain, and any creature that starts its turn within 2 squares of the statue takes 5 cold damage and is slowed until the end of its current turn. | |
| **Threatening Reach** | |
| A kobaaz draconian can make opportunity attacks against all enemies within its weapon's reach. | |
| **Alignment** Evil | **Languages** Common, Draconic |
| **Skills** Athletics +11 | |
| **Str** 18 (+6) | **Dex** 14 (+4) **Wis** 12 (+3) |
| **Con** 17 (+5) | **Int** 11 (+2) **Cha** 11 (+2) |
| **Equipment** scale armor, glaive | |

## Kobaaz Draconian Tactics

A kobaaz draconian wades into the middle of combat, supporting other melee combatants with its versatile attacks and keeping enemies from moving within its reach.

# Sivak Draconian

Sivak draconians are the largest and most physically imposing draconians. Due to their large wings, sivaks are the only draconians that can truly fly. Their ability to transform into creatures they have slain makes them useful spies in civilized society.

| Sivak Draconian | Level 8 Skirmisher |
|---|---|
| Large natural humanoid (reptile) | XP 350 |
| **Initiative** +11 | **Senses** Perception +7; darkvision |
| **HP** 90; **Bloodied** 45; see also *death mask* | |
| **AC** 22; **Fortitude** 20, **Reflex** 21, **Will** 19 | |
| **Speed** 7, fly 7 | |
| **Greatsword** (standard; at-will) ✦ **Weapon** | |
| Reach 2; +13 vs. AC; 1d12 + 6 damage. | |
| **Leaping Strike** (standard; recharge ⚄ ⚅) ✦ **Weapon** | |
| The draconian shifts 3 squares and makes an attack: reach 2; +13 vs. AC; 2d12 + 6 damage. | |
| **Death Mask** (when the draconian drops to 0 hit points; targets the creature that reduced the draconian to 0 hit points) ✦ **Fear, Psychic, Polymorph** | |
| The draconian dies, and changes its form to that of the creature that killed it; +9 vs. Will; 2d6 + 5 psychic damage, and the target is dazed until the end of its next turn. The draconian's body decomposes into dust after three days. | |
| **Flying Charge** | |
| When it is charging, a draconian can charge to any unoccupied space adjacent to the target, instead of just the closest space. | |

**Steal Appearance** (immediate reaction, when the sivak draconian kills a humanoid; at-will) ✦ **Polymorph**
The draconian alters its physical form to appear as the slain creature (see "Change Shape," *MM2* 216). The draconian can end the transformation as a minor action.

**Alignment** Evil **Languages** Common, Draconic
**Skills** Bluff +10, Streetwise +10

| | | |
|---|---|---|
| **Str** 18 (+8) | **Dex** 20 (+9) | **Wis** 16 (+7) |
| **Con** 18 (+8) | **Int** 12 (+5) | **Cha** 12 (+5) |

**Equipment** plate armor, greatsword

## Sivak Draconian Lore

**Nature DC 14:** Sivak draconians are surprisingly agile flyers, able to quickly shift their center of mass and charge foes in a manner hard to predict. They can on the appearance of people they slay, making them excellent infiltrators.

**Nature DC 19:** When killed, a sivak draconian transforms into the appearance of the person that slew it. This can shock and unsettle the killer.

## Sivak Draconian Tactics

Sivak draconians charge over opponents and drop into flanking positions, giving them better chances to hit with their serrated greatswords. When surrounded, a sivak draconian makes a short *leaping strike* to free itself.

# Encounter Groups

Draconians are most often encountered with their own kind. Due to their military background, they also associate with other martial races, such as hobgoblins. They frequently work for chromatic dragons. Only the most evil among metallic dragons would ever work alongside draconians.

**Level 3 Encounter (XP 752)**
- 2 baaz draconians (level 2 soldier)
- 1 bozak draconian (level 5 artillery)
- 4 hobgoblin grunts (level 3 minion, *MM* 138)
- 1 hobgoblin soldier (level 3 soldier, *MM* 139)

**Level 7 Encounter (XP 1,550)**
- 2 adamaaz draconians (level 6 soldier)
- 1 aurak draconian (level 8 elite controller)
- 1 sivak draconian (level 8 skirmisher)

**Level 9 Encounter (XP 2,202)**
- 4 baaz draconian foot soldiers (level 8 minion soldier)
- 1 sivak draconian (level 8 skirmisher)
- 1 young red dragon (level 7 solo soldier, *MM* 82)

*Left to right: Kapak, kobaaz, and sivak draconians*

WAYNE ENGLAND

# DRAKE

Drakes are smaller and less powerful than dragons, but the larger ones are far easier to train to use as mounts. Metallic dragons often train these creatures and either give them to their humanoid servants or use them to guard hoards, lairs, or strongholds.

## Liondrake

Liondrakes are fierce, intelligent desert hunters that blend the characteristics of a brass dragon and a great lion. They are fast, powerful adversaries armed with a devastating roar.

Though liondrakes understand Draconic and can manage a few words of Common, they rarely speak.

| **Liondrake** | **Level 12 Skirmisher** |
|---|---|
| Large natural magical beast (mount, reptile) | XP 700 |
| **Initiative** +12 | **Senses** Perception +14; darkvision |
| **HP** 122; **Bloodied** 61 | |
| **AC** 26; **Fortitude** 26, **Reflex** 24, **Will** 23 | |
| **Speed** 7, fly 10 (clumsy) | |
| ⊕ **Bite** (standard; at-will) | |
| Reach 2; +17 vs. AC; 2d6 + 6 damage. | |
| ⊕ **Claw** (standard; at-will) | |
| Reach 2; +17 vs. AC; 1d8 + 3 damage. | |
| ⸸ **Battle Leap** (standard; at-will) | |
| The liondrake shifts 4 squares and makes two claw attacks or a bite attack. | |
| ✧ **Terrifying Roar** (standard; recharge ⚄ ⚅) ✦ **Fear, Thunder** | |
| Close burst 5; targets enemies; +13 vs. Fortitude; 2d8 + 4 thunder damage, and the target is dazed (save ends). | |
| **Fierce Steed** (while mounted by a friendly rider of 12th level or higher) ✦ **Mount, Thunder** | |
| When it makes charge attacks, the liondrake and its rider gain a +4 to defense against opportunity attacks. | |
| **Alignment** Unaligned | **Languages** Common, Draconic |
| **Skills** Athletics +17 | |
| **Str** 22 (+12) | **Dex** 19 (+10) **Wis** 16 (+9) |
| **Con** 18 (+10) | **Int** 6 (+4) **Cha** 11 (+6) |

### Liondrake Tactics

A liondrake's wings are not strong, and it is a poor flier. Therefore, it prefers to fight on the ground. However, a drake is capable of great wing-assisted leaps. A liondrake begins a battle by rushing into the middle of its foes with *battle leap* and then using *terrifying roar*. It fights a highly mobile battle, using *battle leap* to keep from being surrounded. The drake follows *battle leap* with a move action if it needs to completely disengage.

### Liondrake Lore

**Nature DC 16:** Liondrakes are related to dragons, but only distantly. They favor warm, arid environs, especially deserts. They have a largely undeserved reputation for devouring hapless travelers lost in the wastelands.

**Nature DC 21:** Liondrakes are the product of magical experimentation by wizards of a long-lost kingdom. These mages infused lions with the essence of brass dragons in an effort to create powerful steeds and guard beasts for their overlord. The drakes have bred true in the centuries since.

## Vulture Drake

Vulture drakes were originally natural creatures of the world, but they have been corrupted by the dark energy of the Shadowfell. Cunning scavengers that love the taste of carrion, they are favored flying mounts of the shadar-kai and other creatures in the service of the Raven Queen.

A vulture drake is gaunt and menacing, with long, cumbersome wings. Its skin stretches taut on its skeletal frame.

| **Vulture Drake** | **Level 9 Brute** |
|---|---|
| Large natural beast (mount, reptile) | XP 400 |
| **Initiative** +7 | **Senses** Perception +12 |
| **HP** 119; **Bloodied** 59 | |
| **AC** 21; **Fortitude** 22, **Reflex** 21, **Will** 21 | |
| **Resist** 10 necrotic | |
| **Speed** 6, fly 8 (clumsy) | |
| ⊕ **Bite** (standard; at-will) ✦ **Necrotic** | |
| +12 vs. AC; 1d8 + 5 damage, and ongoing 5 necrotic damage (save ends). | |
| ⊕ **Claw** (standard; at-will) | |
| +12 vs. AC; 1d6 + 5 damage. | |
| ⸸ **Swooping Charge** (standard; at-will) | |
| The vulture drake makes a charge attack, starting in the air and ending on the ground. It can make two claw attacks against the target it charges, instead of making one melee basic attack. If both attacks hit, the target is knocked prone. | |
| ✧ **Death Shriek** (immediate reaction, when first damaged; encounter) ✦ **Fear, Necrotic, Thunder** | |
| Close blast 5; +10 vs. Will; 2d8 + 5 thunder damage, and the target takes ongoing 5 necrotic damage and a -2 penalty to attack rolls and saving throws (save ends both). | |

DAVE ALLSOP

**Death Scent**
Creatures taking ongoing necrotic damage gain no benefit from concealment or total concealment when they are attacked by a vulture drake.

**Shadow Mount** (when mounted by a friendly rider of 7th level or higher; at-will)
The vulture drake grants its rider resist 10 necrotic and a +4 bonus to saving throws against fear effects.

**Alignment** Unaligned **Languages** –

| | | |
|---|---|---|
| **Str** 18 (+8) | **Dex** 16 (+7) | **Wis** 16 (+7) |
| **Con** 19 (+8) | **Int** 3 (-1) | **Cha** 10 (+4) |

## Vulture Drake Tactics

A vulture drake charges directly into combat from the air, making use of its *swooping charge* and deliberately setting itself up to be hit so that it can use its *death shriek*. It focuses its attacks on a single target, and then takes off to charge another enemy once the first one is no longer a threat.

## Vulture Drake Lore

**Nature DC 14:** Vulture drakes are also known as deathwings. They are common in areas of the Shadowfell, and it is believed that when one is sighted in the world, it portends great ill.

**Nature DC 19:** A cabal of cobalt dragons known as the Conclave of the Black Frost first bred vulture drakes in the Shadowfell. The conclave eventually came into conflict with the Raven Queen, and her shadowsworn agents eradicated them. Those same agents spared the vulture drakes, seeing them as useful in the Raven Queen's war against the powers of undeath.

## Encounter Groups

Aggressive, intelligent, and territorial, liondrakes are highly valued guardians. They sometimes agree to serve worthy champions as steeds.

Vulture drakes are often found as mounts of the shadar-kai and other creatures that follow the Raven Queen.

**Level 10 Encounter (XP 2,950)**
- 3 shadar-kai warriors (level 8 soldier, *MM* 231)
- 1 shadar-kai witch (level 7 controller, *MM* 231)
- 4 vulture drakes (level 9 brute)

**Level 12 Encounter (XP 3,900)**
- 1 human wizard lich (level 14 elite controller, *MM* 176)
- 1 liondrake (level 12 skirmisher)
- 2 mezzodemons (level 11 soldier, *MM* 58)

KEREM BEYIT

# DRAKKENSTEED

Drakkensteeds are fierce, remarkably cunning reptilian predators. A drakkensteed's broad, sharp wings and long neck evoke flying predators of bygone epochs, yet its four-legged stance—complete with dagger-sharp claws—and its fanged snout are clearly draconic in nature. From their lairs in high peaks and caves, families of drakkensteeds claim a wide region as their own hunting ground, tolerating no competition.

Drakkensteed eggs and young are worth more than their weight in gold, since drakkensteeds can be trained to serve as mounts for particularly strong-willed riders.

**Drakkensteed** **Level 16 Skirmisher**
Large natural magical beast (mount, reptile) XP 1,400

**Initiative** +15 **Senses** Perception +12; low-light vision
**HP** 157; **Bloodied** 78
**AC** 30; **Fortitude** 29, **Reflex** 27, **Will** 26
**Speed** 8, fly 10, overland flight 15

⨺ **Claw** (standard; at-will)
+21 vs. AC; 2d8 + 7 damage.

⨺ **Wing Swipe** (standard; at-will)
+21 vs. AC; 1d6 + 7 damage.

↓ **Flyby Attack** (standard; at-will)
The drakkensteed flies up to 10 squares and makes one claw attack, or two wing swipes against different creatures, at any point during that movement. The drakkensteed doesn't provoke opportunity attacks when moving away from the targets of the attacks.

✧ **Fearsome Roar** (standard; encounter) ✦ **Fear**
Close burst 3; targets enemies; +19 vs. Fortitude; the target is dazed (save ends).

**Drakkensteed Action** (while mounted by a friendly rider of 16th level or higher; encounter) ✦ **Fear, Mount**
When the rider spends an action point to take an extra action, the drakkensteed's *fearsome roar* recharges, and the drakkensteed uses it as a free action.

**Alignment** Unaligned **Languages** –
**Str** 24 (+15) **Dex** 21 (+13) **Wis** 19 (+12)
**Con** 21 (+13) **Int** 3 (+4) **Cha** 10 (+8)

## Drakkensteed Tactics

Drakkensteeds initiate combat with a *fearsome roar*, hoping to cripple foes early, and then follow with a *flyby attack*. Drakkensteeds fight on the ground if circumstances warrant, but they prefer to keep to the air and rely on hit-and-run tactics.

### Drakkensteeds of a Different Breed

The cobalt dragon-bred drakkensteed described here is just one variety of this creature. These drakkensteeds can be "bred" from the blood of almost any kind of dragon. Those created from other dragons tend to have a simple breath weapon keyed to the damage type of the parent dragon and resistances that mirror the dragon of their origin.

**Grave-Born Drakkensteed** **Level 21 Artillery**
Large natural magical beast (mount, undead) XP 3,200

**Initiative** +16 **Senses** Perception +15; darkvision
**HP** 155; **Bloodied** 77
**AC** 33; **Fortitude** 34, **Reflex** 32, **Will** 31
**Immune** disease, poison; **Resist** 15 necrotic
**Speed** 6, fly 8, overland flight 14

⨺ **Claw** (standard; at-will) ✦ **Necrotic**
+26 vs. AC; 1d6 + 7 damage, and ongoing 10 necrotic damage (save ends).

⚚ **Eyes of the Grave** (standard; at-will) ✦ **Fear, Gaze, Necrotic**
Ranged 10; +26 vs. Fortitude; 3d8 + 8 necrotic damage, and the target takes a -2 penalty to attack rolls made against the drakkensteed or its rider until the end of the drakkensteed's next turn.

✧ **Breath of the Grave** (standard; encounter) ✦ **Necrotic**
Close blast 4; +26 vs. Fortitude; 3d8 + 8 necrotic damage, and the target is weakened (save ends).

**Gift of the Grave** (while mounted by a friendly rider of 21st level or higher; encounter) ✦ **Fear, Gaze, Necrotic, Mount**
When the rider spends an action point to take an extra action, the drakkensteed's *breath of the grave* recharges, and the drakkensteed uses it as a free action.

**Grave Resistance** (while mounted by a friendly rider of 21st level or higher) ✦ **Mount**
The mounted rider gains resist 15 necrotic and resist 15 poison.

**Alignment** Unaligned **Languages** –
**Str** 26 (+18) **Dex** 23 (+16) **Wis** 21 (+15)
**Con** 23 (+16) **Int** 2 (+6) **Cha** 7 (+8)

## Grave-Born Drakkensteed Tactics

Grave-born drakkensteeds retain their instincts to protect and cooperate with their riders. They fight from a distance, making use of *eyes of the grave* and *breath of the grave*, engaging in melee only when commanded or forced to do so. Since they are already dead, they fight until destroyed unless commanded otherwise.

**Cobalt Dragon-Bred Drakkensteed** **Level 26 Skirmisher**
Large natural magical beast (dragon, mount) XP 9,000

**Initiative** +23 **Senses** Perception +19; darkvision
**HP** 240; **Bloodied** 120
**AC** 38; **Fortitude** 39, **Reflex** 38, **Will** 36
**Resist** 15 cold
**Speed** 8, fly 10, overland flight 15

⨺ **Claw** (standard; at-will) ✦ **Cold**
+31 vs. AC; 2d6 + 8 damage plus 1d6 cold damage.

⨺ **Wing Swipe** (standard; at-will) ✦ **Cold**
+31 vs. AC; 1d6 + 8 damage plus 1d6 cold damage.

↓ **Flyby Attack** (standard; at-will)
The drakkensteed flies up to 10 squares and makes one claw attack, or two wing swipes against different creatures, at any point during that movement. The drakkensteed doesn't provoke opportunity attacks when moving away from the targets of the attacks.

| | | |
|---|---|---|
| ⊹ **Breath Weapon** (standard; encounter) ✦ **Cold** | | |
| Close blast 6; +29 vs. Reflex; 4d12 + 6 cold damage. | | |
| ⊹ **Fearsome Roar** (standard; encounter) ✦ **Fear** | | |
| Close burst 4; deafened creatures are immune; +29 vs. Fortitude; the target is dazed (save ends). A friendly rider of 22nd level or higher is immune. | | |
| **Gift of the Dragon** (while mounted by a friendly rider of 22nd level or higher; encounter) ✦ **Mount** | | |
| When the mounted rider spends an action point to take an extra action, the drakkensteed's *fearsome roar* or *breath weapon* recharges (rider's choice), and the drakkensteed uses it as a free action. | | |
| **Draconic Resistance** (while mounted by a friendly rider of 22nd level or higher) ✦ **Mount** | | |
| The mounted rider gains resist 15 cold. | | |
| **Alignment** Unaligned | **Languages** Draconic | |
| **Str** 28 (+22) | **Dex** 26 (+21) | **Wis** 23 (+19) |
| **Con** 24 (+20) | **Int** 7 (+11) | **Cha** 13 (+14) |

## Dragon-Bred Drakkensteed Tactics

Dragon-bred drakkensteeds follow a *fearsome roar* with a *breath weapon* attack if their foes are sufficiently clumped together. They then rely on *flyby attacks*, fighting like standard drakkensteeds.

## Drakkensteed Lore

**Nature DC 20:** Drakkensteeds are reptilian creatures, somewhat akin to drakes. They are believed to have diverged from the same line that produced wyverns and other modern drakes, but much farther back during their development. Although not especially intelligent, they are cunning and, if their innate stubbornness can be overcome, trainable as mounts. They can be trained to understand a spoken language—normally Common or Draconic—even though they cannot speak. A drakkensteed egg can be worth as much as 6,000 gp to the right buyer (a level 17 treasure parcel).

**Nature DC 27:** A few powerful spellcasters have developed a ritual to reanimate drakkensteeds as a particular form of undead. These undead creatures generate internal necrotic energy and retain many of the instincts that make drakkensteeds such coveted mounts.

Not bred, but rather created through a secret process in which the egg of a drakkensteed is infused with the blood of a metallic dragon, dragon-bred drakkensteeds are more dangerous and more intelligent than their mundane kin, but they remain highly trainable. Some serve their creators, although others live in the wild and breed true. A dragon-bred drakkensteed egg can be worth up to 90,000 gp (a level 27 treasure parcel.)

## Encounter Groups

Wild drakkensteeds fight only in family groups, but when trained, they fight alongside their riders and any creatures they are commanded to accompany.

**Level 17 Encounter (XP 8,600)**
- ✦ 3 drakkensteeds (level 16 skirmisher)
- ✦ 2 yuan-ti malison disciples of Zehir (level 17 controller, *MM* 270)
- ✦ 1 yuan-ti malison incanter (level 15 artillery, *MM* 269)

**Level 25 Encounter (XP 36,000)**
- ✦ 2 cobalt dragon-bred drakkensteeds (level 26 skirmisher)
- ✦ 2 dragonborn champions (level 26 soldier, *MM* 87)

DAVE ALLSOP

Most kobolds revere chromatic dragons. Relatively few kobolds get along with or serve metallic dragons, but those that do are often a cut above the rabble that sides with the chromatics. Such kobolds are not common fodder, monsters that run when an ally falls in combat. They are encountered along with metallic dragon masters or powerful servitors of those masters. When they team up with other kobolds, they usually lead their inferiors.

## Dragonkin Kobold

A DRAGONKIN KOBOLD BINDS itself to the service of a dragon, sealing its allegiance by grafting one of its master's discarded scales into the flesh of its chest. It gains powers tied to its master's elemental energy, but surrenders its individuality and free will.

Dragonkin kobolds were introduced in *Draconomicon: Chromatic Dragons*. The kobolds presented here are suitable for an iron or bronze dragon. You can customize dragonkin kobolds by changing the energy they wield to match the breath weapon of the dragon they serve.

**Dragonkin Channeler** **Level 5 Controller**
Small natural humanoid, kobold (reptile) XP 200

**Initiative** +5 **Senses** Perception +4; darkvision
**HP** 61; **Bloodied** 30
**AC** 19; **Fortitude** 16, **Reflex** 18, **Will** 17
**Resist** 5 lightning
**Speed** 6

⨁ **Shocking Staff** (standard; at-will) ✦ **Lightning**
+9 vs. Reflex; 1d6 + 3 lightning damage, and the target is dazed until the end of the kobold's next turn.

↷ **Channel Lightning** (immediate reaction, when attacked with a lightning power; at-will) ✦ **Lightning**
The channeler uses the lightning around it to charge its *shocking staff* and make an attack: ranged 10; +9 vs. Reflex; 3d6 + 3 lightning damage.

✲ **Electrify** (standard; recharge ⚄ ⚅) ✦ **Lightning, Zone**
Area burst 2 within 10; +9 vs. Reflex; 1d6 + 3 lightning damage, and the target is dazed (save ends). *Effect:* The area becomes a zone of difficult terrain until the start of the channeler's next turn. Each creature that enters the zone takes 5 lightning damage.

**Shifty** (minor; at-will)
The kobold shifts 1 square.

**Trap Sense**
A kobold gains a +2 bonus to all defenses against traps.

**Alignment** Unaligned **Languages** Common, Draconic
**Str** 10 (+2) **Dex** 17 (+5) **Wis** 15 (+4)
**Con** 13 (+3) **Int** 10 (+2) **Cha** 14 (+4)
**Equipment** leather armor, staff

### Dragonkin Channeler Tactics

A channeler wields its draconic master's elemental energy through a mystic connection. In battle, the dragonkin stays near its master's enemies, hoping to be caught in a *breath weapon* attack that will allow it to use *channel lightning*. Otherwise, it uses *electrify* to guard its master's flanks or enters melee if it has nothing else to do.

**Dragonkin Zealot** **Level 5 Lurker**
Small natural humanoid, kobold (reptile) XP 200

**Initiative** +10 **Senses** Perception +8; darkvision
**HP** 49; **Bloodied** 24
**AC** 20; **Fortitude** 16, **Reflex** 19, **Will** 16
**Resist** 5 lightning
**Speed** 6

⨁ **Dagger** (standard; at-will)
+11 vs. AC; 2d4 + 4 damage.

↷ **Shuriken** (standard; at-will)
Ranged 6/12; +10 vs. AC; 1d6 + 6 damage.

**Run Away and Hide** (immediate reaction, when the dragonkin zealot takes damage; recharges when the zealot uses *electric zeal*)
The dragonkin zealot shifts its speed. If it reaches a square where it has cover or concealment, it can make a Stealth check to become hidden.

**Electric Zeal** (minor; recharges when the zealot uses *run away and hide*) ✦ **Lightning**
The dragonkin zealot deals 3d6 extra lightning damage on melee attacks until the start of its next turn.

**Shifty** (minor; at-will)
The kobold shifts 1 square.

**Trap Sense**
A kobold gains a +2 bonus to all defenses against traps.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Stealth +11
**Str** 10 (+2) **Dex** 19 (+6) **Wis** 13 (+3)
**Con** 13 (+3) **Int** 8 (+1) **Cha** 10 (+2)
**Equipment** leather armor, dagger, 5 shuriken

### Dragonkin Zealot Tactics

The zealot spies on intruders in a dragon's territory, trailing them in secret until it is time for an assault. The dragonkin zealot enters battle near cover or concealment so it can use *electric zeal* to empower its attack before dashing away and hiding.

**Dragonkin Champion** **Level 7 Brute**
Small natural humanoid, kobold (reptile) XP 300

**Initiative** +6 **Senses** Perception +5; darkvision
**HP** 94; **Bloodied** 47
**AC** 18; **Fortitude** 19, **Reflex** 18, **Will** 17
**Resist** 5 lightning
**Speed** 6

⨁ **Spear** (standard; at-will) ✦ **Weapon**
+10 vs. AC; 2d6 + 6 damage.

↯ **Shocking Spear** (standard; recharges when the kobold's draconic master uses *breath weapon*) ✦ **Lightning, Weapon**
The kobold makes two attacks: reach 2; +10 vs. AC; 3d6 + 6 lightning damage.

**Draconic Inspiration**
A kobold deals 1d6 extra lightning damage against any creature adjacent to one of the kobold's dragon allies.

**Shifty** (minor; at-will)
The kobold shifts 1 square.
**Trap Sense**
A kobold gains a +2 bonus to all defenses against traps.
**Alignment** Unaligned **Languages** Common, Draconic
**Str** 19 (+7) **Dex** 17 (+6) **Wis** 16 (+5)
**Con** 14 (+5) **Int** 12 (+4) **Cha** 10 (+3)
**Equipment** spear

## Dragonkin Champion Tactics

Dragonkin champions fight poorly when caught away from their draconic masters. When in their preferred circumstances, dragonkin champions fight more shrewdly than most brutes, waiting until their masters have pressed the enemy before engaging in melee. They use *shifty* to avoid becoming trapped, knowing that the longer they survive, the more harm they'll be able to inflict on their master's enemies.

## Dragonkin Kobold Lore

**Nature DC 12:** Dragonkin kobolds protect the lairs and interests of dragons. Each kobold has a scale from its master permanently embedded in its chest. A dragonkin kobold is fanatically loyal and thinks nothing of sacrificing itself for its master's sake.

DAVE ALLSOP

## Encounter Groups

Dragonkin kobolds live only to serve their masters' wishes.

**Level 8 Encounter (XP 1,900)**
- 3 dragonkin kobold champions (level 7 brute)
- 1 young cobalt dragon (level 5 solo controller)

**Level 9 Encounter (XP 2,100)**
- 1 dragonkin kobold channeler (level 5 controller)
- 2 dragonkin kobold zealots (level 5 lurker)
- 1 young bronze dragon (level 7 solo brute)

# Wyrmguard Kobold

Brave and trustworthy (by kobold standards), wyrmguard kobolds guard their dragon masters zealously. Wyrmguards single out one creature or object—usually a dragon, one of the dragon's lieutenants, or one of its prized possessions—to protect, forcing enemies to take care of them before harming those they guard.

Wyrmguard kobolds wear armor decorated with runes of warding. Their gear is a combination of mundane items and magic tools—all wyrmguards practice some amount of magic.

**Wyrmguard Sentinel** **Level 7 Soldier**
Small natural humanoid, kobold (reptile) XP 300
**Initiative** +8 **Senses** Perception +6; darkvision
**HP** 80; **Bloodied** 40
**AC** 23; **Fortitude** 20, **Reflex** 19, **Will** 19
**Speed** 6
⊕ **Dragontooth Spear** (standard; at-will) ✦ **Weapon**
+14 vs. AC; 2d8 + 2 damage, and the target is marked until the end of the sentinel's next turn.
**Sentinel's Ward** (minor; at-will)
The wyrmguard sentinel designates an ally or object within 10 squares as its ward, and any creature it was already warding is no longer its ward. The ward takes half damage from creatures marked by the sentinel.
**Combat Superiority**
A sentinel has a +3 bonus to attack rolls on opportunity attacks. If a move provoked the attack, an enemy struck by the wyrmguard's opportunity attack stops moving. If it still has actions remaining, the enemy can use them to resume moving.
**Shifty** (minor; at-will)
The sentinel shifts 1 square.
**Trap Sense**
A sentinel gains a +2 bonus to all defenses against traps.
**Alignment** Unaligned **Languages** Common, Draconic
**Str** 19 (+7) **Dex** 16 (+6) **Wis** 16 (+6)
**Con** 16 (+6) **Int** 10 (+3) **Cha** 13 (+4)
**Equipment** scale armor, dragontooth spear

## Wyrmguard Sentinel Tactics

A wyrmguard sentinel stands tireless guard or walks regular patrols near a place or object it protects. It attempts to keep foes nearby using *combat superiority*. *Sentinel's ward* allows a sentinel to protect one ally at a time. Frequently, wyrmguard sentinels are grouped

with leaders, who keep them alive in exchange for the protection they provide.

| **Wyrmguard Scout** | **Level 9 Artillery** |
|---|---|
| Small natural humanoid, kobold (reptile) | XP 400 |
| **Initiative** +11 | **Senses** Perception +12; darkvision |
| **HP** 75; **Bloodied** 37 | |
| **AC** 21; **Fortitude** 19, **Reflex** 22, **Will** 20 | |
| **Speed** 6 | |
| **Dagger** (standard; at-will) ✦ **Weapon** | |
| +16 vs. AC; 2d4 + 3 damage. | |
| **Dragon Bolt** (standard; at-will) ✦ **Poison** | |
| Ranged 20; +14 vs. Reflex; 2d6 + 5 poison damage. | |
| **Dragon Clash** (standard; targets enemies; recharges when the scout's ward is damaged by an enemy) ✦ **Poison** | |
| Area burst 1 within 20; +12 vs. Fortitude; 3d6 + 5 poison damage. | |
| **Scout's Ward** (minor; at-will) | |
| The wyrmguard sentinel designates an ally or object within 10 squares as its ward, and any creature it was already warding is no longer its ward. The scout deals 2d6 extra damage against the enemy nearest to its ward. | |
| **Shifty** (minor; at-will) | |
| The scout shifts 1 square. | |
| **Trap Sense** | |
| A scout gains a +2 bonus to all defenses against traps. | |
| **Alignment** Unaligned | **Languages** Common, Draconic |
| **Str** 10 (+4) | **Dex** 20 (+9) **Wis** 17 (+7) |
| **Con** 15 (+6) | **Int** 12 (+5) **Cha** 15 (+6) |
| **Equipment** leather armor, dagger | |

## Wyrmguard Scout Tactics

Scouts prefer to remain at the outer edge of their range, usually on ledges or other high terrain, sniping at foes while their allies move in closer. They choose wards as early as possible, and then concentrate on protecting their wards using *dragon clash* when possible (even if they can hit only one target) and *dragon bolt* the rest of the time.

Different scouts use different damage types. The example scout's damage type is based on using it with a mercury dragon, but it can change to fit alongside other dragons.

## Wyrmguard Lore

**Arcana or Nature DC 14:** Wyrmguard kobolds are normally used as bodyguards for their creators or assigned to guard a specific location, individual, or treasure. Some have been assigned to guard a dragon's clutch of eggs.

**Arcana or Nature DC 19:** Wyrmguard kobolds guard those they admire and learn minor magic that lets them place protective wards. When they are without dragons or leaders to guard, they guard each other effectively. Most wyrmguard kobolds serve dragons, and might be encountered alongside them.

## Encounter Groups

Wyrmguards are usually found in mixed groups of creatures, all loyal to the same dragon. It's rare to find more than a couple of wyrmguards in a single group of monsters—and they aggravate players if too many appear in the same encounter.

**Level 7 Encounter (XP 1,600)**
- 2 wyrmguard sentinels (level 7 soldier)
- 1 young cobalt dragon (level 5 solo controller)

**Level 9 Encounter (XP 2,300)**
- 2 dragonborn gladiators (level 10 soldier, *MM* 86)
- 1 portal drake (level 10 controller, *Draconomicon: Chromatic Dragons*, page 223)
- 2 wyrmguard scouts (level 9 artillery)

DAVE ALLSOP

# Three-Tooth

Though kobolds that could reasonably be called "heroes" are few and far between, Three-Tooth has made herself known by attacking the people of the bigger, tougher races and surviving, often with the help of her dragon ally.

| **Three-Tooth** | **Level 10 Elite Artillery** |
|---|---|
| Small natural humanoid, kobold (reptile) | XP 1,000 |
| **Initiative** +11 | **Senses** Perception +8; darkvision |
| **HP** 176; **Bloodied** 88 | |
| **AC** 22; **Fortitude** 19, **Reflex** 21, **Will** 22 | |
| **Saving Throws** +2 | |
| **Speed** 6 | |
| **Action Points** 1 | |
| **Dagger** (standard; at-will) ✦ **Weapon** | |
| +17 vs. AC; 2d4 + 5 damage. | |
| **Venom Bolt** (standard; at-will) ✦ **Implement, Poison** | |
| Ranged 20; three attacks against up to three different targets; +15 vs. Reflex; 1d8 + 5 poison damage, and Three-Tooth pushes the target 3 squares. | |
| **Resonating Orb** (standard; recharge ⚄ ⚅) ✦ **Force, Implement** | |
| Area burst 2 within 20; +15 vs. Reflex; 2d8 + 5 force damage, and the target is knocked prone. Damage from this attack ignores temporary hit points. | |
| **Kobold Sorcery** | |
| When Three-Tooth rolls an even number on an attack roll with an implement power (whether the attack hits or misses), she slides the target 1 square after the attack. | |
| **Blinking Shifty** (minor; at-will) ✦ **Healing, Teleportation** | |
| Three-Tooth teleports 2 squares and regains 3 hit points. | |
| **Teleport Escape** (move; encounter) ✦ **Teleportation** | |
| Three-Tooth teleports 10 squares. | |
| **Trap Sense** | |
| Three-Tooth gains a +2 bonus to all defenses against traps. | |
| **Alignment** Unaligned | **Languages** Common, Draconic |
| **Str** 14 (+7) | **Dex** 22 (+11) **Wis** 16 (+8) |
| **Con** 19 (+9) | **Int** 14 (+7) **Cha** 24 (+12) |
| **Equipment** dagger | |

## Three-Tooth's Tactics

Three-Tooth makes a great recurring villain or rival. She isn't particularly bloodthirsty, just extremely good at pushing enemies away from things she wants and teleporting away from danger to prepared escape positions. Thanks to her *blinking shifty* power, she's both more mobile and more resilient than most spellslinging artillery.

## Three-Tooth Lore

**Arcana or Nature DC 16:** Three-Tooth, a great kobold hero—or villain, depending on her mood—is reputed to be the only survivor of a kobold nest that adopted a mercury wyrmling. The other kobolds died in battle or in the dragon's jaws, but Three-Tooth lived to become a powerful magician. She sometimes travels alongside her mercury dragon friend, which stays shapeshifted into a kobold form.

**Arcana or Nature DC 21:** Three-Tooth garners great respect from other kobolds, and her legend is deeper and larger than most realize. In fact, many of her adventures are attributed to previous aliases, such as Four-Tooth and Six-Tooth. She tends to pick fights, and brutal beatings at the hands of tough monsters have necessitated several name changes.

## Encounter Groups

Three-Tooth takes work as a mercenary, usually accompanied by her mercury dragon ally, Drokona. The characters might run into Three-Tooth while she's fighting a monstrous enemy, and then end up in a chaotic battle between three forces.

**Level 8 Encounter (XP 1,500)**

- ✦ Drokona, elite young mercury dragon (level 6 elite lurker; see the young mercury dragon on page 163 and the material on elite dragons on page 218)
- ✦ Three-Tooth (level 10 elite artillery)

## Spawn of Ringing Eggs

Once in a while, a kobold lays an extremely rare egg that rings like metal when struck with a claw. The tribe keeps its special eggs hidden until they hatch. The kobolds that emerge from metal eggs grow up to become the strongest kobolds of their generation. Often, they become champions in the service of a metallic dragons, as if that was their destiny.

Kobolds never speak publicly about the "ringing eggs." It's a secret that is referred to only by euphemisms, even in a well-known kobold folk tale, in which a kobold champion in the service of a gold dragon returns to slay all her relatives and crèche mates. Some kobolds consider this story a good reason to track down and destroy anyone else's ringing eggs, but the selfish creatures wouldn't think of destroying their own.

Chromatic dragons that know of ringing eggs do what they can to find and destroy them. They seldom find enough suspect eggs to make it worth their trouble. Few metallic dragons admit to caring about an oddity of kobold reproduction, but that doesn't mean they haven't noticed the situation and sought a way to exploit it. Explanations for the magic behind the phenomenon range from a hidden blessing of Bahamut to a curse by an ancient archmage.

# Dragon Hall of Fame

Few dragons are truly anonymous. Any dragon that survives to adulthood becomes a figure of local fame (or notoriety), at the least. However, some dragons earn truly legendary reputations that extend for hundreds, sometimes thousands, of miles beyond their homelands. The waking of an ancient dragon is an event that stirs fearful gossip in taverns and alehouses across half a continent. Here, then, are a few dragons whose reputations precede them.

## Andraemos

Many dragons achieve a certain level of fame—or infamy—for terrorizing a local populace and demanding or seizing its wealth. These relationships, between a dragon and a fearful region, are the subjects of countless stories told in scores of inns. Many dragons are content to make a name for themselves in just a township or two. But others have larger plans.

Andraemos's ambitions began at a young age. Legend tells that he was one of four hatchlings in a brood, but he outlived each of his siblings, stealing their food behind the back of their mother. It wasn't long before he had learned everything he thought he could from his parent and set off into his harsh desert home to make his own way.

But Andraemos wasn't done with his mother yet. She had seen the quiet ambition in his eyes and knew about the theft of food that enabled him to grow strong at the expense of his siblings. Such is the way of the desert, she knew, so she let it lie. But before Andraemos could escape her desert territory, she decided she did not relish the thought of a competitor dragon—especially one so hungry for power—lairing near her. She attacked, so the stories say, and caught the young dragon by surprise. But Andraemos was cleverer than even his mother had given him credit for being, and when their battle led into a narrow ravine filled with fragile, towering spires of rock, Andraemos finally found his advantage. He spun in mid-flight and fired a blast of fire at a precarious boulder perched atop a delicate spire of stone. The spire splintered and collapsed, and with perfect timing, the boulder fell on Andraemos's mother, crushing her skull and driving her body to the ravine floor below.

**Andraemos** **Level 15 Solo Artillery**
Adult brass dragon
Large natural magical beast (dragon) XP 6,000

**Initiative** +12 **Senses** Perception +15; darkvision
**HP** 600; **Bloodied** 300; see also *bloodied breath*
**AC** 28; **Fortitude** 28, **Reflex** 27, **Will** 26
**Resist** 20 fire
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Fire**
Reach 2; +22 vs. AC; 1d10 + 7 damage plus 1d6 fire damage.

⊕ **Claw** (standard; at-will)
Reach 2; +22 vs. AC; 1d8 + 7 damage.

**Dragon Ire** (standard; at-will)
Andraemos makes two claw attacks or one bite attack, and then shifts 1 square.

**Wing Buffet** (immediate reaction, when an enemy enters or leaves an adjacent square)
Targets the triggering enemy: +20 vs. Fortitude; 1d10 + 7 damage, the target is knocked prone, and Andraemos shifts 2 squares.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Fire**
Close blast 5; +20 vs. Reflex; 3d8 + 7 fire damage, and the target is knocked prone. *Miss:* Half damage.

ZOLTAN BOROS & GABOR SZIKSZAI

**Bloodied Breath** (free, when first bloodied; encounter) ✦ **Fire**
*Breath weapon* recharges, and Andraemos uses it. If he is flying, he can shift 5 squares before making this attack.

**Fire Stream** (standard; at-will) ✦ **Fire**
Ranged 10; +20 vs. Reflex; 3d6 + 6 fire damage, and any creature adjacent to the target takes 2d10 fire damage.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 5; targets enemies; +20 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a –2 penalty to attack rolls (save ends).

**Mark of Death**
Andraemos's attacks deal 1d6 extra damage to any target marked by one of his allies.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Arcana +16, Athletics +17, Insight +15, Intimidate +16
**Str** 21 (+12) **Dex** 20 (+12) **Wis** 16 (+10)
**Con** 22 (+13) **Int** 18 (+11) **Cha** 19 (+11)

## Andraemos Lore

**Nature DC 18:** The brass dragon Andraemos rules a large swath of the desert. His domain is bordered on several sides by trade routes. He collects tribute from several of the towns on these routes, content to claim their money rather than destroy them outright.

Andraemos has established himself as a powerful force to be reckoned with in the region. During a scouting trip around his territory, he noticed a group of desert nomads. They were in the process of capturing a caravan that had been passing through the area, and Andraemos was captivated by their fighting style, which involved redirecting an enemy's attacks against the enemy and its allies. Curious about their presence, Andraemos landed and demanded that they give him the tribute he deserved as master of the desert. But the bandits—a group of eladrin—were unimpressed. They had recently come to the desert through a portal from the Feywild, and they had braved many dangers to make it to Andraemos's desert. Confronted with the dragon, they were prepared to die trying to survive.

Thinking quickly, the dragon recognized the value in employing the services of the clever and morally ambiguous eladrin, and their partnership endures to this day. Calling them the Sand Knives, he began to use them to enforce his will across the region. The eladrin have brought in more of their kind from the Feywild portal—which Andraemos now controls—and his territory has expanded tremendously.

**Nature DC 23:** The dragon has cowed a large tribe of goblins into a truce. Andraemos eventually plans to bring the goblins under his rule, but he is content to let them bribe him with tribute until he feels secure enough in his enlarged territory to destroy their leaders and take over leadership of the tribe.

Perhaps the dragon's biggest coup, however, was the capture of the desert city of Kashtaph. A corrupt merchant elected from an even more corrupt council ran the city. When this leader—a female human named Azril Illaenon—sent her eldest daughter to woo the son of a prince in a neighboring city-state, Andraemos's eladrin brigands captured her. In exchange for sparing her daughter's life, Andraemos wanted the city gates opened to his eladrin and the names and addresses of each member of the merchant council.

A bloody night followed Azril's capitulation to the dragon's demands, and the woman now rules the city in Andraemos's name, sending him a healthy cut of all the city's lucrative business ventures. Most of the citizens have no clue that their city is now run by a dragon, and Andraemos prefers it that way—for now.

**Nature DC 28:** It is whispered that Andraemos's mother once captured one of the fabled *Broken Blades of Banatruul*. He discovered the artifact in her hoard years after her death. He has sent his Sand Knives out into the world over many years, trying to find the matching blade, and rumor has it that one of them recently returned with it after being away for nearly three years.

**Sand Knives Bandit** **Level 13 Minion Soldier**
Medium fey humanoid, eladrin XP 200

**Initiative** +15 **Senses** Perception +8; low-light vision
**HP** 1; a missed attack never damages a minion.
**AC** 29; **Fortitude** 24, **Reflex** 27, **Will** 23
**Saving Throws** +5 against charm effects
**Speed** 6

**Scimitar** (standard; at-will) ✦ **Weapon**
+20 vs. AC; 6 damage (crit 9).

**Longbow** (standard; at-will) ✦ **Weapon**
Ranged 20/40; +20 vs. AC; 6 damage.

**Mark of Knives** (minor; at-will)
Melee 1; the target is marked until the end of its next turn.

**Fey Step** (move; encounter) ✦ **Teleportation**
The bandit teleports 5 squares.

**Alignment** Unaligned **Languages** Common, Elven
**Str** 18 (+10) **Dex** 25 (+13) **Wis** 14 (+8)
**Con** 16 (+9) **Int** 15 (+8) **Cha** 17 (+9)
**Equipment** leather armor, scimitar, longbow with 20 arrows

## Andraemos's Tactics

Andraemos is nearly always within hailing distance of a group of his Sand Knives. Nevertheless, he does make regular excursions to the limits of his domain, so it is possible to catch him alone. In battle, the dragon prefers to fight from a distance. He uses his *breath weapon* at the first opportunity, then *frightful presence* to incapacitate as many enemies as possible. He reserves *fire stream* for a particularly pesky foe.

## Encounter Groups

Andraemos is most likely encountered with a group of Sand Knives.

**Level 17 Encounter (XP 8,800)**
- Andraemos (level 15 solo artillery)
- 2 eladrin bladesingers (level 11 skirmisher, *MM2* 97)
- 8 sand knives bandits (level 13 minion soldier)

# Bahamut

The god of honor, justice and nobility, Bahamut is known as the Grandfather of Dragons or Lawbringer, but most often called the Platinum Dragon. Though the deity can appear in many forms, he is usually portrayed as a powerful dragon with platinum scales, the form he takes on when he goes to battle.

Adventurers often worship Bahamut, who is called to protect the weak, fight evildoers, and defend outposts of justice and civilization across the world. Paladins in particular often bear his heraldry—a platinum dragon head in profile—on their shields or as a holy symbol. And although not all metallic dragons show obeisance to the Platinum Dragon, those working at cross-purposes are careful to avoid the attention of Bahamut or the legions of crusading dragons and worshipers at his command.

## Bahamut Lore

**Arcana or Religion DC 5:** Bahamut is the lawful god of justice and honor. Those who worship the Platinum Dragon seek to emulate him by defending the weak and ensuring that the guilty receive fair and immediate punishment.

Many metallic dragons, even if they don't worship Bahamut outright, regard him as the most revered elder among the ancient dragons. Many dragonborn bend their knee in fealty to Bahamut, as do paladins of all races.

**Arcana or Religion DC 15:** Bahamut holds court in a shining castle on the slopes of Mount Mertion, one of the seven mystic mountains in the domain of Celestia, amid the Astral Sea. Some powerful paladins and clerics make pilgrimages there in hopes of receiving a powerful blessing from the Platinum Dragon.

**Arcana or Religion DC 20:** Over the centuries, folk tales have persisted of Bahamut walking the world while magically disguised as a sage or hermit. He travels with seven trained canaries, which transform into gold dragons if anyone is foolish enough to threaten the docile old man.

The folk tale is well known enough among Bahamut's faithful that priests sometimes undertake pilgrimages in the company of trained canaries, seeking to emulate their god.

Bahamut sometimes tests the worthiness of his champions by directly engaging in battle with them. Bahamut doesn't pull any punches, and the battle ends when the champions are bloodied or when Bahamut yields. Powerful healers are on hand in case Bahamut's zeal for testing his champions overcomes their defenses.

**Arcana or Religion DC 25:** A council of seven ancient metallic dragons advises Bahamut on matters of honor and acts as a jury when Bahamut sits in direct judgment of an evildoer—often one apprehended by his champions. Because Bahamut walks the world in disguise, he has less need for exarchs than most deities. The best-known of his few exarchs is Kuyutha, Bahamut's emissary to dragonborn clans everywhere.

## The Old Man with the Canaries

When he's not holding court in his shining castle, Bahamut walks the natural world in the most unassuming of disguises: an elderly man accompanied by seven trained canaries. This old man, variously called a sage or a hermit in folklore, travels from place to place with no apparent purpose. He's quick to offer advice, information, or assistance to other travelers.

One folk tale in particular is told with a hundred variations: The sage with the canaries shares a campfire with roadside travelers, offering mysterious advice that borders on prophecy. Still, the travelers would have regarded the old man as nothing more than a curiosity if it weren't for the monsters that attacked

### Seeking Worthiness

Few folk tales reveal why Bahamut disguises himself in the way he does—they're more concerned with the plot twist when the old man with the canaries becomes something much more. Bahamut sometimes travels the world in disguise to assist his followers directly, especially if one of Tiamat's insidious plots needs to be thwarted. But more often, he walks the natural world to seek out "worthiness"—a subject he waxes philosophical about, and the topic of much of the sage advice he dispenses to those he meets.

When Bahamut walks the world, he tries to discern the worthiness of everything he encounters—"worthiness" viewed through a lens of justice, nobility, and honor. Consequently, he uses his deific power to help others fight, rather than just turning into his platinum dragon form and tearing through enemies in the blink of an eye. Bahamut wants to assess the worthiness of those he's fighting alongside, and so he blesses and heals his fellow travelers but does little direct fighting.

It's possible that Bahamut wants to assess the worthiness of the characters, but you can also make a meeting with Bahamut a chance encounter. Bahamut might be assessing the worthiness of other travelers, of the route itself, or of the dangers along the way.

the camp. Were they ever surprised when the old man started throwing around unfathomably powerful magic and turning his canaries into gold dragons.

## Encounters with the Old Man

The folk tale of a disguised Bahamut is the quintessential encounter with the deity, and you can bring the kernel of that story to life in your game. The "sage with the canaries" can meet the characters during an adventure, act mysterious and inscrutable, and then reveal his true nature when the heroes must face monsters they could never hope to defeat without a god's aid.

If the characters have befriended Bahamut, he'll fight alongside them in his old man form, turning what would otherwise be a merciless slaughter of the characters into a fair fight. A group of characters plus Bahamut should be able to take on opponents of around ten levels higher than the characters.

Note what Bahamut does and doesn't do well in this form. He can effortlessly heal multiple characters, purge harmful effects, and improve the characters' attacks so they can hit and damage monsters that would otherwise be almost invulnerable, but Bahamut doesn't directly improve defenses or hit points, so the heroes are going to feel the full brunt of powerful monster attacks. That's when the drama occurs: The characters are not only doing much more than they're ordinarily capable of, they're taking the worst beating of their lives.

A fight against Bahamut tests the players' tactical acumen: Can they focus their attacks on specific enemies while preventing the monsters from focusing their attacks in the same way? If a character dies while in Bahamut's company, it's often because that character was wiped out in a single round by multiple monster attacks before Bahamut could respond with his powerful healing magic.

Although a fight against Bahamut while he is at the characters' side is a good tactical test, it's not worth the full XP award for an encounter ten levels higher. The presence of a full-blown god does level the playing field. When the encounter is over, award the characters one-quarter of the usual experience award (the value for a fight two levels higher than the party). If Bahamut sticks around for more than an encounter or two, choose treasure parcels appropriate for the characters at the level they are, not ones typical of the tough monsters they're facing.

Encounters using Bahamut work best when the characters, perhaps unsure exactly what's up with the old man, take the battle seriously and fight with their usual vigor. If the characters realize that they have a god in their midst, they might not take the battle seriously. Bahamut can (and probably will) use the Raise Dead ritual on any characters who fall in battle, after all. The heroes need Bahamut to win the battles you have planned, but Bahamut doesn't need them. In these battles, Bahamut isn't at risk, but for reasons of his own, he remains in the guise of an old man and lets the characters do most of the fighting.

You can try to conceal Bahamut's nature, making the characters unsure whether they're faced with Bahamut, an aspect of Bahamut, or a mysterious-but-powerful spellcaster of some sort. Longtime D&D players will recognize the canaries—they were part

### The Seven Gold Wyrms

Bahamut's closest servants are seven gold dragons that guard his palace and sometimes travel with him disguised as canaries. For important tasks that aren't quite important enough to demand his personal attention, Bahamut dispatches one of these dragons. Each works on specific tasks, and no one knows if there's any sort of hierarchy among these servants. These are the current wyrms in Bahamut's inner circle; many have died and been replaced over time.

**Borkadd the Claw:** Compulsive and obstinate, Borkadd represents Bahamut as the hand of justice. He chronicles the laws of many lands, as well as Bahamut's personal code. He's more than a glorified secretary, though: Borkadd enforces Bahamut's law against those who can't be stopped by other means.

**Kuria the Eye:** This sleek, serpentine dragon remains aloof—sometimes threatening—even to those she knows well. Her tasks require secrecy, taking advantage of her suspicious nature.

**Sonngrad the Wing:** Bahamut's messenger, Sonngrad, has powerful wings that let her fly at great speed. She is the most commonly encountered of the seven dragons. Though focused and businesslike while on a mission, she's also a curious thrill-seeker. Bahamut usually gives her a bit of time after each task she completes to explore the places she's visiting.

**Gruemar the Voice:** The slender Gruemar is a master negotiator, sent out to settle disputes and prevent bloodshed. Though his speech sounds tranquil and warm, it never reveals a hint of weakness.

**Marroshok the Tail:** Massive and genial, Marroshok is the closest thing Bahamut has to a bodyguard. Though he's usually friendly, he's merciless in combat.

**Troannaxia the Presence:** A magnificent, shining creature, Troannaxia is sent to cow the proud into submission using the majesty of her presence. Unlike Gruemar, she intimidates instead of conversing. Bahamut sends her out when he encounters obstinate resistance that requires a blunt approach.

**Urgala the Fang:** When Bahamut musters a great army, Urgala leads them. Her knowledge of tactics is unsurpassed, and she flies over the battlefield to scout and command. Normally proud and uncompromising, Urgala sometimes becomes stubborn or rude when she is in a bad mood.

of Bahamut's backstory in the 1st Edition *Monster Manual*—but you can change the trappings of the old man to make his disguise less obvious.

## Tactics

When Bahamut is disguised as the old man with the canaries, his priorities are to level the playing field between the characters and the monsters. In his first two or three turns, he uses *Bahamut's blessing* on attacking characters, then a combination of *Bahamut's cleansing* and *Bahamut's mercy* on the most wounded characters. If possible, have Bahamut use *blessing* and *cleansing/mercy* on different individuals so no player thinks Bahamut is ignoring him or her. Using *Bahamut's blessing* twice is a good way for Bahamut to spend his first action point; heroes will have a hard time hitting the monsters without the *blessing* in place.

Once the characters have all received *Bahamut's blessing*, Bahamut uses *Bahamut's mercy* once or twice per turn, and releases one of his seven canaries—at which point it turns into a gold dragon. He can use a canary in two ways. *Gold dragon rescue* moves a nearly dead character out of harm's way. The gold dragon swoops down, stuns nearby assailants so they can't make opportunity attacks—and then the character can fly away during his next turn. If the characters aren't dealing enough damage to the monster or they're being outflanked, Bahamut uses *summon gold dragon* in whatever place is most inconvenient for the monsters. That's the closest Bahamut comes to attacking the monsters directly. He prefers to use his own melee attack only for opportunity attacks.

**The Old Man with the Canaries** **Level 36 Solo Soldier (Leader)**
Medium immortal humanoid XP –

**Initiative** +24 **Senses** Perception +32
**HP** 1,645; **Bloodied** 822; see also *discorporation*
**AC** 52; **Fortitude** 47, **Reflex** 45, **Will** 47
**Resist** 20 cold, 20 fire
**Saving Throws** +5; whenever an attack causes an effect on Bahamut that a save can end, he immediately makes a saving throw. Bahamut also makes saving throws at the end of his turn as normal.
**Speed** 8, teleport 5
**Action Points** 2

⨁ **Unarmed Attack** (standard; at-will) ✦ **Weapon**
+41 vs. AC; 1d12 + 20 damage, and the target is dazed until the end of its next turn.

**Gold Dragon Rescue** (standard; uses one canary)
Area burst 1 within 30, centered on ally; +41 vs. AC; the target is stunned (save ends). *Effect:* The ally in the origin square gains fly 10 until the end of its next turn.

**Summon Gold Dragon** (standard; uses one canary) ✦ **Summoning**
Ranged 20; Bahamut summons a Large gold dragon in an unoccupied space within range. The dragon has speed 8, fly 10 (hover) and, unlike a typical summoned creature, has its own defenses and hit points (all defenses 34; hp 120).
*Minor Action:* +27 vs. AC; 1d12 + 10 damage.
*Opportunity Attack:* +27 vs. AC; 1d12 + 10 damage.

**Bahamut's Blessing** (standard; at-will)
Ranged 30; two targets; each target gains a +10 bonus to attack rolls, a +10 bonus to skill checks, and a +10 bonus to damage rolls.

**Bahamut's Cleansing** (minor; at-will)
Ranged 30; two targets; each target can end one effect a save can end.

**Bahamut's Mercy** (minor; at-will) ✦ **Healing**
Ranged 30; two targets; each target can spend a healing surge and regain an additional 25 hit points.

## Discorporation

When a deity is bloodied, the deity's mind leaves its body and the deity is unable to assume physical form for some time. The discorporation usually lasts at least a few months, but it can sometimes take several years before the deity can resume its form. During this time, the deity's power is weaker, but it is far from negligible. If characters wish to truly kill a deity, they must fulfill one or more conditions specific to that deity. This could require destroying the deity's most prominent temple, or finding an artifact that can deliver the killing blow. If the specific conditions are satisfied, the deity cannot discorporate and instead becomes bloodied as normal. Here are some sample quests the characters could undertake (if they, for some reason, need to kill Bahamut) or thwart (if evil forces are attempting to destroy the Platinum Dragon).

**The Corrupted Ritual:** Bahamut offers his protection when ritually called by high priests of his faith, manifesting in his draconic form. Sinister forces could alter key parts of that ritual, obtain access to one of Bahamut's grand temples to perform it, then battle the summoned Bahamut to the death.

**The Prodigal Son:** There's a reason Bahamut is called the Grandfather of Dragons and not the Father of Dragons. It is whispered that Bahamut has a son—somewhere among the planes—who has rebelled against his father, for reasons unknown. That child, if found, could face down his father in battle and claim his birthright, taking Bahamut's place among the deities. But thus far, even the most powerful evil soothsayers have been unable to learn the name or location of Bahamut's son. Their ritual divinations continue, however, and agents of Tiamat are alert for rumors about this child.

**Dishonor and Trickery:** Bahamut regards himself as honor, virtue, and justice coalesced into a living form. If Bahamut could be tricked into doing something inherently and irrevocably dishonorable, he would have no choice but to cast off his mantle of godhood lest the very concept of honor be forever tainted. Once bereft of godhood, the mortal shell of Bahamut could be destroyed as easily as any ancient dragon.

ZOLTAN BOROS & GABOR SZIKSZAI

**Bahamut Runs Rampant** (standard; encounter) ✦ **Polymorph**
Bahamut assumes his draconic form (described below).

**Seven Canaries**
Bahamut has seven trained canaries, which he can transform into gold dragons. Some of his powers use up these canaries. All the canaries return during a short rest.

**Discorporation** (when bloodied)
When Bahamut becomes bloodied, he discorporates and is unable to take physical form for a time.

## Bahamut's Dragon Form

Although his magically disguised form is the most likely way that the characters will experience Bahamut, epic-tier characters could encounter Bahamut in his full glory. His battle form is a magnificent dragon, shimmering with platinum scales tougher than any shield. If the characters encounter Bahamut in his court (where he might be in any form, including his draconic form) or otherwise meet in friendship, it's unlikely that a fight is going to break out—unless Bahamut wants to test their worthiness in direct combat.

Because Bahamut is a 36th-level solo, he represents a fundamentally unfair fight for all but the most powerful D&D characters. A test of worthiness might make a satisfying final hurdle for characters about to achieve the immortality feature of their epic destiny, for example.

When Bahamut fights a character, he explains ahead of time that he won't attack bloodied characters, but those individuals would dishonor themselves and their comrades if they continue to fight while bloodied. And Bahamut will yield before he discorporates, because discorporation would give Tiamat and other villains a few months or weeks of free rein without an active god of justice and honor to oppose them.

### Tactics

For all his power, Bahamut in his dragon shape fights much like any dragon. He uses his breath weapons as often as he can, choosing *polar breath* when beset by multiple melee adversaries, *misty breath* if he's intentionally being merciful or there are noncombatants among his enemies, and *disintegration breath* when he wants to deal a lot of damage.

Bahamut uses *frightful majesty* if he finds himself in a disadvantageous position and none of his breath weapons is available. Whenever he can, he uses *Bahamut's clutches* against a defender or a melee striker. His bite attack deals damage and steals healing surges, and can quickly deplete the health of even an epic defender. And although Bahamut is honorable, he's cunning enough to move with a grabbed enemy, flying upward before releasing that enemy for a painful (but nonfatal) plummet.

**Bahamut** **Level 36 Solo Soldier (Leader)**
Huge immortal magical beast (dragon) XP 275,000

**Initiative** +24 **Senses** Perception +32; darkvision
**HP** 1,316; **Bloodied** 658; see also *bloodied breath* and *discorporation*
**AC** 52; **Fortitude** 47, **Reflex** 45, **Will** 47
**Immune** attacks by creatures of lower than 20th level
**Resist** 20 cold, 20 fire
**Saving Throws** +5; whenever an attack causes an effect on Bahamut that a save can end, he immediately makes a saving throw against that effect. Bahamut also makes saving throws at the end of his turn as normal.
**Speed** 10, fly 15 (hover), teleport 10
**Action Points** 2

⊕ **Bite** (standard; at-will)
Reach 3; +42 vs. AC; 3d12 + 10 damage, and the target loses two healing surges.

⊕ **Claw** (standard; at-will)
Reach 3; +41 vs. AC; 2d12 + 10 damage.

↯ **Bahamut's Clutches** (immediate interrupt; when an enemy moves into a square adjacent to Bahamut; at-will)
+41 vs. Reflex; 2d12 + 10 damage, and the target is grabbed. *Failed Escape Attempt:* Bahamut automatically hits the target with his bite attack.

↷ **Polar Breath** (minor; recharge ⚄ ⁞⁞; all breath weapons share one recharge roll) ✦ **Cold**
Close blast 10; +40 vs. Reflex; 4d12 + 10 cold damage, and the target is pushed 6 squares and immobilized (save ends); *Miss:* Half damage, and the target is pushed 3 squares.

↷ **Disintegration Breath** (minor; recharge ⚄ ⁞⁞; all breath weapons share one recharge roll)
Close blast 10; +40 vs. Fortitude; 4d12 + 10 damage, and 15 ongoing damage (save ends).; *Aftereffect:* Ongoing 10 damage (save ends).

↷ **Misty Breath** (minor; recharge ⚄ ⁞⁞; all breath weapons share one recharge roll) ✦ **Polymorph**
Close blast 10; +40 vs. Will; the target is stunned, weakened, and transformed into fine mist (save ends all). While the target is in this mist form, enemies can move through the target's space freely.

↷ **Bloodied Breath** (free; when first bloodied; encounter) ✦ **Cold**
Bahamut's breath weapon recharges, and he uses *polar breath, disintegration breath,* or *misty breath.*

↷ **Frightful Majesty** (minor; encounter) ✦ **Fear**
Close burst 20; targets enemies; +38 vs. Will; the target is stunned until the end of Bahamut's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Discorporation** (when bloodied)
When Bahamut becomes bloodied, he discorporates and is unable to take physical form for a time.

**Alignment** Lawful good **Languages** Supernal
**Skills** Arcana +31, Athletics +33, Diplomacy +32, Endurance +34, Heal +32, History +31, Insight +32, Intimidate +32, Religion +31
**Str** 31 (+28) **Dex** 23 (+24) **Wis** 28 (+27)
**Con** 33 (+29) **Int** 27 (+26) **Cha** 29 (+27)

# Aspect of Bahamut

Bahamut can create an aspect of himself from the willing sacrifice of a powerful metallic dragon worshiper. The dragon dies, but rises anew as an aspect of the Platinum Dragon itself, remembering all of its previous life and now utterly bound to Bahamut.

Bahamut prefers for his dragon worshipers to remain dragons rather than sacrificing themselves in this manner, but he sometimes uses aspects as long-term guardians, ambassadors for crucial diplomatic efforts, or extraplanar authorities who bring to justice villains too powerful for anything less than an aspect of the god of justice.

**Aspect of Bahamut** **Level 18 Solo Soldier (Leader)**
Huge immortal magical beast (dragon) XP 10,000

**Initiative** +11 **Senses** Perception +18; darkvision
**HP** 704; **Bloodied** 352; see also *bloodied breath*
**AC** 35; **Fortitude** 32, **Reflex** 29, **Will** 30
**Resist** 20 cold, 20 fire
**Saving Throws** +5; whenever an attack causes an effect on an aspect of Bahamut that a save can end, it immediately makes a saving throw. The aspect of Bahamut also makes saving throws at the end of its turn as normal.
**Speed** 10, fly 10 (hover), teleport 5
**Action Points** 2

⊕ **Bite** (standard; at-will)
Reach 3; +25 vs. AC; 2d10 + 8 damage, and ongoing 10 damage.

⊕ **Claw** (standard; at-will)
Reach 3; +25 vs. AC; 2d10 + 8 damage.

↯ **Draconic Fury** (standard; at-will)
The aspect of Bahamut makes two claw attacks and one bite attack.

↯ **Snatch** (immediate interrupt, when an enemy moves into a square adjacent to the aspect of Bahamut; at-will)
+20 vs. Reflex; 2d10 + 8 damage, and the target is grabbed. *First Failed Escape Attempt: The aspect of* Bahamut automatically hits the target with its bite attack.

↷ **Polar Breath** (standard; recharge ⚄ ⁞⁞; all breath weapons share one recharge roll) ✦ **Cold**
Close blast 5; +20 vs. Reflex; 3d12 + 10 cold damage, and the target is immobilized (save ends). *Miss:* Half damage.

↷ **Disintegration Breath** (standard; recharge ⚄ ⁞⁞; all breath weapons share one recharge roll)
Close blast 5; +20 vs. Fortitude; 3d12 + 10 damage, and 10 ongoing damage (save ends).

↷ **Misty Breath** (standard; recharge ⚄ ⁞⁞; all breath weapons share one recharge roll)
Close blast 5; +20 vs. Will; the target is stunned, weakened, and transformed into fine mist (save ends all). While the target is in this mist form, enemies can move through the target's space freely.

↷ **Bloodied Breath** (free; when first bloodied; encounter)
The aspect of Bahamut's breath weapon recharges, and it uses *polar breath, disintegration breath,* or *misty breath.*

## Bahamut's Palace

The shining castle Bahamut calls home rests atop Mertion, one of the seven mountains of Celestia, the astral domain of the good and just. This grand structure is more than just a palace—it's also Bahamut's hoard. The walls, inlaid with copper and ivory on the inside and platinum on the outside, reflect the eternal light of Celestia and make the castle appear like a beacon on the horizon. The walls are made of mithral tiles, and the windows of gemstones set in silver and gold. Bahamut viciously pursues (usually by proxy) anyone who attempts to steal from his great castle. He might be a good god, but he's also dedicated to justice *and* is a dragon. It's best not to mess with his hoard.

**Frightful Majesty** (minor; encounter) ✦ **Fear**
Close burst 10; targets enemies; +20 vs. Will; the target is stunned until the end of the aspect of Bahamut's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends).

**Alignment** Lawful good **Languages** all
**Skills** Arcana +18, Diplomacy +19, History +18, Insight +18, Intimidate +19, Religion +18
**Str** 22 (+15) **Dex** 14 (+11) **Wis** 19 (+13)
**Con** 24 (+16) **Int** 18 (+13) **Cha** 20 (+14)

## Aspect of Bahamut's Tactics

Like Bahamut, an aspect uses one of its breath weapons whenever able. The rest of the time it flies over its enemies and harries them with melee attacks. It uses one of its action points early in the battle to use both a breath weapon and *draconic fury*. It saves *frightful majesty* for the round after it uses *bloodied breath*, and saves its last action point for a getaway or a last-ditch attack.

# Kuyutha, Exarch of Bahamut

The last and greatest paladin from the ancient dragonborn empire of Arkhosia, Kuyutha did his best to gather and protect the scattered dragonborn clans after the empire's fall. In recognition of Kuyutha's ceaseless efforts to safeguard his people, Bahamut granted him a spark of divinity and bade him train a new order of knights on Mount Mertion itself.

Since that day centuries ago, Kuyutha has acted as Bahamut's ambassador to the dragonborn race. He crisscrosses the world, shepherding dragonborn clans that find themselves in dire straits and brokering honorable accords when two clans have a dispute they cannot resolve. Kuyutha also seeks out the bravest among the dragonborn to train with him on Mount Mertion—and takes the vilest dragonborn villains to face their judgment before Bahamut.

**Kuyutha, Exarch of Bahamut** **Level 23 Elite Controller (Leader)**
Large immortal humanoid, dragonborn XP 10,200
**Initiative** +15 **Senses** Perception +22; darkvision
**HP** 430; **Bloodied** 215
**Dragon Affinity** aura 10; each ally within the aura has resist 10 radiant.
**AC** 37; **Fortitude** 35, **Reflex** 34, **Will** 36
**Resist** 10 cold, 10 fire, 15 radiant
**Saving Throws** +2
**Speed** 6, fly 6 (clumsy)
**Action Points** 1

⊕ **Dragontalon Blade** (standard; at-will) ✦ **Weapon**
Reach 2; +28 vs. AC; 3d6 + 9 damage.

⸸ **Legion Attack** (standard; at-will)
Kuyutha makes a *dragontalon blade* attack, and one ally within 10 squares of Kuyutha and of 25th level or lower slides 1 square and makes a basic attack.

⸸ **Bahamut's Blade** (standard; recharges when first bloodied) ✦ **Radiant, Weapon**
Reach 2; +30 vs. AC; 4d6 + 9 damage, and the target takes ongoing 10 radiant damage and is blinded (save ends both).

**Draconic Healing** (minor; recharge ⚅) ✦ **Healing**
Ranged 20; targets one ally; the target regains 20 hit points.

**Coldfire Breath** (standard; recharge ⚄ ⚅) ✦ **Cold, Fire**
Close blast 6; +27 vs. Reflex; 4d12 cold and fire damage.

**Will of Bahamut** (standard; encounter)
Close burst 5; +25 vs. Will; the target is stunned until the end of Kuyutha's next turn.

**Dragonborn Fury** (only while bloodied)
Kuyutha gains a +1 racial bonus to attack rolls.

**Alignment** Lawful good **Languages** Common, Draconic
**Skills** Athletics +24, Diplomacy +25, Heal +22, History +23, Insight +22, Intimidate +25, Religion +23
**Str** 27 (+19) **Dex** 18 (+15) **Wis** 22 (+17)
**Con** 23 (+17) **Int** 25 (+18) **Cha** 28 (+20)

## Kuyutha's Tactics

Kuyutha's *coldfire breath* recharges quickly, so the "melee or breathe" decision comes up more frequently. In general, use *coldfire breath* if it has recharged and Kuyutha can hit at least two enemies with it; otherwise, attack with *legion attack* or *Bahamut's blade* (if you haven't used it yet). Occasionally, Kuyutha uses *legion attack* to move an ally out of danger, sliding the ally away from a foe and having that ally either skip the basic attack or make a ranged basic attack.

Otherwise, Kuyutha fights like a dragon, using *will of Bahamut* (his version of *frightful presence*) when beset by multiple flanking enemies, and then moving away to a place where he can catch as many stunned enemies as possible in his next blast of *coldfire breath*.

Kuyutha rarely fights alone, preferring to form a larger band so he can use his leader abilities. He uses *draconic healing* for his allies, and grants them attacks using *legion attack*. His *dragon affinity* aura protects his allies against enemies using radiant damage (usually users of the divine power source). This can come as a surprise to enemies who are accustomed to encountering foes that have other resistances.

# Encounter Groups

Treat Bahamut as a solo in the truest sense of the word. He's a god, and he should be just fine on his own. Kuyutha, on the other hand, fights alongside dragons (sometimes including Bahamut) and dragonborn.

**Level 21 Encounter (XP 20,200)**
- Kuyutha, exarch of Bahamut (level 23 elite controller)
- Aspect of Bahamut (level 18 solo soldier)

**Level 25 Encounter (XP 42,300)**
- Kuyutha, exarch of Bahamut (level 23 elite controller)
- 3 dragonborn champions (level 26 soldier, *MM* 87)
- 4 angels of light (level 23 minion skirmisher, *MM2* 9)

# JALANVALOSS

Because steel dragons respect humans' achievements, adaptability, and ambition, they protect humans and impel them to rise against tyranny. The interests of the steel dragon Jalanvaloss, however, reflect less lofty ideals. A schemer, trickster, and manipulator, she lives for upheaval and unpredictability, endeavoring to keep her city dynamic.

In human form, Jalanvaloss usually appears as a slim female human with long, straight, black hair and steel-gray eyes. With the trademark catlike grace of steel dragons, she wears the latest fashions, entertains guests at her homes, and attends parties of the city's elite.

Jalanvaloss alters her appearance to assume any of a dozen identities. She takes her dragon shape the least often of all her forms.

In her dragon form, Jalanvaloss is long and sleek, with glossy scales, spines that fall straight like hair, and delicate whiskers. Her large, intelligent silver eyes accent her expressive face.

**Jalanvaloss** **Level 18 Solo Controller**
Adult steel dragon
Large natural magical beast (dragon, shapechanger) XP 10,000

**Initiative** +13 **Senses** Perception +19; darkvision
**HP** 692; **Bloodied** 346; see also *bloodied breath*
**AC** 31; **Fortitude** 29, **Reflex** 27, **Will** 31; see also *illusory double*
**Resist** 20 force
**Saving Throws** +5
**Speed** 8, fly 10 (hover), overland flight 12; see also *dimension step*
**Action Points** 2

⊕ **Arcane Claw** (standard; at-will)
Reach 2; +23 vs. AC; 2d8 + 7 damage, and Jalanvaloss slides the target 2 squares.

⊕ **Bite** (standard; at-will) ✦ **Force**
Reach 2; +23 vs. AC; 2d8 + 7 damage plus 1d8 force damage.

ǂ **Double Attack** (standard; at-will)
Jalanvaloss makes two *arcane claw* attacks.

ǂ **Burst of Force** (immediate reaction, when an enemy moves into an adjacent square; at-will) ✦ **Force, Teleportation**
Close burst 1; +22 vs. Fortitude; 2d8 + 7 damage, and the target is knocked prone. *Effect:* Jalanvaloss teleports 4 squares.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Force**
Close blast 5; +21 vs. Fortitude; 4d6 + 8 force damage, and the target is dazed (save ends). *Miss:* Half damage.

**Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Jalanvaloss uses it.

**Frightful Presence** (standard; encounter) ✦ **Fear**
Close burst 10; targets enemies; +22 vs. Will; the target is stunned until the end of Jalanvaloss's next turn. *Aftereffect:* The target takes a –2 penalty to attack rolls (save ends).

**Steel Sting** (standard; at-will) ✦ **Force**
Area burst 1 within 20; +22 vs. Reflex; 2d6 + 5 force damage.

**Scattergloom** (standard; encounter) ✦ **Necrotic, Zone**
Jalanvaloss makes three area burst attacks, and the bursts can't overlap: area burst 1 within 20; +22 vs. Fortitude; 2d6 + 5 necrotic damage. The burst becomes a zone of draining darkness until the end of Jalanvaloss's next turn. Any creature except Jalanvaloss that starts its turn within the zone takes 5 necrotic damage. The zone blocks line of sight for all creatures, and any creature entirely within the zone is blinded until it leaves the zone. Jalanvaloss is immune to the effects of the zone. *Sustain Minor:* The effect persists.

**Change Shape** (minor; at-will) ✦ **Polymorph**
Jalanvaloss alters her form to appear as a unique human (see "Change Shape," *MM2* 216).

**Dimension Step** (move; encounter) ✦ **Teleportation**
Jalanvaloss teleports 10 squares.

**Illusory Double** (minor; encounter) ✦ **Illusion, Teleportation**
Jalanvaloss becomes invisible and teleports 4 squares. In the space she left, an illusory double appears and moves 8 squares. The double vanishes and Jalanvaloss becomes visible at the end of Jalanvaloss's next turn.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Arcana +19, Bluff +22, Diplomacy +22, History +19, Insight +19, Streetwise +22
**Str** 24 (+16) **Dex** 18 (+13) **Wis** 20 (+14)
**Con** 21 (+14) **Int** 20 (+14) **Cha** 26 (+17)
**Equipment** fine clothing, wand, ritual book

## JALANVALOSS AND THE FORGOTTEN REALMS

Jalanvaloss originates from the city of Waterdeep in the Forgotten Realms setting. Fickle but not malicious, she manipulates merchants and adventurers in her efforts to expand her power and holdings.

In the years leading up to the Spellplague, Jalanvaloss's wealth and control over Waterdeep expanded, but the disaster dashed her economic fortunes along with the fortunes of other nobles and merchants. To make matters worse, she lost considerable arcane power to the blue fire. In the past century, she has spent her dwindling fortune in rebuilding what she lost.

## JALANVALOSS LORE

**History or Streetwise DC 13:** One of the best-known nobles in the city (Waterdeep, Sharn, or another city of your choosing), Lady Jalanvaloss is a powerful merchant. She commands a mercantile empire that has holdings throughout the city. Having come to prominence years ago, she retains her youthful beauty, which leads to speculation about her longevity. Rumors say that dark powers have touched her or that she is something other than she seems. Her vast fortune has saved the city, sponsored adventurers, recovered relics, and raised the city's prominence.

**History or Streetwise DC 20:** According to legend, a steel dragon protects the city from enemies inside and without; however, no one has seen the dragon since a great calamity (the Spellplague, the Mourning, or some other catastrophe) beset the land. At that time, the dragon, called the Wyrm of Many Spells, defended her community from unchecked

magic and destruction; however, tales paint the dragon as an avaricious busybody, noted more for manipulation and trickery than for noble deeds.

**History or Streetwise DC 25:** The legends are correct: the fabled Wyrm of Many Spells is Lady Jalanvaloss. She has lived here for two centuries, using guile and magic to amass a fortune from real estate, business ventures, and sponsored expeditions. Other citizens suspect a hidden identity, but only those close to her know the truth. She defends the city from attack, but protecting her investments is as important to her as safeguarding its citizens.

Jalanvaloss gained the moniker "Wyrm of Many Spells" because of her training with the mortal archmage Rythtalies. The wizard raised her from a hatchling and taught her the rudiments of magic so she could serve as his guardian and steed.

After Rythtalies's exceptionally long life, the young steel dragon traveled to a place abundant with humans, the creatures she knew best. She assumed the identity of a human traveler and forged connections in every echelon of society, favoring adventuring types because they reminded her of her deceased master. She gathered her hoard in the form of real estate and investment enterprises.

**History or Streetwise DC 30:** Jalanvaloss does not have a traditional lair. Comfortable as a human, she owns houses throughout the city and beyond, including residences for her other personas. If she is discovered, she can remain in the city in such a residence and cut her losses.

As greedy as a red dragon, Jalanvaloss justifies her behavior on the grounds that she grants everyone the opportunity for success. She dreams of founding a kingdom where she will rule as queen, so her people might live without fear; however, she likes her current arrangements and does little to disrupt her lifestyle.

## Jalanvaloss's Tactics

Jalanvaloss is a schemer, not a warrior. When she must fight, she chooses the time and place.

She opens combat by using *change shape* and smashing enemies with her *breath weapon*. If most foes avoid becoming dazed, she spends an action point to use *frightful presence*. Otherwise, she spends an action point to use *scattergloom*. While waiting for her *breath weapon* to recharge, she uses *dimension step* to gain an advantageous position and hits her enemies with *steel sting*. When near defeat, she uses *illusory double* to create a distraction and slip away undetected.

### Jalanvaloss's Enemies

Only when enemies threaten to ruin Jalanvaloss's way of life—when she reaches the brink of collapse—does she take dragon form and attack directly. Characters might incur such ire by acting on behalf of a third party that has a grudge against Jalanvaloss, by provoking Jalanvaloss as a side effect of a quest, or by trying to topple the dragon from her position.

## Encounter Groups

Jalanvaloss has connections throughout her city and calls on assistance from a variety of adventuring groups that owe her favors. To protect her lairs, she keeps battle guardians in top fighting form.

**Level 20 Encounter (XP 14,800)**

- 3 battle guardians (level 17 controller, *MM* 149)
- Jalanvaloss (level 18 solo skirmisher)

WILLIAM O'CONNOR

# NIFLUNG

In the distant, frigid north, the scattered communities have long lived in fear of a vicious, barbaric tribe the natives have named the Talons of Winter. For long generations, the Talons emerged but rarely, guided by their frost giant masters to raid and slaughter. But now, the tribe grants its fealty, its devotion, even its worship to a new lord, a draconic horror named Niflung dwelling deep in the nearby glacier, a creature whose only purpose is to see his "children" grow strong—at the expense of everyone else.

Niflung, who has accepted the title of god given him by the Talons of Winter, looks much like other cobalt dragons. Observation of the dragon in motion, however, or a close study of his fearsome form, reveals peculiar anomalies. His limbs, his neck, his tail, and his wings seem unduly long in proportion to his body—not dramatically so, just enough to give him an unnatural gait and a subtly disturbing silhouette. His scales hang loosely on his body, occasionally jutting out at odd angles, as though he had spent ravenous years starving inside his own shell. And perhaps he once did, for his obsession with proving his own strength, and that of his "worshipers," leads him to extremes that even other cobalt dragons would consider excessive.

Niflung never holds entirely still; when he is conversing with others, at rest, or even asleep, his tail twitches, his claws flex, his jaw clenches. When he speaks with other creatures, his attention seems frequently to wander, yet he appears fully capable of following the flow and details of the conversation.

## Niflung Lore

**History DC 15:** In the frozen north, a cobalt dragon named Niflung has recently emerged from the glacier called the Road of Sleet. He has taken over the Talons of Winter, a fearsome tribe of shifters and giants, and he has increased their raids against civilized communities fivefold.

**History DC 20:** What occurred in Niflung's life before he emerged from a long slumber within the caves of the glacier is unclear. Something, however, has made him different from other cobalt dragons. His abilities, although similar, differ in several profound respects, and his obsession with strength and dominance crosses the line into megalomania.

Niflung is not unwilling to speak to visitors, but they must show the proper deference. Any insult—any perceived insult—to his strength or abilities results in an immediate, enraged attack.

**History DC 25:** Niflung basks in the adulation of the Talons of Winter, using them to expand his own domain, but he also seems genuinely determined to make them as strong as they can be. He truly believes (or at least seems to believe) that he's doing what's best for his "children," and that he can guide them to a position of strength and dominance in the region. He allows outsiders to attack the tribe, hoping to strengthen them through combat, but he grows enraged if an enemy takes what he considers "unfair advantage" when battling them. (What that "unfair advantage" might be varies with Niflung's mood, but he does object strongly to the use of powerful fire magic against his tribe.)

**Niflung** **Level 20 Solo Controller**
Elder cobalt dragon
Huge natural magical beast (dragon) XP 14,000

**Initiative** +14 **Senses** Perception +19; darkvision
**Aura of Chill Mist (Cold)** aura 2; each creature that enters the aura or starts its turn there takes 10 cold damage. The ground in the aura is difficult terrain, and the squares of the aura are lightly obscured.
**HP** 772; **Bloodied** 386; see also *bloodied breath*
**AC** 34; **Fortitude** 34, **Reflex** 30, **Will** 31
**Resist** 25 cold
**Saving Throws** +5
**Speed** 8 (ice walk), fly 10 (hover), overland flight 15
**Action Points** 2

⊕ **Bite** (standard; at-will) ✦ **Cold**
Reach 3; +25 vs. AC; 2d6 + 8 damage, and ongoing 10 cold damage (save ends).

⊕ **Claw** (standard at-will)
Reach 3; +25 vs. AC; 1d10 + 8 damage.

⨽ **Niflung's Pounce** (standard; at-will)
Niflung makes a bite attack, shifts 2 squares, and then makes two claw attacks against a different target. If both claw attacks hit, Niflung pushes the target 5 squares, and the target is knocked prone. Niflung can push a creature restrained by his own breath weapon.

⨽ **Wing Crush** (immediate reaction, when an adjacent enemy hits Niflung with a melee attack; at-will)
+24 vs. Reflex; 2d6 + 8 damage, and the target is pushed 3 squares and falls prone. Niflung can push and knock prone a creature restrained by its own breath weapon.

↭ **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Cold**
Close blast 5; +24 vs. Fortitude; 4d8 + 8 cold damage, and the target is restrained and takes ongoing 10 cold damage (save ends both). *Aftereffect:* The target is slowed (save ends). *Miss:* Half damage.

↭ **Bloodied Breath** (free, when first bloodied; encounter)
*Breath weapon* recharges, and Niflung uses it.

↭ **Chilling Presence** (standard; encounter) ✦ **Cold, Fear**
Close burst 10; targets enemies; +24 vs. Will; the target is stunned until the end of Niflung's next turn and gains vulnerable 10 cold (save ends).

**Savage Opportunist**
Niflung gains a +2 bonus to attack rolls, and deals 1d8 extra damage, when making a bite, claw, or *wing crush* attack against an enemy that is immobilized, slowed, or granting combat advantage to Niflung.

**Alignment** Unaligned **Languages** Common, Draconic
**Skills** Athletics +23, Endurance +22, Intimidate +20

| | | |
|---|---|---|
| **Str** 27 (+18) | **Dex** 19 (+14) | **Wis** 19 (+14) |
| **Con** 25 (+17) | **Int** 14 (+12) | **Cha** 20 (+15) |

## Niflung's Tactics

Niflung's array of abilities differs from those of other cobalt dragons—perhaps due to the same experiences that altered his physical form. Despite his many controlling abilities, he prefers to fight from the midst of his enemies, moving in close, engaging them in melee, and allowing his aura to wreak havoc. He is not shy about using his *breath weapon*, but unlike other dragons, he prefers to save his *chilling presence* (his equivalent of *frightful presence*) until he's surrounded by strikers and defenders. He despises showing weakness, but if he's severely wounded and most allies are dead, self-preservation inspires him to flee.

## Encounter Groups

Encounters with the Talons of Winter don't normally involve Niflung. Only when invaders come near his lair on the glacier, or when he's accompanying his worshipers in battle against a truly devastating foe, does he participate.

**Level 22 Encounter (XP 21,200)**

- 3 frost giants (level 17 brute, *Monster Manual 2* page 122)
- 1 ice archon rimehammer (level 19 soldier, *MM* 20)
- Niflung (level 20 solo controller)

### History and Domain

Deep in the frozen regions sometimes called the Frostfell, one particular glacier stretches in a near straight line from a towering row of mountain peaks. Called the Road of Sleet, this glacier has long been known as the home of various fearsome creatures, including the barbarian tribe called the Talons of Winter. This tribe consists primarily of heavily furred shifters, far more vicious than their civilized cousins. The tribe is—or rather, was—ruled by a frost giant jarl (chieftain) named Eilchost. Eilchost was a shaman of some sort, though tales differ as to whether he devoted his worship to one of the primordials or to the demon prince Kostchtchie.

In recent years, the tribe has devoted itself to the dragon Niflung, whom they call the god in the glacier; Eilchost has become his lieutenant and high priest. Precisely why the frost giants chose to dub Niflung a god—a title that they bestowed upon him, not one he claimed on his own—is unclear. Perhaps Eilchost believed him to have been sent by whatever power the tribe previously worshiped. Whatever the case, Niflung's presence has had a profound effect on the tribe. Once, the Talons of Winter were known for their brutal but sporadic raids against the other communities that existed at the base of the glacier; now, those attacks have grown far more frequent, and spread far wider, than ever before.

Today, the tribe consists of a wide array of shifters (ranging from those detailed in the *Monster Manual* to far tougher, more advanced specimens), a number of frost giants and frost giant ice shapers related to Eilchost by blood or marriage, and a pack of trained winterclaw owlbears.

The Road of Sleet is as much of a mystery as the dragon who came from it. Legends say it has a great many tunnels throughout its frigid center and that an entire ancient city lies within, most of it crushed but portions perfectly preserved by the ice.

*Note:* This information is available with a DC 20 History check.

CHIPPY

# SILVARA

Some dragons—particularly silvers and benefi-cent golds—are great and noble protectors of lesser races. They might even grow too enamored, bringing about tragedies such as that of the dragon D'Argent, called Silvara.

In draconic form, Silvara looks like other silver dragons of her age. Her scales gleam, and her broad, muscled wings tense into great shields. Only her sor-rowful eyes suggest something unusual about her.

In her elf form, which she prefers, Silvara is a silver-haired woman. She wears tribal garb or leather armor.

| **Silvara** | **Level 24 Solo Soldier** |
|---|---|
| Elder silver dragon | |
| Huge natural magical beast (dragon, shapechanger) | XP 30,250 |
| **Initiative** +19 **Senses** Perception +23; darkvision | |
| **HP** 908; **Bloodied** 454; see also *bloodied breath* | |
| **AC** 40; **Fortitude** 37, **Reflex** 36, **Will** 36 | |
| **Resist** 30 cold | |
| **Saving Throws** +2 | |
| **Speed** 8, fly 8 (hover), overland flight 15 | |
| **Action Points** 2 | |
| ⊕ **Bite** (standard; at-will) | |
| Reach 3; +31 vs. AC; 4d6 + 9 damage. | |
| ⊕ **Silver Claw** (standard; at-will) | |
| Reach 3; +31 vs. AC; 3d6 + 9 damage. | |
| ⊕ **Dragon's Onslaught** (standard; at-will) | |
| Silvara makes a claw attack against each enemy in reach. | |
| ⊕ **Wing Slice** (immediate reaction, when an enemy attacks Silvara while flanking her or attacks one of Silvara's allies; at-will) | |
| Reach 3; +31 vs. AC; 3d6 + 9 damage. | |
| ✧ **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Cold** | |
| Close blast 5; +29 vs. Reflex; 3d8 + 9 cold damage, and the target is slowed and gains vulnerable 5 to all damage (save ends both). *Miss:* Half damage. | |
| ✧ **Bloodied Breath** (free, when first bloodied; encounter) | |
| *Breath weapon* recharges, and Silvara uses it. | |
| ✧ **Frightful Presence** (standard; encounter) ✦ **Fear** | |
| Close burst 10; targets enemies; +29 vs. Will; the target is stunned until the end of Silvara's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends). | |
| **Enfolding Wings** (immediate interrupt, when an enemy within 3 squares of Silvara attacks an ally that is also within 3 squares; at-will) | |
| The target of the attack slides to a space adjacent to Silvara, and the attack targets Silvara instead. | |
| **Change Shape** (minor; at-will) ✦ **Polymorph** | |
| Silvara alters her form to appear as a unique female elf (see "Change Shape," *MM2* 216). | |
| **Alignment** Good **Languages** Common, Draconic, Elven | |
| **Skills** Arcana +22, Bluff +24, Diplomacy +24, Insight +23 | |
| **Str** 28 (+21) **Dex** 25 (+19) **Wis** 22 (+18) | |
| **Con** 27 (+20) **Int** 20 (+17) **Cha** 25 (+19) | |
| **Equipment** leather armor, hunting club, obsidian dagger | |

## Silvara Lore

**History or Nature DC 16:** A silver dragon named Silvara has dwelt among mortals for generations. She prefers the company of humanoids to that of other dragons. She is particularly fond of elves and eladrin, because, like her, they live long lives relative to other humanoids.

**History or Nature DC 24:** In her elf form, Sil-vara fell in love with an elf warrior-prince who fought alongside a band of heroes against Tiamat's armies. The prince returned her affections until circum-stances forced Silvara to reveal her true nature.

For a while, the pair remained together, despite the prince's inner turmoil as he sought to reconcile his conflicting emotions and to keep Silvara as an ally against Tiamat. In the end, he asked Silvara to depart.

Silvara still mourns the loss. In her battles against evil, her motivations conflict. Does she seek to protect

TOMÁS GIORELLO

the innocent, to impress and win back her lover, or to end her pain in death?

**History or Nature DC 29:** Silvara sporadically battles against Tiamat's forces (including Cyan Bloodbane; see *Draconomicon: Chromatic Dragons*, page 234). She has protected several elven communities and the tomb of an ancient hero, replete with relics. She helped to convince metallic dragons to join Bahamut's side rather than sit out the war. Evil chromatic dragons hate her for her role in the conflict.

**History or Nature DC 34:** Since the dissolution of her relationship with her lover, Silvara rarely joins in the conflict between good and evil—and then only in her elf form or in the form of a human knight. She reveals her true nature only in desperate circumstances.

"Silvara" is a name she frequently uses. Her birth name transliterates to Common as "D'Argent." Her first elven name, taken when she joined a primitive elven community, was "Silvart." Called "Silvara" by more civilized elves when the tribes began to interact, she adopted the name to avoid association with savagery. Finally, in her guise as a human knight, she answers to the name "Arlena Plata."

## Silvara's Tactics

Silvara in dragon form is less brutal and slower to attack than other silver dragons. Her time among mortals has rendered her more interested in protecting her allies than in slaying her enemies. She remains near her allies, guarding them with *wing slice* attacks and *enfolding wings*. She unleashes her *breath weapon* against foes that attack en masse.

As long as her allies are in danger, Silvara does not retreat from battle. If her allies escape, she flees with them. If she has no one to protect, Silvara sees little need for combat.

## Encounter Groups

Silvara favors solitude, where she can suffer alone and mourn what might have been, but she fights only alongside others. Any champion of good or of Bahamut is a potential ally.

**Level 25 Encounter (XP 39,850)**

- 3 ghaeles of winter (level 21 artillery, *MM* 103)
- Silvara (level 24 solo soldier)

## Silvara's Origins

Silvara appears throughout the Dragonlance series of novels. In her first appearance, in *Dragons of Winter Night*, she poses as one of the Kagonesti, the primitive "wild elves," and falls in love with the elf Gilthanas, ruler of the Qualinesti elves. During the war with Takhisis (Tiamat) and through the ages and trilogies to follow, she reappears as a tragic champion of good. In a later novel, Silvara and Gilthanas reunite, but the information given here predates that event.

The following text is an excerpt from *Dragons of Winter Night*, in which Silvara reveals her true nature.

"Hold the torch there . . ." she instructed, guiding his hand so that the light blazed right before her. "Now—look at my shadow on the wall behind me," she said in trembling tones.

The tomb was silent; only the sputtering of the flaming torch made any sound. Silvara's shadow sprang into life on the cold stone wall behind her. The companions stared at it and—for an instant—none of them could say a word.

The shadow Silvara cast upon the wall was not the shadow of a young elfmaid.

It was the shadow of a dragon.

"You're the dragon!" Laurana said in shocked disbelief. She laid her hand on her sword, but Theros stopped her.

"No!" he said suddenly. "I remember. That old man—" He looked at his arm. "Now I remember. He used to come into the Inn of the Last Home! He was dressed differently. He wasn't a mage, but it was him! I'll swear it! He told stories to the children. Stories about good dragons. Gold dragons and—"

"Silver dragons," Silvara said, looking at Theros. "I am a silver dragon. My sister was the Silver Dragon who loved Huma and fought the final great battle with him—"

"No!" Gilthanas flung the torch to the ground. It lay flickering for a moment at his feet, then he stamped on it angrily, putting out its light. Silvara, watching him with sad eyes, reached out her hand to comfort him.

Gilthanas shrank from her touch, staring at her in horror.

Silvara lowered her hand slowly. Sighing gently, she nodded. "I understand," she murmured. "I'm sorry."

Gilthanas began to shake, then doubled over in agony. Putting his strong arms around him, Theros led Gilthanas to a bench and covered him with his cloak.

"I'll be all right," Gilthanas mumbled. "Just leave me alone, let me think. This is madness! It's all a nightmare. A dragon!" He closed his eyes tightly as if he could blot out their sight forever. "A dragon . . ." he whispered brokenly. Theros patted him gently, then returned to the others.

"Where are the rest of the good dragons?" Theros asked. "The old man said there were many. Silver dragons, gold dragons—"

"There are many of us," Silvara answered reluctantly.

"Like the silver dragon we saw in Ice Wall!" Laurana said. "It was a good dragon. If there are many of you, band together! Help us fight the evil dragons!"

"No!" Silvara cried fiercely. Her blue eyes flared, and Laurana fell back a pace before her anger.

"Why not?"

"I cannot tell you." Silvara's hands clenched nervously.

# VALAMARADACE

In the skies above civilization and wilderness alike, an astounding sight floats amid the clouds: an enormous oval island of stone covered in jagged peaks. The Floating Mountain, as it is called, is the home of Valamaradace, a gold dragon who has become far more interested in vengeance against the forces of evil than in the safety and well-being of the lesser creatures she used to zealously protect.

The Queen of the Floating Mountain is longer than most gold dragons of her age (not that there are many to compare her to), but she has substantially less mass. Valamaradace is more serpentine in build than most other golds, and she seems to wind her way through the air like a snake when she flies. Her claws are long and narrow, looking almost like humanoid fingers, and grant her impressive manual dexterity and grace when casting rituals.

As with other ancient golds, her scales seem to gleam with an inner radiance. Her eyes do as well, with glowing slitted pupils that almost blend into the golden orbs that house them.

| **Valamaradace** | **Level 30 Solo Artillery** |
|---|---|
| Ancient gold dragon | |
| Gargantuan natural magical beast (dragon) | XP 95,000 |
| **Initiative** +22 | **Senses** Perception +27; darkvision |
| **Searing Flame (fire, radiant)** aura 2; each enemy that starts its turn within the aura takes 20 fire and radiant damage and takes a -2 penalty to attack rolls until the start of its next turn. | |
| **HP** 1,088; **Bloodied** 544; see also *bloodied breath* | |
| **AC** 42; **Fortitude** 40, **Reflex** 44, **Will** 42 | |
| **Resist** fire 30, radiant 20 | |
| **Saving Throws** +5 | |
| **Speed** 8, fly 12 (hover), overland flight 15 | |
| **Action Points** 2 | |
| (+) **Bite** (standard; at-will) ✦ **Fire, Radiant** | |
| Reach 4; +35 vs. AC; 1d8 + 13 damage plus 2d8 fire and radiant damage. | |
| (+) **Claw** (standard; at-will) | |
| Reach 4; +35 vs. AC; 2d8 + 13 damage. | |
| **Golden Light** (standard; at will) ✦ **Fire, Radiant, Teleportation** | |
| Ranged 20; +35 vs. Reflex; 2d8 + 13 fire and radiant damage, and Valamaradace teleports the target 4 squares. | |
| **Curtain of Light** (free, when an enemy starts its turn within 5 squares of Valamaradace; at-will) | |
| Valamaradace uses *golden light* against the triggering enemy. | |
| **Twin Gleaming** (standard; at will) | |
| Valamaradace makes two *golden light* attacks. | |
| **Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Fire, Radiant** | |
| Close blast 7; +35 vs. Reflex; 4d10 + 13 fire and radiant damage, and the target is blinded (save ends). *Miss:* Half damage. | |
| **Bloodied Breath** (free, when first bloodied; encounter) | |
| *Breath weapon* recharges, and Valamaradace uses it. | |
| **Beguiling Light** (minor; encounter) | |
| Until the end of Valamaradace's next turn, any creature that takes radiant damage from her attacks is dazed (save ends). | |
| **Searing Mark** (minor; recharge ⚄ ⚅) ✦ **Fire, Radiant** | |
| Ranged 20; +35 vs. Fortitude; the target gains vulnerable 20 fire and vulnerable 20 radiant (save ends). | |
| **Change Shape** (minor; at-will) ✦ **Polymorph** | |
| Valamaradace can alter her physical form to take on the appearance of any Large or smaller humanoid or beast (see "Change Shape," *MM2* 216). | |
| **Alignment** Unaligned | **Languages** Common, Draconic, Elven, Supernal |
| **Skills** Arcana +33, Diplomacy +29, History +33, Intimidate +29 | |

| **Con** 24 (+22) **Int** 36 (+28) **Cha** 28 (+24) | |

## Valamaradace Lore

**History or Nature DC 28:** For long centuries, the Floating Mountain hovered over, or near, the community of Silverymoon (or any other city appropriate to your campaign). Valamaradace and her consort—a silver dragon whom the people below called "Silverwing"—served as guardians and protectors of the region, and they frequently collaborated with the city's ruler, a potent spellcaster in her own right.

Initially, Valamaradace saw herself as the queen of the region, as a guardian responsible for ensuring the healthy growth of all creatures in her domain. She sought to harm none, to understand all living beings, and to use her shapeshifting to better appreciate their lives. Eventually, however, her interest in her domain waned. She was more interested in countering possible evils than in safeguarding the good of any particular creatures, and she had come to think that she had learned all that the humanoids could teach her. Silverwing remained more involved with the people. Over the years, he grew more protective of them while Valamaradace grew more detached. Her focus shifted to her magic and to the spread of evil elsewhere in the world.

Valamaradace is an extremely skilled caster. It is said that her spellbooks hold every ritual known to mortals and several that no human, eladrin, or gnome has ever heard of. Legend claims that her skills at divination and scrying are so great that no enemy can possibly take her unawares.

**History or Nature DC 33:** Over the years, the two dragons grew apart as their interests and feelings for the people below diverged. The ruler of the city below, and all the other mortals Valamaradace knew, grew old and died. Their heirs proved ever less impressive in the gold dragon's eyes. Slowly but steadily, the Dragon Queen's interest in those below her waned further. Finally, when the region was rocked by a catastrophe that shook the foundations of the earth and of magic itself, Valamaradace dedicated herself to what she called "a greater purpose" than the protection of a few insignificant lives. She and Silverwing went their separate ways (though they still cooperate on occasion), and Valamaradace allowed the Floating Mountain to drift free so she could scour the land in search of great, world-shaking threats.

KEREM BEYIT

**History or Nature DC 38:** Valamaradace's efforts to destroy what she considers to be great threats—and none are quite certain what her criteria might be—do not take into account the good of other, lesser creatures. She is willing to obliterate innocent bystanders if doing so is the most effective way to defeat an enemy, and her zeal to defeat powerful tyrants has left more than one community in the throes of anarchy afterward. She expects all creatures to obey her without question, and those that do not risk being lumped in with her enemies in her mind.

Valamaradace rarely assumes humanoid form anymore, but when she must, she most often travels as an elf by the name of Targarda.

## Valamaradace's Tactics

Valamaradace prefers to devastate her enemies from a distance. Indeed, over many years—and many mystical endeavors—her abilities have diverged from those of other gold dragons, allowing her to do just that. She never engages her foes in melee if she can avoid it, partly because of her combat abilities, and partly because she wants to avoid "sullying herself" by close contact with lesser creatures.

She uses *beguiling light* and *searing mark* early in the fight to make her *golden light* and *twin gleaming* attacks more effective. She holds her *breath weapon* in reserve for foes that manage to move near her despite her *curtain of light*.

Valamaradace, despite her sense of innate superiority, is willing to flee combat if a foe proves too difficult or impossible to keep at a distance. She then uses her mastery of rituals to study that foe and better prepare her for their next encounter.

When you run Valamaradace in combat, portray her as though she already has a full understanding of the characters' abilities. The Dragon Queen is a master of almost every ritual known—including divinations and scrying—and unless her enemies have been incredibly secretive, odds are that she has learned of them and studied them from afar.

## Encounter Groups

Valamaradace fights alongside any creatures willing to follow her orders and swear fealty to her cause. She prefers allies that can move in close, allowing her to keep her distance from the fray.

**Level 32 Encounter (XP 143,000)**

- Valamaradace (level 30 solo artillery)
- 2 dragonborn champions (level 26 soldier, *MM* 87)
- 1 godforged colossus (level 29 elite brute, *MM* 44)

### The Origins of Valamaradace

Valamaradace first appeared in the Forgotten Realms campaign setting as the "Dragon Queen of Silverymoon." Allied with Alustriel, Valamaradace and Silverwing battled against many evil forces of that setting, including (among others) the Cult of the Dragon and the Zhentarim. However, Valamaradace rarely featured in these efforts, remaining in the background while her consort and Alustriel performed most of the great deeds. With the changes discussed here, however, Valamaradace becomes a far more active figure and can be the driving force behind many an adventure.

Valamaradace's story was written to fit into any campaign setting. If you choose to use her in Faerûn, however, the magical and natural catastrophe mentioned in the Lore section likely refers to the Spellplague.

# Elite Dragons

When a party fights a dragon, it's usually the entirety of the combat. But what should you do when you want to have the dragon accompanied by other creatures? You could use a dragon of a much lower level than the party, but that might result in a combat in which the dragon is mostly ineffectual—the dragon's attack bonuses and defenses will be too low to threaten the party. In these cases, you need an elite dragon.

Creating an elite dragon is similar to applying a template, with a few extra steps. Powers need to be simplified to tone down the dragon's strength. First, the dragon's ability to recharge a *breath weapon* in combat requires more tracking than an elite creature should require, so *breath weapon* becomes an encounter power. The second aspect that needs to be removed is the attack that occurs as an interrupt, minor, or move action; this ability is what allows a solo creature to have an extra attack aside from its standard action.

**Prerequisite:** Solo dragon

| **Elite Dragon** (Dragon) | **Elite Any** XP by level |
|---|---|
| **Saving Throws** +2 (instead of +5) | |
| **Action Points** 1 (instead of 2) | |
| **Hit Points** 16 + (Constitution score × 2) + (level × 16) | |
| **Breath Weapon** (standard; encounter) ✦ **(keywords unchanged)** | |
| Use the original *breath weapon*, but change it to an encounter power rather than a recharge power. | |
| **Nonstandard Attack Power** | |
| Remove an interrupt attack power, minor attack power, or move attack power from the dragon (see the tables). | |
| **Healing and Self-Damaging Powers** | |
| Adjust powers that heal the dragon or cause it to damage itself to half the original value. (For example, a young bronze dragon would regain 41 hit points instead of 82 hit points using *restorative dive*.) | |

Consider reducing the size of the dragon to indicate that it is a weaker member of the kind, especially if you intend to include the full-strength dragon as a solo encounter at another point during the adventure. Also, this system isn't perfect, so make a reality check to ensure that the monster's abilities are reasonable for its level and the party's capabilities.

## Changing Defenses

Monsters from before *Monster Manual 2* were created using a slightly different method, which gave elites and solos higher defenses than other monsters. If you're making an elite dragon based on one from the *Monster Manual*, *Draconomicon: Chromatic Dragons*, or a different older source, consider reducing its defenses so they're close to the values given in *Dungeon Master's Guide 2*. In a pinch, just reduce all the dragon's defenses by 2.

### Chromatic Adjustments

| Variety | Power Removed | Variety | Power Removed |
|---|---|---|---|
| Black | *Tail slash* | Green | *Tail sweep* |
| Blue | *Wingclap* (ancient only) | Purple | *Dominating gaze* |
| | | Red | *Tail strike* |
| Brown | *Sand spray* | White | — |
| Gray | *Warding tail* | | |

### Metallic Adjustments

| Variety | Power Removed |
|---|---|
| Adamantine | *Wing buffet* |
| Brass | *Wing buffet* |
| Bronze | *Wing smash* |
| Cobalt | *Wing flurry* |
| Copper | *Cutwing step* |
| Gold | *Fiery wing riposte* |
| Iron | *Wing block* |
| Mercury | *Quick snap* |
| Mithral | *Wing buffet* |
| Orium | *Tail coil* (elder or ancient only) |
| Silver | *Wing slice* |
| Steel | *Wing scatter* |

## Sample Elite Dragon

Turning a young iron dragon into an elite requires lowering its saving throw bonus and action points, reducing its hit points to 134, and cutting out the *wing block* immediate reaction attack power.

| **Elite Young Iron Dragon** Large natural magical beast (dragon) | **Level 5 Elite Lurker** XP 400 |
|---|---|
| **Initiative** +8 | **Senses** Perception +8; darkvision |
| **HP** 134; **Bloodied** 67; see also *bloodied breath* | |
| **AC** 19; **Fortitude** 19, **Reflex** 17, **Will** 16 | |
| **Resist** 15 lightning | |
| **Saving Throws** +2 | |
| **Speed** 8, fly 8 (hover), overland flight 10 | |
| **Action Points** 1 | |
| **Bite** (standard; at-will) ✦ **Lightning** | |
| Reach 2; +10 vs. AC; 2d8 + 4 damage plus 1d8 lightning damage. | |
| **Claw** (standard; at-will) | |
| Melee 2; +10 vs. AC; 1d10 + 4 damage. | |
| **Double Attack** (standard; at-will) | |
| The dragon makes two *claw* attacks. | |
| **Breath Weapon** (standard; encounter) ✦ **Lightning** | |
| Close blast 5; +6 vs. Reflex; 2d6 + 4 lightning damage, and the dragon pulls the target 3 squares. *Miss:* Half damage. | |
| **Bloodied Breath** (free, when first bloodied; encounter) | |
| *Breath weapon* recharges, and the dragon uses it. | |
| **Frightful Presence** (standard; encounter) ✦ **Fear** | |
| Close burst 5; targets enemies; +6 vs. Will; the target is stunned until the end of the dragon's next turn. *Aftereffect:* The target takes a -2 penalty to attack rolls (save ends). | |
| **Alignment** Unaligned | **Languages** Common, Draconic |
| **Skills** Acrobatics +9, Athletics +8, Stealth +9 | |
| **Str** 13 (+3) | **Dex** 14 (+4) **Wis** 12 (+3) |
| **Con** 19 (+6) | **Int** 12 (+3) **Cha** 11 (+2) |

# Alternative Powers

The statistics blocks in this book and in *Monster Manual 2* show common, iconic powers of metallic dragons. Dragons might develop other powers through training, environment, or magic, allowing you to create surprising adversaries.

## Shapechanging Dragons

Mercury and steel dragons are natural shapechangers, but other metallic dragons, particularly golds and silvers, can also learn to change shape. Even a few chromatics have this ability.

Adding *change shape* (see *Monster Manual 2*, page 216) to a dragon does not dramatically increase the dragon's power, but shapechanging can serve your story. If you want to have a shapechanging dragon, you need not replace another power with it. If you want the characters to have a chance of being able to discern the dragon's true nature, you can limit the ability or have the dragon retain a hint of its draconic appearance. (Also see the "Unmasking the Dragon" skill challenge on page 50.)

## Adamantine Dragon Powers

Masters of surface caves and the caverns of the Underdark, adamantine dragons are tyrants that bring lightning to the depths. The following powers bring out their brash and destructive nature.

### Adamantine Charge

By forgoing its ranged attack prowess, an elder or ancient adamantine dragon can boost its melee attack. This power replaces *painful resonance*.

**✝ Adamantine Charge** (standard; at-will)
The dragon makes a charge attack: level + 5 vs. Fortitude; 1d10 + one-half level damage, and the target is knocked prone. The target cannot stand while the dragon remains adjacent to it.

### Punishing Thunder

An adamantine dragon can magically bind thunder from its breath to its scales and unleash the thunder when struck. This power replaces the "Effect" section of an adamantine dragon's *breath weapon*.

**✧ Punishing Thunder** (free, after using *breath weapon*) ✦ **Thunder**
Close burst 5; each enemy in the burst is marked by the dragon until the end of the dragon's next turn. Until the end of the dragon's next turn, any creature that hits the dragon with a melee attack takes 10 thunder damage.

## Brass Dragon Powers

Despite their curiosity, brass dragons avoid great pain and do not tolerate insolence. The following powers allow brass dragons to punish anyone that crosses those bounds.

### Burning Blood

A brass dragon can increase the temperature of an attacker's blood. This power replaces *wing slam*.

**Burning Blood** (free, when the dragon takes damage from a melee attack; at-will) ✦ **Fire**
The attacker takes ongoing fire damage equal to 5 + one-half the dragon's level (save ends).

### Fire Cloak

An elder or ancient brass dragon can gain a protective fire aura after using a flame attack. This power replaces *ignite*.

**Fire Cloak** (free, after hitting with *breath weapon* or *fire stream*; at-will) ✦ **Fire**
Until the end of its next turn, the dragon is hidden, and any creature that attacks it takes 10 fire damage.

## Bronze Dragon Powers

Bronze dragons do not suffer fools. A bronze's great sense of self-worth grants its words the power to twist thoughts or control elements.

### Imperious Command

Bronze dragons that want to subjugate others develop the following power instead of *frightful presence*. Any bronze can manifest this power, but young bronzes rarely do so.

**✝ Imperious Command** (immediate interrupt, when an enemy damages the dragon; recharges if *imperious command* misses) ✦ **Charm**
Level + 3 vs. Will; the dragon takes half damage from the attack, and the triggering enemy is dominated until the end of the dragon's next turn.

### Water Nimbus

Elder and ancient dragons can surround themselves with magical water that hangs in the air. This power replaces *pinning claw*.

**✧ Water Nimbus** (minor; recharge ⚄ ⁞⁞) ✦ **Zone**
Close burst 3; the dragon creates a zone of water in its space and in the burst. Any creature within the zone except the dragon gains vulnerable 5 lightning and uses its swim speed or Athletics (DC 15) to move. If the dragon is ancient, increase the vulnerability to 10, and the Athletics DC to 20.

# Cobalt Dragon Powers

Cold and sullen, a cobalt dragon believes that good fences make the best neighbors. It can form its breath into a frigid wall or draw upon dark powers of the Shadowfell.

## Ice Wall

An ancient cobalt can shape a wall of ice from its breath. This power replaces *rimedeath fog*.

**Ice Wall** (minor; encounter) ✦ **Cold, Conjuration**
Area wall 10 within 10; the dragon conjures a solid wall of ice 10 squares long and 10 squares high. The wall blocks line of sight and prevents movement through it. Any creature that starts its turn adjacent to the wall takes 15 cold damage and is slowed until the end of its turn.

## Shadow Hail

Cobalt dragons that live in the Shadowfell can mix their innate cold powers with necrotic energy from the realm of the dead. This power replaces *savage mauling*.

**Shadow Hail** (standard; recharges when first bloodied) ✦ **Cold, Necrotic**
Area burst 2 within 20; level + 5 vs. Fortitude and Reflex; if the attack hits Fortitude, one-half level necrotic damage, and the target takes a -2 penalty to attack rolls (save ends); if the attack hits Reflex, one-half level cold damage, and the target is knocked prone.

# Copper Dragon Powers

Copper dragons have tricks up their proverbial sleeves. The following powers allow coppers to stop foes in their tracks . . . or to outsmart them.

## Breath Weapon: Acidic Morass

A copper dragon's *breath weapon* can melt the earth into acidic mud. This power replaces the dragon's normal *breath weapon*.

**Breath Weapon** (standard; recharge ⚄ ⁞⁞) ✦ **Acid, Zone**
Close blast 5; level + 1 vs. Reflex; acid damage equal to that of the dragon's normal breath weapon. The blast creates a zone of acidic morass until the end of the encounter. The squares within the zone are difficult terrain. Any creature that starts its turn within the zone takes acid damage equal to one-half the dragon's level and must make an Acrobatics or Athletics check (DC 10 + one-half the dragon's level) or become immobilized until the start of its next turn. The creature can attempt another Athletics check as a move action.

## Caustic Escape

When a copper dragon moves, it can leave behind an acidic shadow of itself. This power replaces *cutwing step*.

**Caustic Escape** (immediate reaction, when an enemy moves adjacent to the dragon; recharge ⚄ ⁞⁞) ✦ **Acid, Zone**
The dragon flies its speed. The space it left becomes a zone of acidic mist until the end of the encounter. The zone is difficult terrain and lightly obscured. Any creature that enters the zone or starts its turn there takes 5 acid damage. For a dragon of 11th level or higher, the damage increases to 10, and for a dragon of level 21 or higher, the damage increases to 15.

# Gold Dragon Powers

Monarchs and other regents revere the gold dragon for its majesty, strength, fortitude, and luck. The following powers enhance a gold dragon's defenses or luck.

## Gold Barrier

A gold dragon can learn to manifest a golden sphere of protection instead of learning to counterattack. This power replaces *fiery wing riposte*.

**Gold Barrier** (immediate reaction, when hit by an adjacent creature; at-will)
The dragon gains resistance equal to one-half its level to all damage until the start of its next turn. If the triggering attack scored a critical hit, increase the resistance by 5.

## Treasured Luck

An adult or older gold dragon can hamper its foes' luck. This power replaces *burning tomb*.

**Treasured Luck** (minor; recharge ⁞⁞)
Area burst 2 within 20; targets enemies; level + 3 vs. Will; the first time the target attacks the dragon each round, the target rolls d20 twice and takes the lower result (save ends). If that attack misses, the target grants combat advantage to the dragon on the dragon's next attack.

# Iron Dragon Powers

The ill-tempered iron dragons value their privacy. The pricklier ones release arsenals of iron spikes or blinding breath upon creatures that dare to attack.

## Iron-Spark Lightning

An iron dragon can diffuse its lightning breath to create a blinding flash of light. This power replaces *frightful presence*.

**Iron-Spark Lightning** (standard, or minor if *breath weapon* is available; at-will) ✦ **Lightning, Radiant**
Ranged 20; level + 2 vs. Reflex; 1d6 + one-half level lightning and radiant damage, and the target is blinded until the end of the dragon's next turn.

KEREM BEYIT

### Iron Spike Defense

Elder and ancient iron dragons can transform their scales into jagged iron spikes. This power replaces *iron wing defense*.

**Iron Spike Defense** (minor; recharge ⚄ ⚅)
Until the end of the dragon's next turn, any creature adjacent to the dragon that attacks it takes ongoing damage equal to one-half the dragon's level.

## Mercury Dragon Powers

Fluid in body and disposition, mercury dragons can learn to exude versatile tendrils. Tendrils can grab, pierce, or drag enemies.

### Flowing Grapple

A mercury dragon can adapt its shapeshifting ability to ensnare and drag a creature. This power replaces *quicksilver form*.

**Flowing Grapple** (standard; encounter)
Level + 3 vs. Reflex; 4d6 + one-half level damage, and the target is grabbed. *Effect:* The dragon shifts its speed. If it is grabbing a creature, it pulls the creature with it and places the creature in any space adjacent to it at the end of the movement (and the creature is still grabbed).

### Mercury Tendril

A mercury dragon can create tendrils that pierce and stagger its enemies. This power replaces *frightful presence*.

**Mercury Tendril** (minor 1/round; at-will) ✦ **Poison**
Ranged 10/20; level + 3 vs. Reflex; 1d6 + one-half level poison damage, and the dragon slides the target 1 square.

## Mithral Dragon Powers

Mortal concerns of space and distance do not confine mithral dragons. These astral creatures can temporarily phase out of existence, gaining strength from mysteries that lie beyond.

### Interplanar Stasis

A mithral dragon can become trapped between the world and the Astral Sea and turn into a ghostlike figure frozen in time. This power replaces *wing buffet*.

**Interplanar Stasis** (minor; recharges when first bloodied) ✦ **Healing**
The dragon goes into stasis and is insubstantial, restrained, and weakened. If the dragon is in stasis at the start of its turn, it regains 2 hit points per level and is then no longer in stasis.

### Mithral Mists

An elder or ancient mithral dragon can teleport other creatures and rearrange a battle. This power replaces *mithral prescience*.

**Mithral Mists** (minor; encounter) ✦ **Teleportation**
Close burst 3; level + 5 vs. Will; the target is teleported to a square within 10 squares of the dragon. *Effect:* The dragon teleports 10 squares.

## Orium Dragon Powers

Reclusive masters, orium dragons sit among the ruins of lost empires. From ancient stories, they reproduce powers once used by dragons of old.

### Tail Swipe

An elder or ancient orium dragon can learn to attack with its tail more effectively than with its bite. This power replaces the dragon's bite attack. *Draconic fury* also uses this power instead of the bite attack.

**Tail Swipe** (standard; at-will)
Close blast 3; level + 6 vs. AC; 1d6 + one-half level damage, and the target is knocked prone.

### Vaporous Tentacle

An orium dragon can create a vaporous serpent that has acidic tentacles. This power replaces the bite attack of the dragon's vaporous serpent.

**Vaporous Tentacle** (standard; at-will) ✦ **Acid**
Level + 4 vs. Fortitude; acid damage equal to that of the vaporous serpent's bite attack - 5, and the target is grabbed by the vaporous serpent.

# Silver Dragon Powers

Compassionate and honorable to friends, silver dragons show no mercy to enemies. This ruthlessness can manifest in varying powers.

## Bloodied Onslaught

A silver dragon can gain a power similar to *bloodied breath* for its *dragon's onslaught* or *furious dragon's onslaught*. This works best for Huge and larger dragons because of their long reach. This power replaces *bloodied breath*.

**Bloodied Onslaught** (free, when first bloodied; encounter)
*Dragon's onslaught* or *furious dragon's onslaught* recharges, and the dragon uses it, gaining a +2 bonus to the attack rolls.

## Breath Weapon: Immobilizing Breath

Silver dragons can adapt their freezing breath to immobilize foes. This power replaces the dragon's normal *breath weapon*.

**Breath Weapon** (standard; recharge ⚄ ⚅) ✦ **Cold**
Close blast 5; level + 1 vs. Reflex; 1d10 + one-half level cold damage, and the target is immobilized (save ends). Each time the target makes a saving throw against this effect, it takes cold damage equal to one-half the dragon's level.

## Chill Recovery

When an elder or ancient silver dragon recovers from a harmful effect, it unleashes a triumphant burst of cold. This power replaces *unstoppable*.

**Chill Recovery** (when the silver dragon succeeds on a saving throw; at-will 1/round) ✦ **Cold**
Close burst 3; level + 3 vs. Reflex; the target is immobilized (save ends).

# Steel Dragon Powers

Living in disguise means being evasive. Steel dragons can grow paranoid and seek possible escapes in all situations.

## Entrapping Retreat

A skilled elder or ancient steel dragon can trap a foe in a sphere of force and then retreat. This power replaces *force prison*.

**Entrapping Retreat** (move; recharges when the dragon uses *breath weapon*) ✦ **Force, Zone**
5 + one-half level vs. Reflex; the target's space becomes a zone of force until the end of the dragon's next turn. The target doesn't have line of effect to squares outside the zone and can't leave the zone. No creature has line of effect to the target.
*Effect:* The dragon shifts its speed.

## Steel Swath

A steel dragon can develop its fighting ability in human form. This power replaces *dragon's suggestion*.

**Steel Swath** (standard, when the dragon is in human form; recharge ⚄ ⚅) ✦ **Weapon**
The dragon makes two attacks: level + 5 vs. AC; 2d8 + one-half level damage. The dragon shifts its speed between the two attacks.

## About the Designers

RICHARD BAKER is an award-winning game designer who has written scores of D&D® adventures and supplements, including *Manual of the Planes*™ and *Divine Power*™. Rich is also a best-selling author of Forgotten Realms® novels, including *Swordmage* and *Corsair* in the Blades of the Moonsea series.

PETER LEE works as a game designer for Wizards of the Coast, where he splits his time between RPG design and leading the design for *D&D® Miniatures*.

DAVID NOONAN has an extensive list of RPG credits, including *Martial Power*™, *Scepter Tower of Spellgard*™, and contributions to the 4th Edition core rules. He lives in Washington state with his wife and two children.

ROBERT J. SCHWALB works as a freelance designer for Wizards of the Coast. His recent credits include *Martial Power*, *Draconomicon*™: *Chromatic Dragons*, and the *Forgotten Realms Player's Guide*. Robert lives in Tennessee with his wife, Stacee.

ARI MARMELL is a novelist and freelance writer, who has been working on both fiction and role-playing games for almost ten years and has published material through companies such as Paizo, White Wolf, Green Ronin, and Wizards of the Coast. His 4th Edition D&D credits include *Draconomicon: Chromatic Dragons*, the *Eberron® Player's Guide*, the *Eberron® Campaign Guide*, and numerous articles for *D&D Insider*™. His fiction credits include *Agents of Artifice* for the Magic: The Gathering® line, and *The Conqueror's Shadow* (forthcoming from Bantam Spectra).

# NEW MONSTERS

Every new monster in this book appears on the following list, which is sorted alphabetically by level and monster role. Monster leaders are indicated with an (L).

| Monster | Level and Role | Page |
|---|---|---|
| Brass Dragon Wyrmling | 2 Elite Artillery | 175 |
| Goblin Cursespewer | 2 Artillery (L) | 88 |
| Baaz Draconian | 2 Soldier | 190 |
| Goblin Sentry | 2 Soldier | 89 |
| Ferak Draconian | 3 Brute | 191 |
| Cobalt Dragon Wyrmling | 3 Elite Controller | 177 |
| Iron Dragon Wyrmling | 3 Elite Skirmisher | 179 |
| Brass Dragon, Young | 4 Solo Artillery | 156 |
| Chevkos's Crossbowman | 4 Artillery | 94 |
| Kobaaz Draconian | 4 Controller | 192 |
| Kapak Draconian | 4 Lurker | 192 |
| Mercury Dragon Wyrmling | 4 Elite Lurker | 180 |
| Thraeshk | 4 Solo Lurker | 90 |
| Chevkos's Lackey | 4 Minion Skirmisher | 94 |
| Copper Dragon Wyrmling | 4 Elite Skirmisher | 177 |
| Chevkos's Guard | 4 Soldier | 94 |
| Bozak Draconian | 5 Artillery | 191 |
| Bronze Dragon Wyrmling | 5 Elite Brute | 176 |
| Silver Dragon Wyrmling | 5 Elite Brute | 183 |
| Cobalt Dragon, Young | 5 Solo Controller | 161 |
| Dragonkin Channeler (Kobold) | 5 Controller | 198 |
| Steel Dragon Wyrmling | 5 Elite Controller | 183 |
| Dragonkin Zealot (Kobold) | 5 Lurker | 198 |
| Iron Dragon, Elite Young | 5 Elite Lurker | 218 |
| Adamantine Dragon Wyrmling | 5 Elite Soldier | 174 |
| Chevkos | 6 Artillery | 96 |
| Cave Stirge Swarm | 6 Brute | 104 |
| Wyrmling Vaporous Serpent | 6 Minion Brute | 182 |
| Mercury Dragon, Young | 6 Solo Lurker | 163 |
| Korzinalikur | 6 Elite Skirmisher | 96 |
| Adamaaz Draconian | 6 Soldier | 189 |
| Orium Dragon Wyrmling | 6 Elite Soldier | 182 |
| Bronze Dragon, Young | 7 Solo Brute | 159 |
| Dragonkin Champion (Kobold) | 7 Brute | 198 |
| Gold Dragon Wyrmling | 7 Elite Controller | 179 |
| Steel Dragon, Young | 7 Solo Controller | 172 |
| Wyrmguard Sentinel (Kobold) | 7 Soldier | 199 |
| Vaporous Serpent, Young | 8 Minion Brute | 170 |
| Aurak Draconian | 8 Controller (L) | 189 |
| Sivak Draconian | 8 Skirmisher | 192 |
| Baaz Draconian Foot Soldier | 8 Minion Soldier | 190 |
| Orium Dragon, Young | 8 Solo Soldier | 170 |
| Wyrmguard Scout (Kobold) | 9 Artillery | 200 |
| Vulture Drake | 9 Brute | 194 |
| Zanathakla Vaporous Serpent | 9 Minion Brute | 106 |
| Mithral Dragon Wyrmling | 9 Elite Skirmisher | 181 |
| Zanathakla | 9 Solo Soldier | 106 |
| Three-Tooth (Kobold) | 10 Elite Artillery | 201 |
| Brass Dragon, Adult | 11 Solo Artillery | 156 |
| Gargoyle Harrier | 11 Lurker | 112 |
| Mithral Dragon, Young | 11 Solo Skirmisher | 166 |
| Cobalt Dragon, Adult | 12 Solo Controller | 162 |
| Aelathric Sahuagin Guard | 12 Minion | 123 |
| Liondrake | 12 Skirmisher | 194 |
| Aelathric Sahuagin Priest | 13 Artillery | 120 |
| Vaporous Serpent, Adult | 13 Minion Brute | 170 |
| Mercury Dragon, Adult | 13 Solo Lurker | 164 |
| Orium Dragon, Adult | 13 Solo Soldier | 170 |
| Sand Knives Bandit | 13 Minion Soldier | 203 |
| Bronze Dragon, Adult | 14 Solo Brute | 159 |
| Uvokula | 14 Elite Brute (L) | 120 |
| Xyphreneus | 14 Solo Brute (L) | 122 |
| Steel Dragon, Adult | 14 Solo Controller | 172 |
| Couatl Rogue Serpent | 14 Skirmisher | 186 |
| War Shark | 14 Skirmisher | 121 |
| Vanathia | 14 Solo Soldier | 116 |
| Andraemos | 15 Solo Artillery | 202 |
| Gold Hollow Dragon | 16 Solo Brute | 184 |
| Drakkensteed | 16 Skirmisher | 196 |
| Brass Dragon, Elder | 18 Solo Artillery | 157 |
| Jalanvaloss | 18 Solo Controller | 210 |
| Mithral Dragon, Adult | 18 Solo Skirmisher | 167 |
| Aspect of Bahamut | 18 Solo Soldier (L) | 208 |
| Cobalt Dragon, Elder | 19 Solo Controller | 162 |
| Vaporous Serpent, Elder | 20 Minion Brute | 171 |
| Niflung | 20 Solo Controller | 212 |
| Hoard Guardian Sentinel | 20 Soldier | 137 |
| Orium Dragon, Elder | 20 Solo Soldier | 170 |
| Grave-Born Drakkensteed | 21 Artillery | 196 |
| Bronze Dragon, Elder | 21 Solo Brute | 159 |
| Galzaik | 21 Elite Controller | 134 |
| Steel Dragon, Elder | 21 Solo Controller | 173 |
| Mercury Dragon, Elder | 21 Solo Lurker | 165 |
| Death Thrall Attendant | 22 Minion Brute | 147 |
| Methenaera | 22 Solo Brute | 128 |
| Kuyutha, Exarch of Bahamut | 23 Elite Controller (L) | 209 |
| Angel of the Sigil and Word | 23 Soldier | 134 |
| Couatl Redeemer | 24 Artillery | 186 |
| Askaran-Rus | 24 Elite Brute (L) | 144 |
| Gold Hollow Wyrm | 24 Solo Soldier | 184 |
| Silvara | 24 Solo Soldier | 214 |
| Astridaria | 25 Solo Skirmisher | 136 |
| Mithral Dragon, Elder | 25 Solo Skirmisher | 167 |
| Brass Dragon, Ancient | 26 Solo Artillery | 158 |
| Venomous Remnant | 26 Minion Artillery | 153 |
| Cobalt Dragon-Bred Drakkensteed | 26 Skirmisher | 196 |
| Death Giant Soulfire Hurler | 27 Artillery | 142 |
| Cobalt Dragon, Ancient | 27 Solo Controller | 162 |
| Vaporous Serpent, Ancient | 28 Minion Brute | 171 |
| Golgorax | 28 Elite Controller (L) | 146 |
| Mercury Dragon, Ancient | 28 Solo Lurker | 165 |
| Orium Dragon, Ancient | 28 Solo Soldier | 171 |
| Bronze Dragon, Ancient | 29 Solo Brute | 160 |
| Steel Dragon, Ancient | 29 Solo Controller | 174 |
| Tananzinaen | 29 Solo Lurker | 152 |
| Valamaradace | 30 Solo Artillery | 216 |
| Mithral Dragon, Ancient | 31 Solo Skirmisher | 168 |
| Bahamut | 36 Solo Soldier (L) | 208 |
| The Old Man with the Canaries | 36 Solo Soldier (L) | 206 |

# IMPROVE YOUR GAME WITH A BOOKMARK.

Add D&D Insider™ to your Favorites and bring more to your characters and campaigns with a constantly growing source of new content, tools, articles, applications, and more.

Whether you're a player, a DM—or both—D&DI™ will help you spend less time prepping for your game and more time playing it.

# You Can't Judge a Dragon by Its Scales

*"Unlike their chromatic kin, metallic dragons are . . . complicated . . . their loyalties and motives difficult to ascertain. They can be gracious and just, secretive and conniving. Above all, one must never forget they are dragons—clever, covetous, dominating, proud, and devastatingly powerful. Be wary in your dealings with them."*

—Nimozaran, wizard of Fallcrest

This Dungeons & Dragons® supplement covers the adamantine, copper, gold, iron, and silver dragons described in *Monster Manual® 2* as well as several new metallic dragons, including cobalt, mercury, mithral, orium, and steel. Herein you'll find new dragon powers, tactics, lairs, and servitors. In addition, this book provides information about how metallic dragons fit into the D&D® game and how to play them as villains, along with ready-to-play material such as adventure hooks, quests, and traps.

For use with these 4th Edition Dungeons & Dragons products:

*Player's Handbook®* core rulebooks

*Dungeon Master's Guide®* core rulebooks

*Monster Manual®* core rulebooks

*D&D® Miniatures* *D&D™ Dungeon Tiles*

CHAPTER 1

# Dungeon Delvers

*Black passageways stretch out in all directions. The still, stifling air swirls gently with each cautious step forward. The clank of armor and the crunch of footsteps on gravel are the only sounds in the deep chambers, but their soft echoes seem deafening.*

*Around the next corner, faint lights are visible down the corridor. With no way to gauge distance in the darkness, they could be anything: far-off torches, nearby glowing fungi, or the eyes of a lurking beast reflecting the flame. After sharing a glance with the others, the party leader lifts the shutter of the bull's-eye lantern to reveal what lies ahead. . . .*

Dungeons hold everything an adventurer could want: untold riches to plunder, new areas to explore, dangerous beasts to challenge, and strange societies to interact with. An ordinary adventurer accustomed to a soft life in the surface world might get a short distance into a dungeon and consider it a glorious victory. But hardscrabble Underdark natives and veteran delvers know just how difficult survival is down there in the darkness, and that the tunnels keep descending into realms of ever greater danger.

A dungeon adventure is all about huge risks and even greater rewards. You (as well as your character) need careful preparation, problem-solving skills, nerves of steel, and a healthy dose of good luck to take on a dungeon crawl and succeed. Around every corner is some unexpected threat, deadly mystery, or never-before-seen Underdark horror. If you can't step up to the challenge, you'll never make it out.

## New Character Choices

The character options presented in this chapter can help increase your adventurer's chances of survival. Become familiar with the minds and methods of the most successful dungeon explorers, and maybe—just maybe—you'll stand a chance. Even so, death can strike at any time, and a party might have to improvise or bring in new recruits from the Underdark just to see the light once more.

**Character Themes:** To tie your character more closely to dungeons or the Underdark, you can choose a theme that fleshes out his or her backstory or represents a delving-related profession. Each theme's entry includes unique features, as well as optional powers that supplement the choices available to you at various levels. It also includes some suggestions about how to introduce the theme into a game and a sample character. As well, you'll find some in-world advice and background information in the form of sidebars in each entry.

**Races:** Three dungeon-dwelling races—the goblin, the kobold, and the svirfneblin—appear here, with complete descriptions, roleplaying hooks, and optional racial feats and powers. Their adaptation to a life underground and their specific survival skills make members of these races excellent candidates for the adventuring life, even though they might face suspicion or outright hostility from topsiders. Unlikely though it can seem, under the right circumstances even a kobold can become a hero.

**Dungeon-Themed Powers:** The challenges of dungeon delving give rise to specialized techniques and dedicated explorers' guilds. Sometimes, too, a character's background or unique experience spontaneously gives rise to survival abilities that can't be taught. This section describes some of these possibilities, ranging from a widespread organization of Underdark guides, to the hard-knocks training that comes from years spent below ground, to the mind-ripping insights that arise from exposure to unspeakable evil. Here you'll find new attack powers for a variety of classes as well as skill powers available to any character who has training in the relevant skill.

EVA WIDERMANN

# Character Themes

Just as race and class help to define who your character is in the world, theme adds an optional third component to refine your story and identity. The themes presented here explain what your character knows about adventuring in dungeons and provide story hooks that you can use to roleplay him or her.

A theme generally embraces characters of many different classes. A few more narrowly focused themes are limited to a small selection of classes or races—for example, the Underdark outcast must belong to a subterranean race. Any such restrictions are noted in the theme's entry.

Each theme's entry includes a sample character. These characters' background stories can give you some ideas for playing that theme; in a pinch, if you have no character prepared, or if a character's backstory appeals to you, you can roleplay him or her.

This section presents the following themes.

- **Bloodsworn** go into a dungeon to kill a specific enemy, who defines the character's life and quest for vengeance. The eladrin Meliera changed from a peace-seeking diplomat into a bitter hunter after a drow betrayed her.
- **Deep delvers** expertly explore underground environments, preferring the dark tunnels of the Underdark to the sunlit hills above. Karl Deepwalker saw his companions slain by grimlocks, and now the human youth searches for the traitor he's sure was in their midst.
- **Escaped thralls** tore themselves free from the mental control of other creatures. They still bear the physical and mental scars of their imprisonment. Mord lost his childhood memories but sees flashes of his enslavement while he dreams. The half-orc has found some measure of peace as a servant of Ioun.
- **Trapsmiths** create deadly and debilitating devices. They get by on ingenuity, adrenaline, and elbow grease. Thorry the Unlucky lost a couple of fingers to a kobold trap when he was a young svirfneblin. He left his people to pursue safer work but keeps getting pulled back into the dungeon-delving life.
- **Treasure hunters** seek glory and wealth, setting their sights on specific items of considerable worth. Ella the halfling was saved by the mysterious Green Man, along with her siblings—at a price. Unless she finds his crown, scepter, and armor, she'll never see her brother and sister again.
- **Underdark envoys** act as diplomats for Underdark societies. They might be spies, delegates for dark masters, or merchants. Khiira the bard uses her wiles, honed as the seventh daughter of her house, to hide both from the other drow who hunt her and from the topsiders who fear and hate her kind.
- **Underdark outcasts** are disgraced exiles from their societies, forced to wander the lightless realms in a struggle to survive. Through his hubris, Korag made it possible for grimlocks to slaughter many of his dwarf clan, and he was cast out in shame.

## Choosing a Theme

A character can have only one theme. You typically choose a theme at character creation, although the DM might allow you to choose a theme at a higher level, particularly if the campaign's story justifies making the choice later.

Character themes are optional; you don't have to select one if you don't want to. When you select a theme, it grants you the following benefits.

**Starting Features:** Each theme includes one or more features that you gain when you select it.

**Additional Features:** Most themes offer additional features at levels 5 and 10. You gain these features automatically when you reach the appropriate level; they don't replace your normal class features.

**Optional Powers:** Each theme includes a small number of attack powers, utility powers, or both that become available at level 2 or higher. These powers are in addition to the list of powers you can choose from when you gain levels. For example, if you're a 6th-level fighter, you can choose a level 6 fighter utility power or a level 6 utility power from your theme.

You can use retraining to replace a class power with an optional theme power or vice versa, exchanging one power for another power of the same type (at-will attack, encounter attack, daily attack, or utility). The new power must be of the same level as the old power or lower. You can also replace an optional theme power with a different optional power of the same theme, as long as the new power is of the same type and is of the same level or lower.

**Prerequisites:** Just like classes and races, themes can be prerequisites for feats, paragon paths, and other features.

## Changing a Theme

Although a theme can last throughout your character's career, circumstances might arise in which it makes sense for your theme to change. For instance, a character might begin play as an Underdark envoy and eventually suffer a horrible betrayal at the hands of a villain in the subterranean depths. The character consequently leaves the envoy theme and adopts the bloodsworn theme, consumed by a need for revenge.

*The world beneath the world awaits those who cross the threshold of a dungeon*

NOAH BRADLEY

When you can retrain, you can exchange your theme for another theme, instead of using any other option for retraining. To retrain a theme, you must have none of the theme's optional powers, and you must have neither feats nor a paragon path for which the theme is a prerequisite. A paragon path that requires your current theme prevents you from retraining that theme, since paragon paths can't be retrained. But if you have only optional powers or feats that prevent you from retraining your current theme, you can retrain those powers or feats to others that don't require the theme. Once you have retrained all character elements that require your current theme, you can then retrain your theme at your next retraining opportunity.

## Themes as Story Tools

Themes offer a wide array of character creation tools. You might choose your theme first and then pick a class or race to reinforce your identity. For example, a character who has the trapsmith theme can be of any class, but choosing the rogue class lets you reinforce your character's talent for disarming traps with the tools to create them as well.

You can also use a theme to take your character in a new direction, adopting a story role that your class or race might not otherwise provide. For example, if you play a dwarf fighter with the Underdark envoy theme, the combination can offer new opportunities for story hooks and roleplaying. What ancient text or scroll has your character been tasked with retrieving from a rival city? Which of your ancestors is connected to a drow merchant consortium through a shocking secret?

The themes in this section can provide story elements that are unique to your character. Perhaps you have knowledge that you want to keep secret from other party members, or you might have a hidden agenda. Such secrets are meant to create fun roleplaying opportunities, not to set one character against the others. Every theme in this section has a good reason to want to work with the others.

Think about your character's theme and how he or she would interact with the other party members. Multiple characters could be looking for buried treasure, or several could have connections to drow society. Discuss these possible interactions with the DM and the other players in the same way that you might talk about each party member's class or race.

*Meliera, an eladrin paladin and a bloodsworn*

TYLER JACOBSON

# Bloodsworn

*"My enemies must pay for their crimes, and the only payment I will accept is in blood."*

Evil emerges from below to work villainy on the innocent. Those of good heart stand against its machinations and struggle to rebuild in the aftermath of the conflict. For bloodsworn, though, guarding against wickedness is not enough. They take the fight to their enemies in a quest to destroy them all.

Evil creates the situation that brings a bloodsworn into existence. Some terrible event sows the seeds of vengeance in an individual's heart, goading him or her to take up sword and staff to fight back against the darkness and ensure that evil never rears its head again. Often, bloodsworn are survivors of slaughters, whether from goblin marauding, a dark cult's sacrifices, or grimlock raids. Swearing bitter vows to the gods or to their dead comrades, bloodsworn travel a path of righteous vengeance.

## Playing a Bloodsworn

Bloodsworn lead lonely lives that too often end with promises left unfulfilled and bodies broken by the very enemies they pledged to fight. You take no heed of such risks; if you did, you wouldn't have chosen this life. Most people who encounter you fear that your obsession will bring attention to their peaceful and quiet lives. To those who have also endured suffering, however, you are a savior. These unhappy souls give what they have left to aid you in your quest.

The moment you made the commitment to destroy your enemy, any chance of your having a normal life disappeared. As long as that evil darkens the world, you will never rest. But no matter how hot your hatred runs, you do not throw your life away against a foe you can't hope to defeat. You understand that you have to train your skills, hone your abilities, and perfect your techniques before to the final confrontation. For these reasons, you undertake other missions, venturing into ruins and dungeons and fighting alongside your companions, all in preparation for the duty fate has laid at your feet.

## Building a Bloodsworn

Bloodsworn exist among all races, classes, and cultures. One tragedy is enough to set an individual on the path of vengeance. When creating a bloodsworn character, consider the following story elements.

**Choose Your Enemy** Every bloodsworn has an enemy that defines him or her. You can choose any individual, creature, or institution to be your enemy. Think about who your enemy is, what it did, and why it did so.

## POETIC JUSTICE

Putting enemies to death at the point of a sword is satisfying, but not enough so for many bloodsworn. Some concoct elaborate schemes to get their revenge in the most fitting way possible. For example, someone whose brother was killed by duergar might go after the siblings of duergar rulers before attacking the rulers themselves.

Other bloodsworn look for ways to ruin their enemies in the most demeaning way possible. The nature of such humiliation depends on the enemy society.

**Cult:** Nothing frustrates cultists more than destroying their temples, killing creatures they summoned, and blaspheming against their beliefs. Destroying holy writings can also demoralize cultists and set back their plans.

**Drow:** Betrayal and mistrust run rampant in drow society, so orchestrating an enemy's fall in status is readily accomplished. For an even greater insult, the puppet who overthrows the enemy should be of low rank.

**Hobgoblins:** Because hobgoblins take pride in military might, undermining their war efforts makes them look weak, cowardly, or incompetent. A hobgoblin leader so disgraced is unlikely to survive for long.

**Orcs:** The best way to humiliate an orc is to defeat it in single combat. An orc's friends will gather quickly for revenge, and in large numbers, so don't hang around after striking the final blow.

Tailor your training to better defeat that hated foe and counter its capabilities, tactics, and motivations. A bloodsworn who drives back orc hordes is very different from one who is committed to wiping out the Cult of the Elder Elemental Eye or one who has sworn to destroy giants. As you make decisions about feats, powers, and other game elements, keep your chosen enemy in mind and pick options to help you bring it down.

Keep in mind your foe's level relative to your own. If you are pursuing dark elves, you probably won't encounter them until the heroic tier's upper reaches at the earliest. On the other hand, goblins will cease to be a meaningful challenge once you hit the paragon tier. Be sure to talk with your Dungeon Master to make sure your chosen enemy fits into the campaign's story and level range.

You should also consider the scope of your vengeance. A limited goal makes defeating your chosen foe reasonable and achievable. Do you really want to exterminate all dark elves (an impossible task) or only the drow of House Eilserv?

Finally, think about your character's life before the tragedy changed you. What did you want to become? What were your dreams? What did you value? Do you still hope to reclaim the life that was taken from you, or have you given up all such expectations, knowing the road you now walk leads only to death?

**Vengeance's Inspiration** Your enemy could inspire the choices you make about your character. Consider deciding on your enemy before you select your class or race to guide you and suggest a character who best reflects your choice of adversary. If you prefer to choose your race and class first, those details in turn might suggest certain enemies.

Many races in the Dungeons & Dragons world have natural enemies. The history of the fey folk pits drow against eladrin and elves. Dwarves fought giants and orcs in ancient times. Dragonborn and tieflings have good reason to hate each other. The reasons behind these conflicts could be lost in the past, but the animosity remains very much alive. Choosing an enemy that has strong ties to your race helps reinforce your character's place in the world.

Just as race can help determine your chosen foe, your choice of class can suggest certain opponents and bring your character to life. Most classes have no particular animosities, but divine characters often pit themselves against servants of other gods. A priest of Corellon might vow to fight Gruumsh's servants, and the Raven Queen's paladins despise Zehir's priests. A psion or an ardent might venture into the Underdark to seek out a portal to the Far Realm and prevent a flood of monstrosities from reaching the world.

An unexpected choice for your hated enemy can create interesting dynamics in the group. For example, everyone expects a dwarf to hate orcs and giants, but you might create a dwarf fighter who has sworn to defeat an Underdark merchant consortium that exploited your people and emptied their vaults.

## Starting Feature

The dead haunt your dreams, a constant reminder of your failure to save those closest to you. Your friends, your community, your former life—all were lost forever in one moment of violence. You refuse to let another misstep keep you from getting revenge. You are singularly focused on defeating your enemies. As your injuries mount, you find the will to succeed where another might fail.

**Benefit:** You gain the *bloodied determination* power.

**Bloodied Determination** **Bloodsworn Utility**

*When you are in dire straits, failure is not an option. You adjust your attack at the last moment to deliver a strike.*

**Encounter ✦ Martial**
**Free Action** **Personal**
**Trigger:** You miss with an at-will attack power while you are bloodied.
**Effect:** You reroll the missed attack roll.

# Additional Features

## Level 5 Feature

To confront your foes, you must descend into their lairs, contend with the tricks and traps blocking your way, and still have strength enough to do battle once you find your quarry. Constant training and preparation boosts your stamina so you can press on while channeling your fury into more focused attacks.

**Benefit:** When you use your second wind, you gain a +2 power bonus to attack rolls until the end of your next turn.

## Level 10 Feature

Bloodsworn never back down from a fight. Battle-tested and courageous, they commit themselves to every contest. Flinching even a little can give an enemy the advantage it needs to win a decisive victory.

Your intensity in battle is unmatched as you lead the offensive with a swift attack. Your enemies sense your determination and quail before you.

**Benefit:** You gain a +2 power bonus to initiative checks and Intimidate checks.

# Optional Powers

## Level 2 Utility Power

In battle, one foe might stand out from the rest. The *forced advantage* power lets you focus on it so you can bring it down more quickly and shift the battle to your favor.

**Forced Advantage** — **Bloodsworn Utility 2**

*You fix your attention on one opponent to the exclusion of all other foes.*

**Encounter ✦ Martial**
**Minor Action** — **Close** burst 5
**Target:** One creature you can see in the burst
**Effect:** Until the end of your next turn, you gain combat advantage against the target and a +2 power bonus to all defenses against the target's attacks. You also take a –2 penalty to attack rolls on attacks that do not include the target.

## Level 6 Utility Power

Tragedy birthed you, and the memories of that event haunt you still. From time to time, they resurface with such intensity that you are driven even harder to make your enemies pay.

**Urgent Aggression** — **Bloodsworn Utility 6**

*The enemies you face bring back memories of your loss and sorrow, feelings you use to push yourself beyond your normal limits.*

**Daily ✦ Martial**
**Free Action** — **Personal**
**Trigger:** You roll initiative.
**Effect:** You gain an extra move action during your first turn in the encounter.

## Level 10 Utility Power

Until your chosen foe has paid the price, not even the specter of impending death can turn you from your path.

**To the Death** — **Bloodsworn Utility 10**

*You refuse death's call and push yourself to keep fighting.*

**Daily ✦ Healing, Martial**
**Immediate Interrupt** — **Personal**
**Trigger:** You drop below 1 hit point.
**Effect:** You use one of your at-will attack powers. If the attack reduces its target to 0 hit points or fewer, you can spend a healing surge.

# Sample Bloodsworn: Meliera

*"They took my husband and destroyed my life. I have nothing left but hatred."*

Some wars never end. Some hate never dies. A litany of wrongs keeps the fires of vengeance hot and fixes retaliation firmly in one's mind until there is no recourse, no solution other than total war.

Yet some try to find a path away from the bloodshed, to bury the past and forge a new peace. Sometimes such noble efforts work. Most times they end in tragedy, as Meliera knows all too well.

## Origin Story

Meliera and her husband had long insisted that the eladrin people should make peace with the drow and end the long-standing animosity between the two races. Disturbed by growing aggression in their home city of Mithrendain against the exiled dark elves, they abandoned the Feywild for the natural world. There, they believed, they could help drow refugees who objected to their people's corruption and sought to make new lives on the surface. The two settled into an old castle not far from tunnels that led into the Underdark, brought in servants and guards to patrol the lands, and worked with adventuring groups to infiltrate drow enclaves and liberate the oppressed.

The first, and only, dark elf to enter their lives was the mysterious Rook. He claimed to be a lesser son of an important house who escaped certain death after killing an elder sister in a confrontation. The eladrin couple welcomed him into their home, tended to his injuries, and fed and clothed him. They treated him as one of their own, and Rook seemed grateful for their aid.

Routine business in the nearby Valley of Obelisks drew Meliera away, so she left Rook in her husband's care. When she returned, she found her home in ruins. Servants, guards, and worst of all, her husband, lay dead—throats cut, corpses bristling with poisoned bolts. Of Rook there was no sign.

In that moment, Meliera's life changed. Her sympathy for the dark elves died as quickly as her

husband had. Her people were right, she realized. Drow are dark-hearted, and they would do anything to gain an advantage. With her husband's head cradled in her lap, she whispered a vow to Corellon, promising to hunt down those responsible and kill them all. If she discovered that Rook was involved, that he had played her false, she would make him beg for death.

**Values and Motivations** A mix of emotions holds Meliera in its sway. Her guilt at being absent when her husband was killed compels her to don armor and heft blade. She feels stung by the idea that perhaps she was wrong about the nature of the dark elves, and the ease with which she first entertained this doubt about their nature makes her wonder if she ever really felt sympathy for them or if she was paying lip service to ideals that her husband once held. Questioning herself in this way also causes Meliera to feel as if she has betrayed her husband not only by being absent during the slaughter, but also by not cleaving firmly to his beliefs in the face of the greatest of losses ever: the death of her most beloved in the world. All this and more swirls darkly within Meliera's heart and mind in a haze of grief and anger that never lifts and that causes her to push onward to bring justice's sword down on her foes.

**Roleplaying Meliera** Cold, withdrawn, and aloof, you possess none of the elegance and grace of other eladrin. Your purpose keeps you detached. You lack compassion for allies, though you would never abandon or betray them. Indeed, you feel obliged to protect them to make up for failing the people you loved. You understand your limits, though, and know those at your side will eventually come to harm no matter how hard you fight. So you keep your distance to insulate yourself from the grief their loss would undoubtedly bring.

You know that wiping out all drow is neither practical nor possible. Instead, you seek the villains who killed your husband. You suspect they were tied to Rook's house, so finding that missing dark elf is your first concern.

**Creating Meliera** Meliera swore to protect the world from the drow and avenge the loved ones who suffered at their hands. She made this oath to Corellon and trained to become a paladin in his name. With the eladrin's optional Charisma bonus, the protecting paladin build in the *Player's Handbook* serves Meliera best.

If you choose to play Meliera, you can choose her race and class to suit your interests. She might be an elf or a half-elf instead of an eladrin. In this case, a different defender class might work better, such as the fighter, the knight, or the cavalier.

# Deep Delver

*"Only here, with the weight of the world above my head, am I home."*

Beneath the tramping of nations and the roots of forests is a world that surface dwellers can barely imagine. Countless tunnels and caverns, rivers and oceans form a fantastic, globe-spanning environment. To the unprepared, though, the underground wilderness is as ruthless as it is wondrous. Those who survive these wilds are among the greatest explorers in the world. For these deep delvers, an expedition to the Underdark is no more threatening than a stroll through the woods.

Deep delvers are driven by an unquenchable desire to pit themselves against the challenges of the subterranean world. Some seek to map out the spiraling highway-tunnels of the Underdark. Others are naturally drawn to the seclusion of caves, preferring to abandon life on the surface. Yet others are born to the Underdark and still call it home.

## Playing a Deep Delver

Deep delvers are rarely seen on the surface; the lure of underground adventure is too strong to keep them topside for long. As experts in navigating the treacherous depths, some deep delvers profit from their skills as guides or cartographers. Most surface dwellers see you as a bit mad, unable to understand how you go for so long without seeing the sun. You shrug your shoulders and wonder if they are the mad ones, uninterested in spending their lives gazing upon the Underdark's wonders.

Most deep delvers who were born on the surface are drawn below by a thirst for adventure. You are addicted to the thrill of exploring the vastness of the Underdark. For you, knowing the ways of caverns is as essential to survival as a surface dweller's understanding of woodcraft. Those who cannot learn quickly are consumed, while those who survive become masters of their trade. You might undertake expeditions for the promise of treasure or fame, but you would enter the Underdark for no other reason than the chance to breathe the cavern air and tread the stone highways of a subterranean world.

## Building a Deep Delver

Deep delvers are a diverse lot, united only by their will to thrive in the caverns they call home. Though deep delvers come from all races, few surface dwellers other than humans are likely to choose this path. Many deep delvers come from races native to the Underdark, such as dwarves and svirfneblin, who have a natural affinity for dungeoneering. Classes that specialize in survival skills, such as druids,

*Karl, a human ranger and a deep delver*

rangers, and rogues, also excel as deep delvers. Consider the following story elements when creating a deep delver character.

**Born Above** If you belong to a race native to the surface, something uncanny must have inspired you to favor a life below ground—and to enable you to survive there. The Underdark's scope and geography are unlike anything aboveground. Think about why you decided to live below the earth, and thus how you approach its many challenges.

Are you constantly in search of new sights and experiences? Is the physical challenge of getting there half the fun? You might revel in the rush of descending a miles-deep chasm or swimming through a flooded cave. The thrill of being the first to see such a sight is its own reward.

You might instead be a deep delver out of necessity. Perhaps you live in a community located near an entrance to the Underdark that must contend with raids by monsters or savage humanoids, so that patrolling the tunnel and the area around it is essential to your home's survival. Alternatively, your livelihood might depend on searching the Underdark for precious resources, such as rare minerals and magical components, or simply for food. In either case you must become a master of underground tracking and observation to succeed.

The most well-known deep delvers have patrons who pay them to explore the Underdark. You might be the employee of a wealthy monarch, hired to map an extensive series of passages discovered in one of the realm's mines. Does your patron plan to open up trade with Underdark civilizations, or hope to use the tunnels to launch secret attacks against rivals? The results of your exploration could trigger far-reaching events in the campaign.

Consider also what you're leaving behind as you delve. Your connection to family and friends on the surface is cut off during your ventures, but maybe that is the point. Did you become a deep delver to escape something? If so, what better place to hide than the limitless depths of the Underdark?

**Born Below** For deep delvers who hail from the Underdark, the subterranean realm isn't a mystery—it's home. What topsiders see as a place of legendary dangers, mythic locales, and otherworldly beasts is just what you deal with every day. If your character is a member of an Underdark race, you probably have little patience with the blundering surface dwellers waving torches in your backyard.

Consider how your character's home and culture fits into the campaign. Dwarves, renowned for their tremendous underground cities, live in the upper reaches of the realm and regularly deal with surface communities. The same goes for savage humanoids

KIERAN YANNER

such as goblins or kobolds, though their behavior is far less civil. These races live close enough to the surface that their domains have the feel of a nearby wilderness, much as a human or elf hunter would see a forest or swamp close to home—a place to be taken seriously but lacking mystery.

Races that dwell deeper, such as the svirfneblin, are one with the Underdark, which provides them with shelter and sustenance. Deep delvers of these races see the world above as a place of wonder and legend, and they view explorers from the surface as sightseeing nuisances.

## Starting Feature

For you, a trek to the Underdark is all in a day's work. Your keen senses pick out lurking dangers that would spell doom for the less experienced. You've steeled your nerves against the hazards that threaten your every step. You know that you need to be on your toes when navigating the depths, but you wouldn't have it any other way.

**Benefit:** You gain a +2 power bonus to Dungeoneering checks.

You also gain the *subterranean survival* power.

**Subterranean Survival** **Deep Delver Utility**

*You thrive in the unforgiving caverns of the Underdark.*

**Encounter ✦ Martial**
**Free Action** **Personal**
**Trigger:** You make a Dungeoneering check and dislike the result.
**Effect:** You reroll the Dungeoneering check.

## Additional Features

### Level 5 Feature

A life spent underground has given you a diverse range of knowledge concerning subterranean ecology and terrain. From spotting the territory markers of hook horrors to knowing which pools of slime to avoid, you're the authority when it comes to Underdark lore.

In addition, the claustrophobia that rattles the nerves of some explorers doesn't even faze you. You descend feet first through cramped tunnels without a second thought, moving as quickly as a cave lizard while others squeeze by at a crawl.

**Benefit:** Your power bonus to Dungeoneering checks increases to +4.

Also, when you squeeze, your speed is not halved, and you take a -2 penalty to attack rolls instead of the normal -5.

### Level 10 Feature

When you spend weeks, months, sometimes years underground, even the flickering light of a torch can be as intense to you as the full brilliance of the sun. The best delvers sharpen their other senses to the point that lack of light does not hinder them. Subtle vibrations in the ground, the movement of drafts of air, or the echoes of sound against cavern walls let you find your way effortlessly.

**Benefit:** You gain blindsight with a radius of 2 squares.

## Optional Powers

All deep delvers are experts at surviving underground, but for some this specialization is an all-consuming passion. They don't just survive, they thrive underground. Some become so adept at navigating the depths that they are uncomfortable anywhere else.

### Level 2 Utility Power

Most battles underground don't offer the luxury of an open field to maneuver: Swords rake against cavern walls, and combatants are forced into corners. You, though, take advantage of the cramped conditions, placing yourself where foes cannot easily reach you and using the walls as cover.

**Up against the Wall** **Deep Delver Utility 2**

*You find ways to take advantage of close-quarters environments.*

**Encounter ✦ Martial**
**Minor Action** **Personal**
**Effect:** Until the end of your next turn, you gain partial cover while you are adjacent to a square of blocking terrain, and any enemy that misses you with a melee attack while you have partial cover grants combat advantage to you until the end of your next turn.

### Level 6 Utility Power

At this point in your career you know just about everything about exploring caves, and this knowledge lets you overcome obstacles where once you might have struggled.

**Cavern Lore** **Deep Delver Utility 6**

*Your talent for exploring caves gives you the edge needed to overcome unexpected challenges.*

**Encounter ✦ Martial**
**Free Action** **Personal**
**Trigger:** You fail an Acrobatics, Athletics, Endurance, or Perception check while underground.
**Effect:** You make a Dungeoneering check and use its result instead.

**Level 10 Utility Power** When the lights go out and you are suddenly tumbling into a ravine or in the path of a landslide, your skilled senses kick in to let you respond.

**Spelunker's Instincts** — Deep Delver Utility 10

*Your cave-delving reactions can save you from a sudden misstep or a serious injury.*

**Encounter ✦ Martial**
**Immediate Interrupt** — **Personal**
**Trigger:** You take damage from a trap, a hazard, or a fall.
**Effect:** Reduce the damage by 5 + one-half your level.
*Level 11:* 10 + one-half your level.
*Level 21:* 15 + one-half your level.

# Sample Deep Delver: Karl Deepwalker

*"Don't worry. I'll get us back to the surface . . . somehow."*

Nothing tests an explorer's mettle like a journey in the Underdark, as Karl Deepwalker has learned. Cut off from the support of his fellow delvers, the young human must rely on his untested wits to survive in the deepest of wildernesses as he seeks to discover who is behind the deaths of his former companions.

## Origin Story

Eager to strike out on his own and make his fortune, Karl signed up with the Deep Guides as soon as he turned eighteen, just a few months ago. The Deep Guides keep the routes open between the surface and the Underdark, blaze trails through the warrens, and protect the caravans they accompany on the way to destinations such as Deeping Delve and Maelbrathyr. (See page 55 for more about the Deep Guides.) As tough as the work was, exploring the deep caverns and encountering fascinating people gave Karl a passion for delving. But now he is on his own.

A few days ago, grimlocks wiped out Karl's company of Deep Guides, though Karl managed to escape. His company had recently concluded a deal with an up-and-coming merchant house to create new markets in Underdark communities just beneath the surface. The Guides' leader had returned to headquarters to give the others the rundown when grimlocks spilled in through the doors, hacking at everyone in their path.

Karl survived by running into the depths, but now he is hounded by guilt. If he had stood by his companions, perhaps he could have made a difference in the fight, but he'll never know. He's also suspicious about the attack: The timing was too perfect, and the grimlocks tripped none of the company's alarms. Karl believes that someone in the organization was behind it—and he aims to find out who.

WAYNE ENGLAND

## Values and Motivations

Karl is set on discovering the traitor who sent his fellow Deep Guides to their deaths. He'll do whatever it takes to avenge his friends. Karl plans to search the former headquarters of the Deep Guides, though he knows it will mean viewing the horrific aftermath of the attack. There he hopes to find clues that will lead him to the traitor, and maybe signs that some of the other Deep Guides escaped the slaughter.

## Roleplaying Karl

You are overwhelmed by strong emotions, but you have come to terms with your friends' deaths. Now you must recover your courage and sense of self-worth to do what you must to avenge them. Your fledgling dungeoneering skills were put to the test as you fled, and you're unsure whether they will be enough.

You crave the fellowship of strong-willed companions to lean on emotionally as well as in combat. Your time with the Deep Guides instilled in you an industrious work ethic, though your youthful enthusiasm has been suppressed by the harsh reality of life in the Underdark. You always feel a moment of hesitation when faced with a dangerous situation, but you have vowed to never again abandon your comrades in time of need.

## Creating Karl

Karl's quest for answers in the Underdark requires a diverse range of skills, as well as the grit to take on the enemies he's sure to face there. A human's versatility serves him well, and the ranger is a good class fit.

If you prefer to change Karl's race or class, he could easily be a dwarf instead of a human. Any class that grants training in Dungeoneering, such as rogue, enables him to explore dungeons successfully.

# Escaped Thrall

*"I can still feel them crawling in the back of my mind, but they'll never get me again—not if I have anything to say about it."*

In the deepest caverns, where the sun is but a myth and the weight of the world crushes all hope, abominations haunt the dark. These perverse beings—aboleths, mind flayers, and worse—exert a loathsome control over the minds of others. Few who become their slaves ever return. Yet some of dauntless resolve do escape, though they are forever burdened by the scars of their slavery. The lingering voice of the master echoes just beyond comprehension in the backs of their minds.

## Playing an Escaped Thrall

Escaped thralls flee as far and as fast from their captors as possible. Only then do they try to recover physically and mentally, though some are never able to heal the scars of their captivity. These poor souls become mad, unable to coexist with a society that cannot understand their pain; most die alone and penniless. Escaped thralls who can control themselves develop a strong sense of purpose. Some are driven to do good in the world, while others simply try to make the most of their existence.

For you, your new life began with a thought, one that was not your own. The psychic domination burrowed into your mind like a ravenous worm. You didn't realize that it was happening, as all purpose, memory, and individuality vanished. Yet some tiny fraction of your identity remained, hidden within the mental labyrinth created by the insidious master. Your will was strong enough to find the way out of this maze and escape.

The call of an escaped thrall's former master beckons, and for some this pull is too much to ignore. Many escaped thralls venture back into the caverns of their former existence to satisfy a maddening compulsion. Those whose will is strong return to their old homes of their own accord, not out of curiosity but for revenge. Escaped thralls who become adventurers are grim and determined. As one of these, you have survived horrors that crushed the spirits of lesser folk and would gladly face any danger to confront your tormentor. This singular goal demands that you become a master of exploring the dungeons that your former captor calls home.

## Building an Escaped Thrall

The aberrant entities that enslave the minds of mortals care little what they prey upon, so escaped thralls can be from any race, class, or culture. Many adopt psionic classes, their liberation having awakened new mental

WILLIAM O'CONNOR

***Mord, a half-orc and an escaped thrall***

abilities. When creating an escaped thrall character, you should consider the following story elements.

### Monstrous Enslavement

The nature of your captor plays a huge part in how you portray your character's theme. The haunted visions, physical marks, and story elements can vary wildly depending on what creature enslaved you. In a way, your former master is the most important part of your background.

Whatever the creature that enslaved you, its motives are likely mysterious. The identity of your captor might be a secret that is slowly revealed to you over the course of your dungeon expeditions. Keep in mind that many such monsters are of very high level, so if you want any chance of success, you can't just storm into your captor's lair until you have improved your own capabilities.

### Shattered Body

Most thralls bear physical marks of their imprisonment. These might be the lashes made by a drow whip across your back, or scars on your neck from a vampire's bite. These injuries testify to the horrors you endured and might make others feel pangs of pity or revulsion. Do you try to conceal your scars so as not to draw attention to yourself, or do you proudly bear them as proof of your indomitable will?

Perhaps instead of physical scars, you wear an air of illness. Your skin hangs loose and sickly from malnourishment during your time underground, or dark bags under your eyes reveal that your torment robs you of sleep. Sometimes the signs of your ordeal are subtle, such as the trembling of your hands.

### Scarred Mind

Your psychic enslavement has left its mark on your mind. You gained freedom—but at what cost? Do you fear that your master will come for you, or worse, that you might surrender your sanity and return to be enslaved again? Perhaps you cling to ideals or goals to focus your mind, suppressing the memories through force of will. Either way, others might find you enigmatic or even dangerous.

Even if you have recovered well, your mind has been permanently altered by your captivity. Casting off mental domination has awakened psionic talent in you that had lain dormant until the moment of your freedom. Do you embrace this strange force, or hate it as you hate your former master?

## Starting Feature

Your psychic imprisonment did more than just change you emotionally and psychologically, it fundamentally altered your mind. By recognizing and controlling these new abilities, you can do things you were never capable of before.

Most of the theme's powers involve the use of power points. See the *Rules Compendium* or *Player's Handbook 3* for how to use power points with powers that have the augmentable keyword.

**Benefit:** You gain 1 power point. You regain all your power points when you take a short rest or an extended rest.

You also gain the *my mind is my own* power.

**My Mind Is My Own** **Escaped Thrall Utility**

*Your passion for freedom drives out the presence of insidious entities from your mind.*

**Encounter ✦ Augmentable, Psionic**
**Immediate Interrupt** **Personal**
**Trigger:** You are hit by a charm or a psychic attack.
**Effect:** You gain resist 5 psychic until the end of your next turn. Also, you gain a +2 power bonus to saving throws against charm effects and psychic effects until the end of your next turn.
*Level 11:* Resist 10 psychic.
*Level 21:* Resist 15 psychic.
**Augment 1**
**Effect:** As above, and you can make a saving throw against any charm effect and psychic effect at the start of your turn, instead of at the end, if a save can end the effect. This benefit lasts until the end of the encounter.

## Additional Features

### Level 5 Feature

Whether they communicate in fevered babbling or maniacal whispers, escaped thralls often slip into their former master's alien language. Some gain a mastery of this tongue, wresting an understanding of mysteries from subconscious messages.

You have gained insight into matters you shouldn't be able to comprehend. By carefully bringing this knowledge to the surface, you can use it to your benefit.

**Benefit:** Add Deep Speech to the languages you can speak, read, and write. You also gain a +2 power bonus to Dungeoneering checks.

### Level 10 Feature

Escaped thralls who survive the trials and creeping madness of their ordeal become calmer, able to focus on reality in a way that brings peace.

**Benefit:** You gain a +1 power bonus to Will.

## Optional Powers

An escaped thrall's scars never fully heal. Some pretend to live normal lives unafflicted by corruption. For others, the lingering torment becomes an obsession. Your freedom becomes your identity. These optional powers let you harness the clinging madness of your enslavement, turning it into a weapon against your enemies.

## THE GIFTS OF TORTURE

Thrallmasters inflict unspeakable horrors on their captives, but such maltreatment sometimes instills useful abilities along with the residual scars. The sort of marks an escaped thrall bears might indicate a particular boon.

**Psionic Seeds:** Icy fingers crawl across your mind, grasping at your thoughts, trying to control your actions. As long as you can hold them back, your altered mind can accomplish great feats.

**Augmented Flesh:** The alien scars that cover your body make you look like a freak. In the rush of combat, your muscles distort and ripple. The feeling is horrific, but the effect sometimes lets you transcend your body's normal limits.

**Dreams and Visions:** The nightmares that wrack your sleeping mind leave you on edge when you wake. Still, glimmers of prophecy are hidden within those visions and might prove useful—if you can decipher them. Perhaps priests experienced with such foresight can guide you.

### Level 2 Utility Power

Sometimes your mind seems no longer your own. It operates in ways you can't understand, sometimes pulling up knowledge you never realized you had. You have learned to rely on this alien influence to protect yourself.

**Protective Trauma** — Escaped Thrall Utility 2

*A hidden bit of memory has placed an accessible psionic defense in your mind.*

**Encounter ✦ Augmentable, Psionic**
**Minor Action** — **Personal**

**Effect:** You gain a +2 power bonus to all defenses until the end of your next turn.

**Augment 1**

**Effect:** As above, and allies gain a +1 power bonus to Will while adjacent to you. This benefit lasts until the end of your next turn.

### Level 6 Utility Power

At times a flood of memories comes rushing back to you, imparting a random bit of information amid the confusion of sights and sounds. The *alien insight* power lets you sift through these visions, though who can say if they arise from your experience or from within the mind of your monstrous slaver?

**Alien Insight** — Escaped Thrall Utility 6

*A confusing barrage of sensations left over from your imprisonment flashes before your eyes, giving you an advantage if you can make sense of them.*

**Daily ✦ Augmentable, Psionic**
**Minor Action** — **Personal**

**Effect:** Roll a d4 to determine the power's effect.

1. You gain an extra move action this turn.
2. You gain a +2 power bonus to all defenses until the end of your next turn.
3. You gain a +2 power bonus to the number of squares you can pull, push, or slide creatures with attacks and effects before the end of your next turn.
4. You regain 2 power points.

**Augment 1**

**Effect:** As above, but roll twice and use either result.

### Level 10 Utility Power

As time goes by, some thralls are able to turn the deep scars of their torment outward, using it to assail the minds of their enemies. These visions rock the sanity of the onlooker, bombarding their senses with darkness, pain, and the maddening whispers of the thrall's former master.

Opening this doorway is often as shocking for you as it is for your opponent, since you each relive the horrible events of your capture. Yet the advantage goes to you, for only you know that freedom waits at the end of the road; your opponent knows no such reprieve.

**Window into Madness** — Escaped Thrall Utility 10

*You make mental contact with your enemy, giving it a brief yet vivid taste of the torment you endured as a thrall.*

**Daily ✦ Psionic**
**Minor Action** — **Close** burst 5
**Target:** One creature in the burst

**Effect:** Until the end of your next turn, you grant combat advantage, and the target gains vulnerable 10 psychic.

**Sustain Minor:** The effect persists until the end of your next turn.

## Sample Escaped Thrall: Mord

*"The deeper we go, the more wary I become. There's something evil down here. It makes my scars itch."*

All beings long for freedom and will do anything to shatter the yoke of slavery. But what hope is there for escape when the master chains not only the body but the mind? Not one in a thousand possesses the iron will to break free, but Mord did—at a terrible price.

### Origin Story

Nightmares have haunted Mord since his childhood. He doesn't remember anything before he was about ten, when he emerged alone and frightened from a cave on a barren hillside during a downpour. He would have died from exposure had not a traveling priest named Michelson happened by and found the young half-orc shivering in the mud.

The priest was a hermit sworn to Ioun, but Mord's plight stirred his heart, and he forsook his isolation to care for the child. Despite this kindness, nightmares assailed Mord in his sleep. Many nights he woke up screaming, believing himself to be drowning.

Though Mord was ill suited to the intellectual pursuits demanded by Ioun's dogma, he was fervent in his faith and learned the prayers as best he could. Now an adult, and having buried the old priest long ago, Mord travels the world to spread Ioun's teachings and fight the horrors of the dark.

What he has yet to discover is that aboleths enslaved his people, dragging them into the Underdark to transform them into hideous servitors. Although he escaped their clutches, their evil has infected his thoughts. If that infection flares up, the aboleths might regain their hold on him forever.

### Values and Motivations

Mord clings to his faith, using it as a shield against the darkness brooding in his mind. He is frightened by the alien thoughts that plague him and ashamed of his inability to overcome them. As a devout follower of Ioun, he should be able to control his emotions through logic and concentration—so he tells himself.

Mord's mission takes him around the world. His only goal is to do the will of Ioun; the only direction he travels is away from the cave where Father Michelson saved him.

### Roleplaying Mord

Though you are faithful to Ioun and try to be as good as you can be, you constantly feel that you fall short of Father Michelson's teachings. Are you too hard on yourself, or are your doubts stirred by a darker force?

You are inspired most by the desire to repay Father Michelson's kindness by doing good works on behalf of others. You avoid probing too deeply into the secret of your childhood enslavement, for fear that learning too much will give your former master control over you. You know, however, that you cannot escape the truth forever.

### Creating Mord

Mord's adolescence spent studying with Father Michelson has given him an uncommon combination of intellect and poise, especially for a half-orc. His commitment to his adopted faith, along with his natural strength and athleticism, make Mord a natural warpriest of Ioun.

If you choose to play Mord as a member of a different race and less of an outsider, he could be human instead. Changing his class gives him a different feel: A more pacifist cleric build emphasizes Mord's subtle qualities, while as an avenger he is more impulsive, perhaps influenced by his lingering scars.

# Trapsmith

*"Don't touch that."*

Some things you just don't fight. To take on adversaries that have superior strength, cunning, or resources (or all three), you need to remove their advantages. Such an alternative approach is the job of a trapsmith.

Humanoids have been building traps since the earliest times, developing techniques to take down big game for food and clothing. According to loremasters, goblin tribes were the first to perfect this kind of hunting. They were able to obtain and store more food than their competition, allowing them to survive harsh winters and increase their numbers. Many years later, other races came to appreciate the ingenuity of their counterparts—mainly through direct interaction with goblin traps.

## Playing a Trapsmith

Trapmaking started out as an essential survival tool but became more advanced as technology improved and magic was discovered. Dwarves developed methods of blasting stone with black powder and incorporated the new techniques into traps to create terrifying inventions. Arcane practitioners also began

### STEPS IN SETTING A TRAP

Placing a trap always comes with the risk of setting it off. Trapsmiths follow these careful steps so they can keep their extremities and improve the chance of having their traps work as intended.

**1. Pick the Right Spot:** Place traps in narrow tunnels or around valuable objects. Don't give anyone room to skirt around them.

**2. Avoid Collateral Damage:** Don't let your trap hurt anybody or anything it's not supposed to. Also watch out that you don't place a trap where it can damage the thing it's meant to protect.

**3. Use the Right Tools:** Don't cut corners. If you don't have the tools to make a particular trap, make a different trap. End of story.

**4. Keep Your Distance:** If you stay close to your trap while you set it, you're begging to get yourself maimed. Long-handled tools, such as tongs, and ten-foot poles were made for a reason. Protective goggles can't hurt, either.

**5. Don't Test It:** It's disappointing when a trap fails in the field, but it's not worth risking your life to try the trap out. Far better to be known as the trapsmith who set a couple of duds than as the one who got killed by your own trap.

*Thorry the Unlucky, a svirfneblin and a trapsmith*

BEN WOOTTEN

their own experiments, which ultimately led to the development of magical traps that used special sigils and runes. As great kingdoms and empires arose, traps became tools of warfare in addition to protecting valuable people and possessions. The new reality required masters of both disarming and creating traps. That's where you come in.

You're not just an expert in all things relating to traps. You see every new trap as a puzzle to be solved, its secrets waiting for you to bring them to their highest expression. The physical and emotional scars of your profession are small costs to pay for the sense of aliveness you experience as you practice your trade.

Trapsmiths are rare, so you have little difficulty gaining employment. Adventuring parties, military expeditions, and explorers all value your efforts and often call upon you for follow-up duties if you perform well. You command higher payment for dungeon expeditions than most other adventuring professionals, due to the danger involved in your work as well as your specialized skill set. Indeed, the older you are, the more you can charge for your services, since most young and inexperienced trapsmiths die early.

## Building a Trapsmith

Trapsmiths prefer to live in solitude, honing their skills and mastering their trade. You spend your free time researching new and exciting places to go. You might have a core group of friends, but beyond that, you are not very social. Ironically, you might feel like a prisoner in life—with death the ultimate trap to be defeated.

You might become a trapsmith if you enjoy creating dastardly devices to hinder and harm foes; rogues and possibly rangers are typical classes. You might also choose this theme if you like to play clever tricks or conduct intricate research. A mage or bard makes a good trapsmith. Members of any race might take up such a career, but those with an aptitude for mechanical constructions (such as dwarves, gnomes, or svirfneblin) find greater success, as well as those with some magical aptitude. When creating a trapsmith character, consider the following story elements.

**Analytical Mind** You understand physics innately and see life's challenges as equations to be solved, using strict logic to determine the likely success or failure of a course of action. You might not be conscious of this thought process; even in social situations, you tend to analyze the situation coldly instead of considering body language and emotion. Thus, others might think you odd. You prefer to live in solitude, honing your skills and mastering your trade, and you spend your free time researching new and

exciting places to go. You might have a core group of friends, but beyond that, you are not very social.

### Adrenaline Rush

Nothing is more exciting than disarming a trap that could splatter you across the room. You love getting into the face of death and kicking it hard. You also enjoy the accolades for overcoming dangerous challenges and might purposely seek out bigger and more hazardous traps. The knowledge you win when you survive such dangers lets you make your own creations that much more fiendish. Your creations are feared by all and coveted by those who need to protect something precious.

Your profession is not a risk-free one. You have suffered for your art and are likely to have scars, welts, or even a missing limb. Rare is the trapsmith who has not had a mishap while setting or disarming a trap. You might also bear emotional scars, which, though not visible, can have longer-lasting effects.

## Starting Feature

You can create and disarm elaborate traps, but sometimes a simple device is all that's needed to stop an enemy in its tracks.

**Benefit:** You gain a trap-making kit (15 lb.), which you use to lay your traps. If you ever lose the kit, it costs 40 gp to replace.

You also gain the *trip the trap* power.

**Trip the Trap** — Trapsmith Attack

*An enemy's approach triggers a nasty trap you prepared just for this occasion.*

**Encounter**
**Immediate Reaction** **Melee** 1
**Requirement:** You must have a trap-making kit on your person.
**Trigger:** An enemy enters a square adjacent to you.
**Target:** The triggering enemy
**Attack:** Intelligence + 2 vs. Reflex
*Level 11:* Intelligence + 4 vs. Reflex
*Level 21:* Intelligence + 6 vs. Reflex
**Hit:** 1d6 + Intelligence modifier damage.
*Level 11:* 2d6 + Intelligence modifier damage.
*Level 21:* 3d6 + Intelligence modifier damage.
**Effect:** The target grants combat advantage until the end of your next turn.

## Additional Features

### Level 5 Feature

Few professions rival the trapsmith's trade for the inherent danger it holds. You are intimately aware of the threat that any hazard or trap presents, and you have honed your ability to sense when one might be nearby.

**Benefit:** You gain a +2 power bonus to Perception checks and Thievery checks.

### Level 10 Feature

Once you have mastered your trade, you can modify the traps you create on the fly to create specialized effects.

**Benefit:** You can forgo dice of damage from your *trip the trap* power for one of the following effects. You choose to forgo the dice after you know you hit, but before you make the damage roll.

If you forgo one die of damage, the target falls prone.

If you forgo two dice of damage, the target is dazed until the end of your next turn.

## Optional Powers

### Level 2 Utility Power

You can rig a simple alarm system to warn your party of intruders.

**Alarm Trap** — Trapsmith Utility 2

*A few specially enchanted bells can suss out a hidden foe.*

**Daily ✦ Arcane**
**Minor Action** **Personal**
**Requirement:** You must have a trap-making kit on your person.
**Effect:** You set an alarm trap in one unoccupied square adjacent to you. It lasts until the end of your next extended rest. If an invisible creature enters a square within 5 squares of the trap, the trap is destroyed, and the creature loses invisibility and takes a -10 penalty to Stealth checks (save ends both).

### Level 6 Utility Power

You have refined your skills to the point that your simple alarm can surprise and upset those who trigger it.

**Disorienting Trap** — Trapsmith Utility 6

*You lay a magical trap designed to bewilder an enemy.*

**Daily ✦ Arcane**
**Minor Action** **Personal**
**Requirement:** You must have a trap-making kit on your person.
**Effect:** You set a disorienting trap in one unoccupied square adjacent to you. It lasts until the end of your next extended rest. If an enemy enters a square within 5 squares of the trap, the trap is destroyed, and the enemy and each creature adjacent to it grants combat advantage and falls prone if hit (save ends both).

### Level 10 Utility Power

Sometimes you run into situations that require just a few moments more.

**It's a Trap!** — Trapsmith Utility 10

*You sense that something bad is about to happen.*

**Daily**
**Immediate Interrupt** **Close** burst 5
**Trigger:** A hazard, object, or trap within 5 squares of you triggers.
**Target:** You and each ally in the burst
**Effect:** Each target shifts up to half his or her speed and gains a +2 power bonus to all defenses against hazards, objects, and traps until the end of the encounter.

## Sample Trapsmith: Thorry the Unlucky

*"Always double check. Else? Boom! There goes yer hand—if yer lucky."*

Kobolds took two fingers on Thorry's left hand, or rather, a trap set by kobolds did. That Thorry didn't lose his arm and bleed to death earned him the moniker "the Fortunate"—a name he hates. Wish him good luck, and he winces; comment on a winning streak, and he spits a curse. Thorry calls himself "the Unlucky" and believes luck favors him only if he doesn't acknowledge it. Yet he won't admit this idea even to himself, lest luck somehow find out.

**Origin Story** As a young svirfneblin, Thorry had ambitions to be a baker, but the elders noticed he had quick reflexes and steady hands. So he was tasked with rooting out and dismantling traps set by kobolds around his warren, deep in the Feydark. Crawling through cramped passages, dagger clenched between his teeth, and carrying an oilcloth filled with tools, Thorry got to know all sorts of diabolical devices hatched from the wickedest minds.

He discovered he had a knack for analyzing traps, a talent that helped him figure out how to disarm one after just a few seconds of study. Whether a mundane pit or scything blade, or a magical glyph or curse, he could see the patterns and know just what to do to mess up the works. He was a natural, and thus he unwillingly found his calling.

Even the best trapsmith can't handle the strain forever. After a decade spent pulling apart kobold traps, losing his fingers along the way, Thorry had had enough. He sneaked away one night and slipped through a portal to the natural world, where he thought to earn a livelihood in a less dangerous profession. The trouble was, he didn't know how to do anything else. So he ended up hiring himself out to adventuring parties as a trapsmith. Figuring that dungeons hold fewer traps than he encountered on the front lines against the kobolds, he hopes to do this job only for a few years and then retire. Thorry is good at what he does, and despite everything he usually enjoys it. He has come to realize that he is a valued master of his trade, and he makes sure he is rewarded appropriately.

**Values and Motivations** Thorry is in this strictly for the money, though he does like to keep his hand in. He isn't willing to take stupid chances, with retirement so close. When hired on to an adventuring team, he bluntly advises the others on the best course of action. If he can pass on even a fragment of his experience and knowledge, he considers himself obligated to make the attempt. He takes pride in his work, though, and once he has started a task, he is unwilling to leave it unfinished.

**Roleplaying Thorry** In your line of work, being a little paranoid is an important survival trait. You comes across as dour and suspicious to those who have never spoken to you. That trait, along with your matted hair, disfigured hand, and scarred face, make you hard to approach. Those willing to make the effort, though, find you to be excellent company. You like to speak with people, having been a loner for most of your life. You have a dark sense of humor and tell quirky stories about your prior employment. Though you hope to escape that life forever, you're always willing to help—if the pay is right.

**Creating Thorry** If you choose to play Thorry, you need not keep him a svirfneblin. He might instead be a surface-dwelling gnome, or perhaps a former kobold trapmaker or a goblin scout making his way in the wider world. His talents are best suited to the rogue class, but the skill set of a ranger also works well for trapsmiths; you could consider a hybrid of both.

### DEALING WITH TRAPS

Some traps are designed to capture, others are meant to maim or kill, and certain traps delay or misdirect intruders. As a trapsmith, you're going to have to deal with someone else's trap at least as often as you set your own.

No matter the exact function of a given trap, it falls into one of two categories. Mechanical devices use physical components, such as tension coils, levers, and special releases that activate when triggered. Even a simple mechanical trap, such as a covered pit, is quite effective. Magical traps are more difficult but can be tailored to specific situations. For example, a rune might trigger a *sleep* spell only when unidentified intruders enter the warded area.

Disabling a trap doesn't have to mean destroying it. At the DM's discretion, you could make a hard Thievery check to reset a trap that is disabled if its requisite components are still intact. Alternatively, you could repurpose a trap by moving it to a more useful location.

In some situations, delaying a trap is just as useful as disabling or destroying it. When time is short, or you face other more pressing threats, you might want to hold off a trap's activation for a few moments until your companions get past. You can always devote your complete attention to analyzing the trap later. Such a check might be of moderate or hard difficulty for the trap's level, at the DM's discretion.

# Treasure Hunter

*"X never, ever marks the spot."*

Attaining wealth and glory might be a shallow and selfish goal, but treasure hunters are fine with that. They take on great risk and danger to dig up great riches. Treasure hunters also enjoy the thrill of the chase when seeking out valuable finds, sometimes to the point of addiction, and this adventurous spirit can be contagious.

Finding lost or buried treasure is much harder than it appears at first. Treasure hunters constantly crave more wealth. They generally learn just enough to find their quarry and care nothing for confirming legends or ancient texts—other than to plunder whatever they refer to. Some, though, learn to love the unique history of the antiquities they seek. Those without a formal education might study a subject related to their quest on their own, even becoming specialists on specific topics.

Treasure hunters are typically self-sufficient. Occasionally several work together to meet similar goals, but they do not trust each other. Each views the others as brigands and mercenaries out to steal their finds.

## Playing a Treasure Hunter

Treasure hunters are viewed as money-grubbing and selfish, for good reason. They are out for fame and fortune, but they aren't necessarily shallow. They bring considerable expertise to dungeon expeditions.

Treasure hunters who can operate without seeking employment are usually already wealthy. They do their job for the thrill of it, or to further their own collection. Many have been treasure hunters for years and have acquired the necessary experience to survive such a dangerous profession.

For your part, you despise the label of mercenary as insulting and inaccurate. Although you hire out your services to the highest bidder, fighting wars and obtaining antiquities are very different tasks—as you are quick to point out. You are pragmatic, insisting on a contract to ensure you have the resources needed to complete the job.

Pragmatism does not mean ruthlessness. Although you tend to your own interests first, you take care of those who travel with you. Treasure hunters worth their salt understand the value of a satisfied adventuring party and are more than fair when negotiating terms for the expedition. Many develop long-lasting relationships with their fellow delvers, bonded by the danger they face together.

## Building a Treasure Hunter

You can apply the treasure hunter theme to any character concept that thrives on risk-taking and exploration (even more so than the average adventurer). You might enjoy this theme if you wish to play a cunning character who enjoys overcoming difficult challenges through unconventional thinking. When creating your treasure hunter character, keep these story elements in mind.

**Adroit Dungeoneer** You are a skilled adventurer, able to adapt to any situation. Although your yearning for wealth and recognition drives you, you have earned a reputation for cleverness. You enjoy finding solutions to problems and applying your unique logic when dealing with unusual situations.

Throughout your career as a treasure hunter, you have had to deal with threats that are common in dungeons. Although each dungeon is unique, all share some features. You know these by heart and know how to handle each of them.

Your reputation speaks volumes about your sense of adventure and your proven experience. Employers love your attitude and are confident in your success at acquiring an relic or treasure.

### EFFICIENT TREASURE COLLECTION

It happens to every explorer (or so every explorer hopes): You find a hoard so big you can't take it all. At first you're excited, then frustrated. You have no choice but to prioritize the importance of treasure. Here are the key factors to consider.

**Portable:** Gems! What wonderful little things. Worth so much money but with far less weight. Skip the gold idols and pry the gems loose from their eyes instead.

**Rare:** Art objects and rare weapons fetch a pretty sum. Study up on the ancient civilizations of a region so you can grab the rarest stuff. When in doubt, go with whatever looks old (but not rusty).

**Magic:** With training in arcane matters, you can learn enough about spells to detect magic. You never know when some cheap-looking trinket turns out to have a great enchantment on it.

**Popular:** Finding a buyer isn't always easy, and human creations won't fetch the best price even if they're old. Go with antique items made by dwarves, cyclopses, eladrin, and tieflings (but only those from Bael Turath).

**Not Cursed:** Sure, every treasure hoard has some rumors of a curse floating around it. You'll figure out when to believe those rumors, one way or another. First piece of advice? Mummy treasure is always cursed. Always.

*Ella, a halfling warlock and a treasure hunter*

MILIVOJ ĆERAN

**Recognized Expert** Many of the world's famous treasure hunters are renowned for their expertise in recovering specific types of treasure and overcoming the threats that guard them from plunderers. You make sure to be as informed as possible about the places where you will be adventuring.

Another reason to specialize is simply a matter of business. Your choice is based on a given treasure's value, availability, and salability. You might be inclined to let the small fish fight over the latest fad while you bring back more lucrative pieces. On the other hand, you might join the crowd, knowing you are much more likely than the rest to get the goods.

**Living on the Edge** You are a thrill-seeker, constantly on the lookout for adventures that will sate your hunger for danger. Riches and fame aren't enough—you love living by the seat of your pants. You feel most alive whenever you get into a precarious situation and manage to avert the danger, all while showing off your skills.

Not many can boast of a life as exciting as what you have experienced, and you have no intention of slowing down now. To you, life is a one big treasure hunt, and the ultimate prize is a sense of accomplishment mixed with plenty of thrills. You will look back when you are old and say to yourself, "Whoa! I lived an amazing life!"

## Starting Feature

Treasure hunters develop something of a sixth sense when it comes to detecting the presence of a relic.

**Benefit:** You gain the *treasure sense* power.

**Treasure Sense** — **Treasure Hunter Utility**

*You have an innate sense of where treasure is located.*

**Daily**
**Minor Action** — **Personal**
**Effect:** Choose a single item. For the next hour, you gain a +4 power bonus to any knowledge check, Perception check, Streetwise check, or Thievery check that relates to finding or identifying that item.

## Additional Features

**Level 5 Feature** You have become accustomed to dealing with rival treasure seekers as well as the hazards that face any adventurer. Because of this, you can better handle a particular type of peril, whether physical, social, or intellectual.

**Benefit:** You gain Skill Focus as a bonus feat.

### Level 10 Feature

Whether it be a tight dungeon corridor or an altar room of a forgotten god, treasure hunters are always fighting in close quarters. You have learned how to maneuver and fight in these environments and have adjusted accordingly.

**Benefit:** You do not take the normal attack roll penalties for squeezing or being prone.

## Optional Powers

All treasure hunters realize that situations can change at the drop of a hat and have honed their ability to survive. You can choose one of the following powers instead of one given as a class or race option.

### Level 2 Utility Power

With a well-placed attack or a lightning-quick disarming of a trap, you can make your own luck, allowing you to dart away.

**Stick and Move** — **Treasure Hunter Utility 2**

*You take advantage of a chance to act freely.*

**Encounter ✦ Martial**
**Free Action** — **Personal**
**Trigger:** On your turn, you succeed on a Thievery check or hit an enemy with a basic attack.
**Effect:** You shift up to 2 squares, and you can draw or stow one item.

### Level 6 Utility Power

Having no situational awareness can be a detriment to you and your party. You are able to bark out a quick order and keep everyone's attention on what's important.

**Pay Attention** — **Treasure Hunter Utility 6**

*Often, allies don't look out for the dangers found in dungeons. Sometimes you need to remind them.*

**Daily ✦ Martial**
**Free Action** — **Close** burst 3
**Trigger:** You roll initiative.
**Target:** You and each ally in the burst
**Effect:** Each target gains a +2 power bonus to his or her initiative check, and a +2 power bonus to all defenses during the first round of combat.
*Level 11:* +4 power bonus.
*Level 21:* +6 power bonus.

### Level 10 Utility Power

In order to have a successful and long-lasting career, you have to know your limits and how to push yourself beyond them.

**Exertion** — **Treasure Hunter Utility 10**

*You know how to dig deep to meet a challenging situation.*

**Encounter ✦ Martial**
**No Action** — **Personal**
**Trigger:** You make a skill check or a saving throw and dislike the result.
**Effect:** You reroll and must use the new result.

## Sample Treasure Hunter: Ella

*"Look, the Green Man saved me and he gave me these spells and all. Great, nice of him. But that weirdo also has my brother and sister, so I gotta get these treasures and finish this deal."*

The world is full of treasure waiting to be found. Seeking it is not only the sport of mortals—even otherworldly beings play this treacherous game. The Green Man changed Ella's life. She never knew his true name or where he came from, but she owes him a debt that she must repay.

### Origin Story

Not long ago, Ella and her halfling clan navigated the waterways as they had for generations. Simple folk, they traded and fished as they followed the rivers.

One day the clan headed into unknown territory. Other travelers warned them of the lands ahead, reputed to be haunted by will-o'-wisps and other strange things, and infested with goblins. The halflings ignored the warnings and pressed on. Goblins ambushed their flotilla, launching flaming arrows from all sides. The halflings fought back as best they could, but they were outmatched. Ella feared for her brother and sister, who were many years younger than her. She scooped them up, leaped overboard, and swam for shore.

They clambered up the bank and ran into the forest as fast as they could, but the goblins saw them. Wolf riders pursued them over rocks and fallen trees, filling the woods with howls and laughter. On and on Ella ran, dragging her brother and sister with her, until the three stumbled into a clearing where a great, grassy hill rose like a turtle's shell from the forest floor. They climbed the hill, the goblins at their heels, but just as their pursuers were about to strike, a green figure erupted from the hillside. It slashed and cut at the goblins with an emerald blade, and in moments they and their wolves lay dead.

The figure turned to the halflings he had saved and said, in a musical voice, "I have given you three lives. Now you owe me a debt." The fey lord, who called himself the Green Man, explained how his enemies had bound him to this hill long ago and stolen his crown, scepter, and armor. In exchange for saving the lives of Ella and her young siblings, he demanded that she find the stolen treasures and bring them to him. To ensure she did as he demanded, he would hold her siblings hostage until every item was returned. If she failed or did not return, her brother and sister would remain with him forever.

The Green Man did not make such a terrible demand without giving the untested Ella some hope of success. They made a pact on that sylvan hill, an agreement that bound their fates and bestowed on Ella some of the Green Man's witchery. She emerged from his demesne armed with fey abilities, and now she scours the world in search of the stolen treasures.

**Values and Motivations** Ella never wanted this life, but it is hers now. She must seek out the treasure that the Green Man wants if she is ever to save her brother and sister again. To free her siblings from the archfey's prison, Ella cannot fail.

**Roleplaying Ella** You are strong and energetic, able to suppress your inner strife while you plunge into perilous dungeons. You are extremely protective of your family and clan, even though you try to seem carefree. You have become a real adventurer's adventurer and like to maintain that reputation. When no one is around to see, though, you weep for the lives of your brother and sister and vow silently to do whatever is necessary for their release. Nothing in the world matters more to you, and you will take any steps to see them home once more. Once they're safe, though, you might well jump right back into the adventuring life.

**Creating Ella** Ella is emboldened by the warlock powers bestowed upon her through the Green Man's fey pact. With the halfling's optional Charisma bonus, the deceptive warlock build from the *Player's Handbook* is the best choice.

If you choose to play Ella, you can have her belong to another race with strong family bonds, such as dwarf, gnome, or svirfneblin. Such a choice would require some changes to the circumstances of her quest and possibly involve a different class choice.

WAYNE ENGLAND

# Underdark Envoy

*"The dungeon you're heading into is inhabited. This expedition needs a face—and frankly, yours won't do."*

The Underdark is a dangerous place, and not just for the horrors that lurk in the darkness. The cities and enclaves that dot its murky caverns are hotbeds of spite and political intrigue. To survive for long in such societies, you have to know how to play the game. Physical prowess is no match for the wits of a skilled diplomat.

The great city-states of the Underdark were first established as collections of tribes with a shared need for survival. As the centuries rolled by, these settlements developed into self-sufficient communities and grew into nations. Their growth was aided by individuals who could seek out and interact with the other city-states to establish lines of communication. These representatives grew experienced at dealing with the different Underdark races and became expert diplomats and negotiators.

## Playing an Underdark Envoy

The power of persuasion can be a mighty weapon against any would-be foe. Underdark rulers have a vested interest in having the best envoys around. They appreciate the power of a well-placed rumor and greatly value those who, like you, can best advise them how to plant it. With a well-placed word, an envoy could single-handedly take down an entire community. In addition, constant political wars require specialized agents who can act as both messengers and spies.

As an Underdark envoy, you have trained within your city-state to refine your diplomatic skills, according to the houses and organizations that depend on your abilities. You spend much of your time studying the cultures of the various races you deal with, as well as the intricacies of interracial politics. Delivering a message in an unsatisfactory way during a crucial negotiation could severely damage an employer's plans.

## Building an Underdark Envoy

You might become an Underdark envoy if you delight in political intrigue, spying, and social maneuvering. Many successful political leaders were once envoys, whether due to merit and ability, or because they were able to orchestrate the removal of their predecessors.

Bards and rogues are natural class choices for this career path, as well as any character who has diplomatic talent, including clerics and warlords. Beings of

*Khiira, a drow bard and an Underdark envoy*

a gruff or introverted nature, such as dwarves, rarely become envoys. The drow have mastered the skill of diplomacy over centuries of cutthroat politics, and they have the most capable and dominant envoys in the Underdark. Consider the following story elements when creating your Underdark envoy character.

**Dark Delegate** You are an extension of your master's will, an instrument to further his or her interests. On returning from a mission, you are expected to relay not only the response of the other party, but also its tone and attitude. The more information you convey to your employer, the greater advantage he or she will enjoy in political power plays and future exchanges. If you are a freelance envoy, not bound to one employer, you seek to make a name for yourself as a neutral third party. In this capacity you manage labor disputes, conduct trade negotiations, and perform similar tasks, commanding a high wage for your services.

Yours is a precarious path. You not only deliver communications from your masters, but you also glean whatever information you can while on the job. Anything might give you a crucial advantage in future employment. Thus, you have to be very clever and perceptive, while at the same time appearing inoffensive. This sort of agent works against expectations and can include dwarves, duergar, or svirfneblin.

**Double Agent** A few Underdark envoys serve as double agents for a faction, generally to facilitate the collapse of a powerful political entity. Such people are rare, for the role is exceedingly dangerous, If you became a double agent, you likely received an offer to betray an employer after delivering a message on his or her behalf—along with a suitable financial incentive to secure such services.

As a double agent, you remain under cover much of the time while you work on behalf of another entity. You maintain your status within your ostensible employer's organization while feeding vital information to the other side, revealing yourself only if your activities are found out. In this role, you must be extremely skilled in both providing misinformation to your target and locating other agents who might have infiltrated the organization. You carefully collect information on everything that has been said and done to support your complex web of political scheming. Should you fail, you're likely to end up dead in some dark alleyway or Underdark corridor. Why do you take such risks? Was your choice

JULIE DILLON

personal, to take revenge on a cruel master, or did you do it just for the money?

**Mercantile Advantage** Not all Underdark envoys are spies or political plotters. You might use your skills to expand your own wealth and that of others by negotiating merchant treaties between powerful cities. Influential members of Underdark communities employ individuals such as yourself to help increase their economic power while protecting their political interests. Sometimes you manipulate markets to help your employer gain a monetary advantage over rivals.

Envoys of this sort can come from any Underdark race, and they might even include topsiders who are trusted in their dealings with those below. You could be a former explorer who decided to turn your talents to more profitable interests while still keeping your hand in the adventuring business.

### IT'S BETTER TO GIVE

For an envoy, bestowing a proper gift can quickly build a connection with the leaders of a city or group. The trick is to offer something that has greater value among that group than it does elsewhere.

**Dwarves** and **svirfneblin** both desire gems and precious metals. Svirfneblin have simpler tastes and accept uncut stones, but the pride of dwarves is insulted by such basic treasures. They prefer to receive artistic items crafted in the styles of different cultures. They'll sneer and deem these items inferior, too, but at least they're inferior and novel.

**Kobolds** are pathetically delighted by just about any gift—so rarely do they receive any—but bringing them dragon relics really earns their loyalty. Dragon scales or teeth appeal most to them. Statues or other representations of dragons pique their interest, too.

**Goblins** prefer simple pleasures: food, drink, and nasty weaponry.

**Drow** want slaves. A great many envoys object to slavery, though, so they instead offer items they claim were stolen from elves. Drow also accept monetary gifts, which they prefer in the form of silver coins.

**Beholders** shoot first and ask questions later as a rule. Those who do accept gifts enjoy seeing their own likenesses.

The simple, blind **grimlocks** take anything that has an interesting texture. They're unreliable allies at best, though.

## Starting Feature

An Underdark envoy is first and foremost a master of manipulation. Your well-chosen words unsettle your opponent, leaving it more susceptible to real damage.

**Benefit:** You gain the *insidious commentary* power.

**Insidious Commentary** Underdark Envoy Attack

*Your words are disarming to a potential foe and give you just enough of an opportunity to make an effective attack.*

**Encounter ✦ Martial**
**Minor Action** **Ranged** 5
**Target:** One creature
**Attack:** Charisma + 2 vs. Will
*Level 11:* Charisma + 4 vs. Will
*Level 21:* Charisma + 6 vs. Will
**Hit:** The target grants combat advantage until the end of your next turn, and your next attack against the target this turn deals 1d6 extra damage on a hit.

## Additional Features

**Level 5 Feature** You understand the cultures of the Underdark better than most. You use this talent to your advantage whenever you are below.

**Benefit:** You gain a +2 power bonus to Bluff checks and Diplomacy checks.

**Level 10 Feature** You are fully integrated into the market system of the Underdark and appreciate the subtlety of its inner workings.

**Benefit:** Add Deep Speech to the languages you can speak, read, and write. You also gain a +2 power bonus to Streetwise checks.

## Optional Powers

Underdark envoys must keep their attention focused whenever dealing with others, and they use a unique set of skills to be successful in their line of work.

You can choose one of the following powers instead of one given as a class or race option.

**Level 2 Utility Power** Sometimes the secret to good diplomacy is knowing when to exploit a social situation to get the drop on enemies. Doing so might not be honorable, but it keeps you and your friends alive.

**Practiced Herald** Underdark Envoy Utility 2

*You and your allies are not greeted with hostility, and thus you find a way to take advantage of a momentary lapse in your enemy's defenses.*

**Encounter ✦ Martial**
**Minor Action** **Close** burst 5
**Target:** You and each ally in the burst
**Effect:** Until the end of your next turn, each target gains a +1 power bonus to attack rolls, damage rolls, and saving throws.

### Level 6 Utility Power

Sometimes darkness is not enough of a cover for your activities. Learning some of the magic of the drow, you can make yourself literally disappear for a short time.

**Cloak and Dagger** — Underdark Envoy Utility 6

*You vanish from the vision of those around you.*

**Daily ✦ Arcane, Illusion**
**Move Action** — **Personal**

**Effect:** You become invisible until the end of your next turn. If you attack, the effect ends, and if you move, you cannot sustain it.

**Sustain Minor:** The invisibility persists until the end of your next turn.

### Level 10 Utility Power

A swift word can be better than a swift sword. You have learned how to defuse a situation quickly. When you speak about the virtues of cooperation, you can command a large audience.

**Pacifying Presence** — Underdark Envoy Utility 10

*Your soothing tone lulls your enemies into hesitation.*

**Daily ✦ Charm**
**Free Action** — **Close** burst 10

**Trigger:** You and your enemies roll initiative.

**Target:** Each enemy that can hear and understand you in the burst

**Effect:** Each target takes a –10 penalty to its initiative check.

## Sample Underdark Envoy: Khiira

*"No harm was intended, I'm sure. Now just take the dagger from my companion's throat, darling, and we'll talk alone."*

The life of an Underdark envoy is perilous, but never more so than for a drow who has spurned her house. Khiira did what she thought she must to survive, but she pays the price every time she draws breath.

### Origin Story

Khiira never let her status as seventh daughter stop her ambition. Anyone else in her position might have had her life cut short with a one-way trip to the sacrificial altar, or been forced to spawn draegloths. Khiira survived by talking her way out of any dire situation. Her mother, one of Lolth's nastier priestesses, recognized her daughter's talents and thought to use them to her advantage.

Before she could become another weapon in her mother's arsenal, though, Khiira chose her own path. She cultivated the acquaintance of Riellenzen, who acted as an envoy to a duergar outpost about ten miles away, and soon became his consort.

Khiira played her part well. She seduced the diplomat, earned his trust, and then, en route to the outpost, stuck a knife in his throat. Riellenzen's guards did not realize their master was dead until the party arrived and Khiira announced herself as the envoy. The guards dared not expose her lest the duergar take offense, so they played along. Khiira managed to negotiate a trade agreement with the infernal dwarves and earned their help, if not their friendship. She sent the drow guards back to her city with a letter explaining the terms and also Riellenzen's tragic end, and then she slipped away to the surface to escape what she believed was certain retribution.

Suspicion and hostility met Khiira at almost every turn in the upper world. Few people were willing to deal with a dark elf, for fear of opening their doors to drow legions. So, Khiira found other ways to put her talents to good use. She joined a few Underdark caravans, lending her expertise in the subterranean peoples and their language to help the merchants negotiate deals and gain safe passage. She gained a reputation for being someone in the know about Underdark folk and won a place in an adventuring group. She maintains as low a profile as she can, using false identities and disguise to stay a step ahead of the assassins she is sure her mother and Riellenzen's family have sent. Her caution might have been dismissed as paranoia—until her party was attacked by Lolthbound goblins. That encounter shook her enough that she now spares no effort to hide her trail.

### Values and Motivations

For Khiira, it's all about gaining the advantage, over any drow pursuers or anyone else she deals with. She walks a delicate line between earning a reputation as a negotiator and keeping a low profile. She hopes above all to one day be free of pursuit and to live as she wishes, but she knows how unrealistic such an expectation is. Honeyed words and a ready blade are the tools of her trade. She is coldly calculating in all her dealings, but her expertise with a rapier makes her more than capable in combat if things come to that.

### Roleplaying Khiira

You take great pleasure in your work, despite the constant danger. You come across as seductive yet coy, but you employ a sardonic manner of speech when not buttering up a potential contact. You always wear a crimson cloak over your chainmail—a color associated with your house—as your only concession to your origin. Your winning smile hides the constant terror just below the surface.

### Creating Khiira

Khiira is a drow bard who is unparalleled in her profession. If you choose to play her, you might instead make her a rogue, a ranger, or a hybrid incorporating two of those classes. Alternatively, she could multiclass in ranger or fighter.

*Korag, a dwarf barbarian and an Underdark outcast*

ERIC BELISLE

# Underdark Outcast

*"I have nothing left to rely on but myself."*

A lone figure, haggard and lean, scrambles through the tunnel as he peers fearfully over his shoulder. He bears marks of shame—scars from lashes and manacles, bruises, brands. Behind lies his home, from which he has been exiled forever. A pained look crosses his face before it is replaced by a determined grimace. The Underdark is not kind to the weak.

Underdark outcasts did not start out as subterranean vagabonds. Some were proud members of their underground society, exemplars of their race's customs or beliefs. They might have been dwarf artisans in the service of a king, or tribal warriors amid chanting goblin hordes. Something happened to disrupt their existence and drive them from their communities. Perhaps they committed a crime or dishonored the family name, or became disgusted by their people's ways. Whatever the reason, they have been cast into the depths to live or die as fate wills.

Underdark outcasts wander far from the place of their disgrace in search of a new life. Usually hated by members of their own society, they must rely on their own wits or the kindness of strangers to survive. Most remain underground out of habit, it being their birthplace, but others deliberately venture to surface realms—though they rarely find refuge there.

## Playing an Underdark Outcast

Everything was taken away when you were banished into the depths. If you can adapt to your new reality, you can survive and become self-reliant; if not, you will be an easy meal for a lurking predator. You have become as hard and relentless as the environment that created you. Even the lowliest goblin outcast has faced challenges that would make surface dwellers quake in fear.

As an outcast, you might live your whole life in the deep wilderness, whether as a hermit eking out a lonely existence or a mercenary hiring your sword or skill to explorers. Underdark outcasts are among the toughest individuals to be found in dungeons, and you make it your business to stay that way.

Your enforced solitude, shouldering the burden of shame or dishonor, has made you a sullen loner. In your heart, though, you crave to belong to something, and you seek out folk like yourself. Some outcasts shun the company of others, but you cannot bear the emptiness of the cruel caverns forever. As you brood on the events that led to your exile, you might wonder

what you could have done differently. The wilds close in around you, and that the only thing that can help you now is courage.

## Building an Underdark Outcast

Underdark outcasts come from races dwelling underground, such as dwarves, goblins, or svirfneblin. Many belong to folk who get a hostile reception from surface dwellers. They might be of any class or alignment, united only in their common disgrace. Your unique background inspires your personality, class, feat, and power selection. When creating an Underdark outcast, consider the following story elements.

**Disgraced Exile** Behind every Underdark outcast is a story, though it never ends well. You are defined by the circumstances that led to your banishment. The nature of your transgression varies wildly depending on your race and culture. Dwarves, with their emphasis on duty to the clan and personal honor, expel those who fail to live up to their responsibilities—a traumatic experience for any dwarf. Monstrous races, such as kobolds or orcs, are more likely to cast out one of their own because of a petty or violent disagreement, with the outcast the loser. The nature of your disgrace affects the way you interact with others in a group, especially if members of your race are among them.

What were the events of your exile? Were you a petty criminal, punished for your crimes? Did you break a dire social taboo, robbing you not only of home but of your dignity as well? Perhaps you betrayed someone important or failed to honor an agreement. Whatever your crime, why were you exiled rather than punished some other way?

The consequences of your banishment matter as well. Maybe you had to leave behind a promising life or something of importance, such as an estate or family. Consider also how your exile has changed you. Are you filled with bitterness and hate, plotting revenge against those who hurt you? Did you go as far away as possible and never look back? Maybe you were falsely judged or made a mistake you regret. Your circumstances might motivate you to undertake a quest to clear your name or undo a wrong.

**Outcast by Choice** Some Underdark outcasts leave their homes willingly. Such a choice is most common among evil Underdark societies, such as those of drow or kobolds. Once in a great while, circumstances can force one of their number to rise above the rest. Striking out into the deep caverns alone took uncommon courage, but you were driven by your convictions.

As a youngster, did you realize that there was something different about you? Perhaps your peers fought and cursed at each other while you were busy thinking. You might have been something of a social revolutionary, trying to drag your incorrigible folk out of their petty ways. How were your efforts viewed by your kind? Did some of these ideas start to catch on, challenging your chief's rule? You might have had no choice but to ostracize yourself; perhaps you are being hunted through the tunnels around your home.

### REASONS FOR EXILE

Given the variety of Underdark cultures, the reasons for being exiled are equally numerous. Here are some crimes for which exile is the usual punishment.

**Drow:** Consorting with slaves, blasphemy against Lolth, conspiracy against the leader of a conclave, dealing with devils or elves. (Such crimes are punishable by death, so drow who commit them usually choose exile before they are caught.)

**Dwarves:** Disobedience to a superior, dereliction of duty, cowardice in battle.

**Goblins:** A prank gone awry, overpopulation, a failed assassination attempt.

**Kobolds:** Blasphemy against Tiamat or a dragon, leading enemies back to the warren, setting a trap that caused kobold casualties.

**Orcs or Half-Orcs:** Physical weakness, seeking peace or diplomacy.

**Svirfneblin:** Theft, bringing shame to the family, unsafe or unsanctioned exploration or mining, repeated refusal of expected duties.

## Starting Feature

You can never go back. As you brood on the events that led to your exile, you might wonder what you could have done differently. The wilds close in around you, and the only thing that can help you now is courage. You are used to being a lone wanderer in the depths, and you rely only on yourself for survival.

**Benefit:** You gain the *alone and unafraid* power.

**Alone and Unafraid** **Underdark Outcast Utility**

*Although you crave companionship, you have learned to survive without anyone at your side.*

**Encounter ✦ Martial**
**Minor Action** **Personal**
**Requirement:** You must be at least 5 squares away from your allies.
**Effect:** Until the end of your next turn, you gain a +2 power bonus to attack rolls and all defenses.

# Additional Features

## Level 5 Feature

Being alone in the Underdark forces the outcast to become resilient and resourceful. Finding food and shelter becomes an everyday struggle, as does enduring the rugged caverns without assistance. Underdark outcasts learn to get by, or perish.

Your time spent wandering the Underdark as an outcast has given you a practical knowledge of underground survival. Furthermore, you are used to disease, starvation, and exposure.

**Benefit:** You gain a +2 power bonus to Dungeoneering checks and Endurance checks.

## Level 10 Feature

Having survived the wilds for so long, an outcast becomes toughened to even the most extreme long-term punishment. Whether made hard through physical ordeals or driven by a strong sense of self-confidence, you can go longer, farther, and deeper than any other dungeon delver.

**Benefit:** Whenever you spend a healing surge to regain hit points, you gain temporary hit points equal to 2 + your Constitution modifier (5 + your Constitution modifier at 21st level).

# Optional Powers

Even though Underdark outcasts might find companionship among dungeon explorers, many carry the weight of their exile for the rest of their days. Some of them lament the events that led to their exile, never letting go of their shame. Others embrace their banishment as a badge of honor, their bitterness and resentment giving them new strength.

## Level 2 Utility Power

Haunted by dishonor, many Underdark outcasts brood on the unfairness of their exile. Some let themselves wither away from this guilt, but others turn it into an affirmation. *Cast off disgrace* lets you negate a past failure so that you can excel in the future.

**Cast off Disgrace** — **Underdark Outcast Utility 2**

*Though you shoulder the burden of failure, you promise yourself it won't happen again.*

**Encounter ✦ Martial**
**No Action** — **Personal**
**Trigger:** You miss with an attack roll or fail a skill check or a saving throw.
**Effect:** Before the end of your next turn, you can reroll a single attack roll, skill check, or saving throw, but not the triggering one. You must use the new result.

## Level 6 Utility Power

Many Underdark outcasts live for years alone, scraping together sustenance. Even though you are in a group now, your sense of self-preservation still comes in handy.

**Self-Reliant** — **Underdark Outcast Utility 6**

*Your ally gives a revitalizing healing effect to another, knowing that you are capable of fending for yourself.*

**Encounter ✦ Healing, Martial**
**Immediate Reaction** — **Personal**
**Trigger:** An ally within 5 squares of you is the target of a healing power that does not heal you.
**Effect:** You spend a healing surge.

## Level 10 Utility Power

Used to lurking at the fringes of societies, an Underdark outcast is expert at avoiding notice in time to escape danger. If you're quick enough, *slink away* will get you out of range of an enemy attack.

**Slink Away** — **Underdark Outcast Utility 10**

*You skulk to safety just before your enemy uses a powerful area attack.*

**Encounter ✦ Martial**
**Immediate Interrupt** — **Personal**
**Trigger:** You are hit by a close or area attack.
**Effect:** You shift up to your speed.

# Sample Underdark Outcast: Korag the Clanless

*"This expedition will finance my passage to Cor Talcor. Should you think I do this only for coin, you insult my people—though they disown me."*

Among the dwarf clans, no crime is worse than abandoning one's comrade to death in the Underdark—and no punishment is worse than exile. For any dwarf, the burden of dishonor is an unbearable weight. For Korag, first son of the chief and the clan's most courageous warrior, the outcast's collar weighs heaviest of all. The blood of his clan is on his hands, and the mark of the outcast will forever be on his brow.

## Origin Story

The proud son of Beltag the Dutiful, clan chief of Barduum, Korag distinguished himself from his fellow warriors and tunnel wardens through unfailing courage and battle prowess. Beltag groomed his son to be his heir and to lead the clan deeper inside the mountains to coax gemstone and gold from the unyielding depths.

Although smitten with the lust for riches that affects his people, Korag believed mining was a task better suited to lesser dwarves. He saw himself as a great warrior who would lead his fellows to reclaim their primacy in the world. So when his father assigned him to watch over the workers in the

deep tunnels and patrol the nearby halls, he bristled. Where was the glory in being a guard? Despite his protestations, though, he knew enough not to argue with his father, and so he went into the Underdark to do as he was told.

Guard duty proved as dull as he had anticipated, and Korag chafed at what he felt was meaningless work—especially when reports reached him about orcs in the nearby mountains. To break the tedium, he befriended other dwarf warriors. One night, after swapping kegs and boasts, Korag talked the group into going orc hunting. The dwarves exited the mines and hunted down and slaughtered a number of orcs. They triumphantly returned to Barduum—only to find, to their horror, that the holdfast had been attacked in their absence. While Korag and his fellows were out hunting orcs, grimlock slavers had came up through secret ways, slaughtering the miners and nearly one-third of the clan.

Beltag confronted his son, demanding to know where he had been. Korag admitted his failure and took the blame for the warriors who went with him. He vowed to recover the abducted dwarves, but his father would not listen. Instead, he commanded the priests to shave and brand his son before the surviving clan and then cast him out for the rest of his days. Ever since, Korag has wandered alone, bearing his shame in silence while fighting to redeem himself.

## Values and Motivations

Korag wants more than anything to be accepted by his people, but the marks of shame that he carries will forever label him as a clanless exile. Dwarves shun him, viewing him as an animal or worse. Korag's faith in himself has been rocked by this treatment, and he struggles with feelings of resentment toward his people, which only adds to his shame. He craves acceptance and mutual respect among a group of brave companions.

Korag also longs to do something to redeem himself in his people's eyes. To accomplish this he has set a course for Cor Talcor, the fabled Fortress of Grudges (see page 69). Korag hopes that the ruthless warmasters of Cor Talcor will give him the training and discipline to perform the heroic deeds needed to reclaim his lost honor.

## Roleplaying Korag

You are outwardly proud, determined, and intense. Under the surface, though, you are a desolate soul tormented by the guilt of failure, though you would never show this side to your companions. You were raised to believe that strength and honor are everything, but your exile has tested both to the limit. You cling to the hope that you can one day return to your clan, but you know deep down that you will never live down the dishonor. You do everything you can to push these thoughts from your mind, usually by throwing yourself into whatever needs doing.

## Creating Korag

Korag's deep respect for his people and desire for redemption govern his actions. Growing up a in a noble family has given him the poise and martial training suited to the warlord class.

If you choose to play Korag, you could instead make him a svirfneblin or a goliath—both peoples with strong community ties. Changing Korag's class will give him a different feel. As a paladin, he might be driven by shame to perform heroic deeds; on the other hand, he could be a rogue, demonstrating his fall from proud warrior to slinking outcast.

### FOR THE DM: THEMES FROM OTHER SOURCES

This book capitalizes on the themes that have been presented here in various ways in later chapters. If a character has a theme from another source, you can still use the ideas from later sections of *Into the Unknown* by associating the character's theme with one from this book. Alternatively, you can devise a way that the character's existing theme relates to dungeon delving.

The alchemist from *Dragon* 399 can search for rare ingredients and the secret mixtures of races that dwelt underground, making elements associated with the lore hunter theme appropriate. The animal master from the same issue might seek to train subterranean beasts and is a good match to the deep delver.

If characters from the *Neverwinter Campaign Setting* delve under the earth, some of the themes are excellent fits to those you'll find here. The heir of Delzoun could be associated with the deep delver. The Dead Rat deserter might be associated with the treasure hunter or trapsmith. The Bregan D'aerthe spy works well if associated with the Underdark envoy theme or perhaps the Underdark outcast.

Even themes that originate far from any dungeon or cave can be used with material here if you put a creative twist on the concept. The dune trader from the *Dark Sun Campaign Setting* might be sent to make mercantile contact with those who live beneath the sands, making elements designed for both the Underdark envoy and deep delver appropriate. An Uthgardt barbarian from the *Neverwinter Campaign Setting* might have escaped the captivity of a mind flayer, making a character with that theme a good fit with the bloodsworn or the escaped thrall.
